Mr. RAKER. Oh, dear, dear, dear; I ought to stand pat, but I am not a standpatter; that is the trouble. But the Appropriations Committee assumes jurisdiction over all legislation. Here is a committee made up of men who have given years of study to and the work upon reclamation projects, but you come right in, and you take up the whole question of legislation in regard to irrigation and irrigation projects and put it on an appropriation bill knowing—and you must have known at the time—that is not proper. Then you say, "Why, you are ruining this project; you want to squander the people's money because you do not agree with us." Now, there is nothing in that at all. It is not a personal matter with me but is a question of trying to represent a part of the United States or represent and do my duty as a committeeman as nearly as I can. But it does seem there is no opportunity at times to assist in legislation through the committees upon which you have been appointed, and after you have given from 12 to 14 years' study to a proposition certain men come in from the Appropriations Committee and place legislation on this bill; and then, because you object to it when it is not rounded out at all, they say you are squandering the people's money.

Mr. TAYLOR of Colorado. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. TAYLOR of Colorado. How long has that committee been working on this project?

Mr. RAKER. They sent it up only about a month before we adjourned, and we had another matter, the Colorado River matter, on our hands. They brought in this matter with volumes of material and expected us to put it through during the last few days of the session.

Mr. TAYLOR of Colorado. Has not that committee been considering matters pertaining to reclamation projects and which would be applicable to this kind of a situation?

Mr. RAKER. No, not at all, when the matter was presented to us only a month before we adjourned. We could not do it because we did not have the time. Our time and attention had been given for months and months to the Colorado project, one of the greatest developments that could occur in the United States. This came on in the last days of the session and they expected us to put it through in a few moments.

Mr. TAYLOR of Colorado. As a matter of fact, that committee has been considering reclamation projects and the relief of reclamation projects for years and years.

Mr. RAKER. Yes. And I will say to the distinguished gentleman, who was formerly the distinguished chairman of that committee, that we passed during the last session two relief bills. And I say to you now, beyond all question, that if the department would enforce the law that is now on the statute books every project would be a success. But they will not do it; that is the trouble.

Now, Mr. Chairman, I am not going to be placed in the position of appearing to obstruct. I am willing to let these people work it out, because we will possibly get it before the committee again. However, it is wrong in principle. I am for economy and building up the country, but alone you can not do much. These people say they can accomplish it, and in order to give them that opportunity I ask unanimous consent—you see I am better than you think—that I may withdraw my point of order.

The CHAIRMAN. The gentleman from California asks unanimous consent to withdraw his point of order. Is there

objection? [After a pause.] The Chair hears none. Does the gentleman from Utah [Mr. LEATHERWOOD] desire to withdraw his amendment?

Mr. LEATHERWOOD. Mr. Chairman, in view of the fact that the gentleman from California [Mr. RAKER] has withdrawn his point of order I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. The gentleman from Utah asks unanimous consent to withdraw his amendment. Is there objection? There was no objection.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent to withdraw the motion I made to strike out the paragraph.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to withdraw the motion he made to strike out the paragraph. Is there objection?

There was no objection.

Mr. CHINDBLOM. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CHINDBLOM. Is the ruling of the Chair withdrawn?

The CHAIRMAN. Some gentleman should ask unanimous consent to restore the language to the bill.

Mr. COLTON. Mr. Chairman, I ask unanimous consent that the paragraph in the bill remain as reported by the committee.

The CHAIRMAN. The gentleman from Utah [Mr. COLTON] asks unanimous consent that the part of the paragraph which went out on a point of order may be restored. Is there objection?

There was no objection.

The CHAIRMAN. That leaves the paragraph intact without amendment.

Mr. LEATHERWOOD. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Utah offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LEATHERWOOD: Page 74, line 7, after the word "reservoir" insert the words "Utah Lake control."

Mr. LEATHERWOOD. Mr. Chairman, I desire to say a word with reference to the amendment, which makes the language of the paragraph more explicit.

In the bill the appropriation designates the first division of the Salt Lake Basin project. The Water Storage Commission of the State of Utah and the Reclamation Service have agreed that the first division consists of three things or three steps; one is the construction of a dam at Echo, the other is the construction of the Weber-Provo Canal, and third the control of Utah Lake.

The amendment does not affect the status of the Government at all and simply makes plain what the people have already agreed upon. I will say to the Chair and to the gentlemen of the committee that I have taken this matter up with Doctor Mead and there is no objection so far as the Reclamation Bureau is concerned, and it simply makes clear what we are referring to as the first division. I hope the committee will accept the amendment.

Mr. CRAMTON. Mr. Chairman, I am not particularly enthusiastic about the amendment. As I understand the situation, at the most nothing more would be done with reference to this branch of the project than something spent for investigation, and no increased appropriation is requested and no construction is to be undertaken. It is simply in the nature of an investigation and does not commit the Government to that branch of the project, and in view of this era of good feeling that has suddenly come upon us, I can not find it in my heart to obstruct the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Utah [Mr. LEATHERWOOD].

The amendment was agreed to.

The Clerk read as follows:

Yakima project (Kittitas division), Washington: For construction of the Kittitas division and incidental operations, \$375,000: *Provided*, That no part of this appropriation shall be used for construction purposes until a contract or contracts in form approved by the Secretary of the Interior shall have been made with an irrigation district or with irrigation districts organized under State law providing for payment by the district or districts as hereinafter provided. The Secretary of the Interior shall by public notice announce the date when water is available under the project, and the amount of the construction costs charged against each district shall be payable in annual installments, the first installment to be 5 per cent of the total charge and be due and payable on the 1st day of December of the third year following the date of said public notice, the remainder of the construction charge, with interest on deferred amounts from date of said public

notice at 4 per cent per annum, to be amortized by payment on each December 1 thereafter of 5 per cent of said remainder for 40 years, or until the obligation is paid in full: *Provided further*, That no part of the sum provided for herein shall be expended for construction on account of any lands in private ownership until an appropriate repayment contract in accordance with the terms of this act and in form approved by the Secretary of the Interior shall have been properly executed by a district organized under State law, embracing the lands in public or private ownership irrigable under the project, and the execution thereof shall have been confirmed by decree of a court of competent jurisdiction, which contract, among other things, shall contain an appraisal approved by the Secretary of the Interior showing the present actual bona fide value of all such irrigable lands, fixed without reference to the proposed construction of said Kittitas division, and shall provide that until one-half the construction charges against said lands shall have been fully paid no sale of any such lands shall be valid unless and until the purchase price involved in such sale is approved by the Secretary of the Interior, and shall also provide that upon proof of fraudulent representation as to the true consideration involved in any such sale the Secretary of the Interior is authorized to cancel the water right attaching to the land involved in such fraudulent sale; and all public lands irrigable under the project shall be entered subject to the conditions of this section which shall be applicable thereto: *Provided further*, That no part of the sum hereby appropriated shall be expended for construction until a contract or contracts shall have been executed between the United States and the State of Washington pursuant to its land-settlement act embodied in chapter 188, Laws of 1919, as amended by chapter 90, Laws of 1921, and by chapters 34 and 112, laws of 1923, or additional enactments, if necessary, whereby the State shall assume the duty and responsibility of promoting the development and settlement of the project after completion, including the subdivision of lands held in private ownership by any individual in excess of 160 irrigable acres, the securing, selection, and financing of settlers to enable the purchase of the required livestock, equipment, and supplies, and the improvement of the lands to render them habitable and productive. The State shall provide the funds necessary for this purpose and shall conduct operations in a manner satisfactory to the Secretary of the Interior: *Provided further*, That the operation and maintenance charges on account of land in this project shall be paid annually in advance not later than March 1, no charge being made for operation and maintenance for the first year after said public notice. It shall be the duty of the Secretary of the Interior to give such public notice when water is actually available for such lands.

Mr. RAKER. Mr. Chairman, I move to strike out the last word. I shall not make any point of order, and the time has probably passed in which to make it. I just want to call the attention of the House to the fact that this is practically the same provision that was contained in a previous item.

It is unfortunate we are compelled to have legislation on an appropriation bill, and I hope we will be able to get through real, genuine reclamation legislation by the proper committee before the House adjourns, so we will be relieved from this anomalous method of legislating in regard to these various reclamation projects.

Mr. CRAMTON. Mr. Chairman, I agree heartily with the gentleman from California. There is an urgent need of general legislation on this subject. There absolutely must be such legislation. This committee did not want to put these limitations in the bill, but when the head of the Reclamation Service says that without further provisions the law is unworkable, we did not believe in starting construction of several projects without these provisions. The gentleman's committee owes it to the House to bring before us well-considered legislation that will give a complete program and do away with the necessity of action such as this by this committee.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Riverton project, Wyoming: For operation and maintenance, continuation of construction, and incidental operations, \$790,000.

Mr. SUMMERS of Washington. Mr. Chairman, I move to strike out the last word.

I want to make some observations in regard to an item which we have just passed.

The work of the Kittitas unit of the Yakima project is partly completed in that a dam has already been constructed that makes storage water available. This is repayable under the old reclamation law.

The appropriation made two or three days ago in the deficiency bill is repayable on the basis of 5 per cent of gross returns from the farms. This bill has a provision for 40-year repayment with interest. Therefore if I should own 80 acres of land under the Kittitas unit, when it comes to repayment I would be operating under three separate contracts. I believe we all agree that that would not be a businesslike

procedure. However, this is not the time or the place to try to amend this bill in that important respect; but I do hope that before the bill is finally passed these inconsistencies may be taken into consideration and that a satisfactory, reasonable, and businesslike system of repayment may be worked out so that our people will know just what they are obligated to do.

I have no desire to offer an amendment at this time, because, as I say, this is not the time or the place; but it is a matter that certainly must have mature consideration and one that the two Houses must come to an agreement on before the legislation is finally passed. I am informed that the land law of Ireland gives 68 years for repayment with interest, and that after 20 years out of 400,000 purchasers there are only 350 delinquencies. Denmark gives 75 years for repayment with interest.

We may be coming to this, but America moves more speedily, and I do not believe public sentiment would indorse such a plan, nor do I believe the settler would require it. A thrifty American citizen is always looking to the day he can pay off the mortgage during his own lifetime and leave his property unincumbered.

The provisos attached to this appropriation of \$375,000 for the Kittitas unit carry no fewer than 10 new limitations as to construction and repayment contracts.

It may be wholly impossible for the district to comply with some of the provisions.

On further consideration probably no committee would require that a private land sale be approved by the Secretary of the Interior.

The provision for the payment of interest is wholly out of accord with the theory of our reclamation law, under which we have been operating for 22 years.

For economical construction instead of \$375,000 the bill should carry at least a million dollars. On that basis it will require 10 years to construct and settle the project.

I want every reasonable and proper safeguard thrown around these appropriations, so there may be not the slightest question as to repayment, but beyond that we should not hamper and restrict a legitimate land-development project.

The Clerk read as follows:

To enable the Secretary of the Interior to meet the requirements of Article VI of the treaty of January 11, 1909 (36 Stat. L. p. 2448), between the United States and Great Britain for gauging the streams and determining the water supply of the northern or eastern tributaries of Milk River, Mont., including personal services in the District of Columbia and elsewhere; the purchase, exchange, hire, maintenance, repair, and operation of motor-propelled or horse-drawn passenger-carrying vehicles, \$10,000, to be expended under and in accordance with the provisions of the act of June 17, 1902 (32 Stat. L. p. 388), and amendatory or supplementary acts.

Mr. CRAMTON. Mr. Chairman, in the last session the Congress passed a relief act with reference to reclamation, giving authority to the department to grant certain extensions. The immediate authority was a blanket authority, but beyond that a discretion was given the department, and I hold a memorandum, just given out by the department yesterday, outlining, in brief form, the rules obtaining in this matter, and I ask unanimous consent to extend my remarks by inserting this statement.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to extend his remarks in the manner indicated. Is there objection?

There was no objection.

The matter referred to follows:

DEPARTMENT OF THE INTERIOR,
December 5, 1924.

Regulations designed to cover the deferment of dates on payments of charges, rentals, and penalties due from water users on Federal reclamation projects contained in the second section of the relief act passed by Congress May 9, 1924, were announced to-day by the Commissioner of Reclamation with the approval of the Secretary of the Interior. A summary of the regulations follows:

Every water user desiring an extension under section 2 must file a written application therefor in the office of the project chief clerk. The application must be filed on or before January 1, 1925, and must state:

- (a) The kind of charges due; that is, whether for construction, operation and maintenance, or water rental;
- (b) Whether extension has been granted or applied for under section 1;
- (c) That payment can not be made as required by section 1 (an affirmative showing to this effect is necessary under the act);
- (d) For what extension under section 2 application is made; that is, whether the charges are to be spread equally over the remaining

construction installments beginning with the year 1925 or one-fourth over the first half of the remaining installments and three-fourths over the second half of such installments; and

(e) Briefly, the conditions which make such extension necessary (data furnished in connection with former applications, reliable information in the project office or in possession of the bureau from other sources may be utilized).

The board of directors of the water users' association or irrigation district affected will be requested to take action on applications for relief. Following recommendations by such board the applications will be considered by the chief clerk in connection with such data as are available touching the general conditions of the unit in question and the division of the project involved, and thereupon will submit recommendations to the Commissioner of the Bureau of Reclamation through the office of the Director of Finance, whose recommendation will also be submitted with the transmittal of all papers to the commissioner. If the application is approved as submitted, the decision of the commissioner will be final. If application is rejected in whole or in part by the commissioner, an appeal will lie to the Secretary of the Interior.

Extension of time may likewise be granted to a legally organized group of water users, such as an irrigation district or a water users' association. This is construed as applicable either to districts or water users' associations having contracts with the United States for direct payment of water charges, which in turn are collected by the district or association from the individual water users, or those districts and associations having contracts with the United States executed in the preliminary stages for refund of project investments in general terms and with whose shareholders the United States has subsequently executed water-right applications or contracts now in force and upon which collections are made by the United States directly from such individuals. In such cases the necessity for relief to be granted in the aggregate may be made to appear by individual showings, made in manner and form satisfactory to the Secretary of the Interior, of the general financial and economic conditions in the area involved. Applications so made will be handled in the same manner as those by individuals, except as to the action thereon by the board of directors of the district or association, which in such cases will be unnecessary.

The act requires that applications under section 2 must be filed on or before January 1, 1925, and must be passed upon by the Secretary of the Interior on or before March 1, 1925. Applications made under this section should be passed upon promptly by the chief clerk, the association or irrigation district, and the Director of Finance, and all papers transmitted to the commissioner, whose action upon them will be taken in sufficient time to allow consideration by the Secretary of the Interior before March 1, 1925. (P. N. 8529.)

The Clerk read as follows:

For investigations as to the causes of mine explosions, methods of mining, especially in relation to the safety of miners, the appliances best adapted to prevent accidents, the possible improvement of conditions under which mining operations are carried on, the use of explosives and electricity, the prevention of accidents, and other inquiries and technologic investigations pertinent to the mining industry, including all equipment, supplies, and expenses of travel and subsistence, \$400,000, of which amount not to exceed \$58,000 may be expended for personal services in the District of Columbia.

Mr. TAYLOR of West Virginia. Mr. Chairman and gentlemen of the committee, I move to strike out the last word.

When the Interior Department appropriation bill was before the House last January I offered an amendment to that part of the bill pertaining to the Bureau of Mines which would have given the bureau the sum of \$400,000 for the investigation of mine explosions and other mining accidents, looking to the safety of the many miners who are engaged in this very useful yet hazardous occupation throughout the country.

My amendment at that time was defeated by a small vote. I am pleased to note that the present bill carries an appropriation of \$400,000, which is an increase of \$40,232 over the appropriation of last year.

Loss of life among the men engaged in the bituminous mines of the country is appalling. Last year I called attention to the fact that in a series of eight mine explosions, embracing as many States where bituminous coal is produced, 362 brave men had met death through this one cause alone. Further investigation discloses the startling fact that for the year 1922 explosions in five States claimed the lives of 268 men. In the year 1923 a total of 286 miners were killed in a series of seven explosions embracing five bituminous coal producing States. Of those killed in 1923, 37 were in my State and 27 in my district.

Figures for the current year are available only to June 30, yet they show that for that short period 375 miners have been

killed in mine explosions, 119 being killed in one explosion in my State.

Investigation by the Bureau of Mines as to the cause of these mine explosions shows that of the 25 explosions occurring 21 were propagated by coal dust. A total of 2,403 men were at work in the mines affected, and 929 were killed and 119 were more or less seriously injured. During the same period of time 12 accidents due to the explosion of gas claimed 92 lives in the anthracite mines. In an effort to reduce to a minimum these frightful disasters, which take their toll of life and property, the bureau has issued a bulletin on "Stone dusting or rock dusting to prevent coal-dust explosions, as practiced in Great Britain and France." In behalf of the safety of the miners who work in my State I secured more than 400 of these bulletins and sent one to each coal company in my district and a few to other sections in hopes that something might be done to lessen the loss of life and the great destruction of mine property.

It must not be presumed that mine explosions are the sole cause of loss of life in our bituminous mines. During the year 1923 a total of 900 deaths were caused by falls of roof and coal, 1,350 by haulage accidents, 1,550 by explosives, as many by electricity, and several hundred in other ways. I feel that the Bureau of Mines is to be commended for its splendid research work and for the cooperation it gives to the Department of Mines in the various States in an effort to make this hazardous undertaking safer and better in every respect, and every dollar which is needed for this work should be cheerfully appropriated. I am more than glad that for this year a substantial increase is carried in the bill for this work, and this increase somewhat alleviates the feeling of regret that I experienced last January when my amendment for this very sum which is now appropriated was rejected.

Mr. CRAMTON. Mr. Chairman, I recall the interest of the gentleman from West Virginia in this item last year. I agree with him as to the importance of the work carried on. In my judgment it is one branch of the bill where some further increase in activity should come at an early date. It is a work of great importance, and I think there are further needs to be met. A year from now we should have some further increase.

The Clerk read as follows:

For inquiries and investigations and dissemination of information concerning the mining, preparation, treatment, and utilization of petroleum and natural gas, including economic conditions affecting the industry, with a view to economic development and conserving resources through the prevention of waste; for enforcement of the provisions of the act of February 25, 1920, relating to the operation of oil, oil shale, and gas leases on the public domain, for enforcement of laws relating to the operation of oil, oil shale, and gas leases on Indian and public lands and naval petroleum reserves; for the purchase of newspapers relating to the oil, gas, and allied industries: *Provided*, That section 192 of the Revised Statutes shall not apply to such purchase of newspapers from this appropriation; and for every other expense incident thereto, including supplies, equipment, expenses of travel and subsistence, purchase, exchange as part payment for, maintenance, and operation of motor-propelled passenger-carrying vehicles, and the construction, maintenance, and repair of necessary camp buildings and appurtenances thereto, \$456,000, of which amount not to exceed \$56,200 may be expended for personal services in the District of Columbia.

Mr. BLANTON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 87, line 8, after the word "Columbia," strike out the semicolon and insert a colon and add the following: "*Provided further*, That no part of the appropriation herein provided shall be expended for motion-picture films or any other medium that advertises business or products of individuals or corporations."

Mr. BLANTON. Mr. Chairman, the preceding paragraph, that relates to ores and other minerals, says:

Provided, That no part thereof may be used for investigation in behalf of any private party.

Why did not the committee put that kind of a restriction on this clause, which permits the public money to be expended in disseminating information about petroleum and fuel oil? I have been wondering for a long time under what provision of law the Bureau of Mines has a right to expend large sums of money making motion-picture films that advertises the private businesses and products of corporations and individuals before the country and letting the public pay for the advertising. I would like for the chairman in his own time, not in mine, to explain to this committee and to the Congress and to the coun-

try why has the committee permitted the Bureau of Mines to thus expend the money without authority of law, and then put this unlimited paragraph in this bill furnishing them an excuse for continuing the practice.

I hold in my hand quite a large printed pamphlet, headed "Department of Interior, Bureau of Mines, Pittsburgh Experimental Station." Then the subject of it is, "List of motion-picture films and plan of distribution." It is dated February, 1924. It contains a tremendous list of motion-picture films that this Bureau of Mines has had made, partly at least, with the public money and which at public expense it has been distributing over the country. Do they advertise private businesses? Do they advertise products of individuals and corporations? Let us see if they do. Look in this bureau pamphlet at No. 77.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BLANTON. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BLANTON. Look at No. 77, page 6, of this pamphlet. It says:

Mexico and its oil. Four reels. Shows early attempt to produce petroleum and present operation of the Sinclair consolidated oil in Mexico.

Is that advertising private business? What interest has the Sinclair Co. in the dissemination of this kind of literature before the public? This document shows that these films were partly paid for by the Sinclair Oil Corporation. Is that the only bunch they are interested in? Let us see. No. 98 in this Department of the Interior, Bureau of Mines, pamphlet, that they are mailing all over the country, shows "The world struggle for oil." There are seven reels. Now listen to what it says. This is from the Department of the Interior. "Made in cooperation with the Sinclair Consolidated Oil Corporation." It shows that the Bureau of Mines, under the Secretary of the Interior, is cooperating with the Sinclair Oil Corporation for the purpose of making motion-picture films with the money of the people of the United States and disseminating it abroad, printed for advertising purposes.

I wish you would get the little red list on the back of this pamphlet and read where they are attempting to use the universities of the land to disseminate these films and advertise private business. It mentions the universities throughout the country from the North to the South and shows just how many films they have furnished to those universities free of cost, saying that other people can get them on application.

Mr. HOWARD of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. HOWARD of Oklahoma. Have they made any films of the Teapot Dome in connection with this?

Mr. BLANTON. The latest edition of the pamphlet that I have is February, 1924. I do not know how many additional ones they have issued since that date, but I want to say this to our distinguished friend from Michigan [Mr. CRAMTON], who is so ably in charge of this bill, that he owes this Congress a duty to safeguard this appropriation, to stop this Bureau of Mines from spending any of this money for advertising purposes, that may accrue to the benefit of individuals and corporations. If it is dissemination of proper information to the country, I have no objection to it. It is a means of educating the people in some instances where some motion-picture films are used. If it is proper, I am with the gentleman; but we ought to safeguard it. Is there any objection to the amendment that I offer? The limitation that I offer is the same kind of an amendment, the same kind of a proviso, that the gentleman himself and his committee has safeguarded the preceding paragraph with; but, concerning this oil paragraph, they saw fit to leave out all limitations. I am asking to have done for this oil paragraph what they saw fit to do for the other mineral paragraphs in the bill. I ask the gentlemen on my side of the aisle, the gentleman from Oklahoma [Mr. CARTER] and the gentleman from Colorado [Mr. TAYLOR], who so ably back up and support the chairman of the committee, if they do not owe it to the country to insist on safeguarding this item, and then we will back them up when they ask us to go along with the gentleman from Michigan.

Mr. CRAMTON. Mr. Chairman, I do not understand that the phraseology of the gentleman's amendment is a repetition of any language contained in any preceding paragraph. I agree with him, as we all agree with him, that no funds of the Government should be used for the purpose of advertising the

business of any individual; but it is an entirely different thing if the funds of an individual are used by the Government for the purpose of developing industry and making safer human life, and so forth. The Bureau of Mines, in its report for 1924, speaking of motion-picture films, say:

A lengthy series of striking educational motion-picture films, depicting the mining, preparation, and utilization of the various mineral materials, is made more readily available to the public by a new system of distribution through State or sectional centers.

The films relate to coal, petroleum, sulphur, iron, asbestos, zinc, marble, copper, natural gas, and other minerals. Such industrial processes as the manufacture of oxygen, the making of fire-clay refractories, the manufacture of automobiles, the methods of compressing air, and the quarrying of limestone are vividly shown. Other films illustrate dangerous and safe practices in mining, efficiency in the combustion of coal, the utilization of water power, and the operation of a gasoline motor. During the fiscal year about 100 additional copies of motion-picture films were added to the bureau's library. The bureau now has over 500 copies in circulation, valued at over \$1,000,000. These were produced at very small cost to the Government, the total expense of producing and making the copies being borne by the industries filmed. Copies of these films may be obtained for exhibition purposes from the Bureau of Mines, Pittsburgh, Pa., or from 30 State distributing centers.

There is nothing before us except that statement to the effect that for the purpose of showing safe and dangerous methods of mining and carrying on of industry these films are prepared solely for the purpose of safeguarding life. They have the cooperation of private interests. So, instead of an appropriation being used for the purpose of advertising individuals, individuals have furnished the money for the purpose of safeguarding life. The gentleman's amendment would not accomplish the purpose that he wants to accomplish, because it touches only one item in the bill, and there are many others, and out of this particular item I doubt if a penny would be used for the making of films. It is easy, of course, to get up here and talk about Sinclair and the Teapot Dome and things of that kind which a few months ago were thought to be advantageous politically, but which did not prove to be so advantageous as some thought; but we ought not to make up an appropriation bill guided by these appeals to prejudice in respect to a particular name. We want to look to the real purpose and result, and if the use of those films is to secure greater safety in industry, then I say that the individuals who contribute to make possible an activity that the Government does not finance should be given credit therefor rather than condemned.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. BLANTON. I suppose that if the Pierce Arrow Automobile Co.—

Mr. CRAMTON. Oh, why not make it a Ford? That is more popular in Michigan.

Mr. BLANTON. Or the Ford people—any of them—should see fit for advertising purposes to pay for the films—

Mr. CRAMTON. They would not get anywhere with the Bureau of Mines.

Mr. BLANTON. That the gentleman would be willing to have the Department of the Interior disseminate them over the United States?

Mr. CRAMTON. I fear it is hopeless to enlighten the gentleman on the subject.

Mr. BLANTON. Not on that subject in the way in which the gentleman is attempting to do it.

Mr. CRAMTON. I do not yield further. My statement is clear, that this should not be permitted, and is not permitted, I guarantee, for the purpose of advertising individuals, but it should be permitted, has been and would be, notwithstanding the gentleman's amendment, to use private funds to produce films to safeguard industry.

The CHAIRMAN. The time of the gentleman from Michigan has expired. The question is on the amendment offered by the gentleman from Texas.

Mr. WINGO. Mr. Chairman, I move to strike out the last word. I have enjoyed this colloquy between the gentleman from Texas [Mr. BLANTON] and the gentleman from Michigan [Mr. CRAMTON], the chairman of the subcommittee in charge of the bill. My judgment of the astuteness of the gentleman from Michigan was verified by the defense that he interposed. When my friend from Texas made his onslaught about the matter, I told, privately, one member of the committee that the only defense that the gentleman from Michigan could make would be the obvious one, namely, that he would plead

res adjudicata, and the gentleman has done that, and I think very properly. Evidently my friend from Texas has not heard from the election. The people have passed on all this. Why, the people said, "Certainly, go on and give Sinclair the oil reserves," and I am really surprised at the moderation of the committee. They should have inserted a provision in their bill that would require the Government to pay all of these expenses. It is an imposition upon private business to expect them to pay for these films, and I am somewhat surprised at both of the gentlemen. They ought to bring in a bill here that would be in keeping with the verdict of the people at the polls. I am an old-fashioned Democrat. I do not believe in the Government uselessly interfering with private business. I believe in the Government helping private business, and I am shocked at the position of both gentlemen. I really wish I had the time and the ingenuity and could prepare a proper amendment that would interpret the will of the people as expressed by the election, all through this bill, and require the Bureau of Mines and the Department of the Interior to turn over anything that may be left to these gentlemen with which to make moving pictures and do anything else, ad libitum, at Government expense.

Why, think of it, gentlemen! The chairman of this committee has disclosed that this hard-hearted Government has actually made Sinclair pay the expenses of making films, which is a damnable imposition upon private business, according to Republican view, and it ought not to be permitted by a righteous Congress. Oh, gentlemen, gentlemen, why quibble about these things. Seriously for a moment. I do not like the restriction in the preceding paragraph. We fail to appreciate the men of science who, unknown to fame in this country, dig and dig in these governmental departments and bring about great improvements. [Applause.] Improvements in the making of fertilizer, in safely appliances, in the oil industry, in the mining industry, and everything of the kind. The few paltry dollars which the taxpayers pay for these experiments bring many, many returns by way of health, happiness, and prosperity of the American people. [Applause.] I would be willing to spend more money on experimentations and throw the results open to the public. You want private business to have the benefit of the knowledge of public experiment in regard to improved methods, of methods in regard to mine safety, methods which will decrease the cost of production and bring about a higher and better state of civilization in this country, which is a legitimate expenditure. And so, why quibble about the difference between tweedledum and tweedledee. What is the cost of securing a film if it brings about a safer condition in the oil and mining industry and makes it safer for the men who toil?

Mr. CRAMTON. Will the gentleman yield?

Mr. WINGO. I will.

Mr. CRAMTON. I heartily indorse the last half—

Mr. WINGO. Indorse the first half, because I commended the gentleman in the first half.

Mr. CRAMTON. I desire the gentleman to understand that the limitation in the former paragraph prevents giving to all industries the result of their investigation. Its benefits of investigation do go to all industries without restriction. Of course, the line referred to does prevent their taking up an investigation which is for the personal benefit of one party.

Mr. WINGO. I want to call the attention of the gentleman to this, and I am not saying this now critically. I have had a little experience with one of the bureaus of this Government, the Bureau of Standards. I have been somewhat alarmed at the absolute waste as well as the jeopardizing of life in the flimsy construction in private residences and ordinary buildings. But in the course of my casual study of this question I ran into the hollow-brick proposition, and I called upon the Bureau of Standards in reference to their conduct of tests. Some time beginning in 1923, I think it was, or maybe a little earlier, I was told they had not completed those tests, but they would let me know. I waited to see how long it would take before they would let me know, and finally the department advised me that some time in 1923 the gentleman connected with this matter had delivered an address to a certain group and it could be found in a certain magazine under a certain date in 1923.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WINGO. I ask permission to speak for five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. WINGO. I could not get hold of the magazine in the Library, but wrote them commending their great speed in informing me about their work, which took nearly two years,

advising me to refer to a private address. First they said they had not released their report because they had not reached an agreement about the report on this ideal brick. I protested against that, but they came back with the response that was a very proper one to have been made, and that is that they had found that the tests were not fairly conducted, and they were proceeding to have another test; but the apparatus were not ready then but later on they would be. The point I want to make is this: They are doing a great work, and when the different bureaus of the Government, with their experts, do dig into these things that decrease the risks in the different industries of the country and will bring about improvements in construction of buildings, and in doing all of these different things, my only protest is that we do not give enough. My only protest is that they do not broadcast it enough; they do not help private business enough. Let us help the Government do something constructive, to build up and aid, and stop snooping around trying to restrict and hamstring everything that the people want to do.

Mr. BLANTON. Mr. Chairman, I rise in opposition to the pro forma motion of the gentleman. I started out by stating that I have no objection whatever to the dissemination of proper information by the Government that is of value to the business world. I raised no question about that. My amendment seeks merely to prevent private business from using the funds of the people to advertise itself through the departments of the Government.

Now, I hold in my hand a copy of the CONGRESSIONAL RECORD for January 7, 1922. There, in another body, a distinguished official of the Government called attention to the fact that certain newspapers reported that the motion-picture world had offered a Cabinet officer, the Postmaster General, \$150,000 a year salary to take charge of their organization and conduct its policy; and he then predicated as an affair affecting the interests of the country that that great influence for which \$150,000 a year was to be paid might be powerful enough to come in and use certain bureaus of the Government for the benefit of private industry, for the benefit of private advertising, if you please, to the injury of the public.

Let me read just a line or two. He said:

Mr. President, one of the most powerful influences in America is the motion-picture industry. I do not know how many billions of dollars are now invested in it, but the sum is very large. Hundreds of thousands of men and women are employed on it. It touches every part of the United States and its influence is second only to the press. It has grown by leaps and bounds. Persons have entered into it, at first making only small salaries, who now receive, in some instances, hundreds of thousands of dollars a year. It is a popular industry. Old men and old women attend "the movies" in order that they may be inspired and amused. Young children go, so that they may not only be amused but educated in current events.

When, before that date, I will ask you, did the Bureau of Mines ever spend any of the money of the people making films that advertise the private businesses of corporations and individuals? The gentleman from Michigan [Mr. CRAMTON] can not tell of one. He will find throughout this bill that of this \$238,000,000 that is turned over to the Secretary of the Interior, private businesses are using many millions of it for conducting research work that they themselves ought to conduct. I have no objection to the Government making such researches as will benefit the whole people alike. I have no objection to the Government giving the results of its investigations to the public as general knowledge. But it has no business spending the people's money along selfish lines that benefit only one corporation or two, or that benefit only one individual or a few of them at best.

I want to say that this is a serious question that I have presented here in my amendment. The gentleman from Michigan [Mr. CRAMTON] can not pass it off with a wave of his hand. I know that his committee of 35 will back him up, and my amendment will be defeated, and the Secretary of the Interior will continue to spend this money as it has been spent in the last two or three years. I am trying to stop it. If my amendment had been presented in the committee by a committeeman and the committee had brought it out, it would pass. But because, forsooth, some other of the 400 Members of Congress who have not the privilege of sitting on that exclusive committee of 35 offers a good amendment from the floor it must be killed, because the committee did not think about it first. But I have done my duty in opposing it.

The CHAIRMAN (Mr. TINCER). Without objection, the pro forma amendment will be withdrawn. The question is on agreeing to the amendment offered by the gentleman from Texas [Mr. BLANTON].

The question was taken, and the Chairman announced that the yeas seemed to have it.

Mr. BLANTON. Mr. Chairman, I ask for a division.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 5, yeas 34. So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Glacier National Park, Mont.: For administration, protection, and maintenance, including necessary repairs to the roads from Glacier Park Station through the Blackfeet Indian Reservation to various points in the boundary line of the Glacier National Park and the international boundary, including not exceeding \$3,400 for the purchase, maintenance, operation, and repair of horse-drawn and motor-driven passenger-carrying vehicles for the use of the superintendent and employees in connection with general park work, \$160,960; for construction of physical improvements, \$24,000, including not exceeding \$9,500 for the construction of buildings, of which not exceeding \$2,500 shall be available for a ranger station and \$4,000 for a garage and shop at Belton headquarters; in all, \$184,960.

Mr. McKEOWN rose.

Mr. OLDFIELD. Mr. Chairman, where is the Clerk reading?

The CHAIRMAN. Line 19, page 91.

Mr. OLDFIELD. Very well. I wanted to ask a question.

Mr. McKEOWN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Oklahoma moves to strike out the last word.

Mr. McKEOWN. Mr. Chairman, I want to call the attention of this House to the appropriations under the Bureau of Mines. I am not going to talk about parks at this time. I want to give you my idea about this Bureau of Mines, the maintenance of the Bureau of Mines, and the expenditure of money for the conservation and preservation of the mineral resources of this country; and I want to tell you what I think is the proper method by which to secure the money to preserve and conserve the mineral wealth of this country without burdening the taxpayers by direct taxation.

We import into this country millions of barrels of crude oil. We ought to secure revenue on the importation of that oil, and set that sum aside as a sum to be used in the conservation of the oil, the gas, and the other mineral resources of the Nation.

Now, if what the oil experts of the country tell us is true in reference to our oil supplies, the United States will not have any oil beyond 12 years at the present rate of production, consumption, and exploitation of crude oil. If that is true, the United States will be in a very bad condition at the end of 12 years. I think we are wasting our mineral resources in this country, and I think that there should be levied upon oil that is imported into this country a tax of at least 25 cents a barrel, to be set aside and used exclusively by the Government in discovering methods of production and in teaching and educating the people of the United States upon the question of the preservation of our mineral resources. I want to tell you now that you could not spend money to better advantage than in conserving the oil, the gas, and the other mineral resources that are being wasted, and the best way to get the money is to get it on the importation of crude oil into this country, and then you will not have to lay taxes on the shoulders of the taxpayers, and you will have a large sum of money and a sufficient sum of money to conserve the oil and gas and other minerals of the Nation.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. McKEOWN. Mr. Chairman, I ask for three minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. McKEOWN. Now, gentlemen, this is an important matter. You may say that because I take this position I take a position inconsistent with the policies of the party with which I affiliate; but my position is not inconsistent with the position of my party, because I propose that we take this money and use it in saving to the people of this country the great natural resources that we have here.

It has been but a short time—it has not been 30 days—since one of the greatest oil authorities in this country made a speech—and I think he knows what he is talking about—in which he stated that at the present time and at the present rate of exploitation of the crude oil in this country we would be without oil in 12 years. Just think what that means to this country. There ought to be some method by which we

could regulate the exploitation of oil. There ought to be some method by which we could educate our people in the use of oil products so as to save thousands upon thousands of barrels of oil that go to waste. [Applause].

The CHAIRMAN. The time of the gentleman from Oklahoma has again expired.

The Clerk read as follows:

Grand Canyon National Park, Ariz.: For administration, protection, and maintenance, including not exceeding \$1,500 for the purchase, maintenance, operation, and repair of motor-driven passenger-carrying vehicles for the use of the superintendent and employees in connection with general park work, \$100,860; for construction of physical improvements, \$91,500; including not exceeding \$10,300 for the construction of buildings, of which not exceeding \$3,000 shall be available for the construction of a ranger station on the north rim; not exceeding \$72,000 for the construction of a comprehensive sewage-disposal system at administrative headquarters on the south rim; in all, \$192,360.

Mr. OLDFIELD. Mr. Chairman, I move to strike out the last word for the purpose of asking the gentleman from Michigan [Mr. CRAMTON] a question with regard to the Grand Canyon National Park in Arizona. I have in my hand the hearings held on this bill, and on page 613 of those hearings I find a very lengthy letter from Attorney General Stone to Mr. CRAMTON with regard to certain cases which have been filed in the Federal courts of Arizona instituted against RALPH H. CAMERON and others, with regard to some of the lands, trails, and so forth, in this park. It seems from the letter of the Attorney General that he has done everything in his power to get action on the matters pertaining to these suits. This letter is dated November 21 of this year, and almost the entire year is covered by the letter. I would like to know from the chairman of the subcommittee [Mr. CRAMTON] whether these cases have been terminated and settled and whether the lands, mining claims, and so forth, are in the possession of the Government, and whether CAMERON and his associates are out of this park. It appears from the letter that the caretaker under Mr. CAMERON prevented the Government, or tried to prevent this Government, from cleaning up the premises at Indian Gardens. The Government's experts found that the water was impure and that tourists were drinking this impure water, probably impregnated with typhoid germs. I also read in this letter where they discovered a distillery or something of that kind there, and I just want to know why it is the Government has had so much trouble in this matter. It seems that at one time the courts continued these cases time after time without consulting the district attorney. I am wondering whether the same district attorney who was handling this case back in April and August is the present district attorney, and what has been done with this case. It seems from the letter of the Attorney General—and I have no doubt he has done everything he can do, and I am not criticizing him at all—that somebody is entitled to just criticism with regard to this matter. I should like to have the gentleman from Michigan explain it to me.

Mr. CRAMTON. Mr. Chairman, the course of the Attorney General in connection with these matters amply demonstrates that the present Attorney General of the United States, when he has an official duty to perform, does not regard personal or political influence in any degree. He has handled these matters with great efficiency and without any fear whatever. There were several aspects of this Grand Canyon situation which were discussed in the House somewhat last session, and at the present time no further action by us is necessary.

The Grand Canyon is a great gash some 10 miles wide, the level at the rim being approximately a mile above the level of the river. Much of it is taken up with formations of steep rock—

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. OLDFIELD. Mr. Chairman, I ask unanimous consent that I may have five minutes more in order to get this information.

The CHAIRMAN. The gentleman from Arkansas asks unanimous consent to proceed for five additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. CRAMTON. There are here and there places where trails can be constructed so as to make it possible to descend from the rim into the canyon, and there are, more rarely, places where fresh water would be available and opportunities for comfort stations and other things necessary for the public use of the region as a park.

The matter brought to the attention of the House last session was the purchase of what is known as the Bright Angel Trail, leading from the rim near the hotel on the south rim,

a very precipitous trail, as steep as could be negotiated. That trail belongs to the county of Coconino, in which it is situated. It is a toll trail. One dollar is charged for each animal making use of the trail, and there is a net revenue of some \$4,000 or \$5,000 a year to the county. The county having manifested a desire to dispose of the trail to the Government and a sort of understanding having been agreed upon with the officials of the county, the board of supervisors, an appropriation was carried in this bill last year of \$100,000, in very broad terms, available for the building of roads and trails in the park, with the proviso that it could be used for the purchase of the Bright Angel Trail from the county on terms acceptable to the Secretary of the Interior, and further providing that it could also be used in the improvement of the approach road outside of the park, leading from the Santa Fe Trail to the canyon, about 60 miles. The present automobile road is almost impassable at seasons of the year, so that those who travel by autos desiring to visit the canyon have had great difficulty at times.

The preliminary understanding that had been arrived at with the board of supervisors was to the effect that Congress would appropriate \$100,000, to be spent upon the improvement of that approach road, when the county would deed that trail over to us, the county not having funds available for the improvement of the trail. It was something of an inducement to them to have a road in their county leading to this great park improved at Government expense, with the probability of other appropriations to follow. The appropriation was made in the terms I have stated. There was some discussion about it actively down in that region and because of influences which may be imagined, a referendum being taken, the people of that county voted against the sale and that verdict of the people having been rendered has been accepted by the department as disposing of that matter of sale of the trail, and the department is proceeding with the construction of a trail.

That is the only toll road or trail in any national park.

It is not the most desirable trail that can be constructed; a portion of it is for long periods out of the rays of the sun where it is likely to be slippery, even ice occasionally forming there. At Yaki Point orders have now been given and I think, perhaps, the work may be under way for the construction of a trail leading from Yaki Point down into the canyon on to Tonto plateau and finally down to the river and up on the north rim, all of which can be done for from \$50,000 to \$60,000 or \$75,000. This will make available a trail on which no toll will be charged and a safer trail to travel. That is the situation as to the trail.

There were three reasons why this arrangement with the county for the purchase of the trail was sought. First, to remove the necessity for paying toll to get down into the canyon.

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

Mr. CRAMTON. I will ask, Mr. Chairman, unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to proceed for five additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. CRAMTON. This, of course, will be met with the construction of this new trail, which will be used almost exclusively by the public.

The second was to keep on good terms with our neighbors and have an adjustment that would be satisfactory to the county. We met the county officials, and we made an agreement which we kept, but the people of the county have repudiated the agreement. We have gone as far as we can on that line, and we now go ahead with the view that this is a national park to be developed for the benefit of the Nation and not entirely restricted to the views of that county.

The third was to remove the ownership of that trail as a sort of prop under some badly wabbling claims of one RALPH CAMERON.

One RALPH CAMERON had filed a number of mining claims, covering most of the strategic points in the canyon where any trail would cross or where comfort stations could be erected; for instance, the spot known as Indian Gardens, possession of which by CAMERON was at times justified by the claim that the buildings there were on the trail and were permitted by lease from the county, claims not true in fact. This is a place where some pure springs of water rise, some cottonwood trees have grown, and is a delightful place for a stop and a little rest when you have made the descent from the rim. It is a good place to eat your lunch, and so forth. The gentleman from Oklahoma [Mr. CARTER] and I about a year and a half ago stopped there and drank the water from the stream below.

We were not permitted to go to the springs above because of possession being held by caretakers in the name of RALPH CAMERON. Since, it has developed the very water we drank at that time and the water that would be drunk by any visitors making the descent was filled with typhoid germs. We got by, but it has not impressed us as a desirable facility to give the public in a national park. These typhoid germs got into that water between the time it left the springs and the time it reached this point below Indian Gardens, as it passed some old corrals and various remnants of the Cameron occupation.

CAMERON had a number of mineral claims in the canyon that were passed upon adversely to him by the department, and the Supreme Court of the United States in a case wherein he was a party, in 1920, sustained the department and ruled that the claims were not valid and that he had no right in those claims and should vacate them. That was in the spring of 1920.

Mr. OLDFIELD. Right there, have the orders of the Supreme Court been complied with, and have they been fully obeyed?

Mr. CRAMTON. Yes; but not until Attorney General Stone's work this year.

When we took these matters up last year along the line of the appropriation I have mentioned we also called the whole matter to the attention of the Secretary of Interior and the Attorney General with a view to having the decree of 1920 carried out; Secretary Work and Attorney General Daugherty first and later Attorney General Stone have followed up that litigation. There are various angles to that.

As to the claims that were passed upon in 1920, the correspondence that the gentleman from Arkansas [Mr. OLDFIELD] refers to is very interesting and worthy the study of anyone who wants to see how far some men sometimes will seek to go in using official influence against the public welfare.

The CHAIRMAN (Mr. SANDERS of Indiana). The time of the gentleman from Michigan has again expired.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent to speak for five additional minutes.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to proceed for five additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. CRAMTON. The Attorney General before Judge Jacobs received most extraordinary treatment, to say the least, but later Judge Sawtelle at Phoenix entertained contempt proceedings which resulted in Indian Gardens and the canyon being vacated by all outsiders, so that in September, for the first time in its history, the Grand Canyon National Park was exclusively in the control of the United States and its representatives.

Mr. OLDFIELD. And is now?

Mr. CRAMTON. Yes; and is now.

Of course, when those representatives went in and took an inventory of what they found at Indian Gardens, as set forth in the Attorney General's letter, they found raisin mash and other equipment that is more or less mysterious to me, but is said to have a meaning.

There were other claims of RALPH CAMERON and others, and in so far as the Department of Justice had any duty to perform, they are performing that duty and at an early date, no doubt, we will get a final disposition of those cases. There were some other claims that have not yet reached a point where the Attorney General can act. The platinum claims, filed in violation of the law creating the park, are pending before the General Land Office and are being expedited as much as the presence of appointees of a certain individual will permit them to be expedited. They have been pending in the land office and when there is a decision they will come to the department and we are anticipating a final decision very soon.

I will say that Governor Spry, head of the land office, and Secretary Work have taken great interest in bringing about a final disposition of the matter, and when finally disposed of the Cameron cases will have passed into history. With reference to the building of the roads, that is interesting and indicates how the Government has kept faith with the county. Not only was there appropriated \$100,000 but there was an estimate by the Interior Department of a second hundred thousand dollars which had been approved of by the Budget and would have been included in this bill, but they were awaiting the election to which I have referred and which came in September, and resulted as I have stated. The department was obliged to communicate the fact to the Budget, and the Budget struck that out. That accounts for there being no further appropriation for the improvement of that approach road.

I want to emphasize the great possibilities of development of this wonderful scenic region, hooking up the Grand Canyon with the Kaibab National Forest, the Zion National Park, and the Bryce Canyon, so that those who tour Arizona and Utah will find a continuation of scenic wonders that can not be excelled if equaled by any other region in the world.

Mr. OLDFIELD. The gentleman thinks that the Government has disposed of the Cameron claims, so that the Government can go ahead and beautify the canyon and have purer water?

Mr. CRAMTON. There is an appropriation in this bill of \$1,000 for cleaning up the Indian Gardens and making it accessible for the use of the public. As I say, the whole park is at the present time in the hands of the Government.

Mr. OLDFIELD. Is the district attorney who was mentioned still in office?

Mr. CRAMTON. He resigned a little while ago. The Attorney General several months ago appointed Mr. Baxter, of Phoenix, as special attorney general to handle all of these matters, and Mr. Baxter has done so very ably and efficiently.

Mr. OLDFIELD. I thank the gentleman for his explanation.

The Clerk read as follows:

Platt National Park, Okla.: For administration, protection, maintenance, and improvement, \$11,920.

Mr. SWANK. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 94, line 19, after the sum of \$16,920, insert a semicolon and the following: "For auto camps, including comfort stations, \$6,000; in all, \$17,920."

PLATT NATIONAL PARK, SULPHUR, MURRAY COUNTY, OKLA.

Mr. SWANK. Mr. Chairman and gentlemen of the committee, I am before you again asking for an additional appropriation for Platt National Park. Since coming to Congress I have appeared before the Subcommittee on Appropriations for the Interior Department, talked and argued with the National Park Service, presented the needs of the park to members of the committee, and have gone before officials of the Bureau of the Budget trying my best to obtain a suitable and proper appropriation for improvements in this park. For the fiscal year 1924 the subcommittee recommended an appropriation of \$10,000, which is an increase of \$2,500 over the preceding year, and for the next fiscal year the subcommittee recommends \$11,920 in the bill now under consideration. While I am glad to get an increase, this amount is wholly inadequate and too small for the expansion of the park to meet the purposes for which it was set aside. Last session I offered an amendment to increase the appropriation to \$25,000, which amendment was lost in the Committee of the Whole by nine votes. I prepared a like amendment to offer to this bill, and the chairman of the subcommittee, the gentleman from Michigan [Mr. CRAMTON], very kindly said that he would not object to an increase in the sum of \$6,000. This will bring the appropriation carried in this bill to the sum of \$17,920, which amount is unobjectionable to the National Park Service. I have therefore offered my amendment to increase the appropriation by \$6,000. A much larger appropriation is greatly needed to improve and prepare the park for the increased number of visitors who go there each year. A report by the superintendent of the park dated September 30, 1924, states that the city of Sulphur, on account of the great need of more money, spent between \$16,000 and \$17,000 on the park for community buildings, comfort stations, and extending the sewer and water lines. The progressive and enterprising people of Sulphur and Murray County should not be required to spend their own money on this park, but Congress should make sufficient appropriations for the proper maintenance of Platt and our other national parks. The citizens where the parks are located should not have to contribute to their upkeep, and this is the only park that I know of where the citizens must pay to assist in its maintenance.

The usefulness of our parks, the purpose they serve, and the number of visitors should be the chief consideration and the guiding purpose in making appropriations for their upkeep and improvement. Platt National Park was created by acts of Congress of July 1, 1902, and April 21, 1904. It contains 848.31 acres and is adjacent to the city of Sulphur, with its progressive, intelligent, Christian, law-abiding citizenship, unsurpassed by any other community in the country. These people always extend an honest, cordial welcome to visitors, and the hotel accommodations are good, with moderate and reasonable charges. Excellent and convenient locations are reserved for campers and no charges are made.

Mr. Cammerer, of the National Park Service, in his statement before the subcommittee, page 630 of the Hearings, said:

The park is located in southern Oklahoma and adjoins the city of Sulphur. It contains many medicinal springs, which are said to have high curative value. Physical improvements: Eleven miles of road, 1 stone office building, 6 cottages and outbuildings, 2 community buildings, 9 cement comfort stations, pavilions over 5 springs, 2 bridges, and 6 causeways, and public camp grounds having sewer and water systems and electricity for lights.

In the report of the National Park Service for 1922 the superintendent of this park stated:

During the past year the city of Sulphur, realizing the deplorable condition of the park and desiring to be a benefit to the many people coming here, built and paid for two fine community buildings, one at the Bromide camp grounds and one at the Cold Springs camp grounds. They dug sewer lines to each, installed three new comfort stations and repaired another, brought water to both these camp grounds in sufficient quantities for all purposes, and then, on top of this, they had electric wires put up that the campers might have lights. The city of Sulphur spent between \$13,000 and \$16,000 to help Platt National Park.

The report of the Director of the National Park Service for 1922, on page 66, states:

During the year the city of Sulphur, which adjoins Platt National Park, donated between \$13,000 and \$16,000 for park improvements. * * * This excellent cooperation on the part of the city of Sulphur was appreciated both by the visitors and this service. It is estimated that 246,998 visitors in all entered the park gates. As many of them undoubtedly repeated their visits from day to day, 70,000 individuals is considered a fair estimate of the travel. The park is a focal point for motor travel from all the Southern States west of the Mississippi. During the season the campers held several big meetings and community camp fires and organized a Platt Park Club with over 100 vice presidents in different States. The aim of the club is to tell others of the benefits to be derived from the health-giving waters of the park and to see that it has financial help to properly maintain it and for needed improvements. The wild animals maintained under fence in the park were added to—a fine bull elk from Yellowstone was received, four fawns were added to the deer herd, and a baby buffalo was born in the park. The park roads are especially in need of improvement, and adequate appropriations should be made to bring them up to a standard worthy of a national park.

On page 78 of the report of the Director of the National Park Service for 1923 is this statement:

During the year the city of Sulphur, which adjoins Platt National Park, continued its cooperation in every way possible in helping the park serve the thousands of visitors. Records show that 470,841 people entered the park gates, but, as many of them undoubtedly repeated their visits from day to day, 117,710 individuals is considered a fair estimate of the travel. The park is a focal point for motor travel from all the Southern States west of the Mississippi, and its popularity as a health and pleasure resort is increasing yearly. Little in the way of extensive improvements has been made, and to properly care for the increasing patronage there is needed larger annual appropriations for the extension of camp grounds, sewer, water, and light systems, and for general sanitation. The park roads were not constructed for automobile traffic; they are narrow and need to be widened and resurfaced.

The report of the Director of the National Park Service for 1923 and the hearings on this bill show the number of visitors in our leading parks, appropriations, and private automobiles entering the parks.

Visitors

Name of park	1920	1921	1922	1923	1924
Platt	28,000	60,000	70,000	117,710	134,874
Yellowstone	79,777	81,051	88,223	138,352	144,158

In determining the value of a national park we must consider the number of its visitors. Figures taken from the report of the superintendent of Platt National Park show the following visitors and campers:

Visitors for past six years:

1919	107,918
1920	173,810
1921	216,022
1922	246,998
1923	470,841
1924	639,495

Campers for past six years:

1919	689
1920	2,981
1921	10,528
1922	23,170
1923	74,589
1924	95,277

These figures show the wonderful growth of this park and the great increase in the number of visitors for the past six years. The visitors have increased from 107,918 in 1919 to 639,495 in 1924. The campers in the park have increased from 689 in 1919 to 95,277 in 1924. I believe that there is no other park in the country that will show such an increase in visitors and campers. The report of the director for 1923 shows that 50,000 private automobiles entered the park that year, and that number was exceeded only by Rocky Mountain Park with 51,800 automobiles. This report shows 312 fewer automobiles entering Rocky Mountain Park in 1923 than in 1922, while the automobiles entering Platt National Park increased by 20,000 during the same time. The superintendent of the park in his report to the director shows 470,841 visitors in 1923 and 639,495 visitors in 1924. The National Park Service in the hearings fixes the number of visitors for these two years at 117,710 and 134,874, respectively. While it is true that visitors were sometimes counted more than once, it is also true that thousands of people who visited the park were never counted at all, as they did not visit Bromide Springs, where visitors are checked. If those who visited the park and were never checked at Bromide Springs were counted the report would show thousands more visitors.

The report of the Director of the National Park Service for 1923 says:

To properly care for the increased patronage there is needed larger annual appropriations for the extension of camp grounds, sewer, water, and light systems, and for general sanitation.

The report of the Secretary of the Interior for 1924 states:

Platt Park, which is open all year, was visited by 134,874 visitors last year, compared with 117,710 in 1923. On July 4 alone over 20,000 people visited the Bromide Springs and drank of the medicinal waters. The park is gaining in favor as a health and pleasure resort.

Mr. Chairman and gentlemen of the committee, this park, like our others, belongs to the Government of the United States, is a part of its property, and as such should be properly maintained by sufficient appropriations. The Legislature of Okla-

homa appropriated some \$269,000 for the erection of a hospital for soldiers of the World War, and after a thorough survey made by prominent physicians located this hospital at Sulphur, near this park. This location was made on account of the healthful surroundings, the environments, and the beneficial results to be derived by the soldiers. This hospital was erected in 1922 with 80 beds, and included in the appropriation are \$100,000 by the legislature of 1923 for the construction of additional buildings for these soldiers. These additional buildings are now occupied with 48 more beds. This hospital is in charge of competent physicians and surgeons, and is excellently equipped for treatment of the patients. I have visited the hospital on many occasions, and always found it clean, the officials courteous and kind, and everything in first-class condition. The superintendent under date of December 15, 1923, said the first building was completed August 26, 1922, and was filled to capacity March 1, 1923, with an average of six to eight patients refused each month thereafter. The superintendent states that the value of buildings and improvements is \$280,075.95, and the value of the equipment \$62,000. The people of Oklahoma, ever mindful for the welfare of our soldiers, wanted a hospital for their care where they could be properly treated, in a healthful location, where the scenery is beautiful, surrounded by Christian influences, and for the best location selected Platt National Park, and this selection was wisely made. Sulphur also has an excellent public-school system and has the State School for the Deaf.

Mr. Chairman, this park has more than 30 mineral springs, is one of the most important parks in the United States, and will become one of the most noted health resorts in the whole world. In the quality and character of water these springs are unequalled. There is water absolutely pure, bromide, medicine, and sulphur water of all shades and degrees. You can find any kind of water here that is needed for your health and the purification of your system. People in good health who want a fine outing at little expense will get what they want here, will leave greatly refreshed, and if they are sick they will be cured. I cordially invite the Members of this House to visit this park, take a few drinks of the water, swim in the pools, and be rejuvenated. The effects of the water in this park can not be exaggerated. There is no park with water of such wonderful properties. In and near the park are many artesian wells. From one of these wells 2,500 gallons of pure, clear sulphur water runs each minute, and Buffalo Springs produce 5,000,000 gallons per day. Four of these gigantic artesian wells flow into elegant bathing pools, where the young, old, well, decrepit, and the men, women, and children swim, drink, breathe the pure air, and enjoy themselves.

Almost all forms of nervousness, stomach and digestive troubles yield surely and quickly to the use of the bromide water, and a few drinks will cure any case of sleeplessness and the visitor can enjoy that needed rest so essential to good health. The report of the superintendent states that the sulphur water is an excellent remedy for rheumatism, while as a blood purifier and for the treatment of all forms of skin diseases it is unexcelled. If a visitor does not care for the medicinal waters, there is an abundance of pure water unsurpassed at any place.

All classes of people from every section of the country visit Platt National Park, but it is essentially a park for people with modest means. Many people can not afford to go to the more costly parks, and they will find everything they want here. The hotels and other service are reasonable, and more accommodating people can not be found. If visitors do not want to stay at the hotels, excellent camping grounds, most conveniently arranged, are here for their comfort. People who can not afford great expense for needed treatment in most cases can be cured at this park with little expense. It costs nothing to drink the water nor to camp in the park. It is there for the good of the people. The city of Sulphur has a large, elegant, well-equipped auditorium, a new county courthouse, churches of all denominations, private hospitals, bathhouses, first-class physicians and surgeons, and a hospitable, honest citizenship. Any person will be pleased with a visit to this park. The Ozark Trail and the Bankhead Highway pass through Sulphur; it is on the principal motor route through the State and is also on the Santa Fe and Frisco Railroads. The roads in the county are fine and are being improved each year. The Director of the National Park Service also states that he hopes during the next year or two to be able to put some \$42,000 additional into road improvements at the Platt National Park under their road system.

Mr. Chairman, this is one of the greatest parks in the country, with visitors increasing faster than in any other park,

and is growing greater from year to year. While its chief value is in restoring people to health, renewing the vigor of youth, and giving its visitors a new lease on life with more promising prospects for the future, it is also a place of great natural scenery and beauty, resting in the foothills of the Arbuckle Mountains, overlooking the famous Washita River.

Congress should make appropriations each year sufficient to properly maintain this park with its wonderful future, to improve the roads, for the extension of sewer and water lines, for the erection of Government bathhouses, where people at small cost can bathe and be healed, and for the many needed improvements. The Government can not spend money to a better advantage than to use it in restoring people to health. The amount recommended is greatly inadequate, and I trust that the committee will adopt my amendment for a small increase, which will be appreciated.

Mr. CRAMTON. Mr. Chairman, this park I have not had an opportunity to visit, but I know something of its condition. There has been a feeling on my part, and I think on the part of others heretofore, that its development should not proceed very rapidly, due to the fact that there has been a tendency to mix politics with the administration of the park. I do not think there is any branch of the Government service where there is a higher morale obtaining than among the rangers and the superintendents of the national parks. I have deplored any entering wedge of politics into that system. I understand that that situation is being cleared up with reference to the Platt Park, the only one where it has prevailed. Knowing something of the great increase of automobile campers in that park, the crowds that go there, the item the gentleman from Oklahoma has presented is necessary, and, with these changed conditions of administration of which we are assured, I am satisfied it would be properly expended, and I do not object to the amendment.

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Oklahoma.

The question was taken, and the amendment was agreed to. Mr. SUMMERS of Washington. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk read as follows:

Yellowstone National Park, Wyo.: For administration, protection, and maintenance, including not exceeding \$5,100 for the purchase, maintenance, operation, and repair of horse-drawn and motor-driven passenger-carrying vehicles for the use of the superintendent and employees in connection with general park work, not exceeding \$8,400 for maintenance of the road in the forest reserve leading out of the park from the east boundary, not exceeding \$7,500 for maintenance of the road in the forest reserve leading out of the park from the south boundary, and including feed for buffalo and other animals and salaries of buffalo keepers, \$364,503; for construction of physical improvements, \$31,497, including not exceeding \$20,297 for extension of sewers and sanitary systems and garbage-disposal facilities, not exceeding \$10,000 for auto camps, and not exceeding \$1,200 for the construction of buildings; in all, \$396,000.

Mr. HULL of Iowa. Mr. Chairman, I move to strike out the last word in order to ask the chairman of the committee in regard to the safety of the roads in national parks. Several of us went through some of these parks a little over a year ago, and I think all were impressed with the unsafety of many of the roads in the national parks due to the fact that they were not double-track roads, and yet people were coming and going both ways. This was especially true in the road from Cody to the Yellowstone Park, a road that had a very heavy traffic and in many places was sufficiently wide for only one conveyance. I am wondering whether the appropriations are sufficient to widen these roads so that where people are invited to travel in the national parks they will find roads that are safe.

Mr. CRAMTON. Mr. Chairman, of course what is a safe road is a matter open to a difference of opinion. A man who for the first time travels on a mountain road where from the edge of the road there is a sheer drop of anywhere from one hundred to two or three thousand feet wants a road half a mile wide at least in which to feel safe, but there is force in what the gentleman has said as to the conditions of the roads. I do not know that they have been actually dangerous. They have been nerve racking to many people. The road in from Cody, some 50 or 60 miles, of course, is not in the park, and if I understand correctly the work on that has been done by the Forestry Service. I am not sure about that, but there is nothing carried here for that road. It is outside of the park. We have authorized a road-building program, which is carried

in a later item of the bill, which contemplates two and a half million dollars a year for road construction, and at the end of the three years' program that will mean an immense improvement in the roads in the national parks, both the widening of those most used now and constructing new ones as well.

Mr. HULL of Iowa. I presume that will take care of the situation. However, Mr. Chairman, it is not very difficult for a reasonable person to say when a road is unsafe. A two-way road that has room for only one vehicle is not safe, especially on a mountain trail, and that exists not only in one place but in several places in the national parks.

Mr. CRAMTON. I think that where that obtains in the national parks the gentleman will find there is a control system which prevents traffic both ways at the same time. For instance, the road from Nisqually Glacier up to Paradise Valley in the Rainier National Park, until the appropriation for the current year, was a one-way road and traffic went in one direction for an hour or two and then returned.

Mr. McKENZIE. Did I understand the gentleman to say that they have a sort of block system on those roads out there?

Mr. CRAMTON. Yes; B-L-O-C-K.

Mr. HULL of Iowa. I want to say that I think quite a number of Congressmen would bear me out in the statement that while we went over several hundred miles of these roads we did not find any block system, but we did find a great many roads where you could not pass safely a conveyance going in the opposite direction. That is the point I call to the attention of the committee. The roads where that will not be possible ought to be closed to the public or widened out.

Mr. CRAMTON. I agree entirely with the gentleman. We were building a road in the Sequoia National Park when I was out there with other members of the committee a year ago, which was 12 feet wide, with the certainty that very soon it would have to be widened. The cost of that widening later would be greater than it would be when the road was first constructed, and we then recommended the construction should be of a proper width in the beginning. With the two and a half million dollars a year for the next three years, that situation will be greatly improved.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

The Clerk read as follows:

National monuments: For administration, protection, maintenance, preservation, and improvement of the national monuments, including not exceeding \$400 for the purchase, maintenance, operation, and repair of motor-driven passenger-carrying vehicles for the use of the custodians and employees in connection with general monument work, and including \$500 for the construction of buildings, \$21,980.

Mr. MORROW. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment by Mr. MORROW: Page 97, line 12, after the comma strike out the word "and" and in line 13, page 97, after the comma insert "and \$20,000 for constructing a tunnel into Carlsbad Caves, N. Mex.," and change the figures "\$21,980" in line 13 to "\$41,980."

Mr. MORROW. Mr. Chairman, perhaps I am a little premature in offering this amendment because the department seems to be somewhat in conflict as to just what they want to do with these recently surveyed caves in New Mexico. We have there to-day perhaps the greatest caverns that have been discovered so far in the United States. They are wonderful decorations by nature, and we believe that these caves should be opened to the public of the United States, particularly for the tourist travel. Last year the Governor of the State of New Mexico and the Governor of the State of Texas met in these caverns with their staffs, and it was determined that they would unite and bring to Congress a proposal to open up these caves to the people of the United States. Both New Mexico State political conventions had a plank in each of their platforms declaring that the caverns should be opened up. The last Congress appropriated \$5,000 for a survey and exploration of them. They are something marvelous. The department at this time seems not prepared to present the matter as it should be presented to Congress, but I think we should continue the work which has been started. I am asking only \$20,000 for a tunnel into the caverns as a means of opening them for their educational value to the people. It has been said here in discussion, I believe, that education is the greatest factor in our American life. Nature presents here phenomena which the people ought to be permitted to see. The tourist travel is one of the great factors for development in the United States to-day. We have in these caves something

which the tourists want to see; \$20,000 is a small matter. At the present the only way in which you can go into these caves is by means of a bucket, let down by a small engine, 190 feet to the first landing. From there on the Government, through its explorations, has constructed steps in the earth, and you descend into these caverns a distance from the surface entrance of 1,000 feet to the lowest point. They are said to be the most wonderful in the way of caverns in the entire world.

The decorations there are something marvelous. The stalactites formed by the carbonate of lime and water dripping from the ceiling in some instances have formed stalactites 50 feet in length and wonderful to look upon. There is one wonderful room 500 feet in diameter and a quarter of a mile long. It is proposed to tunnel into this at this time and give the people some convenience to get into this part of the caves. It will only require \$20,000 to make this tunnel, according to the estimates of the Department of the Interior which I have obtained. I think we ought to go ahead and develop these caverns, not to the full extent at this time but to keep up the work the department has started. I ask permission to revise and extend my remarks by adding thereto an article written by Dana Johnson, the editor of the Santa Fe New Mexican. This article will give you valuable information concerning what these caverns really are.

The CHAIRMAN. The gentleman from New Mexico asks unanimous consent to extend his remarks as indicated. Is there objection? [After a pause.] The Chair hears none.

The article referred to is as follows:

A WORLD WONDER—THE CARLSBAD CAVERNS OF NEW MEXICO

A fairyland of elfin splendor; fit abode for spirits and pygmies and gnomes.

So enormous as to baffle conception; a city could be hidden there.

An immeasurable labyrinth; a chaos or bottomless chasms and illimitable upper spaces, where ceilings are hundreds of feet up in the void; barren of any living thing, a great catacomb remained in silence and darkness under southeastern New Mexico for thousands of years, until flying bats, which domiciled in the "attic" of this underground wonderland, never venturing into its unknown depths, led curious men into their habitat and finally resulted in the real discovery of what we now call the Carlsbad Caverns.

It is one of the most wonderful and unbelievable things in the world.

With a torch in your hand as you stand in the big room, its futile illumination shows little but emptiness and gloom, with ghostly gleams here and there in the farther darkness.

You light a bright flare, and on the instant leaps from the blackness a snowy, glittering, dazzling universe so fantastic and of such unearthly beauty that, try as you will, you can make it seem afterwards like nothing more than a dream.

It is like nothing of heaven or earth.

You can only think of Aladdin, albeit when you have rubbed your lamp not one jinn but thousands have sprung to your side.

Or you think of the fairy tales of Grimm and see before you that toward which his imagination was striving, but which was far beyond its reach.

The bells of fairyland are there; tap some of the millions of slender stalactites, and crystal notes peal softly; you can play a tune on these pearly icicles.

There are acres of frozen gardens, fantastic flowers in translucent marble; towering giant figures, brooding and sinister; slender minarets and spires; mushrooms 20 feet across. And always beyond is the black mystery of other gigantic, vaulted crypts and chambers. A thousand hidden doors in the forests of white coral lead you know not whither; all the artificial light that could be devised would still leave shadowy backgrounds beyond, would fail to enable your eye to measure this scene by any familiar standards. You can only guess at distances, dimensions, spaces.

It is not Dante's Inferno—there is nothing infernal about it; it is not of Doré, for behind the somberness is purest beauty; if you people it, it must be not with imps nor angels but with the elusive creatures of childhood's visions, of a midsummer night's dream.

All the known caverns of the world could be put into one of these rooms, or into the hugeness of the clefts, crevices, wells, and passages traversed before you reach the region of the stalactites and stalagmites.

The Carlsbad Cavern—whose total extent is still largely a matter of speculation—is a new-found, unsuspected treasure, which will mean more to the State of New Mexico than many gold mines. When the world learns of it nothing will prevent the world coming to see it. It rivals all the magnificent scenic places in America, and is utterly unlike any of them. It will make the little town of Carlsbad known on every continent. It will bring thousands upon increasing thousands of visitors to New Mexico in the coming years. Nothing has a greater lure than this old earth's underworld, and the Carlsbad Cavern will draw like a magnet. A visit to it will be remembered for a lifetime.

Its possibilities have already been called to the attention of Congress. But the Federal Government must be shown more fully, and a concerted and continuous effort made to secure the exploiting of the cavern on a big national scale. New Mexico can not handle it. It will take tens of thousands of dollars just to light the cave. The task will be like lighting a city, only a thousand times more difficult, owing to the nature of the terrain. Tunneling into the cavern, building trails, exploring it, protecting it from vandalism, advertising it to the world—all this will entail extremely heavy expense.

This cave bears the same relation to New Mexico as the Yellowstone to Wyoming and Yosemite to California. It is our greatest wonder and will bring people to see all the rest of our wonders. The people of the State should unite, regardless of location, in the task of securing its proper development by the Federal Government, for it will bring ultimately millions of dollars into New Mexico.

Mr. CRAMTON. Mr. Chairman, last year in a hurried manner an item of \$5,000 was put in for the construction of this tunnel, which we were given to understand at that time would accomplish the purpose. We made inquiry of Mr. Cammerer, and this is what he says:

Mr. CAMMERER. That cave at present is being entered through an old mining shaft. They mine guano in there. The company has taken thousands of tons of guano out, and you have to crawl over very precipitous inclines and around formations to get to the cave proper. The National Geographic Society has had its expert in there, and he says that cave surpasses anything there is in the world. That \$5,000 was to begin the boring of an entrance to the cave. Well, we used about \$1,000 of that for a survey. We wanted to find a place that was as close as possible to the outside, and we spent that \$1,000 for that, but we are not going to spend any more, because it will take, from our estimates now, \$18,000 to bore a tunnel.

The total estimate for fixing up the cave so that the public could come in would be something like \$80,000, and, with our experience in the Wind Cave, National Park, that seems fair, as we have to be very careful of the visitors' lives here in such underground areas.

I have recently made an inspection of some of the Virginia caves where indirect lighting is in and guard rails, and I would very much dislike to recommend to Director Mather that any cave be opened unless we have put ourselves in a position where we can give the tourist assurance that his life is safe in going in and where they can see it as conveniently as possible. That devolves on us.

Now, it seems to me the proper policy within the last few years, where economy is necessary and in connection with national forests, is to provide the absolutely necessary facilities for the parks that now exist, such as we did a moment ago in reference to the Platt and elsewhere in the bill, where thousands are coming in with automobiles and need places to camp, and we have to provide them with water, with sanitation, and so forth. Then as we can expand we will get to the point where we can open up new regions such as the gentleman from New Mexico proposes. But it seems to me now to provide a tunnel for people to get into a place where they would be unsafe and subject to accident after getting there would not seem wise, and until we are ready to go ahead with the program I hope the amendment of the gentleman will not prevail.

Mr. WATKINS. Will the gentleman yield?

Mr. CRAMTON. I will.

Mr. WATKINS. Is this appropriation of \$20,000 necessary for the park now?

Mr. CRAMTON. In order to get underground to the cave it is necessary to build a tunnel. The gentleman spoke about both platforms indorsing it. My mind has not associated the conventions and the national parks, except perhaps the "wind cave," but they seem to have found time at New York and Cleveland to indorse, as the gentleman says, these caverns. It is an underground cave and a tunnel is necessary to get into it and the time will come when it should be developed. But I think other needs are greater just now.

Mr. WATKINS. Why the \$500; is that for building?

Mr. CRAMTON. That applies to all national monuments.

Mr. WATKINS. And it has nothing to do with the tunnel?

Mr. CRAMTON. No. Some monument may need the construction of a \$500 building.

Mr. MORROW. The gentleman probably misunderstood me as to the conventions. It was the State convention of each party. I would like for the gentleman to understand with reference to these caverns that there is ample running water, pure water.

The CHAIRMAN. The time of the gentleman has expired.

The question is on the amendment of the gentleman from New Mexico.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Construction, etc., of roads and trails: For the construction, reconstruction, and improvement of roads and trails, inclusive of necessary bridges, in the national parks and monuments under the jurisdiction of the Department of the Interior, \$1,500,000, being part of the sum authorized to be appropriated for the fiscal year 1925 by section 2 of the act approved April 9, 1924, of which amount not to exceed \$6,000 may be expended for personal services in the District of Columbia: *Provided*, That the Secretary of the Interior may also approve projects, incur obligations, and enter into contracts for additional work not exceeding a total of \$1,000,000, and his action in so doing shall be deemed a contractual obligation of the Federal Government for the payment of the cost thereof, and appropriations hereafter made for the purpose of carrying out the provisions of said act and acts amendatory thereof and supplemental thereto shall be considered available for the purpose of discharging the obligations so created.

Mr. SINNOTT. Mr. Chairman, I move to strike out the last word, and I do it for the purpose of interrogating the chairman. The act of April 9, 1924, authorized the appropriation of \$2,500,000 for the fiscal years ending June 30, 1924, 1925, 1926, and 1927. At this time I am particularly interested in expenditures prior to the fiscal year June 30, 1924, and this is my query: As I understand it, the \$2,500,000 has not been expended; now, will we lose that unexpended balance that we authorized to be appropriated for the fiscal year ending June 30, 1924?

Mr. CRAMTON. The fiscal year 1924 did not have two and a half million. The act provides two and a half million dollars for the fiscal years 1924 and 1925, and two and a half million for the fiscal year 1926, and two and a half million for the fiscal year 1927. Now, the fiscal year 1924 was about gone when that act passed, and the deficiency bill, expected to become a law last June, carried \$1,000,000 which was expected would be used during the past construction season. But the deficiency bill did not become a law until perhaps to-day, so that million dollars has not been used in that construction season.

The estimate was for one and one-half million dollars more in this bill, which would be added to the million dollars in the deficiency bill; and if this goes through as this bill provides, there will be a total of two and one-half million dollars available for the fiscal year 1926 in terms, but in fact available for the construction season of 1925. That two and one-half million dollars will be consumed in construction during this coming construction season.

I had up the matter with the park service, because not only the gentleman's committee but my committee was committed to the House to carry out the spirit of that act. I am advised by the Director of the National Park Service that the appropriation here proposed, in view of other assurances that I will refer to, is entirely satisfactory. In other words, an expenditure of two and one-half million dollars in this coming construction season will pretty well meet their program. I was able to state to the Director of the National Park Service that it was the feeling of our committee, and I thought such was the feeling of Congress, and I also had good reason to believe that it was the attitude of the Budget, that this two and one-half million dollars for this construction season would be followed by similar items for the next two construction seasons, so that in the calendar years 1925, 1926, and 1927 the seven and one-half million dollars would be expended with an even appropriation of two and one-half million dollars each year.

That carries the final expenditure and perhaps the final appropriation beyond the limit of time provided in the authorization, but that is absolutely immaterial. No authorization is necessary for an appropriation to build a road in a national park. Our committee has full jurisdiction as to the building of a road in a park. The act which the gentleman carried through the House successfully was important as to committing Congress to that program and as a command that our committee feel obliged to carry out.

The CHAIRMAN. The time of the gentleman from Oregon has expired.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended five minutes, so that I can take two or three minutes of it.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CRAMTON. In the report of the Appropriations Committee on this bill it is said:

It is the belief of the committee that the most effective and economical results will be secured by the use of that amount (\$2,500,000) in each of the construction seasons in the next three years.

That seems to be the program to which everyone is committed.

Mr. SINNOTT. The gentleman's view as to their authority coincides with mine. I have always believed that irrespective of the act of April 9, 1924, the gentleman's committee had authority to make appropriations for roads and trails in the national parks, and I am glad to hear him publicly state that on the floor, so that if the time limit expires and the fiscal year 1927 has passed by, then we may still expect appropriations for this purpose.

Mr. RAKER. Mr. Chairman, will the gentleman yield right there?

Mr. SINNOTT. Yes.

Mr. RAKER. It is also intended to carry out the views of the Director of the Park Service as to the places and use of this money that is appropriated. Is not that so?

Mr. CRAMTON. If the money is to be turned over to the Director of the National Park Service for use in this program I presume he will carry it out as he himself outlined it.

Mr. RAKER. As he outlined it before the Committee on the Public Lands?

Mr. CRAMTON. I do not know what he outlined before that committee, but there is no limitation here as to his authority.

Mr. RAKER. No limitation and no binding conditions as to how he shall use it?

Mr. CRAMTON. There is nothing here.

Mr. RAKER. I was taking it for granted that the Director of the National Park Service would carry out the program that was outlined.

Mr. CRAMTON. I do not happen to know what his program was then, but the program for development reaches all the parks, and this is a part of that program.

Mr. RAKER. I just wanted the Record to show.

The CHAIRMAN. Without objection, the pro forma amendment is withdrawn.

Mr. HUDSPETH. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HUDSPETH: Page 98, line 15, after the figures "\$1,500,000" in line 15, add the following: "Provided, That \$20,000 of said sum shall be expended by the Secretary of the Interior or under his direction for the building of a first-class graded road from Van Horn, Tex., to Carlsbad Cave, in Eddy County, N. Mex."

Mr. CRAMTON. Mr. Chairman, I make a point of order against the amendment.

Mr. HUDSPETH. Will the gentleman reserve it?

Mr. CRAMTON. I will reserve it; yes.

The CHAIRMAN. The gentleman from Michigan reserves the point of order against the amendment.

Mr. HUDSPETH. I do not think a point of order would lie against the amendment, though, because it provides for the construction of roads.

Mr. CRAMTON. There is no doubt about its lying, but I will reserve it.

Mr. HUDSPETH. Mr. Chairman, the amendment seeks to take \$20,000 of the sum allotted the Secretary of the Interior for the building of a road from Van Horn, close to the New Mexico line, to the Carlsbad Cave that has been described by the gentleman from New Mexico [Mr. MORROW]. I have been told that this cave rivals in many ways and is far superior to the Mammoth Cave in Kentucky. During the last session of Congress, through the instrumentality of my good friend from Oklahoma [Mr. CARTER], whom I importuned, \$5,000 was provided, so that people could enter this cave. I do not know whether that provided easy access or not, but I want to say to you gentlemen that if you will adopt this amendment I do not care what you name this road. My colleague from Texas [Mr. BLANTON] yesterday seemed to be very much opposed to naming these roads for living men. He said there was a highway in Texas named for the present governor, Mr. Neff. Well, I did not support the present governor. I stumped the State for one of the greatest living Democrats that ever trod shoe leather on the other side, Mr. Bailey. But I have no objection to the road being named for Mr. Neff. I want to say to the gentleman from Texas that if he traverses the highways of Texas in the future he may see a sign up "Ma Ferguson Highway." [Laughter.] I would

have no objection to that, although I voted to impeach her husband when I was a member of the State senate. So it does not make any difference to me, if you will let me create this road, what you name it, but I will state to you gentlemen of the House that if it should be created you may call it the "Cramton Road" in honor of the chairman of this committee, and I would feel honored if you did, because they have named counties in Texas for Members of Congress, to which I have no objection.

Mr. CRAMTON. Will the gentleman yield?

Mr. HUDSPETH. Yes.

Mr. CRAMTON. The gentleman does not suggest that because it runs to the Wind Cave? [Laughter.]

Mr. HUDSPETH. No; I do not understand it is a windy cave. It is a great work of nature and should be taken over by this Government. But I do say, gentlemen, that Texas builds her own roads right up close to the line. The road for which I am asking \$20,000 of this sum is a branch from the Bankhead Highway, which traverses the great State of Texas from Texarkana to El Paso. We can not build roads in New Mexico, and I presume New Mexico is able to take care of her own roads. But I do ask that this amount be expended in the building of a national highway, so that tourists who traverse the Bankhead Highway through the town of Van Horn and from there to this cave may have a way of getting there, which they have not to-day.

I think the amendment should be adopted. We are for building good roads down there. It does not make any difference whether they name them for dead statesmen or living statesmen or for present governors or governors who may come in the future. I did not support all of the governors of Texas who have been elected, by any means, but I have no objection to naming roads for them. I do not see that it costs the State or the Government anything extra to put up a signboard there naming this road for "Ma" Ferguson, if they want to do so, or for Pat Neff. You have got to designate it by some name. I think this amendment should be adopted.

I want to state to the chairman of the subcommittee that we were given \$5,000 last session, and, as I understand it, it is intended that this cave shall be taken over by the National Park Commission. Is that a fact?

Mr. CRAMTON. It is my impression it has been created as a national monument.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. HUDSPETH. Mr. Chairman, I ask for three minutes more.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for three additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. CRAMTON. And it is under the administration of the National Park Service.

Mr. HUDSPETH. If you are going to take it over, and you have wisely expended \$5,000 on a cave which, I am told, far surpasses the wonders of the Mammoth Cave in Kentucky, I see no good reason for not spending the amount I ask in this amendment on the building of accessible roads. By the way, I wish to state that I saw in the current press a few days ago that some little whippersnapper who writes for some magazine claims he discovered this cave.

The history of this thing is that this cave was discovered by Maj. Richard Burgess, of El Paso. He is the man who came here and interceded before this committee for this \$5,000. I want that to go into the Record. He was one of the heroes of the World War. He organized a company in my home city, and it fought as red-blooded Americans, and especially Texans, always fight. He is the man who first brought to the notice of the public and Congress this cave—Major Burgess—and I want that to go into the Record. This little fellow never heard of this cave until Major Burgess had been here and told the committee about it, and we got \$5,000 for providing a way of getting into it.

Mr. RAKER. Will the gentleman yield?

Mr. HUDSPETH. Yes.

Mr. RAKER. I understand the gentleman has no objection to this road being called the "Ma" Ferguson road?

Mr. HUDSPETH. Not the slightest objection on earth, although I voted to displace her husband as governor when I was a member of the senate. She is a good woman.

Mr. RAKER. "Ma" is an abbreviation for mother.

Mr. HUDSPETH. Yes.

Mr. RAKER. Mother's road would be a delightful thing to travel, and if we had a road built by mother we would

not need* to have these roads which we have had to build to Fort Leavenworth, McNeill Island, and Atlanta, Ga., would we?

Mr. HUDSPETH. I take it that is correct.

Mr. RAKER. So if "Ma" Ferguson builds a mother's road, God speed her on her road.

Mr. HUDSPETH. I think she is a good woman and I knew she was after they put her on the Democratic ticket down in good old Texas. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. CRAMTON. Of course, there are various ways of naming roads and we might give consideration, in connection with the others, to the Raker road and the Hudspeth highway, but for the present I am obliged to make a point of order against the amendment.

The CHAIRMAN. Is this within a national park reservation?

Mr. CRAMTON. I understand it is not within a national park or national monument, and there is no legislative authority for the construction of a road outside of a park or a monument.

Mr. HUDSPETH. I just understood the gentleman to state that a national monument had been created around this place.

Mr. CRAMTON. But I do not understand it includes the territory described by the gentleman in his proposed amendment.

Mr. HUDSPETH. I do not know how extensive it is.

Mr. CRAMTON. It does not take in all of New Mexico and Texas.

Mr. HUDSPETH. This does not take in all of Texas by any means; only a very small strip.

The CHAIRMAN. The Chair is of opinion this amendment would be an appropriation for something not authorized by law and would not be a continuing work under the rule, and therefore sustains the point of order.

The Clerk read as follows:

Insane of Alaska: For care and custody of persons legally adjudged insane in Alaska, including transportation, burial, and other expenses, \$157,757: *Provided*, That authority is granted to the Secretary of the Interior to pay from this appropriation to the Sanitarium Co. of Portland, Oreg., or to other contracting institution or institutions, not to exceed \$624 per capita per annum for the care and maintenance of Alaskan insane patients during the fiscal year 1926: *Provided further*, That so much of this sum as may be required shall be available for all necessary expenses in ascertaining the residence of inmates and in returning those who are not legal residents of Alaska to their legal residence or to their friends, and the Secretary of the Interior shall, so soon as practicable, return to their places of residence or to their friends all inmates not residents of Alaska at the time they became insane, and the commitment papers for any person hereafter adjudged insane shall include a statement by the committing authority as to the legal residence of such person.

Mr. SUTHERLAND. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Alaska offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SUTHERLAND: On page 104, line 13, after the word "person," insert: "*Provided further*, That the Secretary of the Interior is hereby authorized and instructed to conduct investigation and report to the Congress on the advisability of establishing an institution for the insane within the Territory of Alaska or in the United States, to present estimates of the cost of such institution, the maintenance of insane persons, and the utilization of any abandoned military post or other property of the United States for an asylum for the insane."

Mr. SUTHERLAND. Mr. Chairman, I do not think it is necessary for me to occupy any time of the committee in explaining this amendment.

The amendment provides that the Secretary of the Interior shall investigate and report on the advisability of caring for the insane of Alaska directly by representatives of the Government; that is, with a view to doing away with this antiquated system of boarding insane persons where there is an opportunity for profit and the consequent possibility of their treatment not being what it would be if they were taken care of in an institution provided for them by the Government.

Mr. CRAMTON. Mr. Chairman, the subcommittee for some time has felt that the element of profit ought not to be permitted to enter into the care of the insane. The amendment offered by the gentleman from Alaska, who is a member of the Committee on the Territories, I understand, is acceptable to the chairman of that committee, and would offer a basis

for legislation which that committee could consider with reference to a better situation, and this committee has no objection to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alaska [Mr. SUTHERLAND].

The amendment was agreed to.

The Clerk read as follows:

The Alaska Railroad: For every expenditure requisite for and incident to the authorized work of the Alaska Railroad, including maintenance, operation, and improvements of railroads in Alaska; maintenance and operation of river steamers and other boats on the Yukon River and its tributaries in Alaska; stores for resale; payment of claims for losses and damages arising from operations; payment of amounts due connecting lines under traffic agreements; payment of compensation and expenses as authorized by section 42 of the injury compensation act, approved September 7, 1916, to be reimbursed as therein provided, \$1,700,000, in addition to all amounts received by the Alaska Railroad during the fiscal year 1926, which, with all balances in existing appropriations and funds for the maintenance and operation of railroads and river steamers in Alaska, shall be consolidated into the "Alaska railroad fund," to continue available until expended: *Provided*, That not to exceed \$6,000 of this fund shall be available for personal services in the District of Columbia during the fiscal year 1926: *Provided further*, That \$500,000 of such fund shall be available only for such capital expenditures as are chargeable to capital account under accounting regulations prescribed by the Interstate Commerce Commission, which amount shall be available immediately.

Mr. WATSON. Mr. Chairman, the recent report made by a special assistant to the Secretary of the Interior concerning the Alaska Railroad does not present a very favorable statement. He states that \$12,000,000 is required to complete the railroad, and even after it is completed it will probably be years and years before any industries are established to manufacture commodities to send out of Alaska. He reports that there are too many clerks employed. He also complains that the manager is too far away from advice, which only proves again that the Government can not control public utilities with any advantage. He also suggests that there should be a bureau of directors in order to advise the managers.

I want to inquire of the chairman of the committee, if he can give me the information, how much of the \$1,700,000 will be used for clerk hire. There is an item of \$6,000 to be spent here. What personnel does that include? Who are the persons in Washington that are receiving the \$6,000? Are they advisers to the manager who resides in Alaska?

Of course, I recognize that no private corporation would build a railroad in Alaska, and probably the Government is compelled to maintain the road, but that does not mean that the Government should be extravagant.

Mr. CRAMTON. The force in the District of Columbia, of course, with a limitation of \$6,000, is a very small force, composed of one or two persons. I can not at the moment state just how many are in the clerical force in Alaska, but this is the situation:

The Secretary of the Interior selected Mr. Noel Smith, an experienced railroad man from Pennsylvania, by the way, which I take it vouches for him completely, to go to Alaska and make a thorough investigation of the situation. This committee felt last year that the management of the railroad was not in satisfactory hands, and the Secretary of the Interior came to that conclusion and sent Mr. Smith to Alaska and he made a thorough investigation.

The Secretary of the Interior gave Mr. Smith full authority, and as a result of his investigation various reforms were brought about. The first was the resignation of the manager, and then a reorganization of the road was started. At the present time Mr. Smith is the head of the railroad. Whether he is to be continued I do not know. I have understood, although not directly, that the department desires to have him remain, but they are not sure they can induce him to do so. My contact with him has led me to feel that the road would be in safe hands under his direction. Of course, we do not begin to pay a man to run that railroad what private individuals would pay.

Mr. WATSON. He states here that the employees are paid more than on private railroads.

Mr. CRAMTON. That does not apply to the manager of the railroad.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. WATSON. Mr. Chairman, I ask that my time may be extended three minutes.

The CHAIRMAN. Without objection, the time of the gentleman from Pennsylvania is extended three minutes.

There was no objection.

Mr. CRAMTON. As to the matter of clerks, and so forth, any reforms desired or necessary are within the authority of Mr. Smith himself, who has made those recommendations which the gentleman speaks about, and I have enough confidence in him to believe that he has already made those reforms.

Mr. WATSON. He objects to the hospital there giving service not only to the employees but to their families. He states that that is not done by other railroads, because the employees pay a certain amount every month for that service.

Mr. CRAMTON. I am not prepared to argue all the details of matters that would be under the authority of Mr. Smith if he should be connected permanently with the railroad, but we must remember that it is a different thing to run a railroad in the wilderness of Alaska than to run one through Pennsylvania.

Mr. WATSON. That is what I stated in my remarks. I do not think a private corporation could operate the road to an advantage, but the Government should operate it economically.

Mr. CRAMTON. We are operating the railroad because we deem it necessary for the development of Alaska. We could not have induced private individuals to build the road unless we turned Alaska over to them, and in that event they would have been glad to build the railroad. The railroad running up to the copper mines was built by private individuals, and, as I remember, they put in \$21,000,000 before they took out a penny's worth of copper from their mines. They took a chance on the development of the property, and the United States has built the railroad, taking a chance on the development of its property. Of course, we want it administered economically.

Mr. WATSON. That is the only point I am raising, that it is not managed economically now, and I wanted to know how the appropriations are divided.

Mr. CRAMTON. As to the clerks, if there is any extravagance and it is continuing, it has continued under Mr. Smith, who has the authority to stop it while he is in charge.

Mr. RAKER. Mr. Chairman, I would not do this except that the facts are within our knowledge. Speaking about the railroad, some 12 years ago there was a question whether or not all the coal lands would be turned over to two organizations. Legislation was passed to prevent it. We built the railroad. Now I want to call this to your attention.

Mr. CONNALLY of Texas. Will the gentleman from Pennsylvania [Mr. WATSON] give heed to the gentleman from California, and the gentleman from Pennsylvania will get some information?

Mr. RAKER. I am not hoping to give any information to the gentleman from Pennsylvania, but to the House generally. We built the railroad to develop Alaska. They said they had the greatest coal fields in the world. To-day we are importing coal into Alaska for use there except that on the railroad. Is not that right, I will ask the gentleman from Alaska?

Mr. SUTHERLAND. In the extreme southern section of Alaska they are importing some coal. The other portions use local coal.

Mr. RAKER. We have a railroad built by the Government, and yet we are shipping coal from the Eastern States through the canal to Alaska to use in a territory that has the greatest coal deposit in the world. I was told this by a gentleman within the last week. We made an appropriation to develop our coal mine, but within the last year you have stopped the development of the coal mine. So you are growling about Government ownership of the railroad, when you do not give it a chance to live. You will do everything on earth to prevent its succeeding without any criticism against the man appointed, a man who is familiar with eastern railroads but does not know how to handle western conditions.

Mr. CRAMTON. The only man who had to resign as a failure was a railroad man from California.

Mr. RAKER. He was never a railroad man, never had any experience as a railroad man; he had only been a worker in the railroad business. Now, think of having a railroad built by the Government into the greatest coal field in the world, with coal enough to supply the Navy and the Army and all other western and eastern cities, and yet we import coal around through the Panama Canal up to Alaska on privately owned ships and stop the development of our own coal fields in Alaska.

Mr. WATKINS. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. WATKINS. We still own the coal in Alaska and no Cabinet man has given it to Doheny.

Mr. RAKER. But we ought not to be taking money from the people in the meantime; we should be developing the coal fields and keeping the railroad going, making it a success so that they can not say that the Government can not successfully operate this railroad.

Mr. WATKINS. It could be worse, they could have given away the coal.

Mr. RAKER. That is true.

Mr. SUTHERLAND. Mr. Chairman, I want to correct the gentleman from California when he says that coal is shipped to Alaska from the eastern seaboard.

Mr. RAKER. How does it get there?

Mr. SUTHERLAND. No coal goes there. There is coal supplied from the Atlantic seaboard to San Francisco for use of the Navy. But we have in Alaska as good coal as the Pocahontas that they ship through the canal.

Mr. RAKER. Does not the gentleman admit—there is no criticism of him—that they are using coal in Alaska which is shipped into Alaska from the United States?

Mr. SUTHERLAND. No; from British Columbia only, and that is in southern Alaska.

Mr. RAKER. I am not questioning that.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. SUTHERLAND. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SUTHERLAND. Mr. Chairman, as a matter of fact, when the Navy took out this coal at Chickaloon and tested it, while it showed a higher degree of efficiency in many respects than the Pocahontas coal from West Virginia, the Navy discovered that in one essential feature it lacked what is known as steaming radius, although it contained the amount of fixed carbon and the British thermal units and all of the features that enter into a superior coal in greater percentage than the eastern article. Yet the Navy abandoned the coal mine and closed it down, and we of Alaska do not know why. Of course, the intimation is made generally that there are interests in the United States that do not want that coal to come out, but we can submit no proof of anything of that kind, and we only know that the Navy abandoned the coal and is still using the Pocahontas coal on the Pacific coast.

Mr. RAKER. Will the gentleman advise the committee why it is that the Department of the Interior stopped the development of coal in Alaska?

Mr. SUTHERLAND. I do not know, nor do the people of Alaska know.

Mr. CONNALLY of Texas. Has the gentleman been over to the Department of the Interior? Is there not some way of finding out?

Mr. SUTHERLAND. The report is made that it costs more to produce the coal. They had a mine blocked out, they had a great many thousands of tons of coal blocked out, but they abandoned it. The head of the Bureau of Mines admitted to me that perhaps they had overlooked a bet in that respect, but the fact is that with hundreds of thousands of tons of coal blocked out and tunnels run they abandoned it and still ship the Pocahontas coal around to San Francisco for the use of the Navy.

Mr. WATSON. Mr. Chairman, will the gentleman from Alaska yield long enough to permit me to read a line or two from the report? The report says:

The only coal company at present operating on the Alaskan Railroad can produce sufficient coal that is suitable for locomotive fuel. This situation leads to the placing of almost the entire order for coal this year with this company at a price of \$5.80 per ton for run-of-mine coal.

Mr. SUTHERLAND. I will say that this is an entirely different coal. This is a subbituminous coal that they are speaking of, while the other is an anthracite or a subanthracite.

Mr. WATSON. This is used in the locomotives?

Mr. SUTHERLAND. This coal he speaks of for the railroads is there in immense quantities, and they are gradually developing it and putting it down to the coast.

The Clerk read as follows:

HOWARD UNIVERSITY

For maintenance, to be used in payment of part of the salaries of the officers, professors, teachers, and other regular employees of the university, ice, and stationery, the balance of which shall be paid from donations and other sources, of which sum not less than \$2,200 shall be used for normal instruction, \$125,000.

Mr. BYRNES of South Carolina. Mr. Chairman, I make the point of order against the paragraph, that it is unauthorized by any law.

The CHAIRMAN. Does the gentleman from Michigan desire to be heard upon the point of order?

Mr. CRAMTON. Mr. Chairman, simply to say that this expenditure is one which has been continued for 50 years, during which time the institution has been developed. I greatly regret that it should be even suggested that this aid be discontinued. This is not the entire maintenance of the university. It is simply a small contribution from the Federal Government toward the solution of one of our greatest Federal problems. I regret that it is proposed that this small contribution should be now discontinued. I regret also that there is no law to which I can call attention as support for the appropriation. The appropriation is one that is founded on custom rather than upon law, and I am obliged to admit that the paragraph is subject to the point of order, but I appeal to the gentleman from South Carolina not to insist upon the point of order, at least as to those matters of small contributions toward maintenance.

Mr. BYRNES of South Carolina. Mr. Chairman, the statement of the gentleman from Michigan is sufficient reason for insisting upon the point of order. If for 50 years we have been making an appropriation for a purpose not authorized by law, it is time that the Congress should have the courage to enact legislation or discontinue the appropriations. The Committee on Education can bring out a bill and if the Congress deems it wise it can enact a law authorizing an appropriation for this university. In the absence of it, it should not be permitted to remain in the bill. One of the things that the Committee on Appropriations promised the House when the Budget law was passed was that we would refrain from including appropriations for purposes not authorized by law, and from carrying legislation on appropriation bills, and yet in this bill we proceed to include item after item for this university for which there is no authority of law, and in the case of one item for which even the Budget Bureau submitted no estimate for the next fiscal year, we propose legislation.

Mr. CRAMTON. If the gentleman will yield, he is a member of the Committee on Appropriations. He may have made some such promise, but I do not recall that anybody else ever did.

Mr. BYRNES of South Carolina. Every member of the Committee on Appropriations who came in here advocating the new system, telling the other committees of the House that they would have something to do under the new system, assured the House that they would refrain from legislating on appropriation bills and leave that to the legislative committees.

Mr. CRAMTON. No one for a moment, experienced as is my learned friend from South Carolina, would say that this paragraph is legislation. It is an appropriation unauthorized by law, but it is not legislation.

Mr. BYRNES of South Carolina. But the gentleman from Michigan will agree that he has in the last item for the university attempted to enact legislation which was not even asked for by the Budget Bureau for the next fiscal year, and I have heard him lecture gentlemen on the floor in the last two days for advocating appropriations not estimated by the Budget.

Mr. CRAMTON. We will talk about that when we get to it.

Mr. BYRNES of South Carolina. Oh, I am talking about all of these items, and I make the point of order against the first one.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of South Carolina. Yes.

Mr. BLANTON. Since so prominent a member of the Appropriations Committee as the gentleman from Michigan [Mr. CRAMTON] now repudiates the assurance which we common Members understood was given to the House that the Committee on Appropriations would not put on such items, does not the gentleman think it is time to reorganize that committee and change the program a little? If the committee has become so bold that they can repudiate their promises—

Mr. BYRNES of South Carolina. Oh, this is one of the few instances I know of where the committee has done that, and this is because of political expediency. I think my friend the gentleman from Michigan [Mr. CRAMTON] ought to ask the chairman of the national committee, who has a surplus of \$300,000, to donate it to this institution instead of asking the taxpayers to pay it.

Mr. CRAMTON. If the gentleman will yield, I will say it is quite fitting that the party that has done so much for that race should continue its good work.

Mr. BYRNES of South Carolina. I think the party for which these people have done so much should have the courage to enact legislation to provide for this university, instead of including appropriations for which there is no estimate submitted by the Budget Bureau.

Mr. CRAMTON. If the gentleman will yield for a further suggestion to my friend from South Carolina, this item before us is estimated for by the Budget. As to legislation, I introduced a bill in the last session proposing legislation to authorize such an appropriation, and if the gentleman does insist upon this going out, I hope I will have his enthusiastic cooperation in securing the passage of that legislation during this Congress.

Mr. BYRNES of South Carolina. No; the gentleman will not, because—

Mr. CRAMTON. I imagine not.

Mr. BYRNES of South Carolina. Because I do not believe the Federal Government should spend the money of the taxpayers for any one educational institution, and if the gentleman from Michigan wants to ask the enactment of legislation providing that one educational institution in preference to all others shall receive funds from the Federal Government, the gentleman ought to have the courage to advocate such legislation and have Congress enact it instead of coming in here and appropriating money without any authority of law at all. The Committee on Education could have reported a bill last session and could do so at this session if the party in power desires it.

Mr. CRAMTON. In this bill there is an appropriation for the Columbia Institution for the Deaf, a private institution. We appropriate \$6,000,000 for the education of the Indians, a national problem. This is another national problem. In addition, colleges in the gentleman's State get Federal funds for their maintenance, I will guarantee.

Mr. BYRNES of South Carolina. If they do get any—

Mr. CRAMTON. And those colleges will not admit negroes. Mr. BYRNES of South Carolina. The gentleman from Michigan is repeating what was told to him by a representative of this institution. There is quite a material difference. If any college in the State of South Carolina receives an appropriation from the Federal Government, it is under the Hughes educational bill, which law authorized an appropriation for certain specific purposes in cooperation with all educational institutions of the country complying with that law. That law is not restricted to colleges attended only by white students. There are negro universities in South Carolina as well as in other States. If they comply with the Federal aid law they will receive appropriations. But there is no law for this appropriation, and the gentleman knows it.

Mr. CRAMTON. And I ask the gentleman from South Carolina to cooperate with me in securing a law.

Mr. BYRNES of South Carolina. The gentleman from Michigan knows that under existing law the State of Michigan and the State of South Carolina and every other State in the Union having educational institutions, if they cooperate with the Federal Government, can receive funds, and it does not exclude Howard University. And I want it to stand on the same footing as all other institutions and not ask Congress to appropriate directly from the Treasury to maintain this one university when no other college receives such appropriations. If it is done solely because it is a negro institution, why not select Booker Washington's institution, Tuskegee, or the institution at Hampton, and why appropriate the money of the taxpayers of the entire country for one institution here when one-fourth of the students are from the city of Washington, which makes no contribution other than that made by the taxpayers of every section of the country? If the gentleman from Michigan is proposing a law on the subject, he ought to provide that the District of Columbia shall bear some portion of the expense of this institution. They get the benefit of it and should contribute to the expense. I know the gentleman from Michigan must have the same thought that I have on this subject.

Mr. WINGO. Will the gentleman yield?

Mr. BYRNES of South Carolina. I will.

Mr. WINGO. I hate to hear this dispute over the usurpation of power between two leading members of the Committee on Appropriations, and I fear one gentleman did not understand the other. I understood the gentleman from Michigan is willing to accept the suggested amendment of the gentleman from South Carolina providing that this be paid out of the surplus Republican campaign funds, and I think that disposes of the question and avoids this unseemly controversy between two of these gentlemen riding on white asses in this House.

The CHAIRMAN. The Chair is ready to rule. The gentleman from South Carolina [Mr. BYRNES] makes a point of order against the paragraph on the ground that it is an appropriation not authorized by law. Whenever a point of order has been made against an appropriation to this item the point of order has been sustained, and in this case the Chair is inclined to think that the point of order is well taken. The last time the point of order was decided was on January 29, 1924, by the gentleman from Connecticut [Mr. TILSON], who was in the chair, and he made the following ruling:

It is not the province of the Chair to pass upon the wisdom or the lack of wisdom of any proposed appropriation or to even consider its merits when a point of order is raised. If permitted to decide this question on its merits, the present occupant of the chair certainly would not be a party to striking down an appropriation for a work of this character. This, however, is not the question submitted to the Chair. The question is whether there is existing law or authorization to sustain this appropriation. The gentleman in charge of the bill admits that there is no law authorizing it.

The same point of order has been made in previous years, and whenever made it has been decided uniformly in the same way that the present occupant of the chair must decide it. If the appropriation is not authorized by law—and it is conceded that it is not—then it is clearly subject to a point of order. The Chair therefore sustains the point of order made by the gentleman from South Carolina [Mr. BYRNES].

The present occupant of the chair is in entire agreement with that position as to the merits and as to the point of order, and therefore the point of order is sustained. The Clerk will read.

The Clerk read as follows:

For tools, material, salaries of instructors, and other necessary expenses of the department of manual arts, of which amount not to exceed \$21,800 may be expended for personal services in the District of Columbia, \$34,000.

Mr. BYRNES of South Carolina. Mr. Chairman, I make the same point of order on this paragraph on the same grounds.

The CHAIRMAN. The point of order is sustained.

Mr. CRAMTON. The gentleman from Arkansas [Mr. WINGO] has referred to a suggestion that had been made as to the surplus of the Republican National Committee being used for this purpose. I understood that that surplus was going to be turned over to the Democrats to pay off the deficit of their national committee, inasmuch as they have been deemed to have been most helpful to the campaign made by the Republican National Committee. [Laughter.]

Mr. BYRNES of South Carolina. I understood you did not need those votes.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Medical department: For part cost needed equipment, laboratory supplies, apparatus, and repair of laboratories and buildings, \$9,000.

Mr. BYRNES of South Carolina. Mr. Chairman, against that I make the same point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

For material and apparatus for chemical, physical, biological, and natural-history studies and use in laboratories of the science hall, including cases and shelving, \$5,000.

Mr. BYRNES of South Carolina. Mr. Chairman, I make the same point of order on that.

The CHAIRMAN. On the same ground the Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

For books, shelving, furniture, and fixtures for the libraries, \$3,000.

Mr. BYRNES of South Carolina. Mr. Chairman, I make the same point of order on that. It is not authorized by law.

The CHAIRMAN. On the same ground the Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

For improvement of grounds and repairs of buildings, \$30,000.

Mr. BYRNES of South Carolina. Mr. Chairman, on that I make the point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

Fuel and light: For part payment for fuel and light, Freedmen's Hospital and Howard University, \$15,000.

Mr. BYRNES of South Carolina. Mr. Chairman, I make a point of order on that, on the ground that it is not authorized by law.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

Toward the construction of a building for the medical department, within a limit of cost of \$370,000, which is hereby authorized, \$185,000: *Provided*, That no part of the sum hereby appropriated shall be available until there is filed with the Secretary of the Interior a guaranty by the trustees of the university that a suitable equipment for such building will be provided at a cost of not less than \$130,000 by subscription of alumni and other friends of the university.

Mr. BYRNES of South Carolina. Mr. Chairman, I make the point of order that the appropriation is not authorized by law and that the paragraph is legislation upon an appropriation bill. This is the paragraph I referred to where no estimate had been submitted by the Budget Bureau for an appropriation this year.

The CHAIRMAN. The point of order is sustained.

Mr. CRAMTON. Mr. Chairman, I offer an amendment to page 108, after line 19.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 108, after line 19, insert: "Toward the construction of a building for the Medical Department, within a limit of cost of \$370,000, which is hereby authorized, \$185,000, to be immediately available and available until June 30, 1925: *Provided*, That no part of the sum hereby appropriated shall be available until there is filed with the Secretary of the Interior a guaranty by the trustees of the university that a suitable equipment for such building will be provided at a cost of not less than \$130,000 by subscription of alumni and other friends of the university."

Mr. BYRNES of South Carolina. Mr. Chairman, I reserve a point of order on that. It is new legislation.

Mr. BLANTON. I make the further point of order, Mr. Chairman, that it is not germane either to the bill or to the paragraph.

Mr. CRAMTON. The decision of the Chair will be sufficient, without any help from the gentleman from Texas.

Mr. CONNALLY of Texas. Mr. Chairman, I make a point of order that the gentleman from Michigan is not in order in speaking otherwise than to the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. CONNALLY of Texas. The gentleman was speaking out of order.

The CHAIRMAN. The gentleman from South Carolina reserved the point of order and the gentleman from Texas made the point of order. The point of order is sustained.

Mr. CRAMTON. The gentleman from Texas [Mr. CONNALLY] has appeared here for the first time in two weeks and now—

Mr. CONNALLY of Texas. The gentleman is telling something that is not true. He has seen me here.

The CHAIRMAN. The committee will be in order. The gentleman from Michigan [Mr. CRAMTON] has the floor.

Mr. CRAMTON. Mr. Chairman, the gentleman from South Carolina [Mr. BYRNES] as one of his grounds of objection to the paragraph has urged that it was not submitted by the Budget. As a matter of fact, the amendment which I have offered restricts it to the fiscal year 1925. It is not available for the fiscal year 1926. It is restricted to the fiscal year 1925.

Now, the Budget for the fiscal year 1925 authorized an appropriation of \$500,000 for this specific purpose; therefore, in so far as there was any force in the gentleman's point of order, it derives none from that argument. However, I admit, Mr. Chairman, that whether or not it was in this body, whether it was estimated for in the Budget or not, it is immaterial. In another body it would be material. I hope the suggestion I have offered will be of use in that other body.

Mr. BYRNES of South Carolina. I said it was not estimated for by the Budget Bureau for the fiscal year 1926, for which this bill makes appropriations. Now, the gentleman offers an amendment providing for the use of this money during the fiscal year 1925, knowing that it is still subject to the point of order and solely in the hope that he will suggest a way to avoid a point of order in the Senate. But it does not change the situation, because the Committee on Appropriations has taken the position on the floor of the House that it is not reporting bills making appropriations for which the Budget Bureau has submitted no estimate. In this particular paragraph the gentleman from Michigan has done that.

It is bad practice, I submit to my genial friend from the State of Michigan, and I renew my point of order, that the amendment offered by the gentleman from Michigan is legislation on an appropriation bill.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Total, Howard University, \$406,000.

Mr. BYRNES of South Carolina. Mr. Chairman, I make the same point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

FREEDMEN'S HOSPITAL

For officers and employees and compensation for all other professional and other services that may be required and expressly approved by the Secretary of the Interior, \$89,000. A detailed statement of the expenditure of this sum shall be submitted to Congress.

Mr. BLANTON. Mr. Chairman, I make a point of order against the last paragraph as being legislation unauthorized. There is no authority for the general blanket provision that the Secretary of the Interior may appoint all other officers and employees in addition to the classification authorization to the extent of \$89,000, and to that extent it is unauthorized by law.

Mr. CRAMTON. Mr. Chairman, this is entirely distinct from the other proposition. Freedmen's Hospital is the property of the United States of America; it was created by statute and it is fully authorized by law.

Mr. BLANTON. Mr. Chairman, I did not understand—

Mr. CRAMTON. Mr. Chairman, I do not yield. The same point of order was made last year and was overruled. There is ample authority for the appropriation and the point of order is not valid.

Mr. BLANTON. If this refers to the Freedmen's Hospital, I withdraw my point of order. I did not understand it had reference to the Freedmen's Hospital.

Mr. CRAMTON. If the gentleman will give heed he will find that is the thing we are talking about.

The CHAIRMAN. The point of order is withdrawn, and the Clerk will read.

The Clerk concluded the reading of the bill.

Mr. CRAMTON. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. SANDERS of Indiana, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 10020) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1926, and for other purposes, had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. CRAMTON. Mr. Speaker, I move the previous question on the bill and all amendments to final passage.

The previous question was ordered.

Mr. CRAMTON. Mr. Speaker, a parliamentary inquiry. As I understand, it would be in order to call this bill up on Tuesday, Monday being District of Columbia day?

The SPEAKER. It would be in order to call it up on either day.

Mr. GARRETT of Tennessee. On which day is it going to be called up?

Mr. CRAMTON. I have not had an opportunity to consult with the leader on this side, but my expectation was to call it up on Tuesday.

Mr. LONGWORTH. I think, perhaps, that would be the wise thing.

Mr. GARRETT of Tennessee. I suppose the gentleman is going to demand a separate vote on one or two amendments?

Mr. CRAMTON. Yes.

Mr. GARRETT of Tennessee. I think it is well to have an understanding as to which day it is going to be called up.

Mr. CRAMTON. I have heard what the gentleman from Ohio [Mr. LONGWORTH] has said as to Monday as District of Columbia day, and it is my expectation not to call it up until Tuesday.

Mr. GARRETT of Tennessee. I have no choice about it at all, but I think the House is entitled to know on which day it is expected to call it up.

Mr. CRAMTON. Tuesday.

Mr. CARTER. The gentleman from Michigan stated, I believe, that he did not expect to call it up until Tuesday?

Mr. CRAMTON. That is correct.

Mr. SANDERS of Indiana. Mr. Speaker, the previous question having been ordered, may I inquire whether it would not necessarily have to come up on Monday? Would it not be the unfinished business?

The SPEAKER. The Chair does not think it would necessarily come up, unless the gentleman calls it up.

Mr. GARRETT of Tennessee. Of course, the Speaker's judgment and recollection about that question is better than mine, but it seems to me, since the question has been raised, that probably, the previous question having been ordered, it would become the unfinished business, and except on Calendar Wednesday would come up on the following legislative day.

Mr. SANDERS of Indiana. That was my impression, Mr. Speaker.

Mr. CRAMTON. Mr. Speaker, in order to avoid any uncertainty about the matter, I ask unanimous consent that the final disposition of this bill and its amendments may be made the unfinished business, to be taken up the first thing on Tuesday next. I do not want to admit either way as to the rule in regard to the question.

The SPEAKER. The gentleman from Michigan asks unanimous consent that the consideration of this bill be the unfinished business on Tuesday morning next. Is there objection?

There was no objection.

ADJOURNMENT

Mr. CRAMTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 50 minutes p. m.) the House adjourned until Monday, December 8, 1924, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

706. A letter from the Secretary of War, transmitting report relative to exchange of typewriters and adding machines in part payment for new machines for the same purpose as those exchanged, by the Panama Canal, for the period July 1, 1923, to June 30, 1924; to the Committee on Appropriations.

707. A letter from the Attorney General, transmitting statement of the expenditures under appropriations for the United States Court of Customs Appeals for the fiscal year ended June 30, 1924; to the Committee on Expenditures in the Department of Justice.

708. A letter from the chairman National Advisory Committee for Aeronautics, transmitting report of typewriters and labor-saving devices exchanged during the fiscal year 1924 and a report of the publications issued by the committee during the fiscal year 1924; to the Committee on Appropriations.

709. A letter from the Secretary of War, transmitting with a letter from the Chief of Engineers, report on preliminary examination of Lewis River, Chincoteague Island, Accomac County, Va.; to the Committee on Rivers and Harbors.

710. A letter from the Secretary of War, transmitting with a letter from the Chief of Engineers, report on preliminary examination of Herring Bay and Rockhole Creek, Md.; to the Committee on Rivers and Harbors.

711. A letter from the Secretary of the Interior, transmitting fourth annual report of the Board of Actuaries, submitted by the Commissioner of Pensions, with comments in regard to the pending legislation for amending the civil service retirement law (H. Doc. No. 483); to the Committee on Civil Service and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. MAGEE of New York: Committee on Appropriations. H. R. 10404. A bill making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1926, and for other purposes; without amendment (Rept. No. 1034). Referred to the Committee of the Whole House on the state of the Union.

Mr. ZIHLMAN: Committee on the District of Columbia. H. R. 10144. A bill to amend "An act to fix the salaries of officers and members of the Metropolitan police force, the United States park police force, and the fire department of the District of Columbia," approved May 27, 1924; without amendment (Rept. No. 1035). Referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 9484) granting an increase of pension to Mary J. Hildreth; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10046) granting an increase of pension to Cora Hubbard; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10164) granting a pension to Mary A. Scobey; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10201) granting an increase of pension to Minnie V. Main; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10289) granting an increase of pension to Charles Ingle; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 10290) granting a pension to Abraham Key; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. MAGEE of New York: A bill (H. R. 10404) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1926, and for other purposes; committed to the Committee of the Whole House on the state of the Union.

By Mr. WATKINS: A bill (H. R. 10405) to provide for the conservation of helium gas, and to prohibit the exportation of helium gas from the United States; to the Committee on Military Affairs.

By Mr. ELLIOTT: A bill (H. R. 10406) to provide for the construction of certain public buildings in the District of Columbia and the several States, Territories, and dependencies of the United States; to the Committee on Public Buildings and Grounds.

By Mr. FITZGERALD (by request): A bill (H. R. 10407) to establish a station for the investigation of mentally handicapped children in the schools; to the Committee on Education.

By Mr. GIFFORD: A bill (H. R. 10408) to remit the duty on an addition to a carillon of bells imported for St. Stephens Church, Cohasset, Mass.; to the Committee on Ways and Means.

By Mr. LAGUARDIA: A bill (H. R. 10409) to amend the immigration act of 1924; to the Committee on Immigration and Naturalization.

By Mr. PARKS of Arkansas: A bill (H. R. 10410) to amend the first paragraph of section 24 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary"; to the Committee on the Judiciary.

By Mr. SINNOTT: A bill (H. R. 10411) granting desert-land entrymen an extension of time for making final proof; to the Committee on the Public Lands.

By Mr. MORTON D. HULL: A bill (H. R. 10412) granting the consent of Congress to the Pittsburgh, Cincinnati, Chicago & St. Louis Railroad Co. to construct a bridge across the Little Calumet River; to the Committee on Interstate and Foreign Commerce.

By Mr. KELLY: A bill (H. R. 10413) granting the consent of Congress to the county of Allegheny, Pa., to construct, maintain, and operate a bridge across the Monongahela River, at or near the borough of Wilson, in the county of Allegheny, in the State of Pennsylvania; to the Committee on Interstate and Foreign Commerce.

By Mr. WILLIAMSON: A bill (H. R. 10414) making an appropriation for special research and accounting in matters relating to suits brought by Indian tribes against the United States; to the Committee on Appropriations.

By Mr. DRIVER: A bill (H. R. 10415) providing for the extension of the public building at Jonesboro, Ark.; to the Committee on Public Buildings and Grounds.

By Mr. BOYLAN: Concurrent resolution (H. Con. Res. 33) authorizing the appointment of a joint committee of the House and the Senate to investigate the present conditions of the Naval Establishment, and for other purposes; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANTHONY: A bill (H. R. 10416) granting an increase of pension to Edward Everett Harding; to the Committee on Pensions.

By Mr. AYRES: A bill (H. R. 10417) granting an increase of pension to Ann M. Barker; to the Committee on Pensions.

By Mr. BEEDY: A bill (H. R. 10418) granting a pension to Zilpha J. Rowe; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10419) granting a pension to Linna L. Johnson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10420) granting a pension to Susie Elgretta Henderson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10421) granting a pension to Mary A. Horr; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10422) granting an increase of pension to Anna E. Brewster; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10423) granting a pension to Mary Callahan; to the Committee on Invalid Pensions.

By Mr. BRITTEN: A bill (H. R. 10424) for the relief of William A. Bentley; to the Committee on Claims.

By Mr. CABLE: A bill (H. R. 10425) authorizing the appointment of Kenneth Little as an Infantry officer, United States Army; to the Committee on Military Affairs.

By Mr. CLANCY: A bill (H. R. 10426) for the relief of Roy A. Darling; to the Committee on Naval Affairs.

By Mr. CLEARY: A bill (H. R. 10427) granting a pension to Jennie C. Leydet; to the Committee on Pensions.

By Mr. COLE of Iowa: A bill (H. R. 10428) for the relief of John S. Stotts, deceased; to the Committee on Military Affairs.

By Mr. COOK: A bill (H. R. 10429) authorizing the payment of a claim to Toliver B. Clark; to the Committee on War Claims.

Also, a bill (H. R. 10430) to correct the military record of Robert B. Printy; to the Committee on Military Affairs.

By Mr. DENISON: A bill (H. R. 10431) for the relief of Thomas L. Harris; to the Committee on Military Affairs.

By Mr. FAIRFIELD: A bill (H. R. 10432) granting reinstatement of pension to Hester P. Hart; to the Committee on Pensions.

By Mr. FRENCH: A bill (H. R. 10433) granting an increase of pension to Alfred Schaefer; to the Committee on Pensions.

By Mr. GLATFELTER: A bill (H. R. 10434) granting an increase of pension to Catherine Markle; to the Committee on Invalid Pensions.

By Mr. MORTON D. HULL: A bill (H. R. 10435) for the relief of John Marks; to the Committee on Naval Affairs.

By Mr. JACOBSTEIN: A bill (H. R. 10436) granting an increase of pension to Susie K. McLeod; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10437) granting an increase of pension to Rosanna A. Moe; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10438) granting an increase of pension to Susan B. Churchill; to the Committee on Invalid Pensions.

By Mr. KNUTSON: A bill (H. R. 10439) granting a pension to Henry B. Schenck; to the Committee on Pensions.

By Mr. LAMPERT: A bill (H. R. 10440) granting an increase of pension to Michael Rau; to the Committee on Invalid Pensions.

By Mr. McKEOWN: A bill (H. R. 10441) granting an increase of pension to Susanna Cntshaw; to the Committee on Invalid Pensions.

By Mr. MONTAGUE: A bill (H. R. 10442) granting a pension to Carl Olson; to the Committee on Pensions.

By Mr. MURPHY: A bill (H. R. 10443) granting an increase of pension to Louisa Whiteleather; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10444) granting a pension to Mary Sutton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10445) granting an increase of pension to Mary A. Danford; to the Committee on Invalid Pensions.

By Mr. REECE: A bill (H. R. 10446) granting an increase of pension to Reuben B. Hyder; to the Committee on Pensions.

By Mr. SCHAFER: A bill (H. R. 10447) granting a pension to Michael Bibus; to the Committee on Invalid Pensions.

By Mr. SIMMONS: A bill (H. R. 10448) granting an increase of pension to Rufus W. Jones; to the Committee on Pensions.

By Mr. SMITH: A bill (H. R. 10449) granting an increase of pension to Daniel Strasburger; to the Committee on Pensions.

By Mr. SNYDER: A bill (H. R. 10450) granting an increase of pension to Julia B. Jones; to the Committee on Invalid Pensions.

By Mr. STRONG of Kansas: A bill (H. R. 10451) granting a pension to Nora B. Hardy; to the Committee on Invalid Pensions.

By Mr. TABER: A bill (H. R. 10452) granting a pension to Lottie Julia Heinzman; to the Committee on Invalid Pensions. Also, a bill (H. R. 10453) granting a pension to Addie Allen; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10454) granting a pension to Sarah Louise Heinzman; to the Committee on Invalid Pensions.

By Mr. THATCHER: A bill (H. R. 10455) for the relief of the legal representatives of Lyman Randall, J. E. Sarrazin, and James Williams; to the Committee on War Claims.

By Mr. WATRES: A bill (H. R. 10456) granting an increase of pension to Mary A. Radney; to the Committee on Invalid Pensions.

By Mr. WELLER: A bill (H. R. 10457) granting an extension of patent to Marie B. Froehlich and Fannie B. Froehlich, heirs of the patentee, Helen B. Froehlich; to the Committee on Patents.

By Mr. WILLIAMS of Illinois: A bill (H. R. 10458) granting an increase of pension to Lucinda Beck; to the Committee on Invalid Pensions.

By Mr. WURZBACH: A bill (H. R. 10459) granting an increase of pension to Mary Elizabeth Carson; to the Committee on Pensions.

Also, a bill (H. R. 10460) for the relief of James A. Simpson; to the Committee on Military Affairs.

Also, a bill (H. R. 10461) for the relief of Odelon Ramos; to the Committee on Claims.

Also, a bill (H. R. 10462) for the relief of the estate of James H. Graham; to the Committee on Claims.

By Mr. WYANT: A bill (H. R. 10463) granting a pension to Nora Remaley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10464) granting an increase of pension to Ella M. Shaffer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10465) granting an increase of pension to Polly A. King; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10466) granting an increase of pension to Christ Cribbs; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3104. By the SPEAKER (by request): Petition of Babbit Post, No. 15, Grand Army of the Republic, Bristol, R. I., asking for the repeal of the law authorizing the Director of the Mint to issue 5,000,000 memorial 50-cent pieces, which coins are to be turned over to the Stone Mountain Memorial Association, of Atlanta, Ga.; to the Committee on Coinage, Weights, and Measures.

3105. Also (by request), petition of citizens of California, protesting against Senate bill 3218, called the compulsory Sunday observance bill; to the Committee on the District of Columbia.

3106. By Mr. GARBER: Petition of citizens of Okmulgee, Okla., favoring an increase of salaries for postal employees; to the Committee on the Post Office and Post Roads.

3107. Also, petition of residents of Roger Mills County, Okla., opposed to the passage of the Sunday observance bill (S. 3218); to the Committee on the District of Columbia.

3108. By Mr. SHREVE: Petition of Strong Vincent Post, No. 67, Grand Army of the Republic, Erie, Pa.; International Union Local, No. 859, Stationary Engineers, Erie, Pa.; Army and Navy Union, Charles V. Gridley Garrison, No. 4, Erie, Pa., for increase of Civil War pensions to \$72 per month, totally disabled to \$125, Civil War widows \$50, and said ratings include Indian war veterans and their widows; also that House bill 5934, for the relief of pensioners of the Spanish War, Philippine Insurrection, and China relief expedition be passed at an early date; to the Committee on Pensions.

3109. By Mr. VINCENT of Michigan: Protest of residents of St. Louis, Mich., Belding, Mich., and Corunna, Mich., against the passage of Senate bill 3218; to the Committee on the District of Columbia.

SENATE

MONDAY, December 8, 1924

The Chaplain, Rev. J. J. Muir, D. D., offered the following prayer:

O God, our help in ages past,
Our hope for years to come,
Our shelter from the stormy blast,
And our eternal home—

We look unto Thee this morning, recognizing that as the weeks are multiplied into the months and years Thou remainest the

same, and art ever ready to communicate wisdom, to direct the steps of the trustful soul, and lead us all into the green pastures and beside the living waters. We humbly beseech Thee for Thy blessing this morning. Ever be near to us, helping us, amid the anxieties and the needs of these days. We ask in Jesus' name. Amen.

HIRAM W. JOHNSON, a Senator from the State of California, WILLIAM H. KING, a Senator from the State of Utah, IRVING L. LENROOT, a Senator from the State of Wisconsin, JOSEPH E. RANDELL, a Senator from the State of Louisiana, and JAMES A. REED, a Senator from the State of Missouri, appeared in their seats to-day.

THE JOURNAL

The reading clerk proceeded to read the Journal of the proceedings of the legislative day of Wednesday, December 3, 1924, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

CREDENTIALS

The PRESIDENT pro tempore laid before the Senate a certificate of the secretary of state of the State of Idaho, certifying to the election of Hon. WILLIAM E. BOBAH as a Senator from that State for the term beginning on the 4th day of March, 1925, which was ordered to be filed.

He also laid before the Senate a certificate of the Governor of the State of Delaware, certifying to the election of Hon. COLEMAN DU PONT as a Senator from that State for the term commencing on the 4th day of March, 1925, which was ordered to be filed.

He also laid before the Senate a certificate of the Governor of the State of Minnesota, certifying to the election of Hon. THOMAS D. SCHALL as a Senator from that State for the term commencing on the 4th day of March, 1925, which was ordered to be filed.

He also laid before the Senate a certificate of the Governor of the State of Mississippi, certifying to the election of Hon. PAT HARRISON as a Senator from that State for the term beginning on the 4th day of March, 1925, which was ordered to be filed.

He also laid before the Senate a certificate of the State Board of Election Commissioners for the Commonwealth of Kentucky, certifying to the election on Tuesday, the 4th day of November, 1924, of Hon. FRED M. SACKETT as a Senator from the State of Kentucky for the term beginning March 4, 1925, which was ordered to be placed on file.

He also laid before the Senate a certificate of the Governor of the State of Louisiana, certifying to the election of Hon. JOSEPH E. RANDELL as a Senator from that State for the term beginning on the 4th day of March, 1925, which was ordered to be filed.

Mr. HALE. I present to the Senate the credentials of my colleague [Mr. FERNALD], which I ask may be read.

The PRESIDENT pro tempore. The certificate of election of the Senator from Maine [Mr. FERNALD], will be read and filed with the Secretary of the Senate.

The credentials were read, as follows:

STATE OF MAINE.

To all who shall see these presents, greeting:

Know ye that BERT M. FERNALD, of Poland, in the county of Androscoggin, on the 8th day of September, in the year of our Lord 1924, was chosen by the electors of this State a United States Senator to represent the State of Maine in the United States Senate for a term of six years, beginning on the 4th day of March, 1925.

In testimony whereof I have caused the seal of State to be hereunto affixed.

Given under my hand at Augusta the 15th day of November, in the year of our Lord 1924, and in the one hundred and forty-ninth year of the independence of the United States of America.

[SEAL]

FRANK W. BALL,
Secretary of State.

By the governor:

PERCIVAL D. BAXTER.

EXPENSES OF THE UNITED STATES COURT OF CUSTOMS APPEALS

The PRESIDENT pro tempore laid before the Senate a communication from the Attorney General, transmitting, pursuant to law, a statement of the expenditures under appropriations for the United States Court of Customs Appeals, fiscal year 1924, which was referred to the Committee on the Judiciary.

REPORT OF BOARD OF ACTUARIES

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, the fourth annual report of the Board of

Actuaries relative to the retirement of employees in the classified civil service, etc., which was referred to the Committee on Civil Service.

REPORTS OF THE FEDERAL POWER COMMISSION

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of War, chairman of the Federal Power Commission, transmitting, pursuant to law, a report giving the aggregate number of the various publications issued by that commission during the fiscal year 1924, etc., which was referred to the Committee on Printing.

He also laid before the Senate a communication from the Secretary of War, chairman of the Federal Power Commission, transmitting, pursuant to law, two statements for the fiscal year 1924, which were referred to the Committee on Appropriations, as follows:

A statement in detail of travel taken by officers of the Federal Power Commission to points outside the District of Columbia; and

A statement showing typewriters, adding machines, and other similar labor-saving devices purchased.

BICENTENNIAL OF THE BIRTHDAY OF GEORGE WASHINGTON

The PRESIDENT pro tempore. Under the authority of Senate Joint Resolution 85, to prepare for the observance of the two hundredth anniversary of the birth of George Washington, the Chair appoints on the part of the Senate as members of the commission therein provided for the Senator from Ohio, Mr. FESS; the Senator from Virginia, Mr. GLASS; the Senator from Missouri, Mr. SPENCER; and the Senator from Delaware, Mr. BAYARD.

MUSCLE SHOALS

The PRESIDENT pro tempore. The Chair feels that he ought to make at this point a statement. The Chair indicated a few mornings ago that under the unanimous-consent agreement under which we are operating the Muscle Shoals bill, in the event of adjournment, would not be laid before the Senate until 2 o'clock. On further reflection the Chair is convinced that the unanimous-consent agreement contemplates that the bill, in the event of an adjournment, shall be laid before the Senate immediately upon the conclusion of the routine morning business; and it will be so ordered, unless the Senate otherwise directs.

RECLASSIFICATION OF POSTAL SALARIES—VETO MESSAGE

Mr. EDGE. Mr. President, I do not care to interfere with the ordinary routine business, the introduction of bills and matters of that kind, which I understand under the ruling just made are in order, but I desire at the conclusion of the routine morning business to suggest a unanimous-consent agreement which, as I followed the Chair's statement, would be in order during the morning hour. I make the parliamentary inquiry if such a proposal can be received by unanimous consent.

The PRESIDENT pro tempore. Almost anything can be done by unanimous consent. Does the Senator wish to present a unanimous-consent proposal at this time?

Mr. EDGE. Mr. President, as all Senators know, we have had on the desk as unfinished business since the Senate convened a week ago the veto message of the President of the United States expressing his disapproval of Senate bill 1898, known as the postal salary readjustment bill. A week of the session has passed. I have tried to consult the convenience of Members on both sides of the Chamber, but as the sponsor of the measure I do feel that we should set a date and hour definitely to take up and dispose of the veto message and the bill. I have a unanimous-consent agreement prepared and I offer it for the consideration of the Senate.

The PRESIDENT pro tempore. The Senator from New Jersey presents a unanimous-consent agreement, which the Clerk will read.

The reading clerk read as follows:

It is agreed by unanimous consent that on the calendar day of Friday, December 12, 1924, at the hour of 1.30 p. m., the Senate will proceed to vote without debate upon the passage of the bill S. 1898, a bill to readjust the compensation of postmasters and reclassify and readjust the salaries and compensation of employees in the Postal Service, heretofore returned by the President of the United States without his approval.

The PRESIDENT pro tempore. Is there objection?

Mr. BORAH and Mr. STERLING addressed the Chair.

The PRESIDENT pro tempore. The Senator from Idaho.

Mr. BORAH. I yield to the Senator from South Dakota.

Mr. STERLING. I thank the Senator from Idaho. I would not object to the unanimous-consent agreement to vote upon

the question suggested by the Senator from New Jersey if one expression in the proposed unanimous-consent agreement be stricken out, and that is the words "without debate." I expected, in connection with the Senator's request for a unanimous-consent agreement, to give notice that when that matter was taken up I would move a reference of the message and the bill to the Committee on Post Offices and Post Roads, and I want to be heard upon that question at that time.

Mr. BORAH. Mr. President, I object to the unanimous-consent agreement.

The PRESIDENT pro tempore. Objection is made.

Mr. EDGE obtained the floor.

Mr. ROBINSON. Will the Senator yield to me?

Mr. EDGE. I yield to the Senator from Arkansas.

Mr. ROBINSON. Mr. President, the veto message has been pending before the Senate for a considerable time. The President's veto was made a short time before the adjournment of the last session and a vote on the passage of the bill thereafter was deferred until the present session. It does seem to me just and proper that some arrangement should be entered into for the final disposition of the measure. I do not know of anyone on this side of the Chamber who desires to control the time in which the Senate shall dispose of the postal employees' salary increase bill, but we do feel with practical unanimity that an arrangement should be entered into to conclude the subject in the early future. It is, of course, a privileged matter, and the Senator in charge of the bill can move, after the unanimous-consent agreement relating to Muscle Shoals has been exhausted, to proceed to the consideration of the President's message, and I trust that he will do so.

Mr. EDGE. Mr. President, I have prepared another unanimous-consent agreement, anticipating a possible objection to the one just offered, which provides for practically the thought expressed by the Senator from South Dakota; in other words, that on Friday, December 12, at 12.30, advancing the hour to 12.30, we shall proceed to consider the veto message of the President. That, of course, would in no way control debate.

I recognize, as the Senator from Arkansas has pointed out, that I can move and if this unanimous-consent agreement is not permitted I shall move at the first opportune time to take up the veto message, and it being, as I understand it, a highly privileged matter, I assume that such a motion will be in order. This agreement accomplishes the same thing as would a motion, excepting that it gives notice, which I think is only fair, to all the Members of the Senate that on the particular day designated the message will be laid before the Senate for whatever disposition the Senate sees proper to make.

I offer the unanimous-consent agreement.

The PRESIDENT pro tempore. The Senator from New Jersey presents a further offer for unanimous consent, which the Clerk will read.

The reading clerk read as follows:

It is agreed by unanimous consent that on the calendar day of Friday, December 12, 1924, at the hour of 12.30 p. m., the Presiding Officer of the Senate shall lay before the Senate the bill S. 1898, a bill to readjust the compensation of postmasters and reclassify and readjust the salaries and compensation of employees in the Postal Service, heretofore returned by the President of the United States without his approval.

Mr. EDGE. As will be seen, that is simply accomplishing what a motion would accomplish and it has the added advantage of setting the day. It does seem to me giving four days for the purpose is much fairer than any Senator taking advantage of an opportune time, which otherwise I shall be compelled to do, to move immediate consideration. Surely the message must be disposed of. I am suggesting it with the thought that it will meet the approval of both the proponents of and objectors to the bill.

Mr. STERLING. Assuming that it will not shut off debate, I have no objection to the unanimous-consent agreement now presented by the Senator from New Jersey.

Mr. BORAH. As has been suggested by the Senator from Arkansas and the Senator from New Jersey, this is a highly privileged matter, and if it were not for the unanimous-consent agreement under which we are now proceeding the Senator from New Jersey could move to take it up at this time. He can move to take it up just as soon as the pending unanimous-consent agreement is out of the way, and I think that is the better course to pursue. So I object to the proposed unanimous-consent agreement.

The PRESIDENT pro tempore. Objection is made.

Mr. EDGE. Mr. President, I give notice now that at the first opportune time I shall move that the Senate proceed to the consideration of the veto message.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haight, one of its clerks, announced that the House had adopted a concurrent resolution (H. Con. Res. 32) providing that when the two Houses adjourn on Saturday, December 20, 1924, they stand adjourned until 12 o'clock meridian, Monday, December 29, 1924.

HOLIDAY RECESS

The PRESIDENT pro tempore laid before the Senate a concurrent resolution from the House of Representatives (H. Con. Res. 32), which was read, as follows:

Resolved by the House of Representatives (the Senate concurring), That when the two Houses adjourn Saturday, December 20, 1924, they stand adjourned until 12 o'clock meridian, Monday, December 29, 1924.

Mr. CURTIS. I ask that the concurrent resolution be referred to the Committee on Appropriations.

There being no objection, the concurrent resolution was referred to the Committee on Appropriations.

PETITIONS AND MEMORIALS

The PRESIDENT pro tempore laid before the Senate memorials of sundry citizens of Los Angeles and vicinity, in the State of California, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. DILL presented a memorial of sundry citizens of Golden-dale, Wash., remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. SWANSON. I present a resolution passed by the Virginia State Chamber of Commerce, and also a letter from the managing director of that organization, urging the purchase of the Cape Cod Canal by the Government. I ask that it may be printed in the Record and referred to the appropriate committee.

There being no objection, the resolution was ordered to be printed in the Record and referred to the Committee on Commerce, as follows:

VIRGINIA STATE CHAMBER OF COMMERCE,
Richmond, November 24, 1924.

HON. CLAUDE A. SWANSON,
United States Senate, Washington, D. C.

DEAR SENATOR SWANSON: I inclose herewith copy of resolution advocating the federalization of the Cape Cod Canal in Massachusetts, passed by the Virginia State Chamber of Commerce on November 24, 1924. It is hoped that we shall have the support of our Virginia Senators and Representatives in Congress in this undertaking, which will mean so much for coastwise shipping out of the Virginia ports.

The bulk of the more than 10,000,000 tons of coal shipped from Hampton Roads annually to New England goes into Boston Harbor, requiring our coal barges to run the risk of storms and fog going around Cape Cod. Again, the movement of Virginia perishable truck crops into Boston and the northern New England ports can be greatly facilitated by the use of the Cape Cod Canal, which would shorten the time in transit considerably.

The effort of the Virginia State Chamber of Commerce to develop a closer union with New England is fully set forth in the inclosed document, which I hope you will read carefully so that you may understand just why we are advocating the federalization of the Cape Cod Canal, among other things, that will help strengthen the New England-Virginia ties. I would like to hear from you in this regard.

With kind personal regards, I am,
Very cordially yours,

LEROY HODGES, Managing Director.

VIRGINIA STATE CHAMBER OF COMMERCE,
Richmond, November 24, 1924.

FEDERALIZATION OF THE CAPE COD CANAL

Resolved, That it is the sense of the Virginia State Chamber of Commerce that the federalization of the Cape Cod Canal, connecting Buzzards Bay and Cape Cod Bay, in Massachusetts, would help promote national commerce as well as the development of coastwise tonnage between the northern New England ports and Hampton Roads; therefore be it further

Resolved, That the Virginia State Chamber of Commerce invite all local commercial organizations throughout Virginia to unite with the State chamber in requesting the Virginia Senators and Representatives in Congress to support legislation authorizing the United States to acquire, on an equitable basis, the Cape Cod Canal and to operate it in the interest of the public.

Mr. GEORGE presented the following joint resolution of the Legislature of the State of Georgia, which was referred to the Committee on Commerce:

Joint resolution

Whereas ocean steam navigation had its beginning in the successful voyage of the steamship *Savannah* from Savannah, Ga., to Liverpool, England, in 1819; and

Whereas ocean steam navigation has revolutionized the trade of the world, has brought all nations closer together, and has rendered incalculable service to mankind in the spread of the English tongue and the communication to mankind of the ideals of the English-speaking people; and

Whereas a proper celebration of that event by the holding of an international exposition in Georgia would go far to the reestablishment of international friendly relations: Therefore be it

Resolved by the House of Representatives of the State of Georgia (the Senate concurring), That there shall be held in the State of Georgia in the year 1928, a world's fair and maritime exposition at Savannah and at Atlanta, lasting from May until December, and that during said period the entire State of Georgia shall be included within the exposition grounds.

Resolved, Second, that the Congress of the United States is hereby invited and urged to participate in said world's fair and maritime exposition, and that the Congress of the United States is hereby earnestly petitioned to extend to all foreign nations a cordial invitation to participate in said world's fair and maritime exposition, and to send their merchant ships and their exhibits to take part in said world's fair and maritime exposition, intended to commemorate the birth of the world's greatest civilizing agency, ocean steam navigation.

Resolved, Third, that a commission to be known as the Georgia World's Fair and Maritime Exposition Commission shall be and is hereby created, which commission shall be composed of the following persons, to wit: Mills B. Lane, Savannah, chairman; Clement S. Ucker, Savannah, vice chairman, ex officio; mayor of Savannah, ex officio; mayor of Atlanta; S. Y. Austin, LaGrange; W. D. Anderson, Macon; W. C. Bradley, Columbus; W. B. Baker, Atlanta; W. W. Banks, Atlanta; E. R. Black, Atlanta; Henry Blum, Savannah; J. E. Conwell, Lavonia; L. C. Council, Americus; J. T. Culpepper, Thomasville; H. A. Dean, Rome; Claude Eubanks, Eastman; Mrs. W. H. Felton, Cartersville; Hugo Frank, Savannah; J. H. Gilreath, Cartersville; T. K. Glenn, Atlanta; Robert Gregg, Atlanta; F. B. Gordon, Columbus; Robert W. Groves, Savannah; Mrs. J. E. Hays, Milledgeville; S. N. Harris, Savannah; C. B. Howard, Atlanta; D. A. Jewell, Chickamauga; Mrs. Lamar, Macon; H. T. McIntosh, Albany; R. A. McCranie, Savannah; A. W. Morehouse, Savannah; W. T. McArthur, sr., McGregor; Robert F. Maddox, Atlanta; J. K. Ottley, Atlanta; W. J. Oliver, Shellman; Sam Orr, Elberton; Mrs. J. K. Ottley, Atlanta; J. W. Oglesby, Quitman; Billups Phinixy, Athens; Jacob Phinixy, Augusta; T. S. Hawes, Bainbridge; W. B. Rice, Dublin; H. D. Reed, Waycross; H. R. Smith, Blundale; E. S. Trosdal, Savannah; H. Y. Tillman, Valdosta; Mrs. A. E. Thornton, Atlanta; Samuel Tate, Tate; W. C. Vereen, Moultrie; J. Pearce Wheeler, Savannah; William W. Williamson, Savannah; Mrs. Henry D. Weed, Savannah; C. A. Wickersham, Atlanta; W. A. Winburn, Savannah; M. R. Wilkinson, Atlanta.

Resolved, Fourth, that it shall be the duty of said Georgia World's Fair and Maritime Exposition Commission to present to the Congress of the United States a copy of this resolution, certified to by the secretary of state, as a formal invitation of the State of Georgia to the Congress of the United States, to participate in said Georgia World's Fair and Maritime Exposition, and as the formal petition of the State of Georgia to the said Congress of the United States to invite all foreign nations to participate.

Resolved further, That said Georgia World's Fair and Maritime Exposition Commission herein created shall have general charge of said exposition movement from date until the close of said exposition, and shall make all plans necessary and proper to the successful conduct of said exposition. Said commission shall have authority to invite, in the name of the State of Georgia, all commercial bodies of the world to take part in said exposition, to aid the city of Savannah and the city of Atlanta in whatever plans said cities may make, to report to the General Assembly of Georgia from time to time, and to suggest and recommend such legislation on the part of the State as may be needed, and also shall have the right to petition Congress to do and perform all such things as may be necessary and proper in order that the United States may creditably perform the office of host during the duration of said exposition, both on land and on water.

Approved August 21, 1922.

THOS. W. HARDWICK, Governor.

Mr. FESS presented resolutions adopted at the Thirtieth Annual Convention of the Ohio Valley Improvement Association, praying for the enactment of legislation providing adequate appropriations for the completion of the Ohio River improvement by 1929, which were referred to the Committee on Commerce.

Mr. CAPPER presented a petition of Local No. 231, Journeymen Barbers' International Union of America, of Pittsburg, Kans., praying for the passage of legislation to regulate Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented memorials of sundry citizens of Hutchinson, Iola, Chautauqua County, Lehigh, Newton, Great Bend, Hillsboro, Chanute, Neosho County, and Trego County, all in the State of Kansas, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented numerous petitions and telegrams in the nature of petitions of sundry citizens and organizations in the State of Kansas praying for the passage of the so-called postal wage bill providing increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

Mr. WILLIS presented a memorial of sundry citizens of Newark, Ohio, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented memorials and letters and telegrams in the nature of memorials of sundry citizens of Cleveland and vicinity, Columbus, Centerburg, New Richmond, Maderia, Akron, and Avon, all in the State of Ohio, remonstrating against the ratification of the so-called Hay-Quesada treaty proposing to cede the Isle of Pines to Cuba, which were referred to the Committee on Foreign Relations.

Mr. JONES of Washington presented petitions, numerous signed, of sundry citizens of Yakima, Seattle, Arlington, Everson, Lowden, Sharon, Pullman, Walla Walla, Ferndale, Blaine, Odessa, Abneta, Grandview, Bickleton, Pasco, Winlock, Goldendale, Davenport, Harrington, Bow, Lynden, and Spokane, all in the State of Washington, praying for the passage of the so-called postal wage bill providing increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

Mr. FRAZIER presented a resolution adopted by the annual convention of the American Federation of Labor, at El Paso, Tex., favoring the passage of the so-called postal wage bill providing increased compensation to postal employees, which was referred to the Committee on Post Offices and Post Roads.

He also presented a resolution adopted by the Unitarian Laymen's League at Niagara Falls, Canada, favoring arbitration of international disputes, which was referred to the Committee on Foreign Relations.

He also presented a telegram in the nature of a memorial of the North Dakota Pharmaceutical Association, at Fargo, N. Dak., remonstrating against the passage of House bill 6645, providing for the placing of Federal prohibition agents under civil service and for the reorganization of the prohibition enforcement department, which was referred to the Committee on the Judiciary.

He also presented petitions of the Citizens Committee of One Thousand, of New York, N. Y.; the New York Civic League, of Brooklyn, N. Y.; the Board of Temperance and Social Welfare, Church of Christ (Disciples), of Indianapolis, Ind.; and the Mount Pleasant Congregational Church, of Washington, D. C., praying for the passage of House bill 6645, providing for the placing of Federal prohibition agents under civil service and for the reorganization of the prohibition enforcement department, which were referred to the Committee on the Judiciary.

Mr. FERRIS presented a petition of sundry post-office employees of Ann Arbor, Mich., praying for the passage of the so-called postal wage bill providing increased compensation to postal employees, which was referred to the Committee on Post Offices and Post Roads.

He also presented memorials, numerous signed, of sundry citizens of Boyne City, Remus, Ludington, Mancelona, Bellaire, Alden, Belding, Lake City, Falmouth, Houghton Heights, Stittsville, Cutcheon, Harrisville, Lincoln, Mikado, Copemish, Berrien Springs, Hale, Wellston, Dublin, Bear Lake, Newaygo, Muskegon, St. Louis, and Spruce, all in the State of Michigan, protesting against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. McLEAN presented petitions, telegrams, and letters in the nature of petitions of the New Haven Trades Council; Goddess of Liberty Council No. 3, Sons and Daughters of Liberty; Washington Council, No. 7, Order of United Ameri-

can Men; Local Union No. 79, United Brotherhood of Carpenters and Joiners; Local No. 237, National Federation Post Office Clerks, and Lodge No. 224, Brotherhood of Railway Clerks; Branch No. 185, National Federation of Federal Employees, of New Haven; Second District Women's Republican Club of Bridgeport; Local Union, No. 282, Cigar Makers' International Union of America, of Bridgeport; employees of United States post office of Danbury; and Branch No. 419, National Association of Letter Carriers, of Wallingford, all in the State of Connecticut, praying for the passage of the so-called postal wage bill providing increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

EXTENSION OF AIR MAIL SERVICE

Mr. FLETCHER. Mr. President, it is usually in order during the morning hour to submit a request like this. I believe ordinarily it comes under the head of petitions.

I ask to have printed in the RECORD an article appearing in the New York Times of December 7 entitled, "United States aviation depends on air mail success," by Colonel Henderson, Assistant Postmaster General. I think it important to have that matter considered, with the idea that there may be some recommendations by Colonel Henderson for proper appropriations to extend this service, especially in view of the fact that hundreds of thousands of people from all parts of the country are going to Florida to spend the winter. I believe they will be interested in this extension and that it might prove proper.

I ask to have the article printed in the RECORD.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

[From the New York Times, Sunday, December 7, 1924]

UNITED STATES AVIATION DEPENDS ON AIR MAIL'S SUCCESS—AMERICA THE ONLY LAND WHERE FLYING IS ASKED TO MAKE GOOD ECONOMICALLY, SAYS COLONEL HENDERSON—SERVICE IS PROVING ITS WORTH AND PATRONAGE GROWS

(By Col. Paul Henderson, Second Assistant Postmaster General)

(Colonel Henderson was a Chicago business man when he joined the Army at the outset of the war. As ordnance officer in France he studied the application of aircraft to military ends. On assuming charge of all postal transportation in 1921 he placed the Air Mail Service under scrutiny and determined either to demonstrate its economic worth or to end the experiment.)

The Air Mail Service of the Post Office Department was started as an experiment May 15, 1918, when we were at the height of the war with Germany. Postal officials felt that since a portion of the mails had always gone by the fastest means of transportation it would be well to learn what advantages were offered by aviation. The route chosen was Washington to New York, a distance of some 240 miles, and the equipment used consisted of obsolete planes lent by the Army Air Service.

The Washington-New York route had been in existence but a short time before the department came to two conclusions. The first was that a civil activity could be more advantageously handled by a civil department, and that the air mail, therefore, should be directed and operated entirely by civilians in the employ of the Post Office Department. The second was that the two terminals being each about one hour's distance from the center of the city, so much time was lost in getting to and from the fields that the advantages of air over rail for the comparatively short distance between the cities of 240 miles were negligible.

The department, having in mind the great distance separating the Atlantic and Pacific coasts, determined thereupon to test flying the mails, whenever practicable, from New York to San Francisco. Even at that early day, when the public mind was generally supposed to be obsessed with war problems, the department was put under pressure to extend the air mail.

One such extension, which was ahead of its time, was a north and south lateral connecting Minneapolis and St. Louis via Chicago. But this was abandoned and, link by link, an air route was thrown 2,640 miles across the continent, touching New York, Bellefonte, Pa.; Cleveland, Chicago, Omaha, Cheyenne, Salt Lake City, Reno, and San Francisco. By the time I assumed office as Second Assistant Postmaster General, this transcontinental air line had worked itself into daily operation, flying as a series of daylight hops from junction to junction, accelerating a considerable quantity of mail between these points, but carrying no through cargoes.

It happened that on the day I took the oath of office I was asked what my intentions were with regard to the air mail. I could only beg the question by asking in turn whether the air mail, as at that time operated, was performing a real economic service. The answer obviously was that it was not, and that the best that could be said

of it was that it was a laboratory for the development of that shadowy activity which we have heard about so much and of which we have seen so little—commercial aviation.

PRINCIPLES OF COMMERCIAL FLYING

There was a certain advantage in my approaching the subject of aviation without pride of opinion. Knowing something of transportation, I felt that the air mail, having functioned experimentally for practically three years, should be able to prove its worth to business. Even slight examination revealed what, to me, was the one great need. Any transportation enterprise that can not operate by night as well as by day, upon schedule, has no hope of financial success. And the air mail, unless it could fly by night as well as by day, arriving and departing at fixed hours, might as well be abandoned, so far as being a channel for the development of commercial aviation.

Here I think it is well to set forth certain principles affecting aviation which I have had opportunity to discern in the three years that it has been my privilege to direct the air mail:

1. Commercial aviation will never appear until business sees some practical way of making money out of it.
2. National defense in the air must be the outgrowth of commercial aviation; never can commercial aviation in an economic sense grow out of military flying.
3. Therefore, instead of persistently harping on the need for more appropriations, so that it can be profitable to manufacture aircraft, we must work out some national policy whereby the public will find it profitable to use aircraft. And having done this, we shall have solved our whole problem.

Military and naval aviation friends, on being consulted as to the practicability of asking the Post Office Department to undertake to operate its planes night and day, advised strongly against it. There had been military flying by night, but only under the necessities of war. To attempt a service upon schedule, and, more than all, to ask the public to pay extra for extra speed, was daring. But we in the department felt that we must either go ahead or quit.

The period between April 11, 1921, and August 21, 1923, was occupied with engineering preparation. I fancied—perhaps I flattered myself—that the department's task was somewhat analogous to the construction of the first transcontinental railroad. By air as well as by river and trail others had marked the way, leaving behind them a blaze of romance, but little else. Ours was the job of translating vision into reality. It required no research to show us that our hope of success lay in attacking the problem from its easiest approach.

Therefore our first night flying was designated to be in the plains and prairie region between Chicago and Cheyenne, a distance of 885 miles. What happened in the four days and nights of August 21–24, 1923, is history. Our planes clocked in and out on schedule. Ten beacons and flood lights of 500,000,000 candlepower each and 50 or more beacons and flood lights of 5,000,000 candlepower each, together with innumerable smaller lights, marked our course with a blaze of light. Thus light, which in military aviation is an enemy, in peace-time aviation is our best friend.

Watching these experiments with me on our field at Omaha were a few persons whose interest was highly significant. They represented a half dozen or so of the great railway systems, and their observations, instead of being critical or hostile, as some had predicted, were of the friendliest nature. This fact and others subsequently appearing lead to the conviction that our transportation leaders are alert to what flying offers in hitherto undreamed of speeds, and that at the right moment their interest will change from academic to practical.

SERVICE MAINTAINED

After these experimental night flights across the continent the Postmaster General authorized one month's continuous operation, and Congress appropriated \$2,750,000 for this purpose. We were not ready for this severer task until July 1, 1924, but on the morning of that day one plane left San Francisco at 6.30, and at 10 two left New York. Since then there has been no interruption.

Notwithstanding severe weather conditions in the night-flying division unparalleled within a generation, our schedule was maintained. There were delays, of course, but I have no hesitancy in stating that, so far as physical operation is concerned, the air mail has demonstrated its success. This brings us up to another phase, which, in my opinion, is equal in importance to the fact of merely demonstrating that we can fly by night winter and summer, storm and clear. This phase, in brief, is public patronage.

Here I would like to revert for a moment to the general topic of aviation policy. It is history that the American pioneers in heavier-than-air flying, failing to find purchasers in the United States, went abroad, where they found not only purchasers but sympathy as well. Americans did not regard aviation seriously back in 1903, because they saw no immediate way of making money out of it. Europe accepted the idea more readily, but primarily from military motives. The question of commercial aviation was secondary to that of its importance as an arm of offense and defense. And the first airplane for which a purchaser was actually found in this country, although it had been conceived as an economic utility, went into military hands.

Aviation in the United States between 1903, when the first world flights were made at Kitty Hawk, N. C., and 1917, when we entered the World War, was not seriously regarded either as a commercial asset or as a military adjunct. But in Europe it was early seized upon by those who saw in it a new and deadlier form of weapon, with the result that the art, while stagnating in America, the land of its birth, flourished abroad for destructive rather than constructive purposes. Then in 1917, when we declared war on Germany, the exigencies were such that we were thrown headlong into a military aviation program, and, to my mind, a great majority of the people to-day persist in thinking of the airplane as an implement of destruction, not a vehicle of peace as something extremely costly to construct and therefore to be regarded only as a war-time luxury instead of something for everyday use, and, perhaps what is most unfortunate, as exceedingly dangerous to operate and therefore to be avoided.

And Europe, behind a façade of heavily subsidized commercial lines, which by the very reason of their subsidy are not sound economically, still undoubtedly regards aviation primarily as a new element which has been added to the forms of warfare known in the past and to the phases of which the world has somehow or other grown more accustomed.

AIRCRAFT INDUSTRY STRUGGLING

Because if this fact, this recognition of the air as an ocean over land and sea, through the universal lanes of which can travel aircraft of both peace and war, the United States must wisely take such steps as will insure the protection of its peoples, its wealth, and its territories from possible attack.

Six years have passed since the armistice. For six years we have been telling ourselves that commercial aviation is imperative, that an aircraft industry is necessary to national security, and that if we do this and so we can achieve this end. And yet we have not achieved it. Postwar appropriations have not been especially niggardly. Our flying missions have penetrated into Arctic and tropical regions and have circumnavigated the globe. American planes and engines hold all the world's records worth speaking of. And yet the aircraft industry, out of which these brilliant examples of engineering and construction have come, still hovers on the verge of collapse.

The reason, as I see it, is that we must translate patriotic interest into practical patronage. We must, in brief, make it profitable for the public to utilize aircraft for economic purposes; we must put aircraft to work. And having done so, nothing in heaven or on earth can stop us from achieving complete commercial dominion as far as is humanly possible over time and space. And from this dominion will come this commercial reserve, will come our real security in the air.

And what has all this to do with the air mail? Simply this: When we started the day and night transcontinental air mail we imposed extra charge—8 cents an ounce or fraction thereof for each zone or part of zone traversed by air. The air zones were New York–Chicago, Chicago–Cheyenne, Cheyenne–San Francisco. Our first business was typical of the impression the public hitherto had had of aviation. There were thousands of souvenir post cards, candy, samples, flowers, live chicks, a suit of clothes that cost possibly \$15 and carried \$18 postage—in short, we carried a lot of publicity junk. In the succeeding days, up to about the middle of July, perhaps, our traffic fell off. One by one the curiosity and souvenir letters and cards faded away and the cargo dwindled.

It was then that a policy adopted by the department which has subsequently been proved wise from every standpoint began to make itself felt. We had the alternative of letting the public find out about the air mail itself or of deliberately, for national reasons, informing business men of the service that had been established and what it would do for them in the way of saving time. Little by little the traffic increased, and as it increased the proportion of personal or obviously freak mail diminished and that of business activities grew. To-day our planes, at the peak of the traffic load, which, curiously enough, falls in the exact center of the transcontinental night flying section, are between 75 and 80 per cent loaded, and the weight is steadily increasing.

BANKERS ARE PATRONS

Were I to take you to Hazelhurst Field, the New York air-mail terminus, and open the air-mail pouches for you, I believe you would be impressed with the contents. Banking mail predominates. The reason is apparent. To the banker, more than to any other business man, time is money. The Federal Reserve Bank in its various branches, and, without exception, all the larger financial institutions in New York, Cleveland, Chicago, Omaha, Cheyenne, Denver, Salt Lake City, Reno, Los Angeles, San Diego, and San Francisco are heavy users. Collections via air mail, whereby transportation time is cut from five days to two, means the saving of enormous sums in actual interest and the release of untold millions in "float," or money credits which are tied up in the mails, and which while tied up are practically nonexistent.

The banker is not afraid to use the air mail. Why should he be? He knows that in the last two years and ten months—or practically the period we have been endeavoring to put the air mail to real use—our planes have flown well over 6,000,000 miles; that they have carried in this time in excess of 2,050 tons of mail, and that out of these 2,050 tons only 125 pounds have been destroyed. Or, figuring

40 letters to the pound, out of probably 100,000 pieces of mail fewer than 5,000 have been lost. This truly remarkable record of efficiency and safety has impelled insurance companies, so the department is informed, to impose on air mail precisely the same rates as those placed on the older established surface means of transportation.

After the bankers in the line of patronage come the transportation and shipping people. We know that the Pennsylvania, the Baltimore & Ohio, the New York Central, the Burlington, the Union Pacific, and the Southern Pacific, to mention but a few railroads, are using the air mail. The great steamship companies have much correspondence passing between the ports of the Atlantic and Pacific coasts, and this correspondence, so many companies inform us, is traveling by air.

Import and export houses, manufacturing concerns doing a nationwide business, publishers, advertising agencies—any business, in fact, whose territory has a radius of 500 miles or more—are regular patrons of the air mail. I have seen shipping papers, manifests, bills of lading, etc., speeding from coast to coast. The New York and San Francisco post offices, aware of this important part of the traffic, coordinate their distribution with steamship sailings, and in this manner save many days, sometimes weeks.

Any person who takes an ordinary interest in either his business or his country's Government knows that apathy is a deadly foe. There may be some who will dispute my statement that aviation has been retarded by apathy. "Apathy!" they will exclaim. "Apathy! In the face of almost continual agitation for aviation!" Exactly so. The curse of aviation has been extravagant promise and barren fulfillment, when it comes to getting to work. And what might have proved the nemesis of aviation has been a patriotic cheer from the public, with rarely a cent of real money paid out for the services aircraft can perform.

If you could hear what bankers, manufacturers, transportation men, and others have said or written to the Post Office Department about the air mail there would be no lingering doubt as to what points the way for a national aviation policy. These men have the farthest vision. They are utilizing the air. As our service increases in efficiency, and as the economic concept of aviation broadens, the usefulness and scope of the air mail will increase. That much is certain.

Do not interpret me as envisioning a net work of air mail lines covering the country like a spider's web. The air mail will grow according to the degree that it is patronized. But I do regard the air mail as the gateway whereby aircraft are being put to work. There are countless tasks the airplane and the airship can perform to-day. I am not one of those who believe that the whole world is impatiently yearning for a chance to fly. I know that the way is to teach the public the safety of flying things, and having learned they will in due time see the safety of permitting themselves to fly. I do not foresee the skies darkened with clouds of flying "divers." But I do foresee aviation as an impressive element in swift, long-distance commerce, performing within its limitations, and with its peculiar advantages the service in the air that are now being approximated only by rail and steamer on land and sea.

I should like to close with one more reference to what we are trying to do in this country as contrasted with the effort abroad. In Algiers, Argentina, Australia, China, Colombia, Denmark, Egypt, France, Germany, Great Britain, Hungary, Italy, India, Japan, Mesopotamia, Mexico, Netherlands, Poland, Soviet Russia, Sweden, and Uruguay efforts have been made within the last few years to operate air-mail lines. But in practically every instance these efforts are primarily military—the postal service is incidental.

In the United States Post Office Department's Air Mail Service we have an effort conceived from the economic standpoint, and now willing to survive or fall according to public patronage. Our air mail operates not only the longest airway in the world—2,720 miles from beacon to beacon—but the only night-lighted airway in the world. It is not self-sustaining, but if patronage continues it will lead inevitably into a condition where volume of traffic, reduction in overhead, and increase in experience will point the way for all commercial aviation.

REPORT OF A COMMITTEE

Mr. SMITH, from the Committee on Agriculture and Forestry, to which was referred the bill (S. 3530) to amend the act entitled "An act authorizing the Director of the Census to collect and publish statistics of cotton," reported it without amendment and submitted a report (No. 798) thereon.

MUSCLE SHOALS

Mr. NORRIS. Mr. President, the so-called Underwood bill, being an amendment in the nature of a substitute for the present unfinished business, was, in the regular routine of the Committee on Agriculture and Forestry, submitted to the Secretary of War for his comments. I have here the comments made by the Secretary of War, and I ask unanimous consent that his letter may be printed in the Record.

The PRESIDENT pro tempore. Is there objection?

Mr. ROBINSON. Just one moment, Mr. President. What is the paper which the Senator from Nebraska [Mr. Norris] asks shall be printed in the Record?

Mr. NORRIS. If the Senate will be in order, I will repeat what I have already stated, in order that Senators may hear me. The so-called Underwood bill, being a substitute for the unfinished business now before the Senate, was, in the regular routine of the work of the Committee on Agriculture and Forestry, submitted to the Secretary of War for his comments. I hold in my hand a copy of the statement by the Secretary of War, which I have asked may be printed in the Record.

Mr. ROBINSON. Why does not the Senator ask to have the letter read?

Mr. NORRIS. Very well. I am perfectly willing to do so.

Mr. ROBINSON. I do not mean to insist upon having the letter read, if there is any reason why it should not be read.

Mr. NORRIS. There is no reason why it should not be read.

Mr. ROBINSON. My understanding is that the letter has not been made public. I tried to get hold of a copy of it on yesterday.

Mr. NORRIS. Very well; then I ask that the letter may be read.

The PRESIDENT pro tempore. Without objection, the Secretary will read the letter.

Mr. UNDERWOOD. I have no objection to the letter being read if the Senator from Arkansas desires to have it read. I will say, however, that there is no material question involved in the suggestions of the Secretary of War which can not be met.

Mr. NORRIS. I did not hear what the Senator from Alabama said, but I wish to say to him that what I have asked is not in any particular out of the ordinary procedure.

Mr. UNDERWOOD. I have no doubt as to that.

Mr. NORRIS. All bills in reference to this matter have been submitted to the Secretary of War for his comment.

Mr. UNDERWOOD. The Secretary of War very kindly furnished me a copy of his letter on last Saturday. I have read it, but, of course, I could not give it out. It is for the Senator from Nebraska himself to give the letter out, and consequently I have not done so.

Mr. NORRIS. I gave the letter out as soon as I received it. There is nothing secret about it.

Mr. UNDERWOOD. If the Senator desires to give the letter publicity, I have no objection.

Mr. NORRIS. I have presented the letter in the Senate in the ordinary course of routine business; that is all.

Mr. ROBINSON. Let the letter be read.

The PRESIDENT pro tempore. The Secretary will read the letter.

The reading clerk read as follows:

(Comment of the Secretary of War)

The bill provides in effect (a) for the dedication and use for national defense in time of war and for the production of fertilizer and other useful products in time of peace of nitrate plants 1 and 2, Waco Limestone Quarry, and Dam No. 2, all of which may be included under the term "Muscle Shoals project"; (b) for the taking over of the entire project whenever necessary in the national defense for the production of explosives or other war material; (c) for the production at all times of certain minimum quantities of nitrogen; (d) for the production of nitrogenous fertilizers when not required for national defense; (e) for leasing of the property under proper guarantees, including the electric power; (f) and in case a lease is not made for the formation of a corporation for the operation of the plant and providing in detail the powers of that corporation.

From the standpoint of carrying out the intention of Congress if the bill should become a law as it is now drafted, I have the following comments to make:

1. As to section 2, it is not clear who is to exercise the discretion necessary to determine when the project shall be taken over for the production of explosives and other war materials in the interests of national defense. Ordinarily such authority should be vested in the President.

2. As to section 3, which requires that minimum quantities of fixed nitrogen shall be produced annually beginning with 10,000 tons the first year and a minimum of 40,000 tons the fourth year, as shown by later discussions of the bill, it is not believed practicable for any operator to manufacture even a major portion of 10,000 tons of nitrogen within the first year after taking control of the plant; further, it is deemed unwise for any operator of the project to attempt to reach a maximum production annually of 40,000 tons of nitrogen within the four-year limit set by the bill.

3. My comments on section 4 are that it provides for the production and manufacture of nitrogenous fertilizers in amounts which might not

find a ready market. The question then arises what to do with the product in case the market does not absorb it, or whether it must be sold below the cost of production in order to market it. Another question is whether it is intended by this section that production should continue irrespective of marketing at a profit or loss. Furthermore, the United States is not authorized to operate under the hydrating and oiling patents of the Cyanamid Co. which covers the process of producing commercial cyanamide fertilizer. This particular material, however, would be of rather small importance in the sales program that would probably be evolved for the operation of this project as the restriction applies to this type only.

4. My comment on section 5 is: First, the Muscle Shoals project can not be operated by a lessee unless license is procured under the cyanamide patents covering the processes and a portion of the apparatus under which this plant was constructed to operate. These patents are owned and controlled by the American Cyanamid Co., and while the United States has a license under these patents under which it could operate the plant and has power to transfer such license to a purchaser of the Muscle Shoals project it has not the power to transfer the rights to a lessee. This criticism also equally applies to operations required under sections 3 and 4 of the bill; second, it is not clearly indicated in the provisions for lease who is to bear the cost of operation of the locks, also as to whether the rental to a lessee would be based on the cost of the dam including the cost of the locks, or exclusive thereof. Another element which is apparently not taken into consideration in the bill is that the present plans do not contemplate the installation of more than eight units in Dam No. 2. Therefore the question arises as to whether the contract is to contemplate the dam completed with eight units installed or not, and, furthermore, whether the rental charge shall begin when the eight units are completed or on the 1st of July, 1925.

5. My comment on section 6 is that the time limit in which the Secretary of War may lease the plant is so short that it is impracticable, if not impossible, to consummate such a lease.

6. My comment on section 7 is that no provision is made for the guaranty of bonds by the United States. Also, the requirement of the bill that the plant shall close down at the end of four years if the corporation is not successful in earning the required interest on the bonds would tend to make the bonds practically worthless. Other portions of the bill place such obligations upon the bondholders as to make the bonds of doubtful or no value unless guaranteed by the United States. Among these is requirement that the plant be operated for the perpetual production of nitrogen. The question also arises in my mind whether the limitations on the disposal of power are not such as to decrease the value of the income from that source. Another question which arises in my mind is what is meant in forming the corporation by the appointment of not more than two officers of the War Department. Does that mean officers of the Army or otherwise? It is not clearly understood what is the extent of the obligation under subparagraph (1) of section 7.

7. Under section 9 it is intended that if storage reservoirs, Dam No. 3, and other power dams, are later constructed in the upper Tennessee the lessee should pay a proportionate share of such construction costs in return for the increased primary power which he would obtain thereby?

To sum up, the bill may be said, in general terms, to provide two alternatives:

(a) The lease of the properties mentioned in the bill for operation by private industry.

(b) The operation of the properties by a corporation in which the United States is the legal owner of the stock, though in effect the corporation would be an independent legal entity and the owner of the property.

Under (a) above, as pointed out in my discussion of the various sections of the bill, a lessee would be without power to operate the plant under the cyanamide processes because of legal and equitable restraints which would undoubtedly be placed in his way by the owner of the patents, the American Cyanamid Co. It is unnecessary to further discuss this alternative.

Under alternative (b) the corporation would have the same power and rights to operate the Muscle Shoals project as the United States, except, as pointed out above, that it would not have power to appropriate a license under the hydrating and oiling patent owned by the American Cyanamid Co. which is necessary in the production of commercial fertilizer, and would therefore be subject to the legal and equitable restraints and other remedies which the American Cyanamid Co. would undoubtedly exercise. However, this patent is not of prime importance, as indicated in my discussion under section 4.

As pointed out in my discussion of the sections of the bill, these difficulties may be overcome only by legislative provision transferring the remedies against the lessee or company so as to permit suit against the United States in the Court of Claims or some other court of competent jurisdiction, which additional cost should be reflected in the selling price of the fertilizer.

The legal phases of the Underwood bill, which I have discussed above, relate largely to restrictions imposed by constitutional provisions and statutes on patents.

In conclusion, it is my opinion that the Underwood bill, without careful and thoughtful amendments along the lines that I have pointed out, is unworkable.

JOHN W. WEEKS,
Secretary of War.

Mr. UNDERWOOD. I merely wish to say that as to a number of the objections which the Secretary of War makes, such as those relating to time and to the guaranty of the bond, of course they are not particularly material. The serious question which he suggests is that involving patents. I think that can be obviated very easily by an amendment or in the contract itself. I will propose such amendments as will meet the objections when the bill comes before the Senate.

REPORT ON COOPERATION IN FOREIGN COUNTRIES (S. DOC. NO. 171)

Mr. NORRIS. From the Committee on Agriculture and Forestry I report back a resolution and ask unanimous consent for its immediate consideration.

The PRESIDENT pro tempore. The Senator from Nebraska asks unanimous consent for the present consideration of a resolution reported by him from the Committee on Agriculture and Forestry.

Mr. SMOOT and Mr. CURTIS asked that the resolution be read.

The PRESIDENT pro tempore. The Secretary will read the resolution for the information of the Senate.

The resolution (S. Res. 277) was read, as follows:

Resolved, That the report of the Federal Trade Commission on "Cooperation in foreign countries," transmitted to the Senate on December 2, 1924, be printed as a Senate document, and that as many additional copies be printed for the use of the Senate as can be printed within the limit of \$500.

Mr. SMOOT. Mr. President, if action is taken upon the resolution, will it be considered as routine morning business?

The PRESIDENT pro tempore. The Senator from Nebraska is asking unanimous consent for its present consideration.

Mr. ROBINSON. Pending that request, I should like to be informed as to how many copies may be printed under the limitation fixed in the resolution and why that limitation is fixed?

Mr. NORRIS. The Senator has propounded a very proper question. We had with us the clerk of the Committee on Printing, and the matter was taken up with the Government Printing Office and an estimate made.

Under the law, as I understand, we can not print anything that will amount to more than \$500 unless in pursuance of a joint or a concurrent resolution having the acquiescence of the House. Within the limit of \$500 we can print anything that we desire by action of the Senate only; and it was to keep it within that limit and get these copies printed as soon as possible that we put in the limitation. In the case of Senate documents the copies are divided up among the Senate and the House, and a good many given to libraries in different parts of the country, and so forth; so that if the copies were divided equally, and everybody got his entire quota, each Senator would have only about two copies. In addition to that, this resolution provides that as many copies shall be printed for the use of the Senate as can be printed within that limitation, and we are informed from the Government Printing Office that that will mean an additional number between 3,000 and 3,500.

Mr. ROBINSON. For the use of the Senate exclusively?

Mr. NORRIS. Yes.

Mr. ROBINSON. I have no objection.

Mr. FLETCHER. Mr. President, what is the cost?

Mr. NORRIS. The cost must be held within \$500.

Mr. FLETCHER. Is this a Senate resolution and not a joint resolution?

Mr. NORRIS. Yes; a Senate resolution.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered by the Senate and agreed to.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. RANDELL:

A bill (S. 3583) making appropriation for the construction and equipment of a light vessel for the Passes at the entrances to the Mississippi River, La.; to the Committee on Appropriations.

By Mr. EDGE:

A bill (S. 3584) to extend the time for completing the construction of a bridge across the Delaware River; to the Committee on Commerce.

By Mr. BROOKHART:

A bill (S. 3585) to extend the benefits of the employees' compensation act of September 7, 1916, to Minnie Schroeder (with accompanying papers); to the Committee on the Judiciary.

A bill (S. 3586) granting an increase of pension to Charles L. Woods (with accompanying papers); and

A bill (S. 3587) granting an increase of pension to Lewis H. Wallace (with accompanying papers); to the Committee on Pensions.

By Mr. BUTLER:

A bill (S. 3588) to remit the duty on a carillon of bells imported for the St. Stephens Church, Cohasset, Mass. (with accompanying papers); to the Committee on Finance.

By Mr. ODDIE:

A bill (S. 3589) for the relief of William E. Clark (with accompanying papers); to the Committee on Claims.

By Mr. NEELY:

A bill (S. 3590) for the relief of Willis B. Cross; to the Committee on Military Affairs.

A bill (S. 3591) granting an increase of pension to William G. Camp; and

A bill (S. 3592) granting an increase of pension to Andrew Shellingburg; to the Committee on Pensions.

By Mr. SHEPPARD:

A bill (S. 3593) for the relief of A. F. W. Macmanus; to the Committee on Military Affairs.

A bill (S. 3594) to amend paragraph 11, section 20, of the interstate commerce act; to the Committee on Interstate Commerce.

A bill (S. 3595) authorizing and directing the Director of the Census to collect and publish statistics of marriage and divorce; to the Committee on the Judiciary.

By Mr. FRAZIER:

A bill (S. 3596) granting a pension to Marcullas Red-Tomahawk; to the Committee on Pensions.

By Mr. BURSUM:

A bill (S. 3598) granting an increase of pension to Esther Shippe; to the Committee on Pensions.

By Mr. WALSH of Montana:

A bill (S. 3599) granting a pension to Edward Murphy; to the Committee on Pensions.

By Mr. McNARY:

A bill (S. 3600) granting a pension to Eliza Wray; to the Committee on Pensions.

By Mr. McLEAN:

A bill (S. 3601) for the relief of Leonard W. Clark; to the Committee on Claims.

By Mr. BALL:

A bill (S. 3602) to amend the legislative, executive, and judicial appropriation act, approved February 26, 1907, as amended, and to amend the Judicial Code; to the Committee on the Judiciary.

A bill (S. 3603) for the relief of James M. E. Brown (with accompanying papers); to the Committee on Claims.

By Mr. BORAH:

A bill (S. 3604) granting an increase of pension to Phebe Spencer (with an accompanying paper); to the Committee on Pensions.

By Mr. KENDRICK:

A bill (S. 3605) to provide for aided and directed settlement on Government land in Federal irrigation projects; to the Committee on Irrigation and Reclamation.

By Mr. McKINLEY:

A bill (S. 3606) for the relief of Ray Wilson; to the Committee on Claims.

A bill (S. 3607) granting an increase of pension to Cordelia E. Maley; to the Committee on Pensions.

AMENDMENT OF NATIONAL BANKING ACT

Mr. DIAL. Mr. President, I introduce a bill which I ask to have referred to the Committee on Banking and Currency. I desire to say in this connection that during the last 12 months the country has been greatly disturbed about the number of bank failures in the United States. I have investigated the subject, and I find that it is apparently caused largely by the capitalization of small banks at \$25,000 and less. By this bill I ask to change that. The business of the country has been greatly disturbed about the number of failures, and I am inclined to believe that the disturbance has been greatly out of proportion to the actual facts.

From January 1, 1924, down to December 1, 1924, there have been 691 bank failures. Five hundred and ninety-nine, or nearly 87 per cent of these failures, were of banks having a capital of \$50,000 and less. Two hundred and eighty-one of these banks, or about 41 per cent, had a capital of less than \$25,000. So I hope the Committee on Banking and Currency will act on this matter, and that we will have less failures in the future.

I sympathize very much with small communities, but I feel that it is a great mistake to organize banks where there is not enough business to justify proper attention to their management. I feel that we have entirely too many banks in the country now. They ought to consolidate, thereby securing better business management, stronger capital, and making it safer for the depositors and all those who deal with them.

I ask to have the bill referred to the Committee on Banking and Currency, and that the statement be published in the RECORD.

The PRESIDENT pro tempore. Without objection, that order will be made.

The matter referred to is as follows:

There have been 691 bank failures from January 1, 1924, down to December 1.

One hundred and forty-four banks, or about 21 per cent, were members of the system (118 national, or 17 per cent).

Two hundred and eighty-one, or about 41 per cent, with capital less than \$25,000.

Four hundred and fifty-three, or 65.5 per cent, had capital of \$25,000 and less.

Five hundred and seven, or nearly 74 per cent, with capital less than \$50,000.

Five hundred and ninety-nine, or nearly 87 per cent, with capital of \$50,000 and less.

The bill (S. 3597) to amend certain acts relative to the capital stock of national banks was read twice by its title and referred to the Committee on Banking and Currency.

AMENDMENT TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. ODDIE submitted an amendment proposing to appropriate \$500,000 for continued investigations, commencement of construction, necessary expenses in connection therewith, and for operation, under the provisions of law, of the Spanish Springs extensions, Newlands project, Nevada, intended to be proposed by him to House bill 10020, the Interior Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

AMENDMENTS TO MUSCLE SHOALS BILL

Mr. JONES of Washington submitted an amendment; Mr. BRUCE, Mr. McKELLAR, and Mr. COPELAND each submitted two amendments; Mr. HARRIS submitted four amendments; and Mr. HOWELL submitted sundry amendments intended to be proposed by them to House bill 513, the so-called Muscle Shoals bill, which were severally ordered to lie on the table and to be printed.

ISABELL EASE

Mr. CURTIS submitted the following resolution (S. Res. 279), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be, and he is hereby, authorized and directed to pay out of the contingent fund of the Senate to Isabell Ease, widow of William Ease, late an employee on the maintenance roll, Senate Office Building, a sum equal to six months' salary at the rate he was receiving by law at the time of his death, said sum to be considered as including funeral expenses and all other allowances.

MAY RONSAVILLE

Mr. SHORTRIDGE submitted the following resolution (S. Res. 280), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay out of the contingent fund of the Senate to May Ronsaville, daughter of Robert H. Maguire, late an employee of the Senate, under the Sergeant at Arms, a sum equal to six months' salary at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

HEARINGS BEFORE COMMITTEE ON THE LIBRARY

Mr. PEPPER submitted the following resolution (S. Res. 281), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on the Library or any subcommittee thereof is hereby authorized during the Sixty-eighth Congress

to send for persons, books, and papers, to administer oaths, and to employ a stenographer, at a cost not exceeding 25 cents per 100 words, to report such hearings as may be had in connection with any subject which may be before said committee, the expense thereof to be paid out of the contingent fund of the Senate; and that the committee or any subcommittee thereof may sit during the sessions or recesses of the Senate.

THE MEAT-PACKING INDUSTRY

Mr. NORRIS. I offer a Senate resolution and ask unanimous consent for its present consideration.

Mr. CURTIS. Let it be read.

The PRESIDENT pro tempore. The Senator from Nebraska submits a Senate resolution, for which he asks immediate consideration. The Secretary will read the resolution for information.

The resolution (S. Res. 278) was read, considered by unanimous consent, and agreed to, as follows:

Whereas questions of public policy, both as to the large meat packers and as to the wholesale grocers, are involved in any modification or in the annulment of the consent decree entered in the Supreme Court of the District of Columbia on February 27, 1920, in the case of United States v. Swift & Co. et al., commonly known as the packer consent decree; and

Whereas these questions should properly be considered by the Congress, since the said decree was before the Congress when it considered and passed the packers and stockyards act, 1921, and since the Congress relied on said decree, consented to by the packer defendants in a prosecution under the Sherman Antitrust Act, to cover the subjects contained in said decree; and

Whereas modification of said decree is now being sought in the courts on the alleged ground, in part, that it operates to relieve the wholesale grocers of the country of competition from the defendant meat packers who, theretofore largely engaged in the wholesale grocery trade, were by the consent decree prohibited from engaging therein, with the alleged result of creating a monopoly in favor of the wholesale grocery association; and

Whereas the entire annulment and vacating of the said decree, which covers such important subjects as the ownership of stockyards and the retailing of meats as well as the wholesale grocery matter, is being sought on divers alleged grounds by the defendant packers pursuant to a motion filed by them in said case on November 5, 1924, in the Supreme Court of the District of Columbia; and

Whereas the Federal Trade Commission at divers times has investigated the wholesale grocery trade and at divers times has taken action within its jurisdiction against certain associations of wholesale grocers for unfair methods of competition tending toward monopoly, and is on that account well informed on conditions in that trade; and

Whereas, moreover, the Federal Trade Commission is well informed on the meat-packing industry through its investigation and report on that subject, which report had great influence on the Congress in considering the packers and stockyards act, 1921, and on the Attorney General of the United States in the drawing of the terms of the said decree, to which he consented for the Government: Therefore be it

Resolved, That the Senate hereby requests the Federal Trade Commission to report concisely to it at the earliest possible time all information in its possession or readily securable concerning the history and present status of the said consent decree and of the hearings, litigation, and other action growing out of it, and concerning the respective effects that may be expected if the consent decree is enforced, is modified as proposed, or is annulled, together with its recommendations on the public policies involved.

Mr. NORRIS. Mr. President, for the information of the Senate on that subject I should like to read into the Record an extract from the opinion of the Court of Appeals of the District of Columbia.

As the resolution recites, the decree was a consent decree, consented to by the Government and the packers. An attempt has been made to modify it, and an attempt is being made to hold it null and void. The Wholesale Grocers' Association applied to intervene. They were permitted by the Supreme Court of the District of Columbia to intervene. The National Southern Wholesale Grocers' Association and the California Cooperative Canneries asked to intervene, and were by the Supreme Court of the District of Columbia denied the right. That question went to the court of appeals. The court of appeals reversed the lower court, and directed that the California Cooperative Canneries be permitted to intervene, but they made some comment. While the question of the legality of the decree was not directly before them, they made some comment on it that I think is quite important. With the permission of the Senate, I want to read an extract from that opinion. The court said:

The petitioner (California Cooperative Canneries) assails the decree as void for want of jurisdiction or power, apparent on the face of the record, and insists that its direct effect is to restrict and not to promote competition in the distribution of fruit commodities; that its whole effect is to create a monopoly in favor of the Wholesale Grocers' Association, particularly the Southern and National Wholesale Grocers' Association, and that the monopoly thus created is destructive of appellant's business, the business of farmers' organizations, the business of general stores, mail-order houses, cooperative buying by retailers, meat packers, and business houses conducting both wholesale and retail business.

Inasmuch as the validity of the consent decree was not questioned in the court below by any of the parties to the action, that question is not before us.

The only order appealed from, and the one to which our attention is limited, is the refusal to grant appellant leave to intervene. What effect our ruling upon that question may have later, in the event we are called upon to determine the validity of the consent decree, it is unnecessary to consider at this time.

It is not clear on just what theory the court below should permit the grocers' associations to intervene and deny the right of intervention to appellant, as the interests of these parties seem to be diametrically opposed to each other. If the charge of appellant (California Cooperative Canneries) is true, that the wholesale grocers are using the decree against the packers to strengthen and build up a giant monopoly in their various and varied lines of business, there would seem to be demand for a searching inquiry as to whether or not the court is being used as an agency to restrain one monopoly and thereby promote, strengthen, and build up another. Clearly it is not the policy of the antitrust act to accomplish this result. Nor will the decree of the court below declaring the packers' combination illegal under the antitrust act be sustained if its effect is to safeguard one public interest by the destruction of another. *United States v. Terminal Railroad Association, supra.*

Mr. KING. Will the Senator permit a question?

Mr. NORRIS. Certainly.

Mr. KING. Does the Senator's resolution, just agreed to, contemplate an inquiry as to whether or not the Grocers' Association is a monopoly, and whether it is using the decree of the court for the purpose of perpetuating the grocers' monopoly?

Mr. NORRIS. Yes; I think that would be included in the resolution. It directs the Federal Trade Commission to investigate the whole subject.

Mr. REED of Missouri. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Nebraska yield to the Senator from Missouri?

Mr. NORRIS. I yield.

Mr. REED of Missouri. I would like to get the Senator's views on this proposition, whether a court having before it a charge that the Federal antitrust laws are being violated has any other jurisdiction than to determine that question of fact, and impose the penalties or enter the decree provided by the law; that is, whether a court has the right to enter a decree and then reserve the right to change and modify that decree thereafter, on application of the parties or other people, as the court may see fit; whether, as a matter of fact, that does not amount to an undertaking by a court of administrative functions, and if it does not trench closely upon legislative powers?

Mr. NORRIS. Mr. President, I can not, thinking of this particular case, fully answer the interrogatory of the Senator from Missouri, because I have forgotten now a great deal that was involved in the so-called consent decree. I agree with the Senator that the court has no right, as a matter of law, to take upon itself legislative powers, but if the question was brought out by the Senator on account of the extract which I read from the opinion of the court of appeals, where they said that a searching inquiry ought to be made, I think it is fair to the court, although I have not read the entire opinion, to say that they meant by that that the searching inquiry should be made by the court below to ascertain whether, as a matter of fact, in the case before it one monopoly was trying to use the instrumentality of the court to kill some other monopoly with which they were in competition. I suppose that is what the reference to the searching inquiry there means.

Mr. REED of Missouri. Mr. President, I have no desire to criticize the court, but, as I understand the case to which the Senator from Nebraska calls our attention, an action was brought against the packers, and instead of going on and trying that case and determining its merits and entering a decree in accordance with its determination, the court permitted a

consent decree to be entered which undertook to regulate the future conduct of the defendant companies. Then the court retained jurisdiction thereafter to change or modify that decree as it might be advised.

Reduced to a concrete statement, that means that the courts are now to undertake the supervision of that business and to tell the proprietors of that business what they can do and what they can not do, not dealing with the case which was presented to the court and which alone the court had the right to decide, but undertaking to supervise and manage a business concern; and the case being thus in the hands of the courts the question would arise, What sort of regulation will they make? Will it be of that character which an administrative arm of the Government might make if a law had been passed authorizing such regulation; and if so, what branch of the Government would be so empowered? Or does it even go further than that in principle, if not in form, and amount to regulation by the judiciary of business concerns which legally can only be regulated by the statutes of the land?

I think this question is a very serious one. I think the policy of entering these consent decrees, with the right thereafter to change, alter, or modify them, is an anomaly in our law when it is applied in this particular manner. Of course, decrees of that kind have been entered heretofore when property was in the hands of a receiver and thus legitimately in the hands of the court.

I am glad the Senator has offered his resolution, but I think that when it comes before this body for discussion it will present a much broader question than possibly he has in mind.

Mr. NORRIS. Mr. President—

The PRESIDENT pro tempore. There is nothing before the Senate, as the Chair understands it.

Mr. NORRIS. I understand that we are proceeding by unanimous consent. The Senator's remarks remind me that this consent decree was brought about at the time the Senate Committee on Agriculture and Forestry had before it the so-called packers' stockyards act. The Attorney General of the United States appeared before the committee and told us about the consent decree.

I agree with the Senator from Missouri that the courts should not permit themselves to be used as regulatory bodies, and I said at the time, when the matter came before the committee, that as far as I was concerned I thought we should go ahead and legislate without any reference whatever to that consent decree. But we did not. It was taken into consideration when the act was passed, and then, after the act was passed, come claims on one side that it is null and void and on the other side efforts to get it modified—in other words, as it seems to me, to accomplish through the courts what ought to be accomplished only by legislation.

REPORT OF THE NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS (S. DOC. 158)

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Naval Affairs and ordered to be printed:

To the Congress of the United States:

In compliance with the provisions of the act of March 3, 1915, establishing the National Advisory Committee for Aeronautics, I submit herewith the tenth annual report of the committee for the fiscal year ended June 30, 1924.

The attention of the Congress is invited to Part V of the committee's report, presenting a summary of the present status of aviation with reference to the existing governmental organization, the agencies for coordination, and the relation of aeronautical research, the aircraft industry, and commercial aviation to the problems of national defense. I concur in the committee's general recommendations and agree that in the last analysis substantial progress in aviation is dependent upon the continuous prosecution of scientific research.

When the National Advisory Committee for Aeronautics was established by Congress in 1915, there was a deplorable lack of technical information on aeronautics in this country. In submitting this, the tenth annual report of the committee, I feel that it is appropriate to say a word of appreciation of the high-minded and patriotic services of the men who have faithfully served their country without compensation as members of this committee and of its subcommittees. Through this committee the talent of America has been marshaled in the scientific study of the problems of flight, with the result that to-day America occupies a position in the forefront of progressive nations in the technical development of aeronautics.

The status of the committee as an independent Government establishment has largely made possible its success.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 8, 1924.

REPORT OF THE UNITED STATES BUREAU OF EFFICIENCY

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying report, referred to the Committee on Appropriations:

To the Congress of the United States:

As required by the acts of March 4, 1915, and February 28, 1916, I transmit herewith the report of the United States Bureau of Efficiency for the period from November 1, 1923, to October 31, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 8, 1924.

REPORT OF THE GOVERNOR OF THE PANAMA CANAL

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying report, referred to the Committee on Inter-oceanic Canals:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, the annual report of the Governor of the Panama Canal for the fiscal year ended June 30, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 8, 1924.

REPORT OF THE PANAMA RAILROAD CO.

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying report, referred to the Committee on Inter-oceanic Canals:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, the seventy-fifth annual report of the board of directors of the Panama Railroad Co. for the fiscal year ended June 30, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 8, 1924.

ACTS OF THE TENTH LEGISLATURE OF PORTO RICO

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying documents, referred to the Committee on Territories and Insular Possessions:

To the Congress of the United States:

As required by section 23 of the act of Congress approved March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes," I transmit herewith copies of certain acts and resolutions enacted by the Tenth Legislature of Porto Rico during its second special session (June 11 to June 21, 1924, inclusive).

These acts and resolutions have not previously been transmitted to Congress and none of them has been printed as a public document.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 8, 1924.

FRANCHISES GRANTED IN PORTO RICO

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Territories and Insular Possessions:

To the Congress of the United States:

As required by section 38 of the act approved March 2, 1917 (39 Stat. 951), entitled "An act to provide a civil government for Porto Rico, and for other purposes," I transmit herewith certified copies of each of 16 franchises granted by the Public Service Commission of Porto Rico. The copies of the franchises inclosed are described in the accompanying letter from the Secretary of War transmitting them to me.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 8, 1924.

MUSCLE SHOALS

The PRESIDENT pro tempore. The routine morning business is closed, and the Chair lays before the Senate the unfinished business, which is House bill 518.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and

for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

Mr. UNDERWOOD. Mr. President, I desire to offer the amendment that I had printed the other day in lieu of the substitute proposed by the Senator from Nebraska [Mr. Norris] as a committee amendment, in order that it may be pending and to give an opportunity to some of my colleagues to propose amendments to it which they desire to do.

I want to say to the Senate that in conformity with a conversation I have had with the Secretary of War this morning concerning some amendments which he desires, I have changed the date, lengthening the time in which he is permitted to make a contract. Personally, I felt that July 1, 1925, was sufficient time. The Secretary of War desires that the time be extended to the 1st day of September, 1925, and in introducing the amendment I have made that change, which differs from the printed copies of the amendment that Senators have on their desks.

The amendment as I introduced it provided that at least 10,000 tons of fixed nitrogen should be made the first year, 20,000 tons the second year, 30,000 tons the third year, and thereafter 40,000 tons annually. The Secretary of War thought that was too short a time. The same thought applies to fertilizer. I have no doubt in my own mind that the plant can make the first year 10,000 tons of fixed nitrogen in the shape of cyanamide, but I recognize on consideration that it could not be converted into fertilizer in that time, because a fertilizer plant has yet to be built. There is no fertilizer plant connected with the establishment; it is only a nitrogen plant. The fertilizer plant must be constructed. In the orderly course of construction it would probably take two years to complete it, and therefore I am willing to concede that, because of course we could not require of the lessee to do the impossible and convert the nitrogen into fertilizer until he had his time and chance to build the fertilizer plant. I have changed the amendment so that instead of requiring that of the fertilizer and nitrogen 10,000 tons shall be made the first year, it now reads 10,000 tons the third year, 20,000 tons the fourth year, and 30,000 tons the fifth year, extending the time because of the necessity for building a fertilizer plant.

Then the Secretary of War has recommended that the principal and interest of the bonds provided in the substitute shall be paid by the Government in the event of default by the corporation, and he gives a very good reason for it. He said of course this is Government property and in the end the Government would not allow the \$150,000,000 investment in the dam to be forfeited for the \$50,000,000, and would have to pay the principal and interest; but he said that would not help to sell the bonds. In any default that might be made we would have to pay anyhow, but he said he can sell the bonds at a very much better price if the guaranty is put in the bill. Therefore I have added to the amendment as it was printed a proviso on page 12, line 23, that reads as follows:

Provided, That the principal and interest of said bonds shall be paid by the Secretary of the Treasury out of funds in the Treasury not otherwise appropriated, upon default at any time in payment as herein provided by the corporation.

Mr. SMOOT. Does the Senator provide that the funds shall be tax exempt?

Mr. UNDERWOOD. I did not go that far, because I did not want to bring in that issue.

Mr. SMOOT. I do not wish the Senator to bring it in at all, but I wanted to be sure about it.

Mr. UNDERWOOD. I do not provide that. Of course, this provision would make the bonds sell at a premium. If the Senate desires to change it and provide for tax-exempt bonds, which would, of course, cut down the cost of operation of the plant, I personally should be very glad to agree to it, but I am not going to inject that issue into the bill.

Mr. SMOOT. I am very glad the Senator has not done so.

Mr. UNDERWOOD. There is one other suggestion that I have not worked out, and I may propose a further amendment to the substitute in lieu of the substitute offered by the Senator

from Nebraska, which covers all the points that are suggested by the Secretary of War, and that is the question as to whether the patents can be transferred to the lessee or not. The contract of the Cyanamid Co., who had the patents on the cyanamide plant, provides that the Government may have the use of their patents on paying the agreed royalty, and that a purchaser may have them. The Judge Advocate General of the War Department, when the Ford proposal was before the War Department, made the suggestion that there was no question about a purchaser having the right to the use of the patents nor about a Government corporation acting in lieu of the Government, but he challenged the question as to whether they could be used by a lessee. He did not say that they could not be, but said it was a question. I think I had better read into the Record just exactly what he did say. This was the opinion rendered by the Judge Advocate General and is found in House Report 143, Sixty-eighth Congress, first session, page 37. He said:

With reference to the question as to whether or not the United States may transfer the right, license, and privilege to use any or all patents, processes, methods, and designs which have been acquired by the United States under the license agreement with the American Cyanamid Co., my attention has been invited to the fact that said agreement provides that the United States may transfer to the purchaser of said plant the right to avail itself of the license granting the operation of the plant to purchase, subject, of course, to the conditions of use granted to the United States, but that it is extremely doubtful that the term "purchaser" as used in the contract could be construed to include the lessee of said plant.

That is the real question for the Senate to consider. I have been so long from the practice of the law that I do not announce it authoritatively, but it is my own opinion that where the owner of a patent builds a great plant for the Government and provides that the Government may have the use of the patents for its own operation, the Supreme Court of the United States would give a liberal construction to the contract rather than a narrow one, and would hold that the greater included the lesser, and that it was the intent of the Cyanamid Co. when it granted the right to the patents and said that a purchaser could have them to include a purchaser for a shorter term of years; in other words, a lease for 50 years would carry with it the same right as a purchase for all time. I think that would be the liberal construction of the contract, and I believe that would be agreed to by the court.

But, of course, I recognize that there is a legal question involved, and it goes to the very vitals of the proposition. If we sell this property, it goes beyond our control for national defense and beyond our control except under the terms of the contract for purchase. I think the policy of the Government should be as expressed in the amendment I have proposed, that the property should be dedicated forever to national defense and the making of fertilizer; but I prefer a lease to Government operation, if we can get it.

I believe the way out is for the Secretary of War, in making his contract, to make the lessee the agent of the United States Government for the operation of plant No. 2, providing that the lessee shall carry the burdens of operation. The memorandum sent here by the Secretary of War is one which the Secretary of War himself did not prepare. Of course, it was the officers in his department who did it. I understand it was prepared by the Judge Advocate General, the Chief of Engineers, and the Chief of Ordnance, and that the Secretary signed it. They criticize some of the powers in the bill to make the contract, but I do not think they visualized the bill. If we had said in our legislation when we passed it that the Secretary of War shall have the right to make a lease of this property for 50 years, nobody would question that he had a right to put anything in the lease that was within the property and the time limit. He would be unlimited in his right to make a lease. What we do is to give him under these terms the absolute power to make the lease with certain restrictions.

Those restrictions relate to the amount of nitrogen that must be made, the amount of fertilizer that he must compel the lessee to make, and that he shall not lease the property for less money than 4 per cent of the cost of the dam. Outside of that he can put anything in the lease contract that he desires.

I think it is better that the power be given to the Secretary of War subject to the approval of the President of the United States than it is to narrow the scope, because one lessee might want the contract developed along one line and another lessee along another line, and we are more likely to get a satisfactory lessee if we do not limit the scope of his action by too

much machinery put in the lease through the legislative enactment. The desire of Congress is first, 40,000 tons of nitrogen for national defense. Second is the desire that in time of peace the farmers of America may have the benefit of that nitrogen converted into fertilizer which will absorb 40,000 tons of nitrogen. That is our objective.

The only other limitation is a very low one, I admit, and is that he must not lease the property for less than 4 per cent of the cost of the dam. He can charge as much more as he wants to. I am not in favor of giving the property away, but if we can get fertilizer and national defense I am not in favor of burdening the property of the taxpayer unnecessarily. I think this condition can be met by the Secretary of War writing into the contract, if he finds a lessee, that in the operation of nitrate plant No. 2 the lessee shall become the agent of the United States Government for the operation of the plant. Of course, when we do that then there is no question about his right to use the patents.

Mr. FESS. Mr. President, will the Senator yield?

Mr. UNDERWOOD. Certainly.

Mr. FESS. Does the Senator now propose a time limit within which the Secretary of War must lease it, or otherwise he loses that authority?

Mr. UNDERWOOD. Probably the Senator came in after I began my statement. In the amendment which I offered I had a provision that the Secretary of War must make this lease by the 1st day of July.

Mr. FESS. Yes; I noticed that.

Mr. UNDERWOOD. I went over the whole question with the Secretary of War this morning. The Secretary of War indicated to me that he would be satisfied if the date were changed to September 1 instead of July 1.

Mr. FESS. Did he think that would be time enough?

Mr. UNDERWOOD. That was his indication. I had just stated that in introducing the amendment I had made that change and was calling the attention of the Senate to the change I have made so that no one may be misled by the printed amendment.

I am not sure that it is necessary to put an amendment in the bill to make the lessee the agent of the Government in the operation of plant No. 2 and avoid all legal contests about the use of the patents. I wish to give it more study before I propose an amendment along that line. I think the Secretary of War may, without any further authority than we have already given him, provide in the contract that the lessee shall be the agent of the Government, but it may be that before the amendment comes to a vote I shall meet that question.

Substantially the amendment meets all the questions that have been advanced in the memorandum that was sent here this morning by the Secretary of War and which was read at the desk.

I now desire to submit the amendment in lieu of the substitute offered by the Senator from Nebraska [Mr. NORRIS], which is the committee amendment, and to have it read at this time.

The PRESIDING OFFICER (Mr. STERLING in the chair). The Senator from Alabama may present his amendment at this time, but there is an amendment pending.

Mr. UNDERWOOD. I understand that, but I have also looked up the authorities and find that I have the right, under the rules of the Senate, to offer the amendment not as a substitute for the pending amendment but in lieu of the amendment offered by the Senator from Nebraska. Therefore it will be pending, and the vote will come on the proposal which I have made. If that shall be defeated, then the vote will come on the proposal of the Senator from Nebraska.

Mr. BRUCE. Mr. President—

Mr. NORRIS. Mr. President, I agree with the Senator from Alabama that it is perfectly proper for him now to offer his amendment to the committee amendment, which is of another bill. They are both subject to amendment, of course, before we vote on his substitute.

Mr. UNDERWOOD. Undoubtedly; and I intended to hold it back and offer it later.

Mr. NORRIS. I am glad the Senator has presented it at this time. I think it will clarify the situation.

Mr. UNDERWOOD. But, as I stated a while ago, I have presented it because some of my colleagues have stated that they wish to propose amendments to it, and I am putting it before the Senate in order that they may have the opportunity to do so.

Mr. NORRIS. I think the Senator has taken the right course.

Mr. BRUCE. Mr. President, I desire to call attention to the fact that I have offered an amendment to the substitute of the Senator from Nebraska which has not yet been disposed of.

Mr. NORRIS. Yes; and that takes precedence.

Mr. UNDERWOOD. The Senator is right, and that is not in conflict with the action which I propose. The Senator from Maryland is proposing an amendment to the text of the bill, while I am proposing an amendment in lieu of the substitute. Of course, the amendment of the Senator from Maryland will first be voted on; the original text has first to be perfected. After that shall have been done, then the proposal to offer a substitute in lieu of the committee substitute comes up.

Mr. BRUCE. Let me ask the Senator from Alabama if it is his expectation that amendments will be offered to his substitute at this stage of the proceeding, if there is no objection?

Mr. UNDERWOOD. I have proposed the amendment so that amendments could be offered to it.

Mr. BRUCE. Then, Mr. President, I should like to offer some amendments to the proposed substitute.

Mr. UNDERWOOD. I should like to have the amendment which I have proposed formally stated before we proceed.

Mr. NORRIS. Very well. Does the Senator desire that his amendment shall now be read?

Mr. UNDERWOOD. I should like to have it read. Then it will not be necessary to read it again when we come to vote upon it.

The PRESIDING OFFICER. The Secretary will read the amendment.

The PRINCIPAL LEGISLATIVE CLERK. In lieu of the amendment reported by the committee it is proposed to insert the following:

That the United States nitrate-filtration plants Nos. 1 and 2, located, respectively, at Sheffield, Ala., and Muscle Shoals, Ala., together with all real estate and buildings used in connection therewith; all tools, machinery, equipment, accessories, and materials thereunto belonging; all laboratories and plants used as auxiliaries thereto; the Waco limestone quarry in Alabama, and any others used as auxiliaries of said pitrogen plants Nos. 1 and 2; also Dam No. 2, located in the Tennessee River at Muscle Shoals, its power house, its auxiliary steam plants, and all of its hydroelectric and operating appurtenances, together with all machines, lands, and buildings now owned or hereafter acquired in connection therewith, are hereby dedicated and set apart to be used for national defense in time of war and for the production of fertilizers and other useful products in time of peace.

SEC. 2. Whenever, in the national defense, the United States shall require all or any part of the operating facilities and properties or renewals and additions thereto, described and enumerated in the foregoing paragraph of this act, for the production of materials necessary in the manufacture of explosives or other war materials, then the United States shall have the immediate right, upon five days' notice to any person or persons, corporation or agent, in possession of, controlling or operating said property under any claim of title whatsoever, to take over and operate the same in whole or in part, together with the use of all patented processes which the United States may need in the operation of said property for national defense.

The foregoing clauses shall not be construed as modified, amended, or repealed by any of the subsequent sections or paragraphs of this act or by indirection of any other act.

SEC. 3. In order that the United States may have at all times an adequate supply of nitrogen for the manufacture of powder and other explosives, whether said property is operated and controlled directly by the Government or its agents, lessees, or assigns, under any and all circumstances at least 10,000 tons the third year, 20,000 tons the fourth year, 30,000 tons the fifth year, and thereafter 40,000 tons of fixed nitrogen must be produced annually on and with said property, and no lease, transfer, or assignment of said property shall be legal or binding on the United States unless such adequate annual production of fixed nitrogen is guaranteed in such lease, transfer, or assignment.

SEC. 4. Since the production and manufacture of commercial fertilizers is the largest consumer of fixed nitrogen in time of peace, and its manufacture, sale, and distribution to farmers and other users, at fair prices and without excessive profits, in large quantities throughout the country is only second in importance to the national defense in time of war, the production of fixed nitrogen as provided for in section 3 of this act shall be used, when not required for national defense, as far as it is practicable to do so, in the manufacture of commercial fertilizers. The United States, its agents or lessees or assigns, shall manufacture nitrogen and other commercial fertilizers, mixed or unmixed, and with or without filler, according to demand, on the property hereinbefore enumerated, or at such other plant or plants near thereto as it may construct, using the most economic source of power available, with an annual production of these fertilizers that shall have a nitrogen content of at least 10,000 tons the third year,

20,000 tons the fourth year, 30,000 tons the fifth year, and thereafter 40,000 tons of fixed nitrogen. In order that the farmers and other users may be supplied with fertilizers at fair prices and without excess profits, the United States, its agents, lessees, or assigns, shall be limited to a maximum net profit which may be made not to exceed 8 per cent of the fair annual cost of the production thereof.

Sec. 5. That the Secretary of War, with the approval of the President, is hereby authorized and empowered to lease the properties enumerated under section 1 of this act, with proper guaranties for the performance of the terms of the lease, for a period not to exceed 50 years, the lessee being required and obligated to carry out in the production of nitrogen and the manufacture and sale of commercial fertilizer the purposes and terms enumerated in sections 1, 2, 3, and 4 of this act and such other terms not inconsistent therewith as may be agreed to in the lease contract. The lessee shall pay an annual rental for the use of said property an amount that shall not be less than 4 per cent on the total sum of money expended in the building and construction of Dam No. 2 at Muscle Shoals and the purchase and emplacement of all works and machinery built or installed in connection therewith for the production of hydroelectric power. The lease shall also provide the terms and conditions under which the lessee may sell and dispose of the surplus electric power created at said plants. The lease shall also provide for the protection of navigation at said Dam No. 2 and the operation of the locks connected therewith. The lease contemplated in this section shall be made with the understanding that the United States shall complete and have ready for operation Dam No. 2 and the locks connected therewith, together with the plants and machinery for the production of electric power, and that after the lease is entered into the lessee shall maintain the property covered by the lease in good repair and working condition for the term of the contract.

Sec. 6. In the event the Secretary of War is unable to make a lease under the terms of the power herein granted to him before the first day of September, 1925, then the United States shall maintain and operate said properties described in section 1, in compliance with the terms and conditions set forth in sections 1, 2, 3, and 4 of this act, and under the power and authority prescribed and granted in the following sections of this act.

Sec. 7. That the Secretary of War is hereby authorized and empowered to designate any five persons to act as an organization committee for the purpose of organizing a corporation under authority of, and for the purposes enumerated in, this act.

ORGANIZATION

The persons so designated shall, under their seals, make an organization certificate, which shall specifically state the name of the corporation to be organized, the place in which its principal office is to be located, the amount of capital stock, and the number of shares into which the same is divided, and the fact that the certificate is made to enable the corporation formed to avail itself of the advantages of this act. The name of the corporation shall be the Muscle Shoals Corporation.

The said organization certificate shall be acknowledged before a judge of some court of record or notary public, and shall be, together with acknowledgment thereof, authenticated by the seal of such notary or court, transmitted to the Secretary of War, who shall file, record, and carefully preserve the same in his office. Upon the filing of such certificate with the Secretary of War as aforesaid, the said corporation shall become a body corporate, and as such, and in the name Muscle Shoals Corporation, have power—

First, to adopt and use a corporate seal;

Second, to have succession for a period of 50 years from its organization, unless it is sooner dissolved by an act of Congress, or unless its franchise becomes forfeited by some violation of law;

Third, to make contracts, and no such contract shall extend beyond the period of the life of the corporation;

Fourth, to sue and be sued, complain, and defend in any court of law or equity;

Fifth, to appoint by its board of directors such officers and employees as are not otherwise provided for in this act; to define their duties, to fix their salaries, in its discretion to require bonds of any of them, and to fix the penalty thereof, and to dismiss at pleasure any of such officers or employees;

Sixth, to prescribe by its board of directors by-laws not inconsistent with law regulating the manner in which its general business may be conducted and the privileges granted to it by law may be exercised and enjoyed;

Seventh, to exercise by its board of directors or duly authorized officers or agents all powers specifically granted by the provisions of this act and such incidental powers as shall be necessary to carry on the business for which it is incorporated within the limitations prescribed by this act, but such corporation shall transact no business except such as is incidental and necessary preliminary to its organization until it has been authorized by the Secretary of War to commence business under the provisions of this act.

The corporation shall be conducted under the supervision and control of a board of directors, consisting of five members, to be selected by the President. The directors so appointed shall hold office at the pleasure of the President. The Secretary of War shall be ex officio chairman of the board, and shall have power to designate one of the directors as vice chairman. The vice chairman shall perform the duties of chairman in the absence of the Secretary of War. Not more than two of such directors shall be appointed from officers in the War Department.

The board of directors shall perform the duties usually appertaining to the office of directors of private corporations, and such other duties as are prescribed by law.

POWERS OF THE CORPORATION

The corporation shall have power—

(a) To purchase, acquire, operate, and develop in the manner prescribed by this act and subject to the limitations and restrictions thereof the following properties owned by the United States:

1. United States Nitrate Fixation Plants, Nos. 1 and 2, located, respectively, at Sheffield, Ala., and Muscle Shoals, Ala., together with (a) all real estate used in connection therewith; (b) all tools, machinery, equipment, accessories, and materials thereunto belonging; (c) all laboratories and plants used as auxiliaries thereto, the Waco limestone quarry in Alabama, Dam No. 2 at Muscle Shoals, and the hydroelectric power plant connected therewith, together with the steam plants used as auxiliaries of the United States fixed nitrogen plants Nos. 1 and 2, together with all other property described in section 1 of this act.

2. To construct, purchase, maintain, and operate all such buildings, plants, and machinery as may be necessary for the production, manufacture, sale, and distribution of fixed nitrogen and other forms of commercial fertilizer.

3. Any other plants or parts of plant, equipment, accessories, or other properties belonging to the United States, which are under the direct control of the President or of the War Department, and which the President or the Secretary of War may deem it advisable to transfer, convey, or deliver to said corporation for use in connection with any of the purposes of this act, or for any purpose incidental thereto.

(b) To acquire, establish, maintain, and operate such other laboratories and experimental plants as may be deemed necessary or advisable to assist it in furnishing to the United States Government and others, at all times, nitrogen products for military or other purposes in the most economical manner and of the highest standard of efficiency.

(c) To sell to the United States such nitrogen products as may be manufactured by said corporation for military or other purposes.

(d) To sell any or all of its products not required by the United States to producers or users of fertilizers or to others: *Provided*, That in the sale of such products not required by the United States Government preference shall be given to those persons engaged in agriculture: *Provided further*, That if such products are sold to others than users of fertilizers the corporation shall require as a condition of such sale the consent of the purchaser to the regulation by the corporation of the prices to be charged users for the products so purchased or any product of which the products purchased from the corporation shall form an ingredient.

(e) The operation of the hydroelectric power plant and steam power plants at Muscle Shoals, and the use and sale of the electric power to be developed therefrom that is not required to carry out the terms imposed by sections 1, 2, 3, and 4 of this act.

(f) To enter into such agreements and reciprocal relations with others as may be deemed necessary or desirable to facilitate the production and sale of nitrogen products on the most scientific and economic basis.

(g) To purchase, lease, or otherwise acquire United States or foreign patents and processes or the right to use such patents or processes.

(h) To obtain from the United States or from foreign governments patents for discoveries or inventions of its officers or employees as a condition of their employment to enter into agreements with the company that the patents for all such discoveries or inventions shall be and become in whole or in part the property of the corporation.

(i) To assume any or all obligations of the United States entered into in connection with the construction, maintenance, and operation of the plants to be transferred to the corporation under the provisions of this act.

(j) To deposit its funds in any Federal reserve bank, or with any member bank of the Federal reserve system.

(k) To sell and export any of its surplus products not purchased by the United States or by persons, firms, or corporations within the United States.

(l) To invest any surplus of available funds not immediately used for the operation, construction, or maintenance of its plants or properties in United States bonds or other securities issued by the United States.

(m) To lease or purchase such buildings or properties as may be deemed necessary or advisable for the administration of the affairs of the corporation or for carrying out the purposes of this act; and

with the approval of the Secretary of War to lease to other persons, firms, or corporations, or to enter into agreements with others for the operation of such properties not used or needed for the purposes named herein. In the operation, maintenance, and development of the plants purchased or acquired under this act the corporation shall be free from the limitations or restrictions imposed by the act of June 3, 1916, and shall be subject only to the limitations and restrictions of this act.

CAPITAL STOCK AND BONDS

The capital stock of the corporation shall consist of 100 shares of common stock of no par value. The corporation shall also issue an amount of 20-year bonds bearing interest at the rate of 5 per cent per annum which shall be a first lien on the property of the corporation and in an amount not to exceed \$50,000,000, to be sold from time to time as needed to carry out the purpose of this act: *Provided*, That the principal and interest of said bonds shall be paid by the Secretary of the Treasury out of funds in the Treasury not otherwise appropriated upon default at any time in payment as herein provided by the corporation. The terms for the sale of said bonds shall be approved by the Secretary of War. If at the end of any fiscal year after the fourth year the corporation shall not have earned net sums sufficient to meet the interest on said bonds as evidenced by audits of the accounts of said corporation by the Secretary of War, the corporation shall forthwith cease operations and shall not resume until authorized so to do by the Congress.

In exchange for the properties purchased or acquired from the United States and from time to time transferred, conveyed, or delivered to the corporation by the President or the Secretary of War, and for all unexpended balances now under the control of the Secretary of War and applicable to the nitrate plants at or near Muscle Shoals, Ala., the corporation shall cause to be executed and delivered to the President a certificate for all of the common stock of the corporation. The certificate shall be evidence of the ownership by the United States of all stocks of the corporation.

In consideration of the issuance of such common stock to the President, the President and the Secretary of War are authorized and empowered to transfer, convey, and deliver to the corporation all of the real estate, buildings, tools, equipment, supplies, and other properties belonging to, used by, or appertaining to the plants and properties to be acquired by the corporation under the terms of this act, and to transfer, convey, and deliver as and when they may deem it advisable any other equipment, accessories, plants, or parts of plants, or other property referred to in this act, and which the corporation is authorized to acquire or purchase from the United States under its provisions.

DISTRIBUTION OF EARNINGS

All net earnings of the corporation not required for its organization, operation, and development shall be used—

- (a) To pay interest on the bonds and create a fund for their payment;
- (b) To develop and improve its plants and equipment;
- (c) To create a reserve or surplus fund until such fund amounts to \$2,500,000;
- (d) The remainder to be paid as dividends on the stock into the Treasury of the United States as miscellaneous receipts.

MISCELLANEOUS

The Federal reserve banks shall be authorized to receive deposits of the corporation. The corporation shall not have power to mortgage or pledge its assets, or to issue bonds secured by any of its properties, except as hereinbefore provided.

The United States shall not be liable for any debts, obligations, or other liabilities of the corporation.

The corporation and all of its assets shall be deemed and held to be instrumentalities of the United States and as such they and the income derived therefrom shall be exempt from Federal, State, and local taxation. The directors, officers, attorneys, experts, assistants, clerks, agents, and other employees of the corporation shall not be officers or employees of the United States within the meaning of any statutes of the United States, and the property and moneys belonging to said corporation, acquired from the United States or from others, shall not be deemed to be the property and moneys of the United States within the meaning of any statutes of the United States.

The accounts of the corporation shall be audited under the regulations to be prescribed by the Secretary of War, who shall include in his annual report to Congress a detailed statement of the fiscal operations of said corporation.

SEC. 8. That the Secretary of War is hereby authorized and directed to complete the construction of Dam No. 3 in the Tennessee River at or near Muscle Shoals, Ala., in accordance with report submitted in House Document 1262, Sixty-fourth Congress, first session: *Provided*, That the Secretary of War may in his discretion make such modifications in the plans presented in such report as he may deem advisable in the interest of power or navigation.

SEC. 9. That upon the completion of Dam No. 3 by the United States, the dam, power plants, machinery, and appurtenances thereto

shall be leased or operated in conjunction with Dam No. 2 as provided for in this act on such terms as Congress shall hereafter provide.

SEC. 10. The surplus power not required under the terms of this act for the manufacture of nitrogen or fertilizer when sold or used shall be subject to the laws, rules, and regulations relating to the sale and use of electric power in the several States in which said power is used.

SEC. 11. If any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

The right to amend, alter, or repeal this act is hereby expressly reserved.

MR. UNDERWOOD. Mr. President, as there are several changes in this amendment from the way it was originally printed, I ask that the amendment by way of substitute may be printed at once, so that Senators may have copies of it.

THE PRESIDING OFFICER. Without objection, it will be so ordered.

MR. HARRIS. Mr. President, I offer certain amendments to the amendment by way of substitute offered by the Senator from Alabama and ask that they be printed and pending.

THE PRESIDING OFFICER. The amendments will be printed and considered as pending. The question is on the amendment offered by the Senator from Maryland [Mr. BRUCE].

MR. NORRIS. Mr. President, at this time I desire to give notice that at the proper time I shall offer an amendment to the amendment offered by the Senator from Alabama [Mr. UNDERWOOD], if it prevails. In other words, if the Senator's amendment is agreed to in the Committee of the Whole when the bill gets into the Senate I shall offer an amendment to it by way of substitute, which I now want to give notice of; and in order that Senators may familiarize themselves with it I desire to have it printed.

Let me say just a word in reference to it.

The objections that have been made so far in the debate in the Senate to the committee bill have been, first, that it divided the responsibility; it put the water-power proposition under a governmental corporation and turned over the nitrate plants for the manufacture of fertilizer to the Secretary of Agriculture. Some objection to that has been made on the floor, and outside of that a great many Members have expressed the idea that they thought the responsibility ought not to be divided. Another objection that has appeared in the debate has been that there was a limitation on the manufacture of fertilizer and that it was made secondary to water power.

I do not agree with that; but, of course, I may be wrong and the Senators who believe that may be right. In order to meet that proposition, therefore, I desire to offer a modified form of the Senate bill, modified by provisions of the bill that I originally introduced. It will be remembered that the bill originally referred to the committee, introduced by me, did not limit the amount of power that could be used for experimental purposes and did not divide the responsibility, but had it all under one head.

In order that Senators may have notice, I want to say that if the committee bill is voted down and the Underwood bill is substituted in its place, I shall then offer this, when the bill reaches the Senate, as a substitute for the so-called Underwood bill.

I ask, therefore, first, that the amendment which I offer may be printed in the Record, and next, that it may be printed in bill form and lie on the table.

THE PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Amendment intended to be proposed by Mr. Norris to the Underwood amendment to the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Alabama, with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

Strike out all after the enacting clause and insert the following:

"That the Secretary of War is hereby authorized and directed to complete the construction of Dams Nos. 2 and 3 in the Tennessee

River, at Muscle Shoals, Ala., in accordance with report submitted in House Document 1262, Sixty-fourth Congress, first session: *Provided*, That the Secretary of War may in his discretion make such modifications in the plans presented in such report as he may deem advisable in the interest of power or navigation: *Provided further*, That funds for the prosecution of this work may be allotted from appropriations heretofore or hereafter made by Congress for the improvement, preservation, and maintenance of rivers and harbors; and in order to provide for a larger amount of primary power to be developed on the Tennessee River if a suitable site or sites can be found upon investigation, where practical storage reservoirs can be obtained at reasonable cost, the Secretary of War is directed to take the necessary steps to secure such sites and to build the necessary dams for the impounding of water therein. If the Secretary of War, under authority of this act, constructs one or more dams for the purpose of impounding the waters of said river, he shall give due consideration in the construction of such dams to the development of hydroelectric power, to the necessities of navigation, and flood control.

"Sec. 2. That in the construction of said Dam No. 3, or in the construction of other dams or other works provided for in this act, the Secretary of War is hereby authorized to use and to remove any of the temporary buildings now owned by the Government of the United States and erected anywhere in the vicinity of Muscle Shoals or nitrate plants Nos. 1 or 2, providing the removal of such buildings will not interfere with the operations of the Federal Chemical Corporation as hereinafter set forth.

"Sec. 3. That if the Secretary of War should find it advisable and practical to construct storage reservoirs on the Tennessee River or any of its tributaries as hereinbefore provided, and that by virtue thereof the flow of the Tennessee River is equalized and a larger amount of primary power thereby developed, he shall require of any private person, partnership, or corporation maintaining a dam on said river for the development of power, to contribute his or its proportionate share for the construction of said reservoirs, and he is hereby authorized to take the necessary action or actions in court for the purpose of compelling contribution to such development by any person, partnership, or corporation receiving the benefits therefrom; and if the right to dam said river for the purpose of developing hydroelectric power is hereafter given by virtue of any law of the United States, to any person, partnership, or corporation, one of the requirements of said grant shall be that the person, partnership, or corporation given the privilege to build any such dam, shall pay his or its proportionate share of the expenses of the construction of any such reservoir or reservoirs, either then constructed or thereafter constructed by virtue of this act.

"Sec. 4. That there is hereby incorporated and created a corporation by the name, style, and title of 'The Federal Chemical Corporation' (hereafter referred to as the corporation). Said corporation shall have perpetual succession and shall have power—

- "(1) To adopt, use, and alter a corporate seal;
- "(2) To sue and be sued and to complain and to defend in any court of law and equity within the United States;
- "(3) To make and enforce such contracts as may be necessary to carry out the provisions of this act;
- "(4) To appoint and fix the compensation of such employees, attorneys, and agents as are necessary for the transaction of the business of the corporation, to define their duties, require bonds of them, and fix the penalties thereof; but in no case shall any such employee receive a salary in excess of \$12,000 per annum;
- "(5) To prescribe, amend, and repeal by-laws not inconsistent with this act for the conduct of its business;
- "(6) In the name of the United States Government, to exercise the right of eminent domain, and in the purchase of any real estate or in the acquisition of real estate by condemnation proceedings the title to such real estate shall be taken in the name of the United States Government; and

"(7) To exercise all the rights, powers, and privileges conferred upon it by this act and such additional powers as may be necessary to carry out the provisions of this act.

"Sec. 5. That the business of said corporation shall be transacted by a board of directors (hereinafter called the board), consisting of three persons, to be appointed by the President of the United States, by and with the advice and consent of the Senate. Members of said board shall hold their offices during good behavior and shall receive a salary of \$10,000 per year, payable monthly: *Provided*, That any member of said board may be removed from office at any time by a concurrent resolution of the House of Representatives and the Senate. No member of said board shall during his continuance in office be engaged in any other business, but shall give his entire time to the business of said corporation. Said board shall select one of its members as president. It shall select a treasurer and as many assistant treasurers as it deems proper, and such treasurer and assistant treasurers may be corporations or banking institutions and shall give such security for the safe-keeping of the moneys of said corporations as the board may require.

"Sec. 6. In the appointment of officials and the selection of employees for said corporation and in the promotion of any such employees or officials no political test or qualifications shall be permitted or given consideration, but all such appointments and promotions shall be given and made on the basis of merit and efficiency. The board shall keep a record of all requests, oral and written, made to any member thereof, coming from any source, asking for any favor in behalf of any person or the promotion of any employee, which record shall be open to the public inspection. Any member of said board who permits the use of political or partisan influence in the selection of any employee, or in the promotion of any such employee of said corporation, or who gives any consideration to political consideration in the official action of said board, or who, knowing that such political influence has been or is attempted, does not record the same in said record shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in a sum not exceeding \$1,000 or be imprisoned not to exceed six months, or both such fine and imprisonment, and the conviction of any member of said board of the offense herein defined shall have the effect of removing such member from office.

"Sec. 7. That upon the completion of the organization of said corporation, the President and the Secretary of War shall turn over to said corporation United States nitrate plants Nos. 1 and 2, erected at Muscle Shoals, Ala., together with all real estate used in connection therewith; all machinery, tools, equipment, accessories, and materials thereunto belonging; all laboratories and plants used as auxiliaries thereto; the Waco Quarry in Franklin County, Ala.; the railroad, together with the engines, cars, tools, materials, machine shops, and all accessories used in the operation of said railroad at or near Muscle Shoals, Ala.; and all other power units and transmission lines of the United States used as auxiliaries of the United States nitrate plants Nos. 1 and 2: *Provided, however*, That the transfer of any of the property above described to said corporation shall be subject to such use of said property by the Secretary of War as he may elect; in the construction and development of the dams hereinbefore provided for.

"As soon as any of the dams herein provided to be constructed by the Secretary of War have been completed the President and the Secretary of War shall turn the same over to said corporation, together with all buildings and real estate owned by the United States used in connection therewith, and thereafter said property shall be in the control and under the management of said corporation. Said corporation shall also have the power and authority to acquire, establish, maintain, and operate such other laboratories and experimental plants as may be deemed necessary or advisable by said corporation to carry out the provisions of this act. It shall have power to establish agencies anywhere in the United States for the sale of its products, and in order to prevent a monopoly of the fertilizer business or the undue and unreasonable advance in the price of fertilizer it shall have power to manufacture a completed fertilizer ready for use, and, if necessary, to sell the same direct to farmers or to organizations of farmers, and in the sale of chemical parts of fertilizer to manufacturers thereof it shall have power to prescribe the price at which such manufacturer so purchasing any of the corporation's products shall sell the fertilizer to the farmer. It is hereby declared that one of the objects of this act is to regulate the sale of fertilizer to persons engaged in agriculture with a view to preventing the control of the price of such fertilizer by a monopoly or the sale thereof at unreasonable prices.

"It shall be the duty of said board, through the operation of its laboratories and experimental plants, to devise and install improvements in nitrate plants Nos. 1 and 2 as such experiments and developments may, in the judgment of the said board, be deemed advisable.

"Sec. 8. That in case all the power developed at Dams Nos. 2 and 3, or any other dam or dams constructed by the Secretary of War under the provisions of this act and turned over to said corporation, can not be used to practical advantage and is not necessary for the manufacture of fertilizer or explosives as herein provided, the board may, in its discretion, sell any such surplus power so developed to any State, municipality, district, corporation, partnership, or person, upon such terms and under such conditions as the board may deem just; and in making such sale the board shall give preference to States, counties, municipalities, and districts, and if the sale of such surplus power is made to private individuals, corporations, or partnerships for distribution or resale, the board may, as one of the conditions of such sale, provide in the contract therefor for the regulation of the price at which any such individual, partnership, or corporation shall charge the consumer in a resale of such power.

"In order to convert secondary power into primary power and thereby cheapen the hydroelectric power produced and increase the number of people to be benefited by such use, as well as to cheapen the price thereof to the consumer, the corporation is hereby authorized to enter into agreements with the owners of existing transmission lines, or with the owners of transmission lines hereafter constructed, to bring about the exchange of power whenever the same can be advantageously done. The corporation is authorized to construct transmission lines for the purpose of giving wider distribution to the use of the hydroelectricity

developed at any of said dams and to enter into contracts with persons, partnerships, corporations, municipalities, districts, or States for the joint construction and joint use of such transmission lines, having always in view that one of the objects of this act is to give as wide a distribution as possible at the smallest practicable cost the use of the electric current developed at any of the dams herein provided for.

"SEC. 9. The corporation is hereby authorized to complete the steam auxiliary plant at nitrate plant No. 2 in accordance with the original plan.

"It shall also have power to purchase or lease transmission lines owned by other parties or to purchase or lease an interest in the same for joint use.

"SEC. 10. There shall be turned over to said corporation by the Secretary of the Treasury the sum of \$3,472,487.25, received by the United States for the sale to the Alabama Power Co. of the Gorgas steam plant at Gorgas, Ala., and said sum is hereby appropriated out of any money in the Treasury not otherwise appropriated. The Secretary of War is directed to sell all surplus materials at Muscle Shoals not needed by said corporation in carrying out the provisions of this act and turn the proceeds thereof over to said corporation, which sums shall be considered the operating capital of the corporation. The corporation shall continue to increase said capital from its net earnings until the sum amounts to \$25,000,000; and thereafter all the income from said corporation not necessary for depreciation, management, and other legitimate expenses of said corporation shall be turned over to the Treasury of the United States.

"SEC. 11. The corporation shall supply to the Government of the United States free of charge a sufficient amount of power necessary to operate all the locks that are established in any of the dams herein provided for, for navigation purposes.

"SEC. 12. In time of war or at any other time when in the opinion of the President of the United States war is imminent the President may take full possession of all of the property herein described and use the same for the manufacture of explosives to be used by the Army and Navy; or in such case the President may, if he so elects, direct the board to cease either in part or wholly the manufacture of fertilizer and to utilize said property to such extent as he may direct in the operation of explosives. Until such war is ended, or in the opinion of the President the danger thereof has passed, the said board shall operate said property in accordance with the direction and under the instruction of the President of the United States.

"SEC. 13. That the board shall make a full, complete, and detailed report of its operation as soon after the close of each calendar year as possible to the Congress of the United States. In addition to the report so made the Secretary of War shall, at least once each year, make a complete audit of all the accounts and all the financial operations of said corporation, and shall include in his annual report to Congress a detailed statement thereof.

"The principal place of business of said corporation shall be established by the board at or near Muscle Shoals, Ala.

"SEC. 14. All laws relating to embezzlement, conversion, improper handling, redemption, use, or disposal of moneys of the United States shall apply to moneys of the corporation while in the custody of any officer, employee, or agent of the United States or of the corporation.

"SEC. 15. It is hereby declared to be the spirit and intention of Congress in passing this act—

"(a) Primarily to provide for the national defense by maintaining ready for immediate use for war purposes nitrate plant No. 2.

"(b) To promote agriculture by developing cheap fertilizers and other things of benefit to agriculture to the highest degree.

"(c) To assist in the development of electric power by the complete storage and utilization of the waters of our rivers and their tributary streams in conjunction with steam and other sources of fuel to the end that electrical energy may be carried to all citizens.

"(d) These objects shall be carried out as nearly as possible without interference with private enterprise."

Mr. COPELAND. Mr. President, I feel for myself that the discussion of this project has been illuminating. I confess I have been very bitterly disappointed to find that the Muscle Shoals project does not contain within itself the possibility of materially decreasing the cost of fertilizer; neither does it materially increase the quantity which the farmers can buy.

My disappointment is founded on a section of the address made by the Senator from Nebraska [Mr. Norris]. I find on page 116 of the Record that the Senator says:

The cost of the nitrogen in a ton of ordinary fertilizer of that grade is \$4.80. If the cost of nitrogen were reduced one-half, it would therefore only reduce the completed fertilizer \$2.40 per ton. And if the nitrogen cost absolutely nothing, the completed fertilizer would still be higher than it ought to be and much higher than I believe it will be within the next few years.

He goes on to say that the amount of fixed nitrogen used in the fertilizer is only 20 per cent of the completed article.

Therefore, for myself, as I have said, I have been very much disappointed.

As I see it now, the proper course to be pursued with the Muscle Shoals project is to utilize the plants in such a way, first, as to make use to the best possible advantage of the power which can be developed there; secondly, that the experiments of the Department of Agriculture may continue.

I have been much impressed by the statements made by the various experts. Doctor Cottrell and his associates have done much to push out the borders of knowledge and to make known to the scientific world how the cost of making fertilizer can be decreased, how the quality of the fertilizer can be improved, and how the quantity produced in this country may be materially increased.

So, from the standpoint of the country at large, the interest we have in the Muscle Shoals project is that we must make certain that the experimentation of the Department of Agriculture shall be continued and that we may continue to furnish to private concerns knowledge which will enable them to do as the operatives have done at the Syracuse plant, where, by the investment of private capital and the utilization of information gained by the experimentation at Muscle Shoals, it has been found possible to operate a plant at a profit and to turn out a reasonable amount of fertilizer.

Mr. HEFLIN. Mr. President—

The PRESIDING OFFICER (Mr. WILLIS in the chair). Does the gentleman from New York yield to the Senator from Alabama?

Mr. COPELAND. I yield.

Mr. HEFLIN. In the hearings before the Committee on Agriculture and Forestry Mr. Waldo, a very warm friend of the Ford offer, one of the best engineers in the country, said:

We do not claim that he [Mr. Ford] guarantees to cut the price of fertilizer in half. We say it is a reasonable expectation.

The CHAIRMAN. It is a reasonable expectation, no matter who gets it. I think it is fair to assume that we are going to cut the price of fertilizer in two in some way.

So we contend that we will be able to manufacture fertilizer at Muscle Shoals at half of the price at which it is selling to-day.

Mr. COPELAND. Mr. President, I trust that the vision of my friend the Senator from Alabama will be realized; but if I can read percentages at all, founded on what the Senator from Nebraska has said, the ordinary formula for fertilizer is expressed in the numerals 2-8-2—two parts of fixed nitrogen, eight parts of phosphorus, and two parts of potash—and that the total amount of fixed nitrogen in any given quantity of fertilizer is only 20 per cent of the whole. Therefore it must follow, as was said by the Senator from Nebraska, whose statement I quoted, that if you should add the nitrogen at no cost whatever, you would still reduce the cost of fertilizer to the ultimate consumer a matter of only two or three dollars a ton.

Mr. SMITH. Mr. President—

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from South Carolina?

Mr. COPELAND. I yield.

Mr. SMITH. I think both the Senator from Nebraska and the Senator from New York have gotten their percentages, in their relation each to the other, a bit confused. The unit of nitrogen used is the most costly of all the ingredients in fertilizer. The sources of potash, if the Senator will allow me, are such that when brought from Germany to this country in the form of what we term "kainite," which is the lowest form of the salts bearing potash, they are brought over here in ballast. It is not a plant food in the proper sense. It is only indicated in certain forms of plant development.

Phosphoric acid is perhaps now the very cheapest form of fertilizer. A fertilizer containing 16 per cent acid sells at about one-fourth the selling price of a fertilizer containing 12 per cent nitrogen. If you had the 8-2-2 formula, as is indicated here, and if you got your nitrogenous content free, you would have to multiply your two parts by four times the amount by which you would multiply either the eight or the other two, as to the potash or the phosphoric acid content; so that everything that cheapens the nitrogen necessarily cheapens the fertilizer.

I just wanted to call the Senator's attention to that fact, for the reason that it is the most expensive element, the hardest to get, and yet the one that is indicated in all plant development as important beyond all others.

Mr. COPELAND. Mr. President, I concede all that the Senator from South Carolina says; but, even so, the expensive elements, so far as the primary cost is concerned, are elements

which make up only an infinitesimal part of the ultimate ton, because the ultimate ton of fertilizer contains a lot of filler, a substance which is shipped at high expense.

Mr. SMITH. I speak as a practical user of these forms of fertilizer, a greater amount of fertilizer being used in my State, I believe, than in any other State in the Union. All farmers do not use what is called the balanced fertilizer, the 8-2-2. The farmer who fertilizes his corn and his grain does not use any phosphorus or potash at all, as is indicated in grain production, but he does use an enormous amount of nitrate of soda from Chile, and that nitrate of soda from Chile has a 15 per cent nitrogen content, and it is now about \$50 a ton, including the chlorine, which is the other constituent of sodium.

According to Doctor Whitney, whose report I have, if you can produce the nitrogen at Muscle Shoals at 6 cents a pound as against 11 cents a pound, you practically cut in half the nitrogen available in the form of ammonium nitrate. You can get it in the form of concentrates at about one-half the cost at which you can get Chilean nitrates, according to the statements of the witnesses.

Mr. COPELAND. Mr. President, the remarks of my colleague go to prove the contention I have made—that we need more study of this great problem. I am interested in a practical way, I may say to the Senator, in the price of fertilizer. I had occasion last spring to order some for my own farm, and paid \$65 a ton for it. If it can be arranged so that I can get fertilizer for \$25 or \$35 a ton I will be personally gratified, as well as glad that all the farmers of America are to be benefited.

The point I want to bring out for my colleagues, however, is this: It is very apparent that we have much yet to learn about the making of fertilizer. There is much investigation which must be carried out, much experimentation which must be carried on, and so, as far as I am concerned, I am very solicitous that this great plant at Muscle Shoals may be used in such a way as to widen and push out the borders of knowledge, so that we may know from year to year how to improve the making of fertilizer and how to cheapen it.

There are one or two things in the amendment offered by the Senator from Nebraska which do not meet my approval certainly. My view is a matter of small consequence, but I feel it my duty to express it.

I think the provision made in his bill to authorize the Secretary of Agriculture to lease the nitrate plants, or to turn over to private persons or corporations the operation of these plants, is an unwise provision, because if the operation of these plants were turned over to a private individual or a private corporation, any research done by that private individual or private corporation would redound to the benefit of the private individual or private corporation.

We want the farmers of the country to be benefited by any research undertaken at Muscle Shoals in the improvement of the making and cheapening of fertilizer. Therefore, I oppose any plan which may give this benefit to private parties. In a moment I intend to present an amendment to strike from the bill the provision giving the Secretary of Agriculture the right to lease these plants. If adopted, this will give us time, too, to decide what shall be the ultimate disposition of the Muscle Shoals property. At this moment we are far from agreed as to what should be done.

I have been much impressed, as I said before, in reading the testimony, with the fact that practically every expert who has come before the committee has commended the work of our experts in the study of the fertilizer problem. That work of investigation must go on.

I suppose somebody will say that we are proposing to produce at Muscle Shoals simply a glorified laboratory. That is all right. I am willing to have it called that, because it is a laboratory where one of our greatest national problems will be worked out. I trust that the power at Muscle Shoals and the investment made there by the Government may be used for the benefit of all the people.

I have been much impressed with the argument set forth by my colleague from New York [Mr. WADSWORTH], and emphasized by the Senator from Alabama [Mr. UNDERWOOD], that there should be unified control, and I can see that the Senator from Nebraska sees the importance of that, too. But I am opposed to any sort of unified control which would take this property and this great power plant away from the Government and turn it over to private interests, either under lease or under purchase. In my judgment, this property should be used, as was originally intended, for the development of knowledge of fixation of nitrogen, the making of fertilizer, and then, if perchance unfortunately there should be

war, we will have a plant where can be developed the nitrogen necessary to make our explosives.

So for myself I want to say that I am in favor of the spirit of the bill presented by the Senator from Nebraska, and I am opposed to the first section of the bill presented by the Senator from Alabama, proposing to lease the property. I should be sorry if we did find somebody who was covetous enough of that great power on the Tennessee River to make use of it for private gain.

We set out upon a project which is worthy of the support and indorsement of the Senate. We set out upon a project to harness the power of the Tennessee River, and to utilize it for the benefit of the people in time of peace and for the benefit of the Nation in time of war. I do not think we should deviate from that course.

To that end, Mr. President, I offer two amendments to the amendment in the nature of a substitute offered by the Senator from Nebraska, and ask that they be printed, and in due time be given the consideration of the Senate.

The PRESIDING OFFICER. Without objection the amendments will be printed. The question now is on the amendment offered by the Senator from Maryland [Mr. BRUCE].

Mr. SMITH. Mr. President, I had intended to-day to introduce an amendment—not a bill as some of my colleagues had supposed—along the very lines that have been indicated by the Senator from New York [Mr. COPELAND]. In 1916, just before we entered the World War, on account of the necessity for great quantities of nitrogen for explosives, the price of nitrate of soda rose to \$90 and \$100 and more per ton. This entailed such an expense on the part of those who were compelled to use fertilizer in order to get a return for their efforts on the farm that I began to investigate to see whether or not there might not be some means by which the farmers of the country could be furnished this very essential ingredient at prices commensurate with the prices they receive for the things they produce.

It had been brought to the attention of Congress and of the public that there was at Niagara a plant which was in practical operation producing fixed nitrogen from the air.

I then prepared and introduced a bill which became and is to-day the act upon which the project at Muscle Shoals rests. The original terms of the bill as drawn by me and subsequently enacted into law provided that the Government should proceed to select a water-power site or sites where the fixation of nitrogen from the air might be carried on for the purpose of furnishing the country nitrate for munitions during time of war and nitrates for fertilizer during time of peace. Subsequently there was a greater amount appropriated than was provided in my original bill, which was \$20,000,000. That was added to until the expenditures at the site selected by the Government now approximate \$125,000,000.

Now, the object to which we are trying to devote this property during times of peace—I shall not discuss the war feature—is the development of and making practical the securing of nitrates and to combine them with the other elements necessary in a balanced fertilizer to meet the requirements of agriculture.

Mr. McLEAN. Mr. President—

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Connecticut?

Mr. SMITH. I yield.

Mr. McLEAN. I know that the Senator from South Carolina is probably as well informed upon this subject as any Member of the Senate, and I trust that in the course of his remarks he will enlighten the Senate as to why a standard ton of fertilizer should cost the consumer anywhere from \$50 to \$65 at the present time.

Mr. SMITH. I want to show, not in theory but in actual results, the investigations of the Government as to what might be done right at Muscle Shoals now. It is not theory. I have here before me samples handed to me by Doctor Whitney, of the Bureau of Soils. In answer to the question propounded by the Senator from Connecticut I will say that anyone who has taken the trouble to read the hearings, any practical purchaser of what is known as balanced commercial fertilizer, will recognize that the element that is as costly, perhaps, when everything else is considered, as the chemical he is trying to buy is what is known as filler. Take the common formula of 8-2-2, which is cotton and tobacco fertilizer, the tobacco fertilizer generally running 8-3-3 rather than 8-2-2. That means that in 100 pounds we have 8 pounds of phosphoric acid, 3 pounds of nitrogen, and 3 pounds of potash. That is 14 pounds to the 100 pounds. Multiplying that by 10 gives 140 pounds to the thousand, and multiplying it by 20 gives 280 pounds to the 2,000 tons of ordinary mixed fertilizer. In

other words, we pay freight, we pay for the handling on the farm, and we pay for the loading and tonnage in the manufacturing plant on the weight and manipulation of 1,700 pounds of dead material that we would rather not have.

When we consider that we pay, from whatever source of origin to where we use it, on an 8-3-3 formula the freight on 1,700 pounds of what is just dirt or any kind of fine silt that will hold the fertilizer ingredients it is understandable at once that that constitutes one of the great elements of the cost.

Now, back of that is what? The fertilizer plant gets its phosphate rock principally from two of the Southern States, Tennessee and Florida. They haul that phosphate rock in the bulk. The rock generally does not exceed more than 15 or 16 per cent of phosphoric content. We can understand the enormous freight that is necessary to be paid to carry the raw material to the factory. The same is true when we attempt to get the potash that enters into the composition which we ultimately buy. The same is true of the nitrogen. These are elements of tremendous cost.

I have on my desk here samples of the very ingredients that we buy in a 2,000-pound bulk of 8-3-3 or 8-4-4 for the Connecticut tobacco farms. We ship over 1,500 pounds of filler, on which we have the expense for freight and handling, when we should have hauled only about 300 pounds of the real material. I have here before me, produced by the department of soils, samples of 8-4-4 that eliminate 75.91 per cent of the filler. In other words, when we buy 2,000 pounds of 8-4-4 in the form shown here we buy a ton of actual fertilizer ingredients and only pay freight on the thing that the plant actually consumes. The freight on a ton of fertilizer averages about \$3. We get out of that ton about 240 pounds of fertilizer, whereas when we get a ton of the product which I hold in my hand, the 8-4-4 product, we have as much real fertilizer as is contained in 6 tons of the filler and pay no more freight on a ton of the product—a sample of which I hold in my hand—than we do on a ton of the product which contains something over 1,700 pounds of filler. In other words, on 1 ton of the pure fertilizer, compared to 8 tons of filler, we would save something like \$24. Our saving on the ingredients alone, eliminating the filler in the payment of freight, would save practically half the cost of what we are paying per ton now for the mixture.

In addition to that I have a letter from Doctor Whitney, and I shall in a short time state the conditions at Muscle Shoals as he, the head of the Bureau of Soils, has stated them to me, so that we, in a popular way, without too much technicality or too many scientific phrases, may understand exactly the conditions that exist at Muscle Shoals.

The Senator from Connecticut asked me what about the cost of the nitrogen and why it should cost as much as it does. I have shown here how, everything else being equal, the elimination of the freight on the filler would materially reduce the cost per ton. But I go further than that. Doctor Whitney said, among other things:

You will see that, based on the prices quoted, the ammonia costs about 12 cents a pound in the present commercial product, and it is estimated to be produced at around 6 cents a pound at Muscle Shoals.

I want to go through the process of production at Muscle Shoals as given me by Doctor Whitney, who, in the laboratory, has produced the ingredients that I have before me. In the first place, we have had a good deal of talk here about what is the capacity of Muscle Shoals now. According to his testimony and the testimony of those who have manipulated that plant, plant No. 2 will produce 40,000 tons now of fixed nitrogen, but it will produce it in the form of cyanamide. Cyanamide is nitrogen with lime. We can not mix it with phosphoric acid and potash. I said a moment ago that it would be 40,000 tons of fixed nitrogen but that means 200,000 tons of cyanamide. The relation of the nitrogen to the lime is as 1 to 5, so that the 40,000 tons of fixed nitrogen is contained in 200,000 tons of cyanamide. That cyanamide can not even be mixed in the great commercial fertilizer-mixing plant until it in turn is treated. They take the cyanamide with the nitrogen content and put it in a furnace or treat it with steam and produce ammonia. The ammonia gas brought in the presence of phosphoric acid produces ammonia phosphate.

Doctor Whitney and his associates developed a process which is now revolutionizing the methods by which phosphoric acid is obtained. It will be interesting to the Members of the Senate to be informed that the phosphate beds of South Carolina were abandoned and that they were superseded by the phosphate beds of Florida and Tennessee, because the iron and lime that were present in the South Carolina rock made it impracti-

cable to treat the rock with sulphuric acid and extract the phosphoric acid, because the lime and iron in the rock absorbed the sulphuric acid and did not liberate the phosphate desired. The Bureau of Soils, however, developed a process by which they could take the lowest grade phosphate rock, containing the highest percentage of lime and iron, or of any other extraneous material that affected the sulphuric acid, and by means of a furnace, heated by a fuel, not electrically heated, they could recover at a low cost all of the phosphate which was contained in the lowest grade of our phosphate rock. I asked Doctor Davis this morning this question: "The production of nitrogen at Muscle Shoals is a fact?" "Yes." "Well, are there means at Muscle Shoals of getting phosphoric acid?"

Mr. McLEAN. Mr. President, if the Senator from South Carolina does not object to another interruption, I desire to ask him a question.

Mr. SMITH. I do not object.

Mr. McLEAN. I should like to call the Senator back to my question. Take a ton of standard fertilizer, which farmers buy at the present time. I presume there are but few farmers who mix their own fertilizer and that most of them must buy it of the dealers. The 2 per cent of nitrogen in fertilizer at the present time would cost how much?

Mr. SMITH. The cost of nitrogen in a unit of fertilizer could be ascertained, I think, directly.

Mr. McLEAN. About how much would it be?

Mr. SMOOT. The cost would be about \$4.80.

Mr. McLEAN. The Senator from Utah states that the cost would be about \$4.80.

Mr. SMITH. The Senator is referring to the cost per unit. It had better be reduced to a pound; and the cost would be about 11 or 12 cents a pound.

Mr. McLEAN. The cost would be around \$4 a ton.

Mr. NORRIS. Will the Senator permit an interruption there?

The PRESIDING OFFICER. Does the Senator from South Carolina yield; and if so, to whom?

Mr. SMITH. I have yielded to the Senator from Connecticut [Mr. McLEAN].

Mr. McLEAN. If any other Senator can answer my question, I shall be glad to have the answer.

Mr. SMITH. The cost of the nitrogen would be 11 cents a pound; or if the unit of a ton be taken, it would be about \$4.20.

Mr. McLEAN. How much would the phosphoric acid cost?

Mr. SMITH. Making merely a rough estimate, I should say that the phosphoric acid would cost about \$1.60.

Mr. McLEAN. A ton?

Mr. SMITH. Yes.

Mr. McLEAN. And that would be about \$6 for the nitrogen and phosphoric acid?

Mr. SMITH. Yes.

Mr. McLEAN. How much would the potash cost?

Mr. SMITH. The potash would cost about \$3.

Mr. McLEAN. That is \$9 for the essential ingredients in a ton of standard fertilizer, for which the farmer pays from \$50 to \$60; and the remainder of the contents of the ton is filler?

Mr. SMITH. Yes.

Mr. McLEAN. Does the Senator from South Carolina know of what that filling is composed?

Mr. SMITH. The filling is composed of silt or any kind of soil that will hold the ingredients together.

Mr. McLEAN. Can not filling be procured in large quantities near the places where this product is manufactured?

Mr. SMITH. Yes.

Mr. McLEAN. Does the Senator mean to say that the labor required to mix these fertilizers and the freight would cost from \$45 to \$50 a ton?

Mr. SMITH. I do not pretend to answer the Senator as to where that additional cost comes in. I was merely trying to show him that one of the additional items of cost was hauling 1,700 pounds of filler, because the scientific authorities have not found up to the time of conducting the present experiment any way of mixing those ingredients chemically in commercial quantities. So the manufacturers had to use the filler.

Mr. McLEAN. Then, a part of the cost is laboratory cost, the mixing cost?

Mr. SMITH. That is not laboratory work; it is mechanical. All that it is necessary to do is to calculate the chemical contents and weigh out so much nitrate of soda, so much potash, and so much phosphoric acid, and then mix them mechanically in the proportion of 8-2-2.

Mr. McLEAN. A reduction by scientific processes of the cost of mixing would tend greatly to reduce the price of fertilizer. If the fertilizing ingredient costs only eight or nine dollars a ton

there must be some way by which the price of standard fertilizers can be greatly reduced, reduced far more than we can expect from any results occurring from the development of Muscle Shoals. I am not saying that because I am opposed to using Muscle Shoals in certain ways; but the thing that is not clear to my mind is as to where the large cost of \$45 a ton comes in, and is it necessary as a permanent cost?

Mr. SMITH. The Senator, of course, is a business man and must recognize that a large percentage is placed on all fertilizer sales in order to absorb the losses for failures to pay for the fertilizer. Also there must be considered the wear and tear on the plant, because the acids rapidly deteriorate the machinery used. There are a dozen and one things that enter into the calculation; but to me, as it does to the Senator, the price seems out of all proportion to the real fertilizing ingredients in the compound.

The very thing that the Senator from Connecticut complains of, the enormous cost of the product which the farmer buys, has made it impossible for this country to develop, even within any reasonable limit, the possibilities of production per acre that our land is capable of if we had an abundance at a reasonable price of the ingredients for fertilizing the land.

What we desire above all else in embarking on this project is something more than the mere fixation of nitrogen. That has passed the empirical stage. We want to complete the process by which the nitrogen can be handled by the farmer direct from the plant, and we want to develop and complete the process by which in commercial quantities the mixed fertilizer, with or without the filler, can be produced. What we want down at Muscle Shoals is the production of a completed fertilizer in the form of nitrates which can be used if a farmer wants simple nitrates, or a balanced fertilizer in available form that he can use.

As I said a moment ago, the Agricultural Department has developed independently—and perhaps they were the pioneers; I believe they claim to be the pioneers—a new process of getting phosphoric acid from rock that otherwise is totally useless under the old process of extracting phosphoric acid. They have also discovered that by the same process by which they get phosphoric acid from the rock they can get potash in unlimited quantities from the low-grade potash ores that are found in this country. The actual samples which I have before me now show how they took the cyanamide, reduced the cyanamide to ammonia, took the ammonia, and in the presence of phosphoric acid, produced the salt of ammonium phosphate, and then by the same process secured potash which they had extracted by the same method. Thus they have gone far enough to produce a balanced fertilizer without a filler, which carries with it the very ingredients that the farmer needs, without the necessity of paying freight or handling charges on 200 pounds in weight in order to get 28 pounds of actual fertilizer ingredient.

Outside of obtaining the nitrogen, this process has not as yet been reduced at Muscle Shoals to a practical proposition. What they do know is they can get the nitrogen. They can get 40,000 tons of fixed nitrogen. They can, through a simple process, convert it into ammonia, and the ammonia into either nitrate of ammonia or phosphate of ammonia, or ammonium potassium, or mix the three ingredients.

The object here is to have the Senate decide whether or not the Government, committed to the interests of the people, is better prepared and qualified than are other agencies to do this work and to demonstrate its practicability for the use of the farmers of the country; whether it is our duty to hold this property until the new process of treating the phosphate rock and the new process of treating the potash rock and making a complete fertilizer available for agricultural purposes have been demonstrated on a commercial and practicable scale and are ready for use by the people; or whether right now, in the empirical stage, before any of these processes are standardized, we should lease it to private individuals, whose interest it is, of course, to make the greatest profit for themselves, regardless of what is the ultimate result for the benefit of agriculture.

I intend to propose, and have it on my desk, an amendment to either one of the two bills that are pending designed to provide that the Government shall not lease or otherwise dispose of the facilities at Muscle Shoals until such time as the processes which have produced these samples here have been standardized. I am not particularly enamored of the Government owning the plant and continuing this work, but I am unalterably opposed to the Government disposing of this opportunity to demonstrate what may be done in the interest of agriculture and furnishing the very thing

that the country needs beyond anything else, namely, this kind of fertilizer.

The question arose here to-day, and was discussed by both the Senator from Nebraska and the Senator from Alabama, as to the amount of power to be used under the bill of the Senator from Nebraska and the minimum amount to be produced under the Underwood bill.

Nitrate plant No. 1 is an experimental plant, and the scientists—Doctor Davis and Doctor Whitney—both tell me that they really have little doubt but that a new process may be developed which will be far cheaper than the present cyanamide process; in other words, that we may develop a modified Haber process by which one-fifth, or perhaps less, of the power now necessary to fix the nitrogen will be used.

Suppose that is true. Then as we reduce the amount of power needed we increase the possibilities of production at Muscle Shoals. Suppose we could produce 40,000 tons of fixed nitrogen with 10,000 horsepower where 100,000 is now required. Then we would produce, with the 100,000 horsepower, ten times as much nitrogen as could be produced with the old method. Therefore the amount of nitrogen being unlimited, so many million tons to every square mile of air, the amount of phosphate being unlimited, Tennessee, Florida, and the Carolinas being inexhaustible sources of phosphate rock, and the amount of potash being unlimited, if you perfect the principle by which you can extract and combine these three ingredients, there could then be produced at Muscle Shoals all the fertilizer that America now needs. This country uses 8,000,000 tons of the mixed ingredients annually, but 80 per cent of the mixture is a filler. Therefore about 2,000,000 or 1,500,000 tons of actual chemical is what the farmers of this country buy. That process would eliminate the six and a half million tons of filler and would give to the farmers the equivalent of 8,000,000 tons of pure chemicals.

What is our manifest duty in the premises? It is demonstrated that it can be done. The question now is, How cheaply can it be done? That question can be answered only as the process of experimentation goes on.

Up to within the last few years, as the Senator from Nebraska will bear me out, the only known process of obtaining acid phosphate was to wash and then treat the rock with sulphuric acid, and if there was lime, iron, or other mineral present in the rock it would absorb the sulphuric acid and give off no acid phosphate. Under a process discovered by the department here, however, they can heat the phosphate rock in a furnace, and by using common, ordinary sand, get silicic acid, the acid from the sand, they can produce a phosphoric acid equal to that produced by the sulphuric-acid process, without any loss on account of the presence of lime or any other content of the rock.

They reduced it to practice, and the chemist who collaborated with Doctor Whitney left the department and went into the employ of a fertilizer company, and they are now using that process commercially. Here is this plant already owned by the Government, built by the taxes of the people at a cost of \$125,000,000, under the terms of the bill of which I have the honor of being the author, the Muscle Shoals legislation. The intent of that bill is already being carried out. These are some of the advance results. Now, on the very eve of demonstrating that all that power can be used economically for the benefit of agriculture, why should we jeopardize the work that our department is doing by permitting it to go into the hands of private individuals until such time as the Government has demonstrated beyond a doubt the feasibility of giving these fertilizer ingredients to the farmer in commercial quantities? Then, if we see fit to lease the plant, we will have a basis upon which to calculate intelligently our lease. We will know what are the processes, what is the cost, and what benefit the farmers will derive from it.

I think it is the duty of the Senate to hold that property and all the power developed there, not with a view to the sale of the power, but with a view to the utilization of that power and the demonstration of the feasibility of this process that is destined to revolutionize artificial fertilization in this country. The use of this concentrated fertilizer, which is just as easily applicable to the land as the present form of fertilizer, is highly important. If one only wanted 20 pounds of these chemicals to the acre, one would use 20. At present, in order to get 20 pounds of the chemicals, one has to put on 400 pounds of filler compound. It is practical, and the object of this whole Muscle Shoals project is not merely to demonstrate that nitrogen can be fixed, but that a practical compound can be produced. We will experiment from time to time as to improving the process. It is very much like the manufac-

ture and development of the automobile—crude and imperfect at first, but the principle was there, manifesting itself and indicating its own improvement, until to-day it is a splendid vehicle that does work for organized society. Just so with fertilizer; this is the crude form, but the principle is expressing itself, and needs only additional work in the laboratory and by our experts to find its perfection in the process of manufacture. Indeed, the scientists who have talked to me have declared that the prospects are that by the processes already discovered and capable of use the cost per ton can be practically cut in two. I believe that was the testimony before our committee, even before the advanced stage at which it has arrived since then.

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER (Mr. LENROOT in the chair). Does the Senator from South Carolina yield to the Senator from Arkansas?

Mr. SMITH. I shall be glad to yield to the Senator.

Mr. CARAWAY. First, what is the reason now for commercial fertilizer to have the filler about which the Senator is speaking—the 1,760 pounds to accompany the 240 pounds of actual fertilizer?

Mr. SMITH. There are two difficulties. One is that these salts that I have shown are a chemical mixture. The filler is a mechanical mixture.

Mr. CARAWAY. Would this produce the same effect as the commercial fertilizer, or would it be so strong that it would kill the plant?

Mr. SMITH. It would not affect the plant any more than nitrate of soda. You know nitrate of soda will kill the plant if you put it right adjoining the root, and so will commercial fertilizer if you put the seed in the actual fertilizer; but this will not affect the plant any more than commercial fertilizer to-day.

Mr. CARAWAY. There was one other question that I wished to ask. It is the Senator's view, is it, that the shoals should be dedicated as an experiment station?

Mr. SMITH. Until we have passed the experimental stage.

Mr. CARAWAY. The thing I wished to ask the Senator is this: Does he believe that the Government will be more active in developing a commercial fertilizer than would a private individual who would have the incentive of profit?

Mr. SMITH. I think so, for this reason: As the Senator from Connecticut a while ago pointed out, if private concerns can sell us now a sack or a ton of commercial fertilizer with the chemical ingredients in it costing such a small per cent of the total cost, and that gives them a fine profit, and they have simply mechanically mixed in the filler these chemical ingredients, why should they, if they have a practical monopoly of it, investigate with a view to bringing about a change, and at enormous expense, because this laboratory work is the pioneer work, is really the expensive part, because during the experimental stage there is nothing commercial made, and there is no asset secured to meet the liabilities incurred in experimenting?

Mr. CARAWAY. What appeals to me is this: If it were possible to develop a commercial fertilizer that would eliminate the necessity of paying freight on 1,700 pounds of filler to every 300 pounds of fertilizer, does not the Senator think some enterprising individual would be very greatly tempted to experiment along that line in order to do it? He would then evidently have a monopoly of the market until the other people followed his process.

Mr. SMITH. It does so appear, and it looks very much as if some one would have discovered the process of extracting phosphoric acid from low-grade rock; but they did not do it. The Government did it, and just as soon as it was demonstrated, of course, it was given to everybody. If the Senator will allow me to say so further, in answer to his question, I think that is one argument for having the Government proceed with this undertaking, because if a private concern were to discover a method by which these ingredients could be chemically combined it would immediately get a patent on the process, and then, until the life of that patent ran out, the public would be shut out from any benefit that might accrue to it, whereas if the Government discovers such a process it gives it out to everybody immediately, and everybody is the beneficiary.

Mr. CARAWAY. What I still have in my mind is this: The process of extracting nitrogen from the air never came from any governmental experimentation, did it?

Mr. SMITH. They claim here, I think, that one of the processes was theirs.

Mr. CARAWAY. Then why was the process permitted to be patented?

Mr. SMITH. The process that they are experimenting on now was not patented. The cyanamide process was.

Mr. CARAWAY. The Government has not yet developed any process that is commercially profitable?

Mr. SMITH. No.

Mr. CARAWAY. The thing that I have in mind and that I want to ask the Senator about, because he has given the matter so much thought, is this: Here is a plant that has cost quite a great deal of money, that for the first time promised to give the farmers some relief. There are those who, it seems to me, are overzealous to have the Government retain it for purely an experimental station. Instead of giving to the farmer any relief by reason of the discovered processes of extracting nitrogen from the air, notwithstanding the great expense to which the Government has gone in building Dam No. 2 and the two plants, it is now asked to tie the whole investment up into an experiment station, and it may be valuable 10 or 15 or 20 years from now.

Mr. SMITH. Oh, no; the Senator mistakes me. I said in the beginning of my speech that, as Doctor Whitney testifies and told me privately, there is a plant there already equipped and paid for that will produce 40,000 tons, a plant available now for the benefit of the farmer with just a little additional expenditure.

Mr. CARAWAY. Whenever the farmer has to wait until the Government manufactures something that will be valuable to him, he is going to grow gray waiting. The Government is one of the institutions that we have to have, but we never see it go into business with profit to anybody except the people who are on the pay roll, or at least I have never observed it doing it. Now, just when there is a possibility of getting some relief, shall we turn this project over to the Government to experiment with, tie it up, as the Senator from Maryland desires, with an amendment, so that nobody who can do anything except spell can ever work for the Government under it, and then just wait to see what will happen?

Mr. SMITH. I am sure the Senator misunderstood my whole proposition. Let the Government use plant No. 2, produce the cyanamide and reduce it to ammonia, and then, through the processes indicated here, which can be used right now, let them produce the 40,000 tons of nitrogen, or the 200,000 tons of cyanamide, and convert it into fertilizer and put it on the market now. In the meantime let them use plant No. 1 to develop what they believe they can develop, a process that will produce the 40,000 tons with one-fifth of the power that is now required. This plant is paid for; it is a going concern. Let the Government go ahead and manufacture this product now. The phosphate rock is there; the potash is there; and there is an unlimited amount of nitrogen in the air. Let them manufacture this now and refine the process, add to it, perfect it, until the process is cheapened, and when they have at last reached the limit then let us talk about a lease; but every year and every day let them be producing a finished product and giving it out to the public in order to demonstrate beyond a doubt what can be done and at what cost.

Mr. CARAWAY. The Senator has not offered his amendment yet, then, has he?

Mr. SMITH. No; I have not offered it yet.

Mr. CARAWAY. The Senator's amendment provides for the Government manufacturing and selling to the farmer at what price?

Mr. SMITH. Let them cover cost. It does not concern us who else is in the market. Let them do it in such a way that the general public need not be taxed. Let the price cover the cost of the work.

Mr. CARAWAY. Of the plant?

Mr. SMITH. Yes; I mean, let it be a percentage of the cost of the plant.

Mr. CARAWAY. Does not the Senator suppose the price will then be so high that all the farmer will do will be to go to the plant and look at it? I want to get the Senator's views on his amendment. If I am to vote on it, I want some light on it, and I want some light on what the cost is likely to be.

Mr. SMITH. According to the testimony, it will cost about one-half what it costs now. All I want the Government to do is to sell the fertilizer at cost. If it should be so costly that they could not sell it, then we should quit; but let it be sold at cost. If it is demonstrated that you can not produce fertilizer there which can be sold as cheaply as the private companies are selling it, it would be idle to go on, but if we can produce it at a lower cost and sell it at cost, then we will at least know what a reasonable profit to private individuals would be.

Mr. CARAWAY. I find myself in perfect accord with that statement, but I was peculiarly desirous that we do something practical with this great national resource. I know, and the Senator knows, that you can find a theorist, especially in a governmental department, who can sit down and spin a story all day long about what he is going to do some time in the future, not that he ever did anything, but he is just about to return a great profit upon the investment the Government has had in him for 20 or 30 or 40 years. I do not want merely to disparage the Government conduct of business, although I have never seen it succeed in doing business, but I just felt that we listened to the stories of theorists and kept on and kept on listening to them for the three or four years this plant has been here. It has been the subject of one experimental proposition after another. One fellow wants to do this with it and somebody else wants to do something else, and always there is some fellow coming in just at the last minute and saying, "If you had just let me have it, I could have done so much better with it than these other people did." I was afraid we were just fixing to do that again.

Mr. SMITH. The bald statement has been made, without any equivocation, that we can produce now 40,000 tons of this fixed nitrogen, contained in 200,000 tons of cyanamide.

Mr. CARAWAY. The Senator says the Government has already given this process to the manufacturers of commercial fertilizer?

Mr. SMITH. One step of it; that is, taking out the phosphoric acid.

Mr. CARAWAY. Why not give it to the public now? The Government should not withhold it from the public.

Mr. SMITH. The Government is not withholding it. Anybody can use the phosphoric acid process who wants to.

Mr. CARAWAY. But the whole process?

Mr. SMITH. They can use all of it.

Mr. CARAWAY. The manufacturers of commercial fertilizer, then, the Senator says, now are entitled to use this process which the Government has developed of manufacturing commercial fertilizer without the filler?

Mr. SMITH. Yes.

Mr. CARAWAY. Is any company so impressed with it that it is trying it?

Mr. SMITH. Yes. One of the curious questions is why the farmer insists on having the fertilizer in the diluted form.

Mr. CARAWAY. The Senator means that the farmer will not buy fertilizer that is condensed?

Mr. SMITH. For years and years the department has tried to get the farmers to buy muriate of potash, which is a condensed form of potash, and save the freight paid on the filler. They have tried to get them to buy the phosphoric acid and nitrate of soda, rather than the commercially mixed goods, but the farmer seems to prefer to have the fertilizer in the form to which he has been accustomed.

The department has insisted that this fertilizer, a sample of which I hold in my hand, can be still further developed in a commercial sense. It has not yet reached its highest development, and my idea was that if the Government, experimenting, as it does, at nitrate plant No. 1, is making progress; and if they did discover, as I am sure they did, because I have no reason to doubt their word, the process that is now being used to get the phosphoric acid; if they can improve the method of getting the potash; if they can, by their research and work, produce the fertilizer in a form that will invite the confidence of the farmer, so that he can get it in a concentrated form, so that at least, if everything else were equal, the cost of the filler would be eliminated and we could educate the farmer along that line, we will do a splendid work for the farmers of this country. Not only that, but if we can develop the process at Muscle Shoals by which the power required to extract these ingredients can be diminished, in just that proportion we will increase the volume that can be turned out.

The amount of fertilizer which can be made there, with the phosphate rock and the potash rock in this country, is unlimited. If a process can be perfected that will conserve power and increase the output, the prospects are that the water power of this country, harnessed at Muscle Shoals, and perhaps in smaller units throughout the country, can, with a minimum of expense and a perpetual source of power and raw material, solve the problem of adequate fertilization for the farmer.

While our Government is experimenting and searching for new processes, let them use what we have already bought and paid for. Let them use it in producing these ingredients and putting them in such form, if not in combination, at least in such a form that those who desire one ingredient may get it; let us hold on to that and let us develop into a practical commercial plant what we have already started so splendidly.

Mr. CARAWAY. Let me just say this: Suppose we had withheld from the genius of private industry all the processes of developing the things the farmer now uses, and had let the Government do it. Does not the Senator suppose the farmer would have been plowing with a stick yet?

Mr. SMITH. I am not disparaging private initiative or discovery, but if we have chemists in the Agricultural Department who have shown their competency to do these things, why should we not utilize them in a practical way, as Senators have contended?

Mr. CARAWAY. That is the point about it. What I am trying to find out is this: If they have gone through the process of experimentation, as the Senator has said, and have already developed this commercial fertilizer which can be used in a condensed form, why not let us put that on the market? Why should we keep that tied up?

Mr. SMITH. The Senator must not misunderstand me. Just a part of this is reduced to practical form; that is, the ammonium phosphate. The potash element they have every reason to believe, by their combination, can be as economically produced as the other.

Mr. CARAWAY. Where was this experiment carried on—where have they developed those things?

Mr. SMITH. They developed this right here at the Agricultural Department.

Mr. CARAWAY. Why not let them continue here in the experimentation, as they are doing now, and then give to the public the advantages they may derive from their discoveries? Why tie up the only plant that could do the farmers some good and turn it into an experiment station?

Mr. SMITH. I am not asking that it be turned into an experiment station. I want the Government to go on and produce just as rapidly as they make discoveries and improvements, applying them in their practical plants. We have two of them. We have two now. Plant No. 1 is experimenting. Plant No. 2 is a practical one. You can use everything you discover, as soon as it is discovered, in plant No. 2, until you are reasonably assured that you have exhausted the subject, and we should give the agricultural people of this country the benefit of that at cost.

Mr. CARAWAY. If they wait until the people who are on the pay rolls say they have exhausted the subject, the farmers will be older than Noah was when he built the ark.

Mr. SMITH. But we at least should have some reasonable ground upon which to know whether or not progress has been made. It will not take 12 months for us to demonstrate whether or not plant No. 2, with what accessories are necessary, can produce available for the farmers the very ingredients they now have to go to the fertilizer factories for, and I believe it is the part of wisdom and economy on the part of the Senate to utilize all the power down there to demonstrate what can be produced in a practical form, not experimentally altogether, although in a way experimental as precedent to the practical. Let them both go hand in hand there, and demonstrate the reasonable cost to the farmer of this process that is bound to revolutionize the whole matter of fertilizer manufacture.

Mr. COPELAND. Mr. President, what we are fighting about over in New York is to have the public-service commission treat us in the same way that the people of Nebraska or Missouri are treated. But I join with other Senators in bitter disappointment if out of this plan did not grow some working arrangement which would give the people of this country cheaper fertilizer.

Before enlarging upon this point, however, I must remark that certainly no one wants to belittle the research work and the discoveries which have come out of governmental laboratories. When I think about how diphtheria and typhoid fever have become negligible in their attacks upon the people, I thank Heaven that there have been research laboratories under Government control.

Mr. President, it would not be fair, I am sure, to let any false impression prevail as to what is intended by the Senator from Nebraska in the bill which he has presented. It is true that he does not do as the Senator from Alabama does in his bill—turn all the power into the making of fixed nitrogen, as I understand the bill. The provision of the Norris bill is that the corporation which is organized under the Secretary of War will sell any surplus power. The thing I do not like about the bill which the Senator from Nebraska presented was that he limited the amount of power which could be used in the manufacture of fertilizer. That was the reason for the presentation of my own amendment this morning. But the bill of the Senator from Nebraska provides for the sale of surplus

power. What is more important to the country at large is that it provides that plant No. 1, not alone plant No. 2, shall be used for the manufacture of fertilizer, as at present. It provides that plant No. 1 shall be developed. We find at the bottom of page 29 of the Norris bill that plant No. 1 shall be remodeled. The provision is that the Secretary of Agriculture—

Is hereby authorized to remodel nitrate plant No. 1 and to use the same in the manufacture of fertilizer or other products and in experimental work.

It is provided further that plant No. 2 shall not be cut down at all in its present output of 40,000 tons per year. It contemplates the sale of the fertilizers or products used in the making of fertilizer directly to farmers or to others who have a personal interest in their purchase.

So it would seem to me that from every standpoint, with certain safeguards, this bill will do exactly what the Senator from Arkansas wants, and what all the rest of us want; that it shall provide for the depleted farms of this country the fertilizer necessary to increase the crops and bring them up to the needs of the increasing population. For these reasons, with the amendments which are offered, it seems to me that we may safely proceed to pass this measure.

The PRESIDENT pro tempore. The question is upon the amendment proposed by the Senator from Maryland [Mr. BRUCE] to the substitute reported by the committee.

Mr. NORRIS. Mr. President, the Senator from Maryland was called out of the Chamber. He, of course, ought to be here when his amendment is voted on. Unless some other Senator wants to speak on the subject—

Mr. UNDERWOOD. Mr. President, I simply desire to suggest that if we are going to vote it might be well to call a quorum.

Mr. NORRIS. That is what I am going to do unless some Senator wants to speak. If no Senator wants to speak, I suggest the absence of a quorum, Mr. President.

The PRESIDENT pro tempore. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Bayard	Fessenden	Kling	Robinson
Borah	Fletcher	Ladd	Sheppard
Brookhart	George	Lenroot	Shipstead
Broussard	Gerry	McKellar	Shortridge
Bruce	Glass	McKinley	Simmons
Butler	Gooding	McLean	Smith
Capper	Hale	McNary	Smoot
Caraway	Harris	Mansfield	Spencer
Copeland	Harrison	Means	Stanfield
Couzens	Hedlin	Metcalfe	Sterling
Cummins	Howell	Neville	Swanson
Curtis	Johnson, Calif.	Norris	Trammell
Dial	Johnson, Minn.	Overman	Underwood
Edwards	Jones, N. Mex.	Pepper	Wadsworth
Ernst	Jones, Wash.	Phelps	Warren
Fernald	Kendrick	Ralston	Wheeler
Ferris	Keyes	Ransdell	Whitt

The PRESIDENT pro tempore. Sixty-eight Senators having answered to the roll call, there is a quorum present. The question is upon agreeing to the amendment offered by the Senator from Maryland.

Mr. BRUCE. Mr. President, I desire to add a brief clause to the pending amendment, and I will ask the Secretary to take it down as I suggest it. After the terminal words "with respect thereto," I ask to have added the words "but all such employees shall be subject to dismissal by the board at its pleasure."

The PRESIDENT pro tempore. The Senator from Maryland modifies his proposed amendment by adding the words which the Secretary will report.

The READING CLERK. In the amendment proposed by the Senator from Maryland, after the words "with respect thereto," and before the period, he modifies the amendment by inserting the words "but all such employees shall be subject to dismissal by the board at its pleasure."

Mr. BRUCE. Mr. President, I desire to add just a sentence or so to what I said with respect to this amendment on Friday last.

The Senator from North Carolina [Mr. SIMMONS] asked me when I was presenting the merits of the amendment whether I thought that if it should become necessary to appoint a chemist in connection with the Muscle Shoals work that chemist should be selected in accordance with the Federal statutes and the rules and regulations relating to the Federal classified service. I said I did. Now I desire to call attention to the fact that great numbers of chemists are selected from time to time as the result of competitive examinations held under the auspices of the Civil Service Commission.

For illustration, I hold in my hand a Government circular headed "Occupational list of examinations held during 1916 and 1917," and on turning to the title "Chemist" in this circular what do I find? That during those years the United States Civil Service Commission held examinations for the purpose of securing for the Government the services of an alloy chemist, of an analytical chemist and mineralogist, of an assistant chemist, of an associate analytical chemist, of an engineering department chemist, and, most significantly of all in connection with the subject that is now under consideration, of an explosives chemist; also of a fuels chemist, a gas chemist, an inorganic chemistry chemist, a radioactivity chemist, a laboratory chemist, and so on. In other words, under this merit system of appointment numerous chemists, to say nothing of biologists, bacteriologists, and other special scientific experts, have been appointed agreeably with the provisions of the Federal laws and rules and regulations relating to the Federal classified service.

Then my friend the Senator from Arkansas [Mr. CARAWAY] a few moments ago said, "The Senator from Maryland would not have anybody engaged in connection with this work who did not know how to spell." I am sure that the Senator from Arkansas would consider the Senator from Maryland, or the Senator from Arkansas himself, very unfit to have a seat in this body if he did not know how to spell, and I imagine he would even consider anyone highly incompetent to fill the position of a clerk in one of the departments in this city, to say nothing of a chemist or of a bacteriologist or biologist, who did not know how to spell. Of course, the Senator from Arkansas not only knows how to spell, but he even knows how to work a rhetorical spell. We all know that. The fact is, of course, that individuals who do not know how to spell—that is to say, mere laborers—would not, under the civil service system, be subjected to competitive examination at all in connection with the Muscle Shoals enterprise.

The very worst misfortune of the civil service system is that it is incessantly misrepresented, though it seems to thrive and flourish, I am glad to say, on misrepresentation. One of the first misrepresentations to which it was ever subjected within my memory was on an occasion when the late Arthur P. Gorman, of Maryland, who was one of its bitter antagonists, said in the course of a public speech in Baltimore, "What a perfectly absurd thing this civil service is! Why, the other day a man who was being examined for the position of clerk in Washington was asked how far it was from the earth to the sun." Of course, the friends of the merit system of appointment were very desirous of running that extraordinary statement down, and as is quite often found in the case of statements of that kind by public men, while it was not wholly untrue it was only partially true. There had been an examination in the city of Washington, and one of the applicants for the position with reference to which that examination was held had been asked how far it was from the earth to the sun, but, unfortunately for Mr. Gorman, the question, as I was informed, was put to an applicant for the position of assistant astronomer at the Government Observatory. So it always goes.

As I said the other day, we have arrived at that stage in the history of this great reform when it includes practically all the subordinate positions under the Federal Government, outside of a few governmental domains, and when every President of the United States who is about to surrender the presidential office feels that he would be in some sense dishonored in the eyes of the American people if he did not give a further impulse of extension to the reform. And, now, here we have President Coolidge, in his recent message to this body, establishing another precedent of that sort by asking Congress to apply the merit system of appointment to the whole Prohibition Unit; nay, and doing more, asking that the existing incumbents of the offices associated with the Prohibition Unit be not covered into that unit by the legislation when enacted. Moreover, I was particularly delighted by the further suggestion of the President that the merit system of appointment as applied to first, second, and third class postmasters should be clinched by legislative enactment.

If the merit system of appointment is a good thing in connection with the direct exercise of governmental functions, why should it not be a good thing when the Government chooses, instead of directly exercising such functions, to exercise them through the agency of a corporation? The function is exactly the same in the one case as it is in the other; and, for one, I confess that I am beginning to suspect that one reason why these Federal corporations are created is for the purpose of evading the operation of the national civil service laws.

There is the Panama Canal service. That should be brought within the merit system of appointment. Since I have been in Washington I have been again and again subjected to pressure by mechanics, artisans, or other applicants of one grade or another who desired to secure positions in the Panama Canal service.

There is the Emergency Fleet Corporation service, too. Does not every man in this body know that a most decided improvement would have been operated in the service of that corporation and that its career might well not have been so unfortunate, not to say tragic, as it has been if the positions under the Emergency Fleet Corporation had been filled by the wise, salutary, beneficent plan of appointment peculiar to the Federal classified service? In point of fact, there are only a few provinces of the Government now outside of the scope of the national civil service laws, and they are provinces that mainly exist within the scope of the duties and functions that belong to Federal administrative corporations. These corporations quite exceptionally are allowed to run at large, so to speak, and to make appointments under the old detestable spoils or patronage system.

Now, I say, let us not make that mistake again. Here is a great work proposed to be conducted by a Government corporation under the Norris substitute and alternatively by such corporation under the Underwood substitute. This corporation, of course, would require laborers. These laborers would be of a character that would not fall within the scope of the national civil service law, or, if they did, only to the extent that they would be subject to a mere physical examination. Clerks and chemists and engineers, however, would have to be appointed, and unquestionably many other technical experts would have to be appointed also. Why should they not be appointed agreeably with the Federal statutes and regulations and rules relating to the national merit system of appointment, just as thousands of similar employees are now appointed in connection with the departmental work of the Government under those statutes, regulations, and rules? I trust that the amendment which I have offered will receive the cordial approval and support of every member of this body.

Mr. STERLING. Mr. President, I would like to ask the Senator a question before he takes his seat.

Mr. BRUCE. Certainly.

Mr. STERLING. The Senator has added the following phrase to his amendment as originally submitted:

But all such employees shall be subject to dismissal by the board at its pleasure.

Mr. BRUCE. Some members of the Senate who are in favor of my amendment had some little scruples about qualifying in any way the power of dismissal on the part of the board, the idea being that as the objects of the corporation would be industrial sometimes the board might be called upon to act so quickly in connection with changes in subordinate positions that it would be well to leave its power of dismissal unimpaired. As the author of the amendment, I feel that I could afford to make that concession.

Mr. STERLING. Let me say to the Senator that that makes a pretty sharp discrimination between those employees and the employees of the classified civil service generally who can only be dismissed upon notice and statement of cause for their dismissal. If I may, I will call the attention of the Senator to the statute. Section 6 of the act of August 24, 1912, provides:

That no person in the classified civil service of the United States shall be removed therefrom except for such cause as will promote the efficiency of said service and for reasons given in writing, and the person whose removal is sought shall have notice of the same and of any charges preferred against him, and be furnished with a copy thereof and also be allowed a reasonable time for personally answering the same in writing.

It seems to me that the amendment of the Senator will be rendered in large part nugatory if he adds the clause which I understand he has added concerning a dismissal by the board at pleasure.

Mr. BRUCE. I am willing to waive that. I do not think so. There is very little motive to make a change in a subordinate position when the successor to the incumbent is to be selected under the national civil-service system. The head is not likely to make a change except for good cause when he knows that the successor to the man he dismisses will not be selected by him as a matter of personal or political favoritism, but will be selected for him by the same impersonal disinterested system that has selected the predecessor of the person removed. I grant that this is a departure from the full effect of the present national civil service laws, but the importance of that de-

parture has been stressed by some of the friends of my amendment who are honestly in favor of it and would like to see it adopted, and I am willing to make that concession to them.

Mr. STERLING. I would have been glad to support the original amendment in the language in which it was introduced by the Senator from Maryland, but I fear the consequences of the additional language. I fear the members of the board, if they could discharge at their pleasure, would be importuned to discharge this or that employee to make place for another, just the same as it might have been had there been no provision putting them in the classified service originally.

Mr. BRUCE. The Senator can offer a proposition of his own to that effect and see what favor it will receive at the hands of the Senate, but I am willing to allow my amendment to remain in the form in which it now is presented.

Mr. McKELLAR. Mr. President, I shall detain the Senate only a few moments. For a number of years I have served on the Committee on Civil Service in the Senate and I am a great believer in the merit system as applied to the selection of clerks and other officials in the employment of Government departments. I think it is a most wise and beneficial service and ought to be built up wherever it can and extended wherever it may be. But civil service in governmental departments is a different situation from that which we have here. If the bill is enacted into law the Government is going into a private business and we are putting that private business in the hands of a corporation. We expect to hold that corporation responsible for the success or failure of the business, and while we do that, if the amendment of the Senator from Maryland is adopted, we are asked to arrange it so that the corporation will have nothing whatsoever to do with the selection of its employees and nothing whatsoever to do with their discharge if it is necessary to discharge them. On the contrary we are providing by law that an entirely different and separate body, probably unacquainted with the business for which they are called to supply employees, shall undertake to employ all of the employees for this highly technical business corporation and discharge them if it sees fit to do so. How can we expect success under these circumstances? In my humble judgment a more unwise provision could not be inserted in the law. I think it is purely a business proposition that we are going into or that we propose to go into, and we ought to give the corporation to be created full power to select its own employees and power to discharge them. Otherwise we will have nothing but confusion and perhaps bedlam from the very beginning of the operations of the corporation. Therefore I am going to vote against the amendment.

I want to say further that in my judgment the amendment is not needed. I call the attention of the Senate to what seems to be a very wise provision in the language of the substitute submitted by the committee. I refer to section 6, as follows:

In the appointment of officials and the selection of employees for said corporation and in the promotion of any such employees or officials no political test or qualifications shall be permitted or given consideration, but all such appointments and promotions shall be given and made on the basis of merit and efficiency.

I stop there long enough to ask those who believe in the merit system, in a system of efficiency in Government employees as I do, how we could tell for a moment that the Civil Service Commission stationed here in Washington would be better qualified to employ and discharge the employees of this corporation down at Muscle Shoals than the corporation itself on the actual ground will be? I do not believe it would be. I believe the merit system that is created by the bill for this particular business that we are creating will be far more efficient and effective and far more meritorious than a system of civil service conducted here at Washington. I proceed with the reading of section 6 of the Norris substitute:

The board shall keep a record of all requests, oral and written, made to any member thereof, coming from any source, asking for any favor in behalf of any person or the promotion of any employee, which record shall be open to the public inspection. Any member of said board who permits the use of political or partisan influence in the selection of any employee, or in the promotion of any such employee of said corporation, or who gives any consideration to political consideration in the official action of said board, or who, knowing that such political influence has been or is attempted, does not record the same in said record shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in a sum not exceeding \$1,000 or be imprisoned not to exceed six months, or both such fine and imprisonment, and the conviction of any member of said board of the offense herein defined shall have the effect of removing such member from office.

I think that is as far as we should go. Certainly it is as far as we should go at this time. This is a new departure. This is a departure from the ordinary policies of the Government. We are putting the business in the hands of a corporation under the language of the bill. Surely we should give that corporation the power to select its own agents and representatives if we are going to hold them responsible, as, of course, we are going to do. In my judgment, it is very unwise to handicap the corporation in the very beginning by taking away from it the power to select its own employees or to discharge its own employees.

There is another thing about it. It is perfectly apparent that many of the gentlemen employed will be engineers, technicians of one kind or another—chemists, for instance—and men will be taken from many other professions as well. Surely under these circumstances the corporation which is to be placed in charge of the work, under such rules as are laid down in this very proper provision in section 6 as reported by the committee, should have the right to select its own employees in order that the work may be made a success.

For these reasons, Mr. President, I am going to vote against the amendment offered by the Senator from Maryland.

Mr. BRUCE. Mr. President, if I may be permitted to make an observation or two in reply to what the Senator from Tennessee has said, let me add that, though I have no desire to use aggressive language, I defy that Senator or any other Member of this body to draw any really substantial distinction between a function exercised directly by the Government within the scope of its powers and the same function when it is exercised by a Federal corporation. There is no difference in identity between the Government and such a corporation—not the least. The members of the board of directors of the corporation under consideration are all to be appointed by the President; all the stock of the corporation is to be held by the Government; all the objects and duties of the corporation would be public in their nature.

The Government under this bill, simply as a matter of convenience, chooses to clothe itself for the nonce with the character of a corporation; in other words, the idea is that the work at Muscle Shoals could more readily and easily, and perhaps more effectively, be conducted by a corporate instrumentality of the Government than by the direct action of the Government; that is all.

As I have intimated, if we are going to abandon the merit system of appointment or if we are going to allow it successfully to be encroached upon, I could not conceive of a more effective way of permitting that to be done than to permit the Government, whenever it has occasion to perform some great work of this description, to assume for the purposes of that work the character of a corporation and to provide that no official or employee of any sort whose services may be required in connection with the work shall be selected agreeably with the Federal statutes and rules and regulations relating to the Federal classified service.

Let us set a good example now; let us establish a valuable precedent now. There is no reason why the merit system of appointment should not be extended to the services of every Federal corporation of this kind. Let us extend it in the present instance. If we do, I feel sure that we shall all have a right to congratulate ourselves upon having performed an act of good judgment and public spirit.

Mr. HARRISON. Mr. President, will the Senator from Maryland yield for a question?

Mr. BRUCE. Yes.

Mr. HARRISON. I do not know; I desire some information on the subject; and I ask the Senator from Maryland, Was the civil service law invoked with respect to the construction of the Panama Canal?

Mr. BRUCE. No; it was not.

Mr. HARRISON. Was it invoked in the construction of the Alaskan Railway?

Mr. BRUCE. I can not speak about that; but I think it was perhaps. It is not, however, applied as to the Panama Canal; it is not applied as to the Emergency Fleet Corporation; but I propose before the present session comes to an end to make the effort, however vain it may prove to be, to bring both the Panama Canal service and the service of the Emergency Fleet Corporation within the scope of the national civil service laws.

The area of pressure for place has been so enormously diminished, as respects Members of Congress, that the principal part of all the importunity to which I have been subjected in relation to appointments to office since I have been here has been

by persons who have desired to obtain office in connection with the Panama Canal service or the Emergency Fleet Corporation.

Mr. McKELLAR. Mr. President, may I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from Maryland yield to the Senator from Tennessee?

Mr. BRUCE. I yield.

Mr. McKELLAR. Is not the Senator importuned with just as much regularity, and probably with more frequency, to aid in securing promotions and appointments in the civil service?

Mr. BRUCE. No, sir; because whenever I am—and I speak with absolute verity—I turn over the leaves of the Federal Statutes and I say, "Look at this section; it absolutely forbids me, as a Member of the United States Senate, to make any recommendation of any kind, except as to character and residence, that relates to an office within the classified civil service. Some Members of the Senate do not seem to be cognizant of this section; but I filled the breast of one of them at least, I am certain, with a feeling of eternal gratitude some time ago when I called his attention to it; and afterwards I learned that he has since been in the habit of using that section for his own convenience and comfort."

Mr. DIAL. Mr. President, without expressing any opinion as to the merits or demerits of the civil-service system, I desire to say that certainly this is one activity to which it ought not to apply. We have a great property at Muscle Shoals, an asset of great value to the people of the United States, and it ought to be developed and used so that a success may be made of it. It ought not to be tied down with any incompetent employees or employees whom the management could not get rid of. As a general rule I am almost unalterably opposed to Government ownership and Government operation, but we already have this property and we ought to utilize it to the greatest advantage.

Civil-service rules would not apply well to a business proposition, and this is strictly a business proposition; indeed it is a peculiar kind of business. It is not like a business which operates only in the daytime; it will be operated by water power running 24 hours in the day six days of the week; and every minute it will be necessary to have employees there who are willing to work and to do their duty at all times. Possibly some parts of the plant might get out of order and some one employed under civil-service rules might be a little too careful about whether he should be called on to work after hours or on this or that portion of the project, or he might raise some question of priority. We ought not to start in here now to make this enterprise a failure before we fairly inaugurate it. We ought to hold the directors to the strictest account for their acts and the acts of their employees. In that way we will have in a few years a property that will be of inestimable benefit to the whole people of this country. I hope that the amendment of the Senator from Maryland will be voted down.

Mr. BRUCE. Mr. President, may I interrupt the Senator for just a moment?

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from Maryland?

Mr. DIAL. With pleasure.

Mr. BRUCE. I observe that the opposition to my amendment so far has been limited almost entirely to Members of this body who represent constituencies in the vicinity of Muscle Shoals. I should like to ask the Senator whether that fact has any real significance? I am just a little disposed to suspect a disposition on the part of Senators in this body who represent constituencies within easy reach of Muscle Shoals to localize the patronage under this bill to some extent for the benefit of their own communities. I am not in favor of that. If there are any patronage benefits to arise under this bill I should like to see them distributed over the whole country.

The Senator from Tennessee [Mr. McKELLAR], the Senator from South Carolina [Mr. DIAL], the Senator from Mississippi [Mr. HARRISON], and the Senator from Alabama [Mr. UNDERWOOD], whose States are in or near the Muscle Shoals region of the country, seem to sustain a relationship of determined opposition to this amendment well calculated to excite some interesting surmises.

Mr. UNDERWOOD. Mr. President, so far as the Senator from Alabama is concerned, he has not opened his mouth on this amendment; but I am glad to inform the Senator from Maryland that I think of all the unwarranted business procedures that I ever heard of it is appointing a board of school-teachers to pick men who are capable of running a great industrial plant.

Mr. BRUCE. Mr. President, that sort of language is as old as the hills and as stale as a venerable piece of Limberger cheese. [Laughter.] It is but the kind of language which the friends of the merit system of appointment have had to confront in Congress ever since they have been trying completely to engraft that splendid system upon the operations of the Government.

Mr. McKELLAR. Mr. President, will the Senator yield to me?

Mr. BRUCE. Certainly.

Mr. McKELLAR. I wish to assure the Senator, so far as I am concerned, that the first thought of such a thing as the Senator suggests that ever occurred to my mind was when the Senator made the suggestion. So far as I am concerned, I am quite sure that any corporation that may be formed under this bill, being entirely under Republican control, if it shall pass, would not give the slightest consideration to any person that I, as a Democratic Senator, might seek to have appointed; and I have not had the slightest notion of trying to have anyone appointed from my State. I merely wish the Senator to know that I think he is unduly suspicious and quite unfair and unjust in his suspicions; I know he is, so far as I myself am concerned, because such a thing never occurred to me until the Senator mentioned it.

Mr. BRUCE. I think the Senator from Tennessee is entirely too modest.

Mr. DIAL. Mr. President—

The PRESIDENT pro tempore. The Senator from South Carolina has the floor.

Mr. DIAL. Mr. President, I think it has about come my time to answer the suggestion of the Senator from Maryland. I wish to say that I want Muscle Shoals to be used for the purpose for which it was designed primarily, namely, to produce nitrates for the protection of the United States in time of war in case we need them, and next I want to use it for the production of fertilizer in every way that is practicable.

I have no hesitancy in saying, Mr. President, that I am strongly of the opinion that the surplus power ought to be transmitted where it will be of use to the greatest number of people so as to bring about the greatest benefit at the least possible cost.

I live in the second State from this power site, and I do hope that we will get some of the benefits of it in South Carolina. We have already reaped some of the benefits from the steam plant at Muscle Shoals, which transmits power for some 250 miles north of Columbia, S. C., which is the center of the State. It is only about 120 miles from Columbia to Charleston. Therefore that power could be transmitted there; in fact, the people in every town of my State may be able to get some benefit from this power, and I am glad of it. I hope that it will be transmitted around to the neighboring States; but I can not see how it will be transmitted so far north as the State of Maryland. I wish that were practicable. That is one reason why I feel kindly toward the bill of the Senator from Nebraska [Mr. NORRIS], namely, that it is a proposal to develop the entire property. I expect, however, to vote for the Underwood bill. I want the Muscle Shoals plant to be used to make nitrates for the Government first, and, secondly, to use those nitrates and other ingredients in order to make fertilizer for the farmers. Let that be made practicable; whatever surplus power there is let it be transmitted and used by as many people as possible, and let the Government get a return upon its investment. We have the property and should not give it away. In my opinion, the management of the enterprise ought to have absolute control and ought not to be tied up with some school-teacher or some fellow who prides himself upon knowing how to spell or something of that sort, but who has no practical common sense about getting out into the weather and looking after the pole line and all of the paraphernalia connected with a power plant. I hope the amendment of the Senator from Maryland will fail.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until 12 o'clock noon to-morrow.

The motion was agreed to; and (at 4 o'clock and 36 minutes p. m.) the Senate took a recess until to-morrow, Tuesday, December 9, 1924, at 12 o'clock m.

NOMINATIONS

Executive nominations received by the Senate December 8, 1924

MEMBER OF THE FEDERAL FARM LOAN BOARD

Albert Calvin Williams, of Fort Worth, Tex., to be a member of the Federal Farm Loan Board, to serve out the unexpired term of Merton L. Corey, resigned, expiring August 6, 1929.

HOUSE OF REPRESENTATIVES

Monday, December 8, 1924

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Thou who didst live on earth and is alive forever more, we bless Thee. May the sweet and loving silence of our hearts sing unto Thee our psalm of praise and gratitude. Meet us, O Lord, at the threshold of our daily tasks. May we not falter in our search for truth and never hesitate to follow in its way. Impress us, dear heavenly Father, that if we are to have an outer life of richness and power, it must spring from a rich inner life. Be near us when the stress is hard and the way is rugged; be near us as we wait and labor; be near us in all our mental processes; be near us in our decisions; O be near us all the way, even to the end of the last mile. In the name of Jesus, Amen.

The Journal of the proceedings of Saturday last was read and approved.

CELEBRATION OF WASHINGTON'S BIRTHDAY

The SPEAKER. Pursuant to law the Chair appoints Mr. HAWLEY, Mr. TILSON, Mr. GARNER of Texas, and Mr. BYRNS of Tennessee as members on the part of the House of the United States Commission for the Celebration of the Two Hundredth Anniversary of the Birth of George Washington.

RESIGNATION FROM A COMMITTEE

The SPEAKER laid before the House the following communication:

WASHINGTON, D. C., December 6, 1924.

HON. FREDERICK H. GILLET,

Speaker, House of Representatives, Washington, D. C.

DEAR MR. SPEAKER: I hereby tender my resignation as a member of the Committee on the Judiciary to become effective at once.

Sincerely yours,

J. W. WISE.

WIDENING OF FOURTH STREET IN DISTRICT OF COLUMBIA

The SPEAKER. To-day is District of Columbia day.

Mr. REED of West Virginia. Mr. Speaker, I desire to call up the bill S. 1343, authorizing the widening of Fourth Street in the District of Columbia, on the Union Calendar. As there will not be any opposition to it I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from West Virginia asks unanimous consent that the bill be considered in the House as in Committee of the Whole.

Mr. BLANTON. I think all these bills should be considered in Committee of the Whole, and I object.

Mr. REED of West Virginia. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill (S. 1343) to authorize the widening of Fourth Street south of Cedar Street NW., in the District of Columbia, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. CHINBLOM in the chair.

Mr. REED of West Virginia. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. REED of West Virginia. Mr. Chairman, I will yield one hour to the gentleman from Maryland, the ranking Member on the District Committee.

Mr. BLANTON. Will the gentleman yield?

Mr. ZIHLMAN. I yield.

Mr. BLANTON. I have no requests on this side for time, and I shall only occupy five or six minutes. There is no objection to the bill.

Mr. ZIHLMAN. I do not wish to use any time, and I will yield five minutes to the gentleman from Texas.

Mr. BLANTON. I will ask for recognition in my own right.

Mr. ZIHLMAN. Mr. Chairman, this is merely a bill to authorize the widening of Fourth Street, a needed improvement in the northwest section of the city. It has been approved of by the District Commissioners and has passed the Senate.

Mr. GARRETT of Texas. This has no reference to Fourteenth Street going through the hospital grounds?

Mr. ZIHLMAN. No. Mr. Chairman, I yield back the balance of my time.

Mr. BLANTON. Mr. Chairman, I shall take only about five minutes. I know of no opposition to this bill, but I want to call the attention of Members to a matter affecting all Congressmen who have offices in the House Office Building.

Until the past year the employees of the Geodetic Survey and State Department in the building just across the street from the House Office Building on New Jersey Avenue have never parked their cars around the House Office Building, because that space had been reserved for Members who had their offices in that building. But when there was being done some work on a street contiguous to the Government building within the last year, and at a time when Congress was not in session, some of these employees began to park their cars over next to the House Office Building. When Congress resumed its work many Members were not able to find parking space. They have to take their cars one or two blocks away from the House Office Building before they can find a parking space.

Now, you take any big business in Washington—take the hotels, for instance—and the space in front of them is reserved for their hotel business. You can not park your car in front of the Willard or the Raleigh except in specified areas. Take the space in front of the theaters—that is reserved for patrons of the business. Take the big office buildings of the town and in front of the mercantile establishments; you will find police signs there—"No parking; by order of the commissioners." That is for the benefit of the people whose business is there, so that they can get their delivery wagons in and have access to their own business.

The House Office Building was built for the benefit of Congressmen, who are transacting the business of the people, and they ought to have this space reserved by the commissioners and superintendent of police to place their cars there. This space around the building ought to be reserved for Members who have their offices in the building.

Mr. TREADWAY. Will the gentleman yield?

Mr. BLANTON. I will yield.

Mr. TREADWAY. Has the gentleman ever consulted with the head of the Coast and Geodetic Survey, Doctor Jones?

Mr. BLANTON. I have consulted with the architect's office, which has charge of the House Office Building, and also with the police office, that has charge of policing the sidewalks, and they say that they have notified Colonel Jones, who has charge of this Government building, and requested him to notify the employees not to put their cars around the House Office Building, and they have been informed that the employees have said virtually, "Away with Congressmen and their cars; we are going to park there as long as we please." That is the situation.

Mr. TREADWAY. May I inform the gentleman that I know from personal experience that Colonel Jones is in entire sympathy with the attitude of the gentleman and would be only too glad to cooperate at any time. It seems to me it would be perfectly in keeping to again call Colonel Jones's attention to the matter.

Mr. BLANTON. I think that if our Sergeant at Arms were to notify the commissioners of the situation, as well as the superintendent of police, and of the necessity for our having parking space for our cars there, that the superintendent of the police and the commissioners would place police signs around the building that that space is reserved for those only who have business in that House Office Building.

Mr. TREADWAY. Does not the gentleman know of very much more flagrant cases of abuse of the public, such as that at the Union Station?

Mr. BLANTON. Oh, yes.

Mr. TREADWAY. Where there is no chance to park anywhere. The police do not regulate that for us.

Mr. BLANTON. That is a situation concerning which we have no hope of any remedy at all.

Mr. TREADWAY. Oh, yes; we have lots of hope, but not much execution.

Mr. BLANTON. The gentleman from Massachusetts has been a very distinguished Member of this body for years. He has been in very close touch with the administration of affairs and the steering committee of the dominant party, and yet he continues to suffer under this restraint every day, whereby neither he nor any Senator nor an official of the Government, if you please, can drive in there except in a second or third avenue removed from the depot, and he has not been able to remedy the situation up to this good time, and he never will be able to remedy it because the corporation that runs those particular taxicabs has an inside there that we can not break up. I have tried to break it up through the District Committee and we can not do it, and the gentleman will not be able to do it; but we can have the little privilege of parking our cars, which we need every day for official business with the departments, at our office building, and if our Sergeant at Arms will take the matter up with the superintendent of the police and the Commissioners of the District, I am sure that they will put police signs there just as they have police signs in front of hotels and theaters and other business houses in the city.

I only wanted to take up sufficient time to bring this to the attention of the House, and unless somebody else wants time, I yield back my time.

Mr. ZIHLMAN. Mr. Chairman, I demand the reading of the bill for amendment.

The CHAIRMAN. The Clerk will read the bill for amendment under the five-minute rule.

The Clerk read as follows:

Be it enacted, etc., That under and in accordance with the provisions of subchapter 1 of chapter 15 of the Code of Law for the District of Columbia, within six months after the passage of this act, the Commissioners of the District of Columbia be, and they are hereby, authorized and directed to institute in the Supreme Court of the District of Columbia a proceeding in rem to condemn the land that may be necessary for the widening of Fourth Street immediately south of Cedar Street NW. to its full width of 90 feet, upon such lines as the Commissioners of the District of Columbia may deem best for the public interest: Provided, however, That of the entire amount found to be due and awarded by the jury in said proceedings as damages for and in respect of the land to be condemned for said widening plus the costs and expenses of the proceedings hereunder, not less than one-half thereof shall be assessed by the jury as benefits.

With the following committee amendment:

Page 2, line 7, strike out the word "less" and insert the word "more."

Mr. SANDERS of Indiana. Mr. Chairman, I would like to have some one in charge of the bill explain what this provision means.

Mr. ZIHLMAN. Mr. Chairman, the particular improvement that is brought about by the widening of Fourth Street is an improvement in the heart of the Takoma Park district of the District of Columbia, and the property owners in that section have taken the position that this improvement is so beneficial to the community at large that not more than one-half of the benefits or damages assessed for the improvement should be assessed against the abutting property owners, and that the District as a whole should pay one-half of the cost of the improvement resulting from these condemnation proceedings.

Mr. SANDERS of Indiana. Mr. Chairman, the proviso reads as follows:

Provided, however, That of the entire amount found to be due and awarded by the jury in said proceedings as damages for and in respect of the land to be condemned for said widening plus the cost and expenses of the proceedings hereunder, not more than one-half thereof shall be assessed by the jury as benefits.

Does that mean that when a man's land is benefited \$1,000 and damaged \$1,000, that when the jury reached that conclusion, they are to give him \$500?

Mr. ZIHLMAN. My understanding of that language is that it provides that the cost of this improvement should be assessed one-half against the abutting property owners and

adjoining property owners and one-half against the general treasury of the District, this being a matter of public improvement that will benefit the entire community.

Mr. SANDERS of Indiana. That may be the purpose of the bill, but it seems to me that the language is not very appropriate to accomplish that object, and I think the language does do what I have indicated. The report says:

The bill as it came from the Senate provided in effect that the condemnation in the matter of Fourth Street could proceed, the jury of view could fix the damages to which property owners would be entitled, and after the amount of damages had been fixed that at least one-half of the amount should be assessed by the jury as benefits accruing to the property owner. Therefore, if the property of A had been condemned in widening Fourth Street, the jury of view might fix his damages at \$1,000.

The act then provided that not less than one-half of that amount should be assessed against Mr. A as benefits, leaving open the clear inference that the jury might completely obliterate the amount of damages by an assessment of benefits, which benefits were to be fixed at not less than one-half the amount of damages.

Under the amendment proposed by the House committee, if the damages are fixed for A at \$1,000, the jury of view can not assess benefits against Mr. A at more than \$500, namely, one-half the amount of damages; but if the benefits do not reach the sum of \$500 in the case of A, the jury can not assess benefits under that amount or under an amount fixed at one-half the amount of the damages.

That seems to me to be an entirely novel proceeding. Is there any precedent for such a proceeding, by which we specifically provide that when a man's benefits and damages are equal he may be paid for it in that way?

Mr. ZIHLMAN. Mr. Chairman, I do not so construe the language of the bill. This bill simply provides that of the amount found to be due and awarded in this proceeding as damages for and in respect to the land to be condemned for widening, plus the cost and expenses of the proceedings hereunder, not more than one-half thereof shall be assessed by the jury as benefit. It was the intention of the committee to provide that the general treasury of the District should pay the other half, as we felt the cost would be excessive upon the abutting property owners. This improvement is of such a nature that it benefits that entire community. It is a large building extending out into the middle of Fourth Street in the very heart of the Takoma Park section of the District of Columbia, and it is a dangerous thing, both for motorists and pedestrians; and in a matter of such wide importance, such widespread benefit, we feel that the general treasury should bear one-half of the cost, and it is so recommended by the commissioners.

Mr. SANDERS of Indiana. In the condemnation of property in the opening of a street it is possible to affect the property owner favorably, because of the value of a street adjoining his property.

If it affects him favorably, then he is assessed benefits. It is possible also, because you take his property, that it will affect him unfavorably; and, if so, there is assessed damages in his favor. Now, he may own property which is benefited, and then he may own property which is damaged; and, under the ordinary usual course of condemnation proceedings, when such situation as that exists they offset his benefits and his damages, and that leaves him receiving nothing for it, and that leaves him to pay nothing for it. Under this bill, if I read it right, if it means anything it means A owns property which is damaged to the extent of \$1,000, and if he owns property which is benefited to the extent of \$1,000 he gets \$500 benefit as a result of the proceedings. Of course, it is a matter which I would not undertake to correct on the floor, but it seems to me a novel procedure. If the gentlemen in charge of the bill have investigated and think it is the proper way to do, I shall make no objection.

Mr. ZIHLMAN. I think this is the proper language carried in bills where the District pays one-half of the damages.

The CHAIRMAN. The time of the gentleman has expired. The question is on the committee amendment.

The question was taken, and the Chair announced the yeas appeared to have it.

On a division (demanded by Mr. ZIHLMAN) there were—ayes 32, noes 1.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 2. That there is hereby appropriated out of the revenues of the District of Columbia an amount sufficient to pay the necessary costs and expenses of the condemnation proceedings taken pursuant

hereto and for the amounts awarded as damages. The amounts assessed as benefits when collected shall be repaid to the District of Columbia and covered into the Treasury to the credit of the revenues of the District of Columbia.

Mr. ZIHLMAN. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the amendment with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CHINDBLOM, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill S. 1343, had directed him to report it back to the House with an amendment with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The bill was ordered to be read the third time, was read the third time, and passed.

On motion of Mr. ZIHLMAN, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent that the bill H. R. 6297, now on the calendar, be laid on the table.

The SPEAKER. The gentleman from Maryland asks unanimous consent that the bill H. R. 6297 be laid on the table. Is there objection? [After a pause.] The Chair hears none.

Mr. ZIHLMAN. I also make the same request in reference to H. R. 4805.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

Sundry messages in writing were received from the President of the United States, by Mr. Latta, one of his secretaries; who also informed the House of Representatives that the President had approved bills of the following titles:

On December 5:

H. R. 9559. An act making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes.

On December 6:

H. R. 9561. An act making additional appropriations for the fiscal year ending June 30, 1925, to enable the heads of the several departments and independent establishments to adjust the rates of compensation of civilian employees in certain of the field services; and

H. R. 3537. An act for the relief of L. A. Scott.

CHANGING NAME OF THIRD PLACE NE. TO ABBEY PLACE

Mr. ZIHLMAN. Mr. Speaker, I call up the bill (H. R. 8410) to change the name of Third Place NE. to Abbey Place.

The SPEAKER. The gentleman from Maryland calls up a bill, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 8410) to change the name of Third Place NE. to Abbey Place

Be it enacted, etc., That the name of the street not yet cut through, but now on record as Third Place NE., be, and the same is hereby, changed to Abbey Place, and the surveyor of the District of Columbia is hereby directed to enter such change on the records of his office.

Mr. ZIHLMAN. Mr. Speaker, I will say this bill has been approved by all the property owners on both sides of the street—that is, the change of name—and also by the District Commissioners. I will yield back the balance of the time unless somebody wants to ask me some question in reference to the bill.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. ZIHLMAN, a motion to reconsider the vote by which the bill was passed was laid on the table.

REGULATING THE PRACTICE OF ARCHITECTURE, ETC.

Mr. ZIHLMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill S. 933, a bill providing for the registration of architects in the District of Columbia.

The SPEAKER. The gentleman from Maryland moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill which the Clerk will report by title.

The Clerk read as follows:

A bill (S. 933) to provide for the examination and registration of architects and to regulate the practice of architecture in the District of Columbia.

Mr. ZIHLMAN. Mr. Speaker, pending that motion, I would like to see if we can not agree on time with the gentleman from Texas [Mr. BLANTON], the ranking member of the minority on the committee.

Mr. BLANTON. Mr. Speaker, unless some Member—

Mr. GILBERT. Mr. Speaker, I would like three minutes.

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent that debate on this bill be limited to 20 minutes, 10 minutes to be controlled by the gentleman from Texas and 10 minutes by myself.

The SPEAKER. The gentleman from Maryland asks unanimous consent that the debate be limited to 20 minutes, 10 minutes to be controlled by himself and 10 minutes by the gentleman from Texas. Is there objection? [After a pause.] The Chair hears none. The question is on the motion of the gentleman from Maryland to go into the Committee of the Whole House on the state of the Union.

The question was taken, and the motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill S. 933, with Mr. CHINDBLOM in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill S. 933, which the Clerk will report.

The Clerk read as follows:

A bill (S. 933), an act to provide for the examination and registration of architects and to regulate the practice of architecture in the District of Columbia.

Mr. ZIHLMAN. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Maryland asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. ZIHLMAN. I will ask the gentleman from Texas [Mr. BLANTON] to use some of his time.

Mr. BLANTON. Mr. Chairman, I yield to the gentleman from Kentucky [Mr. GILBERT].

The CHAIRMAN. The gentleman from Kentucky is recognized for 10 minutes.

Mr. GILBERT. Mr. Chairman and gentlemen, there is nothing vicious about this bill. I really have no objection to it, further than that it is unnecessary legislation, in my opinion.

The tendency of the day is to create boards and regulate business. Of course, in some things that is necessary. In questions of health and life, and to some extent in the practice of law, there should be boards to pass upon the qualifications of those that seek to practice, to protect the public. But I can see no reason for a great long system of red tape and regulations providing for the business of architecture. Any man who has means enough to erect a building requiring the services of an architect, of course, would not employ one without experience and without at least some qualifications and reputation. It is for the benefit of the architects and not for the benefit of the public. But while it does not seriously affect the interests of the public, I can see no reason whatever for loading down the now overloaded statute books with these additional regulations. For that reason, and that reason alone, I see no use in the passage of this bill.

I yield back the balance of my time.

Mr. ZIHLMAN. Does the gentleman from Texas yield back the balance of his time?

Mr. BLANTON. I do not care to use it, unless the gentleman from Maryland should raise some question requiring an answer.

Mr. ZIHLMAN. Mr. Chairman, I yield back my time and ask that the bill be read.

The CHAIRMAN. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That there is hereby created a board of examiners and registrars of architects, the members of which and their successors shall be appointed by the Commissioners of the District of Columbia, and said board, subject to the approval of said commissioners, shall

make rules for the examination and registration of applicants for the certificates provided for by this act.

SEC. 2. That the board shall be appointed within 90 days after the approval of this act and shall be composed of five architects who have been in active practice in the District of Columbia for not less than 10 years previous to their appointment. One member of said board shall be designated by the said commissioners as chairman pro tempore until such time as permanent organization is effected.

SEC. 3. That in making the first appointment under this act the said commissioners shall appoint one of the members of said board to hold office for a period of one year; one to hold office for a period of two years; one to hold office for a period of three years; one for four years; and one for five years; and thereafter all appointments shall be for a period of five years. In case a successor is not appointed at the expiration of the time of any member, such member shall hold office until the successor has been duly appointed and has qualified. In the event of any vacancy occurring in the membership of said board in any manner other than by expiration of time, the said commissioners shall fill said vacancy by an appointment for the unexpired term.

SEC. 4. That the members of said board of examiners shall, before entering upon the discharge of their duties, subscribe to and file with the secretary of the Board of Commissioners of the District of Columbia the constitutional oath of office.

SEC. 5. That the board of examiners and registrars of architects shall meet for organization within 30 days after its appointment and shall elect from its membership a president, a secretary, and a treasurer.

SEC. 6. That the said board shall adopt all necessary rules, regulations, and by-laws, not inconsistent with this act, to govern its times and places of meeting for organization and reorganization and the holding of examinations, the length of the terms of its officers, and all other matters requisite to the exercise of its powers, the performance of its duties, and the transaction of its business under the provisions of this act. At least two meetings shall be held each year for the purpose of examination for registration.

SEC. 7. That three members of the said board shall constitute a quorum, but no action at the meeting can be taken without at least three votes in accord.

SEC. 8. That the secretary of the said board shall keep a true record of all proceedings of the said board and may employ such clerical assistance as the said board may deem necessary.

SEC. 9. That the said board shall be charged with the duty of enforcing the provisions of this act and may incur such expenses as shall be necessary, all of which expenses shall be paid only out of the revenue arising from this act in the manner hereinafter mentioned and provided.

SEC. 10. That a roster showing the names and places of business and residences of all registered architects shall be prepared by the secretary of the board during the month of June of each year; such roster shall be printed out of the funds of the board as provided in section 11. On or before the 1st day of August each year the board shall submit to the Commissioners of the District of Columbia a report of its transactions for the preceding fiscal year, together with a complete statement of the receipts and expenditures of the board, certified by the chairman and the secretary, and a copy of the said roster of registered architects.

SEC. 11. That all fees provided for by this act shall be paid to and receipted for by the treasurer of the board of examiners and registrars of architects for the District of Columbia and shall not be used for any purpose other than the purposes of this act. The expenses of said board, subject to the approval of said board, shall be paid by him upon written order and warrant of the president and secretary of said board.

SEC. 12. That each member of the said board shall be entitled to such reasonable compensation for his services as may be approved by said board: *Provided*, That said compensation shall not exceed \$10 per diem: *And provided*, That the total amount of such compensation shall not exceed the unobligated balance remaining with the treasurer of the board on the 30th of June of each year.

SEC. 13. That the members of the said board shall be reimbursed the amount of actual expenses incurred in the performance of their duties under this act, subject to the approval of said board.

SEC. 14. That any person wishing to practice architecture in the District of Columbia under title of architect shall, before being entitled to be or be known as an architect, secure from such board a certificate of qualifications to practice under the title of architect, as provided by this act.

SEC. 15. That any person having a certificate pursuant to the requirements of this act may be styled or known as an architect or registered architect.

SEC. 16. That no person presumed to have the right to secure such certificate because of his or her use of the title architect prior to the time this act goes into effect shall assume any title indicating that he or she is an architect, or any words, letters, or figures to indicate that the person using them is an architect, unless he or she shall have qualified and obtained a certificate of registration as an architect, or unless

he or she shall have filed an affidavit establishing the fact that he or she was in practice as an architect previous to the passage of this act and has a legal right to practice without a certificate. Each member of a firm or corporation practicing architecture shall be registered before being entitled to be known as or to style themselves architects or registered architects.

SEC. 17. That nothing contained in this act shall prevent the draftsmen, students, clerks of work, superintendents, and other employees of those lawfully practicing as registered architects under the provisions of this act from acting under the instruction, control, or supervision of their employers, or to prevent the employment of superintendents of the construction, enlargement, or alteration of buildings or any appurtenance thereto, or prevent such superintendent from acting under the immediate personal supervision of the registered architect by whom the plans and specifications of any such building, enlargement, or alteration were prepared. Nor shall anything contained in this act prevent persons, engineers, mechanics, or builders from making plans, specifications for, or supervising the erection, enlargement, or alteration of buildings or any appurtenance thereto: *Provided*, That the plans and specifications for such construction are signed by the authors thereof with their true appellation, without the use in any form of the title "architect" or "architects."

SEC. 18. That a building, for the purposes of this act, is any structure consisting of foundation, floors, walls, columns, girders, and roof, or a combination of any number of these parts, with or without other parts or appurtenances.

SEC. 19. That any properly qualified person who shall have been actually engaged in the practice of architecture in the District of Columbia at the time this act takes effect may be granted a certificate of registration without examination on condition that the applicant shall submit satisfactory evidence to the said board that he is qualified to practice architecture and by payment to the board of fee for certificate of registration as prescribed in section 24 of this act: *Provided*, That nothing in this act shall prevent any person who was actually engaged in the practice of architecture under the title of architect prior to the time this act takes effect from continuing the practice of said profession without a certificate of registration and without the use in any form of the title "registered architect."

SEC. 20. That any citizen of the United States or any person who has declared his (or her) intention of becoming such citizen, being at least 20 years of age and of good moral character, may apply for a certificate of registration or for such examination as shall be requisite for such certification under this act.

SEC. 21. That the applicant shall satisfactorily pass an examination in such technical and professional subjects as shall be prescribed by the board of examiners and registrars of architects. The board may, in lieu of examination, accept satisfactory evidence of any one of the qualifications set forth under subdivisions (a) and (b) of this section.

(a) A diploma of graduation or satisfactory certificate from an architectural college or school that he or she has completed a technical course approved by the board, together with and subsequent thereto of at least three years satisfactory experience in the office or offices of a reputable architect or architects.

The board may require applicants under this subdivision to furnish satisfactory evidence of knowledge of professional practice.

(b) Registration or certification as an architect in another State or country, where the qualifications prescribed at the time of such registration or certification were equal to those prescribed in this District at date of application, and where such State, Territory, or foreign country accepts in like manner the registration of architects in the District of Columbia.

SEC. 22. That an architect who has lawfully practiced architecture for a period of more than 10 years outside of the District of Columbia shall, except as otherwise provided in subdivision (b) of section 22, be required to take only a practical examination, the nature of which shall be prescribed by the board of examiners and registrars of architects.

SEC. 23. That the fees to be paid to the treasurer of the board of examiners and registrars of architects shall be fixed by said board from time to time and shall not exceed in amount the several fees provided for in this section.

The fee to be paid by an applicant for a certificate of registration as a registered architect shall be \$10.

The fee to be paid by an applicant who has been granted a certificate of registration as a registered architect by the board shall be not in excess of \$12, such fee to be prorated on a monthly basis from time of granting of application to the 30th day of the following April.

The fee to be paid upon renewal of a certificate of registration shall be not in excess of \$15.

The fee to be paid for the restoration of an expired certificate of registration shall be not in excess of \$20.

SEC. 24. That all examination papers and other evidences of qualification submitted by each applicant shall be filed with the board

of examiners and registrars of architects, and said board shall keep a record of its proceeding relating to the issuance, refusal, renewal, suspension, and revocation of certificates of registration.

The record shall also contain the name, known place of business and residence, and the date and number of the certificate of registration of every registered architect entitled to practice his profession in the District of Columbia.

Every person granted such certificate shall have the same recorded with the Commissioners of the District of Columbia.

Sec. 25. That every registered architect in the District of Columbia, to continue the practice of his profession, shall annually, during the month of May, renew his certificate of registration and pay the renewal fee required by section 24 of this act.

A person who fails to renew his certificate of registration during the month of May in each year may not thereafter renew his certificate except upon payment of the fee required by section 24 of this act for the restoration of an expired certificate of registration.

Every renewal certificate shall expire on the 30th day of April following the issuance.

Sec. 26. Exemptions: That the following shall be exempted from the provisions of this act:

(1) Practice as an architect in the District of Columbia by any person not a resident of and having no established place of business in the District of Columbia, or any person resident in the District of Columbia but whose arrival in the District of Columbia is recent: *Provided, however*, That such person shall have filed an application for registration as an architect and shall have paid the fee provided for in section 24 of this act. Such exemption shall continue for only such reasonable time as the board requires in which to consider and grant or deny the said application for registration.

(2) Engaging in architectural work as an employee of a registered architect, or as an employee of an architect or an engineer authorized by paragraphs 1 and 2 of this section: *Provided*, That said work may not include responsible charge of design or supervision.

(3) Practice of architecture by any person not a resident of and having no established place of business in the District of Columbia as a consulting associate of an architect registered under the provisions of this act: *Provided*, That the nonresident is qualified for such professional service in his own State or country.

(4) Practice of architecture solely as an officer or as an employee of the United States.

(5) Practice of architecture solely as an officer or as an employee of the District of Columbia at the time this act becomes effective and thereafter only until the expiration of the then existing term of office of such employee.

Sec. 27. Revocation of certificates: That the board of examiners and registrars of architects may revoke any certificate after 30 days' notice, with grant of hearings to the holder hereof, if proof satisfactory to the board be presented in the following cases:

(a) In case it is shown that the certificate was obtained through fraud or misrepresentation.

(b) In case the holder of the certificate has been found guilty by said board or by a court of justice of any fraud or deceit in his professional practice or has been convicted of a felony by a court of justice.

(c) In case the holder of the certificate has been found guilty by said board of gross incompetency or of recklessness in the planning or construction of buildings.

Sec. 28. That proceedings for the annulment of registration (that is, the revocation of a certificate) shall be begun by filing written charges against the accused with the board of examiners and registrars of architects. A time and place for the hearing of the charges shall be fixed by the board. Where personal service or services through counsel can not be effected service may be made by publication. At the hearing the accused shall have the right to be represented by counsel, to introduce evidence, and to examine and cross-examine witnesses. The secretary of the board is hereby empowered to administer oath, and the board shall make a written report of its findings, which report shall be filed with the Commissioners of the District of Columbia, and which shall be conclusive.

Sec. 29. That every person who was making use of the title of architect in the District of Columbia before the going into effect of this act shall, within one year after the going into effect of this act, record his name with the proof of his use of such title with the board of examiners and registrars of architects, such recording not to be interpreted as evidence of competency or ability unless applicant applies for and is granted a certificate of registration. Failure to record within such period the prior use of such title shall bar the said person from thereafter claiming registration under the provisions of section 20 of this act.

Sec. 30. That on and after the passage of this act the use of the title architect or registered architect, or the use of any other word, any letters or figures indicated or intended to imply that the person using the same is an architect or registered architect, without compliance with the provisions of this act, the making of any willfully false oath or affirmation in any matter or proceeding where an oath or affirmation is

required by this act, shall be deemed a misdemeanor punishable with a fine of not more than \$200 or imprisonment for not more than one year, or both:

Sec. 31. That all laws or parts of laws in conflict with the provisions of this act are hereby repealed.

Sec. 32. That this act shall become effective immediately on its becoming a law.

Mr. ZIHLMAN. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the recommendation that it pass.

The CHAIRMAN. The gentleman from Maryland moves that the committee do now rise and report the bill back to the House with the recommendation that it pass. The question is on that motion.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CHINDBLOM, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill (S. 933) to provide for the examination and registration of architects and to regulate the practice of architecture in the District of Columbia, had directed him to report the same back to the House with the recommendation that it be passed.

The SPEAKER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. ZIHLMAN, a motion to reconsider the vote whereby the bill was passed was laid on the table.

DEPUTY CORONERS

Mr. ZIHLMAN. -Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 3220) to provide for the appointment of an additional deputy coroner.

The SPEAKER. The gentleman from Maryland moves that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 3220, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 3220) to amend section 196 of the Code of Law for the District of Columbia.

Mr. BLANTON. Mr. Speaker, the gentleman from Maryland is going a little beyond his program. Members of the committee had presented to them the program for the day of business that the committee would call up. We have been prepared to meet those bills, either to help the committee pass them, or to pass some of them. This bill which the gentleman is seeking to call up is not on that program at all. I have no objection to the bill, but there may be other Members here who will object to it; I do not know.

Mr. ZIHLMAN. I will state to the gentleman that this is the only bill—

Mr. BLANTON. That you will go out of the program with?

Mr. ZIHLMAN. Yes; so far as I am able to report, because the Members who made reports on the other bills are not here.

The SPEAKER. The question is on agreeing to the motion of the gentleman from Maryland.

The motion was agreed to.

The SPEAKER. The gentleman from Illinois [Mr. CHINDBLOM] will please take the chair.

Thereupon the House resolved itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 3220) to amend section 196 of the Code of Law for the District of Columbia, with Mr. CHINDBLOM in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill, which the Clerk will report.

The Clerk read as follows:

Be it enacted, etc., That section 196 of the Code of Law for the District of Columbia be, and the same is hereby, amended by striking out said section and inserting in lieu thereof the following:

"Sec. 196. Deputy coroners: The Commissioners of said District shall have authority to appoint two deputy coroners, who shall assist the coroner in the performance of his duties aforesaid, and shall perform the same duties in case of the absence or disability of the coroner. The deputy coroners shall serve and receive pay only in case of the absence or disability of the coroner, and when serving, their duties shall be the same as the aforesaid duties of the coroner. The deputy coroners shall, while acting, receive compensation at a rate not exceeding \$5 per day, to be paid as other expenses of said District, and each shall give bond in the penalty of \$2,500, with security

to be approved by the said Supreme Court, conditioned for the due performance of his duties."

Mr. ZIHLMAN. Mr. Chairman, I will state for the information of the House that the existing law provides for a coroner at \$1,800 a year and one deputy coroner, who shall receive \$5 a day for such days as he is assigned to duty by the coroner.

This bill simply is to provide for the appointment of two deputy coroners. The coroner states that it is necessary for him to have two assistants. It will be no additional charge to the District treasury, and the committee feels that the coroner should be given the extra assistant asked for in this bill.

Mr. BANKHEAD. Mr. Chairman, as I heard the reading of the bill, it provides that the deputy coroner shall be qualified to act only in the absence of the coroner. That is the way the bill reads.

Mr. ZIHLMAN. This bill is a copy of the existing law, which provides for two deputy coroners instead of one assistant.

Mr. BANKHEAD. What was the necessity presented to the committee for the establishment of this position? You have only one deputy, and he can act only in the absence of the chief. Why need a second deputy?

Mr. ZIHLMAN. This is a quotation from the commissioners' letter to the committee:

That at times both he and the deputy coroner are unable to perform all of the duties required of them by law and that there is a necessity for the appointment of a second deputy coroner, as proposed by this bill.

He receives a salary of only \$5 a day when he is assigned to duty. I remember that last year, when they brought this matter to my attention, they said the deputy coroner was out of the city, and under the law the coroner was not authorized to appoint some one to serve.

Mr. BLANTON. Mr. Chairman, I ask recognition.

The CHAIRMAN. The gentleman is recognized for one hour.

Mr. ZIHLMAN. Mr. Chairman, I reserve the balance of my time.

Mr. BLANTON. Mr. Chairman, I shall not take up more than three minutes. There are two fundamental and underlying reasons for this bill, I want to state to the gentleman from Alabama [Mr. BANKHEAD]. The first is this: For a long while here in Washington in the various bureaus and departments the chief only was not expected to do any work and was not expected to be at his desk more than a very short time each day, his assistant being expected to do all the work. Time has gone along until the assistants think that some privileges, such as their chiefs enjoy, ought to be accorded them by Congress. They think they are not shown enough consideration; they think they ought to be able to be idle and away from their offices, just as their chiefs are, whenever they want to and have some one else do their work for them, and the practice has grown up in the bureaus and in the departments until now it is the second assistant who really does the work, the first assistant and the chief being absent a great deal of the time. If you do not think that practice has grown up, you just pick out some chief of bureau to-morrow morning and ring him up and see if you can find him. Ring him up about 11 o'clock or about 2 or 3 o'clock and see if you can find him. Then when he is reported out, ask for his first assistant, and it will be very strange indeed if you find him in. It is the second assistant who is there attending to business. Now, the coroner has found this out and his assistant has found it out, and they think the same consideration ought to be accorded them as Congress has accorded to the other bureaus and departments, so they now ask for a second assistant coroner to do their work when a man is killed. That is the first reason for the bill.

The second reason is that there are so many people being killed now on the streets of Washington by automobiles that if any investigation is to be made they need a second assistant coroner to do it, since it is beneath the dignity of a chief or a first assistant to perform any real labor.

At the request of certain citizens I spent some time this morning standing and watching along New Jersey Avenue at the junction of the streets from D Street, on down to Massachusetts Avenue. I spent some time watching those taxicabs go to the depot. You go down there as I did and watch for a few minutes and see the main danger that is on the streets of Washington every day and obstructing traffic. It is mainly the White and Black taxis, and the other taxis as well, but mostly the White and Black taxis. Stand there, as I did, and watch how they fail to observe the traffic laws. I saw a car this morning which, in order to prevent a taxicab from running over it—although it had the right of way—skid over that

wet pavement into the sidewalk and had its back bumper broken off because of the contact. If it had not thrown on the brakes, which caused it to skid, but had attempted to exercise its right of way and cross that street the taxicab would have demolished it. That ought to stop.

Because of the many accidents we may need another deputy coroner, so I did not raise any opposition to the bill, and I know of no opposition to it; so we will let him have another assistant if that will help stop these accidents.

Mr. BANKHEAD. Was the gentleman convinced, by the testimony presented to the committee, that this additional assistant coroner, under the new economy administration, is justified?

Mr. BLANTON. No; I was not; but it was just one office, and as there were bills to come up to-day that did not involve just one salary, but hundreds of thousands of dollars, I thought it best to use my time and my energy in fighting the big bills and letting these little bills pass. That is the reason I did not object to it.

Mr. DENISON. May I ask the gentleman a question?

Mr. BLANTON. Yes.

Mr. DENISON. This deputy coroner, or assistant, does not receive any pay, does he, unless he is on duty performing his work?

Mr. BLANTON. He does whenever he is designated by the coroner. The other one, the second one we are now providing, will receive pay at the rate of \$5 a day every time he is designated. He may be designated on one death and his investigation may last for several days, or a week, or several weeks, as the gentleman knows, and for every day he claims to be engaged on that work, of course, he will be paid at the rate of \$5 a day.

Mr. DENISON. The assistant deputy coroner will not gain anything by assigning the work to another man, because if he does that then he does not get any pay himself.

Mr. BLANTON. Both of them might be assigned to the same case and one of them do the work. They could be assigned to the same case and one do the work and the other play golf, or do something else.

The bill was read for amendment.

Mr. ZIHLMAN. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the recommendation that the bill do pass.

The motion was agreed to.

Accordingly, the Speaker having resumed the chair, Mr. CHINDBLOM, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 3220 and had directed him to report the same back to the House with the recommendation that it do pass.

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent at this time to substitute a similar Senate bill, S. 116.

The SPEAKER. The gentleman from Maryland asks unanimous consent that a similar Senate bill be substituted. Is there objection?

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. ZIHLMAN, a motion to reconsider the vote by which the bill was passed was laid on the table.

The SPEAKER. Without objection, the bill H. R. 3220 will be laid on the table.

There was no objection.

LINCOLN'S BIRTHDAY

Mr. ZIHLMAN. Mr. Speaker, I call up the bill (H. R. 20) to declare Lincoln's birthday a legal holiday.

The SPEAKER. The gentleman from Maryland calls up a bill which the Clerk will report.

The Clerk read the title of the bill.

Mr. ZIHLMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 20) to declare Lincoln's birthday a legal holiday; and, pending that motion, I would like to ask the gentleman from Texas [Mr. BLANTON] if we can agree upon some division of time.

Mr. BLANTON. I will state to the gentleman from Maryland that he is familiar with this bill and knows that the enacting clause was stricken out in the last Congress.

Mr. ZIHLMAN. Not in the last Congress.

Mr. BLANTON. In 1922 the enacting clause was stricken out at the instance of Mr. James R. Mann.

There is quite a lot of opposition on both sides of the aisle to this bill, and I have requests for a great deal of time, and I suggest to the gentleman that there be an hour and fifteen

minutes given to each side. I think we can get along quicker in that way than any other.

The SPEAKER. The gentleman from Maryland moves that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 20) to declare Lincoln's birthday a legal holiday, and pending that asks unanimous consent that the time for general debate be limited to 2 hours and 30 minutes, 1 hour and 15 minutes to be controlled by himself and 1 hour and 15 minutes by the gentleman from Texas [Mr. BLANTON]. Is there objection?

There was no objection.

The motion of Mr. ZIHLMAN was then agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. CHINDBLOM in the chair.

The CHAIRMAN. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the 12th day of February in each year, being the anniversary of the birth of Abraham Lincoln, is hereby made a legal holiday within the District of Columbia, to be known as Lincoln day, and in its observance and effect it shall be subject to all the provisions of law applicable to holidays within said District.

The CHAIRMAN. By order of the House, debate is limited to 2 hours and 30 minutes, one-half to be controlled by the gentleman from Maryland [Mr. ZIHLMAN] and one-half by the gentleman from Texas [Mr. BLANTON]. The gentleman from Maryland is recognized for 1 hour and 15 minutes.

Mr. ZIHLMAN. Mr. Chairman, I wish the Chair would notify me when I have consumed 10 minutes.

Mr. Chairman and gentlemen of the committee, this bill has been reported by a majority of the membership of the District of Columbia Committee. The gentleman from Texas [Mr. BLANTON] has filed minority views on the bill.

This bill is offered here in pursuance of a resolution adopted by the Grand Army of the Republic at their fifty-seventh national encampment at Milwaukee, Wis., on the 7th day of September, 1923. I wish to insert the resolution adopted there without reading it.

The resolution is as follows:

Whereas the Department of the Potomac, Grand Army of the Republic, has on several occasions adopted resolutions requesting the Congress of the United States to declare Lincoln's birthday anniversary to be a legal holiday in the District of Columbia in the same manner as Washington's Birthday anniversary has been made a legal holiday in said District: Therefore

Resolved, That we, the members of the Fifty-seventh National Encampment of the Grand Army of the Republic, in regular session assembled, this 7th day of September, 1923, in the city of Milwaukee, Wis., believing that the time has arrived when the memory of Abraham Lincoln, the chief of the preservers of the Union of States, should be honored in the same exalted degree as the memory of Washington, the chief of the founders of that Union, earnestly and in full agreement, join with the Department of the Potomac in urging Congress to make the anniversary of the birth of Lincoln a legal holiday in the District of Columbia, where he rendered service of inestimable value to our country and the entire world, and died a blessed martyr to that righteous cause for which 512,000 of our comrades in arms during the Civil War "gave the last full measure of devotion."

Mr. ZIHLMAN. The legislatures of 28 States of the Union have passed laws making Lincoln's birthday a legal holiday in the respective States. Those States are California, Colorado, Connecticut, Delaware, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, New Jersey, New York, North Dakota, New Mexico, Ohio, Oregon, Pennsylvania, South Dakota, Utah, Washington, West Virginia, Wisconsin, and Wyoming. The population of those States is more than 70 per cent of the population of the Federal Union.

The only argument I have heard advanced as to why this bill should not become law is that there are enough holidays in the District of Columbia and that the employees of the Federal Government would simply be granted another day of rest or another holiday, and that there are enough holidays in the District of Columbia now.

Another argument that was advanced when the bill was considered in the Sixty-sixth Congress was that Lincoln's name, his fame, and his greatness, will live without making his birthday a legal holiday in the District of Columbia.

Mr. TINCHER. Will the gentleman yield?

Mr. ZIHLMAN. Yes.

Mr. TINCHER. The gentleman says the only argument he has every heard against this bill has been the statement

that it provides for too many holidays. Did the gentleman hear the argument of the late Mr. Mann, a Member of this House, against the bill when it was up before?

Mr. ZIHLMAN. I heard, I think, a part of his address. I can not say I heard it all.

Mr. TINCHER. And did the gentleman hear the speech made by Uncle Joe Cannon, who served for some little time in this House, against the passage of this bill?

Mr. ZIHLMAN. I heard that address. I was coming to that point, I will say to the gentleman from Kansas. I have just stated the other argument. I was recounting the arguments as I remember them, and one of them was that Lincoln's greatness and his fame were so far above anything we could do to honor him that it was not necessary to pass a bill making this day a legal holiday.

Mr. TINCHER. Is there anything to this bill save and except to provide another legal holiday for the employees of the Government in the District of Columbia? In other words, it will not add anything to the fame of Lincoln to give them this holiday here in the District, will it?

Mr. ZIHLMAN. I do not agree with the gentleman or I would not be advocating the bill.

In the first place, I think it is very unfair to simply assume that this bill, which is presented here and which has been advocated by the Grand Army of the Republic for a number of years, is to be opposed solely on the ground that it will give deserving employees of the District of Columbia who are Federal employees another holiday.

Mr. TINCHER. That was the argument of Mr. Cannon and Mr. Mann—that it could not add anything to the fame of Lincoln, was it not?

Mr. ZIHLMAN. Yes.

Mr. TINCHER. And the only effect it would have would be to provide one more holiday in the District of Columbia. Mr. Mann even went to the extent of figuring the exact cost there would be on the Federal Government to provide this holiday here in the District.

Mr. ZIHLMAN. Yes; I remember that the late Mr. Mann made a very strong speech in opposition to the bill.

Mr. MOORE of Virginia. Will the gentleman yield?

Mr. ZIHLMAN. Certainly.

Mr. MOORE of Virginia. Is the gentleman able to tell us how many legal holidays now obtain in the District of Columbia?

Mr. ZIHLMAN. I can not tell the gentleman accurately. I admit that I should have had that information, but I relied on the gentleman who wrote the report and he is not present. Probably the gentleman from Texas will furnish that information.

Mr. BLANTON. I will give the facts.

Mr. ZIHLMAN. Mr. Chairman, while I agree with the position taken by some of my distinguished colleagues as to the greatness of Abraham Lincoln, whose name is like a benediction to the American people and whose memory is immortalized in this Republic, I still feel that here in the Capital of the Nation he served, in the city in which he was assassinated, the city in which he labored to preserve the Federal Union, the city in which he delivered his second inaugural address, almost his last public utterance, in the front of this very building, at a time when the dark clouds of war seemed to be passing away and the sun of peace was appearing above the horizon, when he made his plea for a just and lasting peace with ourselves and all nations—that we should in further honor of his life and services make his birthday a legal holiday in the District of Columbia. I fail to see how we could more honor him than by this fitting tribute in this Congress, in the last short session, than to make the day on which he was born a legal holiday.

Twenty-eight great States of the Nation have made his birthday a legal holiday. Here in Washington, the city in which he served, and gave his life to the Republic, I feel that we should follow the example set by those various States of the Nation and adopt and follow the purpose of the resolution adopted by the Grand Army of the Republic.

Mr. McKEOWN. Will the gentleman yield?

Mr. ZIHLMAN. I will.

Mr. McKEOWN. This would not be a legal holiday for Government employees outside the District of Columbia.

Mr. ZIHLMAN. Congress, as I understand it, can not legislate for States as to legal holidays.

Mr. McKEOWN. Does the gentleman think it is fair to other employees in various parts of the United States where this law would not prevail to give the employees in the District an additional holiday?

Mr. ZIEHLMAN. The majority of the States, representing 70 per cent of the population of the country, have already made Lincoln's birthday a legal holiday.

Mr. CLARKE of New York. If the gentleman will yield, how many holidays are there in the District of Columbia now?

Mr. ZIEHLMAN. The gentleman from Texas will no doubt give all that information. I will confess that I did not know that the gentleman who reported the bill was not to be here.

Mr. CLARKE of New York. As I understand, a majority of the committee reported the bill.

Mr. ZIEHLMAN. The majority of the committee have agreed to the report on the bill. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN (Mr. PURNELL). The gentleman has used 10 minutes.

Mr. BLANTON. Mr. Chairman, there are approximately 70,000 employees in the District of Columbia. Aside from giving them another idle day added to the great number they already enjoy each year by law, the passage of this bill would immediately require the Appropriations Committee and the legislative committees to place on the pay rolls of the Government at least 256 extra employees to do the work which is lost by reason of this additional idle day.

I am sorry that I can not agree with the committee favorably reporting this bill. It was thoroughly debated in the Sixty-seventh Congress, and on February 13, 1922, by a very decided vote the House struck out its enacting clause by a vote of 162 against the bill, while only 89 Members were in favor of the bill, and at the time such vote was taken there were 170 more Republican Members than Democrats. Hence there was nothing partisan in the vote.

Just as I said then in that debate I now repeat, that if the immortal Lincoln were present to-day he would state without hesitation that the greatest curse of this Nation at the present hour is idleness and a want of full production. It is a failure on the part of Americans to produce to the limit of their possibilities, and Lincoln would tell us that it is the duty of every American to produce to the maximum of his abilities and opportunities.

I will join my colleagues in every proper method consistent with the cardinal principles of his life to do all honor possible to the undying memory of this great man. But what can we do now to honor Lincoln? Provide another gala picnic day for carousal? Abolish all of the accustomed ceremonial exercises which for nearly half a century have been observed throughout this city in all the departments of Government? Abolish such accustomed exercises in all of our public schools where for the education of the rising generation opportunity is afforded for his many virtues to be extolled? Are we thus to honor him? Are we to honor him by closing down all these accustomed exercises and saying to the 437,000 people in Washington, go forth to the innumerable pleasure resorts on this momentous day and be gay in utter abandon. If this is the way we are to honor Lincoln, the uninformed rising generation will soon forget him.

The martyred Lincoln gave his life for his country on April 15, 1865. Our District Committee is asking the Congress to convict itself of continued dereliction of duty for the past 59 years, for if passing this bill would honor Lincoln the honor should have been conferred a half century ago, and every Congress for over 50 years has been recreant in its duty.

A measure to do honor to the memory of a man should be consistent with the character and life of the man, and all of us know that Lincoln was an indefatigable worker, a man who believed in effort, a man who believed in accomplishment, a man who hated idleness.

LIST OF NUMEROUS NONWORK DAYS STAGGERING NOW

Have you ever thought of just how many nonwork days out of the 365 there are already upon which our Government employees here in Washington do not work each year? With a few exceptions, they all have the 52 Sundays each year away from work; then they have 30 full workdays' vacation each year on full pay; that is, these 30 days' vacation does not count any Sunday or regular holiday in it, but must be 30 full workdays' vacation; then they are allowed 30 workdays' sick leave on doctor's certificate that they were unable to work, with no salary deduction for such absence; and section 1339 of the Code of Law for the District of Columbia provides the following special holidays: January 1, called New Year; February 22, which is Washington's Birthday; May 30, which is Decoration Day; September 1, which is Labor Day; and December 25, which is Christmas; then after 12 o'clock noon on every Saturday during the months of July, August, and September is allowed as a holiday; then each Thanksgiving Day;

then each Inauguration Day; then a half day before each Christmas; and all special occasions of celebration are observed by the departments turning out. And every holiday, or nonwork day, costs the Government quite a huge sum, for the loss of work of such day by its many thousands of employees must be made up, which necessitates the employing of a corresponding additional number of employees to make up the work to be lost by each holiday. In the history that is to follow of our great Republic, which is stable and permanent in its structure, we may expect many great men, none of whom would feel honored by the thought that we would revere their memory through a day of idleness devoted to pleasures and fancy. Under our law whenever any regular holiday comes on Sunday the succeeding day is observed, so that no holidays are ever lost. Our God, whom Lincoln worshiped, said, "Six days shalt thou labor," and that divine admonition meant maximum production during six days of each week of seven.

If by passing this bill it would cause the 437,000 people here to more reverently observe February 12 in some way that would do real honor to this great American, I would favor it. But its passage would merely shut down all business, close up all schools, and send 437,000 people hurrying off to various places of pleasure, to dissipate another joy day, soon forgetting in whose honor it was intended. There is more honor done Lincoln's memory by Members of Congress regularly assembling here in this House each year, listening to the earnest dissertations on his unselfish life and lovable character, than there would be in selfishly enjoying the pleasures of another idle day. Ah, the real reverence, after all, is within our breasts.

President Lincoln was a frugal man. He abhorred the useless. In our feeble efforts to do him honor many of his portraits adorn the walls of our public buildings. Many valuable busts have been set on pedestals. His likenesses have been preserved in bronze and marble, adding solemn and dignified attractiveness to many of our parks. Lincoln Park, with its descriptive monument, beautifies East Capitol Street, leading thence direct to the main steps of the Capitol itself, where Presidents are inaugurated. And the magnificent marble Lincoln Memorial, with its wonderful reflecting pools, the like of which has never before memorialized mortal man, comes nearer doing fitting honor to this great American. A bawdy, sordid, selfish, idle, pleasure-seeking, pleasure-absorbing holiday will tend merely to cheapen all that has been done to honor heretofore.

Some Members may imagine that to oppose this bill will cause criticism, or a charge against them of a want of appreciation of Lincoln. Such a choosing of the path of least resistance would evidence moral cowardice, something that Lincoln detested. Why, at a time when it appeared that I was the only man opposing this measure in the Sixty-seventh Congress, when it came up in the House for passage on February 13, 1922, our former distinguished colleague, the Hon. James R. Mann, of Illinois, who loved Lincoln, who loved his country, who was a statesman, and who for years worked indefatigably in the House of Representatives, dying in harness, came to my rescue, and prevented this bill from passing.

At the crucial moment the distinguished gentleman from Illinois, Mr. Mann, took the floor, and defeated the bill by an overwhelming vote. Let me quote from the Record just what he said:

Mr. MANN. Mr. Chairman, I was a young boy when Lincoln was President. My father was in the Army—had been. I remember us distinctly as though it were yesterday the man who came riding up fast on horseback to our farm to inform my father that Lincoln had been assassinated. I remember the grief and the tears and the sorrow of our family at that time. I come from the State which gave Lincoln to the country. I come from the city where Lincoln was first nominated for the Presidency. I have the utmost reverence for his memory and admiration for his character. I was largely instrumental in this House in securing provision for the erection of the Lincoln Memorial over here to the west, which I think is the most beautiful structure in all the world. I remember in discussing the question before the House, in urging the House to provide for a memorial in the District, instead of a roadway between here and Gettysburg, that I suggested to the House that I could see in my mind's eye in the not distant future the Capitol Building representing the country and just to the west the beautiful Grant Memorial, and farther on the Mall, until you came to the great Washington Monument, and beyond that I could see, I thought, a beautiful Lincoln Memorial structure, with its reflection in the water which would be there, and still on beyond I could see a bridge across the Potomac River which could connect us with the resting place of the Army and Navy, Arlington Cemetery. [Applause.] I said that I could go further. I said that I could see, I thought, a road going still farther and reaching

to Richmond, Va., and at the other end of that road I could see, if I lived, a statue of the beloved of the South, Jefferson Davis. In complete feeling of reconciliation between the North and the South. [Applause.] I was taken to task for making those remarks by some of the dear old Grand Army of the Republic men in my district, who did me the honor in the moment of resentment to withdraw my honorary membership in one of the posts. There is nothing they could do to me which would affect my love or veneration for them, and they are all my friends now, but that of itself showed that there was not yet a complete wiping out of the hatred of the Civil War. I am in favor of wiping out as fast as it is humanly possible all of the soreness and hatred caused by the Civil War.

But, Mr. Chairman, although I come from Lincoln's State, although I revere his memory and character, I can not believe that a bill like this before us will in the slightest degree enhance the value of the memory of Lincoln to anyone in America or elsewhere.

We have New Year's Day, generally observed; business places usually close. We have Memorial Day; business usually closed; people go to the ball games and elsewhere. We have the Fourth of July; business usually closed. We have Labor Day; business usually closed. We have Thanksgiving Day; business usually closed. We have Christmas Day; business usually closed. We have another holiday generally throughout the country in most of the States, February 12, when business is not closed. The banks close and the stock exchanges close. The Government offices may close in some places, but business is not closed. We have February 22; business is not closed on that day generally throughout the country. The banks close; they have to under the law. The stock exchanges close because the banks close. The people observe those days to a very large extent now, not because there is any legal holiday, and the only purpose that I can see for making a legal holiday of Lincoln's birthday in the District of Columbia is while business outside the District of Columbia on Lincoln's birthday does not close, generally in the District of Columbia all the public offices will close and the stores will keep open. That is the purpose of it, and to the reverence of Lincoln—not at all. We have a good many holidays. It is proposed by some gentlemen to make Armistice Day a holiday. It may be done. There are a great many men who have been distinguished enough in the country, if it becomes a habit, to make their birthdays holidays. It will not benefit them. It does not add anything to the reverence of the people. There is absolutely no occasion for it, except some gentlemen of the District of Columbia who would like to be let out of work another day in the year organized the propaganda to have another legal holiday. When they get that they will have another one they want. I think it is time to stop the misuse of the name of Lincoln to steal things out for private interest. [Applause.]

That was the language of the late lamented, able, distinguished James R. Mann, of Illinois, which I have read verbatim from the CONGRESSIONAL RECORD of February 13, 1922. Has anything happened since that date to change the situation? Are not the conditions now just the same as they were on February 13, 1922? When the debate upon this bill was concluded in the Committee of the Whole House on the state of the Union its enacting clause was stricken out by the committee, as is shown by the Record, and it was upon the motion of the Hon. James R. Mann, of Illinois, that the enacting clause was stricken out. I want to read now the names of the Members, including the names of the distinguished Republican Congressmen, who backed Mr. James R. Mann—men who loved Lincoln, embracing men who stand high in the councils of the Republican Party. The following Congressmen voted to strike the enacting clause out of the bill:

Anthony, Aswell, Bacharach, Beck, Begg, Bell, Black, Bland of Virginia, Blanton, Boles, Browne of Wisconsin, Bowling, Box, Brand, Briggs, Buchanan, Bulwinkle, Byrnes of South Carolina, Byrns of Tennessee, Burdick, Burtness, Cannon of Illinois, Christopherson, Clouse, Clague, Clark of Florida, Cole of Iowa, Collins, Connally of Texas, Connell, Cooper of Wisconsin, Copley, Coughlin, Cramton, Crisp, Cullen, Curry, Dale, Davis of Tennessee, Dempsey, Dickinson, Dominick, Doughton, Drane, Dunbar, Elliott, Ellis, Evans, Fairfield, Free, Freeman, French, Fulmer, Funk, Garner, Garrett of Tennessee, Gensman, Glynn, Graham of Illinois, Greene of Massachusetts, Hammer, Hardy of Colorado, Hardy of Texas, Hersey, Hicks, Hoch, Huddleston, Hudspeth, Jacoway, Jeffers of Alabama, Johnson of Mississippi, Johnson of Washington, Jones of Pennsylvania, Jones of Texas, Kincheloe, King, Kirkpatrick, Knutson, Latham, Larsen of Georgia, Layton, Lea of California, Lee of Georgia, Lehlbach, Lenthicum, Logan, Lowrey, Luce, Lushing, Lyon, McClintic, McCormick, McDuffie, McFadden, McPherson, MacGregor, Mann, Merritt, Michener, Moore of Virginia, Moores of Indiana, Mott, A. P. Nelson, Newton of Minnesota, Oldfield, Overstreet, Padgett, Park of Georgia, Parks of Arkansas, Pon, Pringley, Quin, Radcliffe, Raker, Ramseyer, Rankin, Rayburn, Reavis, Reece, Rogers, Rouse, Rucker, Sanders of Indiana, San-

ders of New York, Sanders of Texas, Sandlin, Scott of Michigan, Scott of Tennessee, Sears, Shelton, Shreve, Sisson, Snell, Steagall, Stedman, Stephens, Stevenson, Stoll, Strong of Kansas, Summers of Washington, Summers of Texas, Swank, Taylor of Arkansas, Temple, Tillman, Tincher, Tyson, Vestal, Volstead, Walsh, Ward of North Carolina, Wason, Weaver, Webster, White of Maine, Williamson, Wilson, Wingo, Wood of Indiana, Woodyard, and Wyant, making a total of 162 votes in favor of killing the bill.

And there were only 89 votes for the bill against striking out its enacting clause.

Mr. KING. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. KING. I failed to note whether the gentleman's name was on that list.

Mr. BLANTON. Yes; my name is on the list of those who voted to strike out the enacting clause. I followed the distinguished James R. Mann many times on this floor in sound positions he took for the whole people, for he was a great leader. When he advocated sound measures I followed him, and I am a pretty good Democrat, having been so all my life, but that did not keep me from following him when he was right.

Mr. FAIRCHILD. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. FAIRCHILD. Did I understand the gentleman to say that he is reading the names of those who voted against making Lincoln's birthday a legal holiday?

Mr. BLANTON. Yes; the names of those who followed James R. Mann and Uncle Joe Cannon on the motion to strike out the enacting clause.

Mr. FAIRCHILD. And you read the name of FAIRCHILD?

Mr. BLANTON. I am reading what the RECORD shows.

Mr. FAIRCHILD. Read it again.

Mr. BLANTON. FAIRCHILD.

Mr. FAIRCHILD. Is the gentleman reading the nays?

Mr. BLANTON. No; the yeas, to strike out the enacting clause.

Mr. FAIRCHILD. The name of FAIRCHILD is not among the yeas. Read it again; it is FAIRFIELD.

Mr. BLANTON. Oh, I beg the gentleman's pardon; it is FAIRFIELD. I made a mistake in calling it FAIRCHILD. It is plainly FAIRFIELD.

Mr. FAIRCHILD. I wanted the gentleman to correct that, because FAIRCHILD was for the bill at that time as he is at this time.

Mr. BLANTON. I shall have to use my glasses, I see that, but the similarity of name caused the mistake. However, there is no other mistake as to the other names I have read. The enacting clause was thus stricken out by the House of Representatives on the 13th day of February, 1922, by a vote of 162 to kill the bill to only 89 for the bill. And the preceding day was Sunday, February 12, Lincoln's birthday. Yet the bill was thus killed by this big majority, right on the day following Lincoln's birthday, with all of the sentiment permeating the atmosphere of the House floor at that time.

Mr. FAIRCHILD. Mr. Chairman, will the gentleman yield again?

Mr. BLANTON. Yes.

Mr. FAIRCHILD. Of course, I have a personal interest in this just now, but will the gentleman please state that Mr. FAIRCHILD at that time voted in favor of making Lincoln's birthday a holiday?

Mr. BLANTON. Yes; Mr. FAIRCHILD was one of the "nays" who voted against striking out the enacting clause with the 89. As I have said, at that very time there were on the rolls of this House 302 Republican Members and only 132 Democrats, evidencing that there was no partisanship in the matter whatever. You find voting to kill the bill such strong, orthodox, life-long Republicans as Uncle Joe Cannon, Greene of Massachusetts, Hersey of Maine, Doctor Layton of Delaware, Doctor Temple of Pennsylvania, James R. Mann, Will Wood and Moores of Indiana, Graham of Illinois, Anthony, Hoch, Strong, and Tincher of Kansas, Sanders of Indiana, Vestal, the present Republican whip, Snell, the present chairman of the Committee on Rules, Luce and Joe Walsh of Massachusetts, Lehlbach of New Jersey, White of Maine, Rogers of Massachusetts, Jim Begg, of Ohio, Cooper of Wisconsin, Newton of Minnesota, and many others of equal prominence whose love, respect, and loyalty for Lincoln can not be questioned.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. WINGO. Do I understand that the gentleman regards all of the names in the list he has just read as orthodox Republicans?

Mr. BLANTON. I do, until the Republican steering committee of this House takes some action which it has not as yet taken. There has been no reading out of the party over here. There may have been in another body, but they still have the same standing in the community in which they preside here in the House, so I think they are Republicans.

Mr. WINGO. The gentleman misunderstands me. I am somewhat puzzled to know when a Republican is a Republican. He is orthodox if he votes to pass a bill over the President's veto, for one thing, but he is not orthodox if he does it for another. Has the gentleman undertaken to get up any formula by which he can measure what a Republican is?

Mr. BLANTON. This is one occasion when there ought not to be any partisanship, and I hope and believe it is far from the purpose of the gentleman from Arkansas [Mr. WINGO] to show partisanship at this time. This is one occasion when there ought not to be any question of Republicans, or Democrats, or Socialists, or communists, or anybody else, but just American statesmen. This is a question that is going to do no honor to a great man, and if we pass this bill it will not do any honor to him. It will merely gratify some 70,000 Government employees and give them another idle day, when we all know that idleness was abhorred by this great American, Abraham Lincoln.

It is a question of statesmanship we are called upon to exhibit just now, and some other time when there is not this big question here I will help the gentleman from Arkansas to throw some party darts and see if we can not land some of them, but just now I desire to keep out of the debate all partisanship.

Mr. WINGO. If the gentleman will yield, I am not throwing darts now. You know I learned a little bit by experience and use a little molasses now to catch flies.

Mr. BLANTON. There has been so much molasses used in the last 60 days over the country that things will become insipid if we use any more just now.

Mr. WINGO. My friend from Illinois suggests we use a little oil, but I prefer to use molasses.

Mr. BLANTON. I am not going to take up further time, gentlemen. We are going to make a mistake if we pass this bill. I will not consider economy when it comes to honoring a great American like Lincoln. We passed bill after bill to do him honor and you will not find one word I have ever said against them. We have built this magnificent marble memorial. It is a fitting honor to the man. We built these beautiful reflecting pools there, a fitting honor to the man. There has been money spent here time and time again along lines that did him real honor. I have never raised my voice once against it, and I will not do so.

Mr. FAIRCHILD. If the gentleman will yield, will not that argument of the gentleman from Texas apply equally to Washington's birthday?

Mr. BLANTON. Oh, Washington's birthday from the beginning has been a national affair. It is observed in every State. When one bank closes up in the United States all close up from Alaska to Florida. This is not a bill to make a national holiday; it is a bill restricted to the District of Columbia. It is a bill not to give all of the 500,000 employees of the Federal Government another idle day all over the United States, but it is a bill merely to give the particular 70,000 who happen to be privileged to live in Washington, D. C., a holiday as against the other 400,000 who live elsewhere.

Mr. FAIRCHILD. Does not the argument of the gentleman from Texas regarding economy apply equally to Washington's Birthday?

Mr. BLANTON. So far as Washington's Birthday is concerned, I want to say this: It has never yet done Washington any honor and Mr. Mann realized it, and Uncle Joe Cannon realized it, for they mentioned the fact. I heard their strong speeches made from this floor once before on another occasion against this very proposition by these distinguished gentlemen, one of whom was once Speaker of this House, Uncle Joe Cannon, and I never heard a stronger argument in my life against a measure. He called attention to the fact that the people did not stop to do reverence to Washington on his birthday. They go to pleasure resorts; it is a day of abandon, a gala day of pleasure, and minimized the reverence we should have for the Father of our Country. If it would do reverence to the great American, Abraham Lincoln, then Congress should have passed it 50 years ago. Would you now convict this Congress of dereliction of duty in not passing this bill before? And if you pass it now, would you not say to the people that the Congress of the United States for 50 years has been negligent in its duty in not passing the bill before? If it is a good bill now it has been a good bill during the last 50 years.

It is not a good bill and Congress should put its stamp of disapproval upon it as did the leading statesmen of this House, James R. Mann and Uncle Joe Cannon, who fought against it, and I hope we will not take a backward step now.

Mr. Chairman, I reserve the balance of my time and yield the gentleman from Michigan [Mr. CRAMTON] five minutes.

Mr. CRAMTON. Mr. Chairman, in so far as there is occasion for governmental action to pay tribute to Lincoln, the Lincoln Memorial, which has been recently completed, is, of course, the finest tribute that has ever been paid to any one man. But the bill before us is not a bill to honor the memory of Lincoln. If it were there would be no division of sentiment here in reference to it. If it were, it would not have had the opposition of our former colleague, Mr. Mann, who was in every sense a patriot. The bill is most essentially to give an additional holiday to Government employees in the District of Columbia. It does not appeal to me that further holidays for those employees are necessary or in the present condition of governmental finance are desirable. There are something over 65,000 employed under civil service in the District, and when you add some others who are not in civil service you have approximately 70,000 employees who would be given one additional day of rest with pay, if this bill should become a law. Those 70,000 employees receive on an average better than \$5 per day. That alone is a matter of \$350,000. The matter of the disorganization of work in the departments goes further. For instance, when a holiday comes on Tuesday employees are tempted to go away Saturday and not return to work until some time Wednesday, and that, to a certain extent, creates a disorganization, so the money loss to the Treasury would be above \$350,000. If there were a humane occasion for giving those employees another holiday, then there might be some justification for the bill.

At the present time those employees work seven hours a day. That is the required time; seven hours per day, except in the summer months, when they are given a half holiday on Saturday afternoon, shortening their time that much. They receive 30 days' leave, annual vacation with pay, and, in addition, they are entitled to 30 days' leave with pay as sick leave. There is a possibility of their receiving as much as 60 days' vacation with pay in one year. That, joined with the seven-hour day and their holidays and half holidays, constitutes all that it seems to me we are called upon to do for them in the way of days of rest with pay.

I hope that the bill will not prevail.

The CHAIRMAN. The gentleman from Michigan yields back one minute.

Mr. ZIEHLMAN. Mr. Chairman, I yield five minutes to the gentleman from Minnesota [Mr. KVALE].

The CHAIRMAN. The gentleman from Minnesota is recognized for five minutes.

Mr. KVALE. Mr. Chairman and gentlemen of the committee, I hear cries of "Vote!" and I shall not detain you long. I did not know until I came to the House this noon that such a bill would come before the House.

I am very much surprised to hear some of the arguments advanced against this bill; surprised to hear the roster of names read in a Congress past of those who voted against the enactment of the bill into law.

I asked for the floor when the gentleman from Texas [Mr. BLANTON] was speaking in order to make the same observation that was made by the gentleman from New York [Mr. FAIRCHILD], to inquire whether the same arguments would not hold good against the law establishing Washington's Birthday as a legal holiday, and I have not received a satisfactory answer from the gentleman from Texas.

It seems to me the same argument holds good; and if it does not add honor to the name of Lincoln and his memory to have his birthday celebrated as a legal holiday, neither does it add honor to the name of George Washington to have his birthday observed as a legal holiday.

I come from a State where the birthday of Lincoln is observed as a legal holiday, and our citizens embrace many people of foreign birth. Yet we think we are very good Americans there. We revere and honor the name of Lincoln. We almost worship his memory. We wonder if his memory is held in equal regard in the District of Columbia.

I agree with what the gentleman said, that you can not add fame to Lincoln's name by declaring his birthday a legal holiday. I know that you can not add luster to the sun in any way by any legislation, but you can shut out the heat and light of the sun from your own home by various measures. And so by refusing to declare this day a legal holiday in the District of Columbia we do detract from the memory of Abraham Lincoln,

and we do our part by offering this stand as an example to the several States.

In our schools in Minnesota every child is taught the reason for the legal holiday, and the children are given the names of the States where Lincoln's birthday is observed as a legal holiday. They find that the District of Columbia does not observe that day, and they wonder why, in the city where he spent a part—and so important a part—of his life, where he gave his life as a martyr to human liberty and freedom, this is permitted to continue. And so, psychologically, it does detract from his memory to have the children of Minnesota know that in this very city, the Capital of the Nation, the birthday of Abraham Lincoln is not considered as of enough importance to have it celebrated as a legal holiday. Therefore it reacts upon us. It seems to me it is the natural thing for me, as a citizen of Minnesota, to vote for the setting apart of this day in the District of Columbia as a legal holiday. [Applause.]

The CHAIRMAN. The gentleman from Minnesota has consumed four minutes.

Mr. ZILHMAN. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. RATHBONE].

The CHAIRMAN. The gentleman from Illinois is recognized for 10 minutes.

Mr. RATHBONE. Mr. Chairman, I ask unanimous consent to extend and revise my remarks in the Record.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. RATHBONE. Mr. Chairman, no one has more respect for high authority than I have. The list of names of those who have opposed this bill in times past carries great weight with me. For 18 years I lived in the second congressional district of Illinois and helped to send James R. Mann to Congress. I regard him as one of the greatest Congressmen we have ever had.

But, gentlemen, we are not here blindly to follow authority, either of living or dead. We are here to vote our convictions. We are here to vote our own honest thoughts on this and every other question that comes before this House.

I am astounded to hear in this body, the Congress of the United States, an assertion made which is nothing less than an aspersion on the entire American people. I repudiate and hurl back that aspersion. We have been told here by the gentleman from Texas [Mr. BLANTON] that if this Congress grants this legal holiday it would be used—and those were his words—for the purposes of carousal. We are told that it will be worse than a holiday. We are told that the employees of this Government and the people of this District are simply looking to have a good time, and care for nothing else.

That is not so. You take the State of Illinois, in which I live. You take the 28 States which have already adopted Lincoln's birthday as a holiday, and if you will go to those States on the 12th of February every year you will see men, women, and children by the thousands and thousands going forth to attend exercises in honor of this great American.

I know this people better than does the gentleman from Texas. I know that if you grant this holiday it will not be used in any such vile manner as that. These people who work for the Government, these thousands in the District of Columbia, desire that the opportunity be given them, instead of being made to stick to the grindstone on that great day, to go forth and honor the memory of Lincoln. They ought to have the opportunity of listening to addresses and attending celebrations in honor of that great man. I want to give them that chance.

The gentleman says that this is all propaganda gotten up by Government employees. I deny that assertion. Back of this movement is a set of men that you men from the South, as well as we from the North, honor—the Grand Army of the Republic of the United States. I deny there is any division between the North and the South to-day. We are one great, harmonious, united people. You can not raise that issue in this House. Gentlemen, we are going to show to-day, I hope, that that division is gone forevermore.

Mr. TINCHER. Will the gentleman yield?

Mr. RATHBONE. Yes.

Mr. TINCHER. Is the gentleman in favor of making Grant's birthday a holiday in the District of Columbia?

Mr. RATHBONE. No, sir.

Mr. TINCHER. Logan?

Mr. RATHBONE. No, sir.

Mr. TINCHER. Is this to be the last one?

Mr. RATHBONE. So far as I am concerned I am willing to make it the last one. But I do not think for one moment that this Nation's Capital of ours can say, facing the roll of

28 States, that they are all wrong; that they had no business to grant that holiday; can say that in the Nation's Capital, which saw the greatest achievements of Abraham Lincoln and saw him lay down his martyr's life, we are not willing to rise up and honor his memory. [Applause.]

They tell us that a monument can accomplish this purpose. They point to that glorious mausoleum and the other statues raised in his memory. Gentlemen, you can not honor a man's memory by monuments alone. Lincoln has raised a monument in the hearts and souls not only of this people but in the hearts and souls of all the human race that is more spotless and pure than the marble of that mausoleum. He has raised a statue that will endure longer than bronze, that will last to the end of time, and can we here afford to repudiate Abraham Lincoln? That is the construction which will be placed upon your action if it is against this bill to-day. It will be heralded all over the world that America is divided; that Democrats and southerners are not admirers of this great figure.

My friends of the South, and we are friends, you never had a better friend for your people, bar none, than Abraham Lincoln was. [Applause.] His great heart was overflowing with kindness and good will toward all the human race. He came here with that love in his heart. His first utterance was for friendship, his first endeavor to prevent the awful catastrophe of civil war. It was he who said to you men of the South:

We are not enemies, but friends; we must not be enemies; though passion may have strained, it must not break our bonds of affection. The mystic cords of memory, stretching from every battle field and patriot grave to every loving heart and hearthstone all over this wide land, will yet swell the chorus of the Union, when again touched, as surely they will be, by the better angels of our nature.

Let us show to the world that the Union for which Lincoln pleaded that day in his first great inaugural address is cemented without a breach, and that it stands to-day as the greatest, richest, strongest, happiest, and best land in all the world.

Talk of speeding up production; talk of its being necessary that our people should toil every minute of the time. We are the leader in production to-day, and your granting one holiday in this little District of Columbia in honor of this man is not going to stop your production. Do not let us be cheap, gentlemen of the Congress of the United States.

Mr. BLANTON. Will the gentleman yield?

Mr. RATHBONE. Yes. Are you so anxious about the paltry dollar that you can not honor the memory of Abraham Lincoln to-day?

Mr. BLANTON. Uncle Joe Cannon, whom the country loves—

Mr. RATHBONE. Is this a question or another speech?

Mr. BLANTON. Ably represented the State of Illinois for 46 years in this House. James R. Mann likewise represented Illinois ably for years. Does the gentleman pretend to know more about this bill than these two gentlemen knew about it?

Mr. RATHBONE. I pretend to one thing, and that is to vote what I think is right, no matter who has been on the other side. [Applause.] And I will say that just as patriotic and honorable men as the men the gentleman from Texas has named to-day have taken the other side. This is a question for individual conviction.

Oh, my fellow Congressmen, think of the story. Lincoln born in your Southland, in that humble cabin—Lincoln raised to the Presidency of the United States, through whom this Congress is a reality to-day. He came to Washington; he toiled and died for us here. If you can not honor him in Washington, in the name of Heaven where are you going to honor Lincoln? Are you going to lag behind all the world to-day?

At his bedside when he laid down his life stood Edwin M. Stanton, and he uttered the prophecy, "Now he belongs to the ages." That prophecy has now come true. Are you not willing to-day to do what men are doing across the sea? Read the utterances of British statesmen. There you find men quoting Lincoln's words and following his policies. They have crossed the ocean and made pilgrimages to the scenes of his life and death. Read the great memorial volume—and I have it in my library—"Tributes of the Nations to Abraham Lincoln." Every country in the world, civilized and uncivilized, has risen up to do him homage, and yet you can not do it in this place sacred to his memory. You can not afford to recognize him here. Against such callousness, such indifference to the example and services of that best-beloved of all Americans, we hear the voice of the American people raised in overwhelming protest. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. BLANTON. Mr. Chairman, I yield 15 minutes to the gentleman from Kentucky [Mr. GILBERT].

Mr. GILBERT. Mr. Chairman and gentlemen of the Congress, my excuse for addressing this body at this time is that I am a son of the same State which gave Abraham Lincoln to the Nation and partly the references of the gentleman from Illinois [Mr. RATHBONE], who has just addressed you.

Kentucky lies to the north of the Southland and it lies to the south of the Northland. Her environment, her association, her loyalty, and her sympathy made hers a trying position. She, as a State, took no part in this great conflict. Had she heeded solely the dictates of her mind she would have aligned herself with the North; had she heeded solely the dictates of her heart she would have aligned herself with the South. It was not because she was afraid to fight. No. Perhaps Kentucky's fault lies in the other direction. Had she not sent her backwoods soldiers across the mountain forests even before she was a State to overcome the British at Kings Mountain and turn the tide of the Revolution? Had she not sent her soldiers across the frozen North and won the Battle of Tippecanoe, the only victory achieved on land by the Americans in the War of 1812? Had she not joined with the soldiers of Tennessee, who with their long rifles won the Battle of New Orleans shortly thereafter? Did she not furnish more soldiers to the war with Mexico than any other State in the Union? And in this sanguinary conflict, in proportion to population—though she sided with neither side—she furnished her sons and daughters impartially and unsparingly to both sides and furnished more soldiers than any other State in the Union. The soldiers of Pennsylvania fought side by side for the North; the soldiers of Georgia fought side by side for the South; the soldiers of Kentucky fought face to face, some for the North and some for the South. Here, indeed, brother faced brother and father faced son.

She gave to the Southland the leader of her destinies, her President, Jefferson Davis. She likewise gave to the Northland the leader of her destinies, her President, Abraham Lincoln.

Those dark days of discord, however, have passed, and Kentucky now weighs her heroes in a scale uninfluenced by passion.

Lincoln's statue stands to-day impressively alone in the rotunda of her capitol.

Monuments have been erected to Lincoln in every hamlet of the United States. Here in the Capital of the Union he preserved the most expensive, the most beautiful memorial in marble is erected to his memory. But above and beyond all these, his great monument is indelibly inscribed upon the hearts of his countrymen. Can we honor Lincoln now? No. His poverty, his misfortunes, his failures, accumulating to his grand and glorious achievements, have gone on and brightened in mellow splendor as the years roll by.

Man seldom is improved by his successes, but a true man makes his failures and misfortunes stepping stones to achievement of ultimate success. No great man ever suffered the misfortune and defeats of Lincoln. His poverty was like that of the lowly Nazarene, which reminds us that all the great teachers of men are born in manglers, suffer lives of privation, and are crucified at last for their pains.

As a business man, Lincoln was a failure. As a financier he referred to his indebtedness as the national debt. [Laughter.] As an aspirant for the hand of Ann Rutledge he suffered his most agonizing defeat, and there his greatness rose to sublimity. His defeat was so crushing that his mind for a while was despaired of. He could not bear to think of the rain falling upon her grave. In the lives of men nothing shows their greatness more than their love and respect for women.

First as a candidate for the Legislature of Illinois he was defeated. As an applicant for Commissioner of the Land Office he was defeated. As a candidate for the Senate of the United States he was defeated. As a candidate for Vice President of the United States he was defeated, he was Congressman for one term and was a failure, and yet above them all, defeats and failures that would have crushed the spirit of any ordinary man, he rose to immortality, and furnishes to-day the world's most inspiring example for those who would falter when they fall.

The proponents of this measure, sincere but misguided, would add substantially to the expense of the Government in this attempt to add further to his memory by declaring a day of idleness on February the 12th.

Mr. FAIRCHILD. Will the gentleman yield for a moment?

Mr. GILBERT. Yes.

Mr. FAIRCHILD. Will the gentleman not add to his statement of Kentucky's recognition of the memory of Lincoln, that Kentucky has made Lincoln's birthday a legal holiday in that State?

Mr. GILBERT. That is true.

Mr. RATHBONE. Will the gentleman yield further?

Mr. GILBERT. Yes.

Mr. RATHBONE. Do you hold Kentucky was wrong in doing that?

Mr. GILBERT. I do not. [Applause.] But I would vote to-day against making the birthday of Lee or Grant or Jefferson or Roosevelt or Washington a legal holiday for the District of Columbia.

Does the present method of observing Christmas, with its lavish expenditure of wasteful vanity, add anything to the life or character or honor of the lowly Nazarene, who had not where to lay his head.

Mr. CONNERY. Would the gentleman abolish Christmas?

Mr. GILBERT. No; but I would like to abolish the present method of its observance. And would a day set aside for idleness honor the memory of this son of toil, this rail splitter of Illinois? No. [Applause.] It is peculiarly unfitting to the life and thought of him whom they seek to honor. Would it add in any way to the purpose its sincere advocates intend, I would be first to welcome it; but as on a former occasion, this same resolution was opposed by a son of his adopted State—Illinois—so I feel it on this occasion my duty to oppose it as a son of the State of his birth—Kentucky. [Applause.]

Mr. ZIEHLMAN. Will the gentleman from Texas use up his time now? We only have one more address on this side.

Mr. BLANTON. Mr. Chairman, I yield five minutes to the gentleman from Maine [Mr. HERSEY].

Mr. HERSEY. Mr. Chairman, my recollection goes back to a very little time ago when I voted against a similar bill. I have seen nothing since that time to change my mind. I thought then that the passage of a bill providing a holiday for Lincoln in the District of Columbia would detract from his memory instead of adding to it.

Lincoln did not live in the District of Columbia, except temporarily, as every other President. He was not born here. His death here was the death of a martyr.

Mr. RATHBONE. Will the gentleman yield?

Mr. HERSEY. Yes.

Mr. RATHBONE. Was not the supreme achievement in his life, and by far his greatest work, performed right here in the District of Columbia, far surpassing everything else he did in life, and did he not die here in this very place?

Mr. HERSEY. I might say of our former colleague, James R. Mann, that the great work of his life was performed here on the floor of the House, and he was killed here by overwork, and we might say he died here. And yet we would not have a holiday for James R. Mann. Just think for a moment what you are doing.

Mr. WEFALD. Will the gentleman yield?

Mr. HERSEY. Yes.

Mr. WEFALD. I would like to know if the gentleman places James R. Mann and Abraham Lincoln in the same category, one as great as another.

Mr. HERSEY. I am not comparing Washington or Lincoln or McKinley or Wilson or any other men. I am simply stating that they were men of national character whom we all loved, and you are trying to make a holiday in the District of Columbia for Abraham Lincoln. Why, there would be more sense in trying to make it a national holiday instead of a holiday for the District of Columbia.

Mr. RATHBONE. We are going as far as we can toward making it a national holiday. In making it a holiday for the District of Columbia. We can not do any more than that.

Mr. TINCHER. We could make it a national holiday if we wanted to.

Mr. RATHBONE. No.

Mr. TINCHER. We could make it a holiday for all Government employees in the United States.

Mr. HERSEY. This is as far as we have the power to go. Here is the situation. Congress is doing this and nobody else. There is no vote of the District of Columbia for it, there is no evidence that they want it. It is the vote of Congress that is to control. What do we do for the memory of Abraham Lincoln? For many years, I think going back even to his martyrdom, Congress has on the 12th day of February set aside an hour or two in a session of Congress where some one

from his native State, or some other State, has eulogized his memory. We go further than that. We erected at the Capital of the Nation and Congress taxed the people of the Nation to pay for it, the most beautiful memorial in the world, and for its maintenance. Will we add anything to that great memorial by making his birthday a holiday? We would detract from all we have done in the past by simply saying that there shall be a holiday in the District of Columbia. Will it change the position of the House on the 12th of February? Will we not meet as in the past and eulogize him? Will it change us in our work, will we do him more honor because of that? No.

The CHAIRMAN. The time of the gentleman from Maine has expired.

Mr. BLANTON. Mr. Chairman, I yield the gentleman 5 minutes more.

Mr. CONNERY. Will the gentleman yield?

Mr. HERSEY. Yes.

Mr. CONNERY. If a child in one of these 28 States that has a holiday should ask the teacher how it is that we have a holiday and that Congress that sits in the District of Columbia has no holiday, what would the gentleman's answer be?

Mr. HERSEY. A little over a year ago we defeated a similar bill in the House. Notwithstanding the remarks of the gentleman from Illinois [Mr. RATHBONE] the newspapers did not find any fault about it, the people of the Nation found no fault about it, no Member that voted against it was criticized as far as I know for voting that way. There was no great uprising of the people against those who voted against it as the gentleman from Illinois claims will take place if we defeat this. The little children of the school will never know anything about it. Every State can legislate as it sees fit in regard to it, and the little children can celebrate the memory of Abraham Lincoln in all the schools of the nation without its being a holiday at all. [Applause.]

Mr. BLANTON. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. BLACK].

Mr. BLACK of Texas. Mr. Chairman, when this bill was before the House something like a year ago, I voted against it. I did not do that because of any lack of reverence for the memory of Abraham Lincoln. I think some of the gentlemen who have spoken to-day are rather begging the question in intimating that a vote against making the birthday of Lincoln a holiday in the District of Columbia is lacking in reverence of the memory of that great man. The hero of an hour will pass as quickly as he came. The flash light dazzles and blinds; we rub our eyes and the impressions are gone. Men are like impressions. There are more of the flash-light kind than there are fireflies on a summer's night. But some are carved along deep lines for great purposes, and Abraham Lincoln was a man of that kind. Nothing that we can do will add or detract anything from his great and honorable fame.

Thomas Jefferson, who wrote the Declaration of Independence, was also a great American. We have not found it necessary to make Jefferson's birthday a holiday in the District of Columbia. Prior to his death Jefferson wrote his own epitaph, and this is what it says: "Here lies the body of Thomas Jefferson, author of the Declaration of Independence, writer of the Virginia statute for religious liberty, and founder of the University of Virginia." These achievements of Mr. Jefferson are all that are needed to honor his name, and we would add nothing to the luster of his memory in going through the formality of making the day of his birth a legal holiday in the District of Columbia.

On a stone in St. Paul's Cathedral, in London, is written this inscription:

Beneath is laid the builder of this church and city, Christopher Wren, who lived more than 90 years, not for himself but for the good of the State. Reader, if thou ask for a monument, look around thee.

And look where you will in the city of London you will see the monuments to this marvelous man in the churches and halls which he builded. All that is needed to honor the memory of Lincoln is to recall the achievements that he wrought, not only for the United States but the world. We will add nothing to it by passing this bill, and I shall vote against it. [Applause.]

Mr. ZIHLMAN. Mr. Chairman, when his bill was called up the gentleman from Virginia [Mr. MOORE] and the gentleman from New York [Mr. CLARKE] asked a question as to the legal holidays now in force in the District of Columbia. For the information of the committee, which will in a few moments vote on this bill, I shall read from section 1389 of the Code of Law for the District of Columbia, which is an act of Congress. That provides that the following shall be holidays in the District of Columbia:

* * * The 1st day of January, commonly called New Year's Day; the 22d day of February, known as Washington's Birthday; the 4th day of July; the 30th day of May, commonly called Decoration Day; the first Monday in September, known as Labor's Holiday; the 25th day of December, commonly called Christmas Day; every Saturday after 12 o'clock noon; any day appointed or recommended by the President of the United States as a day of public fasting or thanksgiving; and the day of the inauguration of the President in every fourth year shall be a holiday in the District within the meaning of this section for all purposes.

That answers the argument made here that this is simply a bill intended to give another holiday to the employees of the Federal Government here in the District of Columbia. In view of the fact that to the best of my knowledge and belief not a single Federal employee has asked for the passage of this bill, by resolution, by letter, or by an appearance before the committee, I think it is unfair to draw such a conclusion.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. ZIHLMAN. Yes.

Mr. BLANTON. The gentleman is usually present, but he certainly will not forget that representatives of certain bodies of employees appeared before our committee.

Mr. ZIHLMAN. I was present at every meeting at which the bill was considered, although I was not present at the meetings of the subcommittee.

Mr. BLANTON. There was an appearance on the part of representatives of some of the employees wanting this holiday.

Mr. ZIHLMAN. This bill is not going to lay off a single Federal employee. Have we so little confidence in the executive officers of the Government that we are afraid to give them an additional day as a legal holiday for fear that they might declare that the Government departments shall be closed on that day? They could do that now on every Saturday afternoon, if the mere making of a day a legal holiday gives that right or authority to the Executive Officer of the Government. This bill was first advocated and presented by the Grand Army of the Republic. The Grand Army of the Republic wants to place Abraham Lincoln alongside of George Washington as the two great immortals in American history. Washington's birthday is a legal holiday in the District of Columbia. We want to do further honor to this great son of Kentucky and Illinois by making his natal day a legal holiday. No other human being except Washington has been so honored by Congress by having the day of his birth set aside as a legal holiday. We are asking that Lincoln be placed alongside of George Washington, as they are the two great American immortals, who seemed trained and equipped for the great task of preserving this Republic, one creating it and the other preserving it.

Washington was a Virginian, trained for the task of leading the American Colonies from the yoke of tyranny and oppression imposed by Great Britain. He was trained first in the wild, open life of a surveyor, as an officer in the Army upon the frontier, as a member of the House of Burgesses of Virginia, then as a planter upon the Potomac. When the American Colonies threw down the gantlet to the mother country it was Washington, trained and equipped for the task of leading his fellow citizens, who came forward to lead the Colonies through seven years of hardship to independence and the creation of a great Republic. Then a half century later when one half of the Union declared that slavery should be extended into the new States and Territories and the other half declared that it should not, it was Abraham Lincoln, whose life had been devoted to the study of the subject of slavery and the rights of the States and the limitations and authority of the States, who came forward and was honored by his fellow citizens by being put in command of the ship of state. That was in one of the most critical periods of American history. He had been trained for that task, he was ordained to carry on the work that Washington had begun. Lincoln came on the scene of action, a man in whom the people believed and trusted. I recall the words of Henry Ward Beecher, when he spoke of his administration as being four long, black, and purgatorial years, with dangers assailing him upon every side. The waves of dissension seemed about to throw the ship of state upon the rocks, but Abraham Lincoln was able to guide it safely through those troublesome years. When his work was done, when he had uttered his fervent appeal to the American people for a just and lasting peace he was assassinated in this city, the Capital of the Nation. We want to place Lincoln, the man of the people, alongside of Washington as the other great American immortal and to make his birthday a holiday in the District of Columbia. Not a single Federal employee will be given a day of recreation or of sport, such as has been referred to by the gentleman from Texas [Mr. BLANTON], because of the passage of this bill.

Mr. SANDERS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. ZIHLMAN. Yes.

Mr. SANDERS of Indiana. Upon what authority does the gentleman say that this law would not give anyone a holiday in the District of Columbia?

Mr. ZIHLMAN. Because there is no law, there can be no law, that will compel the executive departments to close on legal holidays. I stated the fact that Saturday after 12 o'clock noon is a legal holiday in the District of Columbia—every Saturday in the year.

Mr. SANDERS of Indiana. What does this mean, "and in its observance and effect it shall be subject to all the provisions of law applicable to holidays within this District"?

Mr. ZIHLMAN. The gentleman is a lawyer; I am not. That refers to negotiable instruments, notes, deeds. I will read the code to the gentleman—

Mr. SANDERS of Indiana. I heard the gentleman, and I had the code before me. What would the gentleman say about this law—

Cumulative supplement Barnes Federal Code: "Employees in the Postal Service shall be granted 15 days' leave of absence without pay exclusive of Sundays and holidays each fiscal year"?

Would the gentleman say that the word "holidays" would come in the provisions of this law which says that this particular day is subject in its observance and effect to all the provisions of law applicable to holidays in the District?

Mr. ZIHLMAN. I would not. We are legislating for the District here in the same manner the State legislature legislates in a State. We are not asking to pass this law beyond the confines of the District.

Mr. SANDERS of Indiana. What would the gentleman think of the applicability of this law?

Employees of the Navy Yard, Government Printing Office, Bureau of Engraving and Printing, and all other per diem employees of the District on duty in Washington or elsewhere in the United States shall be allowed the following holidays, to wit: The 1st day of January, the 22d day of February, the 4th day of July, the 25th day of December, and such days as may be designated by the President for national thanksgiving, and shall receive the same pay as other days?

What would the gentleman think of that law as being construed with this law which contains this language, "And in its observance and effect it shall be subject to all the provisions of law applicable to holidays within said District"?

Mr. ZIHLMAN. I would say it certainly would not apply. What the gentleman read is Federal law governing Federal employees, specifically stating the days they shall be granted leave with pay, and we are providing here for a holiday in the District of Columbia, and the reference the gentleman refers to simply refers to legal documents, promissory notes, deeds, and other instruments.

Mr. SANDERS of Indiana. Pardon me. The gentleman is in error. The code from which he read does apply only to negotiable instruments, but the provisions I read specifically apply to holidays and pay of Government employees in the District—

Mr. ZIHLMAN. And elsewhere.

Mr. SANDERS of Indiana. This is for this District, and this will be Federal law if it is passed, and this will authorize in its effect that all these other laws shall be applicable. Would the gentleman be willing to have an amendment that it would specifically exclude the applicability of this holiday to Government employees in the District?

Mr. ZIHLMAN. I see no objection to an amendment which would specify it was not the intention of Congress—

Mr. BLANTON. Will the gentleman yield there? The gentleman from Maryland knows that every employee of the Government in the District of Columbia gets 52 Sundays and holidays, besides the ones that have 15 days off mentioned by the gentleman from Indiana. There are over 50,000 in the District of Columbia who get 30 workdays a year, holidays, and Sundays and 30 workdays off, as a vacation, on full pay every year. Then they are entitled to 30 days on sick leave on a doctor's certificate, if he can file a certificate from a reputable doctor, that he can not work.

Mr. RATHBONE. Will the gentleman yield?

Mr. BLANTON. I have not the floor.

Mr. ZIHLMAN. I will yield.

Mr. RATHBONE. Does the gentleman, who is an eminent jurist, a very distinguished lawyer, think it is a proper legal

construction concerning holidays to include Sundays? Does the gentleman think that, as a matter of law?

Mr. BLANTON. I spoke of Sundays because, until the deficiency bill passed, which is to pay for Sundays, the 970 policemen in this District and 760 firemen of this District were not granted Sundays. They had to work Sundays the same as week days, but since that deficiency bill passed there has been money to carry out the intention of the legislative act which granted Sunday. Therefore, now every employee in the District of Columbia is granted 52 Sundays in addition to the holidays they have by law.

Mr. ZIHLMAN. Mr. Chairman, I just want to say this in closing: I do not think that any Member of the House could construe the section of the Federal Code read by the gentleman from Indiana as granting a holiday to anyone not specified in the paragraph of the law read.

Mr. STENGLE. Mr. Chairman, will the gentleman yield?

Mr. GILBERT. Mr. Chairman, will the gentleman yield to me?

Mr. ZIHLMAN. I yield first to the gentleman from Kentucky, my colleague on the committee.

Mr. GILBERT. I just wanted to correct the statement of the gentleman that Lincoln was a son of Illinois. He was a citizen of Illinois but the son of Kentucky. [Applause.]

Mr. ZIHLMAN. It is always a good thing to come from Kentucky.

Mr. GILBERT. While I am on my feet I want to say—

Mr. ZIHLMAN. I will give the gentleman time in a moment if his colleague from Texas [Mr. BLANTON] agrees.

Mr. STENGLE. In view of the statements of our distinguished colleague from Indiana [Mr. SANDERS] and some others, suppose that every portion of the law as quoted by him be true; is it not a fact that we do not lose our citizenship and our rights as citizens when we enter the Federal service as employees? And, even if it did give the 65,000 employees of the Government an equal chance to respect and revere the memory of the late President Lincoln, would it not be giving them only that which is their right as citizens of the United States? [Applause.]

Mr. SANDERS of Indiana. I would like to inquire of the gentleman from New York what he thinks the law provides? Does it provide that these employees shall have a holiday or not? That is what I want to know.

Mr. STENGLE. My understanding is, if I can read English well enough to understand it, that this applies to every man, woman, and child residing in the District, as it ought to.

Mr. SANDERS of Indiana. And the employees will get the vacation?

Mr. STENGLE. If you are willing to concede that they are citizens, yes.

Mr. SANDERS of Indiana. The gentleman from Maryland says the employees will not get the time off. The gentleman from New York says they will. We want to know what we are doing when we vote for this bill.

Mr. ZIHLMAN. Mr. Chairman, I yield to the gentleman from Georgia [Mr. UPSHAW] to answer the question of the gentleman from New York [Mr. STENGLE].

Mr. UPSHAW. Mr. Chairman, I appreciate the courtesy of the gentleman from Maryland [Mr. ZIHLMAN], but I do not rise to answer the question of the gentleman from New York [Mr. STENGLE]. I simply do not want this debate to come to an end without going on record, not merely as the son of a Confederate soldier but I hope as an American, responsive to every inspiration that comes from the name of Abraham Lincoln, as being in favor of this measure to make his birthday a legal holiday in the Capital of this Nation. [Applause.]

I am not supremely concerned, much as I am interested in the employees of the Government—remembering that they have a holiday, I believe, on the birthday of Washington, and that they come pretty close together—I am not supremely concerned, I say, as to their having a holiday or no holiday, so as to be free from work on the 12th of February. The thing that appeals to me as an American citizen and as the son of a Confederate soldier, taught by my father to love the flag of our reunited country, is that it shall go out to the world that the Congress of this Nation, making laws for the Capital of our country, shall recognize the birthday of Abraham Lincoln, who carried in his veins the blood of the South and who carried in his marvelous life that rugged manhood and that stalwart Americanism that makes all Americans honor themselves as they are proud to do him honor. [Applause.]

Mr. ZIHLMAN. Mr. Chairman, I will ask for the reading of the bill.

Mr. BLANTON. I want to use a little more of my time since the gentleman from Georgia [Mr. UPSHAW] used some.

Mr. ZIHLMAN. I would like to make a parliamentary inquiry. Does the gentleman from Texas indicate that he has no further requests for time?

Mr. BLANTON. I understood the gentleman from Maryland had but one speech, and I reserved the balance of my time. But since the gentleman supplemented his speech by one from the gentleman from Georgia [Mr. UPSHAW], I want to answer, under the rules of the House.

The CHAIRMAN. The Chair recalls distinctly that the gentleman reserved his time. For the moment that seemed a little inconsistent. The gentleman had 13 minutes remaining.

Mr. BLANTON. Mr. Chairman, it is just a question of whether Mr. Speaker Cannon, of Illinois, who honored this House and the country with 46 years of service, and Mr. James R. Mann, of Illinois, whose able service here we are all familiar with, knew more about this question than do the gentleman from Maryland [Mr. ZIHLMAN] and our distinguished new orator from Illinois [Mr. RATHBONE].

Does the bill grant employees here another holiday? Does it turn out the departments for another day? Let us see what James R. Mann said about it. He knew more about legislation coming up on the floor of the House than any other man in the House. He says:

There is absolutely no occasion for it, except some gentlemen of the District of Columbia who would like to be let out of work another day in the year organized a propaganda to have another legal holiday.

That is what James R. Mann said about it. Listen, he said:

When they get that, they will have another one they want. I think it is time to stop the misuse of the name of Lincoln to steal things out for private interest.

Then he made a motion to strike out the enacting clause of this bill at a time when this House was overwhelmingly Republican, and orthodox Republicans all over this side of the House backed up Mr. James R. Mann and Speaker Cannon, and struck out the enacting clause.

I hope they will stand by the memory of Mr. Mann and Mr. Cannon now and do likewise. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That the 12th day of February in each year, being the anniversary of the birth of Abraham Lincoln, is hereby made a legal holiday within the District of Columbia, to be known as Lincoln Day, and in its observance and effect it shall be subject to all the provisions of law applicable to holidays within said District.

Mr. BEGG and Mr. BLANTON rose.

Mr. BLANTON. Mr. Chairman, I offer a preferential motion.

The CHAIRMAN. The gentleman from Texas will have recognition as a member of the committee.

Mr. BLANTON. I move to strike out the enacting clause.

The CHAIRMAN. The gentleman from Texas moves to strike out the enacting clause. The question is on agreeing to that motion.

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. ZIHLMAN. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded. Those in favor of the motion will rise and stand until counted. For the information of those rising the Chair would state that the vote is on striking out the enacting clause of the bill (H. R. 20) to make Lincoln's birthday a legal holiday.

The committee divided; and there were—ayes 80, noes 62.

So the motion was agreed to.

Mr. BLANTON. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken out.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CHINDBLOM, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 20) to declare Lincoln's birthday a legal holiday, had directed him to report the same back to the House with the recommendation that the enacting clause be stricken out.

Mr. BLANTON. Mr. Speaker, I move the previous question. The previous question was ordered.

The SPEAKER. The question is now on agreeing to the action of the committee.

Mr. ZIHLMAN. Mr. Speaker, I demand the yeas and nays. The yeas and nays were ordered.

The question was taken; and there were—yeas 175, nays 143, not voting 114, as follows:

[Roll No. 2]

So the enacting clause was stricken out.
The Clerk announced the following pairs:
Until further notice:

Mr. Tilson with Mr. Hull of Tennessee
Mr. Kiess with Mr. Abernethy.
Mr. Morin with Mr. Drane.
Mr. Free with Mr. Tucker.
Mr. Rogers of Massachusetts with Mr. Weller.
Mr. Winslow with Mr. Carew.
Mr. Stalker with Mr. Croll.
Mr. Williams of Michigan with Mr. Poon.
Mr. Magee of Pennsylvania with Mr. Logan.
Mr. Davis of Minnesota with Mr. Cummings.
Mr. Madden with Mr. Kindred.
Mr. Graham with Mr. Tydings.
Mr. Ransley with Mr. Egan.
Mr. Mills with Mr. Montague.
Mr. Dailinger with Mr. Clark of Florida.
Mr. Connolly of Pennsylvania with Mr. Rainey.
Mr. Manlove with Mr. Boylan.
Mr. Strong of Pennsylvania with Mr. Deal.
Mr. Fitzgerald with Mr. Geran.
Mr. Funk with Mr. Morrow.
Mr. Johnson of South Dakota with Mr. Jeffers.
Mr. Perkins with Mr. Romgue.
Mr. Hill of Maryland with Mr. Taylor of Colorado.
Mr. Porter with Mr. O'Brien.
Mr. Elliott with Mr. Buckley.
Mr. Crowther with Mr. Oliver of New York.
Mr. Tinkham with Mr. McSwain.
Mr. Swoope with Mr. Dominick.
Mr. Beers with Mr. Gallivan.
Mr. McLaughlin of Nebraska with Mr. Tillman.
Mr. Curry with Mr. Griffin.
Mr. MacGregor with Mr. Corning.
Mr. Dempsey with Mr. Harrison.
Mr. Fairfield with Mr. Ward of North Carolina.
Mr. Perlman with Mr. McNulty.
Mr. Phillips with Mr. Davey.
Mr. Strong of Kansas with Mr. O'Sullivan.
Mr. Hull, William E., with Mr. Sherwood.
Mr. Gifford with Mr. Drewry.
Mr. Welsh with Mr. Smithwick.
Mr. Yates with Mr. Doyle.
Mr. Smith with Mr. Williams of Texas.
Mr. Gifford with Mr. Hammer.
Mr. Kahn with Mr. Gambrell.
Mr. Murphy with Mr. Howard of Nebraska.
Mr. Fish with Mr. Wilson of Mississippi.
Mr. Larson of Minnesota with Mr. Sullivan.
Mr. Cable with Mr. Goldsborough.
Mr. Anderson with Mr. Rogers of New Hampshire.
Mr. Kendall with Mr. Wolf.
Mr. LaGuardia with Mr. Berger.

On motion of Mr. BLANTON, a motion to reconsider the vote was laid on the table.

Mr. ZIHLMAN. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of H. R. 5327, a bill to provide for the payment to the retired members of the police and fire departments of the District of Columbia the balance of retirement pay past due to them but unpaid from January 1, 1911, to July 30, 1915.

Mr. BLANTON. Mr. Speaker, I make the point of order that the bill is not in accord with the rules of the House in that it provides for an appropriation of \$68,000, and that the Committee on the District of Columbia has no power or authority to appropriate.

The SPEAKER. The Chair sustains the point of order. Does the gentleman from Maryland desire to be heard?

Mr. ZIHLMAN. Mr. Speaker, I recognize that the District of Columbia has no power to make appropriations. They have power to authorize appropriations. The language to be carried in the bill should be to authorize an appropriation, and it was the intention of the acting chairman to move to strike out the language referred to at the proper time.

The SPEAKER. That does not make the bill in order.

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent that the bill be recommitted to the Committee on the District of Columbia.

The SPEAKER. The gentleman from Maryland asks unanimous consent that the bill be recommitted to the Committee on the District of Columbia. Is there objection?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to—
Mr. CLARKE of New York, for four days, on account of important business.

Mr. JEFFERS (on request of Mr. OLIVER of Alabama) on account of official business connected with the Committee on World War Veterans' Legislation.

Mr. TILSON, for one week, on account of important business.

ADJOURNMENT

Mr. ZIHLMAN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 16 minutes p. m.) the House adjourned until to-morrow, Tuesday, December 9, 1924, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

712. A letter from the Secretary of the Interior, transmitting Twenty-third Annual Report of the Bureau of Reclamation; to the Committee on Irrigation and Reclamation.

713. A letter from the Secretary of the Treasury, transmitting a letter calling the attention of the House of Representatives to a letter addressed to the Speaker of the House of Representatives on December 5, 1917, relative to accepting a correctionary deed to certain land in the city of New York for a post-office site; to the Committee on Public Buildings and Grounds.

714. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation transferring from the War Department to the Treasury Department for quarantine purposes that portion of Ship Island located off the coast of Mississippi, about 14 miles from Biloxi, Miss., now occupied by the Treasury Department and in use as a quarantine station; to the Committee on Military Affairs.

715. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation authorizing the Secretary of the Treasury to sell several parcels of land acquired for Federal building sites, which are no longer needed for the purposes of the Government; to the Committee on Public Buildings and Grounds.

716. A letter from the Secretary of War, transmitting report covering publications issued by the War Department during the fiscal year ended June 30, 1924; to the Committee on Printing.

717. A letter from the Comptroller General of the United States, transmitting the annual report of the General Accounting Office for the fiscal year 1924 (H. Doc. No. 484); to the Committee on the Judiciary.

718. A letter from the Secretary of the Interior, transmitting report of a copy of a letter from the superintendent of St. Elizabeths Hospital, dated December 4, 1924, containing the financial report; to the Committee on Expenditures in the Interior Department.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII the Committee on Pensions was discharged from the consideration of the bill (H. R. 9870) granting a pension to Lewis Corfman, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. JOHNSON of West Virginia: A bill (H. R. 10467) granting the consent of Congress to the Huntington & Ohio Bridge Co. to construct, maintain, and operate a highway and street railway bridge across the Ohio River between the city of Huntington, W. Va., and a point opposite in the State of Ohio; to the Committee on Interstate and Foreign Commerce.

By Mr. DENISON: A bill (H. R. 10468) to authorize the construction of bridges over navigable waters; to the Committee on Interstate and Foreign Commerce.

By Mr. ASWELL: A bill (H. R. 10469) to provide for the registration of aliens, and for other purposes; to the Committee on Immigration and Naturalization.

By Mr. WINSLOW: A bill (H. R. 10470) to promote the unification or consolidation of carriers engaged in interstate commerce; to the Committee on Interstate and Foreign Commerce.

By Mr. SPROUL of Illinois: A bill (H. R. 10471) authorizing the Postmaster General to permit the use of precanceled stamped envelopes; to the Committee on the Post Office and Post Roads.

By Mr. JOHNSON of Washington: A bill (H. R. 10472) to provide for restoration of the old Fort Vancouver stockade; to the Committee on Military Affairs.

By Mr. O'CONNOR of Louisiana: A bill (H. R. 10473) making appropriation for the construction and equipment of a light vessel for the Passes at entrances to the Mississippi River, La.; to the Committee on Appropriations.

By Mr. STRONG of Kansas: A bill (H. R. 10474), to authorize reimbursement of the Government of the Philippine Islands for maintaining alien crews prior to April 6, 1917; to the Committee on War Claims.

By Mr. FROTHINGHAM (by request): A bill (H. R. 10475) to amend an act entitled "An act to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes," approved September 21, 1922; to the Committee on Ways and Means.

By Mr. SEARS of Florida: Joint resolution (H. J. Res. 304) to provide for a review of the reports on Kissimmee River, Fla., by the district engineer, Board of Engineers, and Chief of Engineers; to the Committee on Rivers and Harbors.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ARNOLD: A bill (H. R. 10476) granting a pension to Susan F. Rutherford; to the Committee on Pensions.

By Mr. DENISON: A bill (H. R. 10477) granting an increase of pension to John Hester; to the Committee on Invalid Pensions.

By Mr. ELLIOTT: A bill (H. R. 10478) granting an increase of pension to Dicie C. Alexander; to the Committee on Invalid Pensions.

By Mr. GLATFELTER: A bill (H. R. 10479) granting a pension to Elizabeth C. Randle; to the Committee on Pensions.

Also, a bill (H. R. 10480) granting an increase of pension to Eliza C. Matthias; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10481) granting an increase of pension to Rebecca Hoke; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10482) granting an increase of pension to Mary E. Thomas; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10483) granting an increase of pension to Susannah Pearsall; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10484) granting an increase of pension to Anna Maria Bailey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10485) granting an increase of pension to Lydia Low; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10486) granting an increase of pension to Ellen A. McCleary; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10487) granting an increase of pension to Ann Jane Barton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10488) granting an increase of pension to Mary A. Wagner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10489) granting an increase of pension to Catherine B. Raffensperger; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10490) granting an increase of pension to Ernestine W. Shetrone; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10491) granting an increase of pension to Louisa Gruver; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10492) granting an increase of pension to Susy A. Anderson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10493) granting an increase of pension to Mandilla Breighner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10494) granting an increase of pension to Joana S. Cline; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10495) granting an increase of pension to Catherine E. Marquart; to the Committee on Invalid Pensions.

By Mr. GREENWOOD: A bill (H. R. 10496) granting an increase of pension to Eliza C. Clark; to the Committee on Invalid Pensions.

By Mr. KINDRED: A bill (H. R. 10497) granting a pension to Jennett E. Butterfield; to the Committee on Pensions.

By Mr. LOZIER: A bill (H. R. 10498) granting a pension to Eli Briggs; to the Committee on Pensions.

Also, a bill (H. R. 10499) granting an increase of pension to Jennie Runyan; to the Committee on Invalid Pensions.

By Mr. LYON: A bill (H. R. 10500) granting a pension to Ruth Shaw McLeod; to the Committee on Pensions.

By Mr. MAJOR of Missouri: A bill (H. R. 10501) granting a pension to Lon Carskaddon; to the Committee on Pensions.

By Mr. MAPES: A bill (H. R. 10502) granting a pension to Hannah McLaughlin; to the Committee on Invalid Pensions.

By Mr. MILLIGAN: A bill (H. R. 10503) granting a pension to Effie Overton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10504) granting a pension to Jane Prather; to the Committee on Invalid Pensions.

By Mr. MOORE of Ohio: A bill (H. R. 10505) granting a pension to Catharine Davis; to the Committee on Invalid Pensions.

By Mr. MOORE of Virginia: A bill (H. R. 10506) granting an increase of pension to John Smith; to the Committee on Pensions.

By Mr. PATTERSON: A bill (H. R. 10507) granting a pension to Mary A. Harper; to the Committee on Invalid Pensions.

By Mr. PURNELL: A bill (H. R. 10508) granting an increase of pension to Rebecca Scott; to the Committee on Invalid Pensions.

By Mr. REED of New York: A bill (H. R. 10509) granting an increase of pension to Virginia Griffith; to the Committee on Pensions.

Also, a bill (H. R. 10510) granting an increase of pension to Bridget O'Brien; to the Committee on Pensions.

Also, a bill (H. R. 10511) granting an increase of pension to Mary L. Minesinger; to the Committee on Pensions.

By Mr. SHALLENBERGER: A bill (H. R. 10512) granting an increase of pension to Mary M. Oney; to the Committee on Pensions.

By Mr. VINSON of Kentucky: A bill (H. R. 10513) granting a pension to Abijah Eversole; to the Committee on Pensions.

Also, a bill (H. R. 10514) granting a pension to Mary E. Meade; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10515) granting a pension to G. R. Hale; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10516) granting an increase of pension to Mary Jackson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10517) granting an increase of pension to Frank M. Griffin; to the Committee on Pensions.

Also, a bill (H. R. 10518) granting an increase of pension to Mary F. King; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10519) granting an increase of pension to Elizabeth Mills; to the Committee on Invalid Pensions.

By Mr. WASON: A bill (H. R. 10520) granting a pension to Laura A. Moore; to the Committee on Invalid Pensions.

By Mr. ZIHLMAN: A bill (H. R. 10521) granting a pension to Anastasia Elizabeth Smith; to the Committee on Invalid Pensions.

By Mr. LEACH: Resolution (H. Res. 373) to pay to William G. Beverly \$275 as clerk hire to the late Hon. William S. Greene; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3110. By Mr. AYRES: Petition of the citizens of Towanda, Kans., protesting against the compulsory Sunday observance bill (S. 3218); to the Committee on the District of Columbia.

3111. By Mr. BULWINKLE: Petition of Hickory Chamber of Commerce, Hickory, N. C., praying for an increase in appropriation for the Bureau of Fisheries; to the Committee on the Merchant Marine and Fisheries.

3112. Also, petition of Lions' Club of Charlotte, N. C., protesting against the destruction of the U. S. S. *George Washington*; to the Committee on Naval Affairs.

3113. By Mr. DICKINSON of Missouri: Petition of W. B. Ochs et al., of Clinton Mo., protesting against the passage of Senate bill 3218; to the Committee on the District of Columbia.

3114. By Mr. KINDRED: Petition of employees of the Brooklyn postal service, urging the passage of Senate bill 1898; to the Committee on the Post Office and Post Roads.

3115. Also, petition of the annual conference of county agricultural agents, extension specialists, county and city home demonstration agents, institute workers, and county club agents, held at Cornell University, Ithaca, N. Y., 1924, expressing its appreciation for the special weather forecasts issued by the Ithaca weather bureau and requesting its resumption next year; to the Committee on Agriculture.

3116. By Mr. MAPES: Petition of the Guy V. Henry Camp, No. 3, Department of Michigan, United Spanish War Veterans, Grand Rapids, Mich., Arnold Claver, commander, and John J. Davison, adjutant, indorsing the so-called Knutson bill (H. R. 5934) with an amendment; to the Committee on Pensions.

3117. Also, petition of Mr. Robert E. McCormick and 51 other veterans and the wives and widows of veterans of the Spanish-American War, recommending the passage of the so-called Knutson bill (H. R. 5934); to the Committee on Pensions.

3118. By Mr. O'CONNELL of New York: Petition of the Chamber of Commerce of the State of New York, favoring the reduction of passport fees; to the Committee on Ways and Means.

3119. Also, petition of the Chamber of Commerce of the State of New York, opposing the child labor amendment to the Federal Constitution; to the Committee on the Judiciary.

SENATE

TUESDAY, December 9, 1924

(Legislative day of Monday, December 8, 1924)

The Senate met at 12 o'clock m., on the expiration of the recess.

PETER NORBECK, a Senator from the State of South Dakota, appeared in his seat to-day.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Clerk will call the roll.

The principal legislative clerk called the roll, and the following Senators answered to their names:

Ball	Fess	King	Ransdell
Bayard	Fletcher	Ladd	Reed, Mo.
Borah	Fraser	McKellar	Robinson
Brookhart	George	McKinley	Sheppard
Broussard	Gerry	McLean	Shipstead
Bruce	Glass	McNary	Shortridge
Bursum	Gooding	Mayfield	Smith
Butler	Greene	Means	Smoot
Capper	Hale	Metcalf	Spencer
Copeland	Harrell	Moses	Stanfield
Couzens	Harris	Neely	Sterling
Cummins	Harrison	Norbeck	Swanson
Curtis	Heflin	Norris	Trammell
Dial	Howell	Oddie	Underwood
Dill	Johnson, Calif.	Overman	Wadsworth
Edge	Johnson, Minn.	Owen	Walsh, Mass.
Edwards	Jones, N. Mex.	Pepper	Warren
Ernst	Jones, Wash.	Phillips	Wheeler
Fernald	Kendrick	Pittman	Willis
Ferrie	Keyes	Ralston	

Mr. HARRISON. I wish to announce, and let the announcement stand for the day, that my colleague [Mr. STEPHENS] is unavoidably absent on account of illness.

The PRESIDENT pro tempore. Seventy-nine Senators have answered to the roll call. There is a quorum present.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed without amendment the following bills of the Senate:

S. 116. An act to amend section 196 of the Code of Law for the District of Columbia; and

S. 933. An act to provide for the examination and registration of architects and to regulate the practice of architecture in the District of Columbia.

The message also announced that the House had passed a bill (H. R. 8410) to change the name of Third Place NE. to Abbey Place, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the bill (S. 1343) to authorize the widening of Fourth Street, south of Cedar Street NW., in the District of Columbia, and for other purposes, with an amendment, in which it requested the concurrence of the Senate.

REPORT OF THE GENERAL ACCOUNTING OFFICE

The PRESIDENT pro tempore laid before the Senate a communication from the Comptroller General of the United States, transmitting, pursuant to law, the annual report of the General Accounting Office for the fiscal year 1924, which was referred to the Committee on Appropriations.

SETTLEMENT OF SHIPPING BOARD CLAIMS

The PRESIDENT pro tempore laid before the Senate a communication from the chairman of the United States Shipping Board, transmitting, pursuant to law, a report of the arbitration awards or settlements of claims agreed to since the previous session of Congress by the United States Shipping Board and/or the United States Shipping Board Fleet Corporation, which was referred to the Committee on Appropriations.

REPORT OF THE NATIONAL SOCIETY OF THE DAUGHTERS OF THE AMERICAN REVOLUTION

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Smithsonian Institution,

transmitting, pursuant to law, the twenty-seventh annual report of the National Society of the Daughters of the American Revolution covering the period from March 1, 1923, to March 1, 1924, which was referred to the Committee on Printing.

REPORT OF SUPERINTENDENT OF HOSPITAL FOR THE INSANE

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a report of the Superintendent of the Government Hospital for the Insane showing in detail receipts and expenditures for all purposes connected with the hospital for the preceding fiscal year, which was referred to the Committee on the District of Columbia.

REPORT OF THE COMMISSIONER OF RECLAMATION

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, the annual report of the Bureau of Reclamation for the fiscal year 1924, which was referred to the Committee on Irrigation and Reclamation.

WIDENING OF FOURTH STREET IN THE DISTRICT

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 1343) to authorize the widening of Fourth Street, south of Cedar Street NW., in the District of Columbia, and for other purposes, which was, on page 2, line 5, to strike out the word "less" and to insert in lieu thereof the word "more."

Mr. BALL. I ask unanimous consent that the Senate concur in the amendment of the House.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Senate concurs in the House amendment.

PETITIONS AND MEMORIALS

The PRESIDENT pro tempore laid before the Senate a communication from Santiago Iglesias, a senator of Porto Rico, containing an extract from the proceedings of the recent convention of the American Federation of Labor at El Paso, Tex., relative to political conditions in Porto Rico, which was referred to the Committee on Territories and Insular Possessions.

Mr. JONES of Washington presented numerous petitions of sundry citizens in the State of Washington, praying for the passage of legislation granting increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

Mr. CAPPER presented a resolution of the Kansas City (Kans.) Chamber of Commerce, favoring the passage of legislation granting increased compensation to postal employees, which was referred to the Committee on Post Offices and Post Roads.

Mr. WILLIS presented sundry memorials and letters and telegrams in the nature of memorials of citizens and organizations in the State of Ohio, remonstrating against the ratification of the so-called Hay-Quesada treaty proposing to cede the Isle of Pines to Cuba, which were referred to the Committee on Foreign Relations.

Mr. FESS presented memorials of sundry citizens of Cleveland, Madisonville, and Lorain, all in the State of Ohio, remonstrating against the ratification of the so-called Hay-Quesada treaty proposing to cede the Isle of Pines to Cuba, which were referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of Cincinnati and vicinity, all in the State of Ohio, praying that the law enacted in June, 1922, relative to the pay of commissioned chief and warrant officers of the Navy be amended so that the pay of these officers may remain the same as prior to June, 1922, which was referred to the Committee on Naval Affairs.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MOSES:

A bill (S. 3608) granting an increase of pension to Sarah C. Quinn (with accompanying papers); and

A bill (S. 3609) granting an increase of pension to Louise B. Fuller (with accompanying papers); to the Committee on Pensions.

By Mr. REED of Missouri:

A bill (S. 3610) authorizing the construction of a bridge across the Missouri River near Arrow Rock, Mo.; and

A bill (S. 3611) authorizing the construction of a bridge across the Missouri River near St. Charles, Mo.; to the Committee on Commerce.

By Mr. HALE:

A bill (S. 3612) granting an increase of pension to Lydia A. Howe (with accompanying papers); to the Committee on Pensions.

By Mr. JONES of Washington:

A bill (S. 3613) to provide for retirement for disability in the Lighthouse Service; to the Committee on Commerce.

By Mr. HARRELD:

A bill (S. 3614) for the erection of a public building at Holdenville, Hughes County, Okla.; to the Committee on Public Buildings and Grounds.

A bill (S. 3615) for the relief of John O'Brien; to the Committee on Military Affairs.

A bill (S. 3616) authorizing the Chippewa Indians of Minnesota to submit claims to the Court of Claims; to the Committee on Indian Affairs.

By Mr. BURSUM:

A bill (S. 3617) granting an increase of pension to David J. Leahy; to the Committee on Pensions.

A bill (S. 3618) to extend the benefits of the United States employees' compensation act of September 7, 1916, to Clara E. Nichols; to the Committee on Claims.

By Mr. FLETCHER:

A bill (S. 3619) granting a pension to Ellen F. Marston; to the Committee on Pensions.

By Mr. PEPPER:

A bill (S. 3620) for the relief of the Atlantic Refining Co.; to the Committee on Claims.

By Mr. RANSDALL:

A bill (S. 3621) granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a bridge across the Ouachita River at or near Monroe, La.; and

A bill (S. 3622) granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a bridge across the Bayou Bartholomew at each of the following-named points in Morehouse Parish, La.: Vester Ferry, Ward Ferry, and Zachery Ferry; to the Committee on Commerce.

CHANGE OF REFERENCE

On motion of Mr. BROOKHART, the Committee on the Judiciary was discharged from the further consideration of the bill (S. 3585) to extend the benefits of the employees' compensation act of September 7, 1916, to Minnie Schroeder, and it was referred to the Committee on Claims.

HOUSE BILL REFERRED

The bill (H. R. 8410) to change the name of Third Place NE, to Abbey Place was read twice by its title and referred to the Committee on the District of Columbia.

AMENDMENTS TO MUSCLE SHOALS BILL

Mr. McKELLAR and Mr. COPELAND each submitted an amendment; and Mr. HARRISON, Mr. SMITH, and Mr. HOWELL each submitted sundry amendments intended to be proposed by them to House bill 518, the so-called Muscle Shoals bill, which were severally ordered to lie on the table and to be printed.

GEORGEANNA GETCHELL

Mr. WALSH of Massachusetts submitted the following resolution (S. Res. 282), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay out of the contingent fund of the Senate to Georganna Getchell, widow of Edwin P. Getchell, late a messenger in the employ of the Senate, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from Maryland [Mr. BRUCE].

Mr. UNDERWOOD. I ask for the yeas and nays.

Mr. SMITH. Mr. President, a parliamentary inquiry. What is the matter now before the Senate on which we are asked to vote?

The PRESIDENT pro tempore. The Clerk will report the amendment proposed by the Senator from Maryland.

The READING CLERK. In the substitute reported by the committee, on page 23, line 11, after the word "efficiency," it is proposed to strike out the period and insert a semicolon and the words:

and in the selection of employees for said corporation and in the promotion of any such employees all selections shall be made in accordance with the provisions of the Federal Statutes relating to the Federal classified civil service and the powers and authority of the President and the United States Civil Service Commission with respect thereto, but all such employees shall be subject to dismissal by the board at its pleasure.

Mr. BRUCE. I ask for the yeas and nays on this question.

Mr. SMITH. They have been demanded. I merely wanted to have the amendment read as it is now presented by the Senator from Maryland. The last clause is the one in which I was interested.

The PRESIDENT pro tempore. The yeas and nays have been demanded.

The yeas and nays were ordered.

Mr. McKELLAR. Mr. President, on yesterday the Senator from Maryland [Mr. BRUCE], I think somewhat humorously, stated that perhaps the reason why some of the Senators from the States near by the shoals did not want the employees to go under civil service was because we might be interested in the appointments to be made by the corporation. As I stated yesterday, of course that did not apply to me because I had not thought of it. But upon looking up the record I find that the State of Maryland has a larger quota of employees under the civil service than any other State in the Union. It is entitled to 495 employees and it has 2,237 in the civil service.

I am quite sure the Senator from Maryland did not have it in mind at all that Maryland would probably profit more by having the employees of the proposed corporation under the civil service than it does now, according to the actual figures. I am sure he did not have it in mind, and I do not make any suggestion of that sort except to give the facts as they are. Maryland profits now more by the civil service than any other State in the Union.

Mr. BRUCE. Mr. President, I simply desire to return my thanks to the Senator from Tennessee for bringing to the attention of the Senate this particular illustration of the enterprise and superior qualifications of my constituents. If there is anything in the fact to which he refers, I think it is but fair to them to say that of course whatever distributive share of public offices they obtain, they obtain in the form of the quota fixed by law.

Mr. McKELLAR. Oh, no. The quota fixed by law provides that Maryland shall have 495, but it has 2,237.

Mr. BRUCE. That must have been due partly to lack of applications on the part of the citizens belonging to other constituencies.

Mr. McKELLAR. I think it was due to the extraordinary forwardness of the applicants of the State of Maryland, which is so near by the District of Columbia.

Mr. SMOOT. I will state to the Senator it was due to the fact that they were in the employment of the Government when covered under the civil service, and they are still in that service.

Mr. McKELLAR. Anyhow, Maryland is well cared for under the civil service.

Mr. BRUCE. The point I wish to make is that it is partly due to their proximity to the Capital, but far more to superiority of their qualifications for office.

Mr. DIAL. Mr. President, yesterday afternoon when we took a recess I was calling attention to the fact that this is a business enterprise. It is an exception from the ordinary governmental proposition and we ought not to bind it down by impractical visionary rules. We will have to operate the plant seven days in a week, 24 hours a day, and every day in the year, and we do not want people there raising questions about whether they should be worked or not, transferred from one department to another, and so forth. Furthermore, to put this business enterprise under civil service rules would possibly prevent us from getting a lessee at all. We should not bind down the authority and the power of the lessee in the management of the business. That would tend greatly to discourage people from bidding on the property in an effort to obtain the lease. I hope the amendment will be defeated.

Mr. NORRIS. Mr. President, I do not question the good faith of the Senator from Maryland [Mr. BRUCE] in offering the amendment. I think it is perfectly apparent why the State of Maryland has more persons in the employ of the Government under civil service and perhaps outside of the civil service than any other State. We all know that particularly during the war, when it was necessary to increase at a fabulous rate the number employed, it was very often absolutely necessary to take into the civil service those who were right here on the ground. Maryland, as we know, is right next door to the District of Columbia. So I do not regard that as anything extraordinary.

When the Senator from Maryland first offered his amendment I expressed myself as favorable to it; but after more carefully examining section 6 of the committee bill, to which the amendment is directed, I changed my mind in reference to the amendment, and, while I do not regard it as exceedingly important, I am of the opinion that it would detract from efficiency rather than help it, for if Senators will examine section 6 they will find that as framed it is already a civil service provision. I think it is more fully so than any provision that has ever been put into a statute which has been passed by Congress. It is a provision to which the committee gave a great deal of consideration, the object being to remove this governmental corporation entirely from the domain of party politics. We should welcome any amendment that would assist in effectuating that object in any degree.

Section 6, among other things, provides that this board shall keep a record of all recommendations from whatever source; that even if such recommendations are made orally, they shall be entered in the record, and that that record shall be open to public inspection. If this amendment were agreed to, I think its effect would be practically to nullify that provision of section 6; at least it would be of no value, as it seems to me; and as between the provisions which are in section 6, in which it is specifically stated that no political test, no partisan qualification, no recommendation of a political nature, shall ever be given any consideration in either the appointment or promotion of any of the officials subject to appointment or promotion by this board and the Senator's amendment, I prefer the language of section 6, according to which it is made a criminal offense for the board to permit partisan influences to control their official acts, and if found guilty of such an act it automatically removes the incumbents from office.

The amendment of the Senator from Maryland provides for a somewhat different form of civil service. It may be that it would be more effective than that provided by the language used by the committee. Personally, however, I do not think it would be. It seems to me the question involved is whether the provisions now in section 6 or the provisions of the amendment of the Senator from Maryland would go further toward the removal of the activities of the employees and of the board from politics, that being the object of the section. Personally, as I have stated, it seems to me that the provisions already in the bill are more effective than the provisions framed by the Senator from Maryland.

If the Senator from Maryland had offered this amendment to the Coolidge substitute for the committee bill, there could not be this objection offered to it, because that substitute provides that the members of the board shall hold their office at the pleasure of the President; that they shall be responsible to no one except the President. It would be eminently proper in such a case, it seems to me, in the absence of other provisions similar to or the effect of which would be similar to the one that the committee has already incorporated in section 6, to put these officials under civil service, because there is no civil-service provision in the Coolidge substitute from one end of it to the other. I think it throws the appointments at once into the partisan political arena and they would become the football of politics. Senators may not agree with that view, but at least there is no attempt made in the proposed statute to keep appointments out of politics. They would be kept out if the President always insisted on keeping them out and should direct the board when he appointed them that they should do that, and they probably always would do it. Be that as it may, the objection does not apply, it seems to me, to the committee bill.

I want to remove from partisan politics the activities of this corporation, no matter which bill may be finally enacted, as I should be glad to remove from partisan politics the appointments of all governmental employees; indeed, if we had the kind of provision in the general law that we have in section 6, I doubt very much whether there would be, at least to as great an extent as now exists, necessity for the Civil Service Com-

mission. It seems to me, therefore, that the amendment ought to be defeated as proposed to be applied to section 6.

Mr. BRUCE. Mr. President, I am very sorry, indeed, that the Senator from Nebraska, for whom I entertain such a profound respect, should have seen fit to withdraw from this amendment of mine the support that he has been giving to it. His temporary support of the amendment reminds me just a little bit of the simile in Burns's poem—

* * * Like the snow falls in the river,
A moment white—then melts forever.

Or, if I may lapse into somewhat cruder poetry, it reminds me of the abrupt conversion which is said to have taken place in the habits and character of a sinner who fell from his saddle and was redeemed by the mercy of God before he reached the ground. That old distich runs:

Between the stirrup and the ground,
He mercy sought, he mercy found.

It really does seem to me that the sudden transformation that has taken place in the views of the Senator from Nebraska in reference to my amendment justifies me in recalling that little distich. I was eager for his support because he is a tower of strength to any cause that he supports; but now I submit to this body that he has not assigned any reasons which really should work any change in his views with reference to my amendment. Section 6 of the Norris substitute as it stands is nothing but a string, if I may use such a strong expression without disrespect, of hollow moral platitudes; that is all. It merely says that in the selection of employees under this bill there is to be no political discrimination or favoritism. These provisions are not attended with any sanction of any kind; they are not attended with any penalty of any kind. They comprise simply a smooth-sounding declaration that politics are to be completely excluded from appointments under this proposed act.

Mr. NORRIS. May I interrupt the Senator?

The PRESIDENT pro tempore. Does the Senator from Maryland yield to the Senator from Nebraska?

Mr. BRUCE. I yield with pleasure.

Mr. NORRIS. I wish to call the attention of the Senator to this language in section 6:

Any member of said board who permits the use of political or partisan influence in the selection of any employee, or in the promotion of any such employee of said corporation, or who gives any consideration to political consideration in the official action of said board, or who, knowing that such political influence has been or is attempted, does not record the same in said record shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in a sum not exceeding \$1,000 or be imprisoned not to exceed six months, or both such fine and imprisonment, and the conviction of any member of said board of the offense herein defined shall have the effect of removing such member from office.

Mr. BRUCE. I admit my error. That provision escaped my attention. However, I do not think that such a provision would be truly effective because of the difficulty of bringing home to anyone any offense of that description in any really substantial and thoroughly probative way. So far as I know, the purposes of no merit system of appointment that has ever been created by law have been compassed by a mere penalty of that sort. It is necessary to have some kind of an impersonal, disinterested system, completely aloof from the temptations of party motives and aims to secure the appointment of subordinates without reference to political considerations.

To show how utterly ineffective, as a rule, anything short of a true merit system of appointment is to accomplish the object that the Senator from Nebraska has in view and that I have in view, all that we have got to do is to refer to the present Federal statute, which says specifically that no recommendations except as to character and residence made by any Member of the Senate with reference to any office that falls within the scope of the Federal classified service shall be heeded by any official charged with the duty of making appointments. That statute is all but an absolute dead letter. There are doubtless not a few Members of the Senate who heed the prohibition. I myself can say I have faithfully tried to heed it, and I have no right certainly to arrogate to myself any superior degree of public virtue as contrasted with my colleagues in the Senate; but how many Members of the Senate are there that do not heed it.

Mr. NORRIS. May I interrupt the Senator again?

Mr. BRUCE. Yes, sir; with pleasure.

Mr. NORRIS. As I understand, the Senator has quoted the law making it illegal for any Senator to make a recom-

mendation for appointment in the classified civil service. Is that the law now?

Mr. BRUCE. That is the law, except as to recommendations relative to character and residence.

Mr. NORRIS. Yes. Now, suppose we added to that law a provision that the person to whom such a communication was directed should record it in a record that we provided should be kept and as a penalty stipulated that he should be removed from office if he did not do it. That would perhaps make it more effective.

Mr. BRUCE. That would strengthen the provision, but at the same time that would not secure what is the primary object of the merit system of appointment, which is to obtain a first-class set of employees, completely removed from all ordinary personal and political influences. The suggestions of the Senator, if carried into effect, might prevent some Senator from making a recommendation; they might even result in a conviction at the hands of the criminal law of some Senator who did make such a recommendation, but they would not subserve what, as I have said, is after all the chief, the leading purpose of any civil-service reform system, and that is to provide for the selection of subordinates and employees by some impartial, disinterested system over which personal and political influences have no substantial control.

Now, getting back to that statute, a short time ago a gentleman in Maryland wrote to me and asked me whether I would not recommend the appointment of a certain young man whose application fell within the scope of the Federal classified service. I wrote him that I did not feel at liberty to do so, and I called his attention to the statute. Just about the same time he wrote to another Member of this body, a Senator for whom I entertain a very high respect and who is doubtlessly influenced in his general conduct by motives quite as high as mine, and very promptly that Senator wrote to him, "Why, certainly; I will do everything in my power to promote your object, and I am writing a letter to one of the chief officials of the Government with regard to the matter." So, as I say, the statute is largely a dead letter. That was recognized by the Senator from Tennessee [Mr. McKELLAR] yesterday when he called my attention to the fact that every day of the world recommendations are made by Members of the United States Senate in connection with positions that fall within the scope of the Federal classified service.

I am brought right back to my thesis; that is to say, that nothing except something that completely cuts up by the roots the temptations to this sort of conduct, nothing but some fair, impartial, just, impersonal system of appointment based on the idea of competitive examination, can do away with the patronage or the spoils system of politics. I submit that the Senator from Nebraska has not urged any reason, in my judgment, for his abrupt volte-face, if I may use such an expression.

Mr. NORRIS. Mr. President, may I interrupt the Senator?

The PRESIDENT pro tempore. Does the Senator from Maryland yield to the Senator from Nebraska?

Mr. BRUCE. Yes.

Mr. NORRIS. So that there may be no misunderstanding, Mr. President, I want to say to the Senator that I do not think this amendment is vicious, or bad, or anything of that kind.

Mr. BRUCE. Oh, no.

Mr. NORRIS. I would not feel badly if it were agreed to.

Mr. BRUCE. I know the Senator would not. The Senator is a friend of the merit system of appointment.

Mr. NORRIS. I may be wrong. I am not trying to control the vote of a single other Senator, even if I could, on the question; but I have expressed myself now as I did when the amendment was first introduced in the Senate, and I have talked to the Senators favorable to it.

Mr. BRUCE. The Senator's support is such a good and valuable thing that naturally I am very averse to parting with it.

I want to say in conclusion simply that I have offered this amendment also to the Underwood substitute, or, as the Senator from Nebraska calls it, the Coolidge substitute. It is a matter of personal indifference to me whether the substitute proceeds from the Senator from Alabama or whether it proceeds from the President of the United States, so far as that is concerned; but I have offered an amendment precisely similar to the pending amendment to the substitute of the Senator from Alabama, and I can truly say that while I favor the substitute of the Senator from Alabama as distinguished from the substitute of the Senator from Nebraska, because the substitute of the Senator from Alabama contemplates alternatively the leasing or Government operation of

this great plant, yet the provisions of his substitute relating to the selection of employees are considerably more objectionable to me than the provisions of section 6 of the substitute of the Senator from Nebraska, because they say in express terms that all the officials or employees appointed or selected under the substitute are not to be deemed officials or employees of the United States.

Now, just think of that! The board of directors of this governmental corporation is to be composed of persons appointed by the President. All the stock is to be held by the Government of the United States. All the property that the substitute directs to be turned over to the board is the property of the United States; and yet the substitute of the Senator from Alabama says that officials and employees of every description who shall be connected with the project are not to be deemed officials or employees of the United States—in other words, are not to be deemed as holding Federal office at all.

Why, what sort of substitute is that? What kind of monstrosity, what kind of enormity is that of which it is declared at one moment that it is to be a Federal instrumentality, that its stock is to be Federal, that its property is to be Federal, that it is to be absolutely free from taxation, and yet that none of its officials and employees are to be taken as being incumbents of Federal office at all. Now, in the name of Heaven, what are they? In the name of Heaven, I repeat, what are they? Certainly they are not the servants of a private concern. That idea is not tenable for a moment; and if they are servants of the Government, then what good reason can be assigned why they should not be appointed and selected as other appointees and employees of the Government are?

I never heard of such a proposition. The corporation is to be a Federal corporation in every essential particular, a mere corporated instrumentality of the Government, and yet—presto! change—its servants are to be treated exactly as if they were the agents and employees of some kind of private industrial concern. That was the thing that suggested to my mind the idea—probably a perfectly groundless one—that there was just a little disposition upon the part of the representatives of constituencies adjacent to Muscle Shoals to concentrate whatever patronage there may be under the Underwood substitute in the hands of a very small portion of the people of the United States.

The surmise may be utterly unwarranted, and certainly I do not know any gentleman who is less likely to be governed by indirect motives than the Senator from Alabama; but no matter what the intent is the tendency of the Underwood substitute will be to localize, more or less, all patronage under this bill, to mass it practically under the control of the purveyors of patronage in the States of Alabama and Mississippi and South Carolina and North Carolina.

I have nothing but good will for those States and I have a very great admiration for the Senator [Mr. UNDERWOOD] who sits near me, but if there is to be any patronage under this bill—and there will be a large amount of patronage under it—I say, let us have that patronage diffused over the whole face of the United States, under the provisions of the laws and rules and regulations relating to the Federal classified service.

I trust that my amendment will be adopted.

Mr. UNDERWOOD. Mr. President, I do not desire to detain the Senate longer than a moment; but after the statement just made by the Senator from Maryland [Mr. Bruce] it is necessary for me to say a word.

I have never dealt in the patronage line to any great extent, and I certainly want to divorce any Government corporation that I may help to organize from partisan politics and political appointments. I am going to vote against the amendment that is offered to the bill of the Senator from Nebraska [Mr. NORRIS], because I should vote against it if it were offered to my substitute. Of course, I am not so much concerned about the corporation organized by the Senator from Nebraska. He is better advised than I am as to how he wants it to operate; but I certainly should be very much opposed to the amendment if it were made a part of the bill that I prepared and offered, and my reason is this:

The Senator from Maryland [Mr. Bruce] thinks it is an anomaly that in providing for the organization of this Government corporation I should have put in a clause stating that these employees shall not be treated or considered as Government employees. My purpose is perfectly evident. I wanted it made clear that none of the rules, laws, or regulations affecting Government employees should affect the employees of this corporation, and it is perfectly apparent what I was driving at—that I do not believe a great industrial corporation can work under civil-service rules and regulations.

It has been said, time in and time out, that it is impossible for the Government of the United States to do business, that it can not successfully carry on a business enterprise, and to a large extent that is true. It is because of the red tape in Government procedure. It is because of the lack of efficiency in its employees. It is because of the fixed status of men in Government employment who are looking to themselves and not to the objective of success of the enterprise.

I hope, if this legislation passes, that a private lessee will make a satisfactory bid within the terms of this legislation, and take away from the Government the question of furnishing nitrogen for national defense and nitrogen in time of peace for fertilizer for the farmers, and run it as a private enterprise. If that can not be done, however, this great work must go on, and the only way it can go on is by the hand of the Government if no individual citizen will carry it on.

I wanted to try for once to write a bill that would establish a Government corporation on the same basis of operation as the great industrial corporations of America are run—the United States Steel Corporation in its efficiency, for instance. To accomplish that efficiency the captain of the team has to have absolute command. It is the only way in which efficiency can be obtained. The men down the line have to know that the man who takes command of an industrial plant selects men for their accomplishment and not because they can pass an examination. The question is whether or not they produce results. When they do not produce results they are fired, and a man who can produce results is put in their place.

I believe in the application of the civil-service tests in the appointment of employees in Government bureaus. I think to a certain extent we have extended the civil service laws entirely too far for the benefit of the Government, but as to Government clerks and other such employees in the departments, I am heartily in favor of the continuation of the present law. But for the operation of a great industrial corporation, an amendment of this kind would merely have the effect, in my opinion, of destroying efficiency, and bringing about a failure of production of nitrogen at a profitable rate and the production of fertilizers for the American farmer at a reduction of cost.

I shall therefore vote against the amendment offered by the Senator from Maryland to the substitute reported by the Senator from Nebraska, and I hope, if a similar amendment is offered hereafter to the proposal I have made, that in the interest of efficiency the Senate will defeat the amendment.

Mr. BRUCE. May I ask the Senator a question before he sits down?

Mr. UNDERWOOD. Certainly.

Mr. BRUCE. Does the Senator doubt for a moment that if this corporation should be established, Members of Congress would be subjected to precisely the same degree of political pressure for places in that corporation as they are in connection with other Government work?

Mr. UNDERWOOD. I think perhaps they would be; but I am not here holding a brief to defend my colleagues from annoyance. The whole working of this corporation, if it shall be established, will depend on the men the President of the United States shall select as the board of directors, and I hope he will select five business men who will disregard politics entirely and consecrate their service to the benefit of the people of the United States in national defense and for the production of fertilizer. If he selects that kind of men, they will say that they are not going to make political appointments.

I do not mean to say that the Senator from Maryland or myself may not be importuned for many appointments, and it may annoy us; but, as I have said, I am not holding a brief here to prevent annoyance to Senators. I am holding a brief to try to organize an efficient business corporation which will do business as every efficient corporation should do it, under the command of the man who stands on the bridge and captains the industry, and when you put that man on the bridge you should not interfere with his hand by theoretical laws and Government red tape.

As to the selection of employees, we have had that problem in connection with that work before. We spent \$60,000,000 down there, and most of the ordinary labor came from Alabama or Georgia or Tennessee, but practically all of the captains and superintendents came from the Northern States. There is no reason why, in connection with the real positions down there, we should expect that these five directors would choose the appointees from Alabama or Mississippi or Georgia or Tennessee. If they do their duty they will select men of efficiency and capacity, no matter where they come from, and if they do not do their duty, but are going to play politics with the machine, it is dead right now.

Mr. BRUCE. Mr. President—

The PRESIDENT pro tempore. Does the Senator desire to ask a question of the Senator from Alabama?

Mr. BRUCE. I wish to ask a question.

Mr. UNDERWOOD. I will be glad to answer any question.

Mr. BRUCE. I wish to say to the Senator that, so far as he contends that it would be preferable to lease this plant rather than to operate it through any Government agency, I go along with him completely. I do not hesitate to declare that if he were to strike out every word in his substitute relating to governmental operation of the plant, and leave nothing but the authority to the Secretary of War to lease, his substitute would be even more acceptable to me than it is now, because my observation has been that a certain class of greivous abuses are absolutely inseparable from the operations of all governmental corporations. But that is not the situation that is presented to us. The alternatives presented to us are whether this governmental corporation shall be left free to select its employees without any reference whatsoever to the Federal statutes and rules and regulations relating to the Federal classified service, or whether its employees shall be selected agreeably with those laws and rules and regulations. I say that if the latter are not made parts of the Underwood substitute the effect inevitably will be to let in all the grievances and scandals of the old patronage or spoils system of appointment. How hard it is to contend that there is any intrinsic reason why the merit system of appointment should not be applied to a governmental corporation is shown by the fact, as I understand it, though the Senator from Washington will correct me if I am wrong, that the appointments under the United States Shipping Board do fall within the Federal statutes and rules and regulations relating to the classified service.

I understood Doctor Doyle, of the United States Civil Service Commission to say as much to me. What reason can there be why all the employees of the United States Shipping Board and the Emergency Fleet Corporation should be selected under the provisions of law relating to the Federal classified service, and yet the employees of this proposed power corporation not be?

I may be wrong; it does not do to sniff the air for a taint too nicely, but I am beginning to suspect that a part of the influences that have led to the creation of these Federal corporations are the result of a desire to escape the trammels of the Federal merit system of appointment.

There are only two or three of these governmental agencies the employees of which are outside of the Federal classified service, as I understand it. There is the Emergency Fleet Corporation, and there is the Panama Railroad; that is all, I believe. So the choice is between a governmental corporation restrained by the provisions of the merit system of appointment and a governmental corporation not so restrained. We are not discussing the choice between a lease and a governmental corporation.

What right the Senator has to suppose that the application of the merit system of appointment to this Federal corporation would work any sort of paralysis of its energies I can not conceive. He says that system is not applicable to the Government when it is engaged in some sort of industrial enterprise. As I look at it, the Government should not engage in an industrial enterprise of any kind. I agree with the Senator from New York on that subject. But, at the same time, we know that the Government has been in the habit for years and years of exercising functions that are essentially business functions. Take the business of delivering letters alone. There must be a Postmaster General, and there must be assistant postmasters general. There must be a vast number of graded postal officials and servants of one sort or another. And yet the great body of the postal servants of the Government are selected under the merit system.

Mr. STERLING. Mr. President, reference has been made to the Emergency Fleet Corporation, as to whether the employees of that corporation are appointed under the civil-service rules. I can not say as to that. I do not remember the provisions of the statute creating the Emergency Fleet Corporation or providing for it; but under the Shipping Board the appointees must be selected from the list of eligibles, save these—a secretary, a clerk to each commissioner, the attorneys, naval architects, and such special experts and examiners as the board may from time to time find necessary. All the rest are appointed under civil-service rules.

Mr. BRUCE. That is just what I was endeavoring to point out.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the Senator from Maryland, and the yeas and nays have been ordered.

Mr. HARRISON. Mr. President, I desire to say just a word. It occurs to me that the Senator from Maryland is unduly alarmed about this situation. He looks at it differently from the way that we away from Washington would. He sees it through a colored lens. It is quite true that perhaps he has more applicants for governmental jobs than Senators from other States have, except, perhaps, Virginia. Maryland and Virginia are located right here, bordering the District of Columbia, and the constituents of those Senators no doubt appeal to them very often. The Senator is gun-shy.

Mr. SWANSON. Mr. President, if the Senator will permit me—

Mr. HARRISON. I know the Senator from Virginia is unlike the Senator from Maryland; he likes to have his constituents come and make their appeals to him.

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Virginia?

Mr. HARRISON. I yield.

Mr. SWANSON. If this amendment shall be adopted I do not suppose a man would ever be certified to one of these positions from Virginia, the District of Columbia, or Maryland under the civil-service rules, so many people come from other States. It is such an honor to be a Virginian that the people from that State classify themselves very quickly as Virginians, and our quota of applicants is filled up. As I said, if this amendment shall prevail, I doubt whether one man would be certified by the Civil Service Commission from Virginia, the District of Columbia, or Maryland for 10 years. So the Senator's criticism of the Senator from Maryland and myself is entirely uncalled for.

Mr. HARRISON. If the Senator will permit, I do not want to get into a controversy as between Maryland and Virginia, and I do not suppose that any of us know whether Virginia or Maryland has been able to get the most appointees, but all of us do know that the Senators from both States have striven hard to get all they could.

Mr. SWANSON. If the Senator will allow me, all the Government positions, except very few, are now under the civil service and are prorated among the States. The Civil Service Commission can not certify people from Virginia, the District of Columbia, or Maryland until the other 46 States have their pro rata. I do not suppose there has been a certification from either Maryland or Virginia or the District of Columbia for some time. So the Senator is entirely mistaken in thinking this would help the Senator from Maryland in getting any positions. I think it would prevent him from getting any of the positions.

Mr. HARRISON. Mr. President, these great plants and dams and locks have so far been erected and constructed without the application of the civil-service rules, and I doubt whether the Senator from Maryland, in all his experience as a private citizen or as a public official, ever had a request from anyone to assist them to get a job at Muscle Shoals.

I am sure I have never had a request from anyone desiring a position with the Alaskan Railway Co., and I have never had a request, and I am sure that few Senators have, from anyone wanting political influence brought to bear upon the Panama Railroad, which is operated by the Government free from any civil-service restrictions. Indeed, I have had no request from anyone for a position with the Emergency Fleet Corporation, which the Senator admits does not come under the civil-service system. If Senators will investigate, they will find, as the Senator has admitted, that all of the agencies of the Government which are really doing industrial work, as operating the ships, as operating railroads, or when the Panama Canal was constructed, are and were free from the restrictions of the civil-service rules.

Mr. McKELLAR. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Tennessee?

Mr. HARRISON. I yield.

Mr. McKELLAR. In order that we may see how the civil-service employees are selected, and from what States, especially in view of what the Senator from Virginia [Mr. Swanson] has said, I desire to give the facts as ascertained from the Civil Service Commission this morning.

The District of Columbia is entitled to 140 civil-service employees. It has 10,981. The State of Maryland is entitled to 495. It has 2,237. The State of Virginia is entitled to 789. It has 2,265. The State of Pennsylvania is entitled to 2,981, and it has 2,324. The State of New York is entitled to 3,551, and as a matter of fact it has only 2,482. The State of Tennessee is entitled to 790, and as a matter of fact it has only 562. That is the way the civil-service proposition is worked out.

Mr. GLASS. Perhaps the State of Tennessee ought to get a Senator who would get the other 237.

Mr. McKELLAR. Perhaps so.

Mr. SWANSON. Mr. President, if the Senator from Mississippi will permit me—

Mr. HARRISON. I yield to the Senator from Virginia.

Mr. SWANSON. The civil service law provides that except in the Government Printing Office and in the Bureau of Engraving and Printing the appointment of employees shall be divided among the States according to population. If Tennessee had an eligible list of applicants who had stood the examination, then nobody could be certified from Maryland, nobody could be certified from the District of Columbia, and nobody could be certified from the State of Virginia until Tennessee and the other 45 States had their pro rata exhausted. Consequently if there is no certification from Tennessee, it is not the fault of Virginia. Applicants must stand an examination. They must show themselves qualified and must express some desire to serve the Government.

As I said, if the amendment is agreed to, with Virginia having 2,240 employees and Maryland 2,240, and with the disposition of everybody that comes here from other States to belong either to the District of Columbia, Virginia, or Maryland and get a home there, then no person would be certified from either of those three jurisdictions until the lease on the Muscle Shoals property had in all probability expired or until the other States had demonstrated their disinclination to apply for the positions.

I do not know of anybody who has been certified from Virginia to the civil service unless it is some scientist or expert that the other States can not furnish, and they certainly should not complain in a case of that kind. Residents of Virginia have stopped standing the ordinary examinations under the civil service. If the amendment offered by the Senator from Maryland is agreed to, I doubt whether, except as to scientific men requiring special skill or expertness, which the rest of the States are unable to furnish, a man would ever be certified for an ordinary clerical position from either Virginia, Maryland, or the District of Columbia.

Mr. HARRISON. I agree thoroughly with the Senator from Virginia. I merely want to say that the agencies that are being operated now, like the Emergency Fleet Corporation and the Panama Railway and the Alaskan Railway, are not under the restrictions of the civil service.

Mr. BRUCE. Why does not the Senator cite the United States Shipping Board?

Mr. HARRISON. The United States Shipping Board does not operate the ships. The Emergency Fleet Corporation operates the ships.

Mr. BRUCE. The United States Shipping Board has a large number of employees all selected under the civil-service system, as the Senator knows.

Mr. HARRISON. Yes; but the agency operating the ships is not tied down by civil-service regulations and restrictions.

Mr. GLASS. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Virginia?

Mr. HARRISON. I yield.

Mr. GLASS. Before we get away from the relative number of employees under civil service with respect to the various States, I want to make it perfectly plain that I spoke facetiously a while ago when I suggested that the State of Tennessee should get a Senator who could secure a greater number of appointments. To illustrate my own incompetency in this respect, I want to say that during the eight years of the last Democratic administration I suggested but one appointee to public office. I do not pretend to compete with my friend the Senator from Tennessee [Mr. McKELLAR] in matters of that kind.

Mr. McKELLAR. Will the Senator from Mississippi let me say in that connection that I think the list from Tennessee shows that the first criticism of the Senator from Virginia was entirely well taken; that if getting people here under the civil service is a part of the duties of a Senator, I have been woefully neglectful of that particular duty, because Tennessee has not anything like her quota. Of course, if that is remissness, I have been remiss in my duty.

Mr. HARRISON. Mr. President, it is an adroit, yet old policy, when some one is against a proposition to load it down with amendments. I might suggest to the Senator from Nebraska the old saying, "Beware the Greeks bearing gifts." The Senator from Maryland [Mr. Bruce] stated that he was against Government operation; that he was against that part of the Underwood bill providing for a corporation to carry on

the operation at Muscle Shoals. Of course, as the bill of the Senator from Nebraska provides for a governmental corporation to do the work, he is opposed to that proposition. It may be that this is one way of killing the whole plan to develop Muscle Shoals. Certainly the man of ordinary business acumen, it would seem to me, would conclude that when the operators of a great industrial plant such as that at Muscle Shoals are tied down with the red tape incident to civil service requirements and regulations we are going to be confronted with failure from the time the proposition is started.

I am opposed to the bill of the Senator from Nebraska, but I would like to have it rather than nothing. I want to see something done at Muscle Shoals, and whether the proposal of the Senator from Nebraska is accepted or whether we accept the proposal of the Senator from Alabama, let us make it so that we can at least have some hope of its success. When we start out upon the plan of bringing in a lot of employees under civil-service requirements whose qualifications are fixed and looked after by the Civil Service Commission here in Washington, of course we will get nowhere either in the manufacture of power for sale or for nitrate production in time of war or to make fertilizer therefrom in time of peace. Let us give the men who are going to operate Muscle Shoals a free hand and let them employ the men, and women if need be, who can do the work, to do it and make it a success.

Let us look at this proposition a moment. The Senator from Maryland said that he intends to offer a similar amendment to the Underwood proposal if the Norris proposal is defeated. The Underwood proposal offers first the opportunity for the Secretary of War to lease Muscle Shoals to private interests, so the Senator would have us say to those business interests that may come before the Secretary of War with their proposals that the Government is going to require that all the people who work in their plant shall be appointed under civil-service requirements and run by civil-service regulations.

Mr. BRUCE. Oh, Mr. President!

Mr. HARRISON. I thought that to state the proposition would show it to be so monstrous that the Senator would disclaim it.

Mr. BRUCE. Yes; but when the Senator states it, he should state it correctly. I never intended for one moment that if the property should be leased the Federal classified service should have anything to do with it whatsoever. Then, of course, the great work would be done by a private industrial concern, which, of course, would do it without the slightest reference to the fact whether the employees it hired were Democrats or Republicans.

Mr. HARRISON. I accept the Senator's explanation.

Mr. BRUCE. Then I have nothing further to say.

Mr. HARRISON. I am glad to have the Senator say that when he offers the amendment to the Underwood proposal he will only contemplate making it apply if the Government operates it; that then only it will apply, and not until then.

Mr. BRUCE. That is the idea.

Mr. HARRISON. But the Senator overlooks the fact that we are trying to get cheap fertilizer for the farmers of the country; that the Underwood proposal provides that if private individuals get the lease and do the work they shall not make over 8 per cent profit on the cost of production. The Government must follow very rigid requirements. Whenever we lay down this proposition with the requirement that they shall employ only civil-service employees, who may not have the ability or qualification to perform the particular work required according to the good judgment of the men who operate the plant, that moment we are going to make it cost so much that the fertilizer can not be sold at a low price to the farmers of the country.

The Underwood proposal provides that if the Government corporation shall not show a profit within four years it shall cease to function and the subject shall come back to Congress and a new lease on the power shall be considered. Of course, it will be a failure in that event. They will have to come back to Congress within the four years and the question will be again before the Congress of the United States. Mr. President, I think if the amendment should be tacked onto the Norris bill and it should become the law, or if it should be adopted on the Underwood proposal and it should become the law, the Muscle Shoals proposition is doomed to failure from that very day. The farmers will get no relief from it. I am against the proposition offered by the Senator from Maryland. Let us not shackle this development at the start. Let us at least give it a fair chance, unfettered and untied by civil-service restrictions.

Mr. STERLING. Mr. President, I was interested in the statement made by the Senator from Mississippi to the effect that the employees of the Panama Canal Zone were not under civil service. I had the idea that some of those employees were under the civil service.

Mr. HARRISON. I did not say the Panama Canal Zone. I said the Panama Railroad, which operates as a separate corporation. Of course, some of the employees on the Panama Canal Zone are under the civil service.

Mr. STERLING. Then I misunderstood the Senator. I thought he referred to all employees on the Canal Zone. On the Panama Canal Zone these employees, I think, are under the civil service: Clerks, stenographers, typewriters, bookkeepers, physicians, surgeons, and nurses. They are all under the service rules.

The PRESIDENT pro tempore. The yeas and nays have been ordered, and the roll will be called.

The reading clerk proceeded to call the roll.

Mr. BAYARD (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. REED]. In his absence I withhold my vote. If I were permitted to vote, I would vote "yea."

Mr. HARRISON (when Mr. STEPHENS's name was called). My colleague [Mr. STEPHENS] has a pair on this question with the junior Senator from Vermont [Mr. DALE].

Mr. JONES of Washington (when Mr. WATSON's name was called). The Senator from Indiana [Mr. WATSON] is necessarily absent from the Senate.

The roll call was concluded.

Mr. HARRELD (after having voted in the negative). I wish to announce that I have a general pair with the senior Senator from North Carolina [Mr. SIMMONS], who, I understand, if present, would vote as I have voted. Therefore I have cast my vote.

Mr. JONES of Washington. I desire to announce the following general pairs:

The Senator from West Virginia [Mr. ELKINS] with the Senator from Oklahoma [Mr. OWENS]; and

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY].

The result was announced—yeas 6, nays 65, as follows:

YEAS—6			
Bruce Copeland	Edge McCormick	Sterling	Wheeler
NAYS—65			
Ashurst	George	McKellar	Reed, Mo.
Ball	Glass	McKinley	Robinson
Brookhart	Gooding	McLean	Sheppard
Broussard	Greene	McNary	Shipstead
Bursum	Hale	Mayfield	Shortridge
Butler	Harreld	Means	Smith
Capper	Harris	Metcalf	Smoot
Couzens	Harrison	Moses	Spencer
Cummins	Hoffin	Neely	Swanson
Curtis	Howell	Norbeck	Trammell
Dial	Johnson, Calif.	Norris	Underwood
Dill	Johnson, Minn.	Oddie	Wadsworth
Edwards	Jones, Wash.	Overman	Walsh, Mass.
Ferris	Kendrick	Pepper	Willis
Foss	Keyes	Philpotts	
Fletcher	King	Ralston	
Frazier	Ladd	Ransdell	
NOT VOTING—24			
Bayard	Ernst	Owen	Stanley
Borah	Fernald	Pittman	Stephens
Cameron	Gerry	Reed, Pa.	Wash, Mont.
Caraway	Jones, N. Mex.	Shields	Warren
Dale	La Follette	Simmons	Watson
Elkins	Lenroot	Stanfield	Weller

So Mr. Bruce's amendment was rejected.

Mr. HARRISON. Mr. President, I desire at this time, in order that it may be printed, to offer an amendment to the so-called Underwood substitute. I do not desire to have the amendment read but merely desire to state that the object of the amendment is to make the four years during which this proposed corporation is to be given a try out 10 years, and at the same time to bring Dam No. 3 and Dam No. 2 within the proposal.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The amendment to the amendment will lie on the table, and be printed.

Mr. HARRIS. I offer the amendment to the Underwood substitute which I send to the desk.

The PRESIDING OFFICER. The Senator from Georgia presents an amendment, which the Secretary will read.

The READING CLERK. It is proposed to amend section 5 of the Underwood substitute by adding the following proviso:

Provided, That no lessee hereunder shall have any right to sell or transfer any lease or any interest therein which may be obtained or secured under this act.

Mr. HARRIS. Mr. President, the amendment explains itself. It is designed to prevent the Government from leasing properties to one corporation and permitting it to sublet them to another. I think all Senators will see the objection to that and the harm that might follow from it. I think there will be no objection on the part of the Senator from Alabama [Mr. Underwood] to the amendment which I have offered.

Mr. UNDERWOOD. May I inquire whether the amendment as proposed is offered to the bill of the Senator from Nebraska [Mr. Norris]?

The PRESIDING OFFICER. The Secretary informs the Chair that the amendment is proposed to the substitute of the Senator from Alabama.

Mr. HARRIS. That is true.

Mr. UNDERWOOD. I do not know whether or not the amendment is subject to discussion at this time; but if it is, I should like to have it read again.

The PRESIDING OFFICER. The Secretary will again state the amendment proposed by the Senator from Georgia.

The amendment to the amendment was again read.

Mr. UNDERWOOD. I should like to say a word in regard to the amendment, but I will wait until the Senator from Georgia shall have concluded.

Mr. HARRIS. I have nothing further to say.

Mr. UNDERWOOD. Mr. President, I am not sure that the Senator's amendment is very material one way or the other in regard to the bill except in this respect, that, as I understand the amendment as read, it proposes to prevent the lessee or the corporation, if this bill shall become a law, from making a sublease to do a part of the work.

Mr. HARRIS. That is all the amendment contemplates.

Mr. UNDERWOOD. I think there are times when a sublease will be absolutely necessary or may be essential. For instance, take the Waco quarry, which is the lime quarry that will furnish the lime to go in the ovens of the cyanamide plant. It might become more useful for that quarry to be operated by a sublessee or a subcontractor, and I see no reason why we should attempt to tie the hands of business men whom we want to be efficient. I do not see any great objection to the Senator's amendment, but it simply removes from the function of the operating concern, whether a lessee or the proposed corporation, one of the powers that usually are possessed by any ordinary business concern, to sublease any part of its work.

Mr. HARRIS. The Senator does not understand the amendment, because his entire argument has been against some provision which is not in the amendment. The amendment is not intended to prevent the lessee from doing just what the Senator is objecting to, but it does prevent the lessee from transferring the lease to some other corporation.

Mr. UNDERWOOD. Then, I understand the Senator to mean the main lease?

Mr. HARRIS. To prevent the lessee from transferring it.

Mr. UNDERWOOD. And to prevent him from selling out the whole enterprise to somebody else?

Mr. HARRIS. To prevent his disposing of it to some one else.

Mr. UNDERWOOD. Well, if that is all that is in the Senator's amendment, I have no objection to it.

Mr. HARRIS. That is all the amendment contemplates.

Mr. EDGE. Mr. President—

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from New Jersey?

Mr. HARRIS. I yield.

Mr. EDGE. It seems to me there is some question as to the effect of the amendment according to the language as I followed the reading. Why would it not meet the desire of the proponent if there were added to the amendment the words "without the consent of the Government," the Government being the lessor? In other words, every lease of a house or other property is subject to re-leasing or disposition if the owner is satisfied with the new arrangement. Why should any lessee be held in check so that if he found himself unable to administer the lease at a profit or satisfactorily, he could not dispose of it at all?

Mr. UNDERWOOD. Mr. President, I find the Senator's amendment does not carry out his suggestion. His amendment reads as follows:

Provided, That no lessee hereunder shall have any right to sell or transfer any lease—

Not the main lease which, as the Senator has suggested, is what he is aiming at, but "any lease," which would include any lease which he might make—
any lease or any interest therein.

So it is perfectly clear from the language the Senator uses that it is a sublease to which he is referring. That being the case, I think the amendment ought to be defeated, because I do not think that the hands of the lessee should be tied in his business operations. What we want is the accomplishment of a result, to wit, the making of so much nitrogen and so much fertilizer, and that is what we want to hold the lessee to. Outside of that, there is no reason why we should not give the lessee a free hand to accomplish that result in the way he deems best.

Mr. HARRIS. I do not agree with the Senator from Alabama, but I think the suggestion of the Senator from New Jersey is wise, and that it would be better to add the words "without the consent of the Government."

Mr. UNDERWOOD. I think the effect of the Senator's amendment will merely be unnecessarily to mix up the Government in the matter.

Mr. EDGE. Mr. President—

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from New Jersey?

Mr. HARRIS. I yield.

Mr. EDGE. I merely made that suggestion to try to improve the amendment. Even with that amendment incorporated, however, I agree with the Senator from Alabama that the amendment is hardly necessary; but without such a provision as I have suggested it would seem to me that the amendment would be most unfortunate.

The PRESIDING OFFICER. Does the Senator from Georgia desire to perfect his amendment?

Mr. HARRIS. I ask the privilege of perfecting it by adding the words "without the consent of the Secretary of War."

Mr. HARRISON. Mr. President, I rise to a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Mississippi will state his parliamentary inquiry.

Mr. HARRISON. Mr. President, I wish to know just where we stand in connection with the various proposals before the Senate. I thought that the original Norris bill was before the Senate. That measure is a substitute for the bill based on the Ford offer which came from the House. I thought we had to act upon the Norris measure first. How can we offer amendments now to the Underwood proposal when it is not before the Senate?

The PRESIDING OFFICER. The Chair understands that the Underwood proposal has been submitted as a substitute for the amendment proposed by the Senator from Nebraska, and therefore they are both before the Senate for amendment and to be perfected until the vote is taken.

Mr. HARRISON. The Chair holds, then, that the Underwood amendment can be brought before the Senate as a substitute for the Norris proposal?

The PRESIDING OFFICER. The Chair understands that is before the Senate.

Mr. HARRISON. Then, amendments may now be offered to the Underwood substitute?

The PRESIDING OFFICER. They may be offered to either measure.

The Chair is advised that the amendment of the Senator from Georgia has now been perfected as he desires.

Mr. DIAL. Mr. President, it occurs to me that the amendment ought not to be adopted. It would discourage persons from bidding and from expending money to experiment and to develop. Conditions might arise under which it would be very desirable for a lessee to transfer his lease. I can not see why the enterprise should be tied down or hampered by these unnecessary restrictions, and I think they are altogether out of place. I regret to have to oppose my good friend from Georgia [Mr. Harris], in whose judgment I have so much confidence; but I feel that this amendment is entirely unnecessary, and that it would be injurious to the general enterprise.

Mr. HARRIS. Mr. President, I think the amendment is a very important one. I shall be perfectly frank about it. There are some of us in the Chamber who would not be willing to have the Government lease this property to certain corporations—for instance, the Alabama Power Co., which has been a Canadian corporation, a foreign corporation. I should oppose that. This amendment is simply to protect the Government and prevent one corporation from getting the lease and then selling it to some other corporation which would not be acceptable to our Government; and with the words suggested by the Senator from New Jersey, requiring the consent of the Secretary of War, it seems to me that it should not be objectionable.

Mr. HARRISON. Mr. President, may I ask the Senator a question before he takes his seat?

Mr. HARRIS. I yield, with pleasure.

Mr. HARRISON. If I understand the Senator, this amendment is striking at one particular corporation.

Mr. HARRIS. It is striking at a number of corporations, and I mentioned one.

Mr. HARRISON. If the amendment should be adopted, let us take this kind of a case: Suppose this plant should be leased for a term of 50 years to some organization to make 40,000 tons of fixed nitrogen annually, and they did not care to deal with the question of surplus power, and some surplus power should be developed there; and suppose that the Alabama Power Co., say, or some other power company that operates out of Georgia, had its lines already constructed up to Sheffield and that economically it could probably pay more for the power, and it covered a field that needed the distribution of power. If this amendment should be adopted, then that power company would not be able to deal with the original lessee, would it?

Mr. HARRIS. Mr. President, this amendment refers to the lease of the entire property. It does not prevent the lessee from doing what the Senator from Mississippi says.

Mr. HARRISON. It says "any lease or any interest therein."

Mr. HARRIS. Selling an interest in the lease does not prevent you from making a contract to sublet under the lease.

Mr. HARRISON. The idea of the Senator is, then, that the original lessee could sell power to a distributing power system that had built its lines up there?

Mr. HARRIS. This does not prevent that at all. It seems quite plain to me, and I am sorry it is not to others. It simply provides that without the consent of the Secretary of War this lease shall not be transferred.

Mr. ROBINSON. Mr. President, may I ask the Senator from Georgia a question?

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Arkansas?

Mr. HARRIS. I yield with pleasure.

Mr. ROBINSON. The Senator from Georgia has frankly stated that the purpose of the amendment is to prevent the transfer of rights by the original lessee to certain corporations which are deemed obnoxious. Is there anything in the bill, or will there be anything in the bill after the Senator's amendment is agreed to, if it should be adopted, that would prevent the War Department, in the first instance, from making a lease to any corporation with which it chose to contract?

Mr. HARRIS. I do not think there is anything.

Mr. UNDERWOOD. No; nothing at all.

Mr. ROBINSON. Then, if the Senator wants to accomplish the purpose he has stated, I am curious to know how he expects an amendment of this nature to prevent the Alabama Power Co. or any other corporation from getting the lease in the first instance if it makes terms that are satisfactory to the War Department?

Mr. HARRIS. There is an amendment pending that will do just what the Senator from Arkansas refers to.

Mr. GEORGE. Mr. President—

The PRESIDING OFFICER. Does the Senator from Georgia yield to his colleague?

Mr. HARRIS. I yield.

Mr. GEORGE. I see the difficulty that the Senator from Alabama finds in this amendment as to its preventing the leasing of any interest that goes under the main lease. I suggest to my colleague that he might accomplish all that he seeks to accomplish by merely providing that this lease shall not be assignable except with the consent of the Secretary of War. That possibly would obviate the objection which the Senator from Alabama has.

Mr. UNDERWOOD. While I do not think it is clearly done by the Senator's amendment, I have no objection to an amendment that will provide that the original lease can not be assigned without the consent of the Secretary of War, because I do not think it could be done under the law anyhow. I do not think the Secretary of War could make a contract with anybody and give him power to assign the lease in an instance of this kind; but the Senator disclosed in his argument that what he was trying to do was to keep certain people or certain corporations from operating this property. I want to say to him candidly that I hold no commission from the Alabama Power Co. I have the greatest respect for the officers and agents of that company. I have no complaint to make of them, but for four long years I have been in combat with them when I was supporting Henry Ford's offer, and they had an offer of their own, and I have no commission to defend them.

Mr. HARRIS. If the Senator will allow me to interrupt him, would the Senator from Alabama agree to lease this plant to a foreign corporation?

Mr. UNDERWOOD. No.

Mr. HARRIS. Is not the Alabama Power Co. to-day a foreign corporation?

Mr. UNDERWOOD. I understand not.

Mr. HARRIS. Then it has been changed only recently.

Mr. UNDERWOOD. I understand that at one time the properties were owned and controlled by a foreign corporation.

Mr. HARRIS. It must have been changed within the past few weeks.

Mr. UNDERWOOD. I understand that the property is now owned by an American corporation and that 85 per cent of the stock is owned and controlled by American citizens.

Mr. HARRIS. Would the Senator be willing for the Government to allow the lessee of this plant to sublet it to any foreign corporation?

Mr. UNDERWOOD. No, I would not; and I do not think the Secretary of War for a minute would make a lease under those circumstances; but, as I say to the Senator, after the lease is made with the Government the lessee could not turn over his contract. He might sublease parts of it, but he could not assign his contract to somebody else; and the Senator is now attempting to prevent a reassignment of the contract when under the terms of the bill the Secretary of War might make the contract with anybody he saw fit.

I think I understand what the Senator wants, because his statement has made it clear, and I am not with him in that desire. I think, from his statement, it is clear that he does not want the Alabama Power Co. to get its hands on this property in any way. Now, I want to say this: As I say, I hold no brief for the Alabama Power Co. I have been fighting for Henry Ford's offer against the Alabama Power Co. for four years; but what I want to do is to produce nitrogen and fertilizer under the terms of this bill and sell surplus power and do it profitably, and it does not concern me who carries it out, provided they have money to give the necessary guarantees and can successfully operate the plant. I want to say this to the Senate, however, and it is a material proposition for the Senate, and especially for Senators in the immediate vicinity of Muscle Shoals, to consider:

If we had a vast amount of surplus power to sell, either the corporation indicated here or a lessee might well afford to build a transmission line of great length for the sale of that power; but the purpose of the bill, as I propose it, is primarily to make fertilizer and nitrogen. It is supposed that when those plants begin to operate a very large proportion of this power is going to be consumed in making nitrogen and fertilizer. There will be a surplus power. Now, I think that power ought to be sold to the best advantage, because the better it is sold the more profitably you can manufacture fertilizers and the cheaper you can manufacture them. I want to say, however, that there is not sufficient power there to guarantee the building of a great transmission line. If you built it you would have to put the cost of that transmission line in the end against the fertilizers that you want to sell cheaply to the farmer.

Now, take the Alabama Power Co. It has its line at the door of this plant, and it is the only line there. That line runs into the adjoining States. It goes into the State of the Senator from Georgia. If you put into this bill a provision that the Alabama Power Co. can not become a sublessee or can not buy this power from whoever the lessee is, or the corporation, if it wants to, it means in all probability that you never can have it transmitted to your State and it means that the sale of that power must be localized at Muscle Shoals.

If I were looking at the matter from a selfish standpoint, I should welcome the Senator's amendment, because it would concentrate the sale of that power in Alabama; but I am not. What I am trying to do is to make this corporation a successful one, and I want to leave it open to anybody who will come in here and bid to buy the power at the best rate for which it can be sold, in order that it may be reflected in the real unit of production that we are after, and that is cheaper fertilizer for the American farmer.

Mr. HARRIS. Mr. President, I do not think the Senator from Alabama is fair in his criticism. There is nothing in this amendment that would prevent the lessee from selling surplus power to the Alabama Power Co. or to any other power company—nothing whatever—and it seems to me perfectly clear. I have an amendment relating to that. The Senator has said that this amendment showed my views. Yes; I am opposed to the Alabama Power Co., or any other power company

that comes into competition with Muscle Shoals, leasing this property. I believe it would build up a power trust in our section of the country, and it is bad enough now. I am opposed to that, and I am trying to prevent it. I have two other amendments here which will prevent the leasing of the power by any other company that comes into competition with the Muscle Shoals power.

Mr. DIAL. Mr. President, I am not a spokesman for the Alabama Power Co. or for any other power company; but I have no ill will against the Alabama Power Co. or any other power company down there which has spent its money and helped develop our section of the country. I think it is unwise to try to legislate here as to details in this bill. Those matters should be left to the managers of the property.

It is perfectly natural that the Alabama Power Co., which has lines to this plant, should transmit the surplus power away from there cheaper, as the Senator from Alabama has said, than some other company could erect lines and do so. As to whether or not the Alabama Power Co. is a foreign corporation I do not know, and I do not care very much.

My understanding is that a large portion of the stock is now owned in Alabama and elsewhere in the South. At any rate, I do not feel that it is proper to criticize companies which have developed a section of the Nation and have risked their money to do so. Our people were glad to welcome them there to build dams and transmit power. There is no business in the world that I know of that is more hazardous than hydroelectric development. The owners have to contend with high water—

Mr. McKELLAR. Mr. President, will the Senator yield to me?

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Tennessee?

Mr. DIAL. Yes; I yield.

Mr. McKELLAR. The Senator says he knows of no business that is more hazardous than the development of hydroelectric power. I think I saw in the morning paper where a Mr. Duke, of North Carolina, has just contributed some \$40,000,000 to charitable purposes down there; and he contributed it out of hydroelectric stock, as I recall the newspaper statement. It seems to me that it is quite profitable.

Mr. DIAL. I did not say it was not profitable. It may be or may not be. The companies sometimes fail; but Mr. Duke is to be commended and not criticized for his generosity to our section of the country. My understanding is that he has never taken a dollar out of his investments; but, on the other hand, that he has spent large sums of money in developing those powers; and now he is kind enough to contribute the money to such purposes as hospitals and colleges in the States out of which he made some money. His example should be followed.

Mr. McKELLAR. Mr. President—

The PRESIDING OFFICER. Does the Senator from South Carolina further yield to the Senator from Tennessee?

Mr. DIAL. Yes.

Mr. McKELLAR. I did not mean to criticize Mr. Duke at all. I do not know anything in the world about the particular transaction. I am merely calling the Senator's attention to the fact that, of course, Mr. Duke got grants from the State for the development of this hydroelectric power; he had to get permits from the State before he developed the power; and, after all, I think it is very commendable in Mr. Duke to return to the public a portion of that which came from the public.

Mr. DIAL. I do not disagree with that, Mr. President. What I meant to say in stating that it was hazardous to develop water power was that great risks are taken in building dams. Often the cofferdams are washed away, the machinery is damaged, and it is a very trying task indeed to get the power harnessed in the proper way.

If power companies can not transmit power, I do not know who would transmit it. Certainly the individuals could not do it, and I see no use trying to confiscate the investments of other companies by the Government going in and running parallel lines, which would be very expensive.

Then, too, it is not only a question of transmitting the power, but there is the question of having the control of it and customers for it. These power companies are already in existence, and they have a demand for possibly all the power they develop now and will develop in the future, and they can transmit it and retail it cheaper than the Government could by building separate lines. But if they should be unreasonable in their prices, I would be in favor of the Government building lines and distributing the surplus power. However, I feel it is a matter that does not concern Congress now; that the man-

agement of the organization can take charge of that; and that we ought not to be trying to legislate for or against any particular company.

Not only that, but the rates charged would come under the commissions of the States. I believe all those States have commissions to fix the rates at which power shall be retailed to individual customers. So it seems to me to be unwise, by this amendment or any other amendment, to try to go into the details of the management of the property. The management ought to be left entirely free to use the property to the very best advantage and to make a success out of it. I want the power to be used where it is generated for the purposes mentioned. Then, if there shall be any surplus, now or hereafter, I want it to be distributed to the people who can use it to the best advantage to build up that section of the country. It is immaterial to me whether it is done by the Southern Power Co., the Alabama Power Co., or the Tennessee Power Co., or any other of those surrounding companies. They are certainly better equipped than the Government is, or some new company which might come in. The new company would simply spend extra money and would try to confiscate what is already invested, and that is the wrong spirit in legislation. I hope the amendment will be defeated.

Mr. HARRIS. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. KING. Let the amendment to the amendment be reported.

The PRESIDING OFFICER. The Secretary will report the amendment to the amendment.

The PRINCIPAL LEGISLATIVE CLERK. On page 5, line 19, after the word "contract," insert:

Provided, That no lessee hereunder shall have any right to sell or transfer any lease or any interest therein which may be obtained or procured under this act without the consent of the Secretary of War.

Mr. KING. Mr. President, I have been in attendance upon committee meetings and do not know the reason for this amendment, if the Senator has assigned a reason, and with his indulgence I should be glad to inquire the purpose of the amendment. The obvious purpose of it, as I interpret it, is to prohibit any lessee, no matter what terms he may subscribe to, from assigning his contract or his lease, without the consent of the Government.

Mr. HARRIS. Without the consent of the Secretary of War.

Mr. KING. What objection has the Senator to a lessee making an assignment of his lease?

Mr. HARRIS. Mr. President, it has been understood that the Alabama Power Co., which, until a few weeks ago, was a foreign corporation, would probably try to get this lease. Suppose they should sell the stock back to the foreigners, and the company which leased this initial plant from the Government should be owned by Germany, or England, or Japan, or some other nation. Does the Senator think that would be wise? This amendment is intended to prevent that.

Mr. KING. It seems to me, if the Senator has that object in view, his amendment does not go far enough. He ought to provide that if any lessee, or his assignees, with the consent of the Secretary of War, shall make disposition of the lease to any foreign corporation, or to any corporation a majority of the stock of which is owned by aliens, then the lease shall be subject to forfeiture.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. KING. I am only propounding these questions to get the view of the Senator and to get the objects which he has in view.

Mr. McKELLAR. Mr. President, I have an amendment which I am going to offer in a few moments and which I shall ask the Senator from Alabama to accept. I imagine it will be accepted. It is on this very subject and is as follows:

Provided, That said lease shall be made only to an American citizen, or citizens, or to an American owned, officered, and controlled corporation and, if leased, in the event at any time the ownership in fact or the control of such corporation should directly or indirectly come into the hands of an alien or aliens, or into the hands of an alien owned or controlled corporation or organization, then said lease shall at once terminate and the properties be restored to the United States. The Attorney General of the United States is given full power and authority and it is hereby made his duty to proceed at once in the courts for cancellation of said lease in the event said properties are found to be alien owned or controlled and are not voluntarily restored.

Mr. UNDERWOOD. Mr. President, I will say to the Senator from Tennessee that I have no objection whatever to that amendment. This is a powder plant. Essentially it should not be under or controlled by a foreign corporation. Of course, I did not provide for that in my amendment, be-

cause I assumed that the Secretary of War would not make such a lease. But if the Senator desires it, I have no objection to that going in.

Mr. McKELLAR. In my opening statement I said that I knew the Senator from Alabama would not object to it.

Mr. UNDERWOOD. That is a very different proposition from the one the Senator from Georgia [Mr. HARRIS] is making. The Senator from Georgia says I do not understand this proposal. Perhaps I do not; but I can only take his language. It seems to me from his language that he is trying to put out some competitors who may come in to buy this power and distribute, and I want it wide open. I want the Government to get as much for it as it can.

As to the foreign corporations, of course I am in entire accord with what the Senator from Tennessee has to say, and if that is all the Senator from Georgia wants, I will accept the amendment of the Senator from Tennessee as far as I can accept it, and the purpose of the Senator from Georgia will be accomplished. But if he is trying to head off somebody in the South from becoming a bidder, or from distributing this power, for some reason of his own, I am not in favor of that. I think we ought to leave it wide open so that we can do the very best we can to make this proposition a success.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Georgia [Mr. HARRIS] to the amendment proposed by the Senator from Alabama [Mr. UNDERWOOD], on which the yeas and nays have been ordered, and the Secretary will call the roll.

The principal legislative clerk proceeded to call the roll.

Mr. NORRIS (when Mr. LA FOLLETTE's name was called). I have been requested to announce that the senior Senator from Wisconsin [Mr. LA FOLLETTE], who is detained from the Senate by a slight illness, would if present vote "yea" on this question.

The roll call was concluded.

Mr. BAYARD. I have a general pair with the junior Senator from Pennsylvania [Mr. REED]. In his absence I withhold my vote. If I were permitted to vote, I would vote "nay."

Mr. JONES of Washington (Mr. WILLIS in the chair). I again announce the necessary absence from the city of the senior Senator from Indiana [Mr. WATSON]. I ask that this announcement may stand for the rest of the day.

I also desire to announce that the senior Senator from West Virginia [Mr. ELKINS] is paired with the senior Senator from Oklahoma [Mr. OWEN].

Mr. HARRELD. I have a general pair with the senior Senator from North Carolina [Mr. SIMMONS]. I do not know how he would vote if present, and in his absence I withhold my vote. If permitted to vote, I would vote "yea."

Mr. FLETCHER (after having voted in the affirmative). I have a general pair with the senior Senator from Delaware [Mr. BALL]. In his absence I transfer that pair to the senior Senator from Montana [Mr. WALSH], and allow my vote to stand.

The result was announced—yeas 29, nays 37, as follows:

YEAS—29

Ashurst	Frazier	McKellar	Sheppard
Brookhart	George	McKinley	Shipstead
Bruce	Harris	McNary	Smith
Capper	Hedlin	Mayfield	Walsh, Mass.
Copeland	Howell	Neely	Wheeler
Dill	Johnson, Calif.	Norris	
Ferris	Johnson, Minn.	Overman	
Fletcher	Jones, N. Mex.	Ralston	

NAYS—37

Broussard	Fess	Lenroot	Stanley
Bursum	Glass	McLean	Sterling
Butler	Greene	Means	Swanson
Caraway	Hale	Moses	Trammell
Curtis	Harrison	Oddie	Underwood
Dial	Jones, Wash.	Pepper	Wadsworth
Edge	Kendrick	Phipps	Willis
Edwards	Keyes	Robinson	
Ernst	King	Smoot	
Fernald	Ladd	Spencer	

NOT VOTING—29

Ball	Gerry	Pittman	Stephens
Bayard	Gooding	Ransdell	Walsh, Mont.
Borah	Harrell	Reed, Mo.	Warren
Cameron	La Follette	Reed, Pa.	Watson
Couzens	McCormick	Shields	Weller
Cummings	Metcalf	Shorridge	
Dale	Norbeck	Simmons	
Elkins	Owen	Stanfield	

So Mr. HARRIS's amendment to Mr. UNDERWOOD's amendment was rejected.

The PRESIDING OFFICER (Mr. WILLIS in the chair). The question is on the amendment offered by the Senator from Alabama [Mr. UNDERWOOD].

Mr. HARRIS. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. At the end of section 4 insert the following:

In order that such fertilizer products may be fairly distributed and economically purchased by farmers and other users thereof, the Secretary of Agriculture of the United States shall determine the fair and equitable territorial distribution of the same and may in his discretion make reasonable regulations for the sale of all or a portion of such products to farmers, their agencies, or organizations; the said Secretary of Agriculture shall also have the right to determine whether the profit being charged for said fertilizer products is in excess of 8 per cent of the fair annual cost of the production thereof by the lessee or corporation. In the sale of such fertilizers preference shall always be given to farmers in the purchase thereof.

Mr. HARRIS. Mr. President, this amendment is intended to accomplish two purposes: One is to prevent a profit in excess of 8 per cent being charged on the fertilizer by the lessee or corporation, and the other is to prevent them from selling all of the fertilizer manufactured to any one section or State. For instance, there will not be enough fertilizer manufactured to be distributed all over the country. Unless such an amendment is adopted, under the terms of the bill the fertilizer can all be sold to a certain section, or to one State, or to one section of a State. The amendment would allow the Secretary of Agriculture of the United States to see that it was distributed to different sections and not discriminate against the farmers in any of the territory to be supplied.

Mr. UNDERWOOD. Mr. President, I do not like to oppose amendments offered by my neighbor from Georgia, but I think this amendment would only tend to hamper the object of the bill instead of advancing it. Whether it is a lessee or whether it is a corporation, if we are going to accomplish the desired result of manufacturing nitrogen for defense in time of war and fertilizer for the farmers in time of peace, we had better let the management have a free hand to do the best it can without tying it up by machinery that it has not thought out and that we do not know about now.

So far as the particular amendment is concerned, we have placed the management of the corporation, if it becomes a corporation, in the hands of five men to be appointed by the President. Why should we pick out some other bureau or department to interfere with what they are to do? If it is a lessee, we all know that we should let him sell as much fertilizer and as profitably as can be done. The lessee or corporation, under the terms of the bill, is not going to make enough fertilizer to supply all the farmers of America.

The maximum production that we will probably get will be 2,000,000 tons of the lowest grade of fertilizer, 2-8-2. The annual consumption of fertilizer in the United States, according to the figures for last year, is something approximating 7,000,000 tons, so the output of this enterprise would be two-sevenths of the entire consumption. To say to the lessee or to the corporation, "You must comply with the orders of the Secretary of Agriculture in the distribution of your fertilizer and see that it goes to California and Maine as well as to Georgia and Alabama, and pay the freight rates in the distribution thereof," merely means that we are going to make it more difficult for the corporation or lessee to make money out of the sale of the product.

The way to serve the farmers of America and to accomplish the desired result is to get a lessee in charge of the enterprise who can not under the terms of the bill make over 8 per cent profit, and then let him go out and sell the fertilizer in the nearest market in which he can make a profit and demonstrate under this method that it can be made profitably. When that is done we will in that way invite men in the Rocky Mountain region and men in the southeastern territory and men in other parts of the country to go into the same business because it is profitable and serves the farmers of America without having high freight rates to pay. It is perfectly apparent that if the corporation could sell at a profit in Alabama, and then we compel it under orders of the Secretary of Agriculture to sell a portion of its product in California, that we have destroyed it. I will say to the Senator from Georgia, with reference to pig iron, because I am familiar with that, that we can sell pig iron from the Birmingham district in the South and East, but we can not carry it to California and sell it, because we can not pay the high freight rates. Fertilizer is a good deal like pig iron in that respect. The freight rate is a very material part of its cost.

Mr. REED of Missouri. Mr. President—

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Missouri?

Mr. UNDERWOOD. I yield.

Mr. REED of Missouri. Is it not perfectly obvious that if fertilizer is manufactured and sold in any part of the United States it has to be sold on the general price level, and that it furnishes that much of the supply, and in so far as it increases the supply it decreases the general price level everywhere.

Mr. UNDERWOOD. That is undoubtedly true. I do not like to differ with my friend from Georgia, but these efforts to sit here and tell a business man how he must run this business to make it successful by tying his hands with machinery I think are absolutely against the objective that we have in mind in trying to create cheaper fertilizer for the farmers of America through the lease or the corporation under the terms of the bill. I see no reason in the world why we should inject the Secretary of Agriculture into the matter.

So far as the Secretary of Agriculture finding out whether they are living up to the terms of the contract, the Senator from Georgia evidently has not read the bill, or if he has read it, he has not analyzed it, because the bill requires that an audit should be made of the accounts every year and that audit submitted to Congress. The Congress, when that audit is laid before it in detail, can determine for itself whether those people are living up to the terms of the contract or not.

Mr. KENDRICK. Mr. President—

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Wyoming?

Mr. UNDERWOOD. I yield.

Mr. KENDRICK. I want to ask the Senator about the question of interest payments or percentage payments on the Government property. I note at the bottom of page 4 that he requires that the lessee shall pay 4 per cent on the cost of Dam No. 2.

Mr. UNDERWOOD. Not less than that amount.

Mr. KENDRICK. Is it the Senator's idea that the lessee shall have the use of the incidental properties, the manufacturing plants, and the towns and villages and all the other property rent free?

Mr. UNDERWOOD. Yes; but allow me to explain. The Senator probably was not here the other day when I made my speech on the subject or did not hear that portion of it, because I explained it then, but I am very glad to explain it again. Dam No. 2 alone could be leased at 5 per cent of its actual cost, including money wasted and money that was not wasted. I can say that authoritatively, because I have had gentlemen say so who are interested in making the lease. I am saying that so the Senator may see what I have in mind. Five per cent would amortize the dam in 20 years, so it is 100 per cent security so far as that is concerned. But I am proposing that if a lessee shall make nitrogen for 100 years to sustain the arm of defense of this country in time of war and in time of peace convert that product into fertilizer for the benefit of the agricultural people of America we shall give him indirectly a bonus, and that bonus is that he can buy power 1 per cent cheaper on the investment than anybody else can and that he can have the nitrate plant without any money payment toward a lease. That is my viewpoint, but I do not fix it in that way positively. I say it shall not be leased for less than that amount, but the Secretary of War is to determine with the lessee what he shall pay. Of course, the Secretary of War when he goes to make the lease can charge whatever he wants to demand or whatever he can get, and he can raise the rate under the lease very much higher than 4 per cent on the cost of the dam if he sees fit to do so.

But the Senator will see that that has nothing to do with the legislation. So far as I am concerned, I am perfectly willing that this entire property shall be leased at 4 per cent on the dam, which would be about \$2,000,000 a year. I admit that it would be cheap power and a cheap lease, but I am willing to do that because I think it is worth while to have a private lessee keep us supplied with 40,000 tons of nitrogen every year for national defense; further, because I think it is worth while for the Government to make a real effort to cheapen the cost of fertilizer to the farmers of America; and I consider that the latter proposition of furnishing cheaper fertilizer, which adds to the food production of America, is second only to national defense in time of war.

Mr. KENDRICK. Mr. President, I fully agree with the statement made by the Senator from Alabama, and I wish to say here that I agree entirely with the plan and purpose of his bill. The only question is as to the method that we shall employ.

As I understand the Senator, it is his contention that the rent-free property granted to the lessee will be reflected in a cheaper fertilizer to the farmer?

Mr. UNDERWOOD. Necessarily so, because the lessee in his profit is limited to 8 per cent; and, of course, if he gets the power cheaper he will have less to pay or if he sells it he obtains more profit out of it.

Mr. KENDRICK. Does not the Senator believe that it should be written into the proposed law that account of that shall be taken in estimating the cost?

Mr. UNDERWOOD. It is in the proposed law, for it provides that his profit shall be 8 per cent on his cost, and that is the cost of the whole enterprise. Cost is cost, as the Senator knows.

Mr. KENDRICK. I understand that; but, according to the computation here, it would be an annual cost, and not a cost on the turnover, as it is called.

Mr. UNDERWOOD. The annual costs are always added in the turnover, as in the case of a great furnishing store which will turn over its business maybe two or three times a year; but at the same time it has its overhead and its office charges which run during the year and a proportionate amount is all added into the turnover charge. There is no question in bookkeeping, in my judgment, that the cost of the power is a part of the cost of the plant; and that is my purpose. I have no doubt the Secretary of War, if he writes the lease or the contract, will use such language as will make it perfectly plain if the bill does not do so now, but I think it does.

Mr. KENDRICK. The Senator will agree that there should be no doubt about it as the law shall be written?

Mr. UNDERWOOD. I do. I am trying to sell a very cheap power to a lessee, a power that is concededly cheap, in order to induce the lessee to come in and do something else which I desire shall be done.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Georgia [Mr. HARRIS].

Mr. HARRIS. Mr. President, under the substitute as it is now drawn all of the fertilizer provided for could be sold in the State of Alabama or a section of that State. I am sure the Senator from Alabama is not opposed to the amendment on that ground, but for him to say that under the amendment the corporation would be compelled to send fertilizer to Maine or to California is exaggerating what the amendment is intended to do. If adopted, the amendment will protect every section which can pay the railroad freight and buy the fertilizer to be manufactured at Muscle Shoals, and unless some amendment like this is adopted under the proposed law, as at present drawn by the Senator, the power company or the corporation could sell all the fertilizer manufactured at Muscle Shoals to one corporation in one State or section. It might sell it to the fertilizer trust, if there should be one. This amendment is to require that the Secretary of Agriculture shall see that the fertilizer is distributed to farmers and give all the farmers the benefit of it. That is all there is to it. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. BAYARD (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. REED]. In his absence I withhold my vote. If I were allowed to vote, I should vote "nay."

The roll call was concluded.

Mr. OVERMAN. I have a general pair with the Senator from Wyoming [Mr. WARREN]. In his absence I withhold my vote.

The result was announced—yeas 18, nays 47, as follows:

YEAS—18			
Asbust	Harris	Neely	Sterling
Borah	Johnson, Minn.	Norris	Swanson
Brookhart	Lenroot	Sheppard	Trammell
Frazier	McKinley	Shipstead	
George	Mayfield	Smith	
NAYS—47			
Ball	Fernald	Keyes	Ralston
Broussard	Fess	King	Reed, Mo.

So Mr. HARRIS's amendment to Mr. UNDERWOOD's amendment was rejected.

Mr. GLASS. Mr. President, I send to the desk an amendment to the amendment, which I am assured the Senator from Alabama will accept. I ask that the amendment to the amendment may be stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The PRINCIPAL LEGISLATIVE CLERK. In the amendment in the nature of a substitute offered by the Senator from Alabama it is proposed, on page 14, to strike out line 18 and line 19 down to the period in the following words:

The Federal reserve banks shall be authorized to receive deposits of the corporation.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Virginia to the amendment of the Senator from Alabama.

Mr. UNDERWOOD. Mr. President, I wish to say only a word or two. I had inserted in my amendment a provision to the effect that deposits of the corporation should be made in the Federal reserve banks. I did so because there is a fund to be accumulated, and I thought that was a safe place for the deposit of that fund. I find, however, that the provision is objectionable to some of my colleagues in the Senate on the basis that the true functions of the Federal reserve banks do not contemplate such deposits, and I do not care to make a contest over that question in the bill. Therefore I have no objection to the provision being eliminated. It is merely a question where the funds shall be deposited.

Mr. McNARY. Mr. President—

The PRESIDING OFFICER. The Senator from Oregon.

Mr. McNARY. I do not wish to intrude my statement until the amendment proposed by the Senator from Virginia has been determined.

Mr. UNDERWOOD. That is all I have to say.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Virginia to the amendment of the Senator from Alabama [Mr. UNDERWOOD].

Mr. SMOOT. I ask that the amendment to the amendment be stated.

The PRESIDING OFFICER. The amendment to the amendment will again be stated for the information of the Senate.

The READING CLERK. On page 14 of the so-called Underwood amendment it is proposed to strike out line 18 and part of line 19, reading as follows:

The Federal reserve banks shall be authorized to receive deposits of the corporation.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Virginia to the amendment of the Senator from Alabama [Mr. UNDERWOOD].

The amendment to the amendment was agreed to.

Mr. McNARY. Mr. President, a few days ago I gave the usual notice to this body that at the proper time I would propose an amendment to the amendment offered by the Senator from Alabama [Mr. UNDERWOOD] as an amendment to House bill 518. At this time I offer the amendment to the amendment, and ask that it may be read.

The PRESIDING OFFICER. The amendment offered by the Senator from Oregon to the amendment of the Senator from Alabama will be read.

The READING CLERK. In the amendment proposed by the Senator from Alabama [Mr. UNDERWOOD], on page 4, line 25, after the word "contract," it is proposed to add the following:

The lease in so far as relating to Dam No. 2, its power house, machinery, and equipment, the steam plant at Sheffield, and all lands in connection therewith, shall be made subject to and in accordance with the provisions of the Federal water power act.

Also, in line 1, on page 5, for "said property" substitute the words "all property leased."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oregon to the amendment of the Senator from Alabama.

Mr. UNDERWOOD. Mr. President, unless the Senator from Oregon desires to address the Senate, I wish to say something about the amendment to the amendment before the vote is taken.

Mr. McNARY. I desire to speak very briefly on the amendment to the amendment unless the Senator from Alabama

desires to accept it. In that case I shall not detain the Senate.

Mr. UNDERWOOD. I can not accept the Senator's amendment. I think it is entirely contrary to the theory of the proposed substitute as drawn.

Mr. HARRISON. Mr. President, will the Senator yield to me for a moment?

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Mississippi?

Mr. McNARY. I yield for a question only.

Mr. HARRISON. I have suggested that I am going to offer an amendment to the substitute proposing to put Dam No. 3 under the same restrictions and provisions as Dam No. 2. I notice the amendment of the Senator merely applies to Dam No. 2. Of course, if it should be adopted, I understand he would want it to apply also to Dam No. 3.

Mr. McNARY. If the Senator wants to offer that amendment at this time, and the parliamentary situation is such that it would be proper to do so, I shall be very glad to accept it.

Mr. HARRISON. I was going to offer it as soon as these other amendments are out of the way.

Mr. JONES of Washington. Mr. President—

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Washington?

Mr. McNARY. I yield to the Senator.

Mr. JONES of Washington. I just heard the Senator's amendment read. Does the Senator's amendment place the charges for power developed at this dam under the water power act?

Mr. McNARY. It would, naturally, for the power that is distributed to consumers of hydroelectric energy.

Mr. JONES of Washington. I did not hear any reference to charges for power in the reading of the Senator's amendment, and I wanted to be sure whether or not the Senator intended to cover that.

Mr. McNARY. The Senator from Washington is so conversant with the water power act, which he fathered through the Senate, that he must recall the commission in that case can, for the purpose of fixing a rate, specify in the contract a charge which the lessee must observe.

Mr. JONES of Washington. Yes; I know it.

Mr. McNARY. I do not interfere with that provision at all.

Mr. JONES of Washington. I wanted to see if the Senator, by his amendment, brought the disposal of power under that provision of the water power act.

Mr. McNARY. I hope to; otherwise, the amendment would be nugatory.

Mr. JONES of Washington. I was rather inclined to think so, and yet I wondered if the language that the Senator uses would accomplish that purpose.

Mr. McNARY. If it can be better accomplished with other expressions, I shall be very happy to have them suggested.

Mr. JONES of Washington. I just heard it read, and I simply wanted to get the Senator's idea.

Mr. McNARY. I think we are quite in accord.

Mr. McKELLAR. Mr. President—

Mr. McNARY. I yield to the Senator from Tennessee.

Mr. McKELLAR. I thought the Senator was going to take his seat, and before he took his seat I wanted to ask him a question; but in what he is about to say he may speak of the very thing I want to ask him about.

Mr. McNARY. I again assure the Senator from Tennessee that I shall be brief. I want only a few moments.

Mr. President, it is not my purpose to shorten the arms of the Secretary of War with regard to the making of this lease or with regard to transferring the rights there to the licensee, or to impair in any way the administration of this legislation, if it should become such. I do not want the licensee at Muscle Shoals to have any special advantage over the licensees in other power developments on the public domain or on our navigable rivers. I recall, as a resident of a far-off Pacific State, that for very many years an effort was made through this country to establish a national plan for the development of our water-power resources. Indeed, a decade of debate raged in this body and in the House of Representatives regarding whether or not we should have a national policy. I want to adhere to the national policy that is written in the Federal water power act. If that is done, Mr. President, the licensee in this particular case would have no advantage over the licensees in other water-power developments.

Since the water power act was enacted on the 10th day of June, 1920, there have been 308 distinct permits, all of these licensees operating under and being regulated by the wise provisions of the water power act. In doing that we estab-

lished a national policy. You will all recall, those who were here, that in 1906 the first effort was made by this body and the House to adopt a national plan. You will recall that the tenure which these licensees would have held was so uncertain that no applications were made under the act of 1906, or very few indeed. A further effort was made by Congress in 1910 to strengthen the act of 1906, without success, because it did not give to the licensee a proper basis for the estimation of the value of his property at the time of the expiration of the contract.

During all these years of water-power development in this country the law was so uncertain in the matter of what should be the proper basis for rate fixing, the tenure, and all matters of control, including what the licensee should receive at the expiration of his contract, that those who had money to invest did not seek this field; and, Mr. President, they did not seek this field until the enactment of this law, under which I propose, if I shall have my way, that this contract shall be made.

This is the only great, big power that is being operated to-day that is not under the water power act. The great power developed by the Alabama Power Co., as I recall, as a matter of history, was erected under a special act of Congress passed in 1906. They came back in 1912 for certain rights on the Coosa River in Alabama. Congress passed a special act granting certain water rights to the Alabama Power Co. at that time, but President Taft vetoed the bill upon the theory that it did not protect the interests of the public. Later on, the great development on the Connecticut River and the large development at Niagara Falls came under the purview and operation of the water power act. So to-day, Mr. President, there is not a great water power operating on the navigable streams nor on the public domain that is not under the provisions of this act.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. McNARY. I yield to the Senator from Tennessee.

Mr. McKELLAR. I call the Senator's attention to the powers given to the Secretary of War on page 5, section 5, of the Underwood bill. I read:

The lease shall also provide the terms and conditions under which the lessee may sell and dispose of the surplus electric power created at said plants. The lease shall also provide for the protection of navigation—

And so forth. The Secretary of War is given the power to make the contract.

Mr. McNARY. Oh, yes.

Mr. McKELLAR. And unless those words are modified or stricken out, I am inclined to think that that would be in conflict with the amendment the Senator has offered, with which I am in considerable sympathy, and I hope it may be so that I can vote for it.

Mr. McNARY. I thank the Senator from Tennessee for his suggestion. The complaint I have about the language just read by the Senator from Tennessee, found in section 5 of the Underwood amendment, is that it is too general. It is not specific. It is not calculated to protect the interest of the public, the consumers, the men who furnish the money to start this great project.

I do not think, as the Senator from Tennessee evidently thinks, that section does come in conflict with the provisions of the water power act. There must be some latitude left to the Secretary of War with regard to making contracts covering the manufacture of nitrates. I am willing to give him wide discretion in that matter; but in power used for other purposes, for hydroelectric energy or chemicals or lifting water for purposes of irrigation, if such there be, that great power then would come in competition with all other powers in the country, and should be subjected to the same regulatory provisions.

Mr. President, when this Government enters upon a national policy or a plan which is the culmination of years of study and faithful consideration by Congress, I do not think we should abandon it lightly or at all. Take the great reclamation system in the West: Who would consider to-day the advisability of going back of that system, enacted in 1902, and voting money out of the Treasury of the United States for specific contracts upon an entirely different proposition? It has not been done for 22 years. It will not be done for 22 years more. We have defined a policy in the administration of our national forests. A great policy has been laid out and followed. In the improvement of our rivers and harbors a great policy has been laid out. We in the West, who face the Pacific Ocean, who have faith in our projects, put up 50 cents out of every dollar that is contributed for the improvement of our harbors in order that we may reach the markets of the world. That is a policy that has been adopted. I would not have the

courage to come before Congress and ask that 100 cents be appropriated out of the Treasury of the United States and no money out of the treasuries of the various States where these particular projects are to be improved.

Therefore, in this particular instance, having defined our policy regarding the development of our water-power resources on our public domain and on navigable rivers over which we have jurisdiction by virtue of the provisions of the Constitution with reference to the regulation of commerce, I think it would be singularly unfortunate if the Secretary of War might make a lease with a license freed from the provisions of the water power act. It would work infinite damage to those holding permits, 308 in number and others to follow, all subject to this great act of legislation. It would work perhaps an irreparable injury upon the consumers of power in the years to come. There must be some regulation. If the cost of operation decreases, if by the creation of reserves for the purpose of lessening the indebtedness a lower rate can be given to the consumer, he must have this advantage, such as is given by the water power act.

Mr. KENDRICK and Mr. SMOOT addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Oregon yield; and if so, to whom?

Mr. McNARY. I yield first to the Senator from Wyoming, who was first on his feet.

Mr. KENDRICK. Mr. President, I did not hear the amendment read. I therefore wish to ask the Senator whether his amendment would apply in this case only to such power as would be sold for commercial purposes from this Muscle Shoals Dam? In other words, the Senator will note from the bill that the power at Muscle Shoals Dam No. 2 is dedicated to certain purposes. I assume, therefore, that the plan of his amendment is to have it apply to such power as will be sold in the regular way.

Mr. McNARY. I conceive that to be the manner in which the amendment would operate.

Mr. SMOOT. Mr. President, will the Senator yield to me?

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Utah?

Mr. McNARY. Gladly.

Mr. SMOOT. In reading the Senator's amendment I take it for granted that if at any time there is any power created at Dam No. 2 and used for any purpose it would fall within the provisions of the Federal water power act; or, in other words, if in the future at any time—it may not happen, and it may—part of the power created at Dam No. 2 is used for the manufacture of fertilizer, it would have to pay the charges imposed by the Federal water power act?

Mr. McNARY. I am taking this view of that matter, and I do not know how it could be remedied by an amendment, because I will state to the Senator from Utah that there is no human agency existing now, or perhaps in the future, that can allocate the amount that should go into fertilizer or into water power for distribution purposes.

Mr. SMOOT. The amendment could specifically provide that. In other words, it could provide for taking the surplus power over and above that used for the purpose of manufacturing fertilizer.

Mr. McNARY. Probably so. That occurred to me in discussing the matter with the drafting bureau; but I assume that when the great purposes of this act are understood—namely, the manufacture of nitrates in time of war and fertilizers in time of peace—a latitude should be given the Secretary of War to use power for that purpose.

Mr. SMOOT. He could not do it under the water power act.

Mr. McNARY. I appreciate that.

Mr. SMOOT. The time may never come when that power will be used.

Mr. McNARY. Yes; but I assume that this act being a later act and covering a specific subject, whenever it came in conflict with the water power act the water power act would yield to this act, perhaps.

Mr. SMOOT. Not under this amendment.

Mr. McNARY. Further than that, I do not think the criticism would lie there, because I do not believe that power will be used.

Mr. SMOOT. That may be. I am only asking the question to clear my understanding of the amendment.

Mr. McNARY. I am trying to present to the Senator from Utah as best I can the various reasons for using the language in that form. I think, as was so well stated here a few days ago by the distinguished Senator from Nebraska [Mr. NORRIS], that there will ever be a diminishing demand for water power in the production of nitrates, and for that reason I do not believe that Dam No. 2 will ever be called upon for that pur-

pose. I think its great use will be for commercial and industrial development in the South, and when it gets into that field I can conceive of no reason why this power should be released from the obligations fastened upon all those licensed under the water power act. For that reason I have offered this amendment.

Mr. JONES of Washington. Mr. President—

The PRESIDING OFFICER (Mr. Oddie in the chair). Does the Senator from Oregon yield to the Senator from Washington?

Mr. McNARY. I yield to the Senator.

Mr. JONES of Washington. I merely wish to suggest some addition to the amendment to make clear, I think, what both the Senator and I would like to see done. I am in hearty accord with the purpose of the Senator's amendment, but it seems to me that the language of the amendment does not cover the disposition of power at all. It provides:

The lease, in so far as relating to Dam No. 2, its powerhouse, machinery, and equipment, and the steam plant at Sheffield and all lands in connection therewith, shall be subject, etc.

There is no reference there to power at all. I suggest, after the word "therewith" at the end of line 4, to insert "and the disposition of surplus power." It seems to me that would make it perfectly clear.

Mr. McNARY. I thank the Senator for his courtesy and suggestion. I am very glad to accept it, because I appreciate that it makes the amendment very much clearer.

Mr. UNDERWOOD. Mr. President, I desire to say a few words with reference to the amendment, but if I may have the attention of the Senator from Oregon, I would like to ask him a question: Did I understand that his purpose in offering this amendment was to provide for the regulation of the sale of the power?

Mr. McNARY. That is only an incident to the water power act.

Mr. UNDERWOOD. Will the Senator tell me, if his purpose is not to provide for the regulation of the sale of the power, then what other provisions of the water power act does he wish to invoke?

Mr. McNARY. Under the water power act, at the termination of the 50-year period, the Government would have the right to acquire the property and transfer it to municipal or certain public uses or re-lease it for a given period of time to the lessee upon a valuation fixed and reported during the time of the existence of the lease. That is one of the provisions. I might get the water power act here and read the beneficial provisions—

Mr. UNDERWOOD. I have the water power act right before me.

Mr. McNARY. I suggest that the Senator consult the water power act.

Mr. UNDERWOOD. I want to get the Senator's reasons for suggesting this amendment. He says one reason is that he wants regulation. Another is that he wants the property returned in 50 years, so that the Government can dispose of it. Has the Senator any other reason?

Mr. McNARY. I want those who have the right by contract to operate this plant and sell the energy to be on the same footing as are those operating on the other navigable streams of the public domain throughout this country. I want common fairness between these people and all others who come within its provisions, and no special privileges to anyone.

Mr. UNDERWOOD. There is one other proposition the Senator has not mentioned, if that is all he has in mind. There is a small charge against the power used by a public corporation that has to go to a bureau here in Washington. Does the Senator want it for that reason?

Mr. McNARY. I hardly think that is a fair statement for the distinguished Senator from Alabama to make.

Mr. UNDERWOOD. I am trying to find out the basis of the Senator's amendment, so that I can make my argument.

Mr. McNARY. There is a provision in the water power act whereby after 20 years of operation the water power commission can create a reserve for the purpose of reducing the indebtedness or the capital investment, thereby lowering the rate of charge to the consumer. I will ask the Senator from Alabama if he has any objection to that wise provision of the water power act?

Mr. UNDERWOOD. I am sure the Senator has not analyzed my amendment or he would not make that suggestion. I was trying to find out, in addition to all the Senator has suggested, whether he had in mind a small fee—and it is not so small, either—which goes to a bureau chief here in Washington. Does the Senator think that is not material? Or does he want that to apply?

Mr. McNARY. I think I answered that in a general way a moment ago. The thing must occur to the Senator, and I know that it does occur to him, because I believe he understands this measure. I think he does know something about the provisions of the water power act, too. There are certain restrictions of advantage to the public which I want to see applied to all licensees that generate power on the navigable streams. I do not want your licensee down in Alabama, whoever it may be, working under a contract to the disadvantage of the one operating in California or any other place in the far West.

Mr. UNDERWOOD. The Senator is thoroughly right about that, if his assumption is true. If the amendment I have proposed would bring about a condition whereby the licensee under it could operate, and where it would be effective against another licensee, I would not complain when he expressed the desire to have them all put on an equal footing. But his legal assumption is not true, because he has not analyzed my amendment.

If the Senator and the Senate will allow me, I will say that I see no reason on earth why this amendment to my amendment should be adopted, unless it is to allow a bureau here in Washington to stick its nose into this business and get a fee for it. I know many of these bureaus want to have their hand in everything that Congress does. There is no machinery of government you can create to which they do not want their bureau attached and in connection with which they do not want to get a fee. I think that much would be accomplished if the Senator's amendment were adopted—that you would have a bureau chief interfering with this lessee. But we want to make fertilizer as cheaply as possible.

Mr. McNARY. Will the Senator yield for a question?

Mr. UNDERWOOD. Yes; I am glad to yield.

Mr. McNARY. I appreciate that the remarks the Senator is making contain more or less poison against bureaucracy. Beyond that they have no weight or application, in my opinion. But, to be fair, this fee does not ultimately go into the coffers of the licensee. The fee that is given there is for the purpose of amortization and for liquidating the indebtedness.

Mr. UNDERWOOD. I am sure the Senator does not understand my amendment, or he would not say that.

Mr. McNARY. The only fee possible would be that for administration, and that is nominal.

Mr. UNDERWOOD. I know, but the Senator has so far, and I am afraid the Senate may have, misunderstood this situation, and I want to get right down to it. I asked the Senator these questions because I wanted to bring out really what he had in mind, and I see that the Senator has not grasped the provisions of this amendment. The general water power act applies to a private citizen who goes to the Government and asks for a permit to dam a river for his own benefit, and it is a very useful and beneficial act under those circumstances. It provides the rules and regulations under which he can accomplish that result, the citizen dealing with the Government. Here we have a case entirely different from that. The Senator says it should be amortized.

Mr. McNARY. I would like to know wherein this lease, outside of the production of fertilizer, differs, when made by the Government with a private individual, from a lease made upon any other navigable stream.

Mr. UNDERWOOD. The Senator does not seem to realize that this power plant belongs to the Government of the United States now. Under the water power act, if the Government grants a 50-year lease to a citizen of the United States, it makes him amortize, so that the Government at the end of the 50 years gets the right of disposal of the property, the right to capture it away from the citizen who has gone to work and developed it. That is one of the provisions of the water power act. It is the Government taking control away from the citizen at the end of 50 years, the citizen to get back the money he put into it, giving an opportunity for the citizen to make a charge through the 50 years, so he gets paid back, and then turns the plant over to the Government. We are starting right now with the Government in possession, in ownership, and it is to continue to be in ownership.

Mr. McNARY. Will the Senator yield there?

Mr. UNDERWOOD. Certainly.

Mr. McNARY. That distinguishing feature does subsist between this proposal and any other only with regard to the property, and the turning of it back. That is only one of the very many elements embraced in the water power act.

Mr. UNDERWOOD. I am going to discuss the others. If the Senator has conceded that, I will go on to the next. Of course, the property belongs to the Government. Why does the Government want to set up a recapture fund against itself, or an amortization fund against itself? The lease in this bill

provided runs for only 50 years, the term of the Federal power act, and at the end of the 50 years it will expire whether a Government corporation has it or a lessee has it, and the property will be in the hands of the Government itself, just where the water power act would put it at considerable expense. That is that proposition, which does not apply.

The next proposition is that the Senator says that he thinks this property ought to be operated by the Government on the same terms under the water power act under which it would be operated in his part of the country or anywhere else. I am not so sure of that; but it is not necessary to go any further than that statement.

Of course, I would make a distinction, and I am trying to make a distinction, between the production of fertilizer for the benefit of the great American people and an ordinary business. As I have said repeatedly in this debate, I think next to the national defense cheap fertilizer is the greatest boon to the American people, and I am not disposed to do anything that will make the farmer's burden in that respect heavier or prevent a lessee or a Government corporation from making fertilizer cheap. But that does not apply.

I have the water power act in my hand, and sections 18 and 19 relate to the regulation of the sale of power by the Government, as the Senator will see if he will refer to them. I will not bore the Senate by reading to it all the terms of this regulation of power. I merely want to read the proviso at the end. After the water power act provides for the regulation of power by the Federal Government, at the end of section 19, on page 12, it says:

Provided, That the jurisdiction of the commission shall cease and determine as to each specific matter of regulation and control prescribed in this section as soon as the State shall have provided a commission or other authority for the regulation and control of that specific matter.

In other words, that your entire regulation by this commission under this bill which you seek to inject as an amendment to the law falls as soon as there is State regulation. Is not that true?

Mr. McNARY. Yes; that is true.

Mr. UNDERWOOD. I know it is true of Alabama, and I am informed that every State where it would be possible to send its power over a wire and sell it has already State regulation for the sale and use of power. Of course, the terms of the bill would not apply, because under the proposal of section 19 the State regulation for the disposition and sale of power applies. But I can make that certain—

Mr. McNARY. Will the Senator permit me to ask him a question, and will he endeavor to answer it?

Mr. UNDERWOOD. Certainly.

Mr. McNARY. There is no question that the State has a separate right provided they have enacted legislation?

Mr. UNDERWOOD. They have. That is my information.

Mr. McNARY. Is it not true, however, that it has been held that Congress alone has the authority to fix the base upon which rate fixing shall be made, and that is on the actual net investment, and that is the basis which the State takes from the Government when operating through the regulatory channels? I think it is fair to say that.

Mr. UNDERWOOD. In the first place, I do not think they alone have the power, but in the next place, if the Senator will read the proviso, I think he will see that the power act itself abandons that provision because it says:

Provided, That the jurisdiction of this commission shall cease—

Can we get any stronger language than that to cut them out?—

and determine as to each specific matter of regulation and control prescribed in this section as soon as the State shall have provided a commission.

Mr. McNARY. It is true the Government has agreed to abandon regulation, provided regulation is on the State statute books, but what is the basis for State regulation upon the navigable streams? It is that which has heretofore been prescribed by the Congress of the United States.

Mr. UNDERWOOD. I understand, but there is not a word in the water power act that says the State shall take a Government valuation of anything. It merely says the commission shall get out when the State starts to regulate, and the States do regulate.

Mr. McNARY. I did not say there was any such thing in the act. I am speaking about the construction that has been placed upon the act and what is the legal aspect of the proposition.

Mr. UNDERWOOD. The Senator knows we can not, by construction, put something into an act that is not there. We can not put any construction upon the act if there is no fundamental term there upon which to base it. The minute there is regulation in the State the Federal power act ceases to apply.

But that is not why the Senator wants the Federal water power act injected into the pending legislation. I want to call attention to section 10 of the amendment which I have proposed, and which reads as follows:

The surplus power not required under the terms of this act for the manufacture of nitrogen or fertilizer when sold or used shall be subject to the laws, rules, and regulations relating to the sale and use of electric power in the several States in which said power is used.

Those are the identical terms of the Federal water power act relating to regulation and sale when the State commissions have been appointed as they have in these several States wherever the power could possibly reach. But there is a provision in the water power act, and I was very careful to ask the Senator about it. I am not saying this in criticism of the Senator from Oregon at all. The Senator awhile ago said he was not familiar with my bill, and I think he has proved by his subsequent statements that he is not familiar with what we are doing. He was not familiar with the fact that the lease ended in 50 years. He wanted to recapture the property at the end of 50 years.

Mr. McNARY. I know the Senator wants to be fair. I have been studying the subject for four or five years. I have read the Senator's bill. I do not think anyone understands it, and I am in that general category.

Mr. UNDERWOOD. The Senator certainly understands there is no lease, either by the corporation or the lessee, that will run over 50 years.

Mr. McNARY. That is about the only thing that is understandable in it.

Mr. UNDERWOOD. Perhaps the Senator will understand some other things if I call his attention to them. If the Government under the terms of this lease can not go further than 50 years, why does the Senator want to recapture the property? Why does he want to inject legislation providing to recapture it and require the Government to set up an amortization fund against itself for recapture when at the end of 50 years we are going to get it back anyhow?

I can not understand why, and I am sure the Senator does not understand my bill or he would not think it necessary to provide for recapture when the property all belongs to the Government, and it is under any circumstances coming back at the end of 50 years.

Mr. McNARY. Mr. President, will the Senator yield again?

Mr. UNDERWOOD. Certainly.

Mr. McNARY. I said in my introductory remarks that there are certain provisions of the water power act that are not consistent with the terms of this bill or the contracts to be made pursuant thereto. I appreciate the recapture clause is not pertinent here. I know there are certain phases embodied in the bill, and which must be incorporated in the contract that are not pertinent to the water power act. But there are provisions of the water power act which I think are very pertinent, and one of them is that which prevents discrimination, monopoly, and evasion of the law. Does the Senator want to do that? Let me read one thing while we are looking around for some of the good things in the act. This is one of many, and it is just a sample:

That combinations, agreements, arrangements, or understandings, express or implied, to limit the output of electrical energy, to restrain trade, or to fix, maintain, or increase prices for electrical energy or service are hereby prohibited.

Does the Senator object to that provision of the water power act when all others operating in the country are conforming to it? We will in some years to come have a great quantity of excess power over that which is used for the manufacture of nitrate, and I want to prevent the fixing of prices and discrimination. I suspect that is one provision to which the Senator from Alabama objects.

Mr. UNDERWOOD. No; I do not object for that reason, but because it is futile. A great many things go into law that are ancient and obsolete, and that is one of them. That is an effort to create competition in a regulated public service. They provide for regulation in that act and then say again that the Sherman antitrust law shall not be evaded. It is all set forth in the Sherman antitrust law, but the author of this particular water power act wanted it all put

in there again. He provides for regulation there by the Government or the State. If we have proper regulation, what do we care about competition?

As a matter of fact, I will say to the Senator from Oregon, the Congress of the United States has reversed its policy on that proposition. The President of the United States himself and almost everybody in authority have recognized that the theory the Senator is talking about in archaic and obsolete when we have proper regulation. We have enacted a law with reference to certain public-service corporations, the railroads, seeking combinations to facilitate the carrying of freight and public service, inviting combinations, and the distinguished President pro tempore of this body, who does not happen to be in the chair just now, wanted at one time to make it mandatory that they should combine in order to facilitate business, because when there is regulation in rates there ceases to be any necessity for competition; in fact, the necessity for competition is gone. In my State there is a most excellent law that absolutely regulates the rates and fixes the earning capacity of the investment, and the adjacent States all have laws for regulation. The law to which the Senator refers under the very terms of the water power act does not apply as soon as the State comes within those terms. It ceases then to apply.

Mr. BROOKHART. Mr. President, will the Senator yield?

Mr. UNDERWOOD. I will in just a moment, if the Senator will allow me to proceed.

Mr. BROOKHART. Certainly.

Mr. UNDERWOOD. So it is not a question of regulation. I am not now talking about the Senator from Oregon. This proposal has come to me several times from the same source that resides here in Washington. I know that the ambitions of bureaucratic government are without limit, and as I said awhile ago they always want to tie onto the tail of everybody else's kite.

But the serious objection that I have to the suggestion is not so great. In section 17, if the Senator will read it, provision is made for a fee that must be charged for each kilowatt hour or horsepower and where it is on Indian lands a portion of it goes to the Indian tribe and the other part is absorbed by a bureau in Washington.

It is not so great, but for the use of this power in any other dam where there is a private citizen who develops the power, the small fee is taken out of the operator of the dam and ultimately a portion if not all of it lands in a bureau in Washington, and not in the Public Treasury, to enlarge the powers and magnitude and dignity of the Washington bureau. That is all there is in the Senator's proposal, and I challenge him to show that there is anything else; that there is one single thing in the water power act that is not taken care of under the terms of the bill before the Senate except the transmission of a small fee from Muscle Shoals, Ala., that must come out of the farmer in the price of the fertilizer—probably so small that he would not feel it, but that is where it would come from—that must be transmitted to an independent bureau of the Government at Washington.

I yield now to the Senator from Iowa.

Mr. BROOKHART. The Senator in his statement said the law of the State of Alabama regulated the return upon the investment of these enterprises. Does not his amendment change that rule and allow 8 per cent on the turnover?

Mr. UNDERWOOD. Oh, no. The Senator has not read the bill. The fertilizer is one thing and the power is another thing.

Mr. BROOKHART. Is there any regulation whatever as to the power?

Mr. UNDERWOOD. The regulation in reference to 8 per cent on the turnover of fertilizer is one thing. There may be some surplus power. What the Senator from Oregon was discussing was the sale of the surplus power to the citizens of the several States, and that is regulated under the laws of Alabama.

Mr. BROOKHART. Is it the Senator's claim that that is regulated?

Mr. UNDERWOOD. It is not only a claim, but it is a fact. If the Senator wants to verify it, he can send and get the statutes of Alabama and read them.

Mr. BROOKHART. Would the regulation in Alabama fix the amount of return they could earn on the investment in the corporation that leases Muscle Shoals?

Mr. UNDERWOOD. I do not make myself clear to the Senator apparently. I will try to make it perfectly clear to him. It has nothing to do with the corporation. It has nothing to do with the fertilizer. What I am talking about has nothing to do with the profits of the corporation.

Mr. BROOKHART. But, if the Senator will allow me—

Mr. UNDERWOOD. Just a moment. If the Senator wants me to explain it he should let me proceed. It has nothing to do with that, but there might be some surplus power and that surplus power will be sold to private enterprises throughout the States adjacent to Muscle Shoals. I say that in Alabama the sale of that surplus power and the rate at which it shall be sold and the regulations in reference to its consumption are controlled by the State of Alabama under its laws. That being the case, even if the water power act shall apply, under the terms of the water power act the Government regulation would cease and the Alabama regulation would apply, because the water power act provides that whenever the State regulates, the Government regulation shall cease.

Mr. BROOKHART. Under the Senator's bill, whether the property be operated by a Government corporation or by a lessee, there would be two sources of profit. One would be from the fertilizer, and the other from the sale of the surplus power.

Mr. UNDERWOOD. Yes.

Mr. BROOKHART. To my mind they can not be separated when we come to figure the return on the investment. The provision of this bill is not for an 8 per cent return on the investment, but it is for an 8 per cent return on the turnover, so far as it relates to nitrogen.

Mr. UNDERWOOD. Of course the only way that the law of Alabama could affect this situation would be that it would limit the profits at which the lessee or the corporation could sell the power; but if they are not willing to sell it in Alabama under its regulations they would have to sell it somewhere else in order to dispose of it. We have very good regulations there, and I think that power sells in Alabama at a lower rate than in most of the adjoining States. If the corporation or lessee should not be willing to sell it for as low a price as Alabama compels them to sell it, then they would not have to do so, but they could take it somewhere else and sell it.

Mr. BROOKHART. Some of this power would cross State lines; it would go into interstate commerce; and in that case it would not be covered by the Alabama regulations.

Mr. UNDERWOOD. Not until it is sold or used would regulations apply.

Mr. BROOKHART. Suppose it were sold in Tennessee.

Mr. UNDERWOOD. In Tennessee they have a public utilities commission to regulate such matters.

Mr. BROOKHART. If it were a company located in Alabama and it sold it in Tennessee it would not be subject to Alabama regulations.

Mr. UNDERWOOD. That does not make any difference. It is where the power is sold and used that the regulations apply. It does not make any difference where the power comes from; it is regulated where it is sold.

Mr. BROOKHART. It would hardly seem to me that the Tennessee Public Utilities Commission would have any power to regulate the return on the investment of a company in Alabama.

Mr. UNDERWOOD. The Senator lives in a State next to Minnesota; but if he carried a wagonload of potatoes to Minnesota and Minnesota regulated the price of potatoes he would understand that he would have to sell his potatoes under the terms which the Minnesota law allowed him to do or he would not sell them at all.

Mr. BROOKHART. Of course, Minnesota has no power to regulate the price of potatoes coming from Iowa.

Mr. UNDERWOOD. But if it did, then it could regulate the price of electricity which comes over the line just in the way that it could regulate the price of a wagonload of potatoes which would cross the line between Iowa and Minnesota.

Mr. HARRISON. Before the Senator proceeds I desire to say that before he was interrupted I understood him to say that a very small cost might be exacted and it would come out of the profits that might be made in the sale of fertilizer.

Mr. UNDERWOOD. Yes; it is not material, but nevertheless it is a holdup.

Mr. HARRISON. I want to take issue with the Senator that it is almost infinitesimal. As I read the law, the Federal Power Commission has the right to exact 25 cents a horsepower, and if they should exact that much and there should be a million horsepower developed down there, it might amount to a quarter of a million dollars a year; it might amount to a great deal, and would increase the price of fertilizer to the farmers of the country.

Mr. BROOKHART. I think that is not a matter of criticism of the bureau. This bureau has only the power which

Congress gave it, and if any criticism can be made it should fall upon Congress and not upon the bureau.

Mr. UNDERWOOD. The Senator is right about that. I do not say it is true in this case, but I suspect that the bureaus come around to Congress, knock on the outer door, and lobby for what they can get for themselves.

Mr. BROOKHART. But that does not excuse Congress for yielding.

Mr. UNDERWOOD. No; and it would be inexcusable if Congress adopted the amendment of the Senator from Oregon.

What the Senator from Mississippi says is true. I said that the amount was small because this power will certainly sell for \$15 a horsepower, and 25 cents a horsepower is small in comparison; but when we take the great volume of power it will amount to a considerable sum of money, and if it is going to anybody it should go to the national defense and to the consumers of fertilizer and not to a Washington bureau. I therefore hope that the amendment to the amendment will not be adopted.

Mr. SMITH. Mr. President, before the vote is taken I wish to say that I wish to offer an amendment to the substitute proposed by the Senator from Alabama. I notice that the draft I have had made refers to the Senate bill 3507. I believe that the bill that we now have under discussion is House bill 518. Is that correct?

Mr. UNDERWOOD. It is House bill 518. I do not know what the Senator's proposed amendment is.

Mr. SMITH. I propose to amend the text really of House bill 518, and I wanted to get the pages and lines to correspond. Upon investigation I find that they do correspond, in fact, and therefore I offer the amendment and ask that it may be printed and lie on the table.

Mr. UNDERWOOD. I will ask the Senator not to force us over until to-morrow for a consideration of the amendment if it is reached to-day.

Mr. SMITH. If it is reached, I think, perhaps, we might discuss it and vote upon it.

The PRESIDENT pro tempore. The amendment of the Senator from Oregon [Mr. McNARY] to the amendment is now pending.

Mr. SMITH. I wish to state that I do not care to press my amendment at this time. Of course, if it shall become necessary, I might ask for a vote on it this evening; but, in any event, I presume that it will be germane even when the bill goes into the Senate in case we do not reach it this afternoon. So I will ask that the amendment may be printed and lie on the table.

The PRESIDENT pro tempore. The amendment proposed to be offered by the Senator from South Carolina will be printed and lie on the table.

Mr. McKELLAR. Mr. President, I think the amendment proposed by the Senator from Oregon to the amendment of the Senator from Alabama covers entirely too much territory. I doubt if all the provisions set forth in the amendment to the amendment are applicable to the pending measure; but I do think that substantially the provisions of sections 19 and 20 of the water power act should be applied to the pending bill; certainly all of those which are applicable should be applied; that is, those giving to the States the right to regulate rates where the power is purely within a State and the Congress or some organization directed by Congress the right to regulate rates where the power is interstate. I think substantially that ought to be done. At this time I merely state my opposition to the amendment offered by the Senator from Oregon for the reasons indicated and say that I shall offer the substance of sections 19 and 20 of the water power act later as an amendment to the pending proposal.

The PRESIDENT pro tempore. The question is upon the amendment proposed by the Senator from Oregon to the amendment of the Senator from Alabama.

Mr. McNARY. On that I ask for the yeas and nays.

Mr. COPELAND. Mr. President, I inquire if it is in order to present an amendment to the Norris bill at this time?

The PRESIDENT pro tempore. The Chair is of the opinion that an amendment offered to the committee amendment is in order.

Mr. COPELAND. I desire to offer an amendment and have it printed.

The PRESIDENT pro tempore. The amendment will be printed and lie on the table.

Mr. COPELAND. I should like to have the amendment stated.

The PRESIDENT pro tempore. The Secretary will read the amendment.

The READING CLERK. On page 28, line 10, after the word "available," it is proposed to strike out the following:

and he shall not demand of the Federal Power Corporation for such purpose more than 100,000 horsepower, of which not more than 25,000 shall be primary power.

Mr. COPELAND. The purpose, of course, of the amendment is to eliminate from the bill what seems to some of us to be a weakness respecting the amount of power which may be used for the making of fertilizer. Therefore, I want the amendment pending so that we may act upon it at the proper time.

The PRESIDENT pro tempore. The yeas and nays are demanded on the amendment of the Senator from Oregon to the amendment of the Senator from Alabama.

The yeas and nays were ordered.

Mr. HEFLIN. Mr. President, the Senator from Oregon [Mr. McNARY] has made reference to a bill which passed Congress when Mr. Taft was President, which provided for the building of a dam—Lock 12 or 18—as he said, on the Coosa River. It seems to me that the Senator is unfortunate in citing that case in this debate. Mr. Taft's veto of that bill drove the American Cyanamid Co. out of the United States into Canada. That was the effect of his veto. The American Cyanamid Co. was going to set up business at Montgomery, Ala.; it was going to operate at the dam proposed in the bill vetoed by President Taft. When President Taft vetoed that measure which had passed the Senate by an overwhelming majority and the House by a clear majority he killed the project, and then what happened? Why, the American Cyanamid Co. left the United States and went to Canada. It has been my idea, Mr. President, that we ought to do everything fair and reasonable to build up industries in the United States; that we ought to encourage them instead of throwing restrictions and obstacles around them and in their way and driving them out of the country.

Mr. McNARY. Mr. President—

Mr. HEFLIN. I yield to the Senator from Oregon.

Mr. McNARY. Is it not true that the Alabama Power Co. were the applicants for a license and Congress by special act granted them certain rights on the Coosa River? That is correct, is it not?

Mr. HEFLIN. That is true to a certain extent.

Mr. McNARY. Is that the same company that went into Canada?

Mr. HEFLIN. No. The company I named is the American company as I understand it, that was going to do business at this lock on the Coosa River, in the congressional district that I represented at that time.

Mr. McNARY. Well, I wish to be historically accurate in the matter. Is the statement that I made one that the record will sustain, that the Alabama Power Co. attempted, in 1912, as I recall, to acquire the second dam site on the Coosa River, and a special bill was enacted by the Congress of the United States? President Taft vetoed that bill because it did not carefully protect the rights of the public. Nothing was done with that development by the Alabama Power Co. until the water power act was passed in 1920, and they to-day are developing that power under the provisions of the water power act. If that was running them out of the country, they came back.

Mr. HEFLIN. That is a different proposition altogether, Mr. President.

Mr. McNARY. Then I hope the Senator from Alabama will not criticize the Senator from Oregon by saying he is unfortunate in his allusion, when I have correctly recited the history of the particular transaction to which I made reference a little while ago.

Mr. HEFLIN. But the Senator is not correct, if my recollection is accurate, because it is a fact that the American Cyanamid Co. was going to do business at this lock on the Coosa River, and it was denied the privilege of doing so by the veto of President Taft. So it did not do business there. It went into Canada and is now doing business in Canada; and my point is that we have lost this industry to the United States when we had the opportunity to obtain it, and lost it by the veto of President Taft.

Mr. McNARY. Mr. President, will the Senator yield again?

The PRESIDENT pro tempore. Does the Senator from Alabama further yield to the Senator from Oregon?

Mr. HEFLIN. I am always glad to yield to my friend from Oregon.

Mr. McNARY. I appeal to the Senator to be more careful with his facts and history. It was the Alabama Power Co. that applied for these rights, and Congress granted that particular company these rights in the bill that was vetoed by Presi-

dent Taft. They came back—they never went away, in fact—and are now operating at this particular dam under the provisions of the water power act—not the cyanamide company at all.

Mr. HEFLIN. The Senator's recollection and mine are quite at variance. My contention still is, in spite of all the Senator has said, that it was the American Cyanamid Co. that went down there for the purpose of consuming the power to be produced at the dam named in the bill vetoed by President Taft. They had everything ready. We passed this bill. I led the fight for its passage in the House, and the President vetoed it. And I want to say again that President Taft's action drove the American Cyanamid Co. out of the United States into Canada.

I want to correct the Senator on another thing, too. I think he said that practically all of the industries of the country run by water are now being operated under the Federal water power act. I desire to call the Senator's attention to the fact that the aluminum industry owned by Mr. Mellon and operated on the Little Tennessee River in Tennessee, using several thousand horsepower and planning to use 475,000 horsepower, is not under the Federal water power act. Why is it that this trust—and it is a trust; it is a complete monopoly in the hands of Mr. Mellon—why is it, I say, not covered into the Federal water power act? If we want to be entirely fair and uniform in all these propositions, I suggest to the Senator from Oregon to include in his amendment this aluminum business of Mr. Mellon on the Little Tennessee.

Mr. McNARY. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Alabama further yield to the Senator from Oregon?

Mr. HEFLIN. Certainly.

Mr. McNARY. I have not the persuasive power to defend Mr. Mellon here; it is not a part of this controversy; but again the distinguished Senator is wrong in his history and his facts. All the power developed on the Little Tennessee River is now under the water power act. I do not know whether Mr. Mellon is operating there, or the Aluminum Co.; but the Niagara project, the Tennessee project, and the Coosa River project are all under the water power act. There are a few scattered licensees who have water powers of from 50 to 100 horsepower that were granted special privileges years ago that are now without the fold of the water power act; but none of these large ones are, as intimated by the Senator from Alabama.

Mr. HEFLIN. Mr. President, the Senator from Oregon is again mistaken. I do not know where my good friend the Senator from Oregon has gotten his data. The information the Senator has does not at all coincide with mine.

Let me say this: The Aluminum Co. of America has a large development on the Little Tennessee River, where they already have one large hydroelectric plant in operation and are planning a total installation of about 475,000 horsepower, all to be used for the manufacture of aluminum. The Federal Government has spent thousands of dollars in efforts to preserve the navigation of the Little Tennessee River, and it is just as much a navigable stream to-day as it ever was. The dams of the Aluminum Co. affect navigation, and the entire situation is wholly within our control; yet no one has suggested that Mr. Mellon's aluminum company should come under the Federal water power act and that the perpetual rights that he now enjoys there should be limited to 50 years.

He is not limited to 50 years, to 100 years, or any number of years. He is not operating under your Federal water power act. He practically has a free hand in a perpetual right.

Mr. President, the situation here is not agreeable to me. I am not satisfied with either one of these bills. I was wholeheartedly in favor of Mr. Ford's offer.

Mr. NORRIS. Mr. President—

Mr. HEFLIN. I yield to the Senator from Nebraska.

Mr. NORRIS. I was interrupted, and did not hear just what the Senator said; but in order to get the question right I should like to ask the Senator, for information, if these licensees—Mr. Mellon, for instance, or his cyanamide company—did not acquire their rights prior to the passage of the Federal water power act?

Mr. HEFLIN. They may have. I am not informed as to that.

Mr. NORRIS. I would agree with the Senator that they are wrong. I am not defending them by any means, and would not vote for any one of them under any consideration; but prior to the passage of the water power act there were several instances, and that may be one of them—I do not recall to mind any of them, but that perhaps is one—where perpetual rights have been given. It was one of the things that President Roosevelt always opposed, and President Taft did afterwards; and, while I am not familiar with the matter, perhaps that was

one of the reasons why he vetoed the bill the Senator has referred to—that the granting of perpetual rights to anybody, tying up the resources of the country, was wrong.

I think we all agree about that. Nobody defends it now, and, as far as I know, since the passage of the water power act nobody has ever succeeded in getting through Congress an act giving them the right to use the public streams except under the water power act. If I am wrong about that I shall be glad to be corrected, because I will go just as far as the Senator will to prevent any kind of giving away of that kind. That was one of the things that we had before us and discussed in the water power act, and Senators and Members of the House did not agree as to the time. I remember distinctly that I was opposed to making it even 50 years. I thought 40 years was long enough; but after a great deal of debate 50 years was fixed, and if I am not mistaken there never has been a grant made since, because to get one of any other kind would require, of course, as the Senator knows, a special act of Congress.

Mr. HEFLIN. Mr. President, I do not remember whether Mr. Mellon secured these rights before or since the water power act went into effect, but the point is that he has these rights and he is operating in this same section on a river that flows into the great Tennessee River, and if he did get these rights prior to the time the Federal water power act was enacted, why was it that that bill was not vetoed? If it was done to protect the water rights of the Government in the veto of Mr. Taft regarding the Coosa River, why not exercise it on the Little Tennessee River?

I understand that quite a number of these projects in the country are not operating under this Federal water power act, and, as my colleague [Mr. UNDERWOOD] has already pointed out, there will be a conflict of authority in this matter which in my judgment will seriously handicap the operation of this corporation, whoever it is, at Muscle Shoals, if his bill shall become a law or if the bill of the Senator from Nebraska shall become the law.

Mr. NORRIS. Mr. President, will the Senator yield?

Mr. HEFLIN. Certainly.

Mr. NORRIS. I so fully agree with the Senator about granting perpetual rights that I do not want any misunderstanding. We can easily determine, if the Senator does not have it there, by looking it up just when this right was given to Mr. Mellon.

Mr. HARRISON. Mr. President, I think I can give the Senator the information he desires.

Mr. NORRIS. Before the Senator does it, let me call attention to what I think is another exception. I may be wrong; I am speaking only from memory now, but I think the dam of the Mississippi River at Keokuk is a perpetual right. If I am wrong, I shall be glad to be corrected by any Senator who is familiar with it.

Mr. HEFLIN. I think the Senator is correct.

Mr. NORRIS. And I think that act was passed while President Roosevelt was in the White House.

Mr. SMOOT. That was a special act of Congress. I remember it very well.

Mr. NORRIS. It was a special act of Congress. While I never talked with President Roosevelt about that I have talked with other men who have talked with President Roosevelt about it. That act was passed near the beginning of his administration; and one of the people with whom I have talked, who is in the Chamber now, told me that he talked personally with President Roosevelt, and President Roosevelt told him that it was one of the regrets of his life that he had ever signed the Keokuk bill giving them a perpetual right. Since the passage of the water power act I do not believe there has been an exception to it. Certainly there ought to be none unless there are peculiar circumstances, some of which I admit are involved here. There ought to be no exception made. In other words, we ought to treat everybody in the same way if they are getting the right under the law. Whether the law is right or not, it is the law, and we ought to apply it to everybody wherever it is applicable.

Mr. SMOOT. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Utah?

Mr. HEFLIN. I do.

Mr. SMOOT. I am quite sure the Senator was a Member of the House at the time the discussion took place on the water-power situation. One of the objections to the passage of the water power act was that there had been numerous grants to institutions throughout the country with no tax whatever imposed upon them, and therefore we should not pass the law as we did. The Senator will remember that beginning, I think, in the year 1908, or about that time, we began to hold meetings. Shortly after that I became chairman of

the Public Lands Committee, and at different sessions of Congress numerous hearings were had before we finally got the bill enacted into law.

I think the Senator remembers that. Then, during the discussion, this Keokuk Dam power site was developed, and it was in pursuance of a special act of Congress, and I know that President Roosevelt hesitated some time before signing it. If it had not been passed by the Congress as it was, I do not believe that he would have ever signed it, because I know how he felt at that time; and I know another thing: That since the passage of the water power act there never has been a special grant given to any concern or individual in the United States.

Mr. HEFLIN. Did the Senator say that the Federal water power act was passed in 1908?

Mr. SMOOT. No; it was later than that.

Mr. McNARY. 1920.

Mr. SMOOT. Was it not 1919? It was either 1919 or 1920; I forget which.

Mr. McNARY. Here it is—June 10, 1920.

Mr. HEFLIN. Under President Wilson's administration.

Mr. SMOOT. Yes; he was President at the time. I was chairman of the Public Lands Committee, and I know that I took an interest in it all the time—during President Taft's administration, during President Roosevelt's administration, and during President Wilson's administration.

Mr. HEFLIN. Now, then, Mr. President, it is admitted that we have exceptions to the general rule or law. The Keokuk Dam instance, cited by the Senator from Utah and the Senator from Nebraska, is one, and I have cited one. The aluminum business of Mr. Mellon, Secretary of the Treasury, is another.

Here is an industry that we are seeking to operate in the interest of agriculture, and we are trying to make of this project at Muscle Shoals a serviceable agency for the Federal Government and a great instrumentality of aid to the farmers of America; and God knows they need it. I think that since we have so many exceptions to the water power act we ought to make an exception of this one. As has been pointed out by my colleague [Mr. UNDERWOOD] and by the able Senator from Mississippi [Mr. HARRISON], it will impose a burden upon the farmers, because they would have to pay for the operation under the amendment of the Senator from Oregon. It will tax the fertilizer that they must buy, and that is an additional burden that ought not to be imposed by this body. I do not believe that the Senator from Oregon intended to impose such a burden upon the farmers of America.

Mr. President, I simply rose at this time to call to the Senate's attention the things that I have just mentioned. I do not desire to say anything more. I am opposed to the amendment of the Senator from Oregon, and I trust that it will be defeated.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Oregon to the amendment proposed by the Senator from Alabama, on which the yeas and nays have been ordered.

The reading clerk proceeded to call the roll.

Mr. McKELLAR (when his name was called). I have a temporary pair with the senior Senator from Ohio [Mr. WILLIS]. In his absence, I transfer that pair to the senior Senator from Montana [Mr. WALSH] and vote "nay."

The roll call was concluded.

Mr. OVERMAN (after having voted in the negative). I have just been informed that my pair, the senior Senator from Wyoming [Mr. WARREN], is absent. I transfer my pair with that Senator to the senior Senator from Tennessee [Mr. SHIELDS], and allow my vote to stand.

Mr. JONES of Washington. I desire to announce the following general pairs:

The senior Senator from West Virginia [Mr. ELKINS] with the senior Senator from Oklahoma [Mr. OWEN]; and

The junior Senator from Pennsylvania [Mr. REED] with the junior Senator from Delaware [Mr. BAYARD].

The result was announced—yeas 29, nays 34, as follows:

YEAS—29

Borah	Hale	McNary	Shipstead
Brookhart	Howell	Means	Stanfield
Capper	Johnson, Calif.	Moses	Sterling
Copeland	Johnson, Minn.	Norris	Walsh, Mass.
Couzens	Jones, Wash.	Oddie	Wheeler
Cummings	Keyes	Phipps	
Dill	Leandro	Ransdell

So Mr. McNARY's amendment to Mr. UNDERWOOD's amendment was rejected.

Mr. McKELLAR. Mr. President, I offer the amendment I mentioned a few moments ago, which the Senator from Alabama said he was willing to accept. I ask that it be read.

Mr. UNDERWOOD. I said I had no objection to it, so far as I was concerned.

Mr. McKELLAR. I do not think it will be objected to by any one.

The PRESIDENT pro tempore. The Secretary will report the amendment to the amendment.

The READING CLERK. On page 4 of the substitute, at the end of line 19, the Senator from Tennessee proposes to strike out the period and to insert a colon and the following proviso:

Provided, That said lease shall be made only to an American citizen, or citizens, or to an American owned, officered, and controlled corporation; and, if leased, in the event at any time the ownership in fact or the control of such corporation should directly or indirectly come into the hands of an alien or aliens, or into the hands of an alien owned or controlled corporation or organization, then said lease shall at once terminate and the properties be restored to the United States. The Attorney General of the United States is given full power and authority, and it is hereby made his duty, to proceed at once in the courts for cancellation of said lease in the event said properties are found to be alien owned or controlled and are not voluntarily restored.

Mr. McKELLAR. Mr. President, I take it that there will be no opposition to an amendment of this kind. Of course, the first purpose of this industry at Muscle Shoals is to make nitrogen for war purposes. It is our great war asset, and of course it would never do, under any circumstances, that this great asset, so useful in time of war, should come under the control of any alien. Therefore this amendment has been offered by me, and the Senator from Alabama has accepted it so far as he is able to accept it. I hope it will be agreed to.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The question now is on agreeing to the amendment offered by the Senator from Alabama, as amended.

Mr. JONES of New Mexico. Mr. President, I would like to call to the attention of the Senator from Alabama the provision on page 12 of his amendment, under the heading of "Capital stock and bonds." This paragraph provides that—

the capital stock of the corporation shall consist of 100 shares of common stock of no par value.

That, of course, is a mere formality, to represent the ownership in the corporation.

The next provision strikes me to be a very important one. It is as follows:

The corporation shall also issue an amount of 20-year bonds bearing interest at the rate of 5 per cent per annum, which shall be a first lien on the property of the corporation and in an amount not to exceed \$50,000,000, to be sold from time to time as needed to carry out the purpose of this act. The terms for the sale of said bonds shall be approved by the Secretary of War. If at the end of any fiscal year after the fourth year the corporation shall not have earned net sums sufficient to meet the interest on said bonds as evidenced by audits of the accounts of said corporation by the Secretary of War, the corporation shall forthwith cease operations and shall not resume until authorized so to do by the Congress.

Mr. UNDERWOOD. I will say to the Senator, before he starts his argument, that he apparently has not had the last print. At the suggestion of the Secretary of War in the memorandum he sent down here, I amended the amendment, and there is a new print, from which I will read to the Senator, as I see he has not the last print in his hand. I added this proviso:

Provided, That the principal and interest of said bonds shall be paid by the Secretary of the Treasury out of funds in the Treasury not otherwise appropriated upon default at any time in payment as herein provided by the corporation.

The Secretary of War suggested that if there was a default on these bonds the Government would have to pay them anyhow, that they could not sacrifice the property, and therefore he suggested that it was wiser in the beginning to provide that the Government should pay the principal and interest in case of default, because, he said, we would sell the bonds on issue at a much better rate, and that we could practically get a Government rate in selling the bonds with that provision in there, which we could not if it were not in there; and in the last analysis that we would have to pay them anyhow. So I accepted his suggestion.

Mr. JONES of New Mexico. I am very glad, indeed, to know that the amendment has been made. It obviates some of the difficulties which I thought I saw in the original provision.

If, however, that is to be done, I should like to ask the Senator from Alabama why we should put the rate of interest at 5 per cent? If the Government is going to pay the interest and the amount of the bonds in case of default, why should we fix the interest at 5 per cent when other obligations of the Government are now being sold at 4 per cent?

Mr. UNDERWOOD. I will say this to the Senator: I did not think, when I originally wrote the amendment, that we could sell without the Government guaranty behind the proposition at less than 5 per cent. I doubt it now; but I am perfectly willing to accept an amendment, as far as I can accept it, providing that the bonds shall bear a rate of interest of not to exceed 5 per cent.

Mr. JONES of New Mexico. If the Government is going to pay the interest and principal upon default, why make those bonds a lien upon this property at all? The Government owns the stock of the corporation.

Mr. UNDERWOOD. I will tell the Senator why. My purpose was to make the men who are operating it not default and have to come back to Congress. I do not think that hurts it at all to have it in there, and it may be some incentive to the operators to try to make good. It does not hurt the proposition at all to have it in there.

Mr. JONES of New Mexico. It strikes me that there yet may be some danger that the provision may be used absolutely to dispose of the property under the bond issue.

Mr. UNDERWOOD. No; that can not be done.

Mr. JONES of New Mexico. If that can not be done, then what is the use of the lien?

Mr. UNDERWOOD. I will state the only reason. As I said, in my initial proposition I put in the lien to secure the bonds. I accepted the amendment suggested by the Secretary of War, and that is the way it got into its present shape. I can not see any objection in the world to it. When the bill itself says the Government shall pay the principal and interest out of the Treasury, it can not possibly be defaulted and be sold to anybody else.

Mr. JONES of New Mexico. As a practical proposition, is it not true that the lien is worthless, and if the lien is not worthless, what is the worth of it and what may grow out of it? May there not be a foreclosure of the lien?

Mr. UNDERWOOD. No; there can not be a foreclosure of the lien as the bill now reads. With those words in it it can not be foreclosed because the Secretary of the Treasury will pay the interest as soon as it falls due.

Mr. JONES of New Mexico. Then what is the use of having the lien?

Mr. UNDERWOOD. I do not think it hurts anything. I do not think it is very material. It might help sell the bonds at a better price. Why strike it out?

Mr. JONES of New Mexico. I should strike it out simply because if we have a lien there that is worth anything it can be foreclosed, and that would mean the ultimate sale of the property to pay the bonds. If it should turn out that the Treasurer should not pay the interest and if anything should happen at the time, the lien might be foreclosed, and if it could not be foreclosed, I ask the Senator what is the use of having it in there?

Mr. UNDERWOOD. I told the Senator how I happened to put it in there.

Mr. JONES of New Mexico. I understand how the Senator came to put it in.

Mr. UNDERWOOD. The lien can not be foreclosed unless the Government of the United States goes broke; and, of course, if it goes broke we all go broke. I can not see an objection to having the provision in the bill. It may add to the sale

value of the bonds. Certainly, with the Government of the United States behind the bonds, there is absolutely no danger of the property passing away from us.

Mr. JONES of New Mexico. I am inclined to think the Senator is correct about it, in view of the provision which he has finally added to that paragraph.

Mr. UNDERWOOD. The Senator had the first print of my proposed amendment before him when he began speaking, and not the new one, which probably misled him.

Mr. JONES of New Mexico. Of course, the objection to it in its old form was very much greater than in its present form, but even in its present form I would like to have some one explain what is the purpose of making the lien and what the lien adds to it. The Government owns all the stock of the corporation. The Government has the ownership of the property. It has the obligation to pay. As the Senator knows, upon that obligation of the Government to pay this and in case of default pay the principal of the bonds, it can get money at 4 per cent without pledging any of its specific property.

Mr. SMOOT. The Senator must remember that these are not tax-exempt bonds. The joint-stock land banks to-day are selling bonds at 4.25 which are tax exempt. The Federal Farm Loan Board is offering bonds at 4.25 which are tax exempt. These bonds are not tax exempt, and I doubt very much if over the length of time they are to run we could sell them at less than 5 per cent.

Mr. JONES of New Mexico. The Government is selling to-day its obligations which are not wholly tax exempt.

Mr. SMOOT. They are wholly tax exempt up to a certain amount of income that a man may have. There are three different issues of which a man may hold over \$150,000 worth that would be tax exempt.

Mr. JONES of New Mexico. The present obligations of the Government are not exempt in any considerable amount in the hands of an individual. They are exempt from all but normal taxes in the hands of a corporation, and inasmuch as the corporation has no normal tax they are absolutely exempt in the hands of the corporation. The Senator is quite correct about that. It may be there is no tax-exempt feature here at all.

Mr. SMOOT. None whatever. I asked the Senator from Alabama about that the other day.

Mr. JONES of New Mexico. I am not so much concerned about that. I assume if the bonds bear 5 per cent and are worth more than that they will be sold at par. I am not concerned so much about that as I am about the question of the lien. It is not so important since the Senator from Alabama has added the phraseology that he has to his amendment, but it strikes me that we should still eliminate the idea of a lien altogether. I wish the Senator from Alabama would consider that and strike out the words "which shall be a first lien on the property of the corporation."

Mr. UNDERWOOD. I will say to the Senator that it is not very material one way or another, but I am sure there is no clause of foreclosure. In one sense it helps to limit the bonds that the corporation can issue, because they will be a first lien on the property, and I would a little rather have the provision in than have it out. But since the Government of the United States is obliged to pay the principal and interest, I do not think it is very material now. Rather than delay the Senate, if the Senator insists, I would be willing to strike it out, but I would much prefer if the Senator would leave it as it is, because I think there may be some value to it in the sale of the bonds.

Mr. JONES of New Mexico. I believe I shall move to strike it out and let it go to conference.

Mr. UNDERWOOD. It will not go to conference if it is stricken out. If it is left in, it will go to conference.

Mr. JONES of New Mexico. I think it should be stricken out. I do not believe in the Government pledging its own property.

Mr. UNDERWOOD. I am not going to combat the Senator on a question of that sort if he insists.

Mr. JONES of New Mexico. All we have to do is to strike out line 20.

Mr. UNDERWOOD. However, I find that there is some opposition to my agreeing to strike it out. I will ask the Senator not to insist at this time.

Mr. JONES of New Mexico. Very well; I shall not press the matter at this time, then.

Mr. McKELLAR. Mr. President, I offer an amendment to the amendment, which I ask may be read at the desk.

The PRESIDENT pro tempore. The amendment offered by the Senator from Tennessee will be read.

The READING CLERK. Add a new section as follows:

Sec. — That as a condition of the lease, every lessee hereunder which is a public-service corporation, or a person, association, or corporation owning or operating any project and developing, transmitting, or distributing power for sale or use in public service, shall abide by such reasonable regulation of the services to be rendered to customers or consumers of power, and of rates and charges of payment therefor, as may from time to time be prescribed by any duly constituted agency of the State in which the service is rendered or the rate charged: *Provided*, That when said power or any part thereof shall enter into interstate or foreign commerce the rates charged and the service rendered by any such lessee or by any subsidiary corporation, the stock of which is owned or controlled directly or indirectly by such lessee, or by any person, corporation, or association purchasing power from such lessee for sale and distribution or use in public service shall be reasonable, nondiscriminatory, and just to the customer and all unreasonable discriminatory and unjust rates or services are hereby prohibited and declared to be unlawful, jurisdiction is hereby conferred upon the Secretary of War, upon complaint of any person aggrieved, upon the request of any State concerned, or upon its own initiative, to enforce the provisions of this section, to regulate and control so much of the services rendered, and of the rates and charges of payment therefor as constitute interstate or foreign commerce, and to regulate the issuance of securities by the parties included within this section, and securities issued by the lessee subject to such regulations shall be allowed only for the bona fide purpose of financing and conducting the business of such lessee.

The administration of the provisions of this section, so far as applicable, shall be according to the procedure and practice in fixing and regulating the rates, charges, and practices of railroad companies as provided in the act to regulate commerce, approved February 4, 1887, as amended, and that the parties subject to such regulation shall have the same rights of hearing, defense, and review as said companies in such cases.

Mr. McKELLAR. Mr. President, in explanation of the amendment I wish to say that in so far as the regulation of the rates charged for the power in Alabama is concerned, it is primarily left to the Public Utilities Commission of Alabama. But where that power goes into interstate commerce it is provided by my amendment that the rates to be charged therefor shall be regulated by the Secretary of War under the rules laid down for the regulation of interstate commerce.

Mr. President, my purpose in offering the amendment is manifest. Those of us who live in States adjoining the State of Alabama are vitally interested in the power that is to be created by this project. It might be said at first blush that my proposal is in some way an interference with State rights. That is not true at all. Interstate commerce under the Constitution is unquestionably within the purview of the Congress.

It is regulated by the Congress or by agencies established by the Congress. It is in no sense a violation of State rights, but, on the contrary, it is an exercise of the power granted by the Constitution that might be of enormous importance to the States adjoining the State of Alabama. So far as the State of Alabama is concerned, the commission in that State, as I said, has the right under the amendment to regulate its own rates, but when that power goes into interstate commerce then manifestly there ought to be some central organization which has the right to regulate the rates in so far as the power is transmitted into adjoining States; otherwise great injustice might be done to the adjoining States.

This is a matter of very great importance to adjoining States. My State, as the Senate knows, is very close to the Muscle Shoals plant. If the plant and rates are to be regulated solely by the State commission of Alabama, it might be that Tennessee or Georgia or Mississippi or any other of the near-by States would be put to a very serious disadvantage.

Mr. UNDERWOOD. Surely the Senator does not think that the provision in the bill providing for State regulation means only the State of Alabama? The provision in the bill now is that it shall be regulated by the several States and that the State in which the power is used shall regulate the rates. In other words, the minute the power crosses the line into Tennessee, under the provisions of the amendment which I have offered as it stands now, it is subject to the regulation of the public-service commission, by whatever name it is called, in the Senator's own State.

Mr. McKELLAR. It is so provided in my amendment, too, but that is not the thing. Here is a great project that is being created by the Government of the United States. This industry is being created by the Government of the United States. It is the money of the United States that goes into it. It is not only for the benefit of Alabama and not only for the benefit of Tennessee but of all the States, directly or indirectly. Mani-

festly the central Government under those circumstances ought to control and regulate the power when it is transmitted to the other States.

Mr. ROBINSON. Mr. President, will the Senator from Tennessee yield for a question?

Mr. McKELLAR. I yield to the Senator from Arkansas.

Mr. ROBINSON. Under section 10 of the bill each State would regulate for itself the price of power consumed in that State?

Mr. McKELLAR. Yes.

Mr. ROBINSON. There would, therefore, be as many different standards of regulation as there would be States in which power might be sold?

Mr. McKELLAR. That is true.

Mr. ROBINSON. The thought of the Senator is that, in order to require and effectuate uniformity in price and quality and to prevent discrimination, the regulatory power ought to be one and the same as to all States in which power is consumed?

Mr. McKELLAR. The Senator from Arkansas has stated most clearly, very much more clearly and very much more forcefully than I could possibly state it, just the proposition which I have embodied in the amendment.

Mr. ROBINSON. I think the suggestion is worthy of very serious consideration. This condition might arise: A contest might occur between the States to determine what communities might be able to secure power most cheaply, and great confusion and much litigation might result because of the varying standards of regulation. I do not know whether or not the Senator from Alabama [Mr. UNDERWOOD] has given thought to that aspect of the case.

Mr. McKELLAR. The Senator from Arkansas has put his finger right on the spot, and I thank him for his interruption.

Mr. DIAL. Mr. President—

Mr. McKELLAR. I yield to the Senator.

Mr. DIAL. Under the Senator's amendment there would be two commissions operating in a State. He would have a national commission and a State commission fixing the rates. Would not that cause conflict?

Mr. McKELLAR. Not at all; not any more so than under the present law governing interstate commerce. We are all familiar with the fact that we have State commissions in every State and we also have a Federal commission, just exactly as is proposed in this instance.

The Senator from South Carolina would not want to do away with either one of them. He would not want to vote to do away with his State commission, and I know he would not want to vote to do away with the Interstate Commerce Commission.

Mr. DIAL. I do not think the national commission would be necessary in this case, because when the power got into the State the State commission would regulate the matter.

Mr. McKELLAR. The trouble about that would be, as has already been pointed out by the Senator from Arkansas [Mr. ROBINSON]—and it could not be more forcibly stated than he has stated it—that we might have as many different rates as there are States in which the power is used. The objection could not be better stated than that. There would be Tennessee and Kentucky and Georgia and Mississippi and Louisiana and the various other States that will use this power. South Carolina is not too far off to use it, nor is North Carolina. Each of those States would be establishing its own rates for its own purposes to benefit its own people, and the United States Government, which furnished all the money for the project, might be absolutely powerless to bring about uniformity in the rates. I am sure that no Senator would feel that that would be either fair or just.

Mr. DIAL. But the Government would not be furnishing all the money, and it would only be furnishing a part of the power which goes into the States.

Mr. McKELLAR. The Government is furnishing the entire amount of money for this particular project.

Mr. DIAL. Of course it is furnishing the money for this project, but not for other projects.

Mr. McKELLAR. We are not dealing now with any other project.

Mr. DIAL. Very well; then there would be one rate for Muscle Shoals power in my State and there would be another rate for power which is generated in the State by other companies. If there were a higher rate for Muscle Shoals power consumers would not purchase it, but would patronize the local companies. So the Muscle Shoals rate would have to come down as low as the local rate. Thus there would arise great confusion and perhaps confiscation.

Mr. McKELLAR. Not at all. It is not so provided.

Mr. KING. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from Utah?

Mr. McKELLAR. I yield to the Senator from Utah.

Mr. KING. It seems to me, then, that the position of the Senator from Tennessee, if he is logical, is this: This is the subject of interstate control, and the Federal Government, therefore, ought to fix the rates not only in Alabama but in every other State to which the power may be transmitted. The Senator's position, if I understand it, is that the local tribunal, the Public Utilities Commission of Alabama, may determine the rates there, but so soon as the power is taken beyond the boundaries of that State it shall then come under the cognizance of the Federal Government?

Mr. McKELLAR. No; the Senator does not understand the amendment. I have been very unfortunate in my explanation of the amendment, but I had hoped, even unfortunate as I might have been in expressing what I was trying to do, the very logical and terse statement of the Senator from Arkansas [Mr. ROBINSON] would certainly lead Senators to understand what is intended by the amendment. The object of the amendment is to establish precisely the same control over this subject that is now exercised over interstate commerce in the case of the railroads. Has the Senator from Utah a railroad commission in his own State?

Mr. KING. Yes.

Mr. McKELLAR. Of course, where there is interstate commerce going through the Senator's State or between his State and other States the powers of the Interstate Commerce Commission are supreme over that commerce, and therefore it should be so in this instance.

Mr. KING. In reference to the Senator's argument in favor of uniformity, may I call his attention to the fact that conditions in each State would be different? After the power shall have been transmitted from Alabama to South Carolina the method of distribution may be so different from the method of distribution in Tennessee as to call for higher rates, or vice versa. It seems to me that the question of uniformity is not important, and I think the bill as drawn sufficiently covers the situation. It provides that when the power shall be transmitted into the various States for use it shall then be subject to the jurisdiction of the various States and to the instrumentalities which may be there established. It seems to me that is fair; yet it is possible that there should be some supervisory power by the Federal Government; but until it shall be demonstrated that the States are dealing unfairly with this great project or are discriminating in their rates, it does seem to me that we ought not to confer upon the Secretary of War the power to determine the rates and make of him a judicial body. It is a power too great, it seems to me, to be conferred upon this officer of the Government.

Mr. McKELLAR. Mr. President, the trouble about the Senator's position is that if the Government leases this power to a private corporation under a contract without the regulation of rates, and if afterwards, within the period of 50 years, it should be determined by the Congress that it was vitally necessary to the people of this country that the rates should be regulated, the Congress would have already denuded itself of its power and would have no power over the subject. Now is the time to prevent any difficulty of that kind.

Mr. NORRIS. Mr. President, may I interrupt the Senator?

Mr. McKELLAR. I will be delighted to yield.

Mr. NORRIS. I think there is much merit in what the Senator has said; I think it is a question that has two sides; but I want to submit this proposition to the Senator: Suppose the Underwood substitute should become a law and the Senator's amendment should be incorporated in it, then the provisions of the Senator's amendment would become effective. Suppose in the meantime some other company under the water power act should take out a license on the Tennessee River or some other river in that vicinity, and both the Muscle Shoals power and the power generated by the licensee under the Federal water power act should be transmitted into the same States, would not we be confronted with the proposition that one of them would be regulated by one body and the other would be regulated by another body?

Mr. McKELLAR. I am delighted that the Senator has brought up that question. I have copied verbatim from the water power act, leaving out certain provisions that do not apply, every word that is in my amendment. The only difference between the regulations provided for in the water power act and in the proposed amendment offered by me is that the regulations are put under the Secretary of War.

They are exactly the same. I want to point out very briefly why I propose that the Secretary of War should do it.

Mr. UNDERWOOD. Will the Senator from Tennessee allow me to interrupt him before he gets away from that question?

Mr. McKELLAR. I am glad to yield.

Mr. UNDERWOOD. The Senator says that he has copied the water power act exactly?

Mr. McKELLAR. I said that, so far as it was applicable, I had copied it. I merely copied, however, from sections 19 and 20 of the water power act.

Mr. UNDERWOOD. I agree with the Senator that he has copied the amendment from the water power act.

Mr. NORRIS. Mr. President, I was going to call attention to the same suggestion which I think is in the mind of the Senator from Alabama.

Mr. UNDERWOOD. The Senator from Tennessee has copied from the act so far as he goes, but he has not gone as far as the water power act, which provides that wherever there is State regulation the power of the Federal Government under the water power act shall cease. The Senator left that out, and therefore he is injecting into this matter Federal regulation to a greater extent than the water power act itself does.

Mr. McKELLAR. No. I think the Senator is mistaken about that.

Mr. UNDERWOOD. I have the water power act before me.

Mr. McKELLAR. I also have it before me, and I will read from it. Section 19 of that act provides:

That as a condition of the license, every licensee hereunder which is a public-service corporation, or a person, association, or corporation owning or operating any project and developing, transmitting, or distributing power for sale or use in public service, shall abide by such reasonable regulation of the services to be rendered to customers or consumers of power, and of rates and charges of payment therefor, as may from time to time be prescribed by any duly constituted agency of the State in which the service is rendered or the rate charged. That in case of the development, transmission, or distribution or use in public service of power by any licensee hereunder or by its customer engaged in public service within a State which has not authorized and empowered a commission or other agency or agencies within said State to regulate and control the services to be rendered by such licensee or by its customer engaged in public service, or the rates and charges of payment therefor, or the amount or character of securities to be issued by any of said parties, it is agreed as a condition of such license that jurisdiction is hereby conferred upon the commission, upon complaint of any person aggrieved or upon its own initiative, to exercise such regulation and control until such time as the State shall have provided a commission or other authority for such regulation and control.

That part of that act is left out of the amendment.

Mr. NORRIS. There is also a proviso in the law which the Senator from Tennessee has not incorporated in his amendment.

Mr. McKELLAR. I will read that proviso. It is as follows:

Provided, That the jurisdiction of the commission shall cease and determine as to each specific matter of regulation and control prescribed in this section as soon as the State shall have provided a commission or other authority for the regulation and control of that specific matter.

That is also left out of the amendment.

Section 20 provides—

Mr. UNDERWOOD. The Senator leaves out the proviso in his amendment.

Mr. NORRIS. That, it seems to me, is what makes my comment applicable.

Mr. McKELLAR. No; because where a State has not a commission, it provides what shall be done, but where a commission is established in a State the first sentence of this paragraph of section 19 of course prevails. There were some States at the time the water power act was passed that did not have commissions, and that is the reason for the last two sentences of the section, but I understand that there are now no States which have not commissions, and there is no use of referring specifically to them.

Now, if the Senator will let me read section 20—

Mr. UNDERWOOD. Will the Senator allow me to interrupt him further?

Mr. McKELLAR. Yes.

Mr. UNDERWOOD. The Senator has just read a provision which proves my assertion that he has incorporated in his amendment the provision of the water power act granting regulating power to the Federal Government and left out the proviso.

Mr. McKELLAR. Oh, no.

Mr. UNDERWOOD. Where is the proviso in this amendment?

Mr. McKELLAR. I will read it to the Senator.

Mr. UNDERWOOD. I should like the Senator to take his amendment and read me the proviso.

Mr. McKELLAR. I will do it:

That as a condition of the lease, every lessee hereunder which is a public-service corporation, or a person, association, or corporation owning or operating any project and developing, transmitting, or distributing power for sale or use in public service, shall abide by such reasonable regulation of the services to be rendered to customers or consumers of power, and of rates and charges of payment therefor, as may from time to time be prescribed by any duly constituted agency of the State in which the service is rendered or the rate charged.

It is the very first part of the provision. It leaves it there.

Mr. UNDERWOOD. That is not a proviso.

Mr. McKELLAR. But the water power act provides in section 20 just as I also provide here. After allowing the State commissions to regulate the matter wholly within the States, I then provide, as provided by section 20 of the water power act:

That when said power or any part thereof shall enter into interstate or foreign commerce the rates charged and the service rendered by any such licensee, or by any subsidiary corporation, the stock of which is owned or controlled directly or indirectly by such licensee, or by any person, corporation, or association purchasing power from such licensee for sale and distribution or use in public service shall be reasonable, nondiscriminatory, and just to the customer and all unreasonable discriminatory and unjust rates or services are hereby prohibited and declared to be unlawful; and whenever any of the States directly concerned has not provided a commission or other authority to enforce the requirements of this section within such State or to regulate and control the amount and character of securities to be issued by any of such parties or such States are unable to agree through their properly constituted authorities on the services to be rendered or on the rates or charges of payment therefor, or on the amount or character of securities to be issued by any of said parties, jurisdiction is hereby conferred upon the commission—

That is the power commission. I change that by putting it in the hands of the Secretary of War; and I think, this being a special bill, that it ought to be put in the hands of the Secretary of War.

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from Arkansas?

Mr. McKELLAR. Surely.

Mr. CARAWAY. If a private company were to organize in Tennessee, since Tennessee has a body to regulate the distribution of power, the water power act would give to the commission no power to regulate rates in Tennessee.

Mr. McKELLAR. It would if it should transmit that power to other States.

Mr. CARAWAY. But in Tennessee the regulation would be under the local body.

Mr. McKELLAR. And so it would be under this.

Mr. CARAWAY. Under the Senator's amendment, now, if any of this power went into Tennessee, its regulation would be subject to whatever provision the Secretary of War might make. In other words, you might have this company in Tennessee doing a thing that your local body would prohibit, and they would look to the Secretary of War for their authority, and you would have two companies in Tennessee, one controlled by local regulation and one controlled by the Secretary of War.

Mr. McKELLAR. No; quite the contrary. The only possible difference between the two, if the Senator will permit me to point it out, is that in the one case the national regulation is through the instrumentality of the Secretary of War and in the other case it is through the instrumentality of the Federal Power Commission.

Mr. CARAWAY. Will the Senator pardon me just a minute?

Mr. McKELLAR. Yes.

Mr. CARAWAY. Under the water power act the water power commission has no power to regulate the distribution of power in Tennessee, because you have a State regulatory body.

Mr. McKELLAR. Oh, no.

Mr. CARAWAY. Oh, yes. Read your proviso.

Mr. McKELLAR. I have just read it.

Mr. CARAWAY. But the proviso says that whenever the State shall have a regulatory control all provisions of this act cease.

Mr. McKELLAR. No.

Mr. CARAWAY. Oh, yes, it does.

Mr. McKELLAR. If the Senator will read section 20—

Mr. CARAWAY. But read your proviso. There is no power to regulate the distribution of power under the water power act in any State where that State has a commission or board to do that thing—I mean, under the water power act. Under the Senator's amendment, then, regardless of what the commission in Tennessee might say, the regulation of this particular company would be under the control of the Secretary of War, while all other companies doing business in Tennessee would be under the control of the State board for the control and distribution of power.

Mr. McKELLAR. No; if the Senator will just listen to the language he will see how impossible it is.

Mr. ROBINSON. Mr. President, will the Senator from Tennessee yield to me for a moment?

Mr. McKELLAR. I yield; yes.

Mr. ROBINSON. I attempted to point out some moments ago the inconvenience that might arise from having the power transmitted into various States regulated by the different commissions of those States. Let me suggest to the Senator from Alabama that a difficulty arises under his amendment in that particular. The Senator's amendment has the same difficulty that is found in the bill, and it appears to me at first glance to be even more unjust, if I may use that term, than section 10, because the Senator's amendment provides that as to all power consumed in Alabama the Alabama State commission shall fix the price, but that as to all power consumed in any other State the Secretary of War shall fix the price. That is a diversity of regulation worthy of note in itself.

Mr. McKELLAR. Yes; it is.

Mr. ROBINSON. Why should one authority regulate the price of power in Alabama, the situs of the corporation performing the service, and a different authority regulate the price of power in all other States? Would not this give rise in a very marked degree to the very same difficulties that the Senator by his amendment is seeking to correct; and would it not add some embarrassments to the situation that do not exist under the provisions of the bill proposed by the Senator from Alabama?

Mr. McKELLAR. Mr. President, the question of the Senator is very pertinent. However, I think he is just a little mistaken in his reading of the first paragraph of this amendment:

That as a condition of the lease, every lessee hereunder which is a public-service corporation, or a person, association, or corporation owning or operating any project and developing, transmitting, or distributing power for sale or use in public service, shall abide by such reasonable regulation of the services to be rendered to customers or consumers of power, and of rates and charges of payment therefor, as may from time to time be prescribed by any duly constituted agency of the State in which the service is rendered or the rate charged.

That does not apply alone to Alabama. Possibly the language I have quoted from the water power act may not provide just what was in my mind or what was in the Senator's mind, but here was the purpose: The manifest purpose was that the various State commissions, in so far as the local service was concerned in each State, should have a primary regulatory power, but that whenever it was deemed necessary—

Mr. ROBINSON. Now may I ask the Senator with respect to the practical application of the provision, which is what we are most concerned with, in what States it is expected, under the provisions of this legislation or any similar legislation, that the person, association, or corporation owning or operating any project and developing, transmitting, or distributing power for sale will be? How many States will be included in that designation?

Mr. McKELLAR. There would be Alabama, Tennessee, and all the surrounding States.

Mr. UNDERWOOD. Alabama would not be in the Senator's provision, because that is not interstate commerce. Alabama could regulate its own power under the Senator's amendment. Alabama is the State that has to go to the Secretary of War.

Mr. ROBINSON. The intentment of the amendment, then, is that if the project locates a subsidiary plant in any State, the laws of the State in which that subsidiary plant is located will be applicable to regulate it?

Mr. McKELLAR. They will be applicable; yes.

Mr. ROBINSON. In my judgment that would make the provision worse instead of improving it, because it would simply make that many more different regulating agencies.

Mr. McKELLAR. It puts it precisely in the position of the regulation of commerce generally by the Interstate Commerce Commission and all the other commissions. I am inclined to

think the Senator from Arkansas is probably right, that there ought to be one central body to regulate the rates, and I will give my reasons for it.

Suppose the Alabama Utilities Commission, or whatever its name is, should so regulate the rates that every particle of this power must perforce be used in the State of Alabama. That would defeat the purpose of this act. This is a national proposition. The people of Kentucky, the people of Tennessee, the people of South Carolina and North Carolina, and all adjoining States or near-by States ought to have the right to the use of a reasonable portion of it. For that reason I hope Senators will think it over during the night, because it is a matter of the utmost importance to all of us who live outside of the State of Alabama. I do not believe that the State commission of any one State should control the distribution of this power. It is a matter of most vital importance to my own State, which is near by. I am sure the Senator from Alabama would not want to be unjust or unfair to any sister State: but we are preparing a law here for 50 years and we ought to be exceedingly careful about it.

Mr. CURTIS. Mr. President—

Mr. McKELLAR. I yield to the Senator from Kansas.

Mr. CURTIS. I know that this matter can not be disposed of to-night, and I ask the Senator to yield in order that I may move that the Senate proceed to the consideration of executive business.

Mr. McKELLAR. I yield to the Senator for that purpose.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 4 o'clock and 47 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, December 10, 1924, at 12 o'clock meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 9 (legislative day of December 8), 1924

UNITED STATES DISTRICT JUDGE

Guy H. Martin to be United States district judge for the Canal Zone.

UNITED STATES ATTORNEYS

Julien A. Hurley to be United States attorney, fourth division, district of Alaska.

George Stephan to be United States attorney, district of Colorado.

John Buckley to be United States attorney, district of Connecticut.

David J. Reinhardt to be United States attorney for the district of Delaware.

REGISTERS OF LAND OFFICE

William H. H. Heckman to be register of the land office at Eureka, Calif.

Charles E. Player to be register of the land office at Independence, Calif.

William H. Dickinson to be register of the land office at Lander, Wyo.

James J. Donegan to be register of the land office at Burns, Oreg.

John H. Peare to be register of the land office at La Grande, Oreg.

APPOINTMENTS IN THE REGULAR ARMY

TO BE SECOND LIEUTENANTS WITH RANK FROM JUNE 12, 1924

Corps of Engineers

Cadet Wallace Howard Hastings.

Cadet Emerson Leroy Cummings.

Cadet Fisher Shinholt Blinn.

Cadet Donald Charles Hill.

Cadet Reginald Langworthy Dean.

Cadet Merrow Egerton Sorley.

Cadet Philip Robison Garges.

Cadet John Ludden Mousseau Des Islets.

Cadet Gerald Joseph Sullivan.

Cadet Arthur Gilbert Trudeau.

Cadet Emerson Charles Itschner.

Cadet Howard Ker.

Cadet Herbert Davis Vogel.

Cadet Fremont Swift Thompson.

Cadet Emil John Peterson.

Cadet Gordon Edmund Textor.

Cadet Clinton Frederick Robinson.

Cadet Frederic Allison Henney.

Cadet Leonard Lawrence Bingham.

Signal Corps

Cadet John Henry Brewer.

Cadet Victor Allen Conrad.

Cadet Francis Elmer Kidwell.

Cadet Cary Judson King, jr.

Cadet Jesse Bernard Wells.

Cadet John Sewell Thompson.

Cadet James Stewart Willis.

Cadet Czar James Dyer.

Cadet Lawrence Wendall Adams.

Cadet Merton Goodfellow Wallington.

Cadet Emil Lenzner.

Cavalry

Cadet John Held Riepe.

Cadet Wendell Blanchard.

Cadet Charles George Meehan.

Cadet Harry Jordon Theis.

Cadet Lawrence Russell Dewey.

Cadet William Armstrong Bugher.

Cadet Wilbur Kincaid Noel.

Cadet Andrew Allison Frierson.

Cadet Carl William Albert Raguse.

Cadet Henry Sterling Jernigan.

Cadet Frank Jay Thompson.

Cadet Augustine Davis Dugan.

Cadet Clarence William Bennett.

Cadet Gordon Byrom Rogers.

Cadet George Curnow Claussen.

Cadet Murray Bradshaw Crandall.

Cadet William Joseph Reardon.

Cadet George William Busbey.

Cadet William Louis Howarth.

Cadet Cary Brown Hutchinson.

Cadet Clarence Keith Darling.

Cadet Joe L. Loutzenheiser.

Cadet Zachary Winfield Moores.

Cadet William Bellemere Wren.

Cadet Peter Conover Hains, 3d.

Cadet Harry Taylor Cavanaugh.

Cadet Bernard Warren Justice.

Cadet Frank Glover Trew.

Cadet Walter Louis Weinaug.

Cadet John Harry Stadler, jr.

Cadet Laurence Knight Ladue.

Field Artillery

Cadet George Dakin Crosby.

Cadet Ernest Orrin Lee.

Cadet Charles Day Palmer.

Cadet Samuel Vance Krauthoff.

Cadet George Arthur Duerr.

Cadet Raymond Thomas Beurket.

Cadet John Franklin Williams.

Cadet Amel Thomas Leonard.

Cadet Harry Van Wyk.

Cadet Glenn Bruce McConnell.

Cadet Raymond Hendley Coombs.

Cadet Wellington Alexander Samouce.

Cadet William Hubbard Barksdale, jr.

Cadet Robert Clement Lawes.

Cadet Oren Wilcox Rynearson.

Cadet James Thomas Looime.

Cadet Leslie Seekell Fletcher.

Cadet Thomas Edwin Blinford.

Cadet Marcus Butler Stokes, jr.

Cadet Francis Marion Day.

Cadet Bernard Francis Luebberrmann.

Cadet James Angus Watson, jr.

Cadet Russell Layton Mable.

Cadet William John Eyerly.

Cadet George Dunbar Pence.

Cadet Lester Joseph Tacy.

Cadet Charles Lanier Dasher, jr.

Cadet Perry William Brown.

Cadet Lindsay Patterson Caywood.

Cadet Vonna Fernleigh Burger.

Cadet Charles Dweile Daniel.

Cadet James Alexander Davidson, jr.

Cadet John Gilbert Moore.

Cadet Edward Lynn Andrews.

Cadet James Grafton Anding.

Cadet Joseph Rogers Burrill.

Cadet Francis Anthony Kreidel.
 Cadet Nathaniel Clay Cureton, jr.
 Cadet Howard Everett Kessinger.
 Cadet Walter Armin Linn.
 Cadet Walton Gracey Procter.
 Cadet Eleazar Parmly, 3d.
 Cadet Edward Orlando McConahay.
 Cadet William Joseph Cleary.
 Cadet Oliver Malcolm Barton.
 Cadet Bjarne Furuholm.
 Cadet Charles Pelot Summerall, jr.
 Cadet Thomas George McCulloch.
 Cadet Frederick Cruger Pyne.
 Cadet Louis Chadwick Friedersdorff.
 Cadet Walter Domenick Marinelli.
 Cadet Daniel Francis Healy, jr.
 Cadet George Hinkle Steel.
 Cadet John Philip Maher, jr.
 Cadet Frank Smith Kirkpatrick.
 Cadet George Walter Vaughn.
 Cadet Thomas Jefferson Holmes, jr.
 Cadet William Harry Bertsch, jr.
 Cadet William Reineman Forbes.
 Cadet Gerald Jay Reid.
 Cadet James William Clyburn.
 Cadet Roy Deck Reynolds.
 Cadet David Griffith Erskine.
 Cadet Albert Newton Stubblebine, jr.
 Cadet Robert Charles Cameron.
 Cadet William Leo Coughlin.
 Cadet William Thaddeus Sexton.
 Cadet Robert Augustus Ellsworth.
 Cadet George Edmund Wrockloff, jr.
 Cadet Carroll Riggs Griffin.
 Cadet Charles Edward Hart.
 Cadet Kenneth Negley Decker.
 Cadet Thomas Allen Jennings.
 Cadet Joseph Massaro.
 Cadet James Barry Kraft.
 Cadet Howard Jehn John.
 Cadet Charles Loomis Booth.

Coast Artillery Corps

Cadet Robert Vernon Lee.
 Cadet Benjamin Schultz Mesick, jr.
 Cadet Frank Lawrence Lazarus.
 Cadet Everett Chalmers Wallace.
 Cadet Vernaum Charles Stevens.
 Cadet Floyd Allen Mitchell.
 Cadet Joseph Peter Shumate.
 Cadet Robert Lee Miller.
 Cadet John Ismert Hincke.
 Cadet Elmer Ernest Count, jr.
 Cadet Robert Ward Berry.
 Cadet Harold Penbody Tasker.
 Cadet Claude Earl Moore.
 Cadet Grayson Schmidt.
 Cadet Leslie Earl Simon.
 Cadet Ralph Irvin Glasgow.
 Cadet James William Alexander McNary.
 Cadet Harold Phineas Gard.
 Cadet William Lloyd Richardson.
 Cadet Ovid Thomason Forman.
 Cadet George Wesley Palmer.
 Cadet Clark Cornelius Witman.
 Cadet Ernest August Merkle.
 Cadet Herbert Theodore Benz.
 Cadet Clarence Everett Rothgeb.
 Cadet George Bernard Finnegan, jr.
 Cadet Peter Wesley Shunk.
 Cadet Emil Pasoli, jr.
 Cadet Sanford Joseph Goodman.
 Cadet Gerald Goodwin Gibbs.
 Cadet Frank Satchwell Lyndall, jr.
 Cadet John Clair Smith.
 Cadet George Edmund Young.
 Cadet Albert Delmar Miller.
 Cadet James Edward McGraw.
 Cadet Darwin Denison Martin.
 Cadet George Avery Tucker.
 Cadet Clarence Sterling Raymond.
 Cadet John Alfred McComsey.
 Cadet Maxwell Wood Tracy.
 Cadet William Lewis Johnson.
 Cadet William Henry Kendall.

Infantry

Cadet Otis McCormick.
 Cadet Thomas Du Val Roberts.
 Cadet David Jerome Ellinger.
 Cadet Francis John Clark.
 Cadet Heyward Bradford Roberts.
 Cadet Bruce Woodward Bidwell.
 Cadet William Howard Arnold.
 Cadet Charles Trueman Lanham.
 Cadet Richard Warburton Stephens.
 Cadet John Henry Halle, jr.
 Cadet Richard Longworth Baughman.
 Cadet Edwin Henry Harrison.
 Cadet Cecil Ernest Henry.
 Cadet Craig Alderman.
 Cadet Charles Raeburne Landon.
 Cadet George Arthur Hadsell, jr.
 Cadet Earl Mattice.
 Cadet Charles Goldsmith Stevenson, jr.
 Cadet William Herbert Schaefer.
 Cadet Ewing Hill France.
 Cadet Edward Fearon Booth.
 Cadet William Hill Lamberton.
 Cadet Haydon Lemaire Boatner.
 Cadet David Marcus.
 Cadet James Edward Moore.
 Cadet Silas Woodson Hosea.
 Cadet Ellis Spurgeon Hopewell.
 Cadet Harold James Keeley.
 Cadet Richard Emmel Nugent.
 Cadet Walter Allen Buck.
 Cadet Cleland Charles Sibley.
 Cadet George Morgan Kernan.
 Cadet Francis Edwin Gillette.
 Cadet Albert Kellogg Stebbins, jr.
 Cadet Richard Givens Prather.
 Cadet Douglas Byron Smith.
 Cadet Robert Edward Cullen.
 Cadet Samuel Glenn Conley.
 Cadet Stephen Wilson Ackerman.
 Cadet Lewis Spencer Kirkpatrick.
 Cadet Charles Hunter Coates.
 Cadet Otto Lauren Nelson, jr.
 Cadet John Curtis LaFayette Adams.
 Cadet Robert Wells Harper.
 Cadet Augustus Jerome Regnier.
 Cadet Willard Koehler Liebel.
 Cadet John Archer Stewart.
 Cadet Lewis Curtis Barks.
 Cadet George Alvin Millener.
 Cadet Robert Harvey Thompson, jr.
 Cadet Russell Andrew Baker.
 Cadet Paul Cooper.
 Cadet Lee William Gilford.
 Cadet Ralph Pulsifer.
 Cadet Logan Carroll Berry.
 Cadet Onto Price Bragan.
 Cadet Gilbert Francis Baillie.
 Cadet Robert Joseph McBride.
 Cadet Charles Ward Van Way, jr.
 Cadet Harry Dillon McHugh.
 Cadet Armistead Davis Mead, jr.
 Cadet Charles Harold Royce.
 Cadet George Patrick O'Neill.
 Cadet Oswaldo de la Rosa.
 Cadet Henry Coates Burgess.
 Cadet James Edgar Macklin, 2d.
 Cadet Armand Joseph Salmon.
 Cadet Frederick Raymond Keeler.
 Cadet Edward Amedee Chazal.
 Cadet Reed Graves.
 Cadet Mark Edward Smith, jr.
 Cadet John Gillespie Hill.
 Cadet Wolcott Kent Dudley.
 Cadet Andrew Suter Gamble.
 Cadet Earl Lynwood Scott.
 Cadet Andrew Paul Foster, jr.
 Cadet John Jacob Outcalt.
 Cadet Melvin Eugene Meister.
 Cadet Hobart Amory Murphy.
 Cadet William Henry Maglin.
 Cadet Camille Henry Duval.
 Cadet William Samuel Triplet.
 Cadet George Winfred Smythe.
 Cadet Jesse Thomas Traywick, jr.

Cadet Leslie Ellis Griffith.
 Cadet Phillip McCaffrey Kernan.
 Cadet Howard Alexander Malin.
 Cadet James Earl Purcell.
 Cadet John Archer Elmore, jr.
 Cadet John Wesley Ramsey, jr.
 Cadet Francis John Graling.
 Cadet Nye Kirwin Elward.
 Cadet James Pierce Hulley.
 Cadet Samuel Wayne Smithers.
 Cadet Kenneth Rector Bailey.
 Cadet Lucien Francis Wells, jr.
 Cadet Richard Tonkin Mitchell.
 Cadet Samuel Henry Fisher.
 Cadet Dennis Milton Moore.
 Cadet Charles Roger Bonnett.
 Cadet Val Evans.
 Cadet Clark Norace Bailey.
 Cadet Victor Emmanuel Phasey.
 Cadet Clyde Davis Eddleman.
 Cadet Russell Leonard Moses.
 Cadet Sarratt Thaddeus Hames.
 Cadet Virgil Rasmuss Miller.
 Cadet James Somers Stowell.
 Cadet Bertel Eric Kuniholm.
 Cadet Michael Henry Cleary.
 Cadet Robert Cantrill Polsgrove.
 Cadet George Edwin Penton.
 Cadet Reeve Douglas Keller.
 Cadet George Emmert Elliott.
 Cadet William Wallace Cornog, jr.
 Cadet Demas Thurlow Craw.
 Cadet Henry Isaac Kiel.
 Cadet Daniel Harrison Hundley.
 Cadet William Walrath Lloyd.
 Cadet Jacob Robert Moon.
 Cadet Thomas Harrison Allen.
 Cadet Raymond Rodney Robins.
 Cadet Ralph Parker Eaton.
 Cadet Henry Dahnke.
 Cadet Clement Hypolite Dabiezies.
 Cadet George Harvey Doane.
 Cadet Walter Dewey Gillespie.
 Cadet Robert Carlyle Andrews.
 Cadet Herbert Frank McGuire Matthews.
 Cadet Buford Alexander Lynch, jr.
 Cadet William James Brunner.
 Cadet Albert John Dombrowsky.
 Cadet Jean Dorbant Scott.
 Cadet Robert Walter Stika.
 Cadet Ovid Oscar Wilson.
 Cadet Martin Frank Hass.
 Cadet Edward John Hirz.
 Cadet Clarence William Hoepfer.

Air Service

Cadet Albert Fox Glenn.
 Cadet Earle Everard Partridge.
 Cadet Fred Arley Ingalls.
 Cadet Herbert Theodore Schaefer.
 Cadet Robin Bernard Pape.
 Cadet Clyde Massey.
 Cadet Robert Lyle Brookings.
 Cadet Eugene Barber Ely.
 Cadet George Anthony Bicher.
 Cadet Leo Douglas Vichules.
 Cadet Uzal Girard Ent.
 Cadet Worth Harper.
 Cadet Donald Dean Rule.
 Cadet James Frederick Howell, jr.
 Cadet John Phillips Kirkendall.
 Cadet Joseph Aloysius Kietly.
 Cadet Robert Roy Selway, jr.
 Cadet Leslie Alfred Skinner.
 Cadet James Edwards Poore, jr.
 Cadet Washington Mackey Ives, jr.
 Cadet John Jacob Williams.
 Cadet Luther Stevens Smith.
 Cadet Warfield Richardson Wood.
 Cadet Howard McMath Turner.
 Cadet Leonard Henry Rodieck.
 Cadet Alexander George Greig.
 Cadet John Lyman Hitchings.
 Cadet Kenneth Crawford Strother.

Cadet Edward Higgins White.
 Cadet James Hewins, jr.
 Cadet Denis James Mulligan.
 Cadet Paul Albert Pickhardt.
 Cadet William Olmstead Eareckson.
 Cadet Francis Robert Stevens.
 Cadet Richard Weigand Gibson.
 Cadet George Almond Ford.
 Cadet Felix Marcinski.
 Cadet Rupert Davidson Graves.
 Cadet John Reynolds Hawkins.
 Cadet Ralph Emanuel Fisher.
 Cadet John Harold Claybrook, jr.
 Cadet Francis William Johnson.
 Cadet Ralph Arthur Koch.
 Cadet George Edward Lightcap, jr.
 Cadet George James Smith.
 Cadet John O'Day Murtaugh.
 Cadet Arthur LeRoy Bump, jr.
 Cadet William John Renn, jr.
 Cadet Irving Ballard Greene.
 Cadet Harold Currie King.
 Cadet Richard Gernant Herbine.
 Cadet Ralph Houston Lawter.
 Cadet Noah Mathew Brinson.
 Cadet Leighton Marion Clark.
 Cadet Cornelius Walter Cousland.

TO BE SECOND LIEUTENANTS WITH RANK FROM JUNE 14, 1924

Corpl. William Frederick Kellotat, Infantry.
 Staff Sergt. James Goodrich Megirt, Quartermaster Corps.
 Corpl. Floyd Fausett, Coast Artillery Corps.
 Staff Sergt. William Ewing Baker, Infantry.
 Staff Sergt. Raleigh Raymond Hendrix, Coast Artillery Corps.

Staff Sergt. Duane Grant Warner, Air Service.

TO BE SECOND LIEUTENANTS WITH RANK FROM JUNE 15, 1924

Howard Donald Criswell, Infantry.
 Edwin Harvey Auerbach, Ordnance Department.
 Robert Douglas McLeod, jr., Chemical Warfare Service.
 Glenn Newman, Coast Artillery Corps.
 William George Devens, Coast Artillery Corps.
 Charles Edward Shepherd, Coast Artillery Corps.
 Walker Wesley Holler, Coast Artillery Corps.
 Leon Clinton Hull, Coast Artillery Corps.
 Daniel Jerome Martin, Infantry.
 Malin Craig, jr., Field Artillery.
 Forrest James French, Coast Artillery Corps.
 Joseph Howard Gibbons, jr., Coast Artillery Corps.
 William Francis Bullis, Signal Corps.
 Henry Frederick Garcia, Field Artillery.
 Samuel Howard Morrow, Coast Artillery Corps.
 Norman Blakesley Simmonds, Coast Artillery Corps.
 Vern Walbridge, Coast Artillery Corps.
 Winfield Wayne Scott, Field Artillery.
 Sylvan Berliner, Coast Artillery Corps.
 Joris Bliss Rasbach, Field Artillery.
 John Berrington Stackhouse, Infantry.
 Herman Lester Darnstaedt, Infantry.
 Leonard Marion Johnson, Field Artillery.
 Henry Kipp Vreeland, Field Artillery.
 John England Catlin, Infantry.
 Chester Archibald Rowland, Corps of Engineers.
 John Sterling Taylor, jr., Infantry.
 Ernest Gaskins, Infantry.
 Louis Bernard Rutte, Infantry.
 Harold Jefferson Johnson, Air Service.
 Nunez Christian Pilet, Infantry.
 Arthur Willink, Ordnance Department.
 Stephen Smith Hamilton, Infantry.
 Farris Newton Latimer, Infantry.
 Carl Joseph Crane, Air Service.
 John Douglas Salmon, Infantry.
 James Peurifoy Hill, Infantry.
 William Arthur Cole, Infantry.
 Bryan Maxwell Jacobs, Air Service.
 Raymond Dishmann Palmer, Cavalry.
 Murray Eberhart McGowan, Infantry.
 George Francis Seyle, Infantry.
 Harrison Wells Davison, Cavalry.
 Thomas Clagett Wood, jr., Infantry.
 George Henry Decker, Infantry.
 Conrad Lewis Boyle, Cavalry.
 Edward Joseph O'Neill, Infantry.

Robert Reinhold Martin, Infantry.
 John Perry Willey, Cavalry.
 John Vogler Tower, Infantry.
 Harry Donald Eckert, Cavalry.
 George Edward Isaacs, Infantry.
 Harold Francis Chrisman, Infantry.
 Henry Landon McCord, Infantry.
 George Cooper Reinhardt, Corps of Engineers.
 William Crowell Saffarans, Infantry.
 William Joseph Bradley, Cavalry.
 Clark Louis Ruffner, Cavalry.
 Ridgely Galther, jr., Infantry.
 John Randolph Armstrong, Air Service.
 Earl William Aldrup, Quartermaster Corps.
 Conrad Gordon Follansbee, Field Artillery.
 John Henry Sampson, jr., Field Artillery.
 George August Zeller, Ordnance Department.
 August Edward Schanze, Infantry.
 Howard Eugene Engler, Cavalry.
 Thomas Adams Doxey, jr., Field Artillery.
 John Mason Reynolds, Infantry.
 William Donald Old, Air Service.
 Grovener Cecil Charles, Infantry.
 Andral Bratton, Field Artillery.
 Harold Mills Manderbach, Field Artillery.
 Lawrence Clifton Elliott, Air Service.
 Harry William Coon, Air Service.
 James Regan, jr., Field Artillery.
 George Laurence Holsinger, Field Artillery.
 Harold Witte Uhrbrock, Infantry.
 Elmer Theodore Rundquist, Air Service.

 Audley Butler, Sellick.

WYOMING

Burton R. Jones, Greybull.
 John G. Bruce, Lander.
 Maxwell L. Jourdan, Medicine Bow.

HOUSE OF REPRESENTATIVES

TUESDAY, December 9, 1924

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Thy mercy, O Lord, is in the heavens and Thy majesty and power reach unto the ends of the earth. Turn unto us again and give Thy presence unto Thy children. May we not fail to hallow the gifts of life. Enable us to be strong in our judgments, rich in our charity, and just in our interpretation of one another. This day preserve us from intemperate speech, from harshness in our conduct, and from bitterness in our spirit. O help us to comprehend the grandeur of Thy law, the love of the Galilean Teacher, and to be aware of the exceeding sinfulness of sin. Bless us with deep thoughts, deep emotions, and high ideals that keep us in fellowship with things above. Sometime, our heavenly Father, lead us into a fuller knowledge of Thy compelling love that shall abound in purity and peace in our humble lives. Amen.

The Journal of the proceedings of yesterday was read and approved.

THE PANAMA CANAL RAILROAD CO.

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, with accompanying papers, referred to the Committee on Interstate and Foreign Commerce:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, the seventy-fifth annual report of the Board of Directors of the Panama Railroad Co. for the fiscal year ended June 30, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 8, 1924.

THE PANAMA CANAL

The SPEAKER also laid before the House the following message from the President of the United States, which, with accompanying papers, was referred to the Committee on Interstate and Foreign Commerce:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, the annual report of the Governor of the Panama Canal for the fiscal year ended June 30, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 8, 1924.

PORTO RICO

The SPEAKER also laid before the House the following message from the President of the United States, which was read, and, with accompanying papers, referred to the Committee on Insular Affairs:

To the Congress of the United States:

As required by section 23 of the act of Congress, approved March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes," I transmit herewith copies of certain acts and resolutions enacted by the Tenth Legislature of Porto Rico during its second special session (June 11 to June 21, 1924, inclusive).

These acts and resolutions have not previously been transmitted to Congress and none of them has been printed as a public document.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 8, 1924.

BUREAU OF EFFICIENCY

The SPEAKER also laid before the House the following message from the President, which was read, and, with accompanying report, referred to the Committee on Appropriations:

To the Congress of the United States:

As required by the acts of March 4, 1915, and February 28, 1916, I transmit herewith the report of the United States Bureau of Efficiency for the period from November 1, 1923, to October 31, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 8, 1924.

REPORT OF NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS

The SPEAKER also laid before the House the following message from the President of the United States, which was read, and, with accompanying report, referred to the Committee on Appropriations:

To the Congress of the United States:

In compliance with the provisions of the act of March 3, 1915, establishing the National Advisory Committee for Aeronautics, I submit herewith the tenth annual report of the committee for the fiscal year ended June 30, 1924.

The attention of the Congress is invited to Part V of the committee's report, presenting a summary of the present status of aviation with reference to the existing governmental organization, the agencies for coordination, and the relation of aeronautical research, the aircraft industry, and commercial aviation to the problems of national defense. I concur in the committee's general recommendations and agree that in the last analysis substantial progress in aviation is dependent upon the continuous prosecution of scientific research.

When the National Advisory Committee for Aeronautics was established by Congress in 1915 there was a deplorable lack of technical information on aeronautics in this country. In submitting this, the tenth annual report of the committee, I feel that it is appropriate to say a word of appreciation of the high-minded and patriotic services of the men who have faithfully served their country without compensation as members of this committee and of its subcommittees. Through this committee the talent of America has been marshaled in the scientific study of the problems of flight, with the result that to-day America occupies a position in the forefront of progressive nations in the technical development of aeronautics. The status of the committee as an independent Government establishment has largely made possible its success.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 8, 1924.

PUBLIC SERVICE COMMISSION OF PORTO RICO

The SPEAKER also laid before the House the following message from the President, which was read, and, with accompanying papers, referred to the Committee on Insular Affairs:

To the Congress of the United States:

As required by section 38 of the act approved March 2, 1917 (39 Stat. 951), entitled "An act to provide a civil government for Porto Rico, and for other purposes," I transmit herewith certified copies of each of 16 franchises granted by the Public Service Commission of Porto Rico. The copies of the franchises inclosed are described in the accompanying letter from the Secretary of War, transmitting them to me.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 8, 1924.

ELECTION OF A MEMBER TO THE JUDICIARY COMMITTEE

Mr. GARNER of Texas. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the desk.

The Clerk read as follows:

House Resolution 374

Resolved, That WILLIAM E. BOWLING, of Alabama, be, and he is hereby, elected a member of the standing Committee of the House on the Judiciary.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The resolution was agreed to.

THE JUDICIARY COMMITTEE

Mr. GRAHAM. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary may be permitted to sit Monday afternoon next during the session of the House.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent that the Committee on the Judiciary may sit next Monday afternoon during the session of the House. Is there objection?

There was no objection.

INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. CRAMTON. Mr. Speaker, I call up the unfinished business, the bill H. R. 10020, making appropriations for the Department of the Interior for the fiscal year ending June 30, 1926, and for other purposes, and ask for a vote.

The SPEAKER. The gentleman from Michigan calls up the unfinished business, which is the Department of the Interior appropriation bill.

Mr. BLANTON. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Texas makes the point of order that there is no quorum present. Obviously, there is not.

Mr. SANDERS of Indiana. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 3]

Abernethy	Gallivan	Miller, Ill.	Sears, Nebr.
Ayres	Geran	Mills	Sherwood
Buckley	Goldsbrough	Moore, Ill.	Smithwick
Burdick	Griffin	Morgan	Stalker
Cable	Hammer	Nelson, Wis.	Strong, Pa.
Carew	Howard, Nebr.	Newton, Mo.	Sullivan
Casey	Jeffers	O'Brien	Taylor, Colo.
Clark, Fla.	Johnson, S. Dak.	O'Connor, N. Y.	Tilson
Clarke, N. Y.	Kahn	Oliver, N. Y.	Tinkham
Connally, Tex.	Kearns	Parks, Ark.	Tydings
Connolly, Pa.	Kendall	Perkins	Underhill
Corning	Kless	Phillips	Ward, N. Y.
Davey	Kunz	Porter	Ward, N. C.
Dominick	Langley	Prall	Weller
Doyle	Larson, Minn.	Ransley	Williams, Mich.
Drewry	Linthicum	Reed, W. Va.	Williams, Tex.
Eagan	Logan	Roach	Winslow
Edmonds	McKenzie	Rogers, Mass.	Wolf
Fairchild	McSwain	Rogers, N. H.	Woodrum
Fitzgerald	Manlove	Romjue	Yates
Funk	Michaelson	Schall	Zihlman

The SPEAKER. Three hundred and forty-six Members have answered to their names, a quorum.

Mr. SANDERS of Indiana. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

The SPEAKER. The previous question was ordered upon the appropriation bill for the Department of the Interior. Is a separate vote demanded upon any amendment?

Mr. CRAMTON. Mr. Speaker, I demand a separate vote upon the amendment with reference to the abolition of certain land offices, the amendment striking out the proviso on page 12 of the bill.

The SPEAKER. The gentleman from Michigan demands a separate vote upon the land-office provision.

Mr. SINNOTT. Mr. Speaker, I ask the gentleman from Michigan whether that is my amendment?

Mr. CRAMTON. Yes; it is the Sinnott amendment.

The SPEAKER. Is a separate vote demanded upon any other amendment? If not, the Chair will put the other amendments en grosse. The question is on agreeing to the other amendments.

The other amendments were agreed to.

The SPEAKER. The question now recurs upon agreeing to the amendment, which the Clerk will report.

The Clerk read as follows:

Page 12, line 10, after the word "Wyoming," strike out all of the paragraph down to and including line 4 on page 13, the language stricken out being as follows: "Provided further, That the following land offices are hereby abolished, effective July 1, 1925: Harrison, Ark.; El Centro, Eureka, Independence, and Susanville, Calif.; Del Norte, Durango, Lamar, Leadville, and Sterling, Colo.; Blackfoot, Coeur d'Alene, and Hailey, Idaho; Topeka, Kans.; Crookston and Duluth, Minn.; Jackson, Miss.; Billings, Bozeman, Glasgow, Great Falls, Kalispell, and Lewistown, Mont.; Alliance, Nebr.; Elko, Nev.; Clayton and Fort Sumner, N. Mex.; Dickinson, N. Dak.; Burns and La Grande, Oreg.; Bellefourche, S. Dak.; Vernal, Utah; Vancouver, Walla Walla, Waterville, and Yakima, Wash.; Wausau, Wis.; Cheyenne and Newcastle, Wyo., and their necessary personnel, together with such records, furniture, and supplies as may be necessary, shall be transferred to such of the land offices enumerated above and not abolished by this act as the Secretary of the Interior may direct, except that the records of the Topeka, Kans.; Jackson, Miss.; and Wausau, Wis., land offices shall be disposed of in accordance with existing law."

The SPEAKER. The question is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr. TILMAN) there were—ayes 122, noes 107.

Mr. CRAMTON. Mr. Speaker, on this vote I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 185, nays 162, not voting 85, as follows:

[Roll No. 4]

Fredericks	McSwain	Schall	
Gallivan	Madden	Sherwood	
Geran	Manlove		

So the amendment was adopted.

The Clerk announced the following pairs:

On this vote:

Mr. Parks of Arkansas (for) with Mr. Kless (against).
Mr. McLaughlin of Nebraska (for) with Mr. Ayres (against).

General pairs:

Mr. Johnson of South Dakota with Mr. Jeffers.
 Mr. Longworth with Mr. Gallivan.
 Mr. Connolly of Pennsylvania with Mr. Sherwood.
 Mr. Kendall with Mr. Hammer.
 Mr. Madden with Mr. Griffin.
 Mr. Watson with Mr. Smithwick.
 Mr. Perkins with Mr. Abernethy.
 Mr. Winslow with Mr. Corning.
 Mr. Porter with Mr. Linthicum.
 Mr. Dempsey with Mr. Tydings.
 Mr. Larson of Minnesota with Mr. Geran.
 Mr. Michaelson with Mr. Oliver of New York.
 Mr. Tinkham with Mr. Howard of Nebraska.
 Mr. Strong of Pennsylvania with Mr. Doyle.
 Mr. Rogers of Massachusetts with Mr. Rogers of New Hampshire.
 Mr. William E. Hull with Mr. Drewry.
 Mr. Snell with Mr. O'Connor of New York.
 Mr. Zihlman with Mr. Kurtz.
 Mr. Mills with Mr. Dominick.
 Mr. Manlove with Mr. Weller.
 Mr. Fitzgerald with Mr. Sullivan.
 Mr. Ransley with Mr. Casey.
 Mr. Burdick with Mr. Romjue.
 Mr. Yates with Mr. Buckley.
 Mr. Stalker with Mr. Reed of Arkansas.
 Mr. Tibson with Mr. Davoy.
 Mr. Kahn with Mr. Wolf.
 Mr. Phillips with Mr. McSwain.
 Mr. Fairchild with Mr. Oliver of Alabama.
 Mr. Williams of Michigan with Mr. Woodrum.
 Mr. Underhill with Mr. Clark of Florida.
 Mr. Roach with Mr. Eagan.
 Mr. Miller of Illinois with Mr. Williams of Texas.
 Mr. Fredericks with Mr. Goldsborough.
 Mr. Nelson of Wisconsin with Mr. Logan.
 Mr. Schall with Mr. Ward of North Carolina.
 Mr. Clarke of New York with Mr. O'Brien.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. CRAMTON, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record by inserting a letter from the Secretary of the Interior.

The SPEAKER. The gentleman from Michigan asks unanimous consent to extend his remarks in the Record by printing a letter from the Secretary of the Interior. Is there objection? [After a pause.] The Chair hears none.

The letter is as follows:

THE SECRETARY OF THE INTERIOR,
 Washington, December 9, 1924.

Hon. LOUIS C. CRAMTON,
 House of Representatives.

MY DEAR MR. CRAMTON: I wish to call your attention to the recommendations of the Commissioner of the General Land Office made to the Subcommittee on Appropriations of the House in the pending Interior bill.

It was estimated that the changes he suggests would effect a saving in administration totaling \$617,010 annually, \$255,280 of this amount from consolidation and elimination of local land offices. In my opinion these reductions can be made without detriment to the service and are warranted in economy of administration.

The Government does not lose the fees that otherwise would be collected by these land offices, as they would be paid into the nearest remaining land office. The public will not be particularly inconvenienced because of increased distances to be traveled, as 75 per cent of all land claims filed or brought to patent are initiated independent of a local land office before United States commissioners, judges, or clerks of courts.

Under existing law the Secretary of the Interior may close 21 land offices because of decrease in the quantity of undisposed lands; also he may close 52 offices because of disproportionate cost of operation as compared with diminishing income.

Owing to the fact that both laws operate to close the same offices in many cases, the total number that may be consolidated or abolished by the Secretary of the Interior without further legislation is 57.

The estimates of the General Land Office for the pending appropriation bill provide for the abolition of 39 offices and the consolidation of the positions of register and receiver in the remaining 45 offices.

Inclosed are memoranda showing the offices which may be consolidated and those that may be abolished under the law just mentioned. Those included in the Interior appropriation bill are marked by an asterisk.

The question before the House is the request of the General Land Office for authority to merge the positions of register and receiver in 45 offices and to abolish 39 land offices entirely. This would leave one or more land offices in every State with three exceptions, namely, Mississippi, Kansas, and Wisconsin, where there is a negligible amount

of public land remaining, which may readily be handled through the Washington office.

This situation is recited here in order that Congress may be advised in connection with its consideration of the other changes recommended.

Very truly yours,

HUBERT WORK.

CLASS I

Section 2248, United States Revised Statutes, provides as follows: "Whenever the quantity of public land remaining unsold in any land district is reduced to a number of acres less than 100,000, it shall be the duty of the Secretary of the Interior to discontinue the land office of such district, and if any land in any such district remains unsold at the time of the discontinuance of a land office the same shall be subject to sale at some one of the existing land offices most convenient to the district in which the land office has been discontinued of which the Secretary of the Interior shall give notice."

Under this section the following land offices, which have an area less than 100,000 acres remaining unsold (July 1, 1924), could be closed and consolidated with other offices without further legislation:

Alabama: Montgomery.
 Arkansas: Harrison. (Among the 39 offices listed for closing by Interior Department appropriation bill.)
 California: Eureka. (Among the 39 offices listed for closing by Interior Department appropriation bill.)
 Colorado: Lamar, Sterling. (Among the 39 offices listed for closing by Interior Department appropriation bill.)
 Florida: Gainesville.
 Idaho: Lewiston.
 Kansas: Topeka. (Among the 39 offices listed for closing by Interior Department appropriation bill.)
 Louisiana: Baton Rouge.
 Michigan: Marquette.
 Minnesota: Duluth. (Among the 39 offices listed for closing by Interior Department appropriation bill.)
 Mississippi: Jackson. (Among the 39 offices listed for closing by Interior Department appropriation bill.)
 Montana: Kalispell. (Among the 39 offices listed for closing by Interior Department appropriation bill.)
 Nebraska: Alliance. (Among the 39 offices listed for closing by Interior Department appropriation bill), Lincoln.
 New Mexico: Clayton. (Among the 39 offices listed for closing by Interior Department appropriation bill.)
 North Dakota: Bismarck.
 Oklahoma: Guthrie.
 South Dakota: Bellefourche. (Among the 39 offices listed for closing by Interior Department appropriation bill), Pierre.
 Wisconsin: Wausau. (Among the 39 offices listed for closing by Interior Department appropriation bill.)

CLASS II

Section 2250, United States Revised Statutes, provides as follows: "Whenever the cost of collecting the revenue from the sales of the public lands in any land district is as much as one-third of the whole amount of revenue collected in such district it may be lawful for the President, if, in his opinion, not incompatible with the public interest, to discontinue the land office in such district and to annex the same to some other adjoining land district."

Under this section the following land offices, where the cost of operation exceeded one-third of the revenue (during the fiscal year ended June 30, 1924), may be discontinued without further legislation:

Arkansas: Harrison.¹
 California: El Centro,¹ Eureka,¹ Independence,¹ Sacramento, San Francisco, and Susanville.¹
 Colorado: Del Norte,¹ Durango,¹ Lamar,¹ Leadville,¹ and Sterling.¹
 Florida: Gainesville.
 Idaho: Blackfoot,¹ Boise, Coeur d'Alene,¹ Hailey,¹ and Lewiston.
 Kansas: Topeka.¹
 Louisiana: Baton Rouge.
 Michigan: Marquette.
 Minnesota: Cass Lake.
 Mississippi: Jackson.¹
 Montana: Bozeman,¹ Great Falls,¹ Havre, Helena, Kalispell,¹ and Missoula.
 Nebraska: Alliance¹ and Lincoln.
 Nevada: Carson City and Elko.¹
 New Mexico: Clayton,¹ Fort Sumner,¹ Las Cruces, Roswell, and Santa Fe.
 North Dakota: Dickinson.¹
 Oregon: Burns,¹ La Grande,¹ The Dalles, and Vale.
 South Dakota: Bellefourche¹ and Rapid City.
 Washington: Seattle, Vancouver,¹ Walla Walla,¹ and Yakima.¹
 Wisconsin: Wausau.¹
 Wyoming: Buffalo and Newcastle.¹
 Total, 52.

¹One of the 39 offices listed for closing by the Interior Department appropriation bill.

AGRICULTURAL APPROPRIATION BILL

Mr. MAGEE of New York. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 10404) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1926, and for other purposes, and, pending that, I would like to see if an arrangement can be made with the gentleman from Texas [Mr. BUCHANAN] in reference to the time for general debate.

Mr. BUCHANAN. I would say to the gentleman I have requests for two and a half hours on my side and any agreement that will give me that time will be satisfactory to me.

Mr. MAGEE of New York. I ask unanimous consent, Mr. Speaker, that the time for general debate be fixed at five hours, one-half of which time is to be controlled by the gentleman from Texas, and one-half by myself.

The SPEAKER. The gentleman from New York asks unanimous consent that general debate be limited to five hours, half of which time to be controlled by himself and half by the gentleman from Texas. Is there objection? [After a pause.] The Chair hears none, and it is so ordered. The question is on the motion of the gentleman that the House resolve itself into the Committee of the Whole House on the state of the Union.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the Agricultural appropriation bill, with Mr. TREADWAY in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 10404, the Agricultural appropriation bill. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 10404) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1926, and for other purposes.

Mr. MAGEE of New York. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

Mr. MAGEE of New York. Mr. Chairman, I ask unanimous consent for leave to revise and extend my remarks.

The CHAIRMAN. The gentleman from New York asks unanimous consent to revise and extend his remarks. Is there objection? [After a pause.] The Chair hears none.

Mr. MAGEE of New York. Mr. Chairman and members of the committee, during the last session of the Congress the distinguished chairman of the subcommittee, Mr. ANDERSON, was ill. I was drafted to take charge of the bill which had been prepared by the subcommittee of which he is chairman. We very much desired that Mr. ANDERSON should take charge of this bill in the House, but he could not see his way clear to do so. However, he has kindly consented to sit with the subcommittee in the House during the consideration of this bill. I desire to express particularly my appreciation for his many acts of kindness and for the very valuable information which he has always been ready to give to me and the other members of the subcommittee in the preparation and drafting of this bill. I also wish to express my appreciation to my colleagues on the subcommittee for their effective work and cooperation in the preparation of this bill. Last but not least, I feel that I am voicing the sentiments of all my colleagues on the subcommittee in extending our very great appreciation to the efficient clerk of this committee, Mr. Barta, and his associates connected with the Committee on Appropriations of the House. Their preparatory work for the consideration of the subcommittee has been not only remarkably efficient but most thorough and complete.

I desire to state that the subcommittee has had the hearty cooperation of the Department of Agriculture in its work. We do not believe that it is wise to adopt a niggardly policy in making appropriations for agricultural purposes. We are an agricultural people and agriculture is our basic industry. There can be no continued prosperity of the country unless those engaged in agriculture are prosperous. Consequently in making appropriations for the Department of Agriculture we have endeavored to ascertain the needs of the department and to make appropriations reasonably sufficient for the department to function effectively.

In presenting the Agricultural appropriation bill for the fiscal year 1926 I shall not attempt a detailed review of all the items of appropriation carried in the bill, but rather shall endeavor to inform the committee of some of the more important features of the bill.

APPROPRIATIONS AND ESTIMATES

The detailed tabulation in the report gives the increase or decrease in the amounts recommended as compared with the appropriations for the current fiscal year and the estimates submitted by the President in the Budget for the fiscal year 1926. However, for the purpose of more clearly informing the membership of the committee the appropriations and estimates for the Department of Agriculture proper should be separated from the "cooperative construction of roads" items. With this in mind, I shall deal first with strictly departmental appropriations, and later will give the status of the funds relating to the cooperative construction of roads and trails and the Federal aid highway system.

For the fiscal year 1925 the total appropriations for the Department of Agriculture proper aggregated \$46,714,436, and the estimates submitted in the Budget for the fiscal year 1926 totaled \$44,002,000. It is recommended in the bill that appropriations of \$44,637,715 be made for 1926, which sum represents a decrease of \$2,712,436 under the appropriations for the current fiscal year, and which is an increase of \$635,715 over the Budget estimates. However, during the present fiscal year an appropriation of \$3,500,000 was made for the eradication of the foot-and-mouth disease, which sum for comparative purposes should not be included in the appropriations for 1925 inasmuch as it was made for a very special and urgent cause and does not occur annually. Therefore, deducting this sum from the total of the appropriations made for 1925, the actual amount available for activities of the Department of Agriculture proper amounted to \$43,214,436, and this sum, compared with the appropriations recommended aggregating \$44,637,715, shows that the bill under consideration is actually \$1,423,279 in excess of the appropriations available for the current fiscal year. This increase can be accounted for principally as follows:

Eradication of tuberculosis.....	\$200,000
Miscellaneous forest wages.....	84,050
Deciduous, forest, and truck-crop insects.....	50,000
Preventing spread of moths.....	149,840
Preventing spread of European corn borer.....	160,000
Japanese beetle control.....	38,930
Upper Mississippi River fish and game refuge.....	400,000
Cooperative forest-fire protection.....	258,100
Farm forestry and distribution of planting stock.....	100,000
Acquisition of additional forest lands.....	181,460

EXPENDITURES FOR PERSONAL SERVICES

There is contained in the bill a modified form of the average limitation clause inserted in all of the current appropriation bills, which restricts the average of all salaries paid under any grade under the classification act of 1923 to the average of the compensation rates for the grade. The principal differences between the average provision now in effect and that contained in the bill under consideration were made necessary by rulings of the Comptroller General of the United States, and in effect provide that the limitation shall specifically apply to those grades in which only one position is allocated, and do not require an employee passing from one grade to a higher grade to suffer a reduction in compensation because of such advance, and omits the words "or class thereof," which were deemed unnecessary in a ruling by the comptroller.

A further limitation upon the amount which might be expended for personal services in the District of Columbia was placed upon almost every paragraph of appropriation by the Bureau of the Budget. After very careful consideration of this matter, it was decided that these restrictions be removed, and that one limitation be carried at the end of each bureau, which limitation is the total of each of the restrictions for that particular bureau with an additional increase in those instances where the committee recommends an appropriation in excess of the Budget estimates. In this manner expenditures are restricted, but greater flexibility in administration is permitted.

BUREAU OF ANIMAL INDUSTRY

In explanation of the increases recommended for the eradication of tuberculosis in cattle, attention is called to the fact that State indemnity appropriations for 1924 amounted to \$6,112,500, and in those States where the legislatures convene in January it is fair to assume that even larger sums will be appropriated for this purpose. To show the increasing progress being made in this work in 1918, 204 herds, with a total of 134,143 cattle, were tested. In 1924 48,273 herds, with a total of 5,312,364 cattle, were tested. Of the total number of 13,708,599 cattle tested during the years 1918 to 1924, inclusive, 471,166 reactors were found, or 3.4 per cent. The amount of the Federal appropriations marks the speed with which this work will be carried on, and to reduce this sum at this time would be to prolong the eradication work for a number of years. The committee did not feel that the Government should take a backward step in its work of the eradication of tuberculosis in cattle.

BUREAU OF DAIRYING

I wish to call attention to a new bureau, which is being appropriated for for the first time in this bill. The Bureau of Dairying was established by the act of May 29, 1924, and the work of the dairy division of the Bureau of Animal Industry was transferred to this bureau. Creamery investigations, animal genetics, the maintenance of the Beltsville Farm, dairy cattle breeding, and other problems and investigations relating to the dairying industry of the United States are carried on by this bureau. For proper administration of the Bureau of Dairying an increase of \$10,000 over the Budget estimates was allowed by the committee.

BUREAU OF PLANT INDUSTRY

Increases in a number of items under the Bureau of Plant Industry were made by the committee, the largest being in the appropriation for the control of the white-pine blister rust, which it is recommended be used in the western United States. A small infestation of this disease has made its appearance in the State of Washington, and to prevent its spread into Idaho from this infestation and from the badly infested areas in Canada, but a short distance away, it is essential that sufficient funds be appropriated to cooperate with the States concerned in making a complete survey of the territory and in exterminating the host plants. The last great stands of western white-pine timber, valued at approximately \$550,000,000, are in great danger from this disease.

FOREST SERVICE

An increase of \$84,050 over the appropriation for the current fiscal year has been approved in the item for miscellaneous forest wages. Of this increase it is proposed that \$30,000 shall be used for strengthening the fire-control organization. Of the total of 157,503,000 acres in the national forests 86,000,000 acres carry a high fire hazard, and the present organization is called upon to protect an immense amount of territory, each man having approximately 50,000 acres, or an area of 80 square miles, to cover. An additional \$25,000 is to be used for the employment of scalers and timbermen to

handle the increasing sales of timber, which it is estimated will increase by 40,000,000 board feet during the year. The receipts covered into the Treasury from sales of timber for the fiscal year 1924 amounted to \$3,036,395. The remainder of the increase under this item—\$28,450—is to provide for the administration of land purchased under the Weeks Act. Since 1918 the area of the national forests purchased under this act has increased from 1,638,000 acres to 2,335,000 acres, and it is estimated that an additional 150,000 acres will be acquired during the present fiscal year, and for the proper administration of this immense amount of territory five new ranger districts must be organized.

Mr. LAZARO. Will the gentleman yield for a question before he leaves the subject of forests and the amount of land and tell the House if he knows where this forest land was purchased in the United States?

Mr. MAGEE of New York. The gentleman means under the Weeks Act?

Mr. LAZARO. Yes, sir.

Mr. MAGEE of New York. Well, I think a very material amount of land was purchased in New Hampshire and in the Appalachian chain.

Mr. LAZARO. Well, is it the policy of the Government to continue to purchase in different sections of the country where suitable land can be found?

Mr. MAGEE of New York. Yes, sir; I think it is fair to presume that in carrying out this act an appropriation of about \$1,000,000 will be made annually. We carry \$1,000,000 for that purpose in this bill. The bill for the present fiscal year carries \$800,000, and we put \$1,000,000 in this bill.

Mr. LAZARO. Well, I hope that the Government will follow out this policy.

Mr. MAGEE of New York. The idea of appropriating about \$1,000,000 a year, I will say to the distinguished gentleman from Louisiana, is that the organization created for that purpose should be kept intact, and it requires, I think, about \$1,000,000 a year to carry on the provisions of this act effectively.

BUREAU OF ENTOMOLOGY

Particularly in Washington County, Me., the people are dependent upon two industries—the canning of sardines and the canning of blueberries. In some years the catch of sardines is negligible, and the inhabitants must rely upon the blueberrying industry for their livelihood. Recently a destructive fly has made its appearance in these blueberry fields, and now threatens the industry, which affords employment to some 5,700 people and has an annual output valued at approximately \$2,000,000. To investigate and control this pest an increase of \$10,000 has been made. A like increase has also been made for studies of the codling moth, or worm of the peach, which in the Southern States is causing a damage of from 25 to 30 per cent in the mid-season varieties of peaches.

Increased amounts are recommended for studies of the cotton fly and the Arizona boll weevil, which for several seasons have caused serious injury to the cotton crop of the States in the Cotton Belt. To cooperate with the Western States in the control of the western bark beetles, which annually cause a loss of 5,000,000,000 board feet of mature timber, the accompanying bill carries an increase of \$10,000.

For the prevention of the spread of moths an increase of \$150,000 over the Budget estimate has been approved by the committee, of which amount \$100,000 shall be immediately available. This moth occurs in the New England States, and through cooperation with the States concerned has largely been confined to that area. However, to prevent its spread into the Adirondack and Catskill Mountains of New York, where control would be impossible, a barrier zone has been established in the western part of Vermont, Massachusetts, and Connecticut and the eastern section of New York. During the year 1923 the States contributed almost a million dollars for this purpose, and the increase recommended by your committee is to maintain this effective barrier until such time as natural parasites will be able to control this pest. Parasites have been introduced, and there is reason to believe that they will effectively control the moth infestation after sufficient numbers have been imported and acclimated.

Your committee also recommends that an increase of \$160,000 over the appropriation available for the current year be made in the item for the control and prevention of the spread of the European corn borer, which already is causing serious loss along the shores of Lake Erie and is extending up into Michigan. In Canada, across from the State of Ohio, in the counties of Essex and Kent, the increase in the number of these insects

has been in the neighborhood of 4,000 per cent, and in some sections the borer has completely ruined the crop. The purpose of the increase is to maintain the strict quarantine already in effect and to develop, if possible, natural enemies of the insect before it reaches the great corn-producing States of the Middle West.

To control the spread and maintain the quarantine on the Japanese beetle now operating in Pennsylvania and New Jersey, the committee recommends an increase of \$38,930 over the sum available for this purpose for the current year. This sum apparently is sufficient to prevent distant spread of the beetle, although the area is increasing each year, and until parasites are liberated in sufficient numbers to control the pest the quarantines will have to be enforced. In Japan where the insect occurs parasites are able to control it to such an extent that loss or damage therefrom is practically negligible.

BUREAU OF BIOLOGICAL SURVEY

A new paragraph of appropriation is recommended in this bill for the purpose of carrying out the act of June 7, 1924, establishing the Upper Mississippi River Wild Life and Fish Refuge. The purpose of the act is to prevent the drainage of areas vital to the maintenance of the fish, shellfish, and wild-fowl life of the Mississippi Valley. The act authorized an appropriation of \$1,500,000 for the purchase of lands along the river, and in the interest of economy, after careful consideration, the committee believes that \$400,000 should be provided for this purpose, of which \$100,000 should become immediately available for the purchase of lands and \$25,000 immediately available for administrative expenses. It is also provided in the paragraph that the Secretary of Agriculture may enter into contractual obligations on the part of the Government for the remainder of the sum authorized to be appropriated. It is contemplated that the purchase of land shall begin somewhere between the States of Missouri and Illinois and extend up the river some three or four hundred miles.

Mr. DOWELL. Will the gentleman yield?

Mr. MAGEE of New York. Yes.

Mr. DOWELL. How much has been expended of the amount that was authorized to be used last year? Has any yet been made available and used for that purpose, or is this the first appropriation?

Mr. MAGEE of New York. The act approved June 7, 1924, gave the authorization, and this is the first appropriation.

Mr. DOWELL. Can the gentleman tell the committee how much land it is contemplated to be purchased by this appropriation, and whether or not it is to be purchased or leased as provided under the general act?

Mr. MAGEE of New York. I can not tell the gentleman as to that. Those who are responsible for carrying out the act will have to determine that. It is also provided in the paragraph, I will say to the gentleman from Iowa, that the Secretary of Agriculture may enter into contractual obligations on the part of the Government for the remainder of the sum authorized to be appropriated.

MISCELLANEOUS FORESTRY ITEMS

For carrying out the provisions of the Clarke-McNary Act of June 7, 1924, an increase over the amount available for the current year is recommended in the appropriation for forest-fire cooperation. For the cooperative distribution of forest planting stock and cooperative farm forestry, appropriations of \$50,000 each are recommended. Failure to provide these funds would withhold from the owners of millions of acres of idle farm lands any Federal recognition, encouragement, and support in the reforestation of those lands, the effects of which would be particularly unfortunate in the States which now receive only indirect benefits from regular Forest Service appropriations.

FOREST ROADS AND TRAILS

For the cooperative construction of forest roads and trails Congress authorized appropriations aggregating \$13,000,000 in the Post Office appropriation act for 1923. Since that time appropriations amounting to \$9,000,000 have been made, and the estimate submitted in the Budget for the ensuing fiscal year was \$3,750,000. The committee was at a loss to understand why the remaining \$250,000 authorized for this work was not included in the estimate, and after carefully considering the matter decided that it would be best to wipe out all obligations authorized under the Post Office appropriation act, and consequently recommend in the bill an appropriation of \$4,000,000 for these purposes. Two statements showing the miles of roads and trails constructed in the various States, together with expenditures therefor, will be found on pages 624 and 625 of the hearings.

FEDERAL-AID HIGHWAY SYSTEM

For the cooperative construction of rural post roads Congress has authorized appropriations aggregating \$540,000,000, of which there has been appropriated to date a total of \$417,300,000. The remaining sum of \$122,700,000 is to be appropriated for during the fiscal years 1926 and 1927 as contractual obligations on the part of the Federal Government mature. Some misapprehension apparently has arisen in reference to the amount available for the cooperative construction of roads under the Federal-aid highway system. My attention has been called to statements "that the amount of money which Congress proposes to appropriate in order to hasten and stimulate road building by the States is about \$80,000,000, which is more than twice the amount Congress appropriated for this purpose last year." Such statements give an erroneous impression. The first thing to ascertain in arriving at the amount to be made available for any given purpose for the coming fiscal year is the estimated amount of unexpended balances which may be available and continued for that purpose. The estimated Federal-aid road balances available during this fiscal year amounted to approximately \$81,000,000. The Congress appropriated directly \$13,000,000 more, making a total available for the year 1925 of \$94,000,000, which amount is approximately \$14,000,000 in excess of the amount made available in the pending bill. It is estimated that expenditures for the current fiscal year will aggregate approximately \$90,000,000, which would leave available for expenditure during 1926 a balance of \$4,000,000 plus the appropriation carried in this bill of \$76,000,000, or a total of \$80,000,000. I wish to call attention, however, to the fact that only once since 1917 have the expenditures greatly exceeded \$80,000,000, and it would be difficult for the Bureau of Public Roads to estimate the exact amount necessary. A year ago it was estimated such expenditures for the fiscal year 1924 would amount to \$85,000,000, but there was actually expended a little over \$80,000,000. I do not believe that the expenditures for the year 1925 will amount to \$90,000,000, and in that event there will be a much larger balance available for expenditure in 1926.

Mr. DOWELL. Will the gentleman yield?

Mr. MAGEE of New York. In a moment. I think, perhaps, I may anticipate the gentleman's question. If not, then I will yield.

There is pending in the Senate the Dowell bill authorizing appropriations of \$75,000,000 per annum for two years, beginning July 1, 1925. Until that bill has become a law it is reasonable to believe that road building will not progress as rapidly as heretofore, again reducing actual expenditures. However, assuming that the expenditures for 1925 will aggregate \$90,000,000, leaving a balance of \$4,000,000, this latter sum, together with the recommended appropriation, will give the Bureau of Public Roads \$80,000,000 for the fiscal year 1926. This sum exceeds by \$5,000,000 the authorizations for any one year now carried in the Dowell bill, and I am inclined to believe that it is the intention of Congress that expenditures for road building should be near the authorization of \$75,000,000 per annum. It appears to me that the appropriations already made or authorized, aggregating \$540,000,000, have given liberal encouragement and aid to the States in the construction of the Federal-aid highway system, and that Congress should be looking forward to the day when these enormous appropriations and expenditures can be materially reduced. The status of the cooperative road funds, miles of road constructed, allotments to the States; and so forth, will be found in detail on pages 453 to 467, inclusive, of the hearings.

Now, I yield to the gentleman.

Mr. DOWELL. Now, may I inquire if the \$4,000,000 referred to by the gentleman from New York includes all of the surplus that is now in the Treasury or in the authorizations of former years?

Mr. MAGEE of New York. No. I understand there will remain \$46,700,000 to be appropriated.

Mr. DOWELL. Then where does this \$4,000,000 come from that is now in reserve?

Mr. MAGEE of New York. It is the estimated balance of the amount available at the close of the present fiscal year.

Mr. DOWELL. Then, one other question. Under the present system of appropriations, the amount drawn from the appropriation is from the amounts actually used in the various States? I understand that there are a number of States that have not kept up with the actual program and that there will be due to those States, out of the surplus, moneys that have already been appropriated?

Mr. MAGEE of New York. Yes. That is set out in the hearings.

Mr. LAZARO. Mr. Chairman, will the gentleman yield?

Mr. MAGEE of New York. Yes.

Mr. LAZARO. Does the gentleman know of any States that have met the requirements of the bureau here and have failed to get the funds?

Mr. MAGEE of New York. I do not; but I am only speaking of my own knowledge. All these facts are set out in detail in the statements contained in the hearings.

Mr. LAZARO. Is it the judgment of the head of the Bureau of Public Roads that this amount will be sufficient to meet the requirements of the next fiscal year?

Mr. MAGEE of New York. Well, I can not tell you what his information is. I can only give you my own judgment, based on such information as I have.

Mr. LAZARO. Has he appeared before the subcommittee?

Mr. MAGEE of New York. He appeared before the committee, and he made his estimate, as I recall, of something like \$84,000,000. That is an estimate.

Mr. LAZARO. Of course; but the estimate is larger than the amount the bill provided.

Mr. MAGEE of New York. His estimate for 1924 was \$85,000,000, and he expended about \$80,000,000. My idea is that the improvements in road building in the way of effecting economies are coming so rapidly that no man can reasonably state what amount may be needed for road construction in 1926.

Mr. LAZARO. At the same time the gentleman will admit that there ought to be a safe margin?

Mr. MAGEE of New York. I think that we have a sufficient appropriation for the purpose.

That finishes my general statement on the bill. During the debate under the five-minute rule I shall be glad to attempt to answer any question the Members may desire to ask.

Now, apart from agriculture, I want to take this opportunity to say a word in favor of the bill H. R. 5097, a bill to equalize the pay of retired officers of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service; and in this connection I ask the Clerk to read in my time a short editorial which appeared in the Washington Post of yesterday.

The Clerk read as follows:

ARMY OFFICERS' PAY

In the list of 586 retired officers of the Army, who were on active duty during the World War, will be found the names of 150 colonels. All of these, except one, were discriminated against by the restrictive clause in section 1 of the pay act of June 10, 1922.

These officers came back to active duty during the emergency, because their services were needed, and they cheerfully gave their best to the Government. Many had passed their three score and ten years, and the extra tax on their failing health doubtless cut short the lives of a number of them.

Since the date of the passage of the pay act, 38 of these colonels have died and over 100 of all ranks in the Army and Navy adversely affected by the discrimination have passed away.

Why should there be two pay schedules? Why should veterans be denied 20 per cent of the monthly pay the Government promised them for their support in their old age, while younger officers of less rank and service receive full compensation? Can any one claim that officers of equal rank and service and equal merit should be treated differently, because one class retired before and the other after June 30, 1922?

The unreasonable and drastic effects of this discriminating clause in the pay act could not have been realized at the time of its passage, or it never would have found a place in the law.

Many Members of Congress have expressed a desire to correct this matter in the interests of justice and fair play. A bill for the repeal of this discriminating clause was favorably reported by the Military Committee during the last session of Congress and is now on the calendar ready for passage. It should be pushed through without delay.

Mr. MAGEE of New York. The report accompanying the bill submitted to the House by the distinguished gentleman from Iowa [Mr. HULL] mentions the restrictive clause in the pay bill affecting these officers, to wit:

Nothing contained in the first sentence of section 17 or in any other section of this act shall authorize an increase in the pay of officers or warrant officers on the retired list on June 30, 1922.

The report further states:

This limitation, while granting the benefits of the new pay legislation to all officers who retire after July 1, 1922, deprives all officers retired prior to that date of said benefits, thereby violating the basic law under which these officers gained their retirement rights.

RETIRED OFFICERS INJURED BY THIS LIMITATION

1. There are approximately 800 retired officers of the Army, 400 of the Navy, 150 of the Marine Corps, and 50 of the Coast Guard who are injured by this limitation. These officers, for the most part, are officers of long service, who have retired on account of disability in line of duty or after having reached the age limit. In the Army alone the list includes 34 veterans of the Civil War, 254 who served as volunteers in the Spanish-American War, while most of the remainder served in the war with Spain, the Philippine insurrection, and the World War. Seventy-two held commissions as general officers in the World War, 18 hold the congressional medal of honor, 13 the distinguished-service cross, and 51 the distinguished-service medal.

2. The discrimination against these officers in many instances amounts to as much as 20 per cent of their retired pay. For example, a colonel of 30 years' service, retired prior to July 1, 1922, draws \$62.60 per month less pay than a colonel of the same length of service retired after July 1, 1922, \$46.87 less monthly pay than a lieutenant colonel, and even \$15.62 less than a major of the same length of service retired after July 1, 1922.

I want to say to the Members of the House that I am glad to speak a word in behalf of these officers. If you ask for their monuments, I point you to their gallant records, their deeds of valor on the field of battle, every mother's son of them willing at any time, if needs be, to make the supreme sacrifice for his country.

I hope that this bill for their relief will be promptly considered and passed.

Mr. BLANTON. Mr. Chairman, will the gentleman from New York yield for a question?

Mr. MAGEE of New York. Yes.

Mr. BLANTON. What does the gentleman think of a retired captain who has been going from our offices in the House Office Building, from one to another, for the last two weeks urging the passage of a bill increasing his retirement pay, where the facts disclose that he is an able-bodied man now 60 years of age engaged in a lucrative business here in the District of Columbia—the insurance business—and he has been drawing \$312 a month for 10 years?

Mr. MAGEE of New York. I did not yield for a speech from the gentleman.

Mr. BLANTON. I am asking the gentleman that question. What does he think of a case like that? Does the gentleman favor that bill?

Mr. MAGEE of New York. These officers in their advancing years and their dependents have been knocking at the doors of Congress for a simple act of justice. [Applause.]

Mr. WILLIAMSON. Mr. Chairman, will the gentleman yield?

Mr. MAGEE of New York. Yes.

Mr. WILLIAMSON. On looking through the Agricultural bill I can not find that any provision has been made for the destruction of predatory animals. Has that been covered?

Mr. MAGEE of New York. Oh, yes.

The CHAIRMAN. The gentleman from New York has used 45 minutes.

Mr. BUCHANAN. Mr. Chairman, I yield one minute to the gentleman from Oklahoma [Mr. HOWARD].

Mr. HOWARD of Oklahoma. Mr. Chairman, an investigation of Indian affairs is being conducted in Oklahoma. I rise not to discuss the pending bill but matters pertaining to this investigation, and I ask unanimous consent to extend my remarks in the RECORD upon that subject.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to extend his remarks in the RECORD on the subject indicated. Is there objection? [After a pause.] The Chair hears none.

Mr. HOWARD of Oklahoma. Mr. Chairman, in my mail this morning I find the following letter and affidavit from the Hon. Hugh L. Murphy, former county judge of Okmulgee County, Okla., which, I believe, in view of the investigation now under way by order of this House, contains information on the subject which should be in possession of the Members of the House and the people of the United States, and for that reason I submit them without comment at this time:

OKMULGEE, OKLA., December 5, 1924.

Hon. E. B. HOWARD, M. C.,

Washington, D. C.

DEAR MR. HOWARD: Noticing from the inclosed clipping appearing in the Okmulgee Democrat of the 5th, that you are not disinclined to attack the Indian Bureau when it needs attacking, and thinking you might be interested in knowing some facts as to the administration, or maladministration as the case may be, of certain large Indian estates in Oklahoma by the present officials of the Indian Bu-

reuo, I am forwarding you under separate cover a statement of facts amounting to charges of maladministration against Commissioner of Indian Affairs, Mr. Charles H. Burke, in the administering of certain Indian estates, members of the Creek Tribe of Indians. The original of this sworn statement, with documentary evidence attached, has been filed with the Hon. HOMER P. SNYDER, chairman of the subcommittee investigating Indian affairs in Oklahoma, and a copy filed with the honorable Attorney General. I am handing you herewith copies of my letters to Mr. SNYDER and the Attorney General transmitting statement to them as these letters state the purpose for which I filed the statement. I have also furnished Hon. TOM D. McKEOWN with a copy of this statement. I trust that you will take the time to read this statement as it contains information which I feel the Congress should have, particularly in view of the fact that the Indian Bureau is attempting to have Congress pass a bill placing all Indian estates under the exclusive jurisdiction of the Indian Bureau.

Yours very truly,

HUGH MURPHY,

Former County Judge, Okmulgee County.

INDIAN AFFAIRS IN OKLAHOMA—A DOCUMENTARY RECITAL OF CONTINUED OUTRAGE, SUBMITTED UNDER ADVICE OF SUBCOMMITTEE ON INDIAN AFFAIRS, INVESTIGATING INDIAN AFFAIRS IN OKLAHOMA PURSUANT TO ACT OF CONGRESS

SYNOPSIS

1. That the commissioner permitted M. L. Mott to settle the Sabar Jackson case for \$50,000, which sum was \$250,000 less than he disapproved a settlement submitted by the attorneys for Sabar Jackson, involving the same litigation, thereby causing a loss of \$250,000 to Sabar Jackson's estate.

2. That the \$50,000 settlement was \$700,000 less than the commissioner, by his own admissions, was "convinced" Sabar Jackson was entitled to receive; yet, in the face of this fact, he permitted M. L. Mott to settle the case for \$50,000.

3. That he authorized settlement of the Martha Jackson case for \$308,000, which was approximately \$50,000 less than the attorneys for the guardian of Martha Jackson submitted a settlement for of the same litigation, which the commissioner disapproved.

4. That he authorized payment to the guardian and attorneys who appeared against Martha Jackson in the litigation in an effort to prevent the recovery of her just share of the Thlocco estate the sum of \$70,000 as fees.

5. That he authorized settlement of the Martha Jackson litigation for approximately \$430,000 less than by his own admissions he was "convinced" Martha Jackson should receive.

6. That his administrative acts have resulted in a scheme whereby it is proposed that approximately \$250,000 of the "restricted" funds of Martha Jackson now in the hands of the Interior Department are to be turned over to the jurisdiction of the probate court of Okfuskee County, the attorneys procuring the transfer of said restricted funds to be paid 10 per cent of the estate.

7. That in violation of law he consented to, aided, assisted in, and authorized the diverting from the estate of Jackson Barnett, a full blood, incompetent Indian, the sum of over \$1,000,000.

8. That the loss, diversion, or dissipation in the administering of these three estates is far in excess of the total cost of administering all Indian estates by the probate courts of Oklahoma since Statehood (1908) regardless of the statements and compiled figures of the Indian Department to the contrary.

OKMULGEE, OKLA., November 27, 1924.

Hon. HOMER P. SNYDER,

Chairman Committee on Indian Affairs,
Washington, D. C.

DEAR SIR: Taking advantage of the privilege extended me by you as chairman of the Subcommittee on Indian Affairs sitting at Muskogee, Okla., on November 14, 1924, by authority of H. Res. No. 348 of the Sixty-eighth Congress, dated June 4, 1924, the purview of which your committee informed me contemplated no exclusion of persons in authority over restricted Indians, and that there may be no misunderstanding or alleged prejudicial construction of said resolution, the same is here quoted in full:

House Resolution 348

IN THE HOUSE OF REPRESENTATIVES,

June —, 1924.

Mr. CARTER submitted the following resolution, which was agreed to.

Resolution

Resolved, That the Committee on Indian Affairs of the House of Representatives of the Sixty-eighth Congress, or a subcommittee thereof, consisting of not less than five Members, is hereby empowered and directed to inquire into and investigate the situation with reference to the administration of Indian Affairs in Oklahoma among the Five Civilized Tribes, the Osages, the Quapaws, or any other Indians in Oklahoma.

The said committee or the subcommittee is hereby empowered to sit and act at any place; to require the attendance of witnesses and production of papers by subpoena to be signed by the chairman of said committee or subcommittee. The chairman of said committee or any member thereof is hereby empowered to administer oaths. Said committee or subcommittee is empowered to take testimony under oath and in writing to obtain documents, papers, and other information necessary to the investigation; to employ a stenographer to take and make a record of all evidence received by the committee and to keep a record of these proceedings.

All hearings by said committee shall be open to the public. The committee shall report to this Congress all evidence taken and their findings and conclusions thereon at the earliest possible date, and its report may, in the discretion of the committee, be filed with the Clerk of the House during the recess of Congress.

The expenses of said inquiry, not in excess of \$5,000, shall be paid out of the contingent fund of the House upon vouchers approved by the chairman of said committee."

I am, therefore, submitting herewith a statement of facts amounting to charges of maladministration against Mr. Charles H. Burke, Commissioner of Indian Affairs, in the conduct of certain large Indian estates of members of the Five Civilized Tribes. As I understand the resolution and the statement of your committee as to its purport, it is broad enough to cover the acts of the Indian Department as well as the acts of the courts of Oklahoma in administering Indian estates, and inasmuch as your committee saw fit to limit its inquiry "solely to the acts of the courts of Oklahoma committed within the past two years," and that Congress may have an opportunity, when the report of your committee is before it, to make a fair comparison between the administration of Indian estates by the courts of Oklahoma and the Indian Department, headed by Mr. Burke; and particularly in view of the fact that your committee gave the courts of Oklahoma a "clean bill of health," I am confining this statement solely to the acts of the Indian Department and Mr. Burke in these matters.

The particular cases I desire to present for the consideration of your committee and the Congress are those of Martha Jackson, Sabar Jackson, Jackson Barnett, all full-blood Creek Indians, and Richmond Bruner, a restricted Creek Indian. I shall discuss these cases in the order given and attach such record testimony for the information of your committee and the Congress as I deem will be helpful in arriving at a proper conclusion of these matters.

THE MARTHA AND SABAR JACKSON CASES

Martha Jackson was the sole heir of Barney Thlocco, deceased, a full-blood Creek Indian, who died leaving valuable oil lands in Creek County, Okla. Sabar Jackson, the father of Martha—and whose interest I will discuss jointly with Martha's—also inherited a life estate in the allotment of Thlocco. Martha Jackson and Sabar Jackson each leased the allotment of Thlocco to the Black Panther Oil & Gas Co., each lease containing a covenant to pay both Martha and Sabar Jackson a full one-eighth royalty each, in consideration for which two leases the Black Panther Oil & Gas Co. agreed to "litigate all claimants to the Thlocco allotment at their own expense and place title in Martha and Sabar Jackson free of cost to them." Both of these leases and contracts to place title in the Jacksons were submitted to the Interior Department for approval, and were approved by the Secretary of the Interior.

Instead of placing title to this allotment in Martha and Sabar Jackson as it had agreed to do, "free of cost," and pay a one-fourth royalty to the Jacksons, the Black Panther Oil & Gas Co., its agents and officers, after the land became very valuable for oil and gas, caused the allotment to be sold by the guardian of Martha (who up to about that time was a director in the Black Panther Co.) to James Brazell, president of the Panther Co., for the sum of \$12,000 cash and \$12,000 to be paid under certain contingencies. The Indian department, headed by Hon. Cato Sells, considered this price too low and authorized a settlement for about \$111,000, but also authorized the Panther people to "buy the interest of Sabar Jackson," which it did for the sum of \$10,000 cash and \$10,000 to be paid under certain contingencies. At this time the interest of Martha and Sabar Jackson was worth more than a half million dollars in royalty due under the two leases above referred to, and the deeds taken from these Indians not only conveyed the land and all future royalties but also all "accumulated royalties then in the hands of the Federal court," amounting to approximately a half million dollars.

The probate court of Okfuskee County appointed a new guardian for Martha Jackson, and also appointed a guardian for Sabar Jackson (the same party acting as guardian for both Martha and Sabar Jackson), and this guardian employed George M. Swift, a lawyer of Okmulgee, Okla., to bring suit to cancel the deed from Martha Jackson's former guardian, the approval of her sale by the Indian Department, and also to bring suit to cancel all deeds given by Sabar Jackson.

These suits were bitterly contested for several years, and finally, on the 28th day of February, 1921, Mr. Swift entered into a stipulation of settlement of both the Martha and Sabar Jackson litigation.

tion (subject to the approval of the Secretary of the Interior), by the terms of which stipulations Martha Jackson was to be paid approximately \$370,000 and Saber Jackson \$300,000, making a total of \$670,000. A copy of the Martha Jackson stipulation is hereto attached, marked "Exhibit 1," and a copy of the Saber Jackson stipulation is hereto attached, marked "Exhibit 2."

These stipulations were submitted to Mr. Charles H. Burke, Commissioner of Indian Affairs, for his approval or disapproval, on May 6, 1921. On June 17, 1921, Mr. Burke notified Mr. Swift that the stipulations for settlement had been disapproved on the ground that the "terms were not satisfactory," and on August 5, 1921, Mr. E. B. Meritt, assistant commissioner, directed Mr. Swift to file the order of disapproval in the United States Circuit Court of Appeals, together with his letter transmitting same, so that the court might proceed to decide the cases on their merits. A copy of the order of disapproval, signed by Charles H. Burke and approved by F. M. Goodwin, Assistant Secretary, dated June 17, 1921, is hereto attached as Exhibit 3, and a copy of the letter from Mr. Meritt, assistant commissioner, directing Mr. Swift to file said order in Circuit Court of Appeals, is hereto attached as Exhibit 4.

Shortly after this order of Commissioner Burke and Assistant Secretary Goodwin, disapproving stipulations, was signed, C. Guy Cutlip, attorney for R. W. Parmenter, claiming to be the guardian of Martha Jackson, and McKinney, guardian of Saber Jackson, attempted to dismiss the appeals for these Indians then pending in the United States Circuit Court of Appeals. Had this been done, Martha Jackson would have received only about \$111,000, and Saber Jackson \$20,000, less \$14,000 already paid him for the Thlocco allotment, and all accumulated royalties.

When this attempt was made to dismiss these appeals, Mr. Swift had one of his associate counsel communicate with Commissioner of Indian Affairs, Mr. Burke, in an effort to have him intervene in these cases in the name of the Government to prevent the dismissals, but Mr. Burke declined to do so. A copy of telegram from J. F. McMurray to Chas. H. Burke, dated September 8, 1921, asking Mr. Burke to intervene to prevent the dismissals of these cases is hereto attached as Exhibit 5. However, Mr. Swift and associate counsel opposed such dismissals, prevented same, and continued to fight for Martha and Saber Jackson in the United States Circuit Court of Appeals, but, while these appeals were still pending with the knowledge and by the direction of the Indian Department as contained in letter from Assistant Commissioner Meritt (Exhibit 4), and on August 23, 1922, W. E. McKinney, guardian of Saber Jackson, entered into a stipulation of settlement of the Saber case (without the knowledge or consent of Mr. Swift) for the sum of \$50,000, a sum \$250,000 less than Swift had settled the same case for, which settlement the Commissioner disapproved. A copy of said stipulation is hereto attached as Exhibit 6.

On August 28, 1922, M. L. Mott, a close friend of Commissioner Burke, submitted this \$50,000 stipulation of settlement to Commissioner Burke, and in his letter to the commissioner Mr. Mott says:

"The stipulation is submitted for the purpose of securing an expression from the Interior Department with reference to it, either by way of approval or by indicating that the proposed settlement is not objectionable."

I may state here that I have been informed that at or about the time this letter was written by Mott to Mr. Burke, Mott advised the Black Panther Oil & Gas Co. that he could "arrange a settlement of the Saber case for \$50,000 in such a way there would be no objection raised by the Interior Department." But, be this as it may, on August 31, 1922, Mr. Burke replied to the letter from Mott dated August 28, in which he says:

"As the department is not a party to the proceedings referred to in the stipulation or agreement, and as the funds that are to be paid into the court for Saber Jackson as provided therein will not be restricted funds but will be paid to the guardian of Saber Jackson appointed by the county court of Okfuskee County, Okla., and as said guardian is entirely under the jurisdiction of said court, the Interior Department is in no way interested in the proposed settlement and therefore declines to approve or express any opinion concerning the same."

A copy of letter from Commissioner Burke to M. L. Mott, dated August 31, is hereto attached as Exhibit 7.

It will be noted that the commissioner says in his letter, "The funds to be paid to Saber Jackson are 'unrestricted funds.'" In this connection it is worthy of note that when Mr. Swift submitted his stipulation of settlement of \$300,000 the commissioner contended that all of the funds of Saber Jackson were "restricted funds" and required Mr. Swift to sign a stipulation that \$95,280 of the \$300,000 was restricted funds and should be paid to the department, the question of whether or not the balance of the \$300,000 was restricted funds to be left to the proper courts to decide. A copy of said stipulation is hereto attached as Exhibit 8, together with copy of letter from Swift to Commissioner Burke, dated Washington, D. C., May 18, 1921, transmitting same.

When the stipulation of McKinney, guardian, with the Panther Co., for \$50,000, above referred to, was filed in circuit court of appeals Mr. Swift opposed same and on September 6, 1922, had one of his associate counsel, Mr. Owen C. Becker, of Oneonta, N. Y., appeal to Commissioner Burke to aid in preventing the McKinney-Mott settlement from being made and the appeal dismissed. On September 11, 1922, Mr. Burke wrote Mr. Becker declining to intervene in the case or interfere with the McKinney-Mott \$50,000 settlement, giving practically the same reasons as he had previously given M. L. Mott. A copy of the letter from Commissioner Burke to Mr. Becker, dated September 11, 1922, is hereto attached as Exhibit 9.

Not being satisfied with this refusal by the commissioner to assist in protecting the interest of Saber Jackson, Mr. Swift again had Mr. Becker call upon Commissioner Burke to aid in preventing this robbery of Saber Jackson, and on October 2, 1923, Commissioner Burke wrote Mr. Becker again declining to lend his assistance, this time giving as his reason that:

"So far, the Government has in no way injected itself into any of the litigation in which Saber Jackson is interested. When the proceedings that are pending, to which he is a party, are finally disposed of, if we conclude that Saber Jackson has not received what he is entitled to, we will then take such action as the circumstances warrant, looking toward seeing that his interests are fully protected."

A copy of the letter from Commissioner Burke to Mr. Becker, dated October 2, 1922, is hereto attached as Exhibit 10.

More than two years have elapsed since that letter was written; the litigation was settled as per terms of the \$50,000 stipulation, and the case dismissed; the money was paid to McKinney, guardian of Saber Jackson, and in less than five months all of it was dissipated, and Saber Jackson is now penniless; and yet Commissioner Burke has taken no steps, as stated in his letter to Mr. Becker would be taken, "looking toward seeing that his interests are fully protected."

I now come to the close and the most damnable part of the whole Saber Jackson transaction. It will be recalled that Mr. Swift submitted a stipulation of settlement of this case in the sum of \$300,000, which the commissioner declined to approve on the ground that "the terms were not satisfactory"; in other words, the amount was not sufficient for Saber Jackson's interest; that later the commissioner permitted his friend, M. L. Mott, to settle the same case for \$50,000, which was \$250,000 less than Swift offered. That the commissioner was satisfied that the sum of \$300,000 was not sufficient for the interest of Saber Jackson in the Thlocco allotment is fully set out in a letter from Commissioner Burke to his friend, M. L. Mott, dated January 18, 1923, in which the commissioner says:

"MY DEAR MR. MOTT:

"In response to your inquiry as to the facts with reference to a certain stipulation having been disapproved in the matter of certain litigation in the Circuit Court of Appeals for the Eighth Circuit, in which the Black Panther Oil & Gas Co., Martha Jackson, and Saber Jackson were parties, by which there was to be paid to Martha and Saber Jackson \$308,000 and \$300,000, respectively, will say that I was called upon by Mr. J. F. McMurray, an attorney at law residing at McAlester, Okla., and he stated that he had been retained by the administrator or guardian of Saber Jackson and Martha Jackson, and that he was associated with George M. Swift, who had been representing the parties, or at least Saber Jackson, from the beginning of the litigation; that he, McMurray, was of the opinion that the stipulation which had been entered into by the parties to the litigation and which had been submitted to the department for approval ought not to be approved, because he believed that the said Saber Jackson and Martha Jackson were entitled to all of the accumulated royalties, then amounting to something more than a million and a half dollars. He made a plausible argument and one that caused me to go to the First Assistant Secretary of the Interior, and who, I believe, was Acting Secretary at the time, and call his attention to the question presented by Mr. McMurray.

"As a result of my conference with the Acting Secretary, he either disapproved or withheld his approval to the stipulation."

A copy of the letter from Commissioner Burke to M. L. Mott, dated January 18, 1923, is hereto attached as Exhibit 11.

Commissioner Burke says in his letter that McMurray made a plausible argument and one that caused me to go to the First Assistant Secretary of the Interior and call his attention to the questions presented by McMurray; as a result of my conference with the Acting Secretary he either disapproved or withheld his approval to the stipulation. The commissioner was "convinced" that Martha and Saber Jackson, full-blood Creek incompetent Indians, wards of the Government, were entitled to a million and a half dollars for their interest in the Thlocco allotment, but after being so convinced he permitted his friend M. L. Mott to settle the Saber Jackson case for \$50,000, which is \$250,000 less than the Swift stipulation which he disapproved because the amount was not sufficient, and \$700,000 less than the commissioner was "convinced" Saber Jackson was entitled

to when he disapproved the Swift stipulation, as Sabar Jackson was the owner of one-half of the million and a half referred to. (See letter from commissioner to Mott, Exhibit 11.)

The truth of the matter is, that both the Martha and Sabar Jackson stipulations submitted by Mr. Swift, giving these Indians approximately \$670,000, and not \$608,000, as the commissioner states, were recommended for approval by Commissioner Burke, and were actually approved by the First Assistant, or Acting Secretary, but as a result of the conference the commissioner refers to in his letter to Mr. Mott of January 18, 1923, the stipulations were sent back to the Commissioner of Indian Affairs and the letter of June 17, 1921, from Mr. Charles H. Burke, approved by F. M. Goodwin, Assistant Secretary, to George M. Swift (Exhibit 3), stating that said stipulation had been disapproved, was mailed out in lieu of the approved stipulations.

"In Commissioner Burke's letter to Mr. Owen C. Becker, dated October 2, 1922 (Exhibit 10), he says:

"So far the Government has in no way injected itself into any of the litigation in which Sabar Jackson is interested" * * *

In this statement the commissioner has either forgotten the record or misstated it, for the Government did intervene in the litigation over the Barney Thlocco allotment, both on behalf of Martha and Sabar Jackson, and the commissioner was advised of this fact on September 8, 1921, by Mr. J. F. McMurray in his telegram to Commissioner Burke (Exhibit 5), which reads as follows:

MCALISTER, OKLA., September 8, 1921.

CHARLES H. BURKE,

Commissioner of Indian Affairs, Washington, D. C.:

McKinney, guardian of Martha and Sabar Jackson, has given Swift notice that he has been dismissed as his attorney in United States Circuit Court of Appeals. McKinney now has filed motion in said court to dismiss the appeals of Martha and Sabar Jackson. Both moves at the suggestion and in the interest of Black Panther Oil & Gas Co. I think the interest of Martha and Sabar Jackson greatly jeopardized. The Government intervened in these suits in the lower court when McKinney threatened to take similar action there but did not join in the appeals. Allow me to suggest the wisdom of the department intervening in these suits in the court of appeals, so that the Government can see that no radical moves are made that will destroy the property rights of these Indians without notice to the Government. If you or the Secretary of the Interior desire, I will come to Washington immediately for conference.

J. F. McMURRAY.

This telegram was sent at the request of Mr. Swift in an effort to protect these Indians. The records in these cases in the Interior Department also show that the Government had intervened in these cases, and the commissioner is or should be familiar with the record. The facts are that Mr. Swift, in order to fully protect Martha and Sabar Jackson, requested Secretary of the Interior John Barton Payne to intervene in these cases and, at the request of Secretary Payne, the Attorney General directed the United States attorney at Muskogee, Okla., to intervene, and on June 4, 1920, Mr. Archibald Bond, United States attorney for the eastern district of Oklahoma, filed his intervention on behalf of Martha and Sabar Jackson, a copy of which is hereto attached as Exhibit 12. However, when Secretary Payne went out of office no further steps were taken by the Government to protect the interest of these Indians, although the intervention of the Government is still pending in the United States court at Muskogee.

Mr. Swift also requested Attorney General Daugherty to intervene in the litigation on behalf of Martha and Sabar Jackson, furnishing a complete history of the litigation, but he was advised by the Attorney General's office that "no steps could be taken unless requested by the Interior Department," and that upon inquiry at the Interior Department the Department of Justice was advised that "The Jackson litigation was a closed incident," and the report and record evidence was returned by the Department of Justice to Mr. Swift and is now in his possession.

THE MARTHA JACKSON CASE

As has been stated in discussing the Sabar Jackson case, Martha Jackson's case was settled by the Indian Department for \$308,000, plus \$12,000 paid her guardian, Parmenter, when she was a minor, whereas the stipulation of settlement presented by Mr. Swift and disapproved by Commissioner Burke would have given her approximately \$370,000 (Exhibit A), less the \$12,000 paid to her guardian, Parmenter, the actual amount she was to receive under the Swift stipulation being "the one-eighth royalty in the hands of the Federal receiver up to the date of the deed by her guardian, Parmenter, to the Black Panther interests," which would have amounted to approximately \$370,000, a small difference of approximately \$50,000.

In addition to this \$50,000, Commissioner Burke admitted to Secretary of the Interior Hubert Work, on March 24, 1924, that he had paid to R. C. Allen and C. Guy Cutlip, claiming to represent R. W. Parmenter, who claimed to be the guardian of Martha Jackson, as an incompetent, the sum of \$55,000, attorneys' fees, and had also

paid Parmenter \$15,000 as guardian fees, after Mr. Swift and his associate counsel had shown the Secretary that Allen, Cutlip, and Parmenter had all appeared both in the State and Federal courts and before the Indian Department in an effort to prevent Martha Jackson from receiving one dollar over and above what had been decreed her by the Federal court, to wit, \$111,000. So that in administering this estate the Commissioner of Indian Affairs settled the case for \$50,000 less than Swift's stipulation called for, and then paid the attorneys and guardians who appeared against and fought the interest of Martha Jackson the sum of \$70,000, making a total of \$120,000 actual loss to Martha Jackson, and in addition to this amount, according to the letter from Commissioner Burke to M. L. Mott (Exhibit 11), the commissioner settled the Martha Jackson case for \$442,000 less than he was "convinced" she should receive, the commissioner in his letter to Mott stating that he was convinced "Martha and Sabar were entitled to \$1,500,000," and for that reason he disapproved the Swift stipulation. So that, according to the commissioner's own statement, he settled the Martha Jackson case for \$442,000 less than he was convinced she should receive, and then paid the lawyers and guardian who opposed her recovering her just share of the estate \$70,000, which is over 62 per cent of the \$111,000 for which they sold her estate. No court in Oklahoma has ever allowed such an exorbitant fee in any Indian case.

To substantiate the charge that R. W. Parmenter, claiming to be the guardian of Martha Jackson, as an incompetent, and his attorney, C. Guy Cutlip, did everything in their power to prevent Martha Jackson from receiving her just share of the Thlocco estate, there is attached hereto, as Exhibit 13, copy of "Motion to dismiss by appellant" (which is a motion by Parmenter to dismiss the appeal of Martha Jackson taken by W. E. McKinney, the legal guardian of Martha, as an incompetent, filed in the United States Circuit Court of Appeals at Denver, Colo., just three months after Commissioner Burke had disapproved the Swift stipulation). Had this motion been granted, Martha would have received only \$111,000, instead of the \$308,000 she was finally paid. The Commissioner of Indian Affairs was requested to intervene to prevent this dismissal, but did not do so, and it was opposed by Mr. Swift and his associate counsel, and the dismissal prevented.

When the motion to intervene in the United States Court for the Eastern District of Oklahoma by W. E. McKinney, guardian of Martha, to cancel the deed given by Parmenter while acting as guardian of Martha Jackson, as a minor, and to prevent the settlement of her claim for \$111,000 (which had been approved by the Indian Department), Mr. Swift and his associate counsel were opposed by C. Guy Cutlip and R. C. Allen, representing Parmenter, joining in with the attorneys for the Black Panther Oil & Gas Co. The motion by McKinney, guardian, to intervene, was argued to Hon. Frank A. Youmans, sitting as judge of the United States Court for the Eastern District of Oklahoma, the motion being opposed by attorneys for the Black Panther Oil & Gas Co., and by R. C. Allen, representing Parmenter, who claimed to be the guardian of Martha. The motion was denied, and Swift and associates appealed to the Circuit Court of Appeals. When the Black Panther Co. filed its brief in the United States Circuit Court of Appeals, R. C. Allen, "Attorney for Parmenter," joined with them, in an effort to have the appeal dismissed. A copy of this brief will be furnished if required.

In addition to these facts, after Swift and associates had appealed from the order denying Martha Jackson leave to intervene to cancel the deed given by Parmenter, and to set aside the settlement of \$111,000, approved by the Indian Department (but not approved by the Secretary of the Interior, as the law required) the Black Panther Oil & Gas Co. made application to the Secretary of the Interior, the Hon. John Barton Payne, to have the settlement of \$111,000 made by the Indian Department, approved by the Secretary. At this hearing, R. C. Allen, representing Parmenter, and C. Guy Cutlip, also representing Parmenter, appeared with attorneys for the Panther Co. urging the approval of the \$111,000 settlement. Also appearing with attorneys for the Panther Co., urging such approval, was First Assistant Secretary of the Interior Hopkins, J. C. Davis, Creek national attorney, the superintendent of the Five Civilized Tribes, and Cato Sells, Commissioner of Indian Affairs. The approval was opposed by Mr. Swift and associate counsel, representing Martha Jackson. Secretary Payne refused to approve the \$111,000 settlement, and held:

"* * * It is ordered that the oil and gas lease executed by Sabar Jackson, as guardian of Martha Jackson, with J. Coody Johnson, under date of August 20, 1913, by and between J. Coody Johnson, party of the first part, and Sabar Jackson, as guardian of Martha Jackson, a minor, parties of the second part, and the oil and gas lease dated November 13, 1913, executed by Sabar Jackson individually, to J. Coody Johnson, together with the contract of employment between Sabar Jackson, individually, and J. Coody Johnson, dated November 13, 1913, be and the same are hereby approved. The said leases cover the Barney Thlocco allotment, to wit: The N.W. ¼ of sec. 9, T. 18

N. R. T. E. Creek County, Okla., and were made as the consideration for the said employment contracts. This controversy involves the interest of Martha Jackson, a minor, to the royalties in the hands of the receiver in the case of *United States of America v. Bessie Wildcat, et al.*, from the inception to the date on which the fee of the said real estate was conveyed by E. W. Parmenter, guardian, to Thomas Kelly, July 9, 1917, the validity of which conveyance is not involved in this proceeding and is not passed upon. The Secretary of the Interior is of opinion that in view of the said leases made to J. Coody Johnson in 1913, as aforesaid, the conduct of the parties subsequent thereto, including the contract of February 26, 1918, between the Black Panther Oil & Gas Co., James Brazell, O. O. Owens, and J. Coody Johnson, purporting to dispose of said royalties, that the said J. Coody Johnson, the Black Panther Oil & Gas Co., Sabar Jackson, and all parties claiming by, through, or under them, or any of them, are conclusively estopped from denying that the said Martha Jackson is entitled to receive less than the full one-eighth royalty mentioned in the lease so executed by her guardian, being one-half of the royalties accumulated prior to said conveyance and now in the hands of the receiver; and the Secretary finds, as a matter of fact, that she is entitled to receive said one-eighth, her interest amounting as of the date of the conveyance to Thomas Kelly, as aforesaid, to the sum of \$325,000, approximately."

A copy of said order, dated May 6, 1920, is hereto attached as Exhibit 14.

So incensed was Secretary Payne at those asking for the approval of the \$111,000 settlement, at the conclusion of the hearing he remarked:

"Those asking for the approval of this settlement (the \$111,000 stipulation) remind me of the thieves who crucified the Christ and then cast lots for his raiment;" and directed Mr. Swift to proceed with the litigation to cancel the deed from Parmenter to Kelly, mentioned in his order.

All of these facts were well known to Commissioner of Indian Affairs Burke when he disapproved the Swift stipulation and later approved one for \$308,000, and while the commissioner stated in his letter to M. L. Mott that he disapproved the Swift stipulation "because he was convinced Martha and Sabar Jackson were entitled to \$1,500,000," and later "proceeded to negotiate a new settlement," all that he did was to carry out, in part, the order of Secretary Payne above quoted, which had estopped all parties from denying that Martha was entitled to receive less than \$325,000, approximately, and the commissioner came within the "\$325,000, approximately," by allowing Panther Co. credit for the \$12,000 theretofore paid to Parmenter for a deed to the land.

The record shows that the commissioner's friend, M. L. Mott, figured in the Martha settlement as well as the Sabar crucifixion, for on April 4, 1921, Mott wrote Commissioner Burke as follows:

"Dillard, Allen & Dillard, attorneys for guardian of Martha Jackson, have employed me to assist in having their fees determined. I desire to be heard before action is taken by the department on approval of settlement of Martha Jackson interest involved in the Thlocco case. There is, in connection with this whole transaction, much information that you and the Secretary of the Interior should be in possession of before approval of any agreement between the parties by the department. I will be in Washington soon. If you desire the matter taken up, notify me and I will appear at once."

"P. S.: See Judge Allen's letter, which goes by the same mail."

This was on a hearing before Commissioner Burke on the stipulations submitted by Mr. Swift. Copy of letter from Mott to Commissioner Burke, dated April 4, 1921, is hereto attached as Exhibit 15.

And that is not all the part Mott played in the settlement of the Martha Jackson case and in securing fees for R. C. Allen. After the commissioner disapproved the Swift stipulation and "instituted proceedings looking to a new settlement," as he claims, he directed A. J. Ward, Creek national attorney, to make a report and recommendations in the Martha Jackson case. Ward and Mott were and are close friends. At the conclusion of his report (which is on file in the Indian Department) Mr. Ward made the following recommendation:

"The matter of attorneys' fees to be paid is not here discussed or considered, but will probably come up for consideration as soon as the above sum of money is set aside to Martha Jackson by proper court order in the event the contract (\$308,000) is approved. There are, as I understand it, only two claims for attorneys' fees that are entitled to consideration as against Martha Jackson, namely, the claim of C. Guy Cutlip and of Messrs. Dillard, Allen & Dillard."

And the recommendation was made by Ward, Creek national attorney, in face of the record, with which he was familiar; that both Cutlip and the firm of Dillard, Allen & Dillard, or, rather, Allen of that firm

had at all times and on all occasions done everything in their power to prevent Martha Jackson from receiving more than the \$111,000 allowed her by the trial court.

In Mr. Swift's report to the Attorney General on the Martha Jackson case he stated that he had been advised by Mr. F. W. Dillard, of the firm of Dillard, Allen & Dillard, that M. L. Mott either "wrote, dictated, or caused to be written" the clause above quoted from the report of A. J. Ward to Commissioner Burke, and that Mr. Dillard would swear to the fact.

THE FUNDS OF MARTHA JACKSON NOW IN THE HANDS OF THE INTERIOR DEPARTMENT TO BE TURNED OVER TO THE JURISDICTION OF THE PROBATE COURT OF OKFUSKEE COUNTY AS UNRESTRICTED FUNDS

I am informed and believe, and offer to furnish names of witnesses who will testify to the fact, that the Commissioner of Indian Affairs, Mr. Burke, not being satisfied with permitting his friend, M. L. Mott, to settle the Sabar Jackson case for \$50,000, the funds being paid into the county court of Okfuskee County as unrestricted funds, in violation of law, recently, and within the past three months, lent himself to a plan whereby the remaining funds of Martha Jackson (approximately \$250,000) were to be turned over to the jurisdiction of the probate court of Okfuskee County as unrestricted funds, the attorneys securing the consent of the commissioner for the transfer of the funds to be paid a fee of 10 per cent of the estate. In addition to this, so I am advised, the plan contemplates that as soon as the money is transferred, Martha Jackson, who is now under guardianship as an incompetent, is to be restored to competency and the estate turned over to her, for which service certain attorneys are to be paid one-half of the remainder of her estate and thus complete the legal, or illegal, rape of this incompetent full-blood Indian girl, ward of the Government. Learning of this scheme, Mr. W. W. Pryor, of Holdenville, wrote the Hon. Hubert Work, Secretary of the Interior, under date of September 20, 1924, as follows:

"Yesterday we learned that there are some agreements whereby certain favored attorneys are to receive 10 per cent of the funds in the hands of the department in case they can get the department to relinquish supervision over the funds of Martha Jackson. We also learned that certain favored attorneys have an understanding with the county judge of Okfuskee County, whereby they are to receive \$25,000 as a fee for the said services as soon as the money is placed under the supervision of the county court of Okfuskee County. And we also learned that Commissioner Burke has given his consent to a relinquishment of these funds."

Prior to Mr. Pryor's letter to Secretary Work, under date September 20, 1924, the district court of Seminole County held that Parmenter never was the legal guardian of Martha Jackson as an incompetent, and that W. E. McKinney was the legally appointed guardian, as Swift and associates had always claimed. Parmenter appealed to the Supreme Court of Oklahoma, but later dismissed his appeal, and the supreme court sent down its mandate, which was to the effect that McKinney was the legal guardian of Martha Jackson as an incompetent. This being a fact, the settlement made by Parmenter of \$308,000, approved by the commissioner and Assistant Secretary of the Interior, was illegal, as was also the payment of \$70,000 by Commissioner Burke to Parmenter and his lawyers out of the funds of Martha Jackson. When Mr. Pryor, of counsel for McKinney, guardian of Martha, called this matter to the attention of Secretary Work, the Indian Department instructed Mr. Dumbley D. Buell, probate attorney, Holdenville, Okla., to file a motion in the Supreme Court of Oklahoma to recall the mandate holding that Parmenter was not the legal guardian of Martha, which has been done, and also a motion to "substitute Mr. Buell for Parmenter" in the appeal. The only purpose of this move is to try to protect the Commissioner of Indian Affairs in the wrongful payment of \$70,000 of Martha's money and to bolster up the \$308,000 settlement made by Parmenter. These motions have not as yet been passed upon by the supreme court, and are still pending.

THE FUNDS OF MARTHA AND SABAR JACKSON ARE RESTRICTED FUNDS, UNDER THE DUAL SUPERVISION OF THE SECRETARY OF THE INTERIOR AND THE PROPER PROBATE COURT OF OKLAHOMA

For authority that the funds of Martha and Sabar Jackson are restricted funds, see act of Congress of May 27, 1908, *United States v. Hinkle*, 261 Fed. 518-22; *Parker v. Richards*, U. S. —, 83 L. ed. 954.

When the Government intervened in these cases (see Exhibit 12) it was upon the theory that the funds of both Martha and Sabar Jackson were restricted funds.

THE JACKSON BARNETT CASE

This is another case where, as in the cases of Martha and Sabar Jackson, M. L. Mott—friend of Commissioner Burke—appears on the scene and takes a more or less important part in the wrongful and illegal disposition of approximately \$1,100,000 of a full-blood, incompetent Creek Indian's estate by the Interior Department and the Indian Department thereof, during the incumbency of Albert B. Fall as Secretary of the Interior, and Charles H. Burke, Commissioner of Indian Affairs, without the consent or approval of the probate court

of Okmulgee County, where the guardianship of Jackson Barnett was and is pending, without the knowledge or consent of the guardian of Barnett, and in direct violation of law.

That your committee may know the first steps in the conspiracy to extract the \$1,100,000 from the estate of Jackson Barnett, above referred to, I quote from a petition of the guardian of Barnett recently filed with the Hon. Hubert Work, Secretary of the Interior, in an effort to recover this \$1,100,000 wrongfully and illegally paid out by the Interior Department under and by recommendation and approval of Charles H. Burke, Commissioner of Indian Affairs. That part of the petition referred to is as follows:

"* * * That the sole power and authority of the Secretary of the Interior to approve and make rules and regulations relating to the leasing and leases of restricted lands for oil and gas mining purposes, including the lands of said incompetent, is and was derived solely from and limited by said section 2 (the act of Cong., of May 27, 1908).

"That the Secretary of the Interior, assuming to act under the provision of said section 2, promulgated certain rules and regulations, among which are the following:

"(25) All royalties, rents, or payments accruing under any lease made for or in behalf of any minor or incompetent shall be deposited by the Indian agent or other Government officer to whom paid to the credit of the guardian or curator of said minor or incompetent in some national bank or banks designated by the Commissioner of Indian Affairs, and may be withdrawn therefrom by said guardian or curator, with the consent of the United States Indian agent, in sums not exceeding \$50 per month, unless otherwise ordered by the court. Sums in excess of \$50 per month may be withdrawn on order of the proper court and not otherwise. Such designated banks shall furnish satisfactory surety bonds, to be approved by the Secretary of the Interior, guaranteeing the safe care and custody of the funds deposited."

"That subsequent to the promulgation of the above rule the Secretary of the Interior assumed—and without power under the above statute and acts of Congress, which limits the Secretary's authority to that of prescribing rules and regulations relating to leases and leasing—to annex a provision to said rule 25 by which the Secretary of the Interior, without authority, attempts to empower the Superintendent for the Five Civilized Tribes to exercise an arbitrary discretion and withhold all funds arising from royalties from the benefit of minors and incompetents and from their respective guardians, which rules are and have been in effect, so far as consistent with the above statutes and treaties (and not otherwise) at all times mentioned in this complaint.

"* * * That from the time of the creation of the office of the Superintendent for the Five Civilized Tribes by virtue of said statute of August 1, 1914 (38 Stat. 598), it was, under the construction as applied and placed thereon by the Secretary of the Interior and the Interior Department, the invariable custom and practice for the Superintendent for the Five Civilized Tribes, and said cashier, to receive the royalties accruing from the leases of restricted minors, incompetents, and retain the custody thereof to the credit of such guardians and subject to the payment therefrom to the guardians for the benefit of their respective wards upon orders of the county court having jurisdiction of the guardianships.

"That the above custom and practice during all of such time, covering a period of more than eight years, and until about October, 1922, obtained as to the royalties and estate and guardianship of the said incompetent, Jackson Barnett.

"That during the latter part of the year 1922, the Secretary of the Interior and Commissioner of Indian Affairs, contrary to said laws and such of the rules and regulations consistent with the statute, and in departure from the said construction and interpretation at all times formerly applied thereto, assumed to dominate the affairs of the Superintendent for the Five Civilized Tribes, and the said cashier, in respect to the custody, control, and disbursement of said royalties received and in the hands of said cashier, including the royalties of said Jackson Barnett, to the extent of directing payments and disbursements therefrom without awaiting or requiring the order of the county court having jurisdiction of the respective estates of such ward, and that said superintendent and cashier have been and are indulging in the practice of carrying out said directions. That such unwarranted practice during the year 1922 has obtained as to the royalties and estate of Jackson Barnett.

"Your petitioner further respectfully represents that said Jackson Barnett, an adjudged incompetent, is in fact a mental incompetent, and by reason thereof has been for more than a half century, and now is mentally incompetent and incapable of taking care of himself and managing his property, and entirely unable to comprehend the value, condition, character, nature, and extent of his estate, or any part thereof, and is also without mental capacity to comprehend and understand, and without actual

comprehension or understanding of any written instrument, purported trusts, requests, and agreements hereinafter mentioned in this complaint. That said incompetent is, and for many years past has been (on account of an injury sustained in his early youth which permanently arrested his mental development), incapable of discerning or appreciating the motives and designs, evil or otherwise, of any person or persons with whom he comes or may come in contact.

"That during the month of February, 1920, defendant Anna Barnett, together with accomplices, none of whom had any previous acquaintance with said mental incompetent (excepting as disclosed by the report of the Secret Service agent referred to herein), enticed and forced the aged Indian into an automobile, transported him from his habitation, his accustomed environment, and the association of the members of his tribe, to the States of Kansas and Missouri, and in each State the said Anna Barnett entered into an alleged marriage relation with said decrepit mental incompetent.

"That at the time of the above 'matrimonial enterprise' the said spouse, to carry out her designs, engaged the services of legal counsel to bring about a situation whereby she and her accomplices might acquire and extract from the estate of said incompetent approximately \$550,000. That in consideration of such assistance the said counsel was (contingent upon success) to receive approximately \$150,000 of the funds to be so extracted from the aged Indian's estate.

"That in pursuance to the designs and arrangements above referred to, with the cooperation of other persons unknown to this complainant, the alleged incompetent has been continuously since said alleged marriage kept away from his former acquaintances, members of his tribe, and absented from his guardian, and at all times has been under the designing, dominating, immediate, and undue surveillance, duress, and restraint of the said spouse, her private counsel, and some of the associates.

"That during December, 1922, a letter was prepared by some person or persons other than Jackson Barnett, which letter purported to direct the negotiation and consummation of complex business transactions, involving the execution of various technical contracts and trust agreements, and designed to culminate in the disposition and distribution of more than a million dollars, approximately \$550,000 of which was to be given to said Anna Barnett; that said letter was written in the English language, which said incompetent could not read, and couched in terminology which is not susceptible of literal interpretation into Creek, the native language of said incompetent, and if interpreted in substance, involved transactions which were and are wholly foreign to and beyond the comprehension of said incompetent; that after said letter was so prepared, said incompetent in some manner unknown to this complainant was caused to impress his 'thumb print' as a purported signature.

"That the said Jackson Barnett at all times mentioned in this complaint, and at the time of so impressing his thumb print on said written instrument purporting to be his letter and pretending to contain his request and directions, was in fact a mental incompetent by reason of imbecility, such unfortunate mental condition being apparent to any person of average intelligence observing or attempting to converse with said ward, and his mind and memory are so impaired as to render him wholly incapable of understanding or comprehending the contents of said letter, or of giving the directions or of making or understanding the requests or the nature, character, and effect of the transactions and directions referred to and contained therein.

"That after said letter was so prepared and impressed with the thumb mark of said incompetent, it was forwarded or taken to the office of the Secretary of Interior, at Washington, D. C., together with the other papers and purported trust agreements, which the incompetent was likewise wholly incapable of understanding and did not understand.

"That the Assistant Secretary of the Interior, not so far as complainant is informed, being advised of the fraud practiced upon said incompetent and without actual knowledge of the mental incompetency and imbecility of said Jackson Barnett, although such incompetence and imbecility in fact had previously been reported to the department by the Secret Service, which report was then on file, was by reason of the contents of such letter induced to and did participate in and approve the carrying out of such purported directions, and without authority, without an order of the county court of Okmulgee County, Okla., and without the knowledge and consent of the guardian, delivered, in violation of law, unto Anna Barnett and her counsel, \$550,000 belonging to the estate of said incompetent. That of the \$550,000 so delivered, \$200,000 was by said donee with or by her direction delivered to and deposited in the Riggs National Bank, of Washington, D. C., and is now held by said bank as hereinafter alleged; and approximately \$100,000 paid, as a part of the transaction to the

private counsel of Anna Barnett as a gratuity for his services, as per the original agreement accompanying the matrimonial enterprise, to 'extract the half million or more from the aged Indian's estate.'

"That on or about April 28, 1920, the Secret Service or special agency of the Interior Department filed with the Commissioner of Indian Affairs, a report relating to an alleged kidnapping of Jackson Barnett. The above report relates a state, especially as contained in the concluding 12 pages, which, if true, disclose propensities so shockingly depraved and dangerous in their nature, as, and when considered with the imposition successfully practiced upon the department resulting in its apparent approval, and the extraction of the '\$550,000 or more' from the estate of the aged Indian, warrants this guardian, under order and advice of the probate court, in asking the official cooperation of your honorable Secretary in granting the assistance and relief prayed for in this petition.

"That on or about the year 1917, and prior to May, 1918, the exact date being unknown to this petitioner, the said cashier, without an order of the county court of Okmulgee County, Okla., invested the major portion of the proceeds of the royalty arising from said incompetent's allotment, in United States bonds, and without an order of said court and without the knowledge and consent of this guardian, forwarded and delivered said bonds, amounting to over a million dollars, to the Secretary of the Interior; that during February, 1923, the Secretary of the Interior, Albert Fall then incumbent, acting by and through F. M. Goodwin, Assistant Secretary of the Interior, assumed the control of said funds and power of disposing of the same upon what purported to be the written request of said incompetent; that on or about February 1, 1923, acting upon said request and without an order of said county court and without the knowledge or consent of the guardian of said ward, said Assistant Secretary of the Interior delivered to one Anna Laura Barnett and her private counsel said bonds or the proceeds thereof to the extent and value of \$550,000, as a gift, solely upon the authority and pursuant to said purported and pretended request of said mental incompetent.

"That contemporaneously with the delivery of said sum or bonds, or soon thereafter, the exact date being unknown to this petitioner, the said Anna Laura Barnett, or some official or employee of the Interior Department, delivered to the Riggs National Bank of Washington, D. C., said bonds or the proceeds thereof to the value of \$200,000; that contemporaneously with the delivery of said bonds, or the proceeds thereof, a purported trust agreement was entered into between the said Anna Laura Barnett and said bank, without any order or approval of said county court, and without any knowledge or consent of this guardian; that said agreement is in possession or control of said bank and the Interior Department, and that the contents thereof are unknown, but this complainant is informed and believes and avers that by the terms of said purported trust agreement said incompetent is wholly deprived of said \$200,000, and the same wrongfully diverted from his estate, except for a small amount to be handled by your honorable Secretary of the Interior (as per the terms of said trust agreement), not exceeding a 3 per cent annual income, provided by said agreement to be paid upon said \$200,000 to said incompetent during his lifetime.

"That at the time of the consummation of the original designs aforesaid and contemporaneously therewith, and with the apparent purpose of bolstering the entire enterprise with the color of philanthropy, there was likewise taken by the officials of the department, acting upon the purported written request of Jackson Barnett and induced by the impositions practiced upon them, the sum of \$550,000, which was delivered to the Equitable Trust Co. of New York in trust for certain purposes and objects disclosed by the records of the Interior Department, concerning which the said incompetent had no knowledge and was and is wholly incapable of understanding and comprehending; that said funds are still in the hands of said trust company (subject to process), and said company has been notified of the mental incapacity of the unwitting and incompetent donor.

"That your petitioner on the 5th day of June, 1923, was subjected to an order of the county court of Okmulgee County, Okla., a copy of which is exhibited herewith, directing this guardian to avail himself of such cooperation and assistance as the honorable Secretary of the Interior might render in seeking to recover that portion, aggregating over a million dollars of the aged Indian's estate, which has been erroneously and through misinterpretation of the law illegally diverted.

"That the United States Court for the Eastern District of Oklahoma, Justice Williams presiding, in a case instituted by this guardian to enjoin the Superintendent of the Five Civilized Tribes and the cashier from paying a \$50,000 voucher directly to said mental incompetent without order of the probate court, announced

as its decision in passing upon a motion then pending, 'That the officials of the Interior Department were and are without authority to make payments from the restricted funds of incompetent Indians, such as Jackson Barnett, except upon a concurring or joint order of the department and the probate court.' That said suit is still pending by which this guardian is seeking to preserve \$50,000 and prevent the certain waste and dissipation thereof, which would certainly result from its payment direct to said incompetent, as threatened, but thus far the progress of the guardian in said cause is being resisted by the Interior Department, acting by and through its representatives in said court.

"Your petitioner represents that as guardian of Jackson Barnett he is practically without funds, as disclosed in the said order of the probate court, exhibited herewith, and will be unable to pursue with promptness the necessary legal remedies unless the Superintendent of the Five Civilized Tribes and said cashier complies with the said directions of the probate court and concurs therein.

"That the alleged Mrs. Barnett, claiming to have the support of a number of the officers or attachés of the Interior Department, has left the territorial jurisdiction of the State and Federal courts of Oklahoma, and restrains the aged Indian from his old home friends and tribal members, as disclosed in the findings contained in the order of the probate court, and in this respect likewise, with the apparent support of some of the subofficers or employees of the department, this guardian is prevented from fully performing his duties with reference to the care and welfare of the incompetent, as contemplated by the statute, and the laws relating to guardianships. That, consistently with the tactics employed ever since said matrimonial adventure, said aged Indian is restrained in a foreign State (California) under surveillance, with the apparent purpose of preventing him from making his actual and true wishes known to his guardian, former neighbors, and immediate Indian relatives.

"That the attitude of the Interior Department, and especially the subofficers, in resisting instead of assisting in the progress of the legal proceeding pending and necessary to preserve and restore the estate of said aged incompetent is likewise an embarrassment and a handicap in delaying the guardian of said mental incompetent in performing what this guardian is by counsel and by the probate court advised, and in good faith believes to be, his duty and legal obligation in the premises."

There is attached hereto a complete copy of the "petition" and report of the guardian of Jackson Barnett (Carl J. O'Hornett) to the Hon. Hubert Work, Secretary of the Interior, from which the above quotations are taken, marked Exhibit 16. There is also attached as Exhibit 17, order of the probate court of Okmulgee County, with petition of Carl J. O'Hornett included in same, directing the guardian to proceed to recover the \$100,000 wrongfully paid out of the estate of his ward by the Interior Department and to prevent the payment of \$50,000 direct to Jackson Barnett. There is also attached, as Exhibit 18, brief of the law by counsel for O'Hornett, tending to show that the said \$100,000 was wrongfully and illegally paid, or given away, by and through a conspiracy to extract the amount from the estate of Jackson Barnett, which conspiracy was carried out by and with the aid and assistance of certain officials of the Interior or Indian Department.

The records of the probate court of Okmulgee County show that the guardian, O'Hornett, has resigned since the filing of the above petition with the Secretary of the Interior, and the facts are, that receiving no aid or assistance from the Interior Department in recovering and protecting the estate of his ward and being without funds to carry on the litigation, a fact well known to the Interior Department officials, he had nothing left to do but resign. In fact, it is reported on good and reliable authority that his resignation was brought about by Indian Department officials, and particularly Mr. Shude Wallen, superintendent of the Five Civilized Tribes, who requested the county court to appoint one of the field clerks working under him in the place of O'Hornett, which the county court refused to do. Just how and why this guardian was induced to resign and the fact that an attempt was made by Indian Department officials to have one of their own pets named in his place is worthy of investigation, even if the record did not disclose the sickening facts hereinbefore cited and referred to.

As stated in the outset of this Jackson Barnett statement, this same M. L. Mott who figured so conspicuously and so successfully for his client, the Black Panther Oil & Gas Co., in the Martha and Saber Jackson cases, also figured in this Barnett case, being paid a part of the \$100,000 alleged to have been paid to "counsel for Mrs. Barnett," or paid a fee for his services in the case from some other source. At any rate, he appeared in the case and was paid a fee, and I am reliably informed the said M. L. Mott now claims to be the personal attorney for Mrs. Anna Laura Barnett, which perhaps explains why she is able to keep Jackson Barnett secluded in California, away from his friends, members of his tribe, and blood relatives, and have every wish of the

said Mrs. Anna Laura Barnett gratified in so far as the Indian Department, headed by Charles H. Burke, is able to gratify them, as alleged in the petition of the guardian to the secretary.

While I was county judge of Okmulgee County, Okla., during the years of 1921 and 1922, the same or some other sinister influence was at work in this Barnett case, and Barnett was removed at midnight from his home in Okmulgee County and transported with his household belongings to Muskogee County, Okla., out of the jurisdiction of my court, where an attempt was made to establish his legal residence, and with him went his faithful spouse, Anna Laura Barnett.

An effort was made to buy an expensive home for Barnett in or near Muskogee, Okla., and in October, 1921, he, together with his faithful spouse, was transported to Washington, D. C., in company with Anna Laura Barnett's personal counsel and Edwin C. Motter, special assistant to the Attorney General, for the purpose of getting Commissioner of Indian Affairs Charles H. Burke to make an allowance of about \$300,000 for the purpose of buying or building a home in Muskogee, Okla., or near that city, on property claimed to be owned by the said Edwin C. Motter, special assistant to the Attorney General of the United States. Learning of this fact, I wired Mr. George M. Swift, who happened to be in Washington at that time, requesting that he protest the allowance of any sum for the purpose of building or buying a home for Jackson Barnett outside of Okmulgee County, stating that I was willing to approve an order for the building of a home in Okmulgee County. Mr. Swift, at my request, took the matter up with Mr. Motter and also with the Indian Department, protesting in my name against the allowance of the \$300,000. The \$300,000, I am reliably advised, had already been allowed; but after my protest the money was never turned over, although I am advised Mr. Motter, a special assistant to the Attorney General of the United States, was allowed and paid approximately \$800 out of the estate of Jackson Barnett by the Indian Department to cover his personal expenses for "taking Jackson Barnett and his faithful spouse to Washington" to get an order from the Indian Department allowing his faithful spouse \$300,000 to buy a house or tract of land owned by the said Edwin C. Motter, special assistant to the Attorney General of the United States, which property was not worth over \$15,000 to \$20,000 at best.

THE RICHMOND BRUNER CASE

This is a case that was handled while I was county judge of Okmulgee County. Richmond Bruner, a half-blood Creek Indian, died in Okmulgee County, leaving his restricted homestead allotment. He left surviving him a widow, Jane Bruner, and various collateral kindred. Suit to determine heirship was filed in my court. The widow, Jane Bruner, and all the collateral kin were unrestricted heirs, as shown by the rolls in the Interior Department. The collateral kin claimed that Jane Bruner was not the legal wife of Richmond Bruner, deceased; and that therefore they inherited the allotment, and also about \$108,000 in cash and Government bonds in the hands of the Interior Department. Pending a determination of the heirship of Richmond Bruner, I appointed Howard Keaton and George M. Swift of Okmulgee, special administrators of the estate, required them to give bond in the sum of \$100,000, which they gave in a reputable bonding company. I then directed them to collect the \$108,000 cash and Government bonds from the Interior Department, the same being "unrestricted funds." Proper demand was made upon the Superintendent of the Five Civilized Tribes for the cash and bonds, which the superintendent agreed to turn over as soon as furnished with evidence that the heirs of Richmond Bruner were in fact "unrestricted heirs." This information was furnished from the rolls in the superintendent's office, but still he refused to turn over the cash and bonds to the special administrators.

Later, and some time after the 1st of July, 1922, Mr. Howard Keaton, one of the special administrators appointed by me, was in Washington and called upon Mr. Charles H. Burke and again requested that said cash and bonds be turned over to the special administrators as ordered by the county court of Okmulgee County, which request was denied, and on July 19, 1922, Commissioner Burke wrote Mr. Keaton at the Raleigh Hotel, Washington, D. C., in part as follows:

"It would seem that you are in a position where there is no occasion for any particular anxiety with reference to the funds in the possession of the Interior Department, as you know they will be available eventually and that they will be intact. As soon as I can get the full record in the case and am apprised of all the facts, I will write you further."

A copy of the commissioner's letter is hereto attached as Exhibit 19. But the commissioner did not write Mr. Keaton further and did not turn over the estate of Bruner as ordered by the county court which had exclusive jurisdiction over this "unrestricted" estate.

However, after I had retired from the bench and my successor had taken up the duties of the office—about six months after the commissioner refused to turn over the estate to the special administrators—the incoming judge of the county court appointed the Guaranty Trust Co., of Muskogee, Okla., administrator of the estate of Richmond

Bruner, and the commissioner promptly ordered the estate turned over, although the Guaranty Trust Co. was at that time and is now practically bankrupt. The Guaranty Trust Co. as soon as it had gotten possession of the estate proceeded to dissipate it, and within about 60 days after getting possession of the cash and bonds the entire estate had been dissipated, and, in addition, the managing officer of that concern had acquired a deed from Jane Bruner, who had been declared by the court to be the sole heir of Richmond Bruner to the 40-acre homestead worth about \$25,000. Hon. W. A. Barnett, county judge of Okmulgee County, as soon as it was called to his attention that the estate was being dissipated ordered the trust company to file a report, which it refused to do, and it was promptly removed and ordered to file its final report, new administrators being appointed; on a hearing on final report showing disposition of the \$108,000 in cash and bonds Judge Barnett surcharged the trust company with \$92,000 of the \$108,000, and directed the guardians of Jane Bruner, who were also the new administrators of the estate of Richmond Bruner, to proceed against the trust company for the \$92,000, and also for cancellation of the deed to the 40 acres taken by the managing officer of that company. Mr. George M. Swift was employed by the guardians and administrators, and has been successful in recovering the 40-acre tract and about \$31,000 in cash for Jane Bruner, the trust company being bankrupt could not be made to restore the entire amount.

This case is mentioned for the purpose of showing with what wonderful skill and ability and with what zealousness the present Commissioner of Indian Affairs guards the interest of funds of Indians under his care. Had he turned over the estate of Richmond Bruner to the duly appointed special administrators as required by law, who were under \$100,000 bond, this estate would never have been squandered, but he refused to do so; but when application was made by a Muskogee concern, without investigating the responsibility of that concern, he promptly turned the estate over.

The Indian Department did, however, graciously permit the special administrators to indorse a check to T. Ed Williams, undertaker, Muskogee, Okla., in the sum of \$1,469, "funeral expenses of Richmond Bruner," which included, among other items, "flowers, \$50." More generous to Richmond in death than in life, as seems to be the general custom of the department.

During his life Richmond was under guardianship as an incompetent, and supposedly, under the law, his estate was under the dual supervision of the Indian Department and the probate court, but in this case, as in many others, the present Commissioner of Indian Affairs usurped the powers of the courts of Oklahoma and administered the estate to suit himself without any order of court and in direct violation of the act of Congress of May 27, 1908, and various other acts of Congress relating to the estates of minors and incompetents.

Respectfully submitted this 29th day of November, 1924.

HUGH MURPHY,

Former County Judge, Okmulgee County, Okla.

Names and addresses of witnesses who may be summoned who will testify as to the facts herein related:

Martha and Sabar Jackson cases; George M. Swift, attorney, Okmulgee, Okla.; W. W. Pryor, attorney, Holdenville, Okla.; Conrad H. Syme, attorney, Washington, D. C.; James W. Bellar, attorney, Washington, D. C.; Owen C. Becker, attorney, Oneonta, N. Y.; R. S. Cate, attorney, Muskogee, Okla.

Jackson Barnett case: Carl J. O'Hornett, guardian, Henryetta, Okla.; C. B. McCrory, attorney, Okmulgee, Okla.; W. A. Barnett, county judge, Okmulgee, Okla.; George M. Swift, attorney, Okmulgee, Okla.

Richmond Bruner case: George M. Swift, attorney, Okmulgee, Okla.; Howard Keaton, attorney, Okmulgee, Okla.; Ephram H. Foster, attorney, Okmulgee, Okla.

STATE OF OKLAHOMA,
Okmulgee County, ss:

Hugh Murphy, of lawful age, being first duly sworn, upon his oath states: That the matters and things herein above set out are true, except as to those stated upon information and belief, and that as to those he believes them to be true.

HUGH MURPHY.

Subscribed and sworn to before me this the 29th day of November, 1924.

[SEAL.]

ABLINE BOLT,
Notary Public.

My commission expires May 16, 1928.

Mr. BUCHANAN. Mr. Chairman, I yield 20 minutes to the gentleman from Washington [Mr. HILL].

Mr. HILL of Washington. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the Record.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to revise and extend his remarks in the Record. Is there objection? [After a pause.] The Chair hears none.

Mr. HILL of Washington. Mr. Chairman, there was passed at the first session of the Sixty-eighth Congress the act of June 7, 1924. The act is as follows:

An act to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to pay to Stevens and Ferry Counties, in the State of Washington, as taxes claimed by said counties under section 2 of the act of July 1, 1892, relating to the payment of local taxes on allotted Colville Indian lands, the following sums, to wit: To Stevens County, \$44,309.67; to Ferry County, \$71,458: *Provided*, That there may be deducted from said amounts by the Secretary of the Interior such sum or sums as he may find have been paid to said counties for Indian tuition; also the excess, if any, where the rate based on the value of Indian allotments may be found to be in excess of the rate on taxable land.

Sec. 2. That there is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated \$115,767.67, or so much thereof as may be necessary, for the payment of said sums to said counties, as provided in the foregoing section.

This act was initiated by H. R. 1414 and is a mandate to the Secretary of the Interior to pay to the counties named the amounts of money therein designated, subject to deductions therefrom of such sums as he may find have been paid to said counties for Indian tuition and subject to deductions also for the excess, if any, where the rate based on the value of Indian allotments may be found to be in excess of the rate on taxable lands. Furthermore, the act authorizes the appropriation, out of any money in the Treasury not otherwise appropriated, for the payment of said amounts to said counties.

In keeping with the provisions of the act in question, the Secretary of the Interior included said items in the estimates for 1926 for his department to the Director of the Budget, and said items were approved by said director, as appears on page 395 in the message of the President of the United States transmitting the Budget for the service of the fiscal year ending June 30, 1926.

However, the Subcommittee on Appropriations having in charge the framing and presenting of the appropriation bill for the Department of the Interior at the present session of Congress omitted the items from said bill and refused to include them therein for the reason stated as follows on page 3 of its report on said bill, to wit:

An item of \$115,767.67 estimated for payment of taxes to counties in the State of Washington is not recommended, as a precedent would be established by such payment that might hereafter be held to justify many millions in similar payments in many States.

Also, on page 83 of the CONGRESSIONAL RECORD of December 3, 1924, the chairman of said subcommittee, Mr. CRAMTON, in his remarks relative to the items in question, after quoting as the authority therefor the said act of June 7, 1924, said:

The report on that bill in the House carried this letter from the Secretary of the Interior:

DEPARTMENT OF THE INTERIOR,
Washington, February 5, 1924.

Hon. HOMER P. SNYDER,
Chairman Committee on Indian Affairs,
House of Representatives.

DEAR MR. SNYDER: The receipt is acknowledged of your request dated January 9, 1924, for report on H. R. 1414, Sixty-eighth Congress, first session, entitled "A bill to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes."

The claims of Stevens and Ferry Counties are based upon section 2 of the act of July 1, 1892 (27 Stat. 62), and no objection will be made to the enactment of H. R. 1414 into law.

The provisions of the bill are identical with H. R. 5418, Sixty-seventh Congress, first session, a favorable report upon which was made to your committee on May 16, 1921, in which reference was made to a report dated December 6, 1920, to the President of the Senate on paragraph 22 of the Indian appropriation act approved February 14, 1920 (41 Stat. 408, 432). These reports contain in full the reasons for favorable action.

Very truly yours,

HUBERT WORK.

The statement of the department that the claims were based on the act of 1892 would naturally disarm opposition to the bill. But investigation in our hearings developed that the act of July 1, 1892, provided:

"Sec. 2. * * * set apart in the Treasury of the United States for the time being, but subject to such future appropriation for public use as Congress may make, and that until so otherwise appropriated

may be subject to expenditure by the Secretary of the Interior from time to time, in such amounts as he shall deem best, in the building of schoolhouses, the maintenance of schools for such Indians, for the payment of such part of the local taxation as may be properly applied to the lands allotted to such Indians, as he shall think fit, so long as such allotted lands shall be held in trust and exempt from taxation, and in such other ways as he may deem proper for the promotion of education, civilization, and self-support among said Indians."

That is to say, it authorized these payments in lieu of taxes from the tribal funds, if sufficient was available. The act of June 7, 1924, provides for payment from public funds.

In the first place, the act of 1924 provides for \$115,767.67 to be paid, less the amount that has been paid for tuition of Indian children in the public schools in those counties. After inquiry we learned that the tuition amounted to \$26,000 and more, and the payment to the counties would need to be reduced accordingly. Further, the act of 1924 required that it should be ascertained that the rate of taxation that would be applied on these Indian lands was not to be at a higher rate than on other lands.

But there have been no steps taken to bring about the ascertainment of the truth as to that, so that in any event we are not ready to act upon this particular item. In the hearings Mr. Meritt said:

"Referring to the inquiry about the report of the official who made the investigation regarding the claims of Stevens and Ferry Counties, in the State of Washington, you are advised that our records show that this report was transmitted to the Secretary of the Senate under date of December 6, 1920, and this report has not been returned to the files of this office. Careful investigation of the records of the Indian office show that there has been expended for tuition of Indian children in Ferry County \$18,263.37, and for tuition of Indian children in Stevens County \$6,083.93. We have no information about 'the rate based on the value of Indian allotments may be found to be in excess of the rate on taxable land.' Any further information available from the files of this office desired by the committee will be gladly furnished."

But there is more involved in this than that. The act of 1892, as I have said, authorized the payment of these moneys in lieu of taxes out of the funds of the Indians received from their sale of the ceded portion of the reservation. But the act of 1924, which it was said was to carry into effect the act of 1892, concerns a payment out of the Treasury and not out of the funds of the Indians.

To make this appropriation of \$115,000, as authorized by the act of 1924, would be a precedent that if carried out logically would involve the Treasury in the expenditure of hundreds of millions of dollars, because there are probably a thousand counties in the West that are fully as much entitled to such recognition from the Treasury as are those two counties, as far as payment from public funds is concerned. And so the committee have eliminated that item from the bill.

On December 5, 1924, when the said appropriation bill was being considered in Committee of the Whole House, I offered an amendment thereto, in reference to which the following colloquy and proceedings occurred as shown on pages 197 and 198 of the CONGRESSIONAL RECORD of December 5, 1924:

Mr. HILL of Washington. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Washington offers an amendment, which the Clerk will report.

The Clerk read as follows:

"Amendment offered by Mr. HILL of Washington: On page 20, between lines 17 and 18, insert: 'For payment of certain local taxes to the counties of Stevens and Ferry, in the State of Washington, on allotted Colville Indian lands, as provided by the act of June 7, 1924, \$91,470.33.'"

Mr. CRAMTON. Mr. Chairman, I reserve a point of order against the amendment. I will say, in order to save time and dispose of the point of order, that I note the gentleman has cut the amount some \$25,000 or \$26,000 from what was estimated by the Budget. I would assume he is deducting the amount that has been paid as tuition for Indian children in the schools of those counties.

Mr. HILL of Washington. Will the gentleman yield?

Mr. CRAMTON. Yes. I am asking that of the gentleman.

Mr. HILL of Washington. Yes. I take from the chairman's speech on Wednesday of this week the figures included there, as given him by the Bureau of Indian Affairs, as being the amount of tuition paid to these counties, Ferry and Stevens, respectively, and I have deducted the total of those two items.

Mr. CRAMTON. Has the gentleman information as to whether the other condition precedent of the act of 1924 has also been complied with? Has it been determined that the rate of tax that would be accomplished by this payment to those counties is no higher than similar property in white ownership is now paying and has paid?

Mr. HILL of Washington. I will say to the gentleman that in the hearings before the subcommittee there were submitted unofficially made-up tax rolls to embrace the allotted lands in these two counties involved in that particular bill, employing the same rates as the offi-

dinal rates of tax levy for the years covered in the claims. This was made in the respective counties and based on valuations of lands in the same localities and of similar character to the allotted lands, and I want to refer the gentleman further to a statement included in the report of the inspector who made the investigation in the field and reported back the result of his investigation to the Secretary of the Interior in the following language:

"The sources of evidence used by me indicated that the amounts placed upon the Indian lands are just if the assessments against the white lands are just."

I will say to the gentleman that when the committee that heard this matter—the subcommittee of the Committee on Indian Affairs, at the last session of Congress, when the bill to authorize this payment was under consideration—was holding hearings thereon these documents were submitted to the subcommittee for inspection; that is, the official tax rates were taken and the values were placed on a parity with similar lands in the localities where the allotted lands were situated.

Mr. CRAMTON. Mr. Chairman, I will make the point of order in the interest of economy of time, and the point of order is this: There is no law authorizing the expenditure that is proposed in the amendment offered by the gentleman from Washington except the act of June 7, 1924. The act of June 7, 1924, provides:

"That the Secretary of the Interior be, and he is hereby, authorized and directed to make certain payments: *Provided*, That there may be deducted from said amounts by the Secretary of the Interior such sum or sums as he may find have been paid to said counties for Indian tuition; also the excess, if any, after the rate based on the value of Indian allotments may be found to be in excess of the rate on taxable lands."

The statute governing this matter does not authorize necessarily the appropriation of \$115,000. It contemplates a reduction of that amount by two items—first, the amount of Indian school tuition heretofore paid in those counties, and second, deduction of any excess involved in a higher rate of taxes being applied to these Indian lands than to similar white lands. The hearings disclose the fact that the Secretary of the Interior has not since June or since this law became effective made any examination of the question as to the tax rates. As to the matter of the payment of tuition, the records are in his office, and as I understand it is covered by the deduction that the gentleman from Washington has made, and I do not raise any question as to that; but as to the tax rates, an obligation is placed on the Secretary to make that investigation. The investigation has not been made by the Secretary under the statute. The only appropriation we are authorized to make is an appropriation subject to such reduction as the Secretary of the Interior would find necessary under that provision of the act of 1924, but the amendment before us proposes a flat appropriation of some \$90,000 and disregards that provision of the statute.

Mr. WINGO. Will the gentleman yield for a question?

Mr. CRAMTON. In a moment. I want to make this one suggestion first: If the gentleman desires to include authority to the Secretary to do as the act of 1924 authorized, then I do not think it would be subject to a point of order, and I would not desire to make a point of order.

Mr. HILL of Washington. I will be very glad to have that inserted; in fact, that was my understanding of the authority already given by the act of 1924.

Mr. CRAMTON. Yes; the authority is given by the act of 1924, but not preserved in the gentleman's amendment. The gentleman's amendment disposes of that matter. If the gentleman desires to add a proviso providing that the Secretary of the Interior shall deduct from such payment such excess, if any, as shall result from the rate based on the value of the Indian allotments above the rate based on taxable land, such an amendment would not be subject to a point of order, and I have no desire to be overtechnical or prevent the gentleman having a hearing.

Mr. HILL of Washington. I will be very glad to ask for a modification of the amendment in order to embrace that.

Mr. CRAMTON. Then, Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. Does the gentleman from Washington desire to modify his amendment?

Mr. HILL of Washington. Yes, Mr. Chairman, I desire to modify my amendment to embrace the proviso in the language suggested by the chairman of the committee.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to modify his amendment in the manner indicated, and without objection the amendment will be made and the Clerk will report the amendment as modified.

There was no objection.

Mr. WINGO. Will the gentleman from Michigan yield for a suggestion?

Mr. CRAMTON. Certainly.

Mr. WINGO. May I direct the gentleman's attention to the fact that the reference to the act in the amendment in question says "as pro-

vided by that act"? I suggest instead of having a proviso, if after the figures "91,000" there is inserted "or so much thereof as may be necessary," you will have your limitation beyond any question. The gentleman's amendment does not say "as authorized by," but "as provided by."

Mr. CRAMTON. I am not sure how it would be construed if the gentleman's amendment put that in as a reference to the authorization for the appropriation. I am not sure it would be construed to carry with it the restrictions of the original provision. I am sure that this would reach the matter.

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

"Amendment offered by Mr. HILL of Washington: On page 20, between lines 17 and 18, insert:

"For payment of certain local taxes to the counties of Stevens and Ferry, in the State of Washington, on allotted Colville Indian lands, as provided by the act of June 7, 1924, \$91,470.33: *Provided*, That from such sums the Secretary of the Interior shall deduct an amount to equal the excess, if any, in the rate based on the value of Indian allotments as compared with the rate on taxable lands."

On a vote on the proposed amendment it was rejected, and as the said appropriation bill now stands it carries no provision for an appropriation for the payment of said items to said counties.

I feel very strongly that the omission to provide an appropriation for the payment of these claims to Stevens and Ferry Counties, in my State, is a grave injustice. I am convinced that the subcommittee having the said appropriation bill in charge reached an immature conclusion as to the merits of the claims in question and as to the legal and equitable obligations underlying them, even if it should be conceded that it is within the province of the committee to go into such matters. The act of June 7, 1924, directs the payment of said claims and authorizes an appropriation of public money for that purpose. Generally speaking, an appropriation committee does not assume the responsibility of disregarding the provisions of an act of Congress in determining whether or not an appropriation for a specific purpose therein authorized should be made. But the subcommittee in this instance departed from the usual course, and while recognizing the existence of the act of June 7, 1924, and not questioning its validity, wholly disregarded its mandate and its provisions and refused to operate under it for the reasons to which I have heretofore referred.

The reasons assigned by the subcommittee for its refusal to include in the Department of the Interior appropriation bill the items for the payment of the claims of Stevens and Ferry Counties are as follows:

1. That section 2 of the act of July 1, 1892, authorized payments in lieu of taxes from the tribal funds of the Colville Indians.

2. The act of June 7, 1924, provides for payment from public funds in the Treasury.

3. To make the appropriation as authorized by the act of June 7, 1924, would establish a precedent that might involve the Treasury in the expenditure of many millions of dollars for the payment of other similar claims.

There were at first two other objections urged by the chairman of the subcommittee against including in said appropriation bill the items in question, but they were overcome and eliminated by the form of the proposed amendment which I offered.

The position taken by the subcommittee in excluding the items in question from the said appropriation bill is not tenable, as I shall endeavor to show.

The Colville Indian Reservation is in the State of Washington and was established by Executive order in 1872. In 1890 an act of Congress was passed authorizing the President of the United States to appoint a commission to negotiate with the Colville Indians for the cession of such portion of said reservation as said Indians may be willing to dispose of that the same may be open to white settlement.

Such a commission was appointed by the President and it negotiated an agreement with the Colville Indians on May 9, 1891, whereby, in consideration of \$1,500,000 to be distributed to them per capita in five equal annual installments, the said Indians agreed to cede and relinquish to the United States all their right, title, and interest in and to what is usually called the north half of the Colville Indian Reservation, containing approximately one and one-half million acres of land, reserving to the Indians resident upon such ceded portion the right to select and hold individual 80-acre allotments therein, exempt, within the limitations prescribed by law, from taxation for any purpose. It was provided in said agreement that it should go into effect from and after it was approved by Congress.

On January 6, 1892, the President transmitted said agreement to Congress, but Congress took no action toward approving the agreement until June 21, 1906, 15 years afterwards.

However, by the act of July 1, 1892, Congress did take action with reference to the north half of the Colville Indian Reservation. In this connection I shall quote from Twenty-first Decisions of the Comptroller of the Treasury, page 765, as follows:

The record indicates that after holding the report six months Congress took by the said act of July 2, 1892, without consideration or compensation to the Indians, what a previous Congress had sought to secure by cession from the Indians through agreement, ignoring both the substance and fact of the agreement except in so far as it seemed expedient to copy in part, without credit, the dictum of the agreement in the statute enacted. The Fifty-ninth Congress appears to have taken a different view, and in the act of June 21, 1906, supra, ratified in part, or carried into effect in part, the said agreement by authorizing the setting aside of \$1,500,000 in the Treasury as compensation to the Indians in full for approximately 1,500,000 acres of land proposed by said agreement to be ceded to the United States by the Indians, but taken by the said act of July 1, 1892, and restored to the public domain without compensation to the Indians.

By the act of July 1, 1892 (27 Stat. L. 62), subject to reservations and allotment of lands to the individual members of the Colville Indians, the north half of the Colville Indian Reservation, containing approximately one and one-half million acres of land, was "vacated and restored to the public domain, notwithstanding any Executive order or other proceeding whereby the same was set apart as a reservation for any Indians or bands of Indians," and was made subject by proclamation of the President to settlement and entry under the general laws applicable to the disposition of public lands in the State of Washington.

Section 3 of said act provided that an entryman of said land under the homestead laws shall pay \$1.50 an acre for the land so taken in addition to the usual land-office fees.

Section 8 of the said act provides—

That nothing herein contained shall be construed as recognizing title or ownership of said Indians to any part of the said Colville Reservation, whether that hereby restored to the public domain or that still reserved by the Government for their use and occupancy.

Section 2 of said act is as follows:

That the net proceeds arising from the sale and disposition of the lands to be so opened to entry and settlement shall be set apart in the Treasury of the United States for the time being, but subject to such future appropriation for public use as Congress may make, and that until so otherwise appropriated may be subject to expenditure by the Secretary of the Interior from time to time, in such amounts as he shall deem best, in the building of schoolhouses, the maintenance of schools for such Indians, for the payment of such part of the local taxation as may be properly applied to the lands allotted to such Indians, as he shall think fit, so long as such allotted lands shall be held in trust and exempt from taxation, and in such other ways as he may deem proper for the promotion of education, civilization, and self-support among the Indians.

The claims of Stevens and Ferry Counties, in the State of Washington, are based on section 2 of the said act of 1892 and the act of June 7, 1924, directing the payment of said claims and authorizing an appropriation for that purpose is based on said section 2.

Section 2, analyzed, stands out as follows:

1. It directs that the net proceeds arising from the sale and disposition of the lands to be so opened to entry and settlement be set apart in the Treasury of the United States for the time being.

2. It makes such net proceeds subject to such future appropriation for public use as Congress may make.

3. Until so otherwise appropriated it makes such net proceeds subject to expenditure by the Secretary of the Interior, (a) in the building of schoolhouses, the maintenance of schools for such Indians, and in such other ways as he may deem proper for the promotion of education, civilization, and self-support among the Indians; and (b) for the payment of such part of the local taxation as may be properly applied to the lands allotted to such Indians, as he shall think fit, so long as such allotted lands shall be held in trust and exempt from taxation.

The language of said section 2 is plain and unambiguous and it unquestionably authorizes the payment of taxes on Indian allotments out of the said net proceeds set apart in the Treasury of the United States. This is an unusual provision. The act of July 1, 1892, stands alone in the matter of carrying such a provision—no other act of Congress provides for the

payment of taxes on lands allotted to Indians during the period within which such lands are exempt from taxation.

The query arises, why was such a provision embodied in the act of July 1, 1892, and also, whose money is to be used in paying such taxes? The allotted lands were exempt from taxation during the trust period. In fact, the authority to pay such taxes is limited to such allotted lands as are held in trust and exempt from taxation.

The Indians can not be compelled to pay taxes on tax-exempt lands, but if tribal or Indian funds are made available for paying taxes on tax-exempt lands of the Indians, the exemption provision is thereby nullified. The situation is the same whether the Indians are themselves forced to pay taxes on their tax-exempt lands or the Government pays such taxes for them out of the Indians' money.

The net proceeds of the sale and disposition of lands opened to entry and settlement in the north half of the Colville Reservation and out of which the payment of taxes on tax-exempt Indian allotments was authorized by section 2 of the act of July 1, 1892, to be paid was the money of the United States Government and was not tribal funds or money belonging to the Indians. Had it not been the Government's money Congress would have had no power to make other appropriations of it for public use.

By the act of 1892 Congress did not buy the north half of the Colville Indian Reservation or restore it to the public domain pursuant to agreement with the Indians, but by such act Congress vacated the Executive order establishing such reservation in so far as the north half thereof was concerned and by sheer force of its own edict took it and restored it to the public domain, affirmatively disclaiming recognition of any rights in the Indians either to the part of the reservation taken or the part "still reserved by the Government for their use and occupancy."

By the act of July 1, 1892, Congress did not authorize the payment of any money to the Indians per capita or otherwise; but from certain funds of the Government set apart in the Treasury it authorized the payment of money for the promotion of education, civilization, and self-support among them, and also for the payment of taxes on their tax-exempt lands.

The Indians did not come into the ownership of any money, tribal or otherwise, in consequence of the restoration to the public domain of the north half of the Colville Reservation until after the act of June 21, 1906, was passed authorizing the payment and distribution to them per capita of \$1,500,000 in full consideration of their rights in said lands so restored. This had no connection with the net proceeds arising from sales and disposition of lands set apart in the Treasury under the provisions of section 2 of the act of July 1, 1892, and should not be confused with it. The act of 1892 gave the Secretary of the Interior no authority to pay taxes on Indian lands out of the one and one-half million dollars authorized to be paid to the Indians by the act of June 21, 1906. That money belonged to the Indians and was paid to them. Stevens and Ferry Counties had no interest in that money and would not be entitled to have their claims paid out of it, even if it were all in the Treasury to the credit of the Indians. Congress authorized the payment of taxes on tax-exempt lands allotted to the Indians out of the moneys of the Government directed to be set apart in the Treasury under the provisions of section 2 of the act of July 1, 1892. Hence the contention of the chairman of the subcommittee [Mr. Cramton] that such taxes were payable out of tribal or Indian funds can not be sustained.

This disposes of the first objection of the subcommittee to the inclusion of the items for Stevens and Ferry Counties in the appropriation bill as proposed in my amendment.

The second objection urged against the amendment I offered to the appropriation bill was that the act of June 7, 1924, provides for payment from public funds in the Treasury.

I admit the statement of fact, but do not admit the conclusion that such fact constitutes a ground for rejecting my proposed amendment. Section 2 of the act of July 1, 1892, authorizes the payment of taxes on tax-exempt Indian allotments from public funds arising as the net proceeds of sales under the provisions of said act of 1892. These public funds were set apart in the Treasury under the provisions of section 2 of the act of July 1, 1892, and must remain "set apart" in the Treasury "subject to such future appropriation for public use as Congress may make." Congress has never made any appropriation of said funds for any other purpose, and hence in legal contemplation the fund is still "set apart" in the Treasury because it requires an act of Congress appropriating it to some other public use to change its legal status of "set apart." However, under a decision of the Comptroller of the Treasury,

entered April 27, 1915 (21 Comp. Dec. 758), I am advised that said fund is not now "set apart" on the books in the Treasury and credited to net proceeds arising from the sale and disposition of land in the north half of the Colville Indian Reservation, but that since some time in 1915 it has been credited in the Treasury as public funds under the heading, "Sale of public lands."

To ascertain the status and amount of this fund at this time I requested such information from the Commissioner of Indian Affairs and received from him the following letter:

MY DEAR MR. HILL: Referring to your informal inquiry this date regarding the amount of the special fund credited to the Colville Indians on account of the disposal of lands within the north half of the Colville Reservation in the State of Washington, prior to the act of June 21, 1906 (34 Stats. L. 377), and the disposition made thereof, the records of the office show a total receipt of \$122,034.37 carried under the title, "Proceeds of Colville Reservation, Wash."

From this amount there was expended for beneficial purposes, including purchase of cattle, \$63,795.43 reimbursed to the United States on account of the expenditures from reimbursable appropriations for surveying and allotting work on the Colville Reservation, \$54,518.91, and repaid to purchasers on account of the lands erroneously sold, \$2,422.72, or a total of \$120,737.06, leaving a balance in the Treasury this date of \$1,297.31.

Regarding your inquiry as to the receipts credited subsequent to the act of June 21, 1906, supra, and the disposal thereof, a report from the Commissioner of the General Land Office submitted August 27, 1915, shows that the aggregate receipts from June 21, 1906, to August 20, 1915, amounted to \$273,448.94. From this amount there was repaid to purchasers on account of lands erroneously sold the sum of \$7,858.07, and the balance, namely, \$265,590.87, credited in the Treasury of the United States as public funds under the heading "Sale of public lands." Reference thereto may be made by auditor's certificate No. 47412, dated December 29, 1915.

As you are probably aware, the records showing the sale of public lands are under control of the Commissioner of the General Land Office; consequently this office has no record of receipts other than as herein stated, to and including April 30, 1915.

Cordially yours,

CHAS. H. BURKE, Commissioner.

According to the information conveyed in the commissioner's letter there was in said fund on April 20, 1915, presumably about the time the account was discontinued as a separate fund, the total amount of \$266,888.18.

I make no distinction between the moneys accruing to the "net proceeds" fund under section 2 of the act of July 1, 1892, prior to June 21, 1906, and such accruals subsequent to said last-named date, because the law makes no such distinction. Consequently there is an ample portion of the public fund in the Treasury, derived exclusively from the said "net proceeds" fund of section 2 of the act of July 1, 1892, out of which the appropriation authorized by the act of June 7, 1924, to pay the Stevens and Ferry County claims can and should be made.

This disposes of the second objection to my proposed amendment to said appropriation bill.

The third and last objection raised by the chairman of the subcommittee to my proposed amendment is that to make the appropriation for the payment of the claims of Stevens and Ferry Counties would set a precedent that might lead to an expenditure of many millions of dollars in the payment of similar claims.

I have heretofore shown the impossibility of such result. No act in the legislative history of this Government other than that of July 1, 1892, contains a provision for payment by the Government of taxes on tax-exempt Indian lands. Hence there exists no basis upon which to found such claims or such fears.

Why was the provision for the payment of taxes on tax-exempt Indian lands embodied in the act of July 1, 1892?

Congress was no doubt advised of the rough, rugged, mountainous, and isolated character of the north half of the Colville Indian Reservation when it passed the act of July 1, 1892, restoring it to the public domain. It was evident that after the Indians had selected their allotments very little land suitable to agriculture would remain and that the situation would not present an attractive prospect to white settlers. The country was almost inaccessible except by trails; there were no roads, no bridges over the rapid and dangerous streams, no mail facilities, no schoolhouses, no neighbors except semi-civilized Indians, none of the advantages of civilization were present. There were no taxable lands and very little, if any, personal property to yield taxes for the support of the local government and for the building of roads, bridges, and schoolhouses, and for the maintenance of schools.

The agricultural lands were confined almost wholly to the narrow valleys of the mountain streams and these were occupied by the Indians, and in addition to the unattractive conditions just described entrymen of the said lands were required to pay \$1.50 an acre for the lands taken by them in addition to the usual land office fees, instead of having the right of free homesteads. It was not until 1903 that the lands in question were put in the class of free homesteads.

It was therefore necessary or at least advisable that some inducement out of the ordinary be held out to draw settlers to these inferior and isolated lands where the burdens of local government and the reclamation of the country from its wild and uncivilized state would bear heavily upon such settlers.

Hence the Government, as an inducement to white settlers to enter said lands, departed from its customary course in such matters and authorized the payment out of Government money of local taxes on tax-exempt Indian lands as an aid to the maintenance of the local government and the development of the country.

The Secretary of the Interior on May 16, 1921, in a report on the claims of Stevens and Ferry Counties, said:

The investigation made by the department revealed conditions in Stevens and Ferry Counties different from those surrounding any other Indian reservations or allotments, and it is believed that the facts justify a settlement of the claims.

In the same report the Secretary of the Interior said that by the terms of the act the Government encouraged settlement upon the ceded lands. And in a report by the Secretary of the Interior on December 6, 1920, referring to the provision for payment of taxes, it is said:

This departure from long-established custom, in view of the exemption from taxation of Indian allotments while held in trust by the United States, had the effect of encouraging entries upon the land opened to settlement.

Touching the question as to the reason for embodying in the act of July 1, 1892, the provision for payment out of Government moneys taxes on tax-exempt Indian lands, I desire to quote from the argument of Mr. James I. Parker, an attorney at law of Washington, D. C., before the subcommittee on Indian Affairs, at the hearings on these claims of Stevens and Ferry Counties, as follows:

There was a reason for that "departure." The topography of Stevens County is rugged and very broken; high rocky hills and mountains, deep canyons and gulches are the rule. Large areas are not suitable for any purpose. The good agricultural lands are along the larger and smaller streams. The Indian allotments in Stevens County are located in a triangle bounded by Canada, the Kettle and Columbia Rivers. The best lands of this section were allotted to the Indians, thus leaving those of less value and the waste lands open to homesteaders.

It is hard to conceive as rough a section as Ferry County inhabited by people. Seven-eighths of the entire area is mountainous, broken, and rugged. One-eighth is occupied by narrow valleys which run along the rivers and small streams. These valleys rarely have any great length, and it was in such localities that the Indians received their allotments in this county. The allotting commission had difficulty in securing sufficient agricultural land to satisfy the demands of the allottees. Extreme care, of course, was given to the selection of the allotments, and when this was completed the Indians had the cream of the surface.

About 200 of those allotments, averaging approximately 80 acres each, were in Stevens County and about 220 were in Ferry County. Congress was fully advised of the character and topography of those restored lands. Is it not reasonable to assume that, knowing that the choicest lands would be allotted to the Indians, Congress appreciated the fact that when the unallotted lands were opened to settlement and entry—which opening did not occur until October 10, 1900, more than eight years after the passage of the act of July 1, 1892, supra—they would not present a very attractive proposition to the prospective homesteaders; that in that sparsely settled country, so rugged in character, the settler would have to face difficulties, discouragements, and obstacles almost insuperable to establish a home and maintain himself and family; that under the conditions there existing it would be inequitable and unjust to put upon those homesteaders the entire burden of the local government, of building roads and bridges and schoolhouses and other public improvements from which the Indian allottees would derive as much benefit as the homesteader, and that therefore it departed from the usual rule in such cases and provided that the Indian allotments might bear their proportionate part of the burden of local taxation?

That was the situation and those the conditions which, it is believed, caused the "departure" which the Secretary of the Interior says had the effect of "encouraging entries" on the lands then opened to settlement.

The "encouragement" to settlers which that "departure" caused became stronger after the act of February 7, 1903 (32 Stat. 803). That act, in response to the free-homestead sentiment then sweeping over the public-land States, amended the act of July 1, 1892, supra, by eliminating the \$1.50 per acre which entrymen were required to pay for said lands and made them a free-homestead proposition, except where the entryman commuted his entry, in which event he was required to pay the \$1.50 per acre. Otherwise, the only payment required was the usual land-office fees. It will readily be seen that when coupled with a free-homestead proposition the "encouragement" to settlers which that "departure" caused was tremendously strengthened.

The favorable recommendation of the Secretary of the Interior on December 6, 1920, was largely based on "the fact that by the terms of the act" (July 1, 1892, supra) "the Government encouraged settlement upon the ceded lands."

That statement was quoted by the Secretary of the Interior in and made a part of his favorable report of May 16, 1921. That report of May 16, 1921, says, referring to the report of the Indian Inspector who made the field investigation of the claims:

"His report and recital of facts . . . indicated . . . that the provision in the act of 1892 with regard to payments was an inducement to settle on the lands."

These claims are just, equitable, and legal and should be paid, and provision for such payment should be made in said appropriation bill. My proposed amendment to said bill should have been adopted.

These claims have been thoroughly investigated by the Department of the Interior and have been approved by three different Secretaries of the Interior. They have been twice approved by the Senate Committee on Indian Affairs and twice passed by the Senate; they have been approved by the House Committee on Indian Affairs and passed by the House. An appropriation therefor was approved by the Director of the Budget and should be approved by this House.

I here refer to the reports of the Department of the Interior touching these claims, of date February 5, 1924, May 16, 1921, and December 6, 1920, respectively, and hereby incorporate them in my remarks:

DEPARTMENT OF THE INTERIOR,
Washington, February 5, 1924.

HON. HOMER P. SNYDER,
Chairman Committee on Indian Affairs,
House of Representatives.

MY DEAR MR. SNYDER: The receipt is acknowledged of your request dated January 2, 1924, for report on H. R. 1414, Sixty-eighth Congress, first session, entitled "A bill to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes."

The claims of Stevens and Ferry Counties are based upon section 2 of the act of July 1, 1892 (27 Stat. L. 62), and no objection will be made to the enactment of H. R. 1414 into law.

The provisions of the bill are identical with H. R. 5418, Sixty-seventh Congress, first session, a favorable report upon which was made to your committee on May 16, 1921, in which reference was made to a report dated December 6, 1920, to the President of the Senate on paragraph 22 of the Indian appropriation act approved February 14, 1920 (41 Stat. L. 408, 432). These reports contain in full the reasons for favorable action.

Very truly yours,

HUBERT WORK.

The reports referred to in the Secretary's communication are as follows:

DEPARTMENT OF THE INTERIOR,
Washington, May 16, 1921.

HON. HOMER P. SNYDER,
Chairman Committee on Indian Affairs,
House of Representatives.

MY DEAR MR. SNYDER: I have the honor to refer further to your letter of April 27, 1921, inclosing and requesting a report on H. R. 5418, Sixty-seventh Congress, first session, entitled "A bill to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes." This bill is identical with S. 1168, introduced on the same date.

The claims of Stevens and Ferry Counties are based on the act of July 1, 1892 (27 Stat. L. 62), which act provided that the net proceeds arising from the sale of the north half of the Colville Reservation, in these counties, containing approximately 1,500,000 acres of land, ceded by the Indians and restored to the public domain, should be—

"Sec. 2. . . . set apart in the Treasury of the United States for the time being, but subject to such further appropriation for public use as Congress may make, and that until so otherwise appropriated may be subject to expenditure by the Secretary of the Interior from time to time in such amounts as he shall deem best in the building of schoolhouses, the maintenance of schools for such Indians, for the payment of such part of the local taxation as may be properly applied to

the lands allotted to such Indians, as he shall think fit, so long as such allotted lands shall be held in trust and exempt from taxation, and in such other ways as he may deem proper for the promotion of education, civilization, and self-support among said Indians."

The ceded land was opened to homestead entry on October 10, 1900, by presidential proclamation of April 10, 1900.

The act of 1892 provided that in addition to the fees required by law each homestead settler should pay \$1.50 per acre. This act was amended by the act of February 7, 1903 (32 Stat. L. 803), which provided that settlers under the homestead laws who resided upon the tracts entered in good faith for the period required by existing law should be entitled to patents without any payment other than the customary fees—

"Provided, That the right to commute any such entry and pay for said lands in the option of any such settler and in the time and at the prices now fixed by existing laws shall remain in full force and effect: Provided, however, That all sums of money so released which if not released would belong to any Indian tribe shall be paid to such Indian tribe by the United States, and that in the event that the proceeds of the annual sales of the public lands shall not be sufficient to meet the payments heretofore provided for agricultural colleges and experimental stations by an act of Congress approved August 30, 1890, for the more complete endowment and support of the colleges for the benefit of agricultural and mechanic arts established under the provisions of an act of Congress approved July 2, 1862, such deficiency shall be paid by the United States: And provided further, That no lands shall be herein included on which the United States Government had made valuable improvements, or lands that have been sold at public auction by said Government."

Payment for the land ceded was made under authority of the act of June 21, 1906 (34 Stat. L. 377), which provided that—

" . . . There shall be set aside and held in the Treasury of the United States for the use and benefit of said Indians, which shall at all times be subject to the appropriation of Congress and payment to said Indians, in full payment for 1,500,000 acres of land opened to settlement by the act of Congress 'To provide for the opening of a part of the Colville Reservation, in the State of Washington, and for other purposes,' approved July 1, 1892, the sum of \$1,500,000." . . .

Claims by Stevens and Ferry Counties were first filed in 1915, but were disallowed, without a decision on their merits, for the reason that the money had been appropriated and expended on behalf of the Indians.

In a report dated January 23, 1920, on S. 617, Sixty-sixth Congress, first session, authorizing and directing the Secretary of the Interior to determine what taxes, if any, were due, and making appropriation for payment, this department expressed the belief that he already had authority to make the investigation directed in section 1 of the bill, but had no objection to its enactment.

The Indian appropriation act of February 14, 1920 (Public 141, 66th Cong., 2d sess.), contained the following paragraph:

"The Secretary of the Interior is authorized and directed to investigate and report to Congress, on or before the first Monday of December, 1920, as to the right of Stevens and Ferry Counties, in the State of Washington, to the payment of taxes on allotted Indian lands under existing law, and to state the amount, if any, to which each of said counties is entitled."

In accordance with the above provision an Indian Office Inspector made a thorough investigation of conditions on the north half of the Colville Reservation, visiting all accessible parts of the same. His report and recital of facts in connection with improvements in roads, bridges, and schools indicated that expenditures were greater than these counties would have made except for the belief that the Secretary of the Interior would recognize their equitable rights to be paid money by the Government in lieu of taxes by individual allottees, and that the provision in the act of 1892 with regard to payment was an inducement to settlement on the lands.

A report was made on December 6, 1920, by the then Secretary of the Interior to both Houses of Congress and to the chairman of the Committee on Indian Affairs. With the letter to the chairman of the Senate committee was inclosed the report by the Indian Office Inspector, and the same has not yet been returned. The report to Congress required by the above-mentioned paragraph in the Indian appropriation bill of February 14, 1920, contained the following recommendation which has been included in S. 1168 and H. R. 5418:

"In view of the fact that by the terms of the act the Government encouraged settlement upon the ceded lands; that the Indians have shared in the benefits of the improvements made by the white people; that these improvements have also enhanced the value of the Indian holdings, and that the Government must necessarily use the roads and bridges in entering and returning from its own property in these two counties, the department recommends that an appropriation be made of the amounts claimed and that the same shall be paid to the respective counties, subject to any deductions that may be made on account of payments for Indian tuition and for any amounts where the rate based on the value of Indian allotments may be found to be in excess of the rate on taxable lands."

In addition to the 1,500,000 acres ceded, the counties of Stevens and Ferry contain 1,535,840 acres, a total of 3,035,840 acres. Of these approximately 1,274,390 acres are taxed and 1,761,450, or more than 58 per cent, are not taxed. These nontaxable lands include Government and State as well as Indian lands. The assessed valuation (50 per cent) in 1919 was \$2,091,478. In both counties the most valuable lands were allotted to Indians.

The two counties are reported to have made 3,016 miles of roads at an expense of \$449,169.83, and many improvements have been made and labor expended by voluntary aid. The Government has expended little in construction of roads in the south half of Ferry County and nothing in the north half. Both counties have assisted the Government in the construction of roads through two forest reserves. Because of the topography of the country, road construction is costly, and the money is reported to have been well spent.

Stevens County has spent \$19,298 in erecting bridges. Ferry County has erected several steel bridges, but the cost has not been reported.

Many of the roads are adjacent to allotments, and the Indians use all roads and bridges, and these improvements increase the value of their holdings.

The schools are open to the Indian children. Tuition has been paid in some cases, but under the provisions of this bill the amount paid would be deducted.

The investigation made by the department reveals conditions in Stevens and Ferry Counties different from those surrounding any other Indian reservations or allotments, and it is believed that the facts justify a settlement of the claims.

The department has no objection to the enactment of H. R. 5418.

Respectfully,

E. C. FINNEY, *Acting Secretary.*

DEPARTMENT OF THE INTERIOR,
Washington, December 6, 1920.

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIR: Paragraph 28 in the Indian appropriation bill approved February 14, 1920 (Public, 141, 66th Cong., 2d sess.), provides that—

"The Secretary of the Interior is authorized and directed to investigate and report to Congress, on or before the first Monday of December, 1920, as to the right of Stevens and Ferry Counties in the State of Washington to the payment of taxes on allotted Indian lands under existing law, and to state the amount, if any, to which each of said counties is entitled."

In pursuance of the foregoing I have the honor to submit the following report: This report is based on information contained in official records and from data procured by an official inspector assigned to duty for that purpose.

Claims have been presented by Stevens and Ferry Counties, Wash., aggregating \$44,309.67 and \$71,458, respectively. These claims are in lieu of taxes which would have been assessed against the allotments of Colville Indians in these counties from 1901 to 1920, inclusive, and are based on section 2 of the act of Congress of July 1, 1892 (27 Stats. L. 62-63), providing for the opening of a part of the Colville Reservation, which reads as follows:

"That the net proceeds arising from the sale and disposition of the lands to be so opened to entry and settlement shall be set apart in the Treasury of the United States for the time being, but subject to such future appropriation for public use as Congress may make, and that until so otherwise appropriated may be subject to expenditure by the Secretary of the Interior from time to time, in such amounts as he shall deem best, in the building of schoolhouses, the maintenance of schools for such Indians, for the payment of such part of the local taxation as may be properly applied to the lands allotted to such Indians, as he shall think fit, so long as such allotted lands shall be held in trust and exempt from taxation, and in such other ways as he may deem proper for the promotion of education, civilization, and self-support among said Indians."

This departure from long-established custom, in view of the exemption from taxation of Indian allotments while held in trust by the United States, had the effect of encouraging entries upon the lands then opened to settlement.

The first claim was submitted on October 20, 1915, by the county of Ferry. On November 22, 1915, the Board of Commissioners of Ferry County was advised that the provisions of the act of July 1, 1892, had been superseded by the act of June 21, 1906 (34 Stats. L. 325-377), under which appropriations aggregating \$1,500,000 were made by Congress for the said lands ceded to the Government by the Indians of the Colville Reservation; that the question as to what funds arising under the acts mentioned were available for expenditure for the benefit of the Indians had been submitted to the Comptroller of the Treasury, who, in a decision rendered April 27, 1915, held that all moneys arising from the sale of said ceded lands since June 21, 1906, belong to the United States, and not to the Indians of the Colville Reservation; that there did not appear to be any balance remaining to the credit of the Indians from sales made prior to June 21, 1906; and that there

seemed to be no way under existing law by which the claims submitted could be paid. A similar claim was filed later in the year by Stevens County, Wash., and the same reasons for nonpayment existed.

On February 8, 1918, the following bills were introduced in the Senate: S. 3788, entitled "A bill to pay certain taxes in the county of Stevens, State of Washington," and S. 3789, entitled "A bill to pay certain taxes in the county of Ferry, State of Washington."

In the report on Senate bill 3789 this department referred to and inclosed a copy of a letter of April 1, 1918, making an unfavorable report on Senate amendment to H. R. 8698 (then the pending Indian appropriation bill), the provisions of which amendment were identical with Senate 3789. In a report on the amendment the department stated that while the same should not receive favorable consideration, the claims against the Government might properly be heard and adjudicated by the department, and the draft of a bill was inclosed which was identical with Senate bill No. 617, Sixty-sixth Congress, first session, which provided for the payment of \$68,511.38, or so much thereof as might be necessary in settlement of the claims of both counties. The department stated that it has no objection to the enactment of Senate 617. None of the aforementioned bills was enacted, but the provision in paragraph 28 of the Indian appropriation bill approved February 14, 1920, directed an investigation and report to the Congress.

The total area of Stevens County is 1,595,840 acres. Of this area 1,081,890 acres are taxed and 513,950 acres not taxed. The nontaxable land is the Colville National Forest, State land, Indian reservation land, and other Government land. The Indian allotments are in the best section of the county, and those of less value and the waste land are open to homesteaders. This makes the cost of building roads and bridges and maintaining the same a great burden upon the taxpayers, and the benefits of the improvements are shared equally by the Indians. In that part where the Indians are located there are 145½ miles of road built wholly by the county at an initial expense of \$14,835.

The entire area of Ferry County is 1,440,000 acres. The total area assessed and taxed is 102,500 acres. The area included in Indian allotments, United States forest reserves, and State lands is 1,247,500 acres. The allotments in the ceded portion are the best lands in the county, 75 per cent of the allotments being agricultural and 25 per cent grazing or timber land. Ferry County expended from March, 1899, to January, 1920, the sum of \$352,412.73 for roads. A very small amount has been paid to the Indians for rights of way. Ferry County has built eight permanent steel bridges, four of which were in conjunction with Stevens County, across Kettle River.

Indian children are allowed to attend the public schools in both counties, although tuition has been paid by the Government for some; but if these two claims are allowed, the amounts paid as tuition should be deducted.

In view of the fact that by the terms of the act the Government encouraged settlement upon the ceded lands; that the Indians have shared in the benefits of the improvements made by the white people; that these improvements have also enhanced the value of the Indian holdings; and that the Government must necessarily use the roads and bridges in entering and returning from its own property in these two counties, the department recommends that an appropriation be made of the amounts claimed, and that the same shall be paid to the respective counties subject to any deductions that may be made on account of payments for Indian tuition and for any amounts where the rate based on the value of Indian allotments may be found to be in excess of the rate on taxable lands.

A copy of schedules of claims by the counties of Ferry and Stevens, the reports of the auditors of these counties for the year 1919, and the report of the inspector are inclosed with the report to the Senate Committee on Indian Affairs for the convenience of the committee, and their return to this department is requested.

Cordially yours,

JOHN BARTON PAYNE, *Secretary.*

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. KELLY. Mr. Chairman and gentlemen of the committee, I asked for time, and was courteously granted it by the gentleman from New York [Mr. MAGEE], in order to discuss postal finances, a question which is of great interest and importance at this time.

You will remember that in the consideration of the postal pay bill there was involved the expected report of the cost ascertainment committee of the Post Office Department. This committee and the Joint Commission on Postal Affairs were granted appropriations of almost a million dollars by Congress for the purpose of determining the cost of carrying the various classes of mail matter and the expense of performing the various services for postal patrons.

Within the last week a partial report summarizing the findings of the committee has been put in the hands of members of

the Post Office Committee. With this summary was included an appendix containing 180 pages of statistical tables showing revenues and expenditures for each item and the method of apportioning costs.

These tables are extremely complicated and will require careful analysis in order to determine the trustworthiness of the calculations. One thing, however, is conclusively proved by the results of this study, and that is that postal salaries and postal rates are two entirely separate and distinct problems. In all the history of the Postal Service they never have been dealt with in the same measure and that procedure is founded on common sense and every proper consideration.

As to the postal salaries there is no difference of opinion anywhere in regard to the proper policy. Every right-thinking American and every Member of this Congress believes that the workers, who make the Postal Service possible, are justly entitled to a living wage. It is universally agreed also that a conservative definition of a living wage would be compensation equal in purchasing power to that received in 1913, before the World War chaos, to price levels.

Exactly that policy is formulated in the postal salaries bill passed by the practically unanimous vote of Congress. That measure, with the veto of the President, now awaits the action of the Senate, and, if reenacted there, the action of the House.

With that measure reenacted into law the problem of postal compensations will be settled permanently on a fundamentally just basis.

Mr. BLANTON. Will the gentleman yield?

Mr. KELLY. I would rather not yield at this time.

Mr. BLANTON. I would like to ask the gentleman a question at this time.

Mr. KELLY. I will yield for a question.

Mr. BLANTON. The gentleman took quite a part in helping to pass that bill and I followed him, because I thought it was a just bill. If it is so just and all Congressmen are in favor of it, then why is it being held up now and not passed into law?

Mr. KELLY. I certainly hope it will be reenacted at the earliest moment possible. It was a just and righteous measure in June and it is just and righteous in December.

But, Mr. Chairman, when it comes to the proper policy for securing necessary revenues for the Postal Service there are wide differences of opinion, honestly held by different individuals and groups.

The summary of the cost ascertainment committee only emphasizes the necessity of formulating a fundamental policy as to our Postal Service rates.

As given out by the Post Office Department, that summary is as follows:

Statement showing recapitulation of allocations and apportionments of revenues and expenditures for the fiscal year 1923, shown in Table A, according to the classes of mail matter and special services, and the loss or gain on each

Classes of mail matter and special services	Revenues	Expenditures	Loss	Gain
Paid first class	\$371,894,061.49	\$191,476,335.17		\$80,417,716.32
Second class	31,214,425.47	105,927,294.14	\$74,712,868.67	
Third class	43,844,940.77	60,136,516.25	16,291,575.48	
Fourth class	120,649,662.42	127,566,416.24	6,916,753.82	
Franked matter		357,819.45	357,819.45	
Penalty matter		6,214,131.44	6,214,131.44	
Free for blind		27,315.29	27,315.29	
Foreign	12,571,746.39			
Receipts foreign mail transit	115,419.03	17,591,003.59	4,603,838.17

Cash on delivery	4,079,143.35	6,904,580.74	1,825,437.39	
Treasury savings		221,809.28	221,809.28	
Total	\$23,047,317.41	\$72,282,230.81	\$32,354,930.77	\$5,119,127.37
Loss, excluding unassignable and unrelated items			47,234,903.40	
Less unassignable revenues	7,773,776.74		7,773,776.74	
Net loss, excluding unrelated			39,461,126.66	
Unrelated	1,592,077.63	1,930,653.15	344,575.52	
Grand total	\$34,413,171.78	\$74,218,873.96	\$39,805,702.18	

Now, Mr. Chairman, this report states that every class of mail matter except first class is handled at a loss. It indi-

cates that every service except postal savings likewise operates at a loss. Balancing gains against losses shows a total excess of expenditures over revenues amounting to over \$39,000,000.

Mr. WILLIAMSON. Will the gentleman yield?

Mr. KELLY. Yes.

Mr. WILLIAMSON. Are the figures you are presenting here the figures which have been obtained by the investigation conducted by the Post Office Department?

Mr. KELLY. Yes; by the cost ascertainment committee of the Post Office Department. This is the official summary.

Mr. WILLIAMSON. This is not a congressional committee, as I understand it, but a committee organized in the Post Office Department?

Mr. KELLY. This is a Post Office Department committee for which Congress appropriated the funds necessary.

Now, of course, it is evident that all these results depend upon the methods used in apportioning expense.

For instance, it is almost inconceivable to me that the handling of fourth-class mail, which comprises 60 per cent of the volume and brings in only 20 per cent of the revenue, should show a loss of only \$6,000,000, or 5 per cent.

Mr. MAGEE of New York. Will the gentleman kindly state when that report was submitted by the cost ascertainment committee?

Mr. KELLY. The entire report has not yet been submitted. This summary and appendix were available on Tuesday of last week.

Mr. WILLIAMSON. Is the report yet in print?

Mr. KELLY. No; the complete report is not printed as yet, but is expected next week.

Mr. Chairman, the figures given compel a decision as to postage rates, but they do not involve the justice and the necessity of a living wage for postal workers.

Two courses of action are possible in fixing a policy for postage rates. First, make every class of mail matter and every special service pay its own way—that is, fix postage rates so that the revenues from each class and service shall balance the expenditures they make necessary.

Second, let certain classes and services pay excesses sufficient to equalize the loss on others, on which the public may benefit from low rates.

These two policies are radically different, and yet either one can easily be made to produce revenues to make the Postal Service self-sustaining.

If we adopt the first policy, it would involve the lopping off of postal facilities which do not pay for themselves. The Rural Free Delivery Service is a repudiation of the profits idea in the Postal Service, for it has been losing large sums since its establishment. This service meant a loss of \$40,000,000 in 1923, or the entire deficit shown by the cost-ascertainment report.

Franked and penalty matter also mean a complete loss in revenues, and will continue to do so as long as Government departments and officials are permitted to send mail matter without postage payment.

If first-class mail should pay its own way, the 2-cent postage rate could be cut to 1½ cents.

Under such a policy second-class rates would have to be raised an average of 250 per cent. Third-class rates would be advanced 40 per cent and fourth-class or parcel-post rates would be advanced 5 per cent.

The other special services would have to be advanced in due proportion to make them self-sustaining.

Now, of course, it is possible to formulate a bill on that basis and fix specific rates based on the findings of the cost ascertainment committee. Every student of postal affairs, however, knows that it is impossible to expect any revenue at all from rates which are higher than those of private means of transportation and distribution.

Then there is the second policy, that of having an excess in revenues from certain classes in order to cover losses from other classes. That compels a decision as to the classes which shall be favored and raises another question of policy.

I am calling these points to your minds in order to suggest the issue involved in postage rates and to prove that they are in no way related to the question of just postal salaries.

Then there is another consideration. The marvelous ability of the Postal Service to take on new business without proportionate increase in expenses makes it possible to fix postage rates at a lower point than these figures indicate.

On September 23, 1924, Postmaster General New made a speech at the postmasters' convention at Indianapolis, and made a statement which is eloquent, it seems to me, as to this feature of the Postal Service. He declared that the increase in postal

receipts for three years since July 1, 1921, was \$188,000,000. He further states that to bring in that \$188,000,000 additional revenue it required 1,459 railway mail clerks, 5,297 city carriers, and 9,479 post-office clerks.

When I saw that statement I was interested and went back to our postal records to 1907, when the entire revenues of the Postal Service amounted to only \$183,000,000, the total being less than the increase for the past three years. I discovered the number of employees necessary to handle \$183,000,000 of revenue in 1907. Here is what they were: There were 25,243 clerks, there were 24,577 letter carriers, there were 14,027 railway mail clerks in 1907, and all these combined only handled mail producing revenues of \$183,000,000. Take all the employees of 1907, paying them at the low salary they received, less than \$900 a year on an average, and the total wage cost was \$59,000,000. The additional employees to-day, handling an increase of \$188,000,000 and paid the \$300 increase provided for in the postal salary bill, would receive only \$84,000,000. So that even at the proposed increased scale of salary the result is an expenditure of a little over one-half of what it cost in 1907. That is one of the marvelous things about this greatest business in the world. The fixing of postage rates must take it into account.

Mr. MAGEE of New York. Will the gentleman yield?

Mr. KELLY. Yes.

Mr. MAGEE of New York. Is it the purpose of the committee to make a report soon?

Mr. KELLY. We propose to take action as soon as we get the report complete and when we know the revenues needed.

Mr. MAGEE of New York. I am very glad to hear it.

Mr. HUDSPETH. Will the gentleman yield?

Mr. KELLY. Yes.

Mr. HUDSPETH. I understand officially that the bill for raising the salary of postal employees will be brought up in the Senate next Thursday. If that should pass in the Senate over the President's veto, is it the purpose of the gentleman from Pennsylvania or his committee to immediately call it up in the House?

Mr. KELLY. I shall do everything in my power to have it considered at once in the House. I believe that justice demands its immediate reenactment into law.

Mr. LAZARO. Will the gentleman yield?

Mr. KELLY. I yield to the gentleman.

Mr. LAZARO. The gentleman recalls that when the postal employees' bill was up for consideration a report went to the country and was spread through the country newspapers saying that the increase in wages for the employees of the Postal Service would bring an increase of the parcel-post rates. Was not that propaganda to prejudice the people against the increase of salary bills?

Mr. KELLY. That and other propaganda was sent out wholesale in order to prejudice certain groups and interests against the proposed salary increase.

Mr. LAZARO. And the bill does not contain a single line increasing the rates on parcel post?

Mr. KELLY. Not a single line. I have had many letters from men who make the statement that the parcel-post rates would be increased 50 per cent in the postal salary bill. There is not a single word in the bill on rates, and there has never been a postal compensation bill linked up with a postal rate bill, and there never should be.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. KELLY. I yield to the gentleman from New York.

Mr. LAGUARDIA. While on the subject of parcel post and second-class matter, will the gentleman give the figures as to the cost of free-in-county delivery of second-class mail.

Mr. KELLY. I do not have that segregated in this summary at hand.

Mr. LAGUARDIA. That is quite an item, is it not?

Mr. KELLY. Not so great as one might think, although it does enter into the loss on second class.

Mr. LAGUARDIA. Is not this report which the gentleman has a full and complete answer to the objections that were raised to the increased salary bill?

Mr. KELLY. Well, we have the figures here and they will form the basis for action on postage rates. There never has been a well-founded objection to paying the faithful and efficient postal workers a living wage.

Now, Mr. Chairman, this is the first report of its kind which we have had in the Postal Service. The Penrose Commission of 1907 did get some figures. They were repeated by the Hughes Commission of 1911, but between 1911 and 1924 there has been no real inquiry as to the cost of carrying these classes of mail matter. This report is voluminous and exhaustive. It has figures based on 559 post offices out of 51,253

post offices. It is a weigh and a count tabulation for 90 days. There are many opportunities for errors as anyone can see, but the report will give us a basis, and we can undertake to go ahead and get an adjustment of postage rates which I hope will be based on the fundamental policy that the Postal Service is dedicated to the service of the American people.

Mr. KINCHELOE. Mr. Chairman, will the gentleman yield?

Mr. KELLY. I yield to the gentleman from Kentucky.

Mr. KINCHELOE. Mr. Chairman, is it not a fact that notwithstanding the propaganda that went through the country in favor of increasing the rates on parcel post to make up any deficiency that might occur, the recent statement of the Postmaster General shows that in the last fiscal year there has been a deficit of only \$6,000,000 on parcel post. It lacks only that much of paying its own way.

Mr. KELLY. Not in the Postmaster General's report, but in this report on cost ascertainment.

Mr. KINCHELOE. Well, it is from the Post Office Department.

Mr. KELLY. Yes. Six million dollars is given here as the loss on parcel post. However, on the 15th of August, the Post Office Department sent out in the Postal Bulletin to every post office in the country a draft of legislation for postage rates in which they undertake to raise \$30,000,000 on parcel post. That was the department's suggestion.

Mr. STENGLE. Mr. Chairman, will the gentleman yield?

Mr. KELLY. Yes.

Mr. STENGLE. A few minutes ago in the gentleman's earlier remarks he drew a comparison between 1907 and the present year, in respect to the volume of business done by the department. If I recall, he spoke of \$183,000,000 worth of mail that had been handled by a certain percentage of the employees.

Mr. KELLY. By all of the employees.

Mr. STENGLE. Is it possible for the gentleman to put into the Record at this time the number of postal employees, including clerks and rural carriers, who have been driven to death and disabled by overwork during that period.

Mr. KELLY. I am afraid that that would have to come from some other source. I could not make a table of that, although I will say that sometimes that speeding-up process has gone the limit, and without doubt it is partial explanation of how a comparatively few men could take care of \$188,000,000 of revenue, when the entire postal personnel in 1907 only took care of \$183,000,000. There have been the speeding-up process, and the so-called efficiency methods, which have added practically double burdens to every employee. But the employees are willing to do all that mortals may do in making the Postal Service efficient. They have carried every single increase of salary from 1907 to the present time. There has been scarcely a change in postage rates, because the only changes we have made in 40 years were those made on second-class matter. These employees have taken these expenditures for increased salaries and by that speeding up and increased efficiency they have absorbed every dollar of it. The deficit for the last year is about \$24,000,000. The deficit for 1920 was about that same amount, so that they have taken the entire reclassification act of 1920 and have absorbed it by increased effort and work and efficiency. More than that, they will do the same in the future.

Mr. BURTNESS. Has the gentleman analyzed the figures sufficiently so that he could give us the percentage of increase that would be required in the various classes of mail now showing a loss?

Mr. KELLY. Yes. I gave that a few moments ago. On second-class matter there would have to be an increase of 250 per cent, and on third class 40 per cent, and on the parcel post 5 per cent. That, of course, is based solely on the cost-ascertainment report.

Mr. Chairman, I believe that any Member of Congress who has had any experience with legislation during the short session will agree that it is impossible to analyze the cost-ascertainment report and adopt a general revision of postage rates before March 4.

We might be able to draft and enact a measure making temporary increases to cover a large part of the expenditures in the postal salaries bill and then in the next Congress formulate a schedule of permanent postage rates. In view of the fact that those rates affect every business in America the question is deserving of as careful consideration as has been given the postal pay bill.

Let us do one thing at a time. Let us adopt finally the policy in postal salaries which is embodied in the measure

now awaiting final consideration. Then we may at once proceed to such just and scientific revision of postage rates as shall meet the proper expenditures of the Postal Service.

What is the exact situation as to the postal salaries bill?

Early in the last session several postal reclassification bills were introduced. One sponsored by myself was introduced and referred to committee on December 20, 1923. The same bill was introduced in the Senate by Senator EDGE on January 10, 1924.

In February it was decided to hold hearings on all the measures before a joint subcommittee of the House and Senate Post Office Committees. These joint hearings were held March 3 to 10, inclusive, and more than 300 witnesses and representatives of the Post Office Department were heard.

The Post Office Department submitted a draft of provisions for postal salaries and postage rates on April 7.

The joint committee deliberated on all the measures and submitted their draft of legislation on April 30.

The House Committee on the Post Office and Post Roads went over every line of the proposed bill and made changes according to its best judgment. This revised bill was favorably reported by a vote of 20 to 1 in the committee.

The Senate passed the bill as reported on May 27 by a vote of 73 to 3. When brought before the House the bill was amended to conform with the House bill, and then was sent to conference.

The differences were compromised and the conference report passed the Senate on June 5 and the House on June 6 by a vote of 361 to 6. The measure was sent to the President and was returned with his veto on June 7.

Upon the final action will depend whether this question of postal salaries is to remain a vexing, unsolved problem for an indefinite period or be permanently settled on a basis of common business sense and self-respect.

Through the Postal Service the entire industrial and business world carries on its affairs. It is essential for the success of every business enterprise that postal employees be capable and efficient.

Every sensible person knows that anxiety and worry and discontent are foes of efficiency. Labor to a man suffering from such handicaps is sheer drudgery. When a worker is face to face with the fact that his wages will not cover necessary expenses it gives rise to a strained, tense, and abnormal state of both mind and body.

As Ordway Tead, of the Bureau of Industrial Research of New York City, has observed:

It goes without saying that unless wages are at the very least enough to provide a decent standard of living there can not be interest in the work.

Every American wants an efficient Postal Service and resents any action which will hamper and hinder that efficiency. By reenacting this law we can increase postal efficiency by providing that just treatment is assured to every worker who chooses this vital service as a life occupation.

Of course, for those who make and mold the Postal Service the decision of this question is of supreme importance. Their wages dictate their living conditions. Involved in this wage problem are hardships and unjust burdens on one hand and a fair livelihood for them and their families on the other.

The postal salaries measure provides only that the compensation of these faithful public workers should be brought back to the level of 1913. No legislation ever had more careful consideration by committees of Congress. It has been passed by a practically unanimous vote in both Houses.

The President exercised his constitutional right to negative any bill passed by Congress. His message raised no new question, and every objection contained in it had been given thorough consideration before the bill was passed originally.

What then is the duty of the legislative branch of the Government? President Coolidge has himself pointed it out in clear-cut fashion. In 1920 while a candidate for vice president, in an address delivered at Middleboro, Ky., he said:

Conscious of our great heritage, aware of our grave duties, determined to preserve our liberties, we insist that our duties shall hold fast to the provisions of our Constitution. Therein is our faith. We demand that it shall function as it was designed to function, its three coordinate branches moving within their respective orbits as defined by the Constitution, free from invasion by one into the power and authority of the other, and each and all responsible only to the people.

This situation could not be better stated—Congress is responsible only to the people. No one can doubt the result of a national referendum on the question of increase of salaries for postal employees. The people have shown by every method in

their power that they favor an increase in pay for these faithful workers. The simple statement of the facts during the past year has been convincing proof to all, that the postal worker is not receiving what he earns nor what he needs in order to support his family.

Mr. Chairman, let us review the opposing arguments which have been advanced during the entire consideration of the postal pay bill and in the veto message.

It is declared that three adjustments of postal salaries have been made since 1918 and that a large percentage of increase has been granted since 1907.

These statements would lead one to believe that postal employees had been granted all they could reasonably ask. They imply that postal pay has met the increased cost of living and now compares favorably with the compensation paid workers in other industries. As for using the year 1907, it might as well have been 1887, which would have shown even greater percentages of increase.

In his Labor Day speech September 1, 1924, President Coolidge said:

I find that the cost of living for the average family for the same standard of living has been falling since the high point was reached in 1920 and is now in terms of money 69 per cent above the level of 1913.

Stripped of all confusion then, the facts are that the maximum pay of postal clerks and letter carriers in 1913 was \$1,200 a year. To-day, after all the piecemeal legislation referred to, it is \$1,800 a year. That is an advance of 50 per cent, while to-day the cost of living is 69 per cent higher than in 1913. That leaves the postal employees in exactly the position they would have been had prices remained the same, while Congress reduced their salaries.

Postal pay has always been poor pay at best. Still, never since 1913 has the pay of postal employees been as great in purchasing power as it was in that year. That is the only just way to compute wages, and based on real value the postal worker who received \$1,200 a year in 1913 is to-day only receiving \$1,080.

Of course, that leaves all the deficits of past years to be met by the employees. We hear a great deal about deficits in the Post Office Department. It is worth while to think of the deficits borne for 10 years by these faithful workers. They must carry the debts contracted during these years because their pay would not provide the necessities of life for themselves and their families.

It is possible to figure just what the loss has been because we know the salaries paid and the percentage of increased costs in living.

Let us take the Railway Mail Service for illustration.

The maximum salary of a distributor in 1913 was \$1,500, and not a cent was added to it until the fiscal year 1919. During those years the cost of living mounted skyward. To keep the pay of these railway mail clerks, who form the backbone of the postal system, at exactly the same purchasing power as during 1913, would have required \$1,500 more than they received.

In other words, during those years to 1919 these employees actually lost \$1,500 in pay based on the scale of 1913.

During the fiscal year of 1919 they received an increase of \$200 a year while the cost of living jumped to a point 83 per cent higher than in 1913. Counting this makeshift increase, these employees were \$1,055 behind their 1913 pay for that single year.

For the year 1920 they received a salary of \$1,925, another of those laws of emergency. This did not cover the increase in the cost of living for that year alone, to say nothing of the previous years. In fact these workers for 1920 were \$1,156 behind their 1913 pay, judged by the purchasing power of their money.

Then in 1921 came the reclassification law which fixed the pay of these workers at \$2,150. They received it for 1921, 1922, 1923, and 1924, and it represented an increase of 43 per cent over their 1913 salary. The cost of living varied during those years from 83 per cent to 70 per cent higher than in 1913. There was an actual loss in purchasing power since the reclassification act went into force of \$1,766.

What do these facts mean? Simply that each one of this class of postal employees has lost \$5,568 in the purchasing power of his pay since 1913. He would have had to borrow and spend that sum of money in order to live on the same scale he did in 1913.

Many have borrowed and many more have stinted themselves and their families; they have taken outside jobs and have put other members of their families to work.

They have been forced to such un-American privations and sacrifices and it is the height of injustice to argue against a measure bringing their pay back to the 1913 level, on the ground that they have had three increases of pay.

It does not matter if they have had 50 increases. It is not a question of percentage of increase in 17 years. The only question is "Has their pay meant a living wage?" We know that the cost of living has decreased since 1920, but in that year the cost of living was 114 per cent above 1913 while the railway mail clerk received an increase of 43 per cent only.

Their pay was certainly not excessive in 1913. To-day it will buy \$400 less goods than it bought in that year. That situation demands remedy and the vetoed bill proposed to give it.

Then what has been the course of the compensation paid workers in private employment during the period of 1913-1924?

The Bureau of Labor Statistics states that the weekly wages of union workers in all industries are 99 per cent higher than in 1913 while the hourly rate is 118 per cent higher.

The railway mail clerk I have mentioned receives 43 per cent more than in 1913. The letter carrier and post-office clerk receive 50 per cent more than in 1913. If these latter classes received the same increase as the workers in private employ they would be getting \$2,600 a year. The vetoed bill gives them \$2,100.

Is there any good reason for grinding faithful public servants down to a level far below that attained by workers in private industry? Has not President Coolidge himself said:

Public business is transacted on a higher plane than private.

Should not Uncle Sam then, as an employer, set the example in paying a living wage, rather than lagging far behind private employers? Certainly if this Government can not pay a living wage to postal workers it has not the right to operate post offices.

Mr. Chairman, it is further argued that these increases have resulted in the expenditure of \$450,000,000, proving the generous treatment postal employees have received.

Since when have the wage increases in every industry in America, made necessary by the World War, become acts of generosity?

The anthracite coal miners in 1920 alone were given an increase of 65 per cent, more in one year than postal employees in 10 years, but I have never heard that act cited as proof of the generosity of the coal barons.

The wages of all workers in all building trades were 105 per cent higher in 1923 than in 1914, but the increases were not solely due to the generosity of the builders and contractors.

Judged on that basis the boot and shoe manufacturers are the greatest exponents of generosity in America. Their workers of all classes were getting 113 per cent higher wages in 1923 than in 1914. These workers did not depend on acts of Congress. The cost of living went skyward and their employers simply met the conditions, and as a matter of course raised wages to correspond with the prices of food, shelter, and clothing. No one dreams of calling such an attitude "generosity." It was simply common-sense methods of doing business.

Of course, a lump sum like \$450,000,000 by itself is calculated to shock any believer in economy and efficient administration. It is not so shocking, however, when one stops to remember that an increase of only \$1 a day to 300,000 workers would reach the sum given.

Who paid that great sum? Not the taxpayers of the United States, for the deficit they paid out of the General Treasury was wholly included in the advanced costs of railroad transportation, supplies, rentals, light, and fuel. Take these increases out of the postal budget and there would have been a surplus instead of a deficit.

These increases have been at a still more "generous" percentage than postal wages. Railroad transportation went up 67 per cent between 1914 and 1923. Rent, light, and fuel advanced 145 per cent between those years, and supplies were 88 per cent higher in 1923 than in 1914.

Who paid that \$450,000,000 to postal employees? Not the users of the mails in increased postage rates, for there have been no increases since 1914 save in second-class rates, and this makes up but a small part of postal revenue.

No, this entire amount was paid by the postal workers themselves through increased efficiency and speeding-up methods. Clerks and carriers and railway-mail clerks do to-day 50 per cent more work than they did in 1914. They are the ones who took this added wage cost upon their shoulders and carried every cent of it. If there is any generosity to be found in the transaction, it is the generous way in which postal employees undertook added labors in order to make the Postal Service the mightiest agency in America for the promo-

tion of common welfare at the cheapest postage rates in the world.

Mr. Chairman, it is further argued that the salaries of certain classes of clerks in the departments in Washington show a less average annual pay than postal employees.

This is a meaningless comparison. To arbitrarily pick out a group of Government employees and say that the average is less than that of postal employees is not illuminating, to say the least.

How many of the group selected are girls just out of school and how many are mature men supporting their own families? What has been the experience and training of those so selected for comparison? What kind of work do they perform for the Government? All these questions and more must be answered before there can be comparison of their pay with that received by the postal employees, who perform the most vital public service in America.

But let us put these essential differences aside. The fact is that these departmental employees receive higher daily and hourly rates of pay than do postal employees. For work actually done they are higher paid employees than postal workers.

The departmental clerks in Washington have a seven-hour day, while the postal employee works eight hours, either day or night.

The departmental clerk gets his half holiday, but this is not a boon of postal workers.

The departmental clerk has a 30-day vacation with 30 days' sick leave. The postal employee has a 15-day vacation and 10 days' sick leave.

The postal employee works at least 60 days of 8 hours longer each year than the employees cited. To say that he receives more money in a year is not a fair statement without also admitting that he works longer and at much more exacting tasks. The bill which was vetoed will not make postal pay higher than the departmental clerks referred to now receive, figured on hours of service actually performed.

Mr. Chairman, it is further argued that employees of a similar character in private business receive lower compensation than postal employees.

There is a wide difference between these statements and that of the special committee of the United States Chamber of Commerce, charged with the duty of making a study and report of postal affairs in March, 1924.

This committee said:

One of the principal causes of delay and irregularity in the handling of the mails is the wide disparity between compensation in the Postal Service and wages paid by private employers, resulting in a large turnover of labor, the taking on of less qualified employees, and consequently inferior service.

During the whole course of the passage of this measure through Congress it is noteworthy that chambers of commerce were just as emphatic in their indorsement as were labor organizations.

The fact is that you can not possibly compare the specialized postal employees with clerks, typists, etc., in other lines of business and no one has ever seriously demanded that—

the postal employees be paid a scale of wages somewhat higher than the scale paid to employees in the business world!

The postal employees have shown by their indorsement of this postal pay bill that they do not dream of becoming aristocrats of industry.

All that the vetoed bill did was to bring the pay of postal employees up to the level of 1913 in purchasing power.

The Post Office Department did make an effort to prove that postal salaries were high enough. There was no investigation but rather a determination, and those who sent in the reports were left in no doubt as to the results expected.

The fact is there is no business in America similar to the Postal Service. It is highly specialized and is a Government monopoly. The expert postal employee possessed of years of experience can not step out of the post office and sell his knowledge and services to a rival concern. There are no rival concerns.

But the employees of the classes cited by the department are routine clerks, freight handlers, typists, stenographers. They are not mature bonded employees such as the postal workers. They do not have the responsibilities nor do they perform the tasks of the postal employees.

I know the rosy pictures that are painted by some men, either selfishly interested or ignorant men, of the young man fresh from school, who begins work as a clerk or letter carrier at \$1,400 a year.

Why do they not consider the other side of that picture? Why do they not portray that postal worker, when 30 faith-

ful and efficient years of service have passed over his head, and his salary is \$1,800 a year?

He is a youngster no longer, but a veteran employee, with family cares and responsibilities. He has spent a lifetime of hard, painstaking labor, and he has rendered vitally important service, yet his pay is only \$400 more than when he began.

We need to remember that the average post-office clerk to-day is 36 years of age, with three dependents in his family, for whom he must provide a livelihood on less than \$1,800 a year.

The average city letter carrier is 38 years of age and he, too, has three dependents in his family whom he must support on less than \$1,800 a year.

The low-paid employees in private industry enter an occupation in which they believe there is unlimited opportunity for advancement. There are no laws to hold them to a limit of \$1,800 a year, such as now applies to clerks and letter carriers. They accept low pay at first in the hope of high pay at last.

Then, too, every year's experience fits them for higher pay under new employers. If one corporation is unwilling to pay a fair wage, there are others to whom to apply.

The postal employee is tied fast to his work and his wages. His training and experience are of no advantage in outside business. That is the main reason for the fact that the average postal employee sticks to his job in the face of unjust schedules of pay. If there was a place for them to turn and sell their experience and skill, the Postal Service would be in a state of collapse. But it is no reason that the Government, having the power to oppress should use it like an oppressor.

During the hearings on the bill pages were filled with citations of the wages paid skilled labor. They were official figures and showed conclusively that the highest-paid postal clerk or letter carrier, with his \$34.61 a week, is one of the lowest-paid workers in all industry. Even the hod carrier far outranks the mail carrier in wages received.

Then, Mr. Chairman, the argument is made that there are many applications for these positions at present pay schedules.

The logic of this statement is simply that as long as men apply for positions and are willing to accept them there should be no increase in compensation, the wage to be paid, regardless of service rendered, to depend upon the supply of labor. It is the law of supply and demand applied to human labor. By such a concept wage rates are fixed in the same fashion as the price of merchandise on the counter. But that theory was not used in the law of April 4, 1924, signed by the President, which increased the pay of Assistant Postmasters General by \$2,500 a year. There was never any scarcity of applicants for these places at the former salaries. If the law of supply and demand did not apply to their increase, why attempt to apply it to a \$300 increase for postal workers?

The Congress of the United States has written into law the declaration that labor is not a commodity, thus expressing what has been regarded as an American belief that the blood and brain and muscle of men and women are somewhat different from corn and cattle and cabbage.

The Post Office Department, under the guidance of an enlightened Postmaster General, also officially announced that doctrine at the beginning of this administration.

Postmaster General Hays, in his report for 1921, proclaimed an administrative policy which apparently has suffered reversal in a few short months. He said:

To treat a postal employee as a mere commodity in the labor market is not only wicked from a humanitarian standpoint, but it is foolish and shortsighted even from the standpoint of business. An employee who is conscious that he is regarded as a mere commodity will do enough to "get by" and keep his job until he finds another, and he will do no more. He contributes nothing to the morale of the organization.

The chances are, in fact, that there will be no morale to which to contribute. He grouches and passes on his grouch. Feeling that he is ill treated by his Government he does his work badly, with a consequence that soon everybody is growling at the mail service and at the Government. A postal employee, on the other hand, who is regarded as a human being, whose welfare is important to his fellows, high and low, in the national postal organization, is bound to do his work with a courage, a zest, and a thoroughness which no money alone can ever buy. The security which he feels he passes on to the men and women he serves. Instead of a distrust of his Government he radiates confidence in it.

The most important element in every service is the spirit of the men doing it. We are away in the post-office service from any idea of labor as a commodity. We have 326,000 employees in the Post Office Department; to-day we have 326,000 coworkers. When these

326,000 men and women start out determined to do this work better, nothing can stop the successful consummation of their efforts. Developments are proving this fact.

What are the possibilities of the influence of the postal workers for the spread of either good feeling or ill will? The figures I have already noted give a hint of them—326,000 coworkers serving daily 110,000,000 people. Is it worth while or not, making them feel that they are getting a square deal and seeing that they get it?

Mr. Chairman, I answer the questions of the former Postmaster General by saying that it is above all things else worth while to make postal workers feel that they are men, not machines, and that they are getting a square deal, and that is exactly what Congress earnestly endeavored to do when it passed the postal pay bill.

But even accepting the repugnant theory that postal labor is a commodity and that wages should only be increased when the supply of applicants fails, what is the situation?

The hearings on the measure before the committees of Congress brought out overwhelming evidence that lists of eligibles could not be secured in countless places. Weekly examinations were necessary in some cities, and still hundreds of temporary employees had to be drafted from the streets.

Detroit showed a turnover of more than 100 per cent in a year, showing that even those who passed the examination and accepted appointment could not and would not remain in the service on account of inadequate pay.

The Chicago Examiner of July 5, 1924, stated, "The help-wanted sign is out at the Chicago post office. One hundred and fifty letter carriers are needed." Where were the thronging applicants for postal jobs?

Two months after the veto message had been sent to Congress, the secretary of the third United States civil service district was sending a call for help to all members of local boards. In his letter he said:

Considerable difficulty is experienced and has been experienced in obtaining sufficient eligibles to meet the needs of the Post Office Department. It very frequently happens that as a result of the announcement of an examination but one or two competitors appear and when the register is established there are not sufficient names from which the postmaster may make selection to fill all vacancies which may exist in the post-office force.

The purpose of this communication is to request that you make every effort, in conjunction with the local secretary of the civil service board and the postmaster, to interest qualified persons to enter the examination. Get in touch with those people whom you think can pass the examination, and show them the advantages of employment in the Postal Service. You might obtain candidates who have reached their eighteenth birthday on the date of examination from among the high-school students.

The examinations themselves have been transformed from a real test of knowledge into a joke through lowered requirements.

The old employees have been overworked because of this situation. The service is undermanned. With the volume of mails doubled since 1913 the number of carriers who deliver it have increased but 24 per cent.

Since the Railway Mail Service is selected as an exhibit in this connection, let us delve into it a little further.

The railway-mail officials of the department inform me that out of that 25,000 applicants 3,249 were certified for appointment. Of this number 1,340 absolutely refused to accept appointment when they were offered positions, indicating that further inquiry into wages and conditions of labor had led a larger number of applicants to change their minds.

The department can give no data as to the number who remain in the service for six months. If the fifteenth division situation last year be taken as a criterion, there would be 26 per cent of those certified remaining at the expiration of six months—844 out of 3,249.

It is an enlightening fact that three out of four of those who are ambitious to enter the Railway Mail Service, and are offered the places they seek, refuse the appointment or resign within six months.

There is a vast difference between a civil-service eligible and a competent postal employee. It requires several years to make efficient, practical railway-mail clerks, post-office clerks, or city carriers such as are needed to handle the people's Postal Service. They are needed not in one division but in all divisions, not in one office but in every office, if this service is to be up to standard. The resignation of countless employees within six months of their appointment because of inadequate pay is a heavy drain and paid for out of postal revenues.

Mr. Chairman, it is further argued that there should be a wage differential favoring postal employees located in the large cities against those in the smaller cities and towns.

The vetoed bill does not ignore the cost of living in different localities. It provides that letter carriers in the village delivery service shall have a maximum rate of \$1,400 a year. For letter carriers in rural delivery service, on the standard 24-mile route, it provides a maximum of \$1,800 a year with an allowance of 4 cents a mile for the upkeep of their vehicles. That is, a part of the equipment and maintenance expense, made necessary solely because the rural carrier can not perform his duties without such expense, shall be paid by Uncle Sam. For city letter carriers it provides a maximum rate of \$2,100 a year.

It does not attempt to divide employees, doing exactly the same work, and with the same responsibilities, into subclasses based on the receipts of the office where they are employed. Such an arbitrary and unjust differential was considered and rejected by the committees.

It may be taken for granted that the President refers to the department's recommendation that \$100 increase be granted clerks and letter carriers in offices with receipts of less than \$600,000 a year and a \$200 increase to employees where receipts exceeded that figure.

To attempt any such arrangement would bring vastly more inequalities and injustices than those alleged to exist under the present system. If it is penny-wise it is assuredly pound-foolishness. In any case it was rejected after careful consideration by Congress. That should be accepted as a declaration of policy, for the Post Office Department has not yet been empowered to make the law as well as carry it out.

Seventy-five per cent of the clerks and city letter carriers live in cities of 25,000 and over and 90 per cent of the railway mail clerks live in cities. A large proportion of the remaining clerks, city carriers, and railway mail clerks live in small suburbs of great cities, where the costs of living are about the same as in the central city.

Food, clothing, house furnishings and coal are sold on a national market and cost about the same everywhere. The prices do not vary according to the size of the city.

The adoption of the \$600,000 dividing line would be the most deplorable blow to the morale of the service that could well be imagined. A letter carrier in the Swissvale Station of Pittsburgh, Pa., post office living in a Pennsylvania township farming community, would receive a \$200 increase. One foot over the line where his route ends is the route of a Braddock, Pa., post-office carrier. This man lives in the heart of the steel industrial district where living costs are as high as anywhere in the United States, but he would only receive \$100 advance because his office does not have receipts of \$600,000.

There are countless instances of similar kind. Is such a system as that to become our policy? Far rather to give a little added advantage to a few employees than to work a stinging injustice upon many. All just legislation is based upon the greatest good of the greatest number. But to refuse to give any employee a cost increase because \$300 would not go as far in New York City as in some other place is strange doctrine indeed.

If the \$600,000 line were drawn, there would not be a clerk or letter carrier get the \$200 increase in Arizona, Delaware, Idaho, Mississippi, Montana, Nevada, New Hampshire, New Mexico, North Carolina, North Dakota, South Carolina, South Dakota, Vermont, West Virginia, or Wyoming.

In Alabama the employees in one lone office, Birmingham, would get the \$200 increase.

In Arkansas only one office, Little Rock, would be in the preferred list.

In Colorado there would be Denver; in Georgia, Atlanta; and even in Illinois only Chicago, Springfield, and Peoria employees would get the \$200 increase. In Iowa there would be Des Moines and Sioux City; in Kansas, Topeka, and Wichita; in Kentucky, Louisville; in Louisiana, New Orleans; in Maine, Augusta and Portland; in Maryland, Baltimore; in Massachusetts, Boston, Springfield, and Worcester; in Michigan, Detroit and Grand Rapids; in Minnesota, Duluth, Minneapolis, and St. Paul; in Missouri, St. Louis, Kansas City, and St. Joseph; in Nebraska, Omaha; in New Jersey, Jersey City and Newark; in Oklahoma, Oklahoma City and Tulsa; in Rhode Island, Providence; in Utah, Salt Lake City.

That is enough to show the working of this so-called differential to anyone familiar with conditions in these States.

Within the States there would be grave injustices. For instance, Chicago employees would receive \$200 increase, while Chicago Heights employees, forced to live under the same costs of living, would receive \$100.

In Scranton, Pa., in the hard-coal region, the employees would receive \$200 increase. In Wilkes-Barre, in the same region, with exactly the same living conditions, the increase would be \$100.

The principle of equal pay for equal work forbids the discrimination. And not less does the principle of living cost prevent just lawmakers from setting up such an artificial dividing line between American communities.

Mr. Chairman, it is further argued that an organized effort by public employees to secure an indiscriminate increase in compensation should have the most searching scrutiny.

This might imply that there is something wrong in the association of postal employees for mutual benefit. If so, it is an undeserved thrust at one of the most hopeful things in the entire Postal Service—the spirit of team work and cooperation which has made this great public-service enterprise a very marvel of achievement. Pliable workers may be desired by one type of employer, but the history of modern industry is proof that efficiency comes only through capable workers inspired by the spirit of fraternity and organized cooperation. That fact was clearly demonstrated during the war when the War Labor Board urged consideration of workers on the single ground that it was essential in order to secure efficient production in a time of national crisis.

As to its importance in peace-time industry, I can do no better than quote William B. Dickson, vice president Midvale Steel & Ordnance Co. He says:

If the individual is debarr'd from association with his fellow workers, he is no longer a free man but a serf; and the serf has no place in the future of America.

Aside from this phase of the question, it is true that the only assurance of just treatment for postal workers is found in their organization. Without it they are utterly helpless to do the one thing we permit them to do—arouse public sentiment and respectfully ask relief from Congress. Individual workers can do nothing, and they selected representatives who conducted their cause in scrupulously honest style. They made only respectful requests and won support only by the righteousness of their aims. The Canadian postal workers went on strike to enforce their demands. The American postal employees, led by their own organization leaders, kept faithfully to their tasks. That kind of patriotic organization of Government workers deserves praise, not rebuke.

What does "indiscriminate increase in compensation" mean? Such a phrase can not be applied to the schedules of the vetoed bill, since the most careful classification of the employees was therein enacted. Each grade and each class was given its proper appraisal in the deliberate judgment of committees and Congress.

Nor was any measure ever given more searching scrutiny than the postal pay bill in the last session. It was introduced on December 20, 1923, and the final conference report adopted June 6, 1924. Between those dates there was continuous and painstaking study. Every line was scrutinized time and again by the committees of the House and Senate. There was no haste, but, rather, unprecedented deliberation. The final draft was the composite judgment of the Post Office Committees, responsible for such legislation.

Their finished task was approved by the public, by business organizations, and by a practically unanimous vote in both Houses of Congress. Whatever else the postal pay bill was or was not, it was not "indiscriminate," and it was not enacted without the most searching scrutiny.

Mr. Chairman, it is further argued that governmental extravagance must stop and that before additional obligations are created they should be proven essential to the best interests of the Nation.

In his Labor Day speech, September 1, 1924, at Washington, D. C., President Coolidge said:

If anything is to be done by the Government for the people who toil, for the cause of labor, which is the sum of all other causes, it will be by continuing its efforts to provide healthful surroundings, education, reasonable conditions of employment, fair wages for fair work.

The actual facts as to the privations borne by American toilers of the Postal Service—fathers of families—because of unfair wages for more than fair work, challenge immediate action. Call the long roll of those who can not provide healthful surroundings for their families. Review those who are forced to rob their children of education in order to raise the family income to subsistence level. Count the number of those who are forced to take an extra job at night and thus forego any reasonable conditions of employment. That pitiful procession will prove that the Government, through

past neglect and the failure of this vetoed bill is responsible for a denial of all these rights of labor; the sum of all other causes. The final defeat of this measure means a blow against the children who must grow up under scant provision that inadequate pay makes necessary. Ninety per cent of the trained and specialized employees of the great United States Postal Service receive less than \$2,000 a year, and 82 per cent receive less than \$1,800 a year. That one statement portrays the present situation better than volumes could do.

There is nothing so essential to the best interest of the Nation than that its workers who render faithful service shall have just reward for their service. That reward must not be less than a living wage.

If there is any other problem which can better demand solution on the plans of urgent necessity, I do not know what it is.

To say that an honest attempt by a practically unanimous Congress of peoples' Representatives is extravagance and that its negative by presidential veto is economy is the use of words in a fashion not understood by the American people. In every way possible they have shown that they know that justice is not extravagance, and injustice is not economy. Unwise economy is the real extravagance. A man is not necessarily a true economist who believes in spending the least money. One of the leading automobile experts of this country has said:

In the effort to get too many miles to the gallon of gas, too many miles of service from tires, and too many miles of service per dollar invested in repairs and adjustment, car owners are paying the piper to the tune of millions of dollars annually.

He declares that more fines are paid for exceeding the economy limit than are collected by all the police courts in the country.

Exactly the same logic can be applied to the Postal Service. There has been wonderful service given by the employees, and it has been unusually economical, but it is a fallacy to assume that it should therefore be entirely neglected until a break down occurs. Putting compensation on a just basis now will forestall a tremendous bill for the repair of a great service which is certain to be demoralized by the continuance of salary schedules which are lower than those of 1913.

The unprecedented approval of the American people for readjustment of these salaries is proof that they believe that justice in postal pay is economy and injustice is extravagance.

Mr. Chairman, it is further argued that the postal salaries bill makes no provision for increasing postal revenues to meet the expenditure.

This suggests a new departure in postal policy—that postal wages must depend on postal revenues. If there is to be no adjustment of postal pay because of the effect on postal profits, we must transform the postal system into an enterprise for profit rather than service. Political platforms have often demanded adequate wages for postal employees, but I have yet to read the plank which made postage rates the determining factor. Here is the plank of the Republican platform of 1920, upon which this administration came into power:

The United States Postal Service should be operated for service rather than profit. There is no true economy in destroying the efficiency of the Post Office Department by curtailment of the service it has hitherto performed or by failure to properly compensate employees whose expert knowledge is essential to the proper conduct of the affairs of the postal system.

In all the history of the Postal Service there has never been a salary bill coupled with a postage rate bill. Never before has fair treatment been refused postal employees on the basis that inadequate postage rates are insufficient to create a money surplus. It has always been believed that the question of just wages for employees was to be settled on its own merits, since the postal system was operated for service, not for profit.

As to the bill which was vetoed, the Postmaster General urged that no postage provision be carried, because, as he said:

No readjustment of postage rates or special fees can be made intelligently until the cost ascertainment has been made.

The committees agreed with the Postmaster General and also believed that the only sensible way to adjust income and outgo is to fix production costs. We believed that an increase in pay is justly due the employees.

We proposed to fix those schedules and then, when the amount needed to make the service approximately self-sustaining had been determined, to fix postage rates based on that experience.

The question of postage rates is important, and since they are still at pre-war levels in spite of great advances in every-

thing which enters into Postal Service, it is self-evident that changes should be made.

Numerous bills were before the committees providing for adjustment of postage rates.

No action was taken on these, expressly at the request of the Postmaster General. His suggestion to await the findings of the cost ascertainment commission was accepted. The committee is ready and eager to proceed to the question of postage rates. However, we have always maintained that the first question is, Shall postal workers have a living wage? The postal deficit is not more important than the deficit in the household budget of postal employees forced by the present pay.

In fact, all wage increases for postal employees in the past have been carried by the increased efficiency of the workers themselves. Postal labor costs are relatively lower to-day than in 1913. The production per unit is greater than ever before. The employees have speeded up their work, have taken on extra loads. They will do the same with a large part of the \$65,000,000 additional cost under this bill. The present rate of increase of revenue over expenses shows that the sum can be largely absorbed by the postal workers.

Of course, if the Postal Service is to be run for profit, there must be a complete change in administration. Every activity which does not show a profit should be lopped off.

If that is to be the policy, then the postal employees, in all fairness, should have a voice in fixing postage rates and in eliminating all postal activities which do not pay their way. If their wages are to be dependent on profits they must have a chance to help make profits.

Surely that is not to be the policy of the Postal Service. The American people are proudest of their postal system because it is the most efficient instrument of democracy in the Nation. They have never protested because revenues have fallen behind expenditures in any year. They believe that the service should be approximately self-supporting, but they know that the small amounts required to balance accounts is the best expenditure made by the Government.

I am in favor of reducing taxation to the very lowest point possible consistent with national obligations. I count the first and foremost national obligation the duty of paying a living wage to faithful servants of the Government. Let us reduce the income of the Government, but let us pay the honest debt first.

The post office employs more people than the combined forces of the Army and Navy. It serves more people than all the other departments combined. Last year the Army and Navy cost \$670,000,000, while the post office received from the General Treasury the sum of \$32,000,000. With its universal service to 110,000,000 Americans, the post office, because of the deficit, got 98 cents out of each \$100 spent by Uncle Sam.

The salary increases provided in the bill were dated from July 1, 1924. It would require about \$32,500,000 to meet these advances to January 1, 1925, and this would be paid from Treasury receipts of 1924. It was announced shortly after Congress adjourned that the United States Treasury showed a surplus of \$300,000,000 for the fiscal year 1924. Surely America does not mean to take as her motto "Millions for surplus, but not one cent for underpaid public servants." Paying those increases will simply mean the expenditure of \$1 out of every \$100 spent by Uncle Sam, and it will not mean an additional cent in taxation. The United States can not afford to pay its faithful servants starvation wages.

Mr. Chairman, it is further argued that although the Postmaster General has authority to increase parcel-post rates without legislation, such increases would bear heaviest upon the farmers, who are the largest users of parcel post.

That the farmer is the largest user of parcel post is a popular error. Instead of the farmer being the largest user of parcel post, he is the smallest. Sears, Roebuck & Co., mail-order house of Chicago, send out more parcel-post packages in a year than all the farmers in America send in a year.

The only figures ever taken on the volume of parcel post to and from farmers and dwellers in rural communities were collected by the Post Office Department for July, 1920. That month there were 8,534,643 pieces of parcel-post matter delivered to patrons of rural routes, and 1,292,837 pieces collected from them, a total of 9,827,480. Extended for the year it would mean that 117,929,760 pieces of parcel-post mail matter were received and sent by the patrons of all these rural routes.

From these figures all the dwellers on all the rural routes sent out in a year 15,513,014 parcel-post packages. The manager of Sears, Roebuck & Co. informed me, under date of October 1, 1924, that his company sends out more than 30,000,000 parcel-post packages in a year.

The Postmaster General's report for 1920 states that—

The total number of pieces of parcel-post mail handled during the past fiscal year is estimated to have exceeded 2,250,000,000.

Based on these figures, the only ones available, the farmers of this country receive and send 5 per cent of the number of parcel-post packages handled in the United States mails.

In July, 1920, the total postage received by the Post Office Department from parcel-post mail delivered on rural free-delivery routes was \$905,110.02. The postage from parcels collected was \$122,135.35, a total of \$1,027,245.96. Extended for the year that would mean annual revenue from this source amounting to \$12,326,951.52. The Postmaster General's report for 1920 estimates the total postage from parcel post at \$150,000,000.

Based on these figures, the only ones available, all the patrons of all the rural free-delivery routes paid 8 per cent of the postage received from parcel-post matter.

The total postage received from all classes of mail collected and delivered, on all rural free-delivery routes in July, 1920, was \$4,291,860.93, which makes for a year \$51,502,231.16. The appropriation by Congress for the rural free-delivery routes alone for the fiscal year 1920 was \$68,800,000. Crediting all the postage on all mail sent to these patrons as well as all postage on all mail sent by them and there remains a deficit of more than \$17,000,000. Surely it is evident that a slight increase in parcel-post rates would not require the contribution of a large sum from farmers to postal employees.

The parcel-post rate is to-day lower than the pre-war rates. It is apparent to any fair-minded observer that an increase here is justified and will not injure the service.

But above all, the supreme fact remains; postal salaries should be fixed at a fair rate; then postage rates can be adjusted to make the postal system practically self-sustaining and give the maximum service at the minimum cost to postal patrons.

I have reviewed every argument and objection made during the entire course of the consideration of the postal salaries bill, and I appeal to your judgment as to whether or not they are so compelling as to lead you to reverse the decision you made in June.

There is added force now for every argument made by the proponents of this measure in June. The trend of prices for the necessities of life is sweeping upward. Wages in other lines are being increased, and all indications point to a business advance which always means a rising scale of prices. If we refuse or neglect to act, the result will be a reduction in pay, based on purchasing power, for every employee in the great Postal Service.

Mr. BUCHANAN. Mr. Chairman, I yield 15 minutes to the gentleman from Texas [Mr. MANSFIELD].

Mr. MANSFIELD. Mr. Chairman and gentlemen of the House, a Washington paper, in its issue of the day before yesterday, contained an article in regard to the pending river and harbor bill, which, with the headlines it adopted, has attempted to create a very erroneous impression. I have clipped the article, and I ask the Clerk to read it in my time.

The CHAIRMAN. Without objection, the Clerk will read. The Clerk read as follows:

PORK BARREL BILL SPEEDED IN HOUSE—RIVERS AND HARBORS MEASURE CARRIES \$53,565,650; RIGHT OF WAY URGED

After 10 lean years Members of Congress indicated they had a keen appetite for "pork" yesterday when a move was made in the House to speed action on the river and harbor bill, carrying \$53,565,650 for 34 new projects.

Urged on by Members from States that will benefit, Representative DEMPSEY, of New York, chairman of the Rivers and Harbors Committee, resubmitted the report on the measure, so as to give it a privileged status.

DEMPSEY and the Republican members of the committee will appear before the Republican steering committee to-day to urge that the bill be given right of way soon. DEMPSEY believes the bill may pass at this session, and Senators are understood to be just as hungry for "pork" as the Representatives.

Although Congress revolted against the economy program and succeeded in getting through a rivers and harbors bill in 1922, the old-fashioned "pork barrel" bills all but disappeared early in the Wilson administration.

Mr. O'CONNOR of Louisiana. Will the gentleman yield? Mr. MANSFIELD. I yield.

Mr. O'CONNOR of Louisiana. Is the gentleman quite sure this article in reference to pork-barrel legislation was from a Washington newspaper?

Mr. MANSFIELD. Yes, sir; it was in a Washington newspaper I am sorry to say. Mr. Chairman, I thought that the

method of procedure in securing river and harbor legislation had become so well known that no man of intelligence would attempt to make a charge of pork barrel against a river and harbor bill as they are enacted at this time, and for the purpose of getting more clearly before you and before the country the method of procedure I have here, from the Record, a statement made by the late James R. Mann, for many years the very able leader of the Republican Party in this House, a man who as a statesman had few equals, and as a parliamentarian had no superior. I ask the Clerk to read that statement from Mr. Mann.

The CHAIRMAN. Without objection, the Clerk will read. The Clerk read as follows:

Whatever men may think about the merits of particular propositions in a bill, there is no legislation which comes before Congress which is so critically scanned by experts as are the river and harbor bills before they reach the House. . . . There are more processes involved, and far more expert men, wholly disinterested, unbiased, uncontrolled by politics, in reference to a river and harbor item than for any other legislation provided by any legislative assembly in the world.

Here are the steps through which any river or harbor project must pass before any work is authorized to be done on it:

1. Authorization by Congress for a preliminary examination and survey. In effect, this authorizes the Chief of Engineers to direct the district engineer in whose district the proposed improvement lies to make a preliminary examination and to report to him whether there appears to be sufficient merit in the proposal to justify a thorough examination and survey.

2. The district engineer makes this preliminary examination, and his report, which deals largely with present and prospective commerce and the benefits to commerce which the proposed improvements would afford, is sent to the division engineer.

3. The division engineer, who is a senior officer, with years of experience on river and harbor work, and has supervision over several districts, examines the report of the district engineer and makes his comments on it, and any recommendations he may see fit and sends it on to Washington.

4. It is then turned over to the Board of Engineers for Rivers and Harbors, which is a body specially created by law to review all river and harbor projects in an impartial way and from a strictly national point of view. This board reviews the report of the district engineer and the comments of the division engineer, and reports the whole matter to the Chief of Engineers with its views and recommendations.

5. The Chief of Engineers then examines the report of the district engineer and the comments and recommendations of the division engineer and the Board of Engineers for Rivers and Harbors in order to determine whether a thorough examination and survey are justified by the present and prospective commerce and the benefits to commerce which the proposed improvement would afford. If his decision is unfavorable (5a) the Chief of Engineers so reports to Congress. Congress may let the matter drop there, and the matter is ended. If, however, they think that any facts or considerations have been overlooked or not given sufficient weight they may (5b) authorize a further examination of the proposed improvement and a subsequent report to Congress.

If in step 5 the decision of the Chief of Engineers is favorable, or if Congress has authorized further examination, as in step 5b, then—

6. The Chief of Engineers directs the district engineer, or such other officer or board as he may designate, to make a thorough examination and survey of the proposed improvement and to make recommendations as to exactly what work should be done and an estimate of how much it will cost and the rate at which the work should be prosecuted. This report also completes, as far as possible, commercial statistics and gives consideration to such subjects as the adequacy of terminal facilities, the possibility of water-power development, etc.

7. This report is transmitted through the division engineer, who again makes his comments and recommendations and forwards it to Washington.

8. The report, with the comments of the division engineer, goes to the Board of Engineers for Rivers and Harbors, which reviews the whole question and makes its report and recommendations to the Chief of Engineers.

9. The Chief of Engineers examines the report of the district engineer or other officer or board and the comments and recommendations of the division engineer and the Board of Engineers for Rivers and Harbors.

10. The Chief of Engineers sends to Congress his report and recommendations on the proposed improvement, either transmitting in full or summarizing for the benefit of Congress the views and opinions of the district engineer, the division engineer, and the Board of Engineers for Rivers and Harbors.

11. This report is referred to the proper committees of Congress—the Committee on Rivers and Harbors in the House of Representatives and the Committee on Commerce in the Senate.

12. Hearings are held by these committees, at which all interested parties are given an opportunity to be heard, and at which the Chief of Engineers and his assistants may be asked for further information. If the decision of the committee is favorable, then—

13. The committee includes an item for the proposed improvement in a bill which it reports to its House of the Congress with the recommendation that it pass.

14. The bill must pass both Houses of the Congress and be approved by the President. The proposed improvement then is an adopted project, and work is authorized upon it when Congress shall have provided the necessary funds.

Mr. MANSFIELD. Mr. Chairman, it occurs to me that the statement by the late Mr. Mann is a complete answer to any charge of pork barrel that might be brought against a river and harbor bill. It is not my purpose at this time to discuss in detail the pending river and harbor bill, but will refer to a few of the major projects. This newspaper does not pretend to point out any item in the bill which it claims to be pork. Every item in the bill was brought about and prepared just in the manner as stated by Mr. Mann, and I take it for granted every Member of this body knows that such a thing as "pork" getting into a bill under the present method of procedure is an absolute impossibility.

Mr. GREEN. Will the gentleman yield?

Mr. MANSFIELD. I yield to the gentleman from Iowa.

Mr. GREEN. My district has no interest in the pending bill and it has not had any as far back as I can remember. But as described by Mr. Mann the fact is that all of these projects must be gone over by these engineers very carefully in detail and report; and these men, if I understand the gentleman correctly, and every Member of the House knows about it, have no interest whatever in a project except to do what is best for the country nationally. I am speaking about the engineers of the War Department.

Mr. MANSFIELD. Yes, sir.

Mr. GREEN. Now, as I understand it, if they have not reported favorably there is practically no chance of the bill getting favorable consideration from the Congress.

Mr. MANSFIELD. I consider it impossible.

Mr. GREEN. Yes; I might have gone further, it is practically impossible. If they do report favorably, the bill has even then a long, weary road to travel before it is adopted.

Mr. MANSFIELD. The gentleman is entirely correct.

Mr. BLANTON. Will the gentleman yield for a question?

The CHAIRMAN. The time of the gentleman has expired.

Mr. BLANTON. May I ask my colleague to yield one additional minute?

Mr. MAGEE of New York. I will yield 10 minutes' additional time to the gentleman from Texas.

Mr. BLANTON. My colleague has referred, of course, to the present situation with regard to such bills, but he does not mean to carry the intimation that there has not been pork in some such bills in the past, does he?

Mr. MANSFIELD. I will say to the gentleman that that was possibly true at one time in the history of this country.

Mr. BLANTON. Because the gentleman knows, concerning the Trinity River in our State, there has been spent over \$2,000,000, a stream that could hardly be called a very large river.

Mr. MANSFIELD. I will state to the gentleman that the Trinity River has long since been abandoned by the engineers and by the Congress.

Mr. BLANTON. But it should have been abandoned long before the \$2,000,000 was spent.

Mr. MANSFIELD. Well, the engineers are not infallible, of course, and it is possible even for them to make mistakes sometimes. I do not say they did make a mistake as to the Trinity, but it seems they recognized the fact that navigation on the upper portion of the river was impracticable without the expenditure of a greater amount of money than at first estimated, and that the demands of the commerce were not sufficient to justify it. They recommended its abandonment, and Congress very promptly suspended the work. I will state, however, that they have made very few mistakes, as the record will show. Since the year 1824 slightly more than \$1,000,000,000 have been spent for improvement and maintenance of rivers and harbors, and the annual report of the Chief of Engineers shows that only \$20,000,000 has gone upon projects that have been abandoned. This record of a century is without a parallel in any other line of expenditure. The annual report of the Chief of Engineers also shows that our waterways last year bore a traffic of more than 442,000,000 tons, having a valuation of more than \$19,000,000,000. This tonnage of one year justified the expenditures of a century.

Mr. TAYLOR of Colorado. Will the gentleman yield?

Mr. MANSFIELD. I will yield to my friend from Colorado.

Mr. TAYLOR of Colorado. I want to ask the gentleman when an appropriation is pork? Does it not depend entirely on the opinion of a great many people as to where it is located? [Applause.]

Mr. MANSFIELD. The gentleman is correct, and the man who wants pork himself is generally accusing somebody else of pork.

Mr. TAYLOR of Colorado. The spending of millions of dollars in the city of Washington is wise, but spending any outside of Washington is pork. [Applause.]

Mr. MANSFIELD. Yes, sir; that is the way some of our Washington newspapers seem to regard it. I will state, with reference to the bill, that in so far as I am capable of understanding it, and I think I understand it fairly well, it does not contain a solitary item that is not of more than local benefit.

Nearly every item in it and at least every major item is of national consequence. Take the three or four major projects, including that of the Hudson River, for instance. It provides for a \$10,000,000 project on the Hudson River. That is not for the sole benefit of the people who live along the banks of the Hudson River. It is a national proposition. It is of vastly more benefit to the wheat growers of the Northwest than to those who live along the river.

Mr. GREEN. It does those on the Hudson practically no good.

Mr. MANSFIELD. It does them comparatively little good. They are not the ones who are contending for it. Among others the wheat growers of the West are contending for it. One of the largest items of shipment over that stream is wheat, and this will be greatly increased if this project is put through. There were 11,000,000 tons of wheat carried last year over the Great Lakes from the northern wheat districts of the United States.

When this wheat comes a thousand miles or more over the Great Lakes at the lowest freight rate known to the world, with the exception of a few of the streams in Europe, much of it is then exported. Some of it is diverted down through the Welland Canal and the St. Lawrence River, through British waters, and is exported on British ships. Some of it comes over the New York Barge Canal and is exported and carried abroad in American ships. The improvement of this stream as proposed will make a ship channel of the Hudson River as far as Albany and Troy and within a few miles of the connection with the barge canal, which is owned and operated by the State of New York. This improvement of the Hudson will be of vast benefit to the bread consumers of New York and of all sections of the East. It will be of vast concern to the State of New York, which receives the benefit of the toll charge for conveying the additional freights. It will be of vast benefit to the wheat growers of the great Northwest, who will have an additional outlet at reduced rates for disposing of their surplus products. It will be of benefit to the United States generally by having those products exported in American bottoms and in ships owned by the United States Government.

It is a very narrow view for anyone in judging of these propositions to consider them solely from the standpoint of some person immediately upon the ground. The Committee on Rivers and Harbors had a very different view from that expressed in the Washington newspaper concerning this bill. They have very carefully gone into every item in it. They have conducted hearings for months and months, and everything upon which there was the slightest doubt as to its great importance to the people of this country was completely eliminated before the bill was reported to the House.

I can see why railroads might want to befuddle the minds of the people where water transportation competes with them. They are quitting it to some extent, but in some instances they are keeping it up. But I am unable to understand why a great newspaper published here in the National Capital should attempt to do anything of that kind.

There is another thing that this article attempted to do. It attempted to create the impression that it is the Republican Party that is doing the "pork barrel" business. It says pork was eliminated under the administration of Woodrow Wilson, but that the Republican members of the Committee on Rivers and Harbors are now attempting to restate it.

There is not a word of truth in that. The Republican members of that committee, like the Democratic members, would stand as a unit against any project which did not have the favorable recommendation of the Chief of Engineers and which was not further shown conclusively by the investigations to have been in response to the urgent demands of commerce.

Neither did President Wilson, so far as I am informed, do anything to eliminate "pork" from river and harbor bills, because at the time of his administration it was not possible for "pork" to have been embraced in such measures. President Wilson was a great man, it is true, a great friend of waterway improvements, and would have done anything possible to discourage or eliminate such procedure if it had existed, but it did not exist in Congress at that time.

The Republicans, in fact, have done one thing that perhaps goes further to eliminate the possibilities of "pork" from river and harbor expenditures than anything else that has ever been done on either side of the aisle. It was a Republican Congress that adopted the plan of lump-sum appropriations, taking it out of the hands of Congress altogether and placing it in the hands of the engineers, where it is supposed that the money would be expended scientifically and by those who have no special interest involved in any particular project. Even if it had been possible for "pork" to have crept into the legislation, this would have eliminated it in the administration.

Mr. LAZARO. Mr. Chairman, will the gentleman yield for a question?

Mr. MANSFIELD. I yield to the gentleman from Louisiana.

Mr. LAZARO. Will the gentleman explain to the House a provision of the bill under which, when a project is started, it must be completed within five years in order to protect the Government?

Mr. MANSFIELD. In reply to the gentleman from Louisiana I will say the bill provides that all projects heretofore adopted must be completed within five years from the passage of the act, and all subsequent projects must be completed within five years from their adoption. If it is found physically impossible to complete any of them within that time, the Chief of Engineers must clearly set forth the reasons in his annual report.

That is one of the wisest provisions ever placed in a river and harbor bill. Our great inland waterways, like the Mississippi, Missouri, and Ohio Rivers, have had a tortuous road to travel. Largely due to the opposition of the railroads, and with a hostile press to deal with, the country has been falsely led to believe that the most meritorious projects are but grafting schemes to get money out of the Treasury. As a consequence the appropriations have been held down until they were insufficient in some instances to even salvage the work until another dribble could be obtained. Projects that ought to have been completed in a few years are still uncompleted after more than a quarter of a century. Much of the money has consequently gone to absolute waste and the commerce of the country has suffered.

What we ought to do is to put up the money and let all of these projects be completed as soon as it is physically possible to do so, just as Roosevelt dug the Panama Canal. If he and Goethals had fooled along with that job like the Ohio, Mississippi, and Missouri Rivers have been permitted to lag it would not have been completed within a century. It is now thoroughly demonstrated that navigation on these rivers is entirely feasible, and that the completion of the improvements is an urgent necessity. Though the improvements are but partially completed on the Mississippi, enough wheat was conveyed to New Orleans by the Government barge line last year to result in a saving of more than \$4,000,000 to the farmers who produced it. Other lines of shipments produced similar results.

The Intracoastal Canal of Louisiana and Texas is the largest project in the bill, the estimated cost of which is \$10,000,000. This is not a new project, but the enlargement of an existing waterway. It now has a depth of 5 feet and bottom width of 40 feet, which is not of sufficient capacity to handle the commerce. The proposal is to make it 9 feet deep and 100 feet wide, the work to extend through a period of four years, the appropriations authorized not to exceed \$4,000,000 in any one year. This depth of 9 feet will be uniform with that of the Mississippi system, with which it will connect, and permit of through transportation without change of equipment or transfer of cargo.

The bill contains a provision with reference to this project that is entirely new to waterway legislation in this country and one that will be an absolute guarantee that the canal will be used for navigation. It provides that the work is not to be commenced until the Secretary of War has satisfactory assurances that local interests will provide the necessary equipment for the economic handling of 1,200,000 tons of commerce annually. This will involve a local investment estimated at \$5,000,000.

This waterway, while greatly beneficial to 6,000,000 people in Louisiana and Texas, will be of almost equal benefit to more

than 30,000,000 residing in other States. The enormous production that has recently developed along the line of the canal, consisting largely of sugar, rice, cotton, salt, sulphur, oil, asphalt, and gasoline, must necessarily go abroad or to the interior for consumption. The wheat, corn, steel and iron products, cement, coal, farm implements, and automobiles consumed in that section and in Mexico must necessarily come in whole or in large part from the interior States.

The nature of nearly all of these commodities is such as not to profitably permit of their entering into commerce involving long hauls by rail. Some cheaper method of transportation must therefore be provided or else both producer and consumer at both ends of the line will become the victims of loss or deprivation.

With its eastern connection this waterway will be the equivalent of an extension of the Ohio-Mississippi-Warrior system, 600 miles to the southwest, through a territory that has recently become remarkable for the products of the soil, mine, and factory. Its western terminus will be in close communication by rail over several lines and at short hauls with the Mexican border and with the United States military headquarters of the southwest at San Antonio.

It is also the nearest point for water transportation with the recently discovered potash deposits of west Texas, underlying many square miles, and which the tests so far made indicate will be of sufficient capacity to provide that necessary ingredient to fertilize all of the farm lands of the United States for a century if not for all time.

The canal will intersect and form one of the principal feeders for the ports of New Orleans, Morgan City, Lake Charles, Orange, Beaumont, Port Arthur, Texas City, Houston, Galveston, Freeport, and Corpus Christi. The commerce of these ports for the year 1923 aggregated 41,307,129 tons, with a valuation of \$2,007,187,211.

This tonnage consisted largely of sulphur, oil, and cotton, embracing approximately one-half the entire cotton crop of the United States. By way of illustration, it would be sufficient to load a freight train long enough to extend four times across the continent from New York to San Francisco, and a very large proportion of the commerce for these ports will necessarily be over this waterway when completed.

Col. George M. Hoffman, division engineer, in his report on this project, says:

Probably nowhere in the world are conditions so favorable for the economical construction and the efficient use of an inland waterway of the first class as in the case here presented.

The waterway, with its connections via the Mississippi and tributaries, the Intracoastal route to Mobile, and the Warrior system, reaches many States of diverse needs and production. In the general case freight rates are high, and analysis thereof would have made an impressive showing, but the intricacies of the question and the magnitude of the work involved rendered any comprehensive investigation impracticable within a reasonable period. Lands traversed are fertile and capable of high agricultural development. Mining and manufacturing possibilities are tremendous. Grazing lands abound. Fisheries are unequaled. Large areas of hard and soft woods are still uncut. Climate is salubrious, many coast resorts being popular the year around.

Both for a connection between great producing and distributing centers, and as a much-needed local main thoroughfare, the proposed waterway gives excellent promise of furnishing a much-needed transportation and development agency.

This language of Colonel Hoffman is pertinent and expressive, and the canal is destined to be equally beneficial for both the local and interstate traffic. When in operation in connection with the Mississippi system, Pittsburgh, St. Louis, Mobile, and Birmingham, as well as all intermediate points, will be brought in direct water communication with all points on the line of this canal. When the Mississippi projects are completed, Chicago, Minneapolis, and Kansas City will be included.

This will have the effect of an approximate 50 per cent reduction in rates on coal, structural steel, iron pipe, barbed wire, nails, farming implements, wagons, automobiles, and accessories consumed in western Louisiana and Texas, while the rates on wheat, flour, and corn will be very materially reduced. At the same time the northern consumers will get the benefit of reduced rates on sugar, rice, salt, sulphur, oil, and gasoline.

The canal, extending so near the Mexican border, will open an additional market in that country for the products of the northern farms, the mines, and the mills. The Jones & Laughlin Co. and the Carnegie Steel Co., of Pittsburgh, have each expended several million dollars on tows and barges for operation on the Ohio and Mississippi. This shows their faith in the proposition. They assure us they will be very glad to extend their operations to the intracoastal canal and have a great distributing point in Texas.

These companies also consume about 42,000 tons of sulphur annually in the production of steel. This, to a certain extent, will afford return cargoes for their own use. The sulphur they are now consuming is carried in the coastwise trade to Baltimore, thence by rail to Pittsburgh.

Gen. George W. Goethals, who by reason of his great success in the construction of the Panama Canal is regarded as one of the world's greatest engineering authorities, was employed by interested parties to make a commercial survey of this waterway. He tells us he entered upon the task with skepticism but wound up as an enthusiast. He conducted hearings in nearly every town on the line of the canal. His report shows in detail the kind, character, and probable amount of freight that will be handled, giving the points of embarkation and of debarkation. It shows a potentiality of 12,315,953 tons, but he estimates that the present tonnage, conservatively stated, will be between 5,000,000 and 7,000,000 tons annually.

The salt mines of Louisiana, or islands, as they are called, are in operation close by the side of the canal, turning out thousands of tons of pure rock salt. By reference to the statement of General Beach in the hearings it will be seen that the test borings show conclusively that the capacity of one of these islands alone is sufficient for the entire world consumption for a period of 10,000 years.

The saw and planing mills of western Louisiana and eastern Texas are located directly on the canal and on navigable bays and channels connecting with it. These mills are annually turning out many millions of feet of lumber and constitute the principal source of building material for more than one-twelfth of the population of the United States.

The sulphur mines of western Louisiana and at Freeport and Gulf, Tex., likewise on the line of the canal, are producing and shipping more than 2,000,000 tons of sulphur annually. There are three of these great sulphur mines in operation, of about equal production. The entire output of one of them will necessarily have to pass over this waterway. The other two, on account of their location near the ports, and having their own rails and port facilities, may use the canal for the interior trade only.

At Port Arthur, on the canal, are located the oil refineries of the Gulf and Texas companies, in which 13,000 men are employed. These refineries are connected by pipe lines with practically all of the oil fields of Louisiana, Texas, and Oklahoma. One of these refineries is the largest of its kind in the world, while the other is a close second. These companies have given the assurance that they will use the canal for the interior trade. Gasoline is selling in Texas at 4 cents per gallon less than in Washington. With the cheaper water rate on the canal and its connecting waterways, the price of gasoline should be materially reduced to consumers in nearly all northern and eastern sections of the United States.

The canal, in its course, will pierce the heart of the sugar belt, the rice belt, the salt belt, the lumber belt, the oil belt, and the sulphur belt of the great Southwest. It also penetrates a country unsurpassed in the production of cotton and of cattle. The great sugar refineries, rice mills, cotton compresses, and cotton-oil mills are located on its line, in both States. In Louisiana it intersects a dozen or more canals and bayous on which more than 1,200 power boats are now engaged in the handling of commerce. In both States the fish and oyster industry has assumed enormous proportions, for which the canal will be used, at least locally.

The canal touches 12 counties in Texas, some of which have more than 100,000 head of cattle, as shown by the records of the Federal and State authorities engaged in the work of tick eradication. This is the section of the State so largely devoted to the breeding of the famous Brahman, or sacred cattle, originally imported from India, as shown by a recent farm bulletin of the Department of Agriculture. These cattle, on account of their enormous size, quick growth, and ability to resist insect pests are rapidly supplanting other breeds of beef cattle. There are now many thousands of them in this section.

In Nueces County, in which the canal has its western terminus, 92,250 bales of cotton were ginned in the year 1923, as shown by the Bureau of the Census. Many other near-by counties are large producers of cotton. Later, should occasion permit, I shall attempt to tell of the commercial resources of the territory contiguous to this waterway.

Mr. BUCHANAN. Mr. Chairman, I yield half a minute to the gentleman from Colorado [Mr. TAYLOR].

Mr. TAYLOR of Colorado. Mr. Chairman, I ask unanimous consent to extend my remarks on the Interior Department bill.

The CHAIRMAN. The gentleman from Colorado asks unanimous consent to extend his remarks on the Interior Department bill. Is there objection?

There was no objection.

Mr. TAYLOR of Colorado. Mr. Chairman, as a member of the subcommittee of the Appropriations Committee in charge of the Interior Department appropriation bill I have attended the hearings of our committee on that bill very diligently, and the printed volume of 1,004 pages of those hearings will show that we have made an exhaustive investigation of all the needs of that department and its 15 various bureaus, and I am thoroughly in accord with the policy of this administration and the House in desiring to practice economy in every possible direction, and this bill conclusively shows that our committee has pared the estimates upon all of the thousands of items covered as far as a sound policy will permit us.

But there is one instance in which I have felt all along that the committee has gone further than is justified. I have reference to the item in the bill abolishing a large number of United States land offices. There is no doubt but what some two dozen land offices throughout the United States could well be and should be abolished. And I understand the Members of the House representing those districts would not seriously object to the reduction of land offices to that extent. But this bill goes much further and abolishes land offices that would work a very great hardship upon many thousands of people throughout the West; and I feel that that hardship is not at all warranted by the small amount of saving that would be accomplished thereby. But as all of those land offices are in one item in the bill, and the amendment is to strike out the entire item, so that all must be retained or none, I feel constrained to vote to retain all of them rather than abolish some 25 or 30 that ought not to be abolished.

I have no authority to speak for my colleagues from Colorado, but I feel reasonably confident that neither Mr. TIMBERLAKE nor Mr. HARDY would object to the abolishing of the land offices at Lamar and Sterling, Colo. But in the case of Durango and Leadville, Colo., the facts do not at all warrant their discontinuance at this time.

The official report of the Interior Department for the fiscal year ending June 30, 1924, shows that in the Durango land office there were at that time unappropriated and unreserved public lands, 403,063 acres, and there were unperfected entries covering 495,348 acres, and there were 189 applications for entries, and that there were original entries on 20,777 acres, and final proofs made on 21,963 acres, and 66,842 acres were patented during that fiscal year; that there were cash receipts during that year amounting to \$13,102.31, and the total expenses of running the office were \$5,886.39; that is, the total expense of running the office in relation to the revenues received was 44.92 per cent.

While in the Leadville land office there are now 159,704 acres of unreserved and unappropriated lands and unperfected entries on 243,440 acres, and that during the past fiscal year there have been 219 applications and entries covering 35,393 acres and 35,144 acres upon which final proof has been made, and that 40,738 acres have been patented during the past year, while the total receipts of the office have been \$5,884.56 and the total expenditures have been \$4,337.15. In other words, the total expenses of running the office have been 73.70 per cent of the receipts.

But there are a great many other reasons for the maintenance of many of these land offices, including the two just mentioned, aside from the financial showing that is made by them. I have some specific statements from prominent citizens and business men's organizations appealing to Congress for the continuance of these two land offices which I think should be inserted in the Record to show the sentiment of the people in the communities affected by this contemplated action, and in pursuance of the permission to extend my remarks I herewith insert the following telegram from the Durango exchange and a statement following that from the business men of the city of Durango:

DURANGO, COLO., December 3, 1924.

HON. EDWARD T. TAYLOR, M. C.,

Washington, D. C.:

We earnestly protest proposed abandonment Durango land office. This office has nearly half million acres vacant land, about same amount appropriated with final proof yet to be made, together with similar acreage of mineral permits, leases, and applications. District covers area 60 by 130 miles and has nearly 2,000 present and prospective homesteaders, who will be seriously inconvenienced through abandonment. Large oil development now taking place here requires that office data be easily available. Durango office turned back nearly

\$4,000 last year after all expenses paid. By reason of extreme isolation this district we urge you to fight to retain office here. Our people unanimous on this question.

THE DURANGO EXCHANGE,
CHARLES E. HALL, Secretary.

Petition from the business men of Durango, Colo., protesting against the abolition of the land office in that city

Hon. EDWARD T. TAYLOR,

House of Representatives, Washington, D. C.:

We, the undersigned citizens residing within the Durango, Colo., United States land district, having been informed of the proposed abolishment of the United States land office at Durango, Colo., would hereby respectfully represent that it is our sincere belief that such action would work a real hardship on about 900 homesteaders who have unperfected entries, upon a large number of persons who have been granted leases, prospecting permits, and mineral rights under the different mineral acts, and upon the prospective entrymen for approximately 400,000 acres of vacant lands within the district.

The district served by the Durango office is hemmed in by the high and rugged San Juan, La Plata, and San Miguel Mountains on the east and north, and is extremely inaccessible to any other place to which said office could be removed. Distances are great, traveling is expensive and laborious by railway or other highways. The passable State roads through these barriers are very few and open to travel only about six months each year. The financial status of the average homesteader prohibits his traveling out of the area to a more distant land office in connection with his entry. We believe that few entries can be perfected without at least one or more visits to the local land office for the purpose of inspecting the records or for personal interview. The proposed action would have a disastrous effect upon the future development of the remaining vacant lands within this area.

We are reasonably sure that the office will continue to pay the operating expenses; that the cost of maintaining it is insignificant when compared with the value of the services rendered, and we contend that it is a genuine public need; that the district is entitled to the continuance of the office.

We therefore earnestly request that you, as our Representative, use your best efforts to prevent the removal of the Durango district land office.

Byrnes; Lela Timmon; George Smith; Perry & Co., by John Perry, jr.

I also insert herewith a telegram from the civic and mining organizations of Leadville, and a statement from a committee of prominent business men of that city, which are self-explanatory:

LEADVILLE, COLO., December 2, 1924.

Hon. EDWARD T. TAYLOR,

Representative from Colorado, Washington, D. C.

DEAR SIR: We respectfully request that you give earnest consideration to our protest against the contemplated steps to abolish the Leadville land office. In making this protest we speak on behalf of the people of this entire mining area of central Colorado, as well as the various civic bodies and mining groups. The Leadville land district embraces all of the important mining districts of central Colorado, and the location of the land office at Leadville is not only at the geographical center of this district but is also the railroad and business center of the area served. The business of the land office for this district has been for 40 years preponderantly mining, and the sales of land have been largely on mineral entries, not only in the unreserved areas but also very extensively in the much larger areas within the forest reserve. There still remains a very great area of unsold and unappropriated public land, especially within the forest reserves, and much of this area is mineral land suitable for preemption for mining purposes. While the business of the land office at Leadville has dwindled very markedly during the last three years, coincident with the slump in mining activities, that condition is only temporary and the business of the office will undoubtedly resume its former magnitude following in the wake of the present increase in mining activities.

The office always has been, and now is, more than self-sustaining.

There are 7,100 plats of mineral entries on file in this land office which form an invaluable source of information for the mining men of this district and are in daily use.

The principal occupation of the people of this district is mining, as is shown by the production of more than six hundred million from mining, and the land office supplies the only competent and complete record of the property rights on which this industry is based.

The removal of this office would not only be a severe hardship on the mining industry of this district but would seriously impair the completeness and usability of these records.

At present the land office is comfortably housed in the Federal Building and the records of the office are safely and conveniently arranged so that they can be readily referred to.

There is no other requirement for the space now occupied by the land office, and it would probably stand vacant if the land office were removed.

We consider that the trifling economy that might be effected by the removal of the land office would be dearly paid for by the hardship this removal would work on the people of this entire district.

Respectfully,

CIVIC AND MINING ORGANIZATIONS OF LEADVILLE.

LEADVILLE, COLO., December 3, 1924.

Hon. EDWARD T. TAYLOR,

Representative from Colorado, Washington, D. C.

DEAR SIR: We respectfully request that you give earnest consideration to our protest against the contemplated steps to abolish the Leadville land office. In making this protest we speak on behalf of the people of this entire mining area of central Colorado, as well as the various civic bodies and mining groups.

The Leadville land district embraces all of the important mining districts of central Colorado, and the location of the land office at Leadville is not only the geographical center of this district but is also the railroad and business center of the area served.

The business of the land office for this district has been for 40 years preponderantly mining, and the sales of land have been largely on mineral entries, not only in the unreserved areas but also very extensively in the much larger areas within the forest reserve. There

still remains a very great area of unsold and unappropriated public land, especially within the forest reserves, and much of this area is mineral land suitable for preemption for mining purposes.

While the business of the land office at Leadville has dwindled very markedly during the last three years, coincident with the slump in mining activities, that condition is only temporary, and the business of the office will undoubtedly resume its former magnitude following in the wake of the present increase in mining activities. The office always has been and now is more than self-sustaining.

There are seventy-one hundred plats of mineral entries on file in this land office, which form an invaluable source of information for the mining men of this district and are in daily use. The principal business of the people of this district is mining, as is shown by the production of more than six hundred million from mining, and the land office supplies the only competent and complete record of the property rights on which this industry is based. The removal of this office would not only be a severe hardship on the mining industry of this district but would seriously impair the completeness and usability of these records.

At present the land office is comfortably housed in the Federal Building and the records of the office are safely and conveniently arranged so that they can be readily referred to. There is no other requirement for the space now occupied by the land office, and it would probably stand vacant if the land office were removed.

We consider that the trifling economy that might be effected by the removal of the land office would be dearly paid for by the hardship this removal would work on the people of this entire district.

Respectfully,

JESSE F. McDONALD,
FRED J. MCNAIR,
M. A. NICHOLSON,
J. M. KLEFF,
WM. M. HARVEY,
A. G. THOMSON,

W. A. S. PARKER,
WILLIAM McCALLUM,
JOHN CORTELLINI,
GEORGE O. ARGALL,
S. P. McDONALD,
H. G. McCLAIN,

Committee.

Mr. TAYLOR of Colorado. I yield back the balance of my time.

Mr. BUCHANAN. Mr. Chairman, I yield 40 minutes to the gentleman from Missouri [Mr. JOST].

The CHAIRMAN. The gentleman from Missouri is recognized for 40 minutes.

Mr. JOST. Mr. Chairman, I ask unanimous consent to extend my remarks.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. JOST. Mr. Chairman and gentlemen, I desire to call your attention to, and say a word in behalf of, H. R. 5417, a bill which, if passed, will direct the Secretary of War to investigate the feasibility and ascertain and report the probable cost of establishing a national military park in Kansas City, Mo., or its environs, commemorative of the Battle of Westport.

That battle was fought in the Civil War, in 1864, on the 21st, 22d, and 23d days of October. This bill has the unanimous favorable report of the Committee on Military Affairs, and was put upon the Unanimous Consent Calendar by the gentleman from Tennessee [Mr. REECE] in charge of it. On June 4 it was stricken from that calendar on objection of the gentleman from Ohio [Mr. BEGG]. I am sure that the gentleman from Ohio would not have objected had he understood the purpose and scope of the bill. I was not present at the call. The gentleman from Ohio was not informed concerning the purpose and object of the bill, and it was natural and not surprising that, in the performance of his assigned duty as the watchdog of that calendar, he, lacking information, should object to its consideration.

It is on the Consent Calendar again. I am satisfied that with a full understanding there can not be any possible objection to it.

The bill does no more than direct an inquiry into the merits of the matter and a report to Congress by the Secretary of War. There is no authority within its four corners to acquire any property, and it carries no appropriation. The commission to be appointed by the Secretary of War, which is to act as advisory to him, must serve without compensation. The expense of making the investigation, so far as the War Department is concerned, will be comparatively trifling and will be borne from the contingent expense of the Army.

The form of the bill is in accordance with the suggestions of Assistant Secretary of War, Colonel Davis, and the phraseology is borrowed from a like measure passed by Congress providing for a preliminary study of a proposed park commemorative of the Revolutionary engagement at Yorktown.

Just a word about this Battle of Westport. Of course, there were many battles fought in the Civil War, but this one has a

singular meaning and significance to the people of that part of the country. It was a most important chapter in that vital epoch of American history. It continued for three days. The battle line ranged from the city of Independence, about the middle of Jackson County, west to the Kansas State line. The decisive engagement occurred south of what was then the village of Westport, now a part of Kansas City, Mo. The Stars and Stripes were sustained by 20,000 troops, drawn from the United States Regular Army and from six States—Illinois, Iowa, Colorado, Kansas, Wisconsin, and Missouri. The Confederate colors were backed by 9,000 of the best blood from Arkansas, Texas, and Missouri. The commanders on both sides had already achieved fame on other fields of valor. Curtis and Pleasanton directed the northern forces, while the southern army was commanded by Marmaduke, Sterling Price, and that spectacular cavalry leader, Joe Shelby. Note you that only Missouri contributed soldiers to both sides of the battle line. There were 24 Missouri units that wore the gray and 26 Missouri units that wore the blue.

For three days they were in deadly grip, first one side having the advantage and then the other, until finally, at the close of the third day, the northern sabers pushed the remnant of that heroic southern army back into a dignified retreat that marked the final supremacy of Old Glory in that section of the country and knitted Missouri and that borderland to the Union forever and forever. Of the hundreds and hundreds of maimed and dead left on the field, by far the greater number were Missouri's own boys.

In that State martyrs for the lost cause and champions of the national integrity came from the same neighborhoods; aye, oftentimes from the same fireside. The Civil War in that section of the country was a vastly different thing from what it was in the ultra Northern and Southern States. In Massachusetts and in South Carolina it was a sectional conflict; but out in Missouri it was truly and really a civil war, an internecine strife, a domestic quarrel, that divided and disrupted neighborhoods, friends, and families.

It was a tremendously serious thing there. It was the culminating event of a decade of border warfare along the Kansas and Missouri line that provoked the most extreme bitterness and hatred. It was a day of final settlement. It was the most gripping and momentous factor in the infancy of Kansas as a Territory and Commonwealth and in the regeneration of the political thought of Missouri. There was not a household up and down that border of any note but what had one or more of its men folk in that Westport fight.

"Jim" Lane, who helped shape the early history of Kansas and afterwards became a United States Senator from that State, was there commanding a unit of the Kansas troops. John J. Ingalls, Preston B. Plumb, and Edmund Ross, all of whom afterwards served Kansas with distinction in the United States Senate, were in that battle, as also was Samuel Crawford, who became Governor of Kansas, and whose daughter is the wife of United States Senator CAPPER. A thousand other names which later found places on the pages of the history of this Nation and of Missouri and Kansas were on that battle roster.

That event touches intimately and sentimentally every family which had to do with the starting and prospering of those two States. It goes to the very core of our community life. It means a lot to us. When our State capitol building was recently completed there were a half dozen outstanding events in Missouri's history which were deemed worthy of the artist's brush for its mural decorations. Of these, two paintings depict two scenes of the Battle of Westport. It is the subject of poetry and song.

Clara Virginia Townsend, in her inimitable poem entitled "The Battle of Westport," gives the word picture thus:

With neighing steeds and struggling ranks, and cannons' deadly roar,
The Gettysburg of this, the West, was fought 'mid wild uproar.
All day the carnival of death. At eve, when closed the day,
A thousand lay in huddled heaps—still heaps of blue and gray.

Awake, O Kansas City! Make this hallowed spot your own;
Immortalize our hero dead in bronze and sculptured stone.
Save from commercial use this land, and let not profit sway
Your hearts from honor to the dead, our dead, the blue, the gray.

Fifty-nine years after the battle another young poet, Guy Blue, paid tribute to "Westport's Heroes" in verse deemed worthy of publication by the Kansas City Star:

Full fifty-nine years now have fled
Since Westport's battle fray;
And the chieftains hold a conference
In the glory world to-day,

Where Sterling Price and Pleasanton

Smile at the earnest way

Joe Shelby clings to Curtis,

While comradely they say:

"There's Moonlight now a coming,

And Phillips on the way,

And Marmaduke with Crittenden,

They'll all be here to-day,

Along with nearly all our boys

Who wore the blue or gray."

Full fifty-nine years now have fled

Since Westport's battle fray;

And the troopers with the living

Are few and old and gray.

For they who fought at Byrums Ford

Or charged that bloody day

Have answered to the last roll call

Or await the reveille,

And they were men of valor,

Who could fight and who could pray;

They furled the flags of battle

And marched with peace away.

They lived and died as heroes,

Who wore the blue or gray.

Col. T. T. Crittenden, who commanded one of the Union regiments of Missouri Cavalry and was wounded, became Governor of Missouri 20 years later, and was followed into that same office by General Marmaduke, against whom he fought. Hon. John F. Phillips, who commanded a Union brigade, later became judge of the State supreme court and Federal judge of our district. While he was Federal judge Gen. Joe Shelby, whose cavalry had directly opposed him in that battle, became the United States marshal of his court under an appointment from President Cleveland. It is a singular thing that in Missouri and Kansas, where the pre-war rancor and hatred was more intense than in any of the Northern or Southern States, enmities and animosities subsided and died out quickly with the ending of the war, and within the lifetime of those who had engaged in it erstwhile enemies had become friends, and love had triumphed over hate. The tragedy of Westport is a soft memory now. The brave lives that were ended there were so many sacrifices on the altar of the Republic. No better quality of courage and valor has ever been displayed on any field. We earnestly feel that the Government should help us pay a proper and lasting tribute. National parks of the character we seek are not only evidences of the Government's respect for those who made the supreme sacrifice in its service, but in an instance of this kind there is also included a note of forgiveness for those who erred. Moreover, such national recognition in different parts of the country binds the States together more strongly by the silken cord of a common sympathy and makes us a stronger and better people.

The project to which I have directed your attention has long been a hope and dream of the Missouri Valley Historical Society. That large organization, composed of Missouri's representative men and women, has been untiring in its effort to make that hope and dream a reality. The United Daughters of the Confederacy, the Women's Relief Corps of the Grand Army of the Republic, and organizations of Confederate veterans and Grand Army of the Republic posts are equally enthusiastic. Such patriotic organizations as the Sons and Daughters of the American Revolution have an aggressive interest. The chamber of commerce and all civic organizations of Kansas City are supporting the movement energetically. The Missouri societies in this and all large cities of the country are cooperating.

Again and again have the newspapers of the State and our city given strong indorsements. I quote from the Kansas City Journal-Post of November 5, 1923, in part its editorial of the day, entitled "Westport Battle Memorial," being copied by it from the St. Louis Globe-Democrat:

A movement to convert a part of the field of the Battle of Westport into a national park and to erect a monument to the Union and Confederate soldiers who died in that engagement is said to have aroused interest in Kansas City. It is being furthered by the Missouri Valley Historical Association of that city, and a committee has been appointed to take up the matter at Washington.

Near the little village of Westport the army of Gen. Sterling Price was defeated by that of General Curtis, and the last great raid of the Confederate general was brought to an end. The battle is called by some "the Gettysburg of the West." * * *

* * * The names of those who engaged in the Battle of Westport and who have fame elsewhere in the history of Missouri are not a few,

and not only in Kansas City but in all parts of the State there will be sympathy for the movement to set aside a space to the memory of those who did not survive.

The Kansas City Star on May 4, 1924, contained the following editorial, which I read:

There is reasonable hope the Jost bill for a survey with reference to the later establishing of a national memorial park somewhere in the field of the Battle of Westport may be passed in this session of Congress. The bill already has the approval of the House Military Affairs Committee and is said to be sure of friendly and earnest promotion in the Senate.

The bill does not provide for the selection of a site for such a park, nor does it include an appropriation for the purchase of the land necessary. Even the commission that would be authorized to make an investigation and submit a report to Congress would serve without pay. Therefore, it would seem that no reasonable objection could be offered to its passage.

As to the merits of the project itself, they, too, seem obvious. The Battle of Westport was an important engagement of the Civil War. It marked the farthest-west engagement of that conflict. It was the turning point in the westward movement of the Confederate forces. The battle itself had its unique and very dramatic features.

Suitable sites could be found to set aside for permanent memorial purposes—sites on which actual fighting took place. The most interesting, of course, is that of the country club, which, unless utilized in some way for permanent park purposes, will be cut up into residence lots in a few years. And that would be a pity. It would be the loss of one of the most attractive spots in Kansas City and in a section in which a permanent park would be especially desirable.

Mr. Chairman, at the last session of this body the District Committee, of which I have the honor to be a member, commissioned me to pass upon and report to this House a measure incorporating the Grand Army of the Republic. That bill was in the nature of a legal obsequy on the passing of a grand old order. It is calculated to preserve the property of that institution and, with the departure of the last survivor, work an application of its assets through a trust to the establishment of some appropriate testimonial to the history and service of that splendid organization. You passed the bill. My mind then dwelt seriously, as it does now, on the stupendous importance and the far-reaching consequences of the Civil War.

It was an inevitable thing in the history and development of this country, or, as Horace Greeley has very aptly entitled his splendid work on the subject, "An Irrepressible Conflict." It was unavoidable. The seeds of the trouble were planted in the very inception of the Government. The very cause of it was written in the United States Constitution. The eloquence of Webster and of Hayne availed nothing; mere words could not settle that issue, however eloquent they might be; it took blood and tears to do that. But that blood and those tears made us a Nation, and what a Nation! Since that day surely we have been an instrument in God's hand for the promotion of the welfare of mankind. In 1898 we stayed the hand of the Spanish butcher on our doorstep, and 20 years later became the deciding factor in the world-wide conflict which ran the rivers and drenched the soil of Europe afresh with blood. And yet when we finished that work we sought no reward.

We asked for nothing save the peace of the world and the welfare of humanity. [Applause.] Yet we lacked unity, national unity; we were weak, we did not amount to anything as a world factor until Appomattox, when the greatest general that the world ever saw or ever will see delivered his sword under compulsion and attested the enduring unity of this Republic. [Applause.]

It has been 60 years since that conflict ended. The bitterness of it has passed. The survivors are very few, but whether they wore the gray or whether they wore the blue we love them now dearly and appreciate the work they did, because it was essential to the very territorial and political existence of this Nation.

We have two of those old, grizzled warriors in this House, the gentleman from Ohio, General SHAWWOOD, of the Union forces, and the gentleman from North Carolina, Major STEWMAN, of the Confederate Army. Both of them wear the white lace of age upon their brow, and they wear it with distinction and honor. [Applause.]

Sixty years ago they were contending against each other, full of animosity, striving to maintain the right of their respective causes. But to-day they fraternize in this House and in their daily life, going forward in a mutual desire to serve this land and push the prestige and dignity of the Stars and Stripes to the highest possible pinnacle of influence for good in the family of nations. [Applause.] And they but typify that feeling and fraternity which exists all over the country among

those who are left of the contenders in the strife of the sixties. It has been a singular honor and a high privilege accorded to me, one that I value beyond expression, to have been the official companion of those two splendid gentlemen in this House. Each by his courtliness and chivalry has charmed his way into the very center of my heart, and I know into the hearts of all of you. God bless them both and give them many days to come. [Applause.]

Give me this bill when it is reached. It does not cost anything. Let us find out if this proposition is meritorious. You can trust the Secretary of War to make an impartial report about it and you can determine on his report whether you want to do the thing that we in our section hope and pray you may conclude to do. Give us this national recognition and help.

Does all the poetry of the national life cling to Plymouth Rock and Yorktown and those places up and down the Atlantic coast? Have we not something in the West—the Middle West—comparable in hardships and in struggles and in sacrifices that have gone to make and build up that splendid section of the Union and made it a part of the vitality of this Republic? We have done our part, not so early, it is true, and in another and different way, but the heartaches and the tears of our mothers and the blood of our sons have helped write American history. [Applause.] Give us this as a memorial to that which is the very essence of our community life. [Applause.]

Mr. Chairman, I yield back the remainder of my time.

The CHAIRMAN. The gentleman from Missouri yields back 18 minutes.

Mr. BUCHANAN. Mr. Chairman, I yield five minutes to the gentleman from Oklahoma [Mr. McKEOWN].

Mr. McKEOWN. Mr. Chairman and gentlemen of the committee, I want to call the attention of this House to something that has grown out of the work of the Agricultural Department of this Nation. Just a few days ago in the great city of Chicago there was held an international livestock exposition, which was a great show.

At this exposition a boy from my district named Ford Mercer, of Wellston, Lincoln County, Okla., was decided to be the champion boy of the boys' clubs of the world. I am proud that a boy who is the champion of 700,000 club members, growing out of the work of the Department of Agriculture in the United States, should be found in my district in Oklahoma—Ford Mercer, of Wellston, Okla. [Applause.]

This is a wonderful work and is doing a great amount of good for the agricultural interests of the country. To illustrate what it did in this case, the boy's mother and father, so I am told, were not favorable to the club, and when this boy joined the club, which the county agent organized in his community, his parents were not pleased at the time. Out of it all now comes this boy who wins the highest prize from all the boy clubs, having a membership of 700,000 throughout this country.

This illustrates that one of the things America needs in her agriculture industry is education and training. If you will train the farmers and give them a better opportunity they will learn the scientific methods of farming. The United States has been so well taken care of by nature that we have not given very much attention to the scientific side of agriculture. We have had such fertile lands and such fine natural resources that a farmer would just hitch up his horse and go out and plow in a happy-go-lucky manner, and if the season is all right he makes a crop, without giving any attention to the kind of soil he has or whether the seed he uses is the proper kind for that soil or whether the soil needs fertilizer, and if so, what kind. If the Department of Agriculture of this Government will continue this work, having 700,000 boys and girls enlisted in these clubs throughout the country, the results in this country are going to be most satisfactory. The results will be felt in the production of wealth, because I have always contended that agriculture is the foundation of our national wealth, and we will all eventually have to look to agriculture, and when we go out and educate the boys and girls of this country along the lines that are being pursued now, we are going to build up a better class of citizens and a very much better class of young farmers and agriculturalists, who will get the taste for more knowledge from these clubs and from this work that is now going on. I just thought that this House would like to know something of the work that is being done by the Department of Agriculture in the way of educating the young and rising generation along the lines of agriculture. [Applause.]

Mr. BUCHANAN. Mr. Chairman, I yield 20 minutes to my colleague from Texas [Mr. CONNALLY].

Mr. CONNALLY of Texas. Mr. Chairman and gentlemen of the committee, the gentleman from Ohio [Mr. BURTON] a few days ago in this Chamber delivered a very interesting address, a very philosophical address, in which he undertook to draw a number of important, satisfying, and comforting lessons that were to be deduced from the recent presidential election. Anything that the gentleman from Ohio may have to say is always heard with sincere interest wherever his reputation for ability, travel, and experience is known. It was quite natural that the gentleman from Ohio should be able, better than any other member of this body or of the body at the other end of the Capitol, to analyze and take apart, as it were, the motives and the actuating forces that brought about the tremendous Republican victory in November. That is true, because the gentleman from Ohio was the temporary chairman of the Republican convention that met in Cleveland, and in that capacity it was his function to deliver the keynote address. Naturally, like a great general, like a great strategist, since he there laid out the plans of the campaign, since he there emblazoned on the banners which his host was to carry forward the watchwords and the battle cry, it is very comforting and satisfying now, after the victory has been attained, for him to come before this Chamber, with a great deal of modesty, I am sure, and yet with pardonable pride, and point out to the country the result of his mighty handiwork.

As a member of the Democratic Party and only as a private individual of that party, I want to say that we come not in this Chamber or elsewhere to offer any alibis as to the recent contest in which we were so overwhelmingly defeated. That is not our policy nor shall we undertake to complain or whine at the election or at the action of the American people.

It is one of the glories of democratic institutions, it is one of the glories of a republican government, that the people have the right to set up that form or fashion of government which may suit their taste or meets the dictates of their judgment, irrespective of whether that form meets with the favor or approbation of any political party or not. It is one of the glories of the people in their sovereign capacity that they have the right, if it is their pleasure to will it, to embrace any sort of political policy they may see fit to embrace. They have a perfect right if they desire to do so to flitter away their best opportunity and embrace that policy which will not conduce to their highest happiness and well-being. They have the right to have that form of government and that kind of administration which they desire. Believing in these political principles, the Democratic Party is the last party in this land to gainsay their right or to complain of its exercise.

Now, the gentleman from Ohio [Mr. BURTON] made a rather significant statement when he said that in the recent campaign the people did not seem to be disposed to pay much attention to charges against public officials. I do not want to misquote the gentleman from Ohio, so I have brought with me a copy of his remarks. The gentleman is absolutely correct in that statement. Here is what he says:

The voters were not disposed to give much attention to the numerous charges against public officials as the real issues of the campaign.

There is no quarrel between those of us who sit on this side of the Chamber and the gentleman from Ohio. We realize that the people of the United States did not seem to attach any importance to the charges that were made in the campaign. But I can not agree with the implied if not expressed conclusion of the gentleman from Ohio that that state of public mind is to be accepted with satisfaction. [Applause.] We realize that it was true; we realize that the voters did not seem to attach much importance to such charges. But instead of drawing "a lesson" from that fact many of us on both sides of this Chamber must regret that such is the fact.

We must here rededicate ourselves to an endeavor to revitalize the public conscience in order to repel the conclusion that we look upon such things with satisfaction. It is more important, gentlemen—and I am speaking to both sides of the Chamber—it is more important to those of us in public life that that kind of attitude of public mind be corrected than to any other class of our citizenship. For our own reputation, for the safety and security of the Republic, and for the maintenance of high ideals of public service, this Chamber and the other Chamber should be more concerned than any other class of citizenship in seeing to it that the public may look to us and realize that if elsewhere there may be wrongdoing, if elsewhere there may be disregard of high ideals of citizenship, that in this Chamber and in the other Chamber, under this splendid dome, there should always reside the highest and purest ideals of civic virtue and civic courage. [Ap-

plause.] While I agree with the statement of fact of the gentleman from Ohio [Mr. BURTON], I rather regret that a gentleman of such distinguished service, covering such a long period of years, should seem to find comfort in the fact that the people of the United States in the great campaign seemed to be indifferent to such charges because of a general belief that many of them were made for "political capital." I do not mean to revive those charges; I do not mean to complain of the result of the election; but I do mean to complain that, regardless of whether we are Democrats or Republicans, regardless of whether the charges are true or false, the real issue before the American people ought always to be, when charges are made, a trial of the issue. Indifference never. If guilt be found, then the people should bring to bear condign punishment, and if the charges are baseless, they should be rejected. That is the point I wish to make. My complaint is not that they ratified innocence. My complaint is that they seemed, in the language of the gentleman from Ohio, to be indifferent as to whether the accused were innocent or were guilty. That is what I am preaching against here to-day.

Mr. CHINDBLOM. Mr. Chairman, will the gentleman yield?

Mr. CONNALLY of Texas. Yes.

Mr. CHINDBLOM. Of course, I do not dissent from the views expressed by the gentleman from Texas—

Mr. CONNALLY of Texas. I did not assume that the gentleman would.

Mr. CHINDBLOM. But I ask him whether a further reading of the remarks of the gentleman from Ohio [Mr. BURTON] would not bring out that he entertained exactly the same views as does the gentleman from Texas. I call attention to this sentence in the remarks of the gentleman from Ohio, as delivered on the 4th day of this month:

This was not due to any lack of insistence upon honesty or absence of interest in the punishment of the guilty. It must be especially emphasized that dishonesty or failure of duty on the part of those in the public service, whether their station be high or low, must be relentlessly prosecuted and severely punished.

Mr. CONNALLY of Texas. That is true. Does the gentleman desire to ask a question?

Mr. CHINDBLOM. Does not the gentleman think some of this criticism is met by those words?

Mr. CONNALLY of Texas. I shall answer the gentleman. I could not conveniently quote all that the gentleman from Ohio said. What the gentleman from Illinois has quoted is a part of the language of the gentleman from Ohio. Of course, I do not believe that the gentleman from Ohio [Mr. BURTON] believes in condoning those things, but what I complain of is his statement that the public seemed to be indifferent to them, and he seemed at least by inference to draw some satisfaction from the fact that this was one of the lessons to be drawn from the recent election. Of course, the gentleman from Ohio knows that these things were wrong. Of course, he does not condone them. Of course, he condemns them, but I am talking about this attitude of the public mind. However, we shall pass on from that.

The real attitude of the public mind ought to be to try such charges, and if a man be guilty punish him, whether he be a Democrat or a Republican. If he be innocent, then vindicate him. The attitude of indifference as to whether he is guilty or innocent is one that if persisted in will destroy the structure of our institutions.

The gentleman from Ohio draws a great deal of satisfaction from the fact that the recent election vindicated the sanctity of the Supreme Court and the Constitution. If the gentleman from Ohio would but consult the history of his country, he would find that in making that kind of a decision there was no rejection of Democratic doctrine. The Democratic Party came into being in this Union proclaiming a passionate attachment to the Constitution, and first came into power through fighting the invasion of the Constitution by the Congress itself in enacting the alien and sedition laws. The followers of the Democratic Party have always been sticklers for the Constitution. The Democratic Party believes the Constitution was made to protect man and to guarantee his rights. It is true that the recent election did reject the policy of vetoing judicial decisions, but that theory did not come from the Democratic side of this Chamber or from the Democratic Party. That doctrine came from the Republican side. It came from gentlemen who have been consorting in this Chamber with the gentleman from Ohio [Mr. BURTON] and his colleagues on the Republican side. It came from the La Follette or so-called progressive republican party. Of course, the gentleman from Ohio would now reply: "It is true that we have been consorting with these gentlemen in the past, but now the Re-

publican Party is going to read them out of the party and throw them into outer darkness where there shall be gnashing of teeth and snatching out of hair." Of course, throw them out.

I believe they ought to be thrown out of the Republican Party. Has not the Republican Party got sufficient votes in the next Congress to elect a Speaker and a floor leader without the cooperation of the gentlemen from the Northwest who entertain such political heresies, who hold such dreadful views? Throw them out, of course. There will not be any vote in the present Congress where their votes will be needed, and in the next Congress the Republican conference will have sufficient votes to control the destinies of Congress without the honorable gentleman from Wisconsin [Mr. NELSON] and his militant little band of freethinkers. Throw them out! Why, the gentleman from Ohio [Mr. LONGWORTH] can be elected Speaker without their votes. Say to them that you do not need them. I do not blame you very much about that. It is true that in this present Congress you did need them, but circumstances alter cases. In the last session of this Congress it is true that the gentleman from Wisconsin and his little band were eating cake. They were sitting right up in the front row. He was a member of the Rules Committee. They were petted and pampered, and no doubt cajoled and entertained by their Republican colleagues, but their votes were needed then for the election of a Republican Speaker. They were promised the McNary-Haugen bill in the last session. Of course, you will never hear any more of that bill. Why? Because the election is over. It ought to be called the "hogging bill," because that is what the Republicans were trying to do. They were trying to hog the farmer vote, and they seem to have succeeded and have hogged the northwestern farmer vote and put it away down in their ballot box. [Laughter.] You will never hear any more of the Haugen bill. Why? Economically, if the Haugen bill was sound last June it is sound now. If it was sound last spring, it will be sound next spring. If it was sound last spring, it will be sound next winter when the next Congress convenes.

Gentlemen on the Republican side, and some of them hard-boiled Republicans, stood here with political tears running down their faces and fervently declared that they had to do something for agriculture and that there was nothing in sight but the Haugen bill. They said that it was sound and that it was right and that it was just; but the poor old Haugen bill sleeps out yonder on some silent hillside, with not a stone even to mark its last resting place. I helped put it there because it was unsound, but I thought some of the Republicans would resurrect it; I thought some of them really wanted it to revive; I thought they would bring it back here; but after the election I knew it was good-by to the Haugen bill. It has served its purpose; it has run its race. Peace be to its ashes!

May I have 10 minutes more?

Mr. BUCHANAN. I yield to the gentleman 10 minutes more.

Mr. CONNALLY of Texas. Now, gentlemen, what else do we find? The gentleman from Ohio [Mr. BURTON], the former Senator, made a most excellent speech in some regards. On the floor of this House he repelled the charge that the Government or any of its institutions had fallen under the influence of big business or what is known as the "interests"; and I know of no other man better qualified to make that statement on the floor of the House than the gentleman from Ohio, because he knows big business and he knows every branch of the Government, and he says they are not influenced by big business. And so he proceeds to cite a number of legislative enactments which, he says, proves that the Government is not influenced by those great interests and that in those respects it is really serving the American public.

I am glad that he did. What does he cite in justification for that statement? Why, he points with a great deal of pride to the interstate commerce act of 1887.

Gentlemen, I would like to remind the gentleman from Ohio that this old Democratic Party, which so many are ready to inter after each of its defeats—I would like to remind him that it was this old Democratic Party of ours which in a Democratic administration, the first administration of President Cleveland, put on the statute books the interstate commerce act, which pioneered that great field of Government regulation and fixed a policy that has governed this country ever since. [Applause.]

And I am glad to hear the gentleman from Ohio say on this floor—although his commendation is rather belated—I am glad to see him come here and admit that one of those Democratic acts is responsible for a policy he approves, a policy that has been followed by the Government unto this day.

And again, the gentleman from Ohio points to the Federal Trade Commission—though not in specific terms, at least impliedly he seems to approve of the establishment of that organization—and I again remind the gentleman from Ohio that it was a Democratic administration, under President Wilson—a Democratic administration of only a few years ago—that enacted that really constructive piece of legislation and thereby adopted a policy which I hope our Republican friends, now in possession of all the branches of the Government, will not assail and will not destroy. But as I turn my eyes and see the Chairman who sits now before you, the gentleman from Massachusetts [Mr. TREADWAY], that language does not seem to sit with equanimity on his soul, because I saw him stand in this Chamber and heard him inveigh against the Federal Trade Commission and seek to limit its appropriation and seek to paralyze the activities of that governmental agency. So that when the gentleman from Ohio comes to take credit for those things he should remember that the Democratic Party, while it may not be in power now, has served the country in the past and will in the future, even if we serve it in the ranks, and without office and without places of power. [Applause.]

Oh, the gentleman from Ohio cites some other legislation. He says that the income-tax legislation is one of the great evidences of the fact that the Congress and the Government are not influenced by the great interests and are really serving the American people. When was the voice of the gentleman from Ohio raised heretofore in this Chamber in behalf of the income tax as it stands to-day on the statute books? I must refer that gentleman, who is so learned in history, that gentleman who is able to quote the Greek classics and to go with Herodotus in his wanderings over the Greek isles, and to travel, perhaps, with Xenophon and his Ten Thousand in the Anabasis, in their wanderings in the Orient—I must remind him that he must have encountered among his more recent rambles some fresher history, and urge him to recall the fact that it was a Democratic Congress that placed the first income tax on the statute books; and long before we placed it on the statute books Democratic Members of Congress, cooperating with a few of Republican persuasion from the West, were able to submit an amendment of the Constitution permitting the levying of that tax. After the Supreme Court had held it was unconstitutional, Democratic platforms year in and year out demanded that the income-tax system be established, until when we came into power we made good our platform and wrote it into law. [Applause.]

I am glad the gentleman from Ohio finds satisfaction in the income tax law. It is true that in detail the gentleman does not approve of that proposition. In detail he does not agree with the present high surtaxes. But I do not criticize him for that. He has the same right that the country has; he has the same right to exercise poor judgment and fritter away his opportunities of service, just as the country has done when it adopts a political platform and supports a political party that will not give it the highest degree of service.

What does the gentleman from Ohio finally conclude? The gentleman from Ohio says that \$4,000,000 is not a large campaign fund; that it is not political parties or candidates that are really responsible for political campaign funds being raised, but it is owing to the fact that—

It is not a political party or the candidate for office who is chiefly responsible; it is rather that inactive mass of voters who only go to the polls when urged and whose study of the problems of the time is so superficial that their conclusions are likely to be erroneous.

Now, if that is true, if the inactive mass is so large and their understanding so poor, when you remember that the Republicans had \$4,000,000 and the Democrats had less than \$1,000,000, the conclusion irresistibly follows that they were able to induce four times as many as we were able to influence to get them to the polls, and they were able to enlighten and make understand four times as many as we were able to induce and enlighten. [Laughter.] I am surprised at the gentleman from Ohio. He is not in agreement with the President in this, although he was elected on a platform of following and agreeing with the President. The President in referring to the election says:

I can only express my simple thanks to all those who have contributed to this result and plainly acknowledge that it has been brought to pass through the work of a Divine Providence, of which I am but one instrument.

And here is the gentleman from Ohio passively admitting that it was \$4,000,000 that got inactive fellows to the polls and enlightened them after it got them there. [Laughter and applause.] May I have five minutes more?

Mr. BUCHANAN. I am sorry, but I can not yield the gentleman more time.

Mr. CONNALLY of Texas. Then I must hurry along. Now, gentlemen of the House, I can not conclude my remarks, but listen: The Democratic Party is not dead. [Applause.] It has been defeated many times in the past. The Democratic Party is defeated, but it is not dejected.

Mr. BUCHANAN. One of the gentleman's colleagues from Texas intended to use some time, but he has said he is willing to give it to the gentleman, so the gentleman may have 10 minutes more if he wants it.

Mr. CONNALLY of Texas. I thank you. The Democratic Party is beaten, but it is not dishonored. It is going to live to fight another day. But office and distributing patronage, according to its creed, is not the chief of all political ends. It is ready to serve its country and its people, though it has to go down and serve in the ranks, in the rear ranks, if necessary.

Gentlemen, if this situation continues—if the great interests of monopoly as against the man, if the great trend of combination as against the individual—if this trend goes on in its mad rush, crushing out small business and individual enterprise, the Democratic Party will stand, as it has stood in the past and as it now stands, for the rights of the individual and for the rights of the citizen. [Applause.]

This seems to be a day of reaction. Why, did you know that recently in Great Britain the Tory Party, the Conservative Party, was returned to power by the greatest majority held by any party for many, many years? The great Liberal Party, the party of Gladstone and other famous Britishers, has almost disintegrated. Great Britain, repudiating the great leader that led it through the war, has gone back to extreme reaction.

Why, in Italy Mussolini, a dictator, a tyrant, has seized upon the reins of government and is reigning like an autocrat, suppressing the press and adopting other repressive measures, while in Spain, hard by, a military dictator dissolved the Cortes, the Parliament of Spain, and rules like a sceptered king. So this great period of reaction and of autocracy seems to be circling the whole globe. But the Democratic Party is not dismayed. We are not here to apologize; we are not here to render alibis; we are here simply to say that when the time comes—and it will come, and will come soon—when the people realize that the Democratic Party is needed, as well as when some great crisis faces the Republic, the American people will turn to it, and when they turn they will find the Democratic Party, as they have found it in the past, ready to serve, not for pelf but ready to serve because it loves to serve more than it loves spoils, and because it loves its country more than it loves office. [Applause.]

Why, this is a day of consolidations; this is a day of mergers. Every day greater and larger and stronger mergers of capital and of wealth and of power and of industry are taking place. The President in the White House sends us word to consolidate the great transportation lines of the country. Big and bigger and yet bigger business is in the saddle. If this trend toward mergers, toward consolidations, and toward combinations goes crushing its way down through the years it will grow ever more reckless and ever more ruthless, and finally the time will come, if it is not halted, when it will meet another great mass, when it will meet great hosts of socialism that shall rise up to oppose it. Then will come a time when there will beat against it a red sea of communism, a sea as red as the sea that engulfed Pharaoh's army.

Can you not hear in Russia now the wild waves of such a sea beating against that unhappy land? Denunciation and repression will not calm such a storm-tossed sea. There was an old Persian king who once commanded his servants and his soldiers to lash and beat the sea in order to stay its fury. The Russians tried that; the Czar and the privileged classes tried that; but the knout and the snows of Siberia did not stay the waves of such a sea. But, my friends, when that time comes God save the Democratic Party for that hour. [Applause.] The Democratic Party then will stand, as it now stands and has stood in the past, between these extremes. It will stand against great, selfish, favored, and preferred interests, on the one hand seeking to exploit the people, and against the maddened mob that has been aroused and infuriated by its wrongs. It will stand then, as it stands now, side by side with the Constitution of its country. It will stand then, as it stands now, by the side of honest and lawful wealth against the depredations of the marauder; and it will stand then, as it stands now, by the side of the citizen, by the side of the man, by the side of the individual man, against the aggression and the oppression of the organized interests which have received the favoritism of government. It will stand against these interests, just as it stood against tyranny in the days of old. Just as it opposes the tyranny of one man over other men, whether that man be a king or a prince or a potentate or a military dictator—just as

the Democratic Party stands against that kind of tyranny, so it stands against the tyranny over some men by corporations, by combinations, by mergers, the creatures and the agents of other men; and it will stand in that day and time for the individual man not because it hates wealth and not because it hates property but because it loves mankind more. [Applause.]

Now, my friends, when that time comes the Republic is going to need the Democratic Party. You gentlemen on the Republican side who now prate about the Constitution and talk about the sanctity of property will need the Democratic Party then to protect that property. Men who claim that their rights will be outraged will need the Democratic Party then, and the Republic will need the Democratic Party in such an hour, because it will stand as firmly against the mob as it will stand against the embattled interests of those who have sought to exploit the people in the past. And so, my good Republicans, do not bewail the fate of the Democratic Party.

The Democratic Party has a past that is glorious and a future in which we shall undertake to maintain the best traditions of that past. Excluding the administration of Washington, in the period down to 1924, the Democratic Party has held the Presidency 68 years and the Republican Party an equal period of 68 years.

In addition to the legislation already referred to, we call the attention of the country and the Congress to the Federal reserve act, which a Republican administration dare not repeal and which enabled the United States to finance the greatest struggle that has ever shaken the modern world. The Federal farm loan system was established and fixed a policy that the Republican Party will never dare to abandon. The Budget system, of which so much is now heard, was recommended and urged upon the Congress by a Democratic President and sponsored by Democratic chairmen of the Appropriations Committee—Sherley, of Kentucky, and Fitzgerald, of New York. The Department of Agriculture was established during the first administration of President Cleveland, and scores of other acts of far-reaching importance, which have come to be commended and approved by the public generally, and which the Republicans will not repeal, were enacted under Democratic sponsorship.

Excluding the territory of the original thirteen colonies, all territory thereafter added to the United States and out of which States have been carved was brought into the Union by Democratic administrations. Through the farseeing vision of that great Democrat, Jefferson, the Louisiana Purchase was brought from under a foreign flag and placed under the Stars and Stripes. In 1819 a foreign standard was hauled down in Florida and the colors of the Union were unfurled under a Democratic administration. During the administration of President Polk the Republic of Texas joined the sisterhood of States, and in the Mexican war following, that splendid domain out of which California and many of the great States of the West were established was ceded to the United States by Mexico. Again, in 1853, by the Gadsden purchase another strip of territory was added to the Union. Alaska, the Philippines, and Hawaii were secured during Republican administrations, but all of them remain Territories.

In foreign affairs, as well as in domestic, its record is a proud one. The War of 1812, waged to maintain our rights at sea and protect our citizens abroad, was fought under a Democratic administration. The war with Mexico was won under Democratic leadership. In 1917 and 1918 a great Democratic President and a Democratic Congress piloted the country through the mightiest war of this or any other age. Under such leadership our gallant armies cut through forests and trenches and ravines and bristling lines of the enemy a path to new victories and set our flag so high that our enemies can never fail to see it, and seeing it will never fail to respect it. And then when victory was ours the same great leader led the world from misery and blood and tears into the ways of peace, and by his splendid idealism thrilled and exalted the spiritual life of a world. A party with such a past must not die. America will not let it die.

It will live; it will live in the future, and it will live to serve. Undazzled by wealth and unabashed by power, unashamed of the past, and unafraid of the future, it will serve its country. It will serve its people even though it be rejected and its fortunes cast down.

Standing between the two great conflicting forces, either one of which, if successful, will destroy the very foundations of the Government, standing between these forces the Democratic Party, with its face turned full and fair to the morrow, will go on serving the American people and the Republic. With neither resentment at past defeat, nor with despair for the

future, democracy will serve because she loves to serve, and not because she craves or cringes for the spoils. [Applause.]

Mr. MAGEE of New York. Mr. Chairman, I yield five minutes to the gentleman from Maryland [Mr. HILL].

Mr. HILL of Maryland. Mr. Chairman, in the 1925 War Department appropriations act we provided that the Secretary of War submit at this session a comprehensive plan for necessary permanent construction at military posts. We also provided that this plan should be based on using funds already received from the sale of surplus War Department real estate, and from the sale of such property now owned by the War Department as, in the opinion of the Secretary of War, is no longer needed for military purposes.

In accordance with this direction on November 26 the Secretary of War submitted to the Speaker of the House of Representatives a report which I shall incorporate in my remarks. As a supplement to this report, he submitted a program for housing the Army in the United States, Hawaii, and Panama in permanent shelter. The Secretary of War recommended the passage of certain specific legislation in his letter to the Speaker. The Secretary's letter was referred by the Speaker to the Military Affairs Committee, and I was authorized by the acting chairman of the Military Affairs Committee of the House, Mr. McKENZIE, this morning to introduce the bill recommended by the Secretary of War, which is similar to the bill introduced in the Senate a few days ago by the chairman of the Senate Military Affairs Committee, Senator WADSWORTH.

The bill which Senator WADSWORTH and I have introduced at the request of the Secretary of War is the first step in the realization of a program which is basic to the national defense and upon which many of us have been working for years.

In 1916 I called attention to the report of the General Staff of the Army made on August 12, 1912, on "The reorganization of the land forces of the United States." This document contained the broad outlines of a comprehensive military policy. In commenting on this report I said that some of the reforms proposed could be carried out by Executive action, but that the greater part of these reforms must be provided by Congress, and that—

the existence of isolated and small frontier posts and reservations throughout the United States has repeatedly been the subject of criticism by the Executive, but so far Congressmen have been very loath to consent to the removal of any body of troops from cities in their districts which profited by the presence of such troops.

I am making these remarks to-day in connection with the bill which I introduced this morning, because I feel that the time has come when my implied criticism of eight years ago of Congressmen should be withdrawn. I feel that at the present time the broad policy of national defense has become so clearly fixed in the minds of all of us Representatives that there is no longer any strong desire to retain Army posts which should be abandoned.

For example, the proposed legislation permits the sale of Fort Howard, in Maryland, with an estimated sales value of \$231,000; Fort Washington, in Maryland, with an estimated sales value of \$519,600; and Fort Armistead, in Maryland, with an estimated sales value of \$22,979, making a total of \$863,579. At the present time both Fort Armistead and Fort Howard are required for the shelter of troops until permanent shelter elsewhere is provided, but as part of the comprehensive plan of the Secretary of War the permanent development, for example, of Camp Meade, in Maryland, is contemplated. I am very confident that no Representative of Maryland will in any way oppose the sale of Fort Howard, Fort Washington, and Fort Armistead; but, on the contrary, will do all possible to assist in this consummation of a long-desired scheme of national defense.

You will note that the proceeds of the sales of the posts which are to be abandoned are to be deposited in the Treasury to the credit of a fund to be known as the military post construction fund. The proposed legislation also provides that this fund shall be expended for the permanent construction at military posts in such amounts as may be authorized from time to time by the Congress. It is to be noted, however, that we are not asked for any legislation for any expenditures of this fund during this short session, but that the bill specifically provides that the War Department's permanent plan of construction shall be submitted annually to Congress in the Budget. We are asked only, at the present time, to dispose of useless posts in the interests of proper disposal and consolidation of posts, but the Congress will expressly have the

opportunity of passing on all general plans of expenditures for permanent posts.

There are nine corps areas in the United States, and the Secretary of War has submitted a very careful estimate of the cost of construction and development in the future in various selected posts in these various corps areas. This plan contemplates the development of certain posts as special training and mobilization posts. For example, in the Third Corps Area the logical post for development is Camp Meade, Md. Two years ago I took up with the commanding general of the Third Corps Area, General Muir, the permanent development of Camp Meade, and we discussed with the Secretary of War the detailed proposals for its development. During each of the previous three summers I have made special inspections of Camp Meade as a member of the Military Affairs Committee of the House, and I have recently taken up the matter with the new corps area commander, General Sturgis.

The need of a coordination of posts to correspond to the nine corps areas, and the needs of training and defense under the national defense act are obvious. The first step in this program is the proposed legislation contained in the letter from the Secretary of War to the Speaker of the House, in accordance with your direction made last year. I think that every Member of the House will be interested in this report of the Secretary, and I therefore shall include it in my remarks at this point:

NOVEMBER 26, 1924.

THE SPEAKER HOUSE OF REPRESENTATIVES.

SIR: I am pleased to inform you that, in accordance with that portion of the 1925 War Department appropriation act which states:

" * * * The Secretary of War is hereby authorized and directed to submit to the Congress at its next session a comprehensive plan for necessary permanent construction at military posts, including Camp Lewis, in the State of Washington, based on using funds received from the sale of surplus War Department real estate, and for the sale of such property now owned by the War Department as, in the opinion of the Secretary of War, is no longer needed for military purposes," a careful and thorough study of the matter has been made by the War Department, and, as a result thereof, I submit herewith the following:

(a) A comprehensive housing program consisting of a series of charts showing the new construction required at military posts in the United States, Hawaii, and Panama.

(b) Lists of surplus military reservations classified as follows:

A. Surplus reservations authorized by Congress to be sold but which have not yet been disposed of:

Posts and estimated sales value

1. Narrows Island, Me.	\$135.00
2. Sagamore Reservation, Portsmouth, N. H.	5,000.00
3. Gloucester, Mass., gun house	560.00
4. Fort Phoenix, Mass.	750.00
5. Salisbury Beach, Mass.	100.00
6. Springfield Armory, two tracts	5,000.00
7. Fort Green, R. I.	1,200.00
8. Fort Mansfield, R. I.	91,788.00
9. Hion Rifle Plant, N. Y.	4,500.00
10. Long Island air reserve depot, N. Y.	2,750,000.00
11. Fort Montgomery, N. Y.	7,500.00
12. Sag Harbor, N. Y.	500.00
13. Watervliet Arsenal, N. Y. (portion only)	200,000.00
14. Amatol Arsenal, N. J.	66,000.00
15. Fort Newark, N. J.	6,000,000.00
16. Pittsburgh quartermaster intermediate depot, Pa.	1,654,280.00
17. Tullytown Arsenal, Pa.	550,000.00
18. Fort Armistead, Md.	22,979.00
19. Fort Foote, Md.	2,438.00
20. Norfolk Army supply base (portion)	306,000.00
21. Camp Humphreys, Va. (portion) 2,000 A.	72,700.00
22. Fort Monroe Pumping Station Reservation, Va.	1,500.00
23. Willoughby Spit Reservation, Va.	108,840.00
24. Beacon Island, N. C.	2,500.00
25. Fort Caswell, N. C.	74,800.00
26. Bay Point, S. C.	1,260.00
27. Fort Fremont, S. C.	5,000.00
28. Hilton Head, S. C.	8,000.00
29. Point Peter, Ga.	18,000.00
30. Southern Field, Ga.	58,007.00
31. Chapman Field, Fla.	150,000.00
32. Fort Clinch, Fla. (portion)	4,200.00
33. Gasparilla Island, Fla.	33,200.00
34. St. Johns Bluff, Fla.	4,708.00
35. Fort Gaines, Ala.	60,300.00
36. Park Field, Tenn.	594,185.00
37. Fort Livingston, La.	10,000.00
38. Fort St. Philip, La.	25,200.00
39. Camp Knox, Ky. (portion)	27,080.00
40. Camp Pike, Ark. (Booster pumping station) (7)	1,200.00
41. St. Paul Army Building, Minn.	85,000.00
42. Lagoon Point, Wash.	1,545.00
43. Nodule Point, Wash.	2,282.25
44. Fort Madison, Wash.	17,625.00
45. Montreal munitions plant, Canada:	
Motor Trucks (Ltd.)	171,500.00
Peter Lyall & Sons Construction Co. (Ltd.)	975,000.00

Total for real estate for which sale is authorized. 44,182,362.25

B. Reservations that have been declared surplus, but which under the act of July 5, 1884 (23 Stat. 103), would revert to the Department of the Interior:

Posts and estimated sales value

1. Anastasia Island, Fla.	\$700
2. Boca Grande Military Reservation, Fla. (portion)	11,700
3. Fort Clinch, Fla. (portion)	2,500
4. Moreno Point, Fla.	60,000
5. Perdido Bay Military Reservation, Fla.	1,100
6. St. Andrews Sound Military Reservation, Fla.	10,000
7. St. Josephs Bay Military Reservation, Fla.	40,000
8. Mobile Bay (Island in), Ala.	500
9. Perdido Bay Military Reservation, Ala. (west and north of Bay La Launch)	11,000
10. Perdido Bay Military Reservation, Ala. (west side entrance)	3,000
11. Ship Island, Miss. (portion)	13,500
12. Battery Bienvenue, La.	10,000
13. Fort Jackson, La.	10,000
14. Fort Macomb, La.	10,000
15. Fort Pike, La.	6,500
16. Fort Townsend, Wash.	12,300

Total. 208,860

These estimated sale values are made on the assumption that the act of July 5, 1884, will be voided and the War Department will be allowed to sell this property rather than turn same over to the Department of the Interior.

C. Reservations not being utilized by the War Department and no longer needed for military purposes which are recommended for disposal:

Posts or stations and estimated sales value

1. Fort Andrew, Mass.	\$2,000
2. New Cumberland General Reservation Depot, Pa. (portion)	25,800
3. Fort Smallwood, Md.	52,200
4. Fort Hunt, Va.	178,300
5. Newport News warehouses, Va.	580,000
6. Chickamauga and Chattanooga National Military Park, Tenn. (lots)	1,750
7. Fort Morgan, Ala. (portion)	200,300
8. Nitrate Plant No. 1, Muscle Shoals, Ala.	600,000
9. Waco Quarry, Ala.	357,000
10. Fort Dade, Fla.	75,000
11. Fort De Soto, Fla.	50,000
12. San Diego Barracks, Calif.	86,700

Total. 2,189,050

D. Reservations still in use, but which are to be declared surplus when no longer required by the War Department:

Posts and Estimated Sales Value

1. Fort Schuyler, N. Y. (required for shelter of troops until permanent shelter elsewhere is provided)	\$150,000
2. Fort Howard, Md. (required for shelter of troops until permanent shelter elsewhere is provided)	321,000
3. Fort Washington, Md. (required for shelter of troops until permanent shelter elsewhere is provided)	519,600
4. Fort Norfolk, Va.	360,000
5. Fort Screven, Ga. (required for shelter of troops until permanent shelter elsewhere is provided)	1,465,700
6. Jackson Barracks, La.	150,000
7. Fort Wingate, N. Mex.	348,000

Total. 3,334,300

(c) A draft of the necessary legislation which reads:

"An act authorizing the use for permanent construction at military posts of the proceeds from the sales of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes.

"Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized to sell or cause to be sold either in whole or in two or more parts, as he may deem best for the interests of the United States, the several tracts or parcels of real property hereinafter designated or any interest therein or appurtenant thereto when said tracts or parcels are no longer needed for military purposes, and to deliver in the name of the United States and in its behalf any and all contracts, conveyances or other instruments necessary to effectuate such sale.

"Fort Schuyler, N. Y.; Fort Howard, Md.; Fort Smallwood, Md.; Fort Washington, Md.; Fort Hunt, Va.; Fort Norfolk, Va.; Fort Dade, Fla.; Fort De Soto, Fla.; Fort Morgan, Ala.; Ft. Screven, Ga.; Jackson Barracks, La.; Fort Wingate, N. Mex.

"Anastasia Island, Fla.; Boca Grande Military Reservation, Fla.; Fort Clinch (portion), Fla.; Moreno Point, Fla.; Perdido Bay Military Reservation, Fla.; St. Andrews Sound Military Reservation, Fla.; St. Josephs Bay Military Reservation, Fla.; Mobile Bay (Island in), Ala.; Perdido Bay Military Reservation, Ala. (west and north of Bay La Launch); Perdido Bay Military Reservation, Ala. (west side entrance); Ship Island, Miss.; Battery Bienvenue, La.; Fort Jackson, La.; Fort Macomb, La.; Fort Pike, La.; Fort Townsend, Wash.

"New Cumberland General Reserve Depot, Pa. (part); nitrate plant No. 1, Muscle Shoals, Ala.; Waco Quarry, Ala.; Fort Andrews, Mass.; Newport News Warehouse, Va.; Chickamauga & Chattanooga National Military Park, Tenn. (lots); San Diego Barracks, Calif.

"Sec. 2. That the net proceeds of the sales of the surplus War Department real property hereinbefore designated and the net proceeds of the sales of the surplus War Department real property heretofore authorized and not heretofore deposited in the Treasury shall be deposited in the Treasury to the credit of a fund to be known as the military post construction fund, to be and remain available until ex-

pending for permanent construction at military posts in such amounts as may be authorized from time to time by the Congress. Estimates of the moneys to be expended from this fund, including a statement of the specific construction projects embraced in such estimates, shall be submitted annually to Congress in the Budget.

"SEC. 3. In the disposal of the aforesaid property the Secretary of War shall in each and every case cause the same to be appraised, either as a whole or in two or more parts, by an appraiser or appraisers to be chosen by him for each tract, and in the making of such appraisal due regard shall be given to the value of any improvements thereon and to the historic interest of any part of said land.

"SEC. 4. In the event that any other department of the Government shall require the permanent use of all or any part of any of the reservations herein authorized to be sold the head of the department requiring the same shall within 90 days after the approval of this act make application to the Secretary of War for the transfer thereof.

"SEC. 5. After 90 days from the date of the approval of this act, and after the appraisal of the lands hereinbefore mentioned shall have been made and approved by the Secretary of War, notification of the fact of such appraisal shall be given by the Secretary of War to the governor of the State in which each such tract is located as to such lands not to be turned over to other departments; and such State or county or municipality in which such land is located shall, in the order named, have the option at any time within six months after such notification to acquire the same or any part thereof which shall have been separately appraised upon payment within such period of six months of the appraised value thereof.

"SEC. 6. Six months after the date of notification of said appraisal, if the option given in section 5 hereof shall not have been completely exercised, the Secretary of War shall sell or cause to be sold each of said properties at public sale, at not less than the appraised value thereof, after advertisement in such manner as he may direct.

"SEC. 7. A full report of all transfers and sales made under the provisions of this act shall be submitted to Congress by the Secretary of War upon the consummation thereof.

"SEC. 8. The expenses of appraisal, survey, advertising, and all expenses incident to the sale of the reservations hereinbefore authorized for disposition shall in each case be paid from the proceeds of the sale.

"SEC. 9. Hereafter if any real property acquired for military purposes becomes useless for such purposes, the Secretary of War is directed to report such fact to Congress in order that authorization for its disposition in accordance with the provisions of this act may be granted.

"SEC. 10. The authority granted by this act repeals all prior legislative authority granted to the Secretary of War to sell or otherwise dispose of the reservations hereinbefore designated."

With the Army at its modified peace strength we have in the continental United States alone about 40,000 men quartered in buildings constructed for war-time purposes, the maintenance of which is rapidly becoming prohibitive in cost.

Because of these conditions a careful and thorough study of the requirements for the future as to the distribution of the Army has been made and considered in connection with the housing program.

We are guided in our military policies by the national defense act of 1916, as amended. Regardless of handicaps imposed by the necessity for reduced appropriations there are certain major missions assigned the Regular Army which must be fulfilled. These missions stated briefly are as follows:

(a) To provide adequate and efficient personnel for giving the utmost assistance in the training and development of the National Guard, Organized Reserves, Reserve Officers' Training Corps, and Citizens' Military Training Camps, and for furnishing a trained stiffening component for the organization of the higher units of the first two for battle service.

(b) To provide the necessary personnel for the overhead of the Army of the United States, wherein the duties are of a continuing nature.

(c) To provide an adequate organized, balanced, and effective domestic force, which shall be available for emergencies within the continental limits of the United States or elsewhere and which will serve as a model for the organization, discipline, and training of the National Guard and the Organized Reserves.

(d) To provide adequate peace garrisons for the coast defenses within the continental limits of the United States.

(e) To provide adequate garrisons in peace and war for our overseas possessions.

The objective of the War Department is constantly before it in the language of sections 2 and 3 of the national defense act as amended, wherein is provided the composition of the Regular Army, with the further statement that the organized peace establishment, including the Regular Army, the National Guard, and the Organized Reserves, shall include all of these divisions and other military organizations necessary to form a basis for a complete and immediate mobilization for the national defense in the event of a national emergency declared by Congress.

Having in view the above requirements, provision has been made for the distribution of the mobile Army at its present authorized strength whereby one Infantry division has been allotted to each of the Second, Eighth, and Ninth Corps Areas and a reinforced Infantry brigade to each of the other six corps areas. In addition to the above, a Cavalry division has been allotted to the Eighth Corps Area. The most economical distribution has been made of Coast Artillery troops. The number allotted to overseas garrisons has been reduced to the minimum consistent with the mission involved.

In the development of the program for sheltering the Army distribution was subordinate to the necessity for strict economy and the most efficient utilization of existing permanent buildings and utilities consistent with the effective employment of our Regular Army as tactical units.

The program permits of ready rearrangement to meet conditions that may exist when any of the construction projects included therein are brought up for consideration by Congress. Furthermore, it will permit of an orderly utilization of such funds as may be made available from time to time and will also cause an avoidance of other waste which is always incident to an uncertain policy.

In view of the imperative necessity for providing shelter for our troops in the immediate future, I recommend that Congress now take cognizance of this problem.

Should the committee to which this matter may be referred decide to give the War Department a hearing on this subject, I shall be pleased to appear before it in person and also to place at the committee's disposal the officers who worked up the program, in order to explain any of the details in connection therewith that the committee might desire.

This project has been taken up with the Director of the Bureau of the Budget, and he states that it is not in conflict with the financial program of the President.

Respectfully,

JOHN W. WEEKS,
Secretary of War.

It is especially to be noted that the Secretary states that this project has been taken up with the Director of the Bureau of the Budget, and that it is not in conflict with the financial program of the President. It is also to be noted that there is an imperative necessity for providing shelter for our troops in the immediate future, and that immediate action should be taken upon the proposed legislation. Joint hearings in a few days will be instituted by the Senate and House Military Affairs Committees, and it is hoped that this legislation will be passed in this session, thus permitting a comprehensive plan of permanent construction to be submitted through the Director of the Budget as soon as possible. Under the provisions of the proposed legislation, the properties to be sold are expected to realize the total of \$19,914,572.25, which will make a very excellent start for the military posts construction fund.

Mr. Chairman, I ask unanimous consent to extend my remarks by including a letter from the Secretary of War to the Speaker.

The CHAIRMAN. The gentleman from Maryland asks unanimous consent to extend his remarks in the manner indicated. Is there objection?

There was no objection.

Mr. BUCHANAN. Mr. Chairman, I yield to the gentleman from Georgia [Mr. UPSHAW].

Mr. UPSHAW. Mr. Chairman, I ask unanimous consent to extend my remarks by publishing in the RECORD a short speech delivered by me at Richmond on the promulgation of the Monroe doctrine.

Mr. HILL of Maryland. Mr. Chairman, reserving the right to object, I would like to ask if the speech has any reference to the rights of the American farmers?

Mr. UPSHAW. It does not touch that matter.

Mr. HILL of Maryland. I do not object.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. UPSHAW. Mr. Chairman, under the leave granted to extend my remarks in the RECORD, I insert an address made by myself at Richmond, Va., December 2, 1923, which is as follows:

IN MEMORIAM—ADDRESS OF CONGRESSMAN WILLIAM D. UPSHAW, DECEMBER 2, 1923, AT CENTENNIAL OF PROMULGATION OF MONROE DOCTRINE UNDER AUSPICES OF SOUTHERN COMMERCIAL CONGRESS, RICHMOND, VA.

Mr. Chairman, Governor Trinkle, and fellow Americans—

"There are moments, I think, when the spirit receives
Whole volumes of thought on its unwritten leaves;
There are hours that hold in their compass of thought
The measureless triumph of a century wrought."

This solemn pilgrimage of Virginia's youth and beauty, her chivalry and her patriotism, from the historic capitol of the Old Dominion to the grave of the author of the Monroe doctrine, typifies at once not only the centennial tribute of a grateful continent but that inspiring human crown which lofty virtue wears. Perhaps the chiefest lesson for these patriotic Americans who have marched—citizens actual and embryonic—from the gray-haired defenders of our firesides and the sturdy citizen legionnaires to the smiling thousands of boys and girls who refresh us and thrill us with the kindling glories of their youth, is found not only in the international triumph of the deathless doctrine which Monroe proclaimed but in the security and the purity of that vibrant and inspiring American atmosphere where individualism in citizenship finds its loftiest coronation. We see again James Monroe, the modest purposeful youth of 15 on the playground of that humble schoolhouse at historic Fredericksburg, lighting the torch of his early ambitions by the pioneer camp fires of colonial development; we see him a thoughtful student at William and Mary College throwing down his books to answer the battle cry for colonial freedom; we see him enduring with heroic fortitude the privations of the Revolutionary soldier, and "knighted" on the field of battle for conspicuous bravery at the hands of the immortal Washington; we see him again practicing law in Fredericksburg, and so poor in this world's goods that a generous kinsman buys for him a town lot in order that the community council might have the benefit of his wisdom and his constructive fellowship. Ah—

"So nigh is grandeur to our dust,
So near is God to man;
When conscience whispers low 'I must,'
The youth replies 'I can.'"

And under this sublime impulsion we see the young Virginia statesman leap forward to halls of State and National legislation; then three times to the governorship of his State on the very spot where he had read law with the father of the Declaration of Independence.

Now, we see James Monroe illustrating the citizenship and the ideals of the lusty young Nation of the Western Hemisphere as a poised and accomplished diplomat at the proudest courts of Europe, while gilded monarchs look with wonder akin to awe at the manner of master-men produced by the newborn Republic; and now—thank God for "the era of good feeling," which his great leadership brought in—we see this many-sided statesman become the fifth President of the United States. Verily, he "came to the kingdom for such an hour as this"—rather, I should say, to the helm of state—for the clear vision and stalwart hand of James Monroe shattered the schemes and dreams of European despots concerning the continents of the Americas.

It was the hour and power and kingcraft. The Holy Alliance proved itself very unholy by its frightened frenzy at the march of democracy. Indeed, it was formed to crush out the free spirit of democratic individualism. The War of the Revolution had not only freed our American Colonies from the autocracy of the German-speaking George III, King of England, but, according to David Lloyd-George, it saved king-driven England from herself. Democracy in England was coming into flower; and the mother country, walking in the liberating radiance of such noble spirits as Pitt and Burke and Canning, and really proud of the achievements and prospects of the new American Republic, proposed a joint declaration that would warn European despots against further designs upon the Americas.

EMANCIPATION OF THE AMERICAS

Monroe's hour had come—the hour for the independent, dynamic initiative which not only meant the full and final emancipation of all Republics in both Americas but gave an electric thrill of hope and purpose to that spirit of free democracy that was fighting upward throughout the world.

Just 100 years ago to-day President Monroe gave his epoch-making declaration to Congress that all American soil must be kept forever inviolate from European aggression. It was the essence and the triumph of greatness in leadership that America preferred to stand grandly alone as she flung this startling dynamic of democracy into the faces of the wondering despots of Europe. Whatever of peril that mild defiance might bring, the young Nation stood ready to face and endure; whatever of glory that ringing declaration of American sufficiency might win, it should be concentrated in one resplendent crown on the brow of the young international pioneer. Thus the United States of America—a daring pathfinder on an "uncharted sea," stood alone and yet not alone, in the blended poverty and power of a "revised and enlarged edition" of American independence—an independence that laughed at "the breath of kings," while it rejoiced in the well-earned increment of a new neighborly gratitude and the supporting enrichment of a new American fellowship. In one marvelous and mighty hour the new American Republic leaped from the wilderness of national uncertainty and the valley of speculation and experiment to the commanding height of serene consciousness and decisive power among the nations of earth.

"Like some tall cliff that lifts its awful form,
Swells from the vale and midway leaves the storm,
While round its feet the lowering clouds are spread,
Eternal sunshine settles on its head."

And toward that sun-crowned mountain peak the eager eyes of the oppressed, liberty-loving peoples of earth began to look, and their tired feet began to move—for they thought of America evermore as—

The land of the free and the home of the brave.

SUBJECTIVE FAITH AND OBJECTIVE POWER

It has been said that "the ideal citizen is one who thinks what others only dream, who says what others only think, who does what others only say, and who glories in what others dare but do."

With this ideal true in the individual citizen, surely it is doubly true of such a leader of men and nations as James Monroe proved himself to be. This inspiring subjective consciousness brought with it the inevitable resultant of objective power. It warmed and purified and energized the heart of the new-born nation like "a second work of grace" that follows the miracle of regeneration in the heart of the individual, and comes with a new sense of intelligent dedication to the cause of God and humanity.

The immediate aftermath of the promulgation of the Monroe doctrine constituted a sense of national revival in ethical ideals and spiritual values, it brought a new baptism of inward peace and passion and a new and radiant horizon for the redeemed national soul. And it was not long until the restless ambitious nations of Europe began to calm their fevered pulse beneath the steady light, pure as crystal, that gleamed from the American lighthouse across the sea. While the lessons learned by the lesser American Republics and the watching nations of Europe were not, of course, instantaneous and universal, they have become increasingly stable and pacific.

The blood of our American neighbors to the south of us, heated by its proximity to the Equator, has occasionally broken out into a fight before breakfast, but before the sun went down the fiery protagonists would look up into the peaceful, disapproving face of their big brother, "Uncle Sam," and then lay down their arms, ashamed of themselves, and go back with the rising of another sun to the constructive pursuits of peace, happiness, and national prosperity.

JAMES MONROE AND WOODROW WILSON

And, ladies and gentlemen, let me, without equivocation in this high and ardent hour, put into shining italics the great world lesson of the Monroe doctrine; even as this spiritual compact of understanding and fellowship among the Americas has largely held in leash the forces of destructive war on these two continents and absolutely stopped European aggressions upon American soil, so it was the spirit of vision of the Versailles treaty to make a great international handclasp the bulwark against international conflicts forevermore. The very fact that the understanding impulsion of the Monroe doctrine has made the resort to arms unnecessary in the prevention of European aggression cries aloud to the makers and the breakers of the Versailles treaty that if all the allied nations that fought to overthrow military autocracy had clasped hands in peace to keep that autocracy overthrown all autocratic belligerents would have been awed forever into a stammering hush. This could have been done without pulling down the American flag 1 inch before any foreign power. The main thing I liked about that great World War, ladies and gentlemen, was its geographical position. It was 3,000 miles away from your American home and mine, and we rejoice in the blended wisdom and heroism of statesman, soldier, and sailor that united to keep that terrible war 3,000 miles away from American shores. And whether it shall be the dream and the prayer of that stainless Christian statesman—the Gladstone of America—William J. Bryan, who did so much to bind the world together in pacts of enduring peace; or whether it shall be the dream and the plan of that great President and now Chief Justice of the United States, William Howard Taft, who stood long and valiantly at the helm of the League to Enforce Peace; or whether it shall be the crystallization of the dream and the plan of that brilliant seer and world citizen, Woodrow Wilson, who fell on the firing line and almost gave his wonderful life that he might give constructive, enduring peace to a staggering world; or whether it shall be the dream and the plan of our late lamented and beloved President, Warren G. Harding, who sought the same great end through a World Court and an association of nations, you know and I know and God knows that whether it be a 4-power pact or a 44-power pact, the famished, sorrowing heart of a war-torn world is anxious—prayerfully and desperately anxious—that something shall be done in consonance with the ideals of the Prince of Peace that will make it unnecessary for a great pacific Nation like the United States of America to spend more than 90 cents out of every dollar of the people's money to provide for the ravages of war, past, present, and to come. No truer, wiser words ever fell from human lips of a friend of peace than that immortal utterance of President Harding at the opening of the disarmament parliament:

"There is something fundamentally wrong in any scheme of civilization that spends the major part of its means and its energies on the scientific destruction of human life."

As we stand by that new-made grave at Marion, as we gather in annual pilgrimage before that mecca of international peace on E Street in Washington, as we stand to-day in reverent centennial tribute before the "vocal dust" of the author of the Monroe doctrine, let us resolve all differences incident to the limitations of human wisdom and partisan bias as we approach the supreme objective in our Christian civilization—peace, constructive peace and happiness and progress for all the peoples of all the world.

And as a patriotic, God-fearing American citizen, I confess that I am jealous—righteously, loyally jealous—to see my country, preserving both her independence and her unselfish spirit of international benevolence, take her indispensable place in international leadership toward universal righteousness and everlasting peace.

The Monroe doctrine, in its last and best analysis, is not provincial. Its unerring, stalwart stand for American integrity and American development constitutes its highest possible contribution to the peace and prosperity of other nations.

"And beholding the man which was healed standing with them, they could say nothing against it."

This convincing declaration concerning the healing of the man who as a cripple had lain long at the beautiful gate of the temple is America's own answer and inspiration to all nations impoverished by the cruel carnage and the desolating waste of war.

"Look at the heights serene on which I stand." Thus saith America to the restless, disheartened nations of earth. "Look at the incontestable fact that my flag has never led my people into a selfish war, and therefore, thanks to the god of nations, I have never known defeat. Peace has been my passion and war my painful protest. Look at my unexampled prosperity that has crowned my program of peace, and come up—higher—come up higher above the deadly miasma of national hate and the fog and fury and the death and dearth of war." Humbly, proudly, triumphantly before the God of nations and the sons and daughters of men—this is the meaning and the message of this centennial—this is America's national and international evangel.

FROM PRESIDENT TO JUSTICE OF PEACE—CALLING AMERICAN YOUTH TO UNSELFISH SERVICE

I must be pardoned—if pardon is needed—for bringing my first and final message to Virginia's youth—America's youth, strikingly called by Jacob Riis "the to-morrow of the Republic." If, as Reynold E. Blight has declared, "next to the glorious Declaration of Independence and the Constitution of the United States the Monroe doctrine is America's most important and significant contribution to the well-being and progress of humanity," then surely the youth of America must hear a new and clarion call to the glory of service for the sake of service in the almost startling disclosure of history that James Monroe, the far-famed author of this immortal doctrine, rich in the highest honors which two continents could bestow upon him, chose to crown life's beautiful evening by serving his community in the thoroughly honorable position of justice of the peace. He believed in the glory of service—humble, faithful service, rather than the empty glory of self-centered renown. This great God-fearing builder of a nation's grandeur believed in the uplifting doctrine that would "sweep a street to the glory of God." If he could speak to-day to the thousands who, in the beauty of their plastic youth, have made this pilgrimage to his tomb and to the millions of students in the schools and colleges of America who are sharing in the grateful thought of this centennial tribute, he would declare with Tom F. McBeath:

"God gems thy path with opportunities,
Thick as the summer dewdrops on the grass,
Rich with His promises;
But, manna-like, they must be gathered
Ere the sun be risen."
And used upon the instant—
Else they breed within the heart
A never-dying brood of worms,
Armed with stings of vain regret,
And to a loathsome hell of torment
Turn the Paradise of memory.

It is because this brave, purposeful American youth went into America's teeming harvest fields and "came not back with empty hands" that he built a pyramid of truth and light that will pierce the ages as they over it roll. It is verily the crown that American knighthood wears—

"The crown that shall new luster boast
When victor's wreath and monarch's gems
Shall blend in common dust."

Mr. BUCHANAN. Mr. Chairman, I yield 20 minutes to the gentleman from Arkansas [Mr. RAGON].

Mr. RAGON. Mr. Chairman, I want to call the attention of the committee in my remarks to-day to a provision in the Agricultural bill on page 36, which has to do with our national for-

ests. It provides "for the construction of sanitary facilities and for fire-preventive measures on public-camp grounds within the national forests when necessary for the protection of the public health or the prevention of forest fires, \$25,000." I feel that this amount is wholly inadequate to even properly introduce a program for the establishment of recreational camps in our national forests.

One of the greatest problems facing the American people to-day is that of forestry. Due, perhaps, to the lack of information upon the part of the public, and to lack of sympathetic interest upon the part of Congress, our forestry problems have never received the emphasis they should.

The country is slowly awakening to its importance. There was a time when we looked to the theorist, national forester, and sportsmen, to whom forest preservation was a mere incident, for manifestations of the only interest in national forests. The public in general looked upon them as alarmists and entirely impractical. Conditions existing to-day and in the future will combine to give the pioneers of our national forest program that place in the history of the development of the country second to none in importance.

Warning after warning these pioneers gave us; but, with the same persistence with which they warned, we continued to ignore until to-day we depend for high-grade lumber upon the South and far West, which have a considerable area of rapidly diminishing virgin lumber.

According to the report of William B. Greeley, National Forester, to the Secretary of Agriculture, on October 24, 1923, the condition of our lumber and wood supply is most appalling. Prices of high-grade lumber are steadily and rapidly rising. There are only 14 States, in the South and extreme West, which have a surplus of production in lumber over consumption. In several of these 14 States the amount of production over consumption is small. In the remaining States of the Union the consumption of lumber is greater than the production. The States of North and South Dakota, Minnesota, Iowa, Nebraska, Kansas, and Missouri import 77 per cent of the lumber they consume. Similarly, the principal manufacturing region comprising the States of Illinois, Ohio, New York, Pennsylvania, New Jersey, Indiana, and the New England States produces only 32 per cent of the total lumber consumed. Mr. Greeley makes the statement that we are draining our forests East and West of a total of 25,000,000,000 cubic feet of wood annually while this is replaced by the growth of only 6,000,000,000 cubic feet. For every 4 cubic feet of wood we are taking annually from our forests we are seeking to serve the future by replenishing with only 1. All this, too, is in the face of an annual increase in the demand for timber products and increasing prices therefor. The Greeley report says:

The present annual growth could be increased to about 14,000,000,000 feet, or a little over half our present requirements, if all our forests were given adequate protection against fire and elementary practices of forestry were introduced. By intensive forest management, comparable to the best European practices, our total area of forest land could be made to grow 27,000,000,000 cubic feet annually, or enough to take care of our present consumption and afford a little surplus.

Within recent years we have taken some great strides in the forestry problem. The reforestation act of last session was a great stride in the right direction, but like any other great program of national conservation we can never reach the desired end so long as the interest in our forest development is confined merely to those employed in this departmental work. The public must be made to know that it has a part to play in this program.

If the careless camper, the vicious firebrand, the indifferent hunter, and the indiscreet smoker can continue to be the costly perils of our forest development without calling down upon themselves the just condemnation of an indignant public, then any program of forestry must continue to be ineffective in meeting our needs. The public must awaken to the fact that every year it costs our Government over a million dollars in loss of timber value and in money spent combating these enemies of our timber resources. To be exact, in 1922, the latest figures I have, the total damage on national forest lands burned over was \$494,000 and the Government spent \$607,200 in fighting these fires. The public must be, by some means, quickly educated to the impending crisis in our timber and lumber supply and the means by which these evils can be remedied.

The public in general does not seem to realize the purpose for which our national forests have been established. It does not seem to observe any difference, in many instances, between our national forests and national parks. Our national parks are practically unremunerative and represent the expenditure of millions of dollars each year from the Government Treasury for their support and maintenance.

Our country has the greatest system of national parks in the world. Our parks are "natural museums, within which are preserved some great natural, scientific, scenic, or historical attractions of surpassing and outstanding superiority in their class." Thanks to the department which has had supervision of the establishment and maintenance of our national parks, they have steadfastly held to this high standard. Recreational and playground developments in connection with our national parks have been merely incidental.

On the other hand, our national forest reserves are not unremunerative, but, on the other hand, to all practical purposes are self-sustaining, and, it is safe to estimate that in the immediate future, will be not only self-supporting but will be a source of revenue to our National Government. Many of our national forests, while abounding in timber and grazing resources, have as other productive features playground and recreational possibilities.

Mr. James B. Wilson, in the early days of forestry in this country, said that our forests must be managed with an eye single "to the greatest good of the greatest number in the long run." This utterance was made when the automobile industry was in its infancy and modes of communication were crude as compared to today, but he evidently saw the future of our national forest reserves utilized not only as a source of revenue and as an example to private and State-owned forests but also for health and recreational purposes.

Through many of these forests, which have great recreational possibilities, the departments have constructed some splendid roads. They have also established in some game and fish reserves, as well as camp grounds. While we boast of the great number of people who see our national parks, yet it is safe to say that two persons visited our national forests during the year 1924 where one visited a national park. During the year 1924, 10,000,000 people visited our national forest reserves. This great host of people were led to our forests in search of sport, recreation, and health.

This enormous number of visitors is the Government's opportunity of giving the much-needed education upon forestry to the public. When that time comes that each person who visits our forests becomes acquainted with the modes and methods of their preservation and the necessity therefor, he will go forth as a missionary to convert all with whom he comes in contact to the importance of our forestry program.

Notwithstanding the Government spent millions of dollars last year and will continue to spend for the proper maintenance of our national parks, which have only an educational value, with an incidental recreational value, yet we spent the small sum of \$15,000 for development of the recreational features of our national forests, which not only carry with them an educational, recreational, and a health value but also carry a monetary value to our Government.

It is for a proper recognition of the recreational features of our national forests that I plead to-day.

When we think of the wonderful possibilities in development of this feature of our national forests and then consider that this great Government only spent \$15,000 last year for their development it approaches an almost unpardonable indifference upon the part of the representatives of the legislative branch of our Government.

To develop this feature of our forest reserves does not necessarily mean a great outlay of money in expensive buildings or the construction of high-class roads. The program of the Forestry Bureau is to throw open the national forests to the motorist, the farm wagon with its load of children, the hikers, campers, hunters, and fishermen, the amateur photographers, naturalists, and mountaineers; to bid them come and follow their respective bents without let or hindrance, and to teach them how to use their own woods as good citizens should. The next step in their outline is to make such provision as is possible for the convenience and well-being of the various groups of the various recreation seekers.

For the hikers and hunters and mountaineers who scorn the beaten paths and seek the real freedom of the hills this means maps and trails and signboards and an occasional rough-hewn shelter cabin in the high country. For the throngs of tourists and transient campers who stick to the main roads, but crave the joys of the open air none the less, it means selected camp grounds, chosen with an eye to natural beauty, cleared of undergrowth and inflammable debris, and equipped with simple sanitary conveniences and rough stone fireplaces.

There are over 1,500 commonly used camping spots along the highways in these national parks. To this time the Bureau of Forestry has not been provided with sufficient funds to meet the urgent needs for the simplest and roughest equipment required by decency itself at practically all of these camps.

The Agricultural bill this year provides that this appropriation shall be \$25,000, whereas the Government could well afford, for its own protection, to make the appropriation a half million.

On page 37 of Mr. Greeley's report he gives a statement of something of the requirements of these recreational forests. In 1922 a study was made of 960 specific camp grounds, which were used by 1,355,000 people. For a proper protection and development of the facilities of these 960 camps he estimates it would cost \$122,259, which would amount to approximately 2 cents for each person using the camp grounds in a single year. In 1922 there were 6,000,000 people who visited our national forests. If our Government would spend 5 cents for each of the 10,000,000 persons now using the forests annually for recreational purposes it would permit the installation of practically all of the most necessary facilities. Considering the 10,000,000 persons who would benefit by an expenditure of 5 cents each in the probable improvement to the public health and reduction in fire loss, it would be a distinct economy to make an appropriation of one-half million dollars for this purpose.

Mr. O'CONNELL of New York. Will the gentleman yield for a question?

Mr. RAGON. Yes, sir.

Mr. O'CONNELL of New York. And it is intended to be a helpful one. Of course, these figures are accurate—

Mr. RAGON. I take them from the report of the Forester.

Mr. O'CONNELL of New York. And for the purpose of his speech I would like the gentleman to give the authority for them.

Mr. RAGON. I thought I stated that. This is taken from the report of the Forester, Mr. Greeley.

Mr. O'CONNELL of New York. Thank you.

Mr. RAGON. If our 147 national forest reserves, with a combined acreage of 157,000,000 acres, which brought in to the Federal Government in 1923 a revenue of \$5,335,818.13, are to be developed so as to function to their highest degree of efficiency, the Government must at once give heed to the recreational features of our national forests. It is interesting to note that the Government spent for protection and administration of the national forests in 1923, \$5,133,382. While this shows a profit from a monetary standpoint, our national forests abound in recreational assets more valuable than their economic resources. Yet the Government never appropriated any moneys for this purpose until 1923, when an appropriation of \$10,000 was made. In 1924 another appropriation of \$15,000 was made, and this represents all the moneys ever appropriated by the Government for the development of the recreational features of our national forests.

The educational features might well be illustrated by conditions existing in my own State. Arkansas ranks near the top among the States that produce a surplus of lumber which supplies the country. Too few of our people realize that our virgin timber is being rapidly diminished. Surrounded by plenty in this particular industry we are unmindful that the day is close in front of us, if some check is not made, when we shall be face to face with conditions such as exist at this time in the North and East. Situated in the State of Arkansas are two national forest reserves, which are greater in acreage than those of any other State in the South and East. In the national forests of Arkansas will be found some of the greatest opportunities for the development of recreational camps anywhere in the country. As recently as 10 years ago I do not believe there were a hundred people each year, outside of Government employees and the natives, who went through these forests. The Forest Service has within recent years constructed splendid dirt roads through parts of these forests, and tourists are now flocking through them by the thousands each year. As they go through them they find prominently displayed instructions about forest protection. This slight information they gather as they go hurriedly through the forests.

If these forests were supplied with recreational facilities, the tourist would spend part of their time in them. This would mean that he would learn first hand the importance of our forests and how to protect them, and as he went forth would naturally scatter this information, which would redound to the benefit of the forests in Arkansas. But this national forest in Arkansas is not alone an Arkansas problem in which only Arkansas people are interested. The New Yorker or the New Englander, with his forests denuded, who builds a home in which lumber is used takes into consideration the Arkansas forests. He is interested or should be in the \$494,965 which our Government lost in damage to our national forest land in 1922 and the \$607,200 which it cost the Government to fight the fires in the same year. Therefore, every section of the country is

interested in any plan which will protect and preserve the forests in any of the States of the Union. The recreational camps in the national forests of Arkansas are of the greatest educational value in protecting the forests outside of its boundaries.

The rest and recreational values of our national forests have been recognized by the communities within easy reach of them. Cities and towns have established recreational camps. Indeed, it is a sad commentary upon our National Government that more money has been spent by civic organizations for the development of the recreational features of our forests than has been spent by the Government. The Government should at least keep step with these organizations and abandon its "pinch-penny" policy in developing this feature of our reserve.

These forests abound in great mountains with their high altitudes, pure air, and good water, all of which make them attractive to the seeker of health.

Therefore, from the standpoint of their educational, monetary, recreational, and health producing values we should loosen the purse strings to this forestry enterprise. It is the task of no particular department, branch of Government, nor State, but the combined efforts of everyone to awaken the public interest in our national forests. Let us have economy in government by all means, but never that false economy which hoards our wealth while our natural resources are being destroyed.

Mr. RUCHANAN. Mr. Chairman, we have no further speakers on this side.

Mr. MAGEE of New York. I ask that the Clerk read the bill.

The Clerk read as follows:

For salaries and compensation of necessary employees in the mechanical shops and power plant of the Department of Agriculture, \$93,000.

Mr. HASTINGS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, this bill recommends for appropriation \$124,637,715, and of this amount \$44,637,715 is for agriculture and \$80,000,000 is for roads. I am intensely interested in both.

The subject of agriculture requires and should receive the patient, thoughtful, and intensive study of Congress. There has been greater depression among the farmers during the past three years than any other class of our people. The corn and cotton crops in the South and the wheat crops in the West and Northwest and the better prices received during the present year have greatly relieved the situation. The farmers need some additional financial legislation. Cooperative marketing should be encouraged in every possible way. There are many other questions that affect the farmers that deserve our best thought and attention, including reduction of freight rates, reduction of the present tariff duties on necessities consumed, diversification of crops, cheaper fertilizer to increase crop production, and additional assistance in educating the farmers in a practical way to better methods in farming, so as to insure the maximum of production, and how to care for and conserve their crops to the best advantage. All of these questions are of great interest and should have our best attention.

I want to emphasize upon this occasion the importance of favorable action upon a bill which I have introduced, H. R. 7692, and which is pending before the Banking and Currency Committee, amending the Federal farm loan act of 1916 by authorizing the appointment of agents at convenient localities, giving the agent about the same authority now exercised by the secretary-treasurer of the local loan associations formed in each county.

I think that the farm loan act approved July 17, 1916, is a great piece of constructive legislation. The Banking and Currency Committee, of which I was a member at the time the act was passed, gave much thoughtful consideration to the provisions of the same. I emphasized to the committee then that the greatest difficulty with administering the law would be found in the compulsory organization of local loan associations. I tried to get the committee to act favorably upon an amendment providing for the appointment of local representatives of the farm land banks throughout the country, through whom applications could be made for loans under the act. I presented such an amendment to the House when it was in the Committee of the Whole considering the original farm loan act, but it was not adopted. I have again submitted such an amendment and hope that the Banking and Currency Committee will, at an early date, give earnest and favorable consideration to the matter. If enacted, it will do away with the necessity of the organization of local loan associations and

permit local agents or representatives to be appointed, authorized to receive and forward all applications for loans. If this were done it would greatly popularize the act and would make it as it was originally intended, one of the greatest pieces of progressive and constructive legislation ever enacted by Congress.

Before the passage of the act I pointed out, as I do now:

First. That the organization of local loan associations is unnecessary and that the appointment of a local agent to perform functions similar to the work to be done by the secretary-treasurer of the local loan associations in advising farmers how to apply for loans, how to prepare their papers, and how to do all necessary preliminary things with reference to making an application, would better serve the interests of the farmers desiring to borrow money.

Second. The appointment of local agents would do away with the interminable delays now experienced.

Delay in securing favorable action upon loans is the chief drawback of this splendid law. If local agents were appointed who are familiar with the law and familiar with the requirements of the farm land banks served by them, they could expedite action very much upon all applications for loans. When an application for a loan is presented to an agent he would see that it was made out in the proper form; that the note, mortgage, and all accompanying papers met the requirements of the farm land bank, and that an abstract accompanied the papers. If anything were omitted, he would be able to satisfactorily explain the matter to the applicant, so that when the application was forwarded everything would be complete and in correct form. In my judgment, the disappointment experienced in administering this law is due to a failure to adopt this or a similar amendment. The local loan associations serve no useful or helpful purpose. In many counties throughout the United States there are no local loan associations, hence an applicant has no opportunity to apply for a loan. True, the farm loan act provides for the appointment of a local agent, but that agent must be a bank, trust company, mortgage company, or savings institution, and must indorse the paper and thereby secure and become liable for the loan, and, of course, the shareholders of no conservative bank or company would permit it to become obligated in such large amounts.

When a number of farmers get together to organize an association they are not familiar with the necessary details as to how the organization should be perfected, which necessitates much correspondence and many meetings by them. All of this results in long delays. No one who wants to buy a farm or who wants to secure a loan can afford to wait in a state of uncertainty for an indefinite length of time. The owner of a farm and a prospective purchaser meet and agree upon a price. The prospective purchaser explains to the owner of the farm that he purposes getting a part of the money through the farm land bank, but the owner of the land, knowing how uncertain it is about getting the money and the delays encountered, declines to enter into a contract. The purchaser, rather than lose the trade, pays from 2 to 3 per cent additional interest to a local loan agent or a mortgage company.

If this farm loan act is to be made a success, and it should and can be, all unnecessary causes of delay must be eliminated. Intelligent agents should be appointed, who in a few minutes of time could look over the papers, would forward them to the farm loan banks of the respective districts, have the abstracts examined in a day or two after their receipt, and notify the local appraisers so that the farmers making the applications could be advised within a week or 10 days whether or not favorable action had been taken upon their applications for loans.

A PLEA FOR TENANT FARMERS

The farmers constitute one of the greatest producing classes in the United States. I want to emphasize that every one of them ought to be encouraged to own his own land. It is the ambition of every tenant farmer to purchase a tract of land. This should be encouraged in every possible way. If this legislation were perfected it would enable every honest, hard-working farmer to acquire a home. It can be done by borrowing 50 per cent of the appraised value of the land and 20 per cent of the appraised value of the permanent insured improvements. Any farmer with a reputation of being economical, honest, and hard working should be able, by means of this act, to acquire a home by making a first mortgage to the farm land bank and giving the money to the owner of the land, and by making a second mortgage to secure the balance of the purchase price. Hundreds of thousands of tenant farmers could secure homes in this way and be able to pay for them. The first mortgage would be of long time, and the loan could be repaid on easy payments. Every payment would reduce the principal and

make both mortgages better security. I want to plead as earnestly as I can for the tenant farmer.

There are approximately 6,500,000 farmers in the United States. According to the last census we have 191,988 farms in my State of Oklahoma, of which 50 per cent are owned by those who cultivate them and 50 per cent rented to tenants. The average size of each farm is 166 acres.

If every one owned his own land he would have better improvements and his place would be beautified and enhanced in value. He would see that every foot of land is placed in cultivation and cultivated in crops best adapted to that particular soil. The improvements would be kept in good repair. He would raise more stock and poultry. His land would be kept up by a rotation of crops and by the use of fertilizer making his farm more productive and greatly increasing the quantity of grain and other things produced.

The farmers would be able to live better and easier and a home would make him a happier and more contented citizen. The man who owns his own home is deeply interested in churches, schools, good roads, and stands for law enforcement. He usually convicts when he is serving on a jury where the evidence shows the defendant guilty. The ideal would be approached if not attained if every farmer owned and cultivated his own land.

PRINCIPAL AND INTEREST PAID TOGETHER

I want to see this act popularized in every possible way. Its advantages have not been appreciated in my State. Everyone knows that it is to the interest of the farmer to borrow money upon long terms, payable in amortized payments, rather than to secure it upon short-time loans and pay a larger rate of interest. By securing a loan under this act the farmers pay the principal along with the interest in such small sums that they really do not know they are repaying the principal. Under this act 1 per cent is added to the interest which is payable semiannually and is applied to the reduction of the principal. There is little or no chance for the Government to lose if the law is intelligently and honestly administered. With an intelligent agent, an expert in the examination of titles, and an honest and intelligent appraiser, there is no chance of loss to the Government. The Government loans only 50 per cent of the appraised value of the land and 20 per cent of the appraised value of the permanent insured improvements, and each year the security is greater as the loan is reduced. In addition, it must be remembered that every farmer who owns his own land, by taking proper care of it, fertilizing it, and rotating the crops, makes the land more valuable and the security better. There is no chance for the Government to lose. All the Government has to do under this law is to permit the farm land bank to extend its credit. In return we have in prospect a very much larger number of farmers throughout the country owning their lands. We see beautiful houses, well-kept yards, gardens filled with vegetables, plenty of stock and poultry, and the farmers cultivating the crops best adapted to that particular soil. We see a happy, contented, and prosperous people. We see production greatly increased throughout the country, as all tillable soil will be cultivated.

ADDS TO PROSPERITY OF ALL CLASSES

All this must add to the prosperity of the people everywhere. As the farming class of people are made more prosperous bank deposits will be added to, the farmers will trade more with the merchants, and give more employment to labor. They will raise more and better stock. This condition of prosperity can be brought about by an amendment to this act that will provide for the appointment of local agents to serve the farm land banks and which will avoid delays in securing loans.

LOCAL ASSOCIATIONS NOT ACTIVE

I recently made inquiry of the farm land bank serving my district and found that local associations have not been organized, except in four of the eight counties. I might add that none of these are active. Loans are only made to the members of these associations. After the farmers who originally formed the loan association secure their loans they take but little interest in the association, do not make an effort to secure additional members, and are indifferent toward having additional loans made. The appointment of a local agent would be made to take the place of the secretary-treasurer of the local loan association, who would be paid a nominal sum sufficient to compensate him for making a preliminary examination of all the necessary papers, keep the books, and make the necessary reports from time to time. Applications would be grouped and forwarded to the farm land banks, and appraisers would be sent to that particular locality to view the lands, so that the expense would be prorated among the applicants and be thereby greatly reduced.

I was reared in the Indian Territory, now a part of Oklahoma, where the people have experienced many delays in administering the affairs of the Indians. They are unwilling to have these delays occur when they are making applications for loans.

HAS REDUCED INTEREST RATES

The enactment of the farm loan act has been of great advantage to the farmers throughout the country in securing reduced rates of interest. Since the passage of the act they have been able to get more liberal terms from companies loaning money. I think I am safe in saying that the interest on such loans in my State has been reduced from 2 to 3 per cent. The farmers have been given the option of paying the loan off in whole or in part on any interest-bearing period. The law should be so amended and administered as to enable the farmers to secure favorable action on applications for loans with the least possible delay so as to give every tenant farmer a chance to own his own home.

LOANS FOR PRODUCTIVE PURPOSES

Loans are made under the farm loan act to farmers for productive purposes: To purchase land, to pay off existing mortgages, to buy more and better livestock, to make improvements, to buy fertilizer, and, in fact, for all purposes that would make the land more productive.

WILL INCREASE PROSPERITY

If this act is amended, it will increase the prosperity of the country and greatly develop it as well as strengthen our citizenship. It will give employment to untold thousands. The farm land banks can lend money at a lower rate of interest than any private company because of the exemption from taxation privileges extended to the bonds. Their bonds are as safe as Government bonds. They are well secured and carry a greater tax exemption than Government bonds. The land banks, therefore, can secure an unlimited amount of money to supply the needs of the farmers. Under the provisions of the bill the farmers do not have to pay any greater interest than the interest which the farm-land banks pay on their tax-exempt bonds, plus the cost of administration, and to this is added 1 per cent additional, which is applied to the reduction of the principal. It is found that 1 per cent compounded for 36 years will pay off the principal. At present the Government is funding its indebtedness by 4 per cent bonds and a farm land bank bond should sell upon as favorable terms. Assuming that these bonds can be sold at 4 per cent, the borrower would pay 4 per cent plus 1 per cent as cost of administration, or a total of 5 per cent as interest, and, in addition, the 1 per cent which would be paid, applied semiannually to the reduction of the principal. The payment therefore of 6 per cent for 36 years would not only pay the interest but would repay the principal as well. The present rate is 4½ per cent, plus 1 per cent for administration, plus 1 per cent applied to reduction of principal, but the money market is easier and the bonds should sell for 4 per cent.

Surely no more constructive measure in the interest of the farmers has ever passed Congress.

If an amendment such as I have suggested were adopted and local agents appointed and the delays in securing loans are avoided, I assure the House and the country that it would popularize the farm loan act such as nothing else could do.

FARMERS URGED TO TAKE ADVANTAGE OF PRESENT LAW

Pending favorable action on the amendment I have introduced, I want to urge the farmers to study and take advantage of the provisions of the present law.

Loans aggregating \$1,019,444,148 have been made to 332,907 borrowers through the farm-loan banks, and of this amount \$18,347,400 has been loaned to 6,800 borrowers in the State of Oklahoma.

No associations have been formed in Adair, Sequoyah, McIntosh, or Okmulgee Counties, although a few loans have been made to residents of Adair County, attached to Cherokee County for the purpose of making loans. The persons desiring to own their own homes or to pay off mortgages should take advantage of the present law and either make application through a loan association, if there is one already formed, and if not organize one so as to be able to borrow money upon long terms at low rates of interest, payable upon the amortization plan.

NEEDS OF FARMERS DISCUSSED

When the Agricultural appropriation bill was up for consideration during the last session of Congress I made an extended speech on the needs of the farmers, inviting attention, among other things, that transportation charges are excessive and that they should be reduced. Of course, everybody

appreciates that when a farmer sells his products in the local market that the price is governed by the price of the central market, less the transportation charges. In other words, the farmer pays the freight. In times of great general depression I think the loss should be prorated and not all borne by the farmers. The farmer needs more practical assistance in an educational and financial way in the marketing of his farm products. He should not only be able to receive the cost of production but should have a fair return for his labor, the interest on his investment, the upkeep of his farm improvements, and the depreciation of his livestock and farm machinery. In my judgment cooperation in marketing his farm products would greatly aid him, and the cooperative societies should be encouraged, both in an educational and a financial way.

THE WAREHOUSE AMENDMENT

I supported the warehouse amendment enacted in 1916, which enables the farmer to store his nonperishable farm products and take receipts for them acceptable as collateral at the Federal reserve banks. This enables the farmers to borrow money at low rates, pay off local obligations, and not be compelled to sell their farm products upon a depressed market.

DIVERSIFICATION OF CROPS

Diversification of crops has been urged as being very important to the farmers. This is quite true. Every farmer, in so far as is possible, should raise his own family supplies and the feed for his livestock. We must, however, take into consideration that certain soils are only adapted to the raising of certain crops, and that the diversification of crops is limited to that extent. We can not raise cotton in the North and certain crops can not be raised successfully in the South.

PROTECTIVE TARIFF NO BENEFIT TO FARMER OR CONSUMER

Neither is the protective tariff of any advantage to the farmer of the West and South. When the farmer was in the most depressed condition Congress enacted the emergency tariff act in the spring of 1921 in the hope that conditions would improve so that it could be claimed that credit was due to that act.

Every farmer knows that by reason of the high tariff duties he must pay a largely increased price for almost every article he purchases, including the clothes worn by his family, and that it greatly decreases the purchasing power of the money received for his farm products. I can not follow the reasoning of anyone who urges upon the farmer, the laborer, or the consumer, who is not a manufacturer, that paying a higher price for everything he buys adds to his prosperity. Tariff on wheat does not increase the price of wheat in Oklahoma, because the price of wheat in the United States is governed by the price at Liverpool. The tariff on Canadian wheat may help the wheat farmer at times because of a shortage locally immediately south of the Canadian line, but it does not help the wheat farmer in Oklahoma. Transportation charges are prohibitive and prevent competition. The same is true with reference to cotton.

NO TARIFF ON COTTON

There is no tariff on cotton, although such a statement was made during the past campaign and urgently and repeatedly insisted upon. There never was any tariff on the kind of cotton grown in Oklahoma. A few years ago there was a tariff on long-staple or sea-island cotton, none of which is or was ever grown in Oklahoma, but that provision was repealed by the act of 1922. Every farmer knows that during the active selling season the daily cotton-market quotations refer to either weaker or stronger cables from Liverpool and that all local markets fluctuate accordingly.

I have repeatedly urged and I want to invite attention again, in order to emphasize it, that I favor those appropriations which are for productive purposes, and I include among them the appropriations included in the Agricultural appropriation bill, for the various activities of the Department of Agriculture, for roads, for rural mail routes, and we should exercise the severest economy upon large expenditures which bring no return and which do not add to the happiness, contentment, or prosperity of all the people of the Nation. [Applause.]

Mr. HASTINGS. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the Record.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

The Clerk read as follows:

For conducting such investigations of the nature and means of communication of the disease of citrus trees known as citrus canker, and for applying such methods of eradication or control of the disease as in the judgment of the Secretary of Agriculture may be necessary, including the payment of such expenses and the employment of such persons and means, in the city of Washington and elsewhere, and cooperation with such authorities of the States concerned, organizations of growers, or individuals, as he may deem necessary to accomplish such purposes, \$48,630; and, in the discretion of the Secretary of Agriculture, no expenditures shall be made for these purposes until a sum or sums at least equal to such expenditures shall have been appropriated, subscribed, or contributed by State, county, or local authorities, or by individuals or organizations, for the accomplishment of such purposes: *Provided*, That no part of the money herein appropriated shall be used to pay the cost or value of trees or other property injured or destroyed.

Mr. BLANTON. Mr. Chairman, on page 23, line 7, I move to strike out "\$48,630."

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

Mr. BLANTON. It is merely pro forma, Mr. Chairman.

I notice in the afternoon paper that certain officials of one of the departments are to give a banquet to-night for the superintendent of the Yellowstone National Park, and they are to serve him a roasted buffalo from the Yellowstone National Park. I wondered if that roasted buffalo cost as much as the two buffalo calves which this department, with apparent kindness, donated to a zoo park in my home city. Last spring they proposed to donate two buffalo calves if those interested in having a zoo in my home city would pay the transportation expenses. My home citizens very readily agreed to do that, not imagining it would run into the hundreds of dollars.

When these two buffalo calves arrived at Abilene, Tex., the express bill and expenses was between five and six hundred dollars—I think nearer six hundred than five hundred. Citizens at home do not expect bills of that kind. I should think that when this department—superintendent of the Yellowstone Park—advises the public that he will furnish such animals for zoos if they will pay the cost of transportation, he should give the people some idea of what the charges are going to be, because very few public-spirited people at home are willing to dig up that enormous amount of money to pay for animals.

Mr. O'CONNELL of New York. Especially for calves.

Mr. BLANTON. Yes. Of course, they are going to grow into buffaloes if they do not die in the meantime. But I was wondering how much this roast buffalo was going to cost at the banquet to-night, coming also from the Yellowstone National Park. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

For biophysical investigations in connection with the various lines of work herein authorized, \$33,952.

Mr. LOZIER. Mr. Chairman, I move to strike out the last word.

Mr. Chairman and gentlemen, while the present short session of Congress automatically ends March 4, in that limited time much can be done to restore the balance between agriculture and the other gainful occupations. Farmers are not prosperous, politicians, the President, periodicals, and metropolitan press to the contrary notwithstanding.

Some Senators and Representatives who were quite active in the last session in supporting farm relief legislation now seem to have lost interest in the subject and declare that the emergency has passed. The emergency to which they refer, and which before the election so grievously troubled their esthetic and sensitive souls, must have related to their candidacy for reelection, for most certainly the agricultural emergency, which for four years has held this Nation in its baneful grip, has not passed, but still exists, although some Senators and Representatives, with beautifully engraved election certificates in their pockets, may not now be able to visualize the emergency that still stares the farmer in the face and blocks the path to profitable agricultural activities.

Before the election the deplorable state of agriculture was quite apparent to these Senators and Representatives, who were seemingly very much concerned and exceedingly anxious to enact legislative relief measures, but now, inasmuch as the elections and the fortunes of politics have given them a new lease of official life, I am wondering if their success at the polls has dimmed their vision or dulled their comprehension of existing economic conditions. Curiosity prompts me to inquire if Senators and Representatives will be as loyal to agriculture

and as aggressive in promoting its rehabilitation after the election as they were before the election.

I am anxious to know whether or not President Coolidge and his advisers will exert themselves as diligently to improve agricultural conditions as they do to enlarge the already enormous profits, augment the existing unconscionable bounties, magnify the present grossly liberal gratuities, and otherwise, by special privilege and legislative favoritism, improve the economic conditions of the commercial and manufacturing classes and those who own the great transportation agencies of the Nation. With Uncle Sam acting as a wet nurse, other occupational groups have been artificially and intensively stimulated, but for agriculture the administration has had nothing but words, words, words. Moreover, when the President speaks of agricultural relief measures, he offers no definite remedy and proposes no concrete policy. He merely deals in glittering and commonplace generalities, waves his hand at the distant horizon, and utters a few faint dentilingual and dentilabial words—words formed between the teeth and tongue and articulated between the teeth and lips—colorless, bloodless, meaningless, spineless, banal, and fanciful promises that open the eyes of expectation, but disappoint hope and perish with their utterance.

I say this sorrowfully, for nothing would please me better than to see President Coolidge use the great power of his high and exalted office along entirely proper constitutional lines, to bring to the agricultural classes the social and economic justice that has been so long denied them.

Surely the underlying causes of this nation-wide agricultural distress have not been removed or materially neutralized. The farmers are still laboring under an economic handicap that has brought them, as a class, dangerously close to bankruptcy. It is folly to claim that the farmers are prosperous or that the agrarian crisis has passed. Fundamentally, agriculture is not on a safe, sane, sound, or profitable basis. Farmers, as a class, have not been able to balance their budgets or show a substantial income in excess of necessary outlays. When overhead expense, cost of supplies, interest on and depreciation of capital investment, and value of labor are considered, there is still a staggering balance on the wrong side of the farmer's ledger.

The increase in the price of a few farm products has not been sufficient to restore prosperity to the agricultural classes, nor to enable them to recoup the tremendous losses they sustained in the last four years. Indeed, the apparent advantage of higher prices fades away in the face of relatively poor crops, reduced production, increased overhead expense, high interest rates, confiscatory freight rates, and an unreasonable and ever-increasing spread between the price at which the farmer sells his commodities and the price he pays for his supplies. This temporary increase in the market price of some farm commodities, confessedly the result of ever-changing world-wide conditions, has not, will not, and can not solve the agricultural problem, or pull the American farmer out of the economic slough of despondency. This sporadic advance in the market value of a few farm products, for which no one claims the administration is responsible, has had a palliative effect only, and while in a very limited way it has temporarily reduced the severity of the agricultural distress in some localities and mitigated the intensity of the farmer's burdens, still it has not removed the causes that have brought about these acute, painful, and alarming agricultural conditions.

It is idle for the administration, the politicians, the periodicals, or the public press to assert that the agricultural crisis has passed, or that the agricultural classes are on the road to prosperity. Farmers know that this is not true. The disease that has so long and so completely devitalized agriculture is too deep seated and malignant to be cured by a temporary or even permanent advance in the price of a few farm commodities, especially in view of the indisputable fact that, notwithstanding such advance, the farmer is still compelled to sell his commodities at prices far below the cost of production.

Next year will probably see more enforced liquidation of farm loans, more sacrifice of farm homes, more foreclosure of farm mortgages, and more bankruptcy proceedings involving farmers than any other one year in the present generation. For four years an economic hurricane of unusual violence has ravaged agriculture. No one familiar with the facts will claim that this storm has spent its fury or its force. With unabated power it will yet ruthlessly take toll of millions of farmers, who will be compelled to give up the fight, after battling desperately for four years against adverse conditions and after the reserve earnings and accumulations of former years shall have been absorbed or dissipated.

All farmers and others familiar with agricultural conditions know what is the matter with the farmer. The trouble may be summed up in a few short sentences: Inability for four years to sell his products at prices that would return the cost of production, much less afford a substantial profit; the greatly reduced purchasing power of the farmer's dollar; the amazing, inexcusable, and ever-increasing spread between the price at which the farmer sells his commodities and the price at which he buys his supplies; high taxes and high interest rates; the necessity of selling his products in the open, unprotected, and competitive foreign markets, and of buying his supplies in a monopolistic, highly protected, artificially stimulated, and noncompetitive home market; to which may be added a multitude of economic burdens imposed on the farmer by special privilege legislation, governmental bounty, and perversion and maladministration of the economic forces of the Nation.

Analogous to the dream of one of the ancient Pharaohs, the four ill-favored, lean-fleshed, blasted, and withered agricultural years of the Harding-Coolidge administration have swallowed up and devoured the agricultural earnings and accumulations of the eight prosperous, fat-fleshed, well-favored years of the Wilson administration.

In the equation of genuine national prosperity agriculture is, or at least should be, a prime factor. Its efficient functioning is essential to well-balanced economic progress. There can be no normal, nation-wide, or permanent prosperity while agriculture languishes. The much-advertised prosperity we now have in the United States is an abnormal, artificially stimulated, morbid, sectional, lop-sided, and jug-handled prosperity, in which some vocational groups greedily participate to the exclusion of the agricultural classes.

In the manufacturing, transportation, and commercial sections of our economic anatomy the business pulse is, as a physician would say, beating strongly and rhythmically at the rate of 200 per minute, while in the agricultural extremities the feeble and fluttering pulse beats fall below 60, indicative of irreparable economic decay and prophetic of ultimate vocational disaster.

In dealing with the specially favored classes the Government and those who direct our economic life give "good measure, pressed down, and shaken together, and running over," but to the farmer they give scant measure, and trick him with wicked economic balances and bags of deceitful legislative and economic weights that, according to the Prophet Micah, are abominable.

The President tells the farmers how the tariff has protected and enriched them, but from a bitter and not soon to be forgotten experience the farmer knows, so far as he is concerned, that the tariff is a delusion and a snare—an apple of Sodom, sun-kissed and lovely to look upon, but within full of bitter ashes, a whitened sepulcher which, indeed, appears beautiful outward but within, is full of dead men's bones and uncleanness.

Tradition tells us that one of the princes of the illustrious but unfortunate family of Barmecides invited a starving beggar to a dinner and set only empty dishes before him. The Republican Party biennially invites the farmers of this Nation to a tariff feast, but always sets before them empty dishes, serves an imaginary banquet, and showers them with imaginary favors. The tariff is as disappointing to the farmer as a kiss or a remittance of money by radio.

It has long since been conclusively demonstrated that the tariff on farm products, of which we produce a surplus, is an economic ignis fatuus—a will-o'-the-wisp that fascinates with a delusion that distance creates but contiguity destroys. The pot of gold that the tariff offers the farmer is buried at the end of the rainbow. The farmer can never reach the spot where his pot of prosperity is buried.

There was once a widely accepted belief that scrofula, commonly called "the king's evil," could be cured, and only be cured, by the touch of a king. For more than a generation the Republican Party has loudly proclaimed that the touch of King Tariff would quickly and permanently cure all the farmers' economic ills. But after having been long deceived by this specious but fallacious system the farmer is now compelled to look elsewhere for relief.

According to an ancient fable the crocodile weeps as it eats its victims. The beneficiaries of special privilege and class legislation are shedding crocodile tears over the farmers' economic plight, while they continue to exploit him, press down the economic thumb screws, sap his substance by buying his commodities below the cost of production on an artificially manipulated market, and confiscate his meager earnings by artificially and unreasonably increasing the cost of his supplies.

Agriculture is the oldest and most important basic industry, and the mother of all other vocations. When it should be enjoying an equal degree of prosperity with other callings, it has been thrown out of the temple of equal opportunity and denied a place in the list of profitable occupations. Its pathetic condition and acute distress do not awaken the interest, much less the pity, of the favored occupational groups, who dwell in the magic zone of perpetual and perennial special privilege. The agrarian classes are being rapidly reduced to a state of economic servitude. Unless agriculture can be speedily rehabilitated, it will soon cease to be a prime factor in the economic life of the Nation, and will become the bond servant or handmaiden of the other occupational groups, who dominate our economic life, and whose welfare seems to be the chief concern of our Government.

The farmer does not demand a bounty or gratuity of the Government, but he does ask equal opportunity in the age-long struggle for gain; that his economic handicaps and legislative burdens be removed, or at least materially reduced; that other vocations be no longer favored at his expense, that discrimination against him cease; and that he be permitted to share in the increase of our national wealth. Agriculture does not seek to dominate other occupations, but it protests against being reduced to a state of economic vassalage. It modestly asks what it has a right to demand—equal rights, equal consideration, and equal opportunity.

Agriculture says to the Government and to the forces that have wrongfully manipulated our national economic life:

Turn me loose; strike from my arms and ankles the manacles that special privilege and class legislation have riveted thereon; take from my back the heavy load I am carrying, and have for years carried for the benefit of other groups; do not deny to me a living price for my products; vouchsafe to me the God-given privilege of a square deal and equal opportunity; admit me to a place at the council table around which the business and economic activities of the Nation are determined.

On the other hand, behold the beneficiaries of special privilege: Recipients of unmerited bounties enriched by undeserved increment, greedy for unearned gain, entrenched in a strategic position and wielding an embezzled power, dominating the press and other agencies that control public opinion and dull the public conscience, striving for economic sovereignty and seeking to destroy the principle of equal rights and equal opportunities. These recipients of legislative favoritism have insidiously inoculated the agricultural classes with economic sleeping sickness, and while the farmer is under the lethal or enervating influence of this incapacitating infection he approves legislation and sanctions economic policies that render his calling unprofitable.

It seems to me that there is a disposition now that the election is over to postpone legislation for the improvement of agricultural conditions. I hope there may be no such postponement. Delay of justice to agriculture is a denial of justice to agriculture. We should be as loyal to agriculture after the election as we were before. If we delay grappling with this important problem we invite and justify the charge that we were not sincere in what we said and tried to do before the election. We can not afford to assume this unenviable attitude, and I for one will not assume it.

I assert the necessity for remedial farm legislation is as great now as it was during the last session of Congress, as imperative now as before the election. I shall keep faith with my constituents and my conscience.

I appeal to the Representatives and Senators from the great agricultural States to stand together, without regard to party affiliation, and work for some worth-while legislation that will correct some of the abuses to which agriculture is subjected, right some of the wrongs agriculture has suffered, restore or aid in restoring the purchasing power of the farmer's dollar, enlarge the market for farm commodities, enhance the market value of farm products, substantially reduce the spread between the price the farmer gets for his commodities and the price he pays for his supplies, and otherwise lighten the economic handicap under which the farmer labors.

All this can be accomplished without doing violence to sound business principles or running counter to well-established economic laws. I ask no action that can not be taken along safe, sane, and rational lines; I advocate no policy that is not conformable to reason. I plead for justice to the American farmer; for a square deal for agriculture; for a restoration of natural conditions by withdrawing and withholding artificial influence and special privilege.

I appeal to my Democratic colleagues to make the rehabilitation of agriculture the one outstanding issue in this session of Congress. I appeal to my Republican colleagues, who have a majority in both branches of Congress and who can insure the enactment of remedial farm legislation, to cooperate with the Democratic membership of this House in an earnest effort to undo the grievous economic wrongs to which agriculture has been subjected. I appeal to President Coolidge to be as aggressively solicitous for the welfare of the agricultural classes as he is for the well-being of those engaged in manufacturing, commerce, and transportation. I make no partisan appeal. The farmer's problems and the farmer's distress are not partisan matters. I would have all parties, classes, and groups join in an immediate, sympathetic, and wholehearted drive for the relief of agriculture, so that this great basic industry may come into its own as an equal with other occupations in the creation and division of our national wealth and as a partner in whatever prosperity may come to our people. I warn you it will be a fatal mistake to deny or delay justice to the agricultural classes.

The farmers of America constitute the most stable, dependable, and conservative element of our population. They have been the victims of economic injustice. They took their losses manfully. Though sorely stricken, hope urged them on and told them that to-morrow would be better. There was an earnest and honest hope that exalts courage and stimulates patience. They did not and will not turn Bolshevik, but in the zero hour of economic disaster they exemplified the highest ideals and most exalted traditions of American citizenship. If the manufacturing, commercial, and capitalistic classes had suffered the social injustice and economic wrongs to which the farmers have been subjected, chaos would have been let loose, and these groups would have filled the earth with their bolshevistic ravings and precipitated social unrest and industrial disorder. Give the farmer justice and a square deal.

The message of the President makes it quite clear that he does not favor and will not push any farm-relief legislation during the present session of Congress, or at least until there is a report from the commission appointed by him to inquire into the agricultural situation. In all good faith I hope the President may reconsider his decision and use his influence on his party in Congress to secure their cooperation with Democrats in the immediate enactment of some constructive legislation for the improvement of agricultural conditions. I do not question the motive of the President in appointing this commission, but I do assert that when something important needs to be done and those in authority want to evade the issue or sidestep or postpone action it has become quite common to appoint a commission or committee to investigate.

The appointment of this commission can only result in delay and it may ultimately defeat the enactment of all farm-relief legislation. The President is not committed in advance to the recommendations this commission may make. No matter how diligently and how honestly the commission may labor, it is not probable that it will develop any facts in relation to the agricultural situation that are not already known.

Every intelligent farmer and every other well-informed person knows what is the matter with agriculture. Every thoughtful student of present-day affairs is familiar with the causes and conditions that have brought agriculture to the verge of insolvency. For four years these matters have been uppermost in the minds of the agricultural classes and they have been examined, investigated, and analyzed from every conceivable standpoint. The daily and weekly papers, the metropolitan press, the political, economic, and business periodicals, the farm organizations, agricultural colleges, political economists, and the most expert agricultural diagnosticians have uncovered every phase and detail of the agricultural problem.

It will not be seriously contended that the Coolidge commission will make any new discoveries or suggest any new plan of relief. The agricultural situation has been discussed with an infinity of detail in and out of Congress. The time for investigation has passed and the time for affirmative action has come.

Why postpone until the next Congress what can and should be done during the present session? Let us finish the job.

Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

Total, Bureau of Plant Industry, \$8,834,638, of which amount not to exceed \$1,467,154 may be expended for personal services in the District of Columbia.

Mr. MAGEE of New York. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TREADWAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 10404, the agricultural appropriation bill, and had come to no resolution thereon.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. WILLIAMS of Michigan (at the request of Mr. MAPES), indefinitely, on account of illness.

To Mr. PARKS of Arkansas (at the request of Mr. DRIVER), on account of illness.

To Mr. BLACK of Texas, for one week, on account of the death of his sister.

ADJOURNMENT

Mr. MAGEE of New York. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 18 minutes p. m.) the House adjourned until to-morrow, Wednesday, December 10, 1924, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXVI, executive communications were taken from the Speaker's table and referred as follows:

719. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation, to authorize the transfer of a portion of the Brewerton Channel Range Rear Lighthouse Reservation, Md., from the Department of Commerce to the Treasury Department; to the Committee on Interstate and Foreign Commerce.

720. A letter from the chairman of the United States Shipping Board, transmitting a report of arbitration awards and settlements of claims agreed to since the previous session of Congress by the United States Shipping Board; to the Committee on Merchant Marine and Fisheries.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 9937) for the relief of Maurice J. Keegan; Committee on Military Affairs discharged, and referred to the Committee on Naval Affairs.

A bill (H. R. 10286) granting an increase of pension to Amelia Viets; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. WINSLOW: A bill (H. R. 10522) to create a bureau of civil air navigation in the Department of Commerce, encourage and regulate the navigation of civil aircraft, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. SUMMERS of Washington: A bill (H. R. 10523) authorizing the appointment of certain Army officers to an advanced grade on the retired list, and for other purposes; to the Committee on Military Affairs.

By Mr. MAJOR of Missouri: A bill (H. R. 10524) authorizing the construction of a bridge across the Missouri River near Arrow Rock, Mo.; to the Committee on Interstate and Foreign Commerce.

By Mr. DICKINSON of Iowa: A bill (H. R. 10525) to amend the War Finance Corporation act; to the Committee on Banking and Currency.

By Mr. REECE: A bill (H. R. 10526) to extend the limitations of time upon the issuance of medals of honor, distinguished-service crosses, and distinguished-service medals to persons who served in the Army of the United States during the World War; to the Committee on Military Affairs.

By Mr. CAMPBELL: A bill (H. R. 10527) to amend the legislative, executive, and judicial appropriation act, approved February 26, 1907, as amended, and to amend the Judicial Code; to the Committee on the Judiciary.

By Mr. JOHNSON of Kentucky: A bill (H. R. 10528) to refund taxes paid on distilled spirits in certain cases; to the Committee on Ways and Means.

By Mr. HILL of Maryland: A bill (H. R. 10529) authorizing the use for permanent construction at military posts of the proceeds from the sales of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes; to the Committee on Military Affairs.

By Mr. FISH: A bill (H. R. 10530) to amend the World War adjusted compensation act; to the Committee on World War Veterans' Legislation.

By Mr. CANNON: A bill (H. R. 10531) authorizing the construction of a bridge across the Missouri River near St. Charles, Mo.; to the Committee on Interstate and Foreign Commerce.

By Mr. HILL of Washington: A bill (H. R. 10532) granting the consent of Congress to the State of Washington to construct, maintain, and operate a bridge across the Columbia River; to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 10533) granting the consent of Congress to the State of Washington to construct, maintain, and operate a bridge across the Columbia River near Chelan Falls, Wash.; to the Committee on Interstate and Foreign Commerce.

By Mr. SNYDER: A bill (H. R. 10534) to improve the efficiency of the medical service of the United States Veterans' Bureau; to the Committee on World War Veterans' Legislation.

By Mr. HILL of Maryland: A bill (H. R. 10535) authorizing the Secretary of War to convey to the Federal Land Bank of Baltimore, Md., the tract of land situated in the city of San Juan, island of Porto Rico; to the Committee on Military Affairs.

By Mr. OLDFIELD: A bill (H. R. 10536) to amend the World War veterans' act, 1924; to the Committee on World War Veterans' Legislation.

By Mr. HILL of Alabama: Joint resolution (H. J. Res. 305) relieving posts of the American Legion from liability on account of loss or destruction of obsolete rifles loaned by the War Department; to the Committee on Military Affairs.

By Mr. BEGG: Concurrent resolution (H. Con. Res. 34) to print as a House document "The peril of narcotic drugs, a pamphlet for the use of teachers and parents"; to the Committee on Printing.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ARNOLD: A bill (H. R. 10537) to remove the charge of desertion from the record of Henry Benjamin; to the Committee on Military Affairs.

By Mr. ASWELL: A bill (H. R. 10538) granting a pension to Loreziar Walton; to the Committee on Pensions.

By Mr. BEGG: A bill (H. R. 10539) granting an increase of pension to Barbara Apple; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10540) granting an increase of pension to Elizabeth Stowe; to the Committee on Invalid Pensions.

By Mr. BRAND of Ohio: A bill (H. R. 10541) granting an increase of pension to Lois L. Andrews; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10542) granting an increase of pension to Emily J. McGee; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10543) granting a pension to Elizabeth T. Douglass; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10544) granting a pension to Martha W. Y. Joslin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10545) granting an increase of pension to Anna M. Lohnes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10546) granting an increase of pension to Mary A. Pemberton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10547) granting a pension to Fannie Nier; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10548) granting an increase of pension to Jane A. Shelton; to the Committee on Invalid Pensions.

By Mr. CABLE: A bill (H. R. 10549) granting a pension to William Arthur Crampton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10550) granting an increase of pension to Phoebe S. Beardourff; to the Committee on Invalid Pensions.

By Mr. CANFIELD: A bill (H. R. 10551) granting a pension to Amanda Mason; to the Committee on Invalid Pensions.

By Mr. COOPER of Wisconsin: A bill (H. R. 10552) granting an increase of pension to Melvina D. Story; to the Committee on Invalid Pensions.

By Mr. COLE of Ohio: A bill (H. R. 10553) granting a pension to Charles M. Brown; to the Committee on Invalid Pensions.

By Mr. DEAL: A bill (H. R. 10554) authorizing the appointment of Herbert L. Lee as Artillery officer, United States Army; to the Committee on Military Affairs.

By Mr. FITZGERALD: A bill (H. R. 10555) granting a pension to Stanley Caplinger; to the Committee on Pensions.

By Mr. FUNK: A bill (H. R. 10556) to provide for compensation to Ona Harrington for injuries received in airplane accident; to the Committee on Claims.

By Mr. GIBSON: A bill (H. R. 10557) granting an increase of pension to Lucinda M. Irish; to the Committee on Invalid Pensions.

By Mr. GLATFELTER: A bill (H. R. 10558) granting an increase of pension to Kate J. Bamforth; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10559) granting an increase of pension to Mary E. Brady; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10560) granting an increase of pension to Louisa Yeagy; to the Committee on Invalid Pensions.

By Mr. HICKEY: A bill (H. R. 10561) granting a pension to Louise Eisele; to the Committee on Invalid Pensions.

By Mr. HILL of Maryland: A bill (H. R. 10562) to recognize and reward the accomplishments of the world fliers; to the Committee on Military Affairs.

By Mr. HOCH: A bill (H. R. 10563) granting an increase of pension to Adaline E. Robbins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10564) granting an increase of pension to Elizabeth R. Noll; to the Committee on Invalid Pensions.

By Mr. JEFFERS: A bill (H. R. 10565) for the relief of George Howard Gandy; to the Committee on Military Affairs.

By Mr. LINTHICUM: A bill (H. R. 10566) granting an increase of pension to Mary J. Clark; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10567) granting an increase of pension to Margaret E. Haviland; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10568) granting an increase of pension to Edwina B. Kemp; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10569) granting an increase of pension to Hester R. Michael; to the Committee on Invalid Pensions.

By Mr. LOZIER: A bill (H. R. 10570) granting a pension to Augusta A. Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10571) granting a pension to Henry A. Hart; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10572) granting an increase of pension to Annie Vandegrift; to the Committee on Invalid Pensions.

By Mr. MADDEN: A bill (H. R. 10573) granting an increase of pension to Belle Mifflin; to the Committee on Invalid Pensions.

By Mr. O'BRIEN: A bill (H. R. 10574) for the relief of Charles Edward Bailey; to the Committee on War Claims.

By Mr. QUAYLE: A bill (H. R. 10575) for the relief of Annie O'Neill; to the Committee on Claims.

By Mr. SITES: A bill (H. R. 10576) granting an increase of pension to Kate E. Bowers; to the Committee on Invalid Pensions.

By Mr. SNYDER: A bill (H. R. 10577) granting a pension to Benjamin F. Doxtater; to the Committee on Pensions.

By Mr. SPEAKS: A bill (H. R. 10578) granting an increase of pension to Josephine Miller; to the Committee on Pensions.

By Mr. SPROUL of Kansas: A bill (H. R. 10579) granting an increase of pension to Frank L. West; to the Committee on Invalid Pensions.

By Mr. SUMMERS of Washington: A bill (H. R. 10580) granting an increase of pension to Mary L. Reither; to the Committee on Invalid Pensions.

By Mr. SWANK: A bill (H. R. 10581) granting an increase of pension to Jacob Amberg; to the Committee on Pensions.

By Mr. TINCHER: A bill (H. R. 10582) for the relief of Thomas G. House; to the Committee on Military Affairs.

Also, a bill (H. R. 10583) granting a pension to Theodora E. Eisenbart; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10584) granting a pension to Thomas G. House; to the Committee on Invalid Pensions.

By Mr. WILSON of Indiana: A bill (H. R. 10585) granting an increase of pension to Matilda A. Jackson; to the Committee on Invalid Pensions.

By Mr. WOLFF: A bill (H. R. 10586) for the relief of the Renter Milling Co.; to the Committee on Claims.

By Mr. QUAYLE: Resolution (H. Res. 375) to pay salary of Harry Howard Dale, Jr., late secretary to John F. Quayle; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 2 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3120. By the SPEAKER (by request): Petition of citizens of California, protesting against the enactment into law of Senate bill 3128, called the compulsory Sunday observance bill; to the Committee on the District of Columbia.

3121. By Mr. BRIGGS: Petition of Mr. Francis M. Savage, president Northwest Savings Bank, Washington, D. C., relative to branch banking; to the Committee on Banking and Currency.

3122. By Mr. BURNESSE: Petition of 56 residents of Divide Township, Dickey County, N. Dak., petitioning Congress not to concur in the passage of the compulsory Sunday observance bill (S. 3218) nor to pass any other religious legislation which may be pending; to the Committee on the District of Columbia.

3123. Also, petition of 42 residents of Bowesmont, N. Dak., petitioning Congress not to concur in the passage of the compulsory Sunday observance bill (S. 3218) nor to pass any other religious legislation which may be pending; to the Committee on the District of Columbia.

3124. By Mr. FULLER: Petition of the American Federation of Labor, favoring the enactment of the bill (S. 1898) to increase salaries of post-office employees; to the Committee on the Post Office and Post Roads.

3125. Also, petition of the city council of the city of Peru, Ill., opposing any legislation to permit the discharge of sewage into the Illinois River from the Sanitary District of Chicago or elsewhere, and opposing any legislation taking the control of the water of Lake Michigan out of the hands of the War Department; to the Committee on Rivers and Harbors.

3126. By Mr. O'CONNELL of New York: Petition of the Democratic county committee, county of New York, favoring the postal salary increase bill (S. 1898); to the Committee on the Post Office and Post Roads.

3127. By Mr. PORTER: Petition of John Braden Post, No. 488, Grand Army of the Republic, North East, Pa., favoring legislation to increase the pensions of Civil and Spanish War veterans and their widows; to the Committee on Pensions.

3128. By Mr. REECE: Petition of Admiral Robert E. Peary Ship Post, No. 427, urging passage of naval omnibus bill (H. R. 2688); to the Committee on Naval Affairs.

3129. By Mr. SPEAKS: Papers to accompany House bill 10117, granting an increase of pension to Margaret A. Hankins; to the Committee on Invalid Pensions.

3130. Also, papers to accompany House bill 10116, granting an increase of pension to Hannah Marble; to the Committee on Invalid Pensions.

3131. Also, papers to accompany House bill 10115, granting an increase of pension to Edith C. Peck; to the Committee on Invalid Pensions.

3132. By Mr. STRONG of Kansas: Petition of A. D. Jellison, E. W. Rolfs, E. L. Knostman, Franklin Shane, W. A. Bingham, C. W. Flower, Charles A. Brown, L. W. Sargent, E. H. Shane, W. F. Durbin, H. C. Pritchard, Fred J. Phillips, Charles Shane, A. A. and M. J. Flower, P. O. Volz, Y. Y. Young, Philip Hay, Philip H. Olson, W. C. Dumm, C. A. Clewell, C. C. Arthur, F. B. Murray, H. M. Pierce, G. A. Lancaster, John N. Tritle, G. B. Stiers, Frank J. Metz, George B. Smith, A. K. Yates, Robert R. Mass, Roy M. Sheldon, Jess Knowlton, John F. Harbes, Dr. J. F. Northrup, W. G. Behrend, H. O. Bowles, F. A. Durand, J. R. Durbin, I. M. Platt, Henry Thiele, R. O. Thomen, W. G. Glick, Dr. James Lehane, James P. Coleman, Dr. A. L. Young, Albert Moore, J. C. Padgett, J. Scott Davis, T. W. Dorn, F. M. Hart, De Luxe Candy Co., J. W. Scott, P. K. Kachavos, G. E. Muenzenmayer, W. F. Muenzenmayer, H. G. J. Seitz, Irving Miller, C. W. Brakensiek, Steve Maduros, B. D. Adam, Edith Kregar, William F. Miller, J. F. Roswurm, R. J. Lasselle, C. A. Bellinger, L. E. Darrow, W. L. Baker, Lee Baker, Pete Curtis, Harry Roediger, Adolph Boehler, and W. P. Gully, all of Junction City, Kans., favoring the passage of the postal salary increase bill; to the Committee on the Post Office and Post Roads.

3133. By Mr. SWING: Petition of citizens of Orange County, Calif., protesting against the compulsory Sunday observance bill; to the Committee on the District of Columbia.

3134. By Mr. TAYLOR of West Virginia: Petition of C. F. Washburn et al., of Kanawha County, W. Va., protesting against the passage of Senate bill 3218; to the Committee on the District of Columbia.

SENATE

WEDNESDAY, December 10, 1924

The Chaplain, Rev. J. J. Muir, D. D., offered the following prayer:

Our Heavenly Father, we bless Thee for every mercy vouchsafed unto us and for the continuance of blessings that are multiplied constantly in our experiences. And at this season of the year, when gladness and hope are supposed to be operative, we beseech of Thee to direct our ways with cheer, so that others may share with us in the benefactions of Thy providence and all spiritual good vouchsafed to us, through Christ our Lord. We ask in His name. Amen.

The reading clerk proceeded to read the Journal of the proceedings of the legislative day of Monday, December 8, 1924, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

REPORT OF UNITED STATES SHIPPING BOARD

The PRESIDENT pro tempore laid before the Senate a communication from the assistant to the Director of the United States Shipping Board, transmitting a corrected copy of the Eighth Annual Report of the United States Shipping Board for the fiscal year 1924, which was referred to the Committee on Commerce.

CREDENTIALS

The PRESIDENT pro tempore laid before the Senate a certificate of the Governor of the State of South Carolina certifying to the election of COLE L. BLEASE as a Senator from that State for the term beginning March 4, 1925, which was read and ordered to be filed, as follows:

STATE OF SOUTH CAROLINA,
Secretary of State, Columbia.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 4th day of November, 1924, Hon. COLE L. BLEASE was duly chosen by the qualified electors of the State of South Carolina a Senator from said State, to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1925.

Witness:

His excellency our governor, THOS. G. McLEOD, and our seal hereto affixed at Columbia this 29th day of November, in the year of our Lord 1924.

[SEAL.]

By the governor:

THOS. G. McLEOD, Governor.

W. P. BLACKWELL,
Secretary of State.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Farrell, one of its clerks, announced that the House had passed a bill (H. R. 10020) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1926, and for other purposes, in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS

Mr. McNARY presented memorials of sundry citizens of Grand Ronde, McMinnville, and vicinity, in the State of Oregon, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. CURTIS presented a memorial of sundry citizens of Towanda, Kans., remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. PHIPPS presented memorials of sundry citizens of Denver, Erie, and Golden, all in the State of Colorado, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. FRAZIER presented the memorials of Christian Juhl and other citizens of Bowesmont and of Mrs. Emily Rosenquist and other citizens of Oakes, all in the State of North Dakota, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. ROBINSON presented petitions of sundry citizens of Arkansas, praying for the passage of the so-called postal salary

bill providing an equipment allowance for rural carriers at the rate of 4 cents per mile, which were referred to the Committee on Post Offices and Post Roads.

Mr. CAPPER presented a telegram in the nature of a petition from rural carriers of the Wichita (Kans.) post office, praying for the passage of legislation granting increased compensation to postal employees, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of sundry citizens of Bazine, Kans., remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. WILLIS presented a resolution of the council of the city of Cleveland, Ohio, favoring the passage of legislation to regulate or control the interstate traffic in deadly weapons, which was referred to the Committee on Interstate Commerce.

He also presented a resolution of the council of the city of Cleveland, Ohio, favoring the passage of the so-called postal salary bill providing increased compensation to postal employees, which was referred to the Committee on Post Offices and Post Roads.

FEDERAL AID FOR ROAD CONSTRUCTION

Mr. STERLING, from the Committee on Post Offices and Post Roads, to which was referred the bill (H. R. 4971) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes, reported it with an amendment and submitted a report (No. 799) thereon.

HOLIDAY RECESS

Mr. WARREN. From the Committee on Appropriations I report back favorably without amendment House Concurrent Resolution 32, relative to adjournment for the holidays, and I ask for the adoption of the resolution.

The Senate, by unanimous consent, proceeded to consider the concurrent resolution, which was read, as follows:

Resolved by the House of Representatives (the Senate concurring), That when the two Houses adjourn Saturday, December 20, 1924, they stand adjourned until 12 o'clock meridian, Monday, December 29, 1924.

Mr. ROBINSON. Mr. President, I suggest to the Senator from Kansas [Mr. CURTIS] that the resolution ought to be modified so as to provide for adjournment over January 1. Under the custom of the Senate we have never held a session on the 1st day of January. Senators who make arrangements to leave the city for the holidays would hardly feel warranted in returning for December 29, when probably only a single session after that date would be had during that week. Very little business, if any, can be transacted, and it would seem to me proper to take an adjournment for two weeks. That has been the custom of the two Houses.

Mr. WARREN. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Arkansas yield to the Senator from Wyoming?

Mr. ROBINSON. I yield.

Mr. WARREN. I realize that what the Senator has said is true, but I ask him to consider that under the present mode of doing business and the intention of passing all of the supply bills during the short session, it becomes necessary to work on and report appropriation bills during the holidays. The concurrent resolution comes from the House, and with the arguments that they make for using those days to work with the appropriation bills it seemed necessary to take the shorter recess. I assume that it would be understood, and if necessary, there could be some gentlemen's agreement or understanding, though I do not propose it, that so many of those Senators as could not return within the time fixed might remain away until after the 1st of January.

Mr. ROBINSON. That may meet the requirements of the situation.

Mr. CURTIS. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Arkansas yield to the Senator from Kansas?

Mr. ROBINSON. I yield.

Mr. CURTIS. I talked this matter over with Members of the House, and they desire the concurrent resolution passed in its present form, so their Committee on Appropriations may come back before New Year's Day and work on appropriation bills with the idea that as soon as the House meets on the 29th they will adjourn over just as long as they are permitted to adjourn under the Constitution. We are per-

fectly willing to do the same thing, and we had that idea in mind when we agreed in the committee to the concurrent resolution. I hope the Senator will not object, because I am satisfied no Senators except those interested in the legislation will want to work here during the holidays, and therefore they need not come back until the 2d of January.

Mr. ROBINSON. Of course, the committees of either House may meet without the House or Senate being in session. If it is the purpose of the Senator that an agreement is to be had, or if it is to be expected that no business will be transacted by the Senate, I shall make no objection to the concurrent resolution and shall not offer an amendment to it.

Mr. CURTIS. I will state to the Senator that it is my purpose when we meet on the 29th to ask for an adjournment after that day so long as we may adjourn under the Constitution. We might have to adjourn until the 31st. I have not looked up the dates, but when we meet on the 29th I expect to ask for an adjournment, and there will be an adjournment which will carry us to the 2d of January.

Mr. ROBINSON. With that statement of the Senator from Kansas in the Record and knowing that it will be carried out, there is no objection to the concurrent resolution.

Mr. CURTIS. It will be carried out so far as I can carry it out.

The PRESIDENT pro tempore. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

ISLE OF PINES TREATY

Mr. CURTIS. Mr. President, a parliamentary inquiry.

I find upon the calendar that there are two unanimous-consent agreements, one in regard to Muscle Shoals, which was entered into on June 4 last, which has been read a number of times and which there is no need to read again, and the other adopted June 3 in reference to the Isle of Pines treaty, reading as follows:

Ordered, by unanimous consent, that on Wednesday, December 10, 1924, immediately after the conclusion of the routine morning business, the Senate, as in open executive session, proceed to the consideration of the treaty with Cuba relating to the adjustment of the title to the Isle of Pines.

I wish to ask, if under Rule X, second paragraph, there being two special orders, the one in regard to the Isle of Pines treaty does not as a matter of fact follow the one in reference to Muscle Shoals?

Mr. UNDERWOOD. Mr. President, may I say just a word with reference to the inquiry? My late general pair and colleague, Senator Lodge, and I had an understanding, which I will state, but which of course did not bind the Senate. At the time of the adoption of the order in regard to Muscle Shoals the order relating to the Isle of Pines treaty had been adopted the day before. I stated at that time, and he concurred in the presence of the Senate, that there was no conflict between the two orders, because one was to be carried out in open legislative session and the other in executive session. The Senator from Kansas himself has moved several times, since the Muscle Shoals bill has been before the Senate, to go into executive session, and we have gone into executive session and attended to executive business without displacing the order in regard to Muscle Shoals.

I believe that the same situation prevails in regard to the Isle of Pines treaty as that in regard to the confirmation of appointments in executive session. I think it does not displace the Muscle Shoals measure at all to move to go into either closed or open executive session for the consideration of the treaty. I would suggest, however, if the Senators in charge of the treaty desire to go into executive session to move its consideration, that there would be no objection to that course of procedure, but I would ask that when that is done we shall come back into legislative session and dispose of the Muscle Shoals measure first before we go into any debate on the Isle of Pines treaty, if that is agreeable.

Mr. CURTIS. I think the Isle of Pines subject will be debated for some time, but first before we proceed to executive business I want the question settled whether we want an executive session at all. I think under the rules the Chair could decide that the Muscle Shoals measure has precedence and that the Isle of Pines treaty will follow immediately thereafter.

Mr. UNDERWOOD. I think that is true, but I have repeated the statement made by the late Senator Lodge at the time I asked for the order. I think it fair to state to the Senate what occurred at that time. I see no real conflict. So far as I am concerned I would be perfectly willing that

we should go into executive session, take up the treaty and lay it before the Senate in executive session, and then return to legislative session and finish the pending legislative business.

Mr. ROBINSON. Mr. President, I think the interpretation of the Senator from Alabama on the application of the rules to the two agreements is accurate and in every respect correct. I further think that in order to conform to the agreement the Senate should proceed to the consideration of the treaty in open executive session. I shall make no objection, then, to returning to legislative session. I believe both the agreements can be carried out, and ought to be carried out. I do not know how it could be held that a matter to be considered in open executive session on a certain day should, under the rules, automatically follow a legislative measure which may not be disposed of for 30 days.

Mr. CURTIS. Mr. President, I made that statement because of the peculiar wording of the unanimous-consent agreement in regard to Muscle Shoals, which was adopted after the unanimous-consent agreement had been entered into in regard to the Isle of Pines treaty. The Muscle Shoals unanimous-consent agreement provides:

That this order shall not be set aside except by unanimous consent.

I do not care what the Chair holds. I merely wish to get an understanding; that is all.

Mr. ROBINSON. Mr. President, I agree with what I understand to be the position of the Senator from Alabama, that it does not constitute in law a laying aside of the Muscle Shoals measure to proceed to the consideration of a matter in open executive session any more than it does to proceed to the consideration of a matter in closed executive session. If it would constitute a violation of the unanimous-consent order in reference to the Muscle Shoals bill to proceed to the consideration of a matter in open executive session, we have violated the order in reference to the Muscle Shoals measure almost every day since that matter has been under consideration, and without a single exception or objection having been made by a Senator. That shows that the Senate construes the order to mean that the Muscle Shoals measure shall be considered in legislative session to the exclusion of other matters, but that it does not preclude the Senate from proceeding to the consideration of subjects in executive session, either closed or open.

Mr. NORRIS. Mr. President, I do not desire that the Senate shall take any action which by any possibility may result in the displacement of the Muscle Shoals question for the consideration of any other subject. I believe that the unanimous-consent agreement entered into in regard to the Muscle Shoals bill precludes that. I believe that a point of order against the motion to take up the Isle of Pines treaty in open executive session or in closed executive session ought to be sustained, and, in order to get the question before the Senate, I intend to make that point of order, if such a motion shall be made.

I have no objection, Mr. President, if we can reach such an agreement, to going into open executive session to consider the Isle of Pines treaty, if it is understood that we shall simply take that treaty up and then resume the consideration of the Muscle Shoals legislation.

Mr. CURTIS. Mr. President—

Mr. NORRIS. Just one moment. Let me conclude my statement.

The fact that we have on several occasions gone into executive session, as the Senator from Arkansas [Mr. ROBINSON] has stated, without a single objection having been made, does not constitute a violation of the Muscle Shoals unanimous-consent agreement, because by unanimous consent we could do that, if no point of order was made against such a motion or if no objection were made. That question has not been presented to the Chair for a decision. If the unanimous-consent agreement shall be made and the Muscle Shoals bill shall not be laid aside, except by unanimous consent, it may be that the natural result would be to preclude, upon objection, our going into executive session. I certainly would object to going into executive session if I did not know that in such executive session nothing but ordinary routine business would come up and that the executive session would last but a few moments. I have no objection to doing that as to the Isle of Pines treaty. Of course, if I am wrong, and the Senate shall so hold, I shall feel that I have done my duty; but I do not believe that under the Muscle Shoals unanimous-consent agreement it is in order against objection to take up any other subject.

Mr. BORAH. Mr. President, the treaty as to the Isle of Pines has, in some form or other, been before the Senate for the last 20 years, and undoubtedly we ought to dispose of it. I am very anxious that it shall be disposed of, but I do not desire that we shall take up the Isle of Pines treaty and debate

it for an hour or two and then go back and consider the Muscle Shoals matter for a day or two. I am willing to proceed in such a way as that the Isle of Pines treaty shall be taken up immediately after the Muscle Shoals measure shall have been disposed of; in other words, I should like to take up the Isle of Pines treaty at a time when we can dispose of it. I do not desire that it shall be disposed of by piecemeal, for we have been trying to do that for 20 years.

Mr. SWANSON. Will the Senator from Idaho yield to me?

Mr. BORAH. Yes.

Mr. SWANSON. I suggest that we enter into a unanimous-consent agreement that following the disposition of the Muscle Shoals measure we shall proceed with and conclude the consideration of the Isle of Pines treaty.

Mr. BORAH. I will agree that immediately upon the disposition of the Muscle Shoals bill we shall take up the Isle of Pines treaty, just as we have agreed to do.

Mr. EDGE. Mr. President, will the Senator from Idaho yield to me?

The PRESIDENT pro tempore. Does the Senator from Idaho yield to the Senator from New Jersey?

Mr. BORAH. I yield.

Mr. EDGE. Mr. President, I wish to propound a further parliamentary inquiry, so that when the Chair answers the inquiry already presented he may include an opinion on the one I am about to suggest.

Presuming the suggestion of the Senator from Idaho is carried out—that the Isle of Pines treaty shall be taken up after the Muscle Shoals bill shall have been disposed of—my inquiry is this: The unanimous-consent agreement, as I read it, relating to the Isle of Pines treaty being quite different from the one relating to the Muscle Shoals bill in that it does not in any way provide that it shall not be laid aside until it is finally disposed of, I assume, if we enter into the unanimous-consent agreement to consider the Isle of Pines treaty following the disposal of the Muscle Shoals bill, that a motion to displace the Isle of Pines treaty would be received at any time. I make that inquiry of the Chair.

The PRESIDENT pro tempore. The Chair does not desire to answer more than one parliamentary inquiry at a time. The Senator from Kansas has presented a parliamentary inquiry to which the Chair will reply when Senators have finished the discussion; but the question now propounded presents an entirely different phase of the matter, to which the Chair has given no consideration.

Mr. EDGE. Well, Mr. President, following the ruling of the Chair on the parliamentary inquiry already propounded, then I will renew my inquiry as to the Chair's analysis of the second unanimous-consent agreement. So far as I can interpret it, it simply provides that the Isle of Pines treaty shall be brought before the Senate. I can not construe it to mean that a motion, a majority prevailing, to lay it aside and take up other business would not be in order.

Mr. SWANSON. Mr. President, if the Senator from New Jersey will permit me, the order in reference to the Isle of Pines provides for an executive session. The unanimous-consent agreement proposed by the Senator from Idaho would in effect merely provide that immediately after the conclusion of the Muscle Shoals bill now pending the Senate shall go into open executive session when the Isle of Pines treaty will be laid before the Senate in open executive session. That will make it the unfinished business in executive session until disposed of. It will be perfectly possible at any time to make a motion to resume legislative session, and it will be in order then for the Senate to consider any matter pending on the calendar of legislative business. The request of the Senator from Idaho is merely to make operative the order in regard to the Isle of Pines treaty at a time following the disposition of the Muscle Shoals bill instead of right now.

It seems to me if we want to dispose of the Muscle Shoals bill—and I presume that no Senator here wants that measure to be interfered with by any other legislation—that the unanimous consent requested by the Senator from Idaho that the order in reference to the Isle of Pines treaty be made operative immediately following the disposition of the Muscle Shoals bill should be granted. If that request is acceded to, the effect will be this: The moment the Muscle Shoals bill shall be disposed of the Presiding Officer will say, "The Senate is in open executive session, and the Isle of Pines treaty is laid before the Senate." It will then become the unfinished business in executive session, and one hour afterwards or immediately afterwards a motion could be made to resume the consideration of legislative business, and then we could take up the legislative calendar.

Mr. McCORMICK. Mr. President, will the Senator yield to me for a moment?

Mr. SWANSON. Certainly.

Mr. McCORMICK. If the view of the Senator from Virginia be sound, what becomes of the suggestion of the Senator from Idaho; that he does not want the Isle of Pines treaty to be considered piecemeal and to be determined in a piecemeal fashion.

Mr. SWANSON. When the Senate goes into executive session—whether in open executive session or secret session makes no difference—it is for the Senate to determine in executive session the disposition to be made of the Isle of Pines treaty. Senators can dispose of it when they please; they can keep it before the Senate until it is disposed of, or otherwise. The entire matter is left to the pleasure of the Senate in executive session as to what disposition shall be made of it.

Mr. BORAH. Mr. President, in order to bring this matter to some conclusion I ask unanimous consent that the operation of the second unanimous-consent agreement upon the calendar be made to take effect upon the disposal of the Muscle Shoals bill.

The PRESIDENT pro tempore. The Senator from Idaho asks unanimous consent that the previous unanimous-consent agreement entered into on the 3d day of June, 1924—

Mr. UNDERWOOD. That is the order relating to the Isle of Pines treaty, as I understand.

The PRESIDENT pro tempore. The Senator is correct—shall be modified so that the treaty relating to the Isle of Pines shall be laid before the Senate in open executive session upon the final disposition of Calendar No. 734. Is there objection?

Mr. WARREN. Mr. President, I wish to address a question to the Senator from Idaho before the Chair puts the question on the request for unanimous consent. If necessary, I will raise an objection at this point for the moment, until I shall have addressed myself to the Senator who has presented the request.

The PRESIDENT pro tempore. The Chair recognizes the Senator from Wyoming.

Mr. WARREN. Mr. President, of course, I have no objection, and can not have, to any unanimous-consent agreement which has been made, but I desire to ask that there shall be an exception as to appropriation bills in any new agreement which may be entered into.

Mr. BORAH. The request I have made would not interfere with the appropriation bills. It would simply result in laying the Isle of Pines treaty before the Senate in open executive session on the conclusion of the Muscle Shoals matter. The appropriation bills could come along notwithstanding that fact.

Mr. WARREN. Then I wish to say—

The PRESIDENT pro tempore. It may help the Senate to come to a conclusion about this question if the Chair states that he will rule in exact accordance with the unanimous-consent agreement asked for by the Senator from Idaho.

Mr. WARREN. Very well. I wish to say at this time that if I am on the floor I shall certainly object to any new agreement being entered into that does not except the consideration at any time of the appropriation bills. I do not believe that the peculiar situation—I call it "peculiar"—in regard to this particular question before the Senate will cut out the consideration of appropriation bills, but I take this opportunity of having an understanding with the Senator in charge of the matter.

Mr. EDGE. Mr. President, I should like to ask the Senator from Idaho if his understanding of the parliamentary situation, provided the unanimous consent is granted, is practically as stated by the Senator from Virginia, which is, in effect, that open executive session or closed executive session could be discontinued by a majority vote and the consideration of legislative business be resumed?

Mr. BORAH. Mr. President, my opinion on a question of parliamentary law is not worth very much—

Mr. EDGE. I have great regard for it.

Mr. BORAH. But in my judgment that would be true.

Mr. CURTIS. Mr. President, I hope the unanimous-consent agreement requested by the Senator from Idaho will be entered into by the Senate.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Idaho?

Mr. OVERMAN. Mr. President, I should like to have the proposed agreement read. I was called out of the Chamber when it was presented.

The PRESIDENT pro tempore. The Secretary will read the request for unanimous consent as now reduced to writing.

The reading clerk read as follows:

It is agreed by unanimous consent that immediately following the final disposition of H. R. 518, an act relating to the disposal of Muscle Shoals, etc., the Senate, as in open executive session, shall proceed to the consideration of the treaty with Cuba relating to the adjustment of the title to the Isle of Pines.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the former unanimous-consent agreement is modified accordingly.

GESTON P. HUNT

Mr. RALSTON. Mr. President, I ask unanimous consent that House bill 7052, Order of Business 825, be taken from the calendar and placed upon its passage. It is a bill authorizing and directing the Postmaster General to credit the account of one Geston P. Hunt, formerly postmaster at Rushville, Ind.—the home of the senior Senator from Indiana [Mr. WATSON]—with \$10,026.64 which was stolen from the post office while he was in charge thereof. The Committee on Claims has reported this bill without amendment. It seems to be a very meritorious bill, and I should like to have the Senate pass it.

The PRESIDENT pro tempore. The Senator from Indiana asks unanimous consent that the Senate proceed to the consideration of House bill 7052, being Order of Business No. 825. Is there objection?

Mr. UNDERWOOD. I understand that that will not displace the unfinished business?

The PRESIDENT pro tempore. It is the opinion of the Chair that it will not.

Mr. UNDERWOOD. I have no objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Postmaster General be, and he is hereby, authorized and directed to credit the account of Geston P. Hunt, formerly postmaster at Rushville, Ind., in the sum of \$10,026.64, due to the United States on account of postage stamps and war-tax revenue stamps which were lost as the result of burglary on March 9, 1921.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EXECUTIVE NOMINATIONS

Mr. McLEAN. Mr. President, as in executive session, I ask unanimous consent to report from the Committee on Banking and Currency, for the calendar, certain nominations.

The PRESIDENT pro tempore. The Senator from Connecticut asks unanimous consent, as in open executive session, to report certain nominations from the Committee on Banking and Currency. Is there objection? The Chair hears none, and the report will be received.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GEORGE:

A bill (S. 3623) for the relief of the Georgia Cotton Co.; to the Committee on Claims.

By Mr. WADSWORTH:

A bill (S. 3624) granting permission to D. F. Wilber, a consul general of the United States of America, to accept a decoration from the Government of Italy; to the Committee on Foreign Relations.

By Mr. ROBINSON:

A bill (S. 3625) granting a pension to Laura I. Robinson; to the Committee on Pensions.

By Mr. McNARY:

A bill (S. 3626) granting a pension to Elva E. Brooks; to the Committee on Pensions.

By Mr. HARRELD:

A bill (S. 3627) granting an increase of pension to Emeline Hinds; to the Committee on Pensions.

A bill (S. 3628) to provide for the construction of a military road at the United States cemetery at Fort Gibson, Okla., and providing appropriation therefor; to the Committee on Military Affairs.

By Mr. COPELAND:

A bill (S. 3629) for the relief of the New York Canal & Great Lakes Corporation, owners of the steamer *Monroe* and barge 209; to the Committee on Claims.

By Mr. REED of Pennsylvania:

A bill (S. 3630) authorizing the Secretary of War to convey to the Federal Land Bank, of Baltimore, certain land in the city of San Juan, P. R.; to the Committee on Military Affairs.

By Mr. DILL:

A bill (S. 3631) for the relief of Augustus Sipple; to the Committee on Military Affairs.

By Mr. FLETCHER:

A bill (S. 3632) to amend the Federal farm loan act and the agricultural credits act of 1923; to the Committee on Banking and Currency.

By Mr. MOSES:

A bill (S. 3633) to amend the printing act approved January 12, 1895, by discontinuing the printing of certain Government publications, and for other purposes; to the Committee on Printing.

By Mr. PEPPER:

A joint resolution (S. J. Res. 152) to accept the gift of Elizabeth Sprague Coolidge for the construction of an auditorium in connection with the Library of Congress, and to provide for the erection thereof; to the Committee on the Library.

AMENDMENTS TO MUSCLE SHOALS BILL

Mr. COPELAND submitted two amendments and Mr. HOWELL submitted four amendments intended to be proposed by them to House bill 518, the so-called Muscle Shoals bill, which were severally ordered to lie on the table and to be printed.

HOUSE BILL REFERRED

The bill (H. R. 10020) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1926, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1 at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

The PRESIDENT pro tempore. The question before the Senate is upon the amendment offered by the Senator from Tennessee [Mr. McKELLAR] to the substitute proposed by the Senator from Alabama [Mr. UNDERWOOD].

Mr. CURTIS. Mr. President, as the Senator from Tennessee is not present, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Fletcher	McCormick	Robinson
Bayard	Frazier	McKellar	Sheppard
Borah	George	McKinley	Shipstead
Brookhart	Gerry	McLean	Shortridge
Broussard	Glass	McNary	Simmons
Bruce	Gooding	Mayfield	Smith
Bursum	Greene	Means	Smoot
Butler	Hale	Metcalf	Spencer
Capper	Harreld	Moses	Stanfield
Caraway	Harris	Neely	Stanley
Copeland	Harrison	Norbeck	Sterling
Cousens	Heflin	Norris	Swanson
Cummins	Howell	Oddie	Trammell
Curtis	Johnson, Calif.	Overman	Underwood
Dial	Johnson, Minn.	Owen	Wadsworth
Dill	Jones, N. Mex.	Pepper	Walsh, Mass.
Edge	Jones, Wash.	Philips	Warren
Edwards	Kendrick	Pittman	Weller
Ernst	Keyes	Ralston	Willis
Fernald	King	Ransdell	
Ferris	Ladd	Reed, Mo.	
Fess	Lenroot	Reed, Pa.	

The PRESIDENT pro tempore. Eighty-five Senators have answered to the roll call. There is a quorum present. The question is upon agreeing to the amendment proposed by the Senator from Tennessee [Mr. McKELLAR] to the substitute proposed by the Senator from Alabama [Mr. UNDERWOOD].

The amendment to the substitute was rejected.

Mr. NORRIS. Mr. President, I am going to offer an amendment to the so-called Underwood substitute. I offer it for the purpose of clarifying what I believe to be the doubtful meaning of some of the language of that amendment. I ask Senators

now to give me their careful attention for a few moments while I lay before the Senate a matter which I think is of considerable importance.

It is generally understood, I think, by the Senate and by the country, that the substitute bill proposed by the Senator from Alabama provides for the compulsory manufacture of 40,000 tons of nitrates annually after the lapse of the preliminary period, regardless of whether the plant is leased under the provisions of that substitute or whether it is operated by the corporation set up by the substitute, and regardless of whether such nitrates, after being produced, must be sold at a loss or not sold at all. My amendment strikes out a few words in section 4 of the substitute. I wish Senators would get the substitute before them and mark the words that I want to strike out and then listen to me for a few moments on the question.

I want to say in the first place, Mr. President, that while I am very much opposed to the enactment into law of this substitute, if it is to be enacted I want to see the matter perfectly clear. Personally, I do not intend to vote for any amendment to it which in my judgment would make it worse than I think it is now, but I would vote for any amendment that I thought would improve it. I want to be frank with the Senate, and particularly with the Senator from Alabama, when I say that I do not believe any lessee of the Government getting this property, or the Government itself, ought to manufacture fertilizer at a loss.

I agree with all that Senators have said upon the importance of the fertilizer question. I am willing, if it can be done without a loss, to subject all of the power not only of Dams Nos. 2 and 3 but of every other dam that the committee bill provides shall be built on the Tennessee River to the manufacture of fertilizer. I am willing, moreover, to have money appropriated out of the Treasury to almost any extent for the purpose of experimenting, either through governmental officials or through private parties, if the Senate thinks that is best, for investigations with a view of improving and cheapening the manufacture of fertilizer. I am willing to accept any amendment to anything I propose which will fairly and honestly carry out that view.

The Senate and the country ought to know whether, if the Underwood substitute is enacted into law, it will require either the lessee or the Government to manufacture fertilizer at a loss. It may be that the Senate and the Congress will want to enact a law that will provide for that.

Personally I shall not vote for that; but if the Congress thinks that we are justified in doing that, of course I would cheerfully abide by the decision. I admit the importance of the subject; and while I am willing to go any length in any way that the majority of this body thinks best for the purpose of cheapening the cost of fertilizer, using public money for it, personally I am not convinced that we ought to manufacture fertilizer at a loss, unless we manufacture enough fertilizer at a loss to supply all the farmers of the United States and not just those in a small locality.

I think that the Underwood substitute is susceptible of great doubt. My motion is as follows: On page 3 of the substitute, in line 22, beginning after the word "defense," to strike out down to and including the word "so" in line 23, the language stricken out being "as far as it is practicable to do so"; and on page 4, in the same section, line 1, after the word "filler," to strike out the words "according to demand."

This substitute provides, and reference is made to it in other sections, that if a lease is made the lessee must carry out the provisions in sections 1, 2, 3, and 4 with reference to fertilizer. They are the only sections in the bill that provide for any guaranty of any kind as to the amount of fertilizer or nitrates that must be produced either by the lessee or by the Government.

Mr. HARRISON. Mr. President, will not the Senator state the amendment again or have it read at the Secretary's desk?

Mr. NORRIS. My amendment is to strike out, in lines 22 and 23, page 3, as follows: "as far as it is practicable to do so"; and on page 4, lines 1 and 2, to strike out the words "according to demand."

Let me take up sections 1, 2, 3, and 4. Senators will notice that later on in the bill where any reference is made to the amount of fertilizer that shall be produced the Government or the lessee, if the property is leased, shall agree to comply with sections 1, 2, 3, and 4 with regard to the manufacture of fertilizer. Let us see just what is in those sections.

If Senators will read section 1, they will find that it is a dedication of the entire plant, everything down there, to the

national defense and to the production of fertilizer. I have no objection to that. The committee bill, in different language, I think, has fully dedicated the plant to those purposes. There is nothing said there about the amount of nitrates or fertilizer that shall be produced.

Section 2 of the substitute provides that the Government can take the property over, if it is leased, or if this corporation has it, on five days' notice. There is nothing else in section 2. I have no objection to that. The committee bill has also provided that it can be taken over by the President not on five days' notice but on five minutes' notice. So there is no confusion so far, and so far we have not found anything in the bill about the amount of fertilizer that shall be produced.

Now we come to section 3. That is quite definite as to the amount of fertilizer that shall be produced, and I am going to read it. It is as follows:

In order that the United States may have at all times an adequate supply of nitrogen for the manufacture of powder and other explosives, whether said property is operated and controlled directly by the Government or its agents, lessees, or assigns, under any and all circumstances at least 10,000 tons the third year, 20,000 tons the fourth year, 30,000 tons the fifth year, and thereafter 40,000 tons of fixed nitrogen must be produced annually on and with said property, and no lease, transfer, or assignment of said property shall be legal or binding on the United States unless such adequate annual production of fixed nitrogen is guaranteed in such lease, transfer, or assignment.

I think that is definite. I think, unmodified, that would make it compulsory upon a lessee or this governmental corporation set up in the substitute to manufacture, after six years, 40,000 tons of nitrates every year. I want to be frank. I do not believe we ought to require that unless it can be done without a financial loss. Later in this debate I shall analyze the substitute more fully than I shall do now, because I am now going to confine my remarks to this one proposition. I do not believe we are justified in requiring a lessee or a governmental corporation to make 40,000 tons of fertilizer unless they can sell it without a loss. As I said before, we may do that. I think we will be wrong if we do it, but if we want to do that, let us do it with our eyes open. That has been what everybody, so far as I have heard, in and out of the Senate, thinks this substitute will require. If it can be done without a loss, it ought to be done, and I am for it. I do not believe it can be. The committee does not believe it can be.

Be that as it may, let us not have any misunderstanding. If section 3 stands without any modification by a subsequent section of the bill, that is what will be required. In my opinion, without any doubt. I do not believe any lawyer will contradict that. Any lawyer would say that either the Government or its lessee must make 40,000 tons of nitrate; loss or no loss, profit or no profit, it must make that much every year. If that is modified subsequently in the bill, then they would not be required to carry it out. In other words, we could say in section 3, "You must make 40,000 tons of nitrates every year," but we could say in another section, "You will not be required to make 40,000 tons as provided in section 3 unless you can do it without losing money on it," or "unless you can do it," putting in any other condition we want to put in.

As I look at it, section 4 is just that kind of a modification of section 3. Either we ought to let it be understood that that is what we mean or we ought to adopt the amendment which I have suggested and clear the subject of any doubt. Now, let me take up section 4 and see if it is not such a modification. It is as follows:

SEC. 4. Since the production and manufacture of commercial fertilizers is the largest consumer of fixed nitrogen in time of peace, and its manufacture, sale, and distribution to farmers and other users, at fair prices and without excessive profits, in large quantities throughout the country is only second in importance to the national defense in time of war, the production of fixed nitrogen as provided for in section 3 of this act shall be used, when not required for national defense—

Then comes the language I propose to strike out—
as far as it is practicable to do so—

And then follow the words—
in the manufacture of commercial fertilizers.

Suppose it could be demonstrated by a lessee, for instance, that it was not practicable to do so because it could not be done without a loss; would that be a defense? If we want to provide that that much shall be produced, whether at a loss or not, then we ought to strike that language out, it seems to me. If we do not want to compel the lessee, or this corporation, to do

it, loss or no loss, then we ought to say that in clear, unequivocal terms. Let me read on:

The United States, its agents or lessees or assigns, shall manufacture nitrogen and other commercial fertilizers, mixed or unmixed, and with or without filler, according to demand, on the property heretofore enumerated, or at such other plant or plants—

And so forth.

Then follows the same language that is found in section 3, so many tons the first, the second, the third year, and so on, and after the sixth year 40,000 tons.

Suppose that is enacted as it stands, and the lessee, or this governmental corporation, manufactures a lot of fertilizer, and they say, "Here is the fertilizer. We will sell it at \$40 a ton. We can not sell it at any less. It costs us \$40 a ton to make it." Assume, then, that in the commercial world manufacturers of fertilizers are selling fertilizer at \$38 a ton. Will there be any demand for the \$40-a-ton fertilizer? Are we going to compel them to sell the fertilizer at a loss? Can not the lessee say, in defense of his refusal to carry out that provision, "There is no demand for our fertilizer. At \$40 a ton nobody wants to buy it. We can not make it any cheaper." Therefore these words "upon demand" ought to be stricken out if we are going to compel them to do that.

I do not believe we ought to attempt to require an impossibility, because if we attempt to compel the lessee, for instance, if this is leased, to make the fertilizer at a loss, no one will become a lessee, knowing that unless he can get somewhere else a sufficient profit not only to recoup his loss but to make a profit on the whole transaction. That is not only natural, it is not only good business, but it is absolutely fair. You could not expect anybody to do anything else. The same thing could be said of this governmental corporation. You can not expect them, unless you are going to give them an opportunity to recoup their loss somewhere else, to do that; and if you do, what is the result? What follows? The amount of fertilizer that they make they will sell at a loss, and those who can buy it will get some benefit out of it. The taxpayers of the United States will make up the deficiency, either through the lack of what they would otherwise get out of the lease or the loss that they would suffer out of the sale of the power, or through a direct appropriation by Congress. You can not get away from that proposition.

If a lessee decides, "I can not get enough money out of the other provisions of the lease to make up my loss and get a profit," and he sells the product at a loss, who gets the fertilizer? Within a radius of a comparatively few miles of Muscle Shoals agriculturists will get the cheaper fertilizer. That will follow because the lessee will be selling at a loss; but agriculturists generally, farmers over the country generally, will pay their share of the taxes to make up that loss, and I submit, Senators, it seems to me that no one who wants to be fair in this matter can say, "We are going to make fertilizer for a few farmers in a certain locality where the use of Government instrumentalities will not make a profit either for a lessee or a Government corporation, but we will give them a profit in some other way to make up their loss at the expense of all the farmers of the United States except a favored few."

I do not believe the farmers in the vicinity want such a thing. It is illogical. In the end it brings no good to agriculture as a general proposition. It is in effect giving a subsidy to the few people who will be able to buy the limited amount of fertilizer, which, it is admitted, will not supply the country by any means, at the expense of the balance of the country.

Mr. JONES of New Mexico. Mr. President, will the Senator yield?

Mr. NORRIS. I yield to the Senator from New Mexico.

Mr. JONES of New Mexico. I am listening with a great deal of interest to what the Senator has to say and I think I agree with him in his discussion of the terms of the bill. The last thought presented by the Senator, however, I am inclined to think might be questioned.

Mr. NORRIS. To which thought does the Senator refer?

Mr. JONES of New Mexico. That the few users of this particular fertilizer would have a special benefit or that it would result in a practical subsidy for the benefit of a few users. It seems to me that would not necessarily follow, because the people handling the fertilizer would sell it at the cost of fertilizer generally throughout the country, the cost of transportation being considered, so that it seems to me that being able to supply local demands would simply result in the producer of the fertilizer getting perhaps more

than the producer of other fertilizer which would have to be shipped into the particular locality. Inasmuch as the amount to be supplied here is small compared with the total production, I can not quite understand how the user of it would get it any cheaper than it could be had in the general market.

Mr. NORRIS. I want to take this occasion to thank the Senator. I think his argument is sound, and yet I do not believe it completely refutes what I have said. If what he has said is sound, and I am inclined to think it is as a matter of business, it only adds to my argument. It makes it that much more overwhelming. It makes it that much more convincing. They will have to sell their fertilizer at a loss, however, if they can not make it as cheap at least as other people make it. That must follow or they will not sell it. They will sell it at just as small a loss as they possibly can. That is true. Just as the Senator said, they will reduce it to just as small an amount as will be necessary to make it sell on the market, which for them will be a loss and as to which even to the local farmer in the vicinity of Muscle Shoals there will not be any gain. The Senator's argument fits in very nicely, it seems to me, with the fundamental proposition that I have laid down.

Mr. WADSWORTH. Mr. President, will the Senator yield at this point?

Mr. NORRIS. Certainly.

Mr. WADSWORTH. I am not sure of my own recollection, but perhaps the Senator can remember the testimony before the committee in which a witness stated the percentage of fertilizer nationally needed which might be produced at Muscle Shoals?

Mr. NORRIS. There is a discrepancy as to how much is nationally needed. The fertilizer experts have convinced me that to begin with the amount of fertilizer used in the United States is not half what ought to be used.

Mr. WADSWORTH. Not anywhere near half; but that is theory.

Mr. NORRIS. The amount needed is different from the amount actually used.

Mr. WADSWORTH. What I meant was the actual national demand.

Mr. NORRIS. The demand, of course, is fixed a great deal by the price. I think the amount used, giving it from recollection and stating it in round figures, is somewhere in the neighborhood of 8,000,000 tons annually in the United States. There will be about one-third of that, in round numbers that could be produced at Muscle Shoals.

Mr. WADSWORTH. Eight million tons?

Mr. NORRIS. Eight million tons in the United States. One-third of 8,000,000 tons could be produced at Muscle Shoals if 40,000 tons of nitrate were converted into fertilizer.

Mr. WADSWORTH. Forty thousand tons of nitrate would only make 200,000 tons of fertilizer, which is nowhere near one-third of 8,000,000 tons.

Mr. UNDERWOOD. The Senator is wrong about that. Forty thousand tons of fixed nitrogen is equal to 250,000 tons of Chilean saltpeter, and that would equal 2,000,000 tons of 2-8-2, a low grade of fertilizer. That is the usual measure. I think the figures of the Senator from Nebraska were a little high on the amount of fertilizer used last year. I think it was slightly under 7,000,000 tons.

Mr. NORRIS. I have heard those figures a good many times. The Senator from Mississippi [Mr. HARRISON] gave them to the Senate the other day.

Mr. UNDERWOOD. I think the total fertilizer consumed in 1923, if I recollect right, was slightly under 7,000,000 tons.

Mr. NORRIS. Let me ask the Senator from Mississippi if he can give offhand the amount of fertilizer used in the United States last year?

Mr. HARRISON. No, I can not; but I have a chart in my desk that will show it.

Mr. NORRIS. I have it in various places and have heard it many times.

Mr. UNDERWOOD. It is not very material.

Mr. NORRIS. No; it is only comparatively material. It is conceded that they can not make fertilizer enough with 40,000 tons of nitrates to anywhere near half supply the demand for fertilizer in the United States. It is conceded also that a mixed fertilizer has as one of its greatest items of cost the freight that is necessarily charged, so that the manufacturer of fertilizer anywhere in any locality is circumscribed to a great extent by the freight that has to be paid by his customers.

Mr. CARAWAY. Mr. President, I wish to ask the Senator a question.

The PRESIDING OFFICER (Mr. DEAL in the chair). Does the Senator from Nebraska yield to the Senator from Arkansas?

Mr. NORRIS. I yield.

Mr. CARAWAY. Conceding that the amount which may be manufactured out of fixed nitrogen, as proposed in the bill, is wholly inadequate to supply the needs of the American farmer, yet would it not reduce the cost of the whole by the addition of that much more on the market?

Mr. NORRIS. That, again, as an abstract proposition is true, but, as I said, the question of freight enters into it to such a very great extent that the territory in any locality is circumscribed to a great extent on account of that item.

Mr. CARAWAY. But I was coming to this point: The Senator was opposing a governmental plant or agency being used to cheapen fertilizer. As I gathered from his statement, it was unfair to the people to have this investment used to compel the lessee to manufacture something and sell it at a loss because the taxpayer would have to make it up. I wonder if all our expenditures have not been made on the theory that what helps production helps everybody. We carry every year a large appropriation to aid agriculture because if there is an increased production the city man finds it on his table. He must eat and he must wear, and therefore he can not complain that some appropriation has been used to increase production, because he certainly gets his full share of the benefit by reason of that increased production.

If the Senator will pardon me just a moment further, I have been opposed ordinarily, and am opposed now, to the Government engaging in a business that can be as well or better done by an individual. I think it is unsound economically for the Government to tax the people to get capital to engage in business to compete with the men who paid the taxes. It seems to me to need no demonstration. But we have this plant on our hands and want to lease it for some purpose. I hope we will make the lease so attractive that some individual will engage in the operation of it. For what purpose could it be used that would less conflict with private industry and more nearly contribute to national wealth than to compel them to make fixed nitrogen that could be used in the manufacture of fertilizer?

Mr. NORRIS. As I said in the beginning, if the Government of the United States wants to go into the question and can not find any way of cheapening it, and we decide that the question is of sufficient importance that we are going governmentally to make fertilizer for the American farmer, then we must treat all the American farmers alike.

Mr. CARAWAY. May I ask the Senator another question?

Mr. NORRIS. Certainly.

Mr. CARAWAY. Is it not the fact that if A buys this particular brand of fertilizer and B buys another, it discriminates against B, because we realize that if it increases the volume and lessens the price, then every man shares alike? The Senator will know that I am not trying to be personal, but I remember that the Senator was the advocate of a measure to export wheat. It was not the expectation that every farmer would have his wheat exported, but that if we took away the surplus all the producers of wheat would profit by it and that there would be a general rise in price. On the same theory, if there is an increased output of the commodity called fertilizer, necessarily fertilizer would become cheaper and all would share in the reduction.

Mr. NORRIS. Let me call my friend's attention to what, to my mind, takes away his comparison or any effect from it. In the question of wheat there was a surplus. If we could take away the surplus, we would increase the price of wheat to the other producers. In the matter of fertilizer there is no question of any surplus, but we have not nearly enough. We have not anywhere near half the amount that ought to be used on the American farms. In my opinion, if it could be cheapened sufficiently there would be twice as much fertilizer used. It would be better for the consumer, as the Senator said, as well as the producer if we could cheapen it. The Senator does not quite state my wheat proposition in the bill I advocated, because it was not alone the surplus that I wanted to handle and that I provided in that bill should be handled, but it was the elimination of the profits that are accumulated and added to wheat and its products from the time it leaves the producer until it reaches the consumer, ordinarily known as the middleman's profit.

Mr. CARAWAY. I recognize that.

Mr. NORRIS. Here we are with the fertilizer proposition, where we do not want to increase the cost of fertilizer but we want to decrease it. Instead of getting rid of a surplus we would like to get one if we could.

Mr. CARAWAY. May I suggest to the Senator, if a surplus of wheat might break the price of wheat why will not a surplus amount of fertilizer break the price of fertilizer? That is the thing I am trying to say. The Senator said that if we leave the wheat in the country the surplus will pull down the price of wheat, and I think everybody concedes that. It is the last bushel that breaks the price. If a surplus of wheat will break the price of wheat, why will not an increased amount of fertilized tend to lessen the price of fertilizer?

Mr. NORRIS. As an abstract proposition I agree with the Senator entirely; but he must realize that if we made fertilizer at Muscle Shoals to the full capacity and got every pound that anybody says we could get there, it would not reduce the price of fertilizer in the State of Oregon, and I do not think it would reduce it in the State of Texas or in North Carolina or in Mississippi. I do not believe it would reduce it all over Alabama even, but it would reduce it in a certain locality if they sold it low enough. But we are so far from having enough that it would be like the Senator from New Mexico [Mr. JONES] said—they probably will not sell it one cent less than the commercial fertilizer, but will sell it for the same price and lose just as little as they can on the product.

Mr. CARAWAY. The best evidence that it would tend to lower the price is the hostility of what some people have been pleased to call the fertilizer trust. They apprehend that it is going to lessen their profits or else they would not oppose it. I am inclined to imagine that people who are engaged in the business have a more accurate knowledge of what the market will absorb without breaking than have I, and when I find those people who are engaged in exacting the last pound from the American farmer apprehensive that this is going to hurt their business I am inclined to imagine there must be something in it.

Mr. NORRIS. While the Senator's questions are very proper and all that, he gets away from what I said in the beginning was my real purpose; that is, to make plain what the bill is going to try to accomplish. Does the Senator believe if the Underwood bill shall be enacted that a lessee or a governmental corporation set up at Muscle Shoals could make fertilizer, unless some new and improved method be discovered, and sell it on the market without a loss in competition with the present fertilizer manufacturers?

Mr. CARAWAY. Let me answer the Senator's question in two ways. I think the Senator's amendment to clarify the language ought to be supported; there ought to be no difference of opinion about what an act of Congress means.

Mr. NORRIS. That is all I am trying to accomplish by my amendment.

Mr. CARAWAY. But I was trying to interrogate the Senator upon the theory which the Senator was just presenting. I wish first, however, to answer the Senator's question as to whether the lessee or corporation at Muscle Shoals could make fertilizer and sell it cheaper than the prevailing prices. I do not know. I have heard people who are authorities upon that question say that it could be done, and I have heard people, on the other hand, assert that it could not be done.

But the curious thing about it is that the people who assert that it can not be done are the very people who are opposing our doing it. They are the people who are engaged in the manufacture of fertilizer and putting it on the market. If it can not hurt their market why are they opposed to it? Therefore, I am inclined to imagine that the statement that fertilizer can not be put upon the market more cheaply than or as cheaply as they are putting it on the market now lacks convincing power.

Mr. NORRIS. I wish to say to the Senator that no man in the United States will be more delighted or happier than I if some one can produce fertilizer at a cheaper rate and make a profit.

Mr. CARAWAY. I concede that.

Mr. NORRIS. If I believed that that could be done, I would without any limitation require all this power, where it could be done to advantage and at a profit, to be used in the manufacture of fertilizer.

Mr. CARAWAY. Let me ask the Senator a question there.

Mr. NORRIS. The Senator may believe one way and I another; he may be right and I be wrong; but I am so well satisfied on the question that in my mind I have no doubt in reference to it. I realize, however, that men who are certain are sometimes mistaken when they are the most certain; and I do not set myself up as being that kind of an authority. I am no authority on the subject; I get my information from other people.

I have heard the statement made by some that fertilizer can be made at Muscle Shoals, with the knowledge that we now have, and sold at a less price than at present. If the Senate believes that, then it ought to have no hesitancy in striking out the words I have proposed to strike out.

Mr. CARAWAY. I think the Senate ought to strike the words out; but—and I wish to apologize to the Senator for taking up his time—I merely wish to suggest to him this additional idea.

I wish, in the first place, to acquit the Senator of any selfish motives. If the farmers have had an unselfish and constant friend upon the floor of the Senate it has been the Senator from Nebraska; no one questions that; but this is what I wish to suggest: Unless fertilizer can be manufactured and sold, we shall find no lessee for the plant, and we shall have a governmental corporation doing a thing for the benefit of all the people. If the Senator believes so ardently in the Government engaging in certain businesses in order to prevent monopolies, he ought to be willing to accept the Underwood bill, because, if he is correct that no private lessee can operate this plant and make a profit, then no private lessee would take it, and we will then have a governmentally controlled institution where all of the experiments which the Senator from South Carolina [Mr. SMITH] wants the Government to carry on can be conducted, and where all the theories as to the Government doing things better and cheaper than the private individual can be demonstrated in a fair field.

Mr. NORRIS. Mr. President, I do not want at this time to be led into a full analysis or discussion of the Underwood substitute. I wish to confine my remarks entirely to this one proposition, which to me seems to be so plain. Later on I am going to discuss the Underwood substitute at more length. As to this particular amendment, however, I am glad to have the approval of the Senator from Arkansas. It seems to me the amendment ought to have the approval of everybody.

Mr. CARAWAY. I think there ought to be no question about stating exactly what we are intending to do.

Mr. NORRIS. No; and that is all I am trying to do now.

Mr. CARAWAY. I see the certainty of a dispute arising. I do not think anybody is going to oppose the Senator's amendment. It ought to be accepted, because it makes everybody know exactly what will be the terms under the lease. There ought to be no opportunity for anybody to come back here and say, "We were misled by the language of the law."

Mr. NORRIS. Now, Mr. President, let me read the last modifying clause. Some of the other clauses ought to be stricken out so as to make the meaning perfectly clear. Reading from section 4, it provides:

The United States, its agents or lessees or assigns, shall manufacture nitrogen and other commercial fertilizers—

Suppose we strike out the words "mixed or unmixed." It continues:

according to demand, on the property—

And so forth. Can there be any doubt in anybody's mind that if they can not manufacture a fertilizer for which there is a demand they would be excused by any court on earth from making any fertilizer? Section 3, it is true, makes it positive; but section 4, from which I am reading, is the section designed to carry out the command of section 3, and it says, in effect, "You do not have to make it unless there is a demand for what you make; you do not have to make it except in so far as it is practicable to do so." Would a court say it was practicable if it could be shown that they could not make it without losing money? Would a court, in view of the words "according to demand," say that they would have to make it when there might be no demand for the fertilizer that they might make? Is not the price of fertilizer one of the factors that create the demand? If I made fertilizer that I could not sell for less than \$100 a ton I would not be able to sell it unless I sold it at a loss, and I could say at once, "There is no demand for this fertilizer," and any court, it seems to me—certainly I think I would so hold if I were the judge, and the case came before me—might well say, "Notwithstanding section 3, although that section 3 says you must do it, section 4 tells you how you must do it, and is the exception."

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Utah?

Mr. NORRIS. I yield.

Mr. KING. But the Senator must construe the section which he is now reading in connection with an anterior one.

Mr. NORRIS. That is section 3; that is what I am doing.

Mr. KING. That section compels the manufacture the first year of 10,000 tons of nitrogen and an increased number of tons each year. It seems to me that the last section to which the Senator has called attention is not a modification so far as the requirement to manufacture a given number of tons annually of nitrates is concerned.

Mr. NORRIS. If it is not a modification, what is it? If it is not a modification, then it is in exact contradiction of section 3, and there are two conflicting sections following each other. What I am trying to do by this amendment is to make it plain.

Mr. KING. If the Senator will pardon me, I do not think there would be any conflict, for the reason that the two sections may be differentiated. The first section requires the manufacture of nitrogen for explosive purposes, though the Government might not need it, whereas the latter section, which the Senator is now discussing, compels the manufacture of fertilizers. If we declare in one section that there must be manufactured a large tonnage of nitrogen annually, to be held in storage for the Government, that declaration is not in conflict with the subsequent provision.

Mr. NORRIS. Now, let me take the Senator's construction while it is fresh in the minds of Senators. Here is the construction of one of the leading lawyers of the United States on the floor of the Senate, who says, "Here is what it means: They would have to make nitrogen for explosive purposes provided for in section 3, but they would not have to make a pound of fertilizer provided for in section 4." That is what it means; that is the logical result of the Senator's construction. It is section 4 that says they shall make fertilizer, and that is what the farmer is interested in. You fellows who are backing up the Underwood substitute are trying to make the country believe that the farmer is going to get cheaper fertilizer, and here is one of the great lawyers who admits on the floor of the Senate that, while they would make nitrogen for explosive purposes, they could leave it piled up there, and would not have to make a pound of fertilizer unless they could make it at a profit; and I agree with him.

Mr. KING. Will the Senator yield further?

Mr. NORRIS. Yes.

Mr. KING. I do not want the Senator to class me with the "fellows," to use his expression—

Mr. NORRIS. I apologize for that.

Mr. KING. Who are supporting the Underwood bill, because I am opposed to it.

Mr. NORRIS. I apologize again to the Senator, but I will not apologize, particularly now, for what I have said about the Senator being a great lawyer. [Laughter.]

Mr. RALSTON. Mr. President—

Mr. HARRISON. I should like to ask the Senator from Nebraska a question, but the Senator from Indiana rose first.

Mr. NORRIS. I yield to the Senator from Indiana.

Mr. RALSTON. As I understand, the possibilities of power at Muscle Shoals far exceed the amount that will be required to make 40,000 tons of fixed nitrogen annually. That being true, I should like to ask the Senator what significance he attaches to this phrase in section 4, found in line 4, on page 4:

Using the most economic source of power available.

Mr. NORRIS. I will say to the Senator that personally I have no objection to that language, because I think it contemplates that there may be discovered a cheaper method of manufacturing fertilizer, which will require very little power, perhaps steam power or secondary power, or something of that kind. I have no objection to their using just as cheap power as they can get, no matter the source from which they get it, if they will make the fertilizer.

Mr. RALSTON. It will have no tendency, the Senator thinks, to limit the production of power?

Mr. NORRIS. They will, of course, want to use all the power they can in commercial enterprises and for sale; there is no doubt about that. I do not want to take that power away from them if it does not detract from the manufacture of fertilizer.

Now, I wish to say further to the Senator from Indiana that if they undertake to make nitrates at nitrate plant No. 2, which is in existence now and can be started up to-morrow, and which has a capacity of 40,000 tons annually, it will require practically all of the primary power of Dam No. 2, which in round numbers is about 100,000 horsepower. So if they use that power there will be nothing much left of the power from Dam No. 2 except secondary power.

When Dam No. 3 is completed a large amount of secondary power and about 40,000 primary power will be added to it. Some of the secondary power will be very valuable. If the

committee's bill should be enacted into law, it is our theory and belief that eventually more than half of the secondary power at Dams Nos. 2 and 3 can be converted into primary power; so that instead of having 100,000 primary power at Dam No. 2 we would perhaps in the end, when we develop the Tennessee River properly, have 500,000 primary horsepower. That is where the great profit would come in; that is where the great development should take place by the conversion of this vast amount of secondary power at Dam No. 2 into primary power, because we have at times at Dam No. 2 1,000,000 horsepower, all of which except about 100,000 horsepower is secondary. It can not be used all the year, and therefore some of the 1,000,000 horsepower is not very valuable. For only about 7 or 7½ per cent of the time is there 1,000,000 horsepower at that dam. In between 1,000,000 horsepower and the lesser amount, however, there is any amount of secondary power, some of which is good for 11 months in the year; and by the use of the auxiliary plant to help out, or the building of a storage dam farther up to help out, that can be converted at very little expense into primary power.

When the Senator from Arkansas was propounding his questions to me I forgot to refer to something else that he asked me about, and that was, in substance, that we could not get a lessee to take this property unless he could make a profit out of the manufacture of fertilizer.

I do not agree with that statement. I do not profess to say whether, if the Underwood bill is passed, there will be a lessee who will take the plant or not. I am not going to prophesy on that question, but I will say that a lessee might take that plant knowing that he was going to lose money on every pound of fertilizer that he made and that he would make it up upon the sale of power that would be his; and if I were going to bid, or any other business man were going to bid, I think this question would be presented:

"In the first place, I stand this chance: If somebody improves and cheapens the cost of fertilizer, I may make a profit out of that." If that is done, if it is cheapened—as in time I think it will be—we will get cheaper fertilizer. "But that is a gamble," he would say. "I will take it as it is now." He would figure out how much he was going to lose on it, and he would figure out how much he could make on the balance of the lease, consisting of water-power disposal, which would be profitable, everybody concedes; and if he could make enough on that to recoup his losses on the fertilizer and also make a profit in the end on the whole transaction, he would probably bid and become a lessee. I do not know how that is going to terminate. That would be the same as the governmental corporation which the substitute sets up.

I wish Senators would remember that what I am trying to do with this amendment is only to make clear what Congress wants to do. Let us say in so many words: "You will not have to make fertilizer unless you can make it at a profit," or let us make it certain that they will have to make fertilizer and that the governmental corporation will have to make fertilizer, whether it is made at a profit or at a loss. If these words are stricken out, then there can not be any doubt about what is meant.

Mr. McKELLAR. Mr. President—

The PRESIDING OFFICER (Mr. COPELAND in the chair). Does the Senator from Nebraska yield to the Senator from Tennessee?

Mr. NORRIS. I yield.

Mr. McKELLAR. The Senator's amendment is to strike out, on page 3, line 22, "as far as it is practicable to do so"?

Mr. NORRIS. Yes, sir.

Mr. McKELLAR. And on the next page, to strike out "according to demand"?

Mr. NORRIS. Yes, sir.

Mr. McKELLAR. Those are the two changes?

Mr. NORRIS. Yes, sir.

Mr. McKELLAR. And the Senator is of the opinion that while under section 3 the lessee would be required to manufacture the specified amount of nitrate for war purposes, under section 4 the lessee would not necessarily be required to manufacture it for the farmer?

Mr. NORRIS. That is the construction placed on it by the Senator from Utah [Mr. KING]. That was not my construction.

Mr. McKELLAR. The Senator wants to make it absolutely sure by striking out those words?

Mr. NORRIS. Yes, sir.

Mr. McKELLAR. I think that it ought to be equally fixed and determined that the lessee or the Government should

manufacture in times of peace the specified amount of nitrates for fertilizer purposes.

Mr. NORRIS. Regardless of cost?

Mr. McKELLAR. Regardless of cost.

Mr. NORRIS. Then the Senator will vote for this amendment.

Mr. McKELLAR. Therefore, I shall certainly vote for the Senator's amendment, because I think it is in that line. I think it would be a monstrous thing to utilize this plant or to lease this plant and not actually require the production of fertilizer. I believe the farmers of this country would rise up almost en masse and destroy everybody connected with it if it was not used for that purpose in time of peace.

Mr. NORRIS. Let me ask the Senator a question: Does the Senator think that the farmers of the country are demanding that fertilizer be made and sold to them at a loss?

Mr. McKELLAR. No; but I believe unquestionably that if it is required to be manufactured it can be manufactured at a profit and not at a loss.

Mr. NORRIS. I hope that may be the result. The Senator believes that. He may be right. From all my investigation—and I wanted to reach the other conclusion: I was just as anxious as the Senator was to reach the other conclusion—as far as I went with the facts and the evidence that came to us, I reached the opposite conclusion.

Mr. McKELLAR. I disagree with the Senator entirely as to that.

Mr. NORRIS. If the Senator believes that, and if that be true, nobody is hurt by striking out these words and compelling them to make 40,000 tons of nitrate annually. If they are going to make it at a profit, even if we put in language saying that they would not be required to make it unless they did make it at a profit, the Senator would not have any doubt but that they would have to make it, because he thinks it will be profitable anyway.

Mr. McKELLAR. Yes; I am in favor of forcing the lessee to make fertilizer for the farmer, and I have not any doubt in my own mind that it can be made at a profit. It is being done in other countries, especially in Europe, and I see no reason why it should not be done here.

Mr. REED of Missouri and Mr. RANSDELL addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Nebraska yield; and if so, to whom?

Mr. NORRIS. I yield first to the Senator from Missouri, who addressed the Chair first.

Mr. REED of Missouri. I desire to ask the Senator from Tennessee a question.

Mr. McKELLAR. The Senator from Nebraska has the floor.

Mr. NORRIS. I yield for that purpose.

Mr. REED of Missouri. The Senator states that he believes fertilizer can be made at a profit, and therefore he is in favor of forcing the making of it. Does the Senator know of anything that can be made at a profit where you have to force anybody to enter that business by a statute or by a contract?

Mr. McKELLAR. Oh, I did not mean it in the sense in which the Senator takes it. Here will be a prospective lessee coming forward to lease this property. It may be that he will not make any actual profit on his fertilizer business at all, but that he will make an enormous profit on the excess of power that he will have.

Mr. NORRIS. Let us just take that question, then. Where does he get that power? How is he enabled to have it?

Mr. McKELLAR. If the Senator will excuse me just a minute, when we are going into this proposition we ought to make the best deal we can for the people of this country; and confessedly the two prime objects of this legislation are, first, to have an adequate supply of nitrates in time of war, and, second, to add to our supply of nitrates in time of peace for fertilizer purposes.

Mr. NORRIS. I think the Senator's answer to the question almost demonstrates that the Senator himself does not believe that with the present knowledge of the fertilizer business it can be made at a profit at Muscle Shoals unless the method of making it is cheapened, because he says that even if the lessees lose money on the fertilizer business they can make it up out of the profits on the water power. If we want to do that, that means in effect that we are paying for the loss on the fertilizer out of the Treasury of the United States. It may become so important some time, if no improvement is ever made, that we will go that far. I am not willing to do it yet. In other words, the Senator says, "Here is another property owned by the Government. We will lease that to

you on such favorable terms that instead of taking the money out of the Treasury we will just let you take it out of this other property by a cheap lease to recoup your losses on the fertilizer proposition." Do the farmers of America want that? Then, as I said a while ago, when that is accomplished it means that the benefit of that reduction—in effect, a reduction made possible by a subsidy from the Treasury of the United States—is paid for by the other farmers who are not within reasonable distance of the place where this fertilizer is manufactured, because the freight rate on fertilizer, unless some new method of mixing it is discovered, will preclude the shipping of fertilizer from one factory for any very great distance to compete with fertilizer made at another locality. Then, third, as the Senator from New Mexico so logically reminded the Senate, this lessee when he is making this fertilizer will, of course, sell it for just as much as he can get for it. Nobody will blame him for doing that. He goes into it for profit, and all he will do will be to sell it low enough to put it on the market and make it sell; so that even the local farmer is not going to get very much benefit out of it, and the general farmer will get none and will have to contribute his share to make up the loss.

Mr. McKELLAR. Mr. President—

Mr. NORRIS. I yield.

Mr. McKELLAR. The Senator will recall that the bill provides that the lessee can not make more than 8 per cent profit.

Mr. NORRIS. Yes.

Mr. McKELLAR. And of course he would be limited in that way.

Mr. NORRIS. I want the Senator to get his statement correct—8 per cent profit on the fertilizer.

Mr. McKELLAR. Yes.

Mr. NORRIS. There is no limitation in the Underwood bill upon the amount of profit he can make on the water power.

Mr. McKELLAR. That is true. It is on the fertilizer.

Mr. NORRIS. I do not think he will make any profit, but I hope the cost will be reduced so that he can.

Mr. McKELLAR. I thought that was exactly what I said.

Mr. NORRIS. No. On the whole transaction he may make any kind of profit, because there is not any limitation in the bill except on the fertilizer that is manufactured.

Mr. McKELLAR. The limitation is, "not to exceed 8 per centum of the fair annual cost of the production" of the fertilizer.

Mr. NORRIS. Yes.

Mr. McKELLAR. Now I want to say this to the Senator, if he will pardon me just a moment: I have not determined how I am going to vote on this bill. There are many doubts in my mind both as to the Senator's bill and as to the substitute that has been proposed; but it does seem to me that we ought to be very careful to effectuate two results: First, the manufacture of nitrates in time of war; second, the manufacture of nitrates for farmers in times of peace. I am rather inclined to think that the Senator from Utah was exactly right a while ago when he said that under section 4 of the substitute the company could not be required to manufacture any nitrogen for fertilizer purposes unless there was a demand for it. I think that is a fair interpretation of this language.

Mr. NORRIS. Unless there was a demand at a price for which they could make it at a profit.

Mr. McKELLAR. Yes; because the words "as far as it is practicable to do so" would raise that whole question, and I am inclined to think the Senator is right. I think that should this property be turned over to a lessee he ought to be required to do it, because I believe that the lessee can make this fertilizer at a profit, or at least not at a loss.

On yesterday, as I recall, the Senator from Alabama, in discussing the question of compensation—which, as I understand, is the very small sum of 4 per cent on about \$45,000,000—said that one of the reasons why it was made small was because we were requiring the production of 40,000 tons of fixed nitrogen a year after the initial years had passed. There is where a consideration is being offered to a proposed lessee—a consideration in the way of a reduction of rent to the proposed lessee in order to secure the production of nitrogen year by year. If section 4 does not require that, then we certainly should raise the rental.

Mr. UNDERWOOD. Mr. President, I will say to the Senator from Tennessee, if my friend will allow me for a moment, that the Senator from Nebraska and I have already discussed this question, and I have already agreed that the annual production should be 40,000 tons; but I want to say to the Senator from Tennessee, who may not have heard me several days ago, that of course we are making a concession to the lessee in

cheap power to try to get him to make 40,000 tons of nitrate annually, and I believe he should be made to produce it; and when the Senator has finished, if the Senator will give me the opportunity to say so to him, I will give him the reasons why I think this clause applies.

I want to call the Senator's attention to one thing before we get away from it—the words "subject to demand" as used in this paragraph. This is, as I said the other day, a copy of the Ford proposal. Section 4 is the same language as that used in the Ford contract, and I put it bodily in the substitute, so I am not directly responsible for the language. It was accepted by those who were favorable to the manufacture of fertilizer. But "subject to demand" does not mean subject to demand of the market. If Senators will read it carefully, they will see that it means subject to the demand for that kind of fertilizer, 2-8-2, or some other kind that the market wants to absorb.

Mr. McKELLAR. It would clarify it very much if the Senator would accept the amendments offered by the Senator from Nebraska, and I hope the Senator from Alabama will do so.

Mr. UNDERWOOD. I will say to the Senator from Nebraska that when he gets through I want to answer him, because I do not want his statement concerning this substitute to go into the Record without reply; but I want to say to him, as I said the other day when this discussion was opened, that I am in favor of compelling the lessee of this property to make 40,000 tons of nitrogen, and the requisite amount of fertilizer to consume it, regardless of whether he makes a profit or not; and the Senator can not make my substitute too certain in that regard.

Mr. NORRIS. I thank the Senator for his very frank statement.

Mr. UNDERWOOD. I said that when I opened the discussion the other day.

Mr. NORRIS. I realize that, and I have no other object in view than to make it certain. I think these two clauses which I undertake to strike out are two loopholes which, if they were not stricken out, would permit the lessee or this governmental corporation to crawl out, and they would not have to make any fertilizer if they could demonstrate, which I think they would be able to do, that they could not make it except at a loss. I am glad to have the Senator's statement. It gets everybody straight on the record. We will vote on this proposition with a clear understanding, and I think that if the Senator means that he ought to accept my amendments,

Mr. UNDERWOOD. I may; but I want to tell the Senator first why his amendments are not necessary.

Mr. RANSDELL. Mr. President—

Mr. NORRIS. Before the Senator from Louisiana interrupts me, let me take up one question which the Senator from Alabama has raised.

First, he says that this language was taken bodily out of the Ford proposition. Of course I knew that, and I think we all knew it. That was one of the loopholes I always thought existed in the Ford proposal which would relieve him from the manufacture of the amount of nitrates stipulated, to wit, 40,000 tons; and if the Ford proposition had remained before us I would have gone into some detail and spoken at some length to discuss that legal proposition, because it is a legal proposition entirely.

I know that the best of lawyers disagree. I am glad, however, to have the approval of so eminent a legal authority as the Senator from Utah [Mr. KING] of my construction. I myself can not see any other way out of it. I want to read this clause again, since the Senator from Alabama has interrupted me. I shall leave out some of the modifying clauses, but first I will read it just as it is here:

The United States, its agents or lessees or assigns, shall manufacture nitrogen and other commercial fertilizers, mixed or unmixed, and with or without filler, according to demand.

I anticipated that some one would say that this phrase, "according to demand," means whether it shall be mixed or unmixed, whether it shall be with filler or without filler. They are just modifying clauses. The principal part of the clause is "shall manufacture"; and how shall they manufacture? Let us leave out the modifying clauses. They shall manufacture "nitrogen and other commercial fertilizers * * * according to demand."

It is true they have to manufacture the fertilizers mixed or they have to manufacture them unmixed, because the demand may come either way. A farmer or a dealer may come along and say, "I want unmixed fertilizer." Under this substitute as it stands now they would have to manufacture it unmixed. The next man who came along might say, "I want

my fertilizer mixed." They would have to manufacture it mixed, for that would be the demand. However, in the vicinity where the fertilizer is made the price may be \$38 a ton, let us say for illustration, and our lessee, or the governmental corporation, would have no \$38-a-ton fertilizer, and they would not have to make any, because there would be no demand for the \$40-a-ton fertilizer. The price is part of the thing that enters into the demand.

Even if that is all wrong, even if there is no loophole there, why be uncertain about it? Do not take my judgment about it. I do not profess to set myself up as the criterion. Take the judgment of the Senator from Utah [Mr. KING], who agrees with me in the construction of section 4. The Senator from Tennessee [Mr. McKELLAR] practically agrees with me, and the Senator from Arkansas [Mr. CARAWAY] agrees with me in that construction. If there is a reasonable doubt in any man's mind, let us make the matter clear.

We all may be wrong, and nobody may be right except a few fellows who say that has not anything to do with it. But we are entitled to our opinion. We hold it honestly. How do we know, when we get out and test this case in the courts, if the property is ever leased and the matter is tested, that there will not be some judge sitting on the bench who does not know any more than we do, who is not any wiser than is the Senator from Utah? The question may come before such a judge. Notwithstanding all your wisdom you would lose out. You are likely to run up against just such judges on the Federal bench. Some of them are very able; some of them perhaps are not so able. Those judges are going to pass on the question if it gets into court, as it probably will if we pass the substitute.

Let us shear it of all that doubt. Let us make it certain. The author of the Underwood amendment, the Senator from Alabama himself, says, "I am in favor of compelling the manufacture of this much nitrogen." Then let us do it. Let us not leave a loophole for them to crawl through. Let us make it certain that it has to be done, and pay the money out of water-power profits, or make an appropriation from the Treasury of the United States and pay the deficit, if there is one.

Mr. RANDELL. Mr. President—

The PRESIDING OFFICER (Mr. BAYARD in the chair). Does the Senator from Nebraska yield to the Senator from Louisiana?

Mr. NORRIS. I yield.

Mr. RANDELL. I want to say that I agree with the construction which the Senator from Nebraska places upon sections 3 and 4, if they are to be adopted, and I believe it is essential to have the two amendments to section 4 which he has suggested. But I did not intend to ask him about that.

In his discussion with the Senator from Arkansas [Mr. CARAWAY] and the Senator from Tennessee [Mr. McKELLAR], the Senator from Nebraska spoke about the possibility of recouping losses made in the manufacture of fertilizer by the sale of the power. We seem to have forgotten that very important feature of the bill. Many of us have not even discussed it. I know the Senator from Nebraska has not. I want to ask him now if there is anything in the Underwood substitute requiring the sale of the surplus power. I confess the only thing I see in the bill on that subject is in one of the closing sections.

Mr. NORRIS. Section 10.

Mr. RANDELL. That is right, it is in section 10, and this is the way it reads:

The surplus power not required under the terms of this act for the manufacture of nitrogen or fertilizer, when sold or used shall be subject to the laws, rules, and regulations relating to the sale and use of electric power in the several States in which said power is used.

The Senator, arguendo, at any rate, seemed to concede that the lessee, if there be one, would have to sell this power, and that he might be able to sell it at a pretty good profit, which would recoup him for losses perhaps incurred by him in the manufacture of fertilizer under the terms of sections 3 and 4. But I want to say very frankly to the Senator from Nebraska and to other Senators that one of the great objections I had to the Ford offer was that Mr. Ford would not sell any power, but would probably consume every ounce of it in great manufacturing plants.

One objection I have to the Underwood substitute, as I construe it, is that if we find a lessee under the terms of that measure, he may do exactly the same thing which some of us at least thought Mr. Ford would do—not sell that power to consumers throughout the surrounding States—but, so far as this substitute goes, would use it in his own manufacturing

establishment if he desired so to do. I wish to ask the Senator if there is anything in the substitute, so far as he understands it, that would prevent such use of the surplus power?

Mr. NORRIS. Mr. President, the Senator has read section 10, which provides for that. I would like to say to the Senator, however, as he came in after I started, that I offered this amendment, and I said quite a number of times that later on, before the substitute is voted on, I intend to more completely analyze in detail the substitute itself. But the object I had in mind this morning was only to make clear to the Senate just what those who favor the Underwood substitute wanted, and I offer these amendments with the view of at least getting an absolute clarification of what is meant in the manufacture of nitrogen or fertilizer provided in section 4.

Although I do not want to discuss the question, I will say in passing that I agree with the Senator that it should be required that this surplus power be distributed as the committee bill, I think, provides it shall be distributed, to as many consumers as possible, taking into consideration the amount of power and the various distances. I agree with the Senator fully, as he knows I do, because of the various discussions we have had in the Committee on Agriculture and Forestry, of which he is an honored member.

Mr. RANDELL. I wish merely to add that I have heard all the Senator's argument, and I understood that he intended to go into this more fully later. The only purpose of my question was to elucidate a portion of his argument which he probably overlooked, which seemed to concede that under the terms of this substitute it would be necessary to sell the surplus power. I do not consider it so at all. I hope I may hear the Senator's able discussion of it, and I hope I will be able to make some remarks myself, and if my voice permits I shall certainly do so. I am heartily in accord with the Senator's amendments to these two sections.

Mr. UNDERWOOD. Mr. President, I have made an argument on this subject several times. The language in section 4, as I have said, is taken from the Ford offer. I adopted that language because it was known throughout the country, and approved by the farmers of the United States as a satisfactory proposition to them for the manufacture of fertilizer, at least by that class of farmers who approved the Ford bill.

We have had a great deal of discussion here about things which it seems to me are perfectly clear from a business standpoint. I said the other day, when I made my first address on this subject, and I said it as clearly as it could be said, that I wanted this legislation to compel the production of 40,000 tons of nitrogen, after the period of time specified had elapsed—which is now six years, though I made it four originally—and the manufacture of fertilizer that would consume that much nitrogen. I have not a doubt, so far as the lessee is concerned, on that subject as the language stands.

I have no serious desire to oppose the amendment offered by the Senator. I realize that he does not offer the amendment to try to perfect my bill, but he wants to raise the question that we should not compel anybody to make fertilizer. I realize his purpose in offering the amendment.

Mr. NORRIS. Mr. President, may I interrupt the Senator there?

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Nebraska?

Mr. UNDERWOOD. Certainly.

Mr. NORRIS. The Senator has not quite correctly stated my purpose. I want to say very frankly to the Senator, as I tried before to make plain, that the object I have is to make clear to the Senate just what is intended. If the Senator himself said that he did not want it; for instance, if the Senator said, "I do not want to compel them to make fertilizer unless they can make it at a profit," I would withdraw my amendment. I am not trying to play with the Senator or his amendment.

Mr. UNDERWOOD. I know, but the Senator has said enough on the floor to justify me in saying that he is going to oppose the proposal because it might compel somebody to make nitrogen or fertilizer at a loss. There is the difference. The Senator is in favor of a power proposition. I do not criticize his bill from the standpoint of the development of great powers in that neighborhood. That is the Senator's objective. The fertilizer and nitrogen parts of his bill are merely experimental, and I think we agreed on that the other day. I am not for a power proposition. I am out for national defense and fertilizer. There is the critical line of difference between the bill proposed by the Senator from Nebraska and the substitute proposed by myself. It is a perfectly clearly drawn line between an effort to develop great power for the use of manufacturing plants to be sold in that

community, and the development of nitrogen for national defense in time of war and fertilizer in time of peace. We did not differ the other day, and we do not differ now; but I want to say without any long argument that the bill as it stands does require the manufacture of 40,000 tons of fertilizer, and I will tell the Senator why, even with the doubt he has thrown on the language which he read.

The Senator a moment ago said that section 3 required the production of 40,000 tons of nitrogen annually, and he did not doubt it.

Mr. NORRIS. Oh, no; I said section 3 was perfectly positive on that, and, standing alone, I had no doubt could require it if it were not modified by section 4.

Mr. UNDERWOOD. If the Senator will bear with me a moment, section 3 compels the lessee to make 40,000 tons of nitrogen. If he does not make it into fertilizer, what is he going to do with it? Is he going to throw it into the river? He can not go into refrigeration because that territory is occupied by a cheaper nitrogen, a nitrogen with which he can not compete, a nitrogen which comes from a by-product plant in the form of by-product ammonia. It is impossible for him to enter that field because that is a by-product and it will always undersell him.

I admit there is a small amount of nitrogen used for explosives and blasting powder in time of peace and some in experimental stations, but the amount is not 1 per cent of the production of this plant. When we compel the lessee to make 40,000 tons of nitrogen he has but one way to sell it, and that is to convert it into fertilizer to be sold to the farmer. There is no other market. He can either do that or throw it into the river.

Taking section 3 in connection with section 4, it is perfectly clear to my mind, and I think to any other man's mind, that section 4 does compel the lessee to make 40,000 tons of nitrogen every year whether he makes it at a loss or a profit. There is nothing unusual in that. Suppose I made a contract with a lessee to duplicate the Capitol for \$40,000,000. The lessee would not enter into the contract unless he thought he was going to make a profit. If he failed to make a profit the loss would be his. There is nothing unusual in that. We talk about this contract with the lessee as if there were something unusual involved.

Mr. CARAWAY. Mr. President, may I interrupt the Senator at that point?

Mr. UNDERWOOD. Certainly.

Mr. CARAWAY. In line 22, on page 3, the Senator has the words "as far as it is practicable to do so in the manufacture of commercial fertilizers."

Mr. UNDERWOOD. That is language that I lifted bodily out of the Ford offer and put in my amendment.

Mr. CARAWAY. And that was one of the very objections some of us had against the Ford offer—that he might not find it practicable to do so. It does not mean anything unless it is qualified, and therefore it ought to go out, ought it not?

Mr. UNDERWOOD. I think so, if there is any objection to it. I left it in because I wanted to put the Ford offer in my amendment and because I thought everybody would understand it. If there is any question about it, it does not affect it.

Mr. CARAWAY. If it does not give some grounds for doubt, there would be no use for it there. I imagine that it might be the thing upon which a controversy might be hinged after a while with some lessee.

Mr. UNDERWOOD. I have no serious objection to that language going out.

On the other question of the words the Senator from Nebraska wants to go out—"according to demand"—my interpretation of those words and the interpretation of everybody else that I have talked to has been according to the demand of the particular kind of fertilizer, but I admit the phrase does not mean much in there. I have no particular desire to retain it. If the Senator from Nebraska wants to go to the Senate on the issue that I have a substitute here that is going to make the lessee live up to his contract whether he makes money or not, I am perfectly willing to face the Senate and the country on that issue.

I want to say to the Senate, and we might as well understand it, that there are some Senators in the Chamber who are talking about fertilizer for the benefit of the farmer—I am not referring to the Senator from Nebraska in charge of the bill, even though I am looking at him—who say they want to help the farmer to get fertilizer in time of peace, and yet they are more desirous of getting a production of electrical power for the development of mills in their own local communities than they are of getting cheap fertilizer for the farmers of

the United States. That is all there is to the proposition. If we want fertilizer let us compel somebody to make it. If we want power, why not be as candid as is the Senator from Nebraska? He said that this can not be done, that this is not the time to do it, that he is willing to experiment, but he is not willing to go further than experimentation; that he believes in developing the power and selling it for the benefit of the industrial plants of America, especially in the South.

There are two angles to the situation. I admit that with this power there could be a great development of the mill interests in the States surrounding Alabama and in Alabama itself, but I say we are pledged first to national defense in the project, and next to a suitable production of fertilizer for the farmer. There is the line, and if we make a contract with the lessee I have written in the bill an offer to sell him some very cheap power if the Secretary of War agrees and does not raise the price. The terms of the bill would let him take over the plants practically without a lease, unless the Secretary of War raises the price when he comes to make a contract. Why do I suggest that? It is because I want to be sure that 40,000 tons of nitrogen are going to be made every year, and that in time of peace the 40,000 tons of nitrogen shall go into fertilizer, which, at 2-8-2, would mean 2,000,000 tons of fertilizer that would go to the farmers of America. There is the line drawn. If we go out and say that we are going to compel the lessee to sell his power to somebody and not at the best advantage, we may drive the lessee out of the market. The bill permits the lessee to use the surplus power as he thinks best. He is not compelled to sell it, because I am proposing to offer it to him as a bid to go in there and take his chance on making 40,000 tons of nitrogen and 2,000,000 tons of fertilizer for the American people.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. UNDERWOOD. I yield.

Mr. McKELLAR. Then, as I understand the Senator, he is offering a reduced rental as a consideration to the lessee to compensate him for any loss he might have on the nitrogen.

Mr. UNDERWOOD. Undoubtedly. Somebody suggested a while ago that perhaps the bill did not reflect into the cost of the fertilizer the cheapness of the power. I should be very glad to accept an amendment that would reflect the cheapness of the power into the cost of the fertilizer if my amendment does not already do it.

Mr. McKELLAR. I do not know that I catch just the point the Senator is making.

Mr. UNDERWOOD. I am not sure that it was the Senator from Tennessee who suggested that. In the debate here it was suggested, and I think the Senator himself suggested, that the lessee was compelled to sell the fertilizer at a profit of not more than 8 per cent. He said the cheapness of the power was not included in that estimate. I am not sure that my amendment does not include it, but I am perfectly willing to accept an amendment that will reflect it. In other words, my objective is powder to defend the Government in time of war, and cheap fertilizer, if we can get it, for the farmers of America in time of peace. Outside of that I am not going to tie the hands of the lessee and tell him how to sell the power. I want him to dispose of it in the most profitable manner he can and reflect that profit in the cost of the fertilizer.

Mr. KENDRICK. Mr. President—

Mr. UNDERWOOD. I yield to the Senator from Wyoming.

Mr. KENDRICK. The Senator will remember that in connection with this very question yesterday I called attention to the fact that the enormous investment of the Government under the measure was to be given to the lessee free of any cost of rental.

Mr. UNDERWOOD. No; not entirely free of cost.

Mr. KENDRICK. I mean to say the incidental properties.

Mr. UNDERWOOD. The nitrogen plant?

Mr. KENDRICK. Yes; the manufacturing plant.

Mr. UNDERWOOD. I will say to the Senator that so far as my amendment is concerned it would authorize that if the Secretary of War wants to do it. There is a minimum fixed, and he can raise it if he wants to do so.

Mr. KENDRICK. I want to ask the Senator if he does not believe in the interest of good business that there ought to be a provision in his substitute requiring the lessee to maintain the property.

Mr. UNDERWOOD. There is already in it a provision for maintenance.

Mr. McKELLAR. There is a provision for maintenance, but none for replacement, and it might cost the Government a great deal more than the amount of the rentals to replace the property, in addition to the maintenance. I have an amend-

ment which I hope the Senator will accept, which provides for replacement as well as maintenance.

Mr. UNDERWOOD. If the Senator from Tennessee will pardon me, I want to answer him later on replacement, but I do not want to be impolite to my friend from Wyoming, and I desire to answer him first.

Mr. KENDRICK. I agree with the Senator from Alabama that it is perhaps sufficient to require that the property be maintained, because if there is not some such provision in the bill it would be neglected in a most shameless manner or could be so neglected.

Mr. UNDERWOOD. My amendment provides for maintenance, but it does not provide for replacement, and I will tell the Senator why. I do not provide in the amendment that any particular method shall be used in the production of nitrogen. Of course, if the lessee takes the plant for 50 years, it is a foregone conclusion that before the 50 years shall have ended he will have to rebuild the plant, because it will wear out before that time. He may have to replace it more than once. When it is provided in the measure that the lessee has got to make 40,000 tons of nitrogen and a commensurate amount of fertilizer he will have to replace the plant or he can not make it. I put the burden of replacement on the lessee. Of course, so far as the present plants are concerned, maintenance will keep them in proper condition.

Mr. McKELLAR. Then, if the Senator thinks that the lessee has got to replace the plant, why not put it in the bill that he has got to replace it? I am like the Senator from Nebraska [Mr. NORRIS] in one respect; I like to have things specific, so that they can not possibly be misunderstood. I agree with the Senator from Alabama that unquestionably the existing machinery will have to be replaced. I have no doubt that the steam plant will have to be replaced, and perhaps replaced twice between now and the end of the 50 years. Then, if it is proposed that the company or the lessee shall replace it, let us so provide in the bill, in order that there may not be any doubt about it and that the lessee will not be coming to Congress to get money with which to replace it.

Mr. UNDERWOOD. I will say to the Senator that of course he must bear in mind what a great many gentlemen who have casually read the bill do not seem to understand; that is, that I propose to authorize the Secretary of War, with the approval of the President, to make the lease. If I provided nothing more than that, there would be no question that that would be the lease. All I am attempting to do in the authority which is given to the Secretary of War, with the approval of the President, is to fix certain conditions which must go into the lease. A may want to make one kind of a lease; B may want to make another kind of a lease; and I prefer to leave it to the discretion of the Secretary of War, provided that the lease calls for the production of 40,000 tons of nitrogen and a commensurate amount of fertilizer. I think we are more apt to get a lease if we leave a large discretion, outside of the cardinal points which we desire to attain, to the Secretary of War.

Mr. McKELLAR. Let us see about the lease and just what we propose. Only on yesterday there was an amendment offered by the Senator from Georgia [Mr. HARRIS] providing that the lease should not be transferred.

Mr. UNDERWOOD. Mr. President, the Senator from Nebraska [Mr. NORRIS] desires to leave the Chamber for a moment, and the request I desire to make will not take long. If the Senator from Tennessee will excuse me for a moment. The Senator from Nebraska desires to know what is going to be the disposition of two amendments. I do not think the amendments are material to the purpose I have in mind or to the bill, but I do not care to have any controversy about the matter. He suggested the amendments for the reasons he has stated. The Senator from Nebraska proposes first, on page 3, line 22, to strike out the words:

As far as it is practicable to do so.

I ask unanimous consent that those words may be stricken out.

The PRESIDING OFFICER. The Senator from Alabama asks unanimous consent that on page 3, line 22, the words "as far as it is practicable to do so" may be stricken out. Is there objection? The Chair hears none, and it is so ordered.

Mr. UNDERWOOD. Now, Mr. President, the Senator from Nebraska states that he has doubt about the insertion on page 4, line 1, of the words "according to demand." I do not think they help the bill any by being there, and it is immaterial to me whether they shall remain. I therefore ask unanimous consent that those words may also be stricken out.

The PRESIDING OFFICER. The Senator from Alabama asks unanimous consent that on page 4, line 1, the words "according to demand" be stricken out. Is there objection? The Chair hears none, and it is so ordered.

Mr. UNDERWOOD. Now, Mr. President—

Mr. NORRIS. Mr. President, before the Senator proceeds I desire to withdraw the motion which I have pending to strike out.

Mr. UNDERWOOD. The reason I asked unanimous consent that the words be stricken out was that I did not want to agree to that being done if any Senator objected to it without a vote. Now, there can be no question in any Senator's mind that if the lease be made the lessee must contract for the production of 40,000 tons of nitrogen and a commensurate amount of fertilizer, whether he makes a profit or whether he loses money.

Mr. McKELLAR. I think the bill has been very greatly improved in that regard, I will say to the Senator, but I wish to ask him a question about this proposed lease. The Senator has stated that the provisions of the lease should be left to the Secretary of War.

Mr. UNDERWOOD. I stated that some of those provisions should be left to him.

Mr. McKELLAR. Yes; that some of those provisions should be left to the Secretary of War. Just a day or two ago an amendment was offered by the Senator from Georgia [Mr. HARRIS] providing that before the lease should be assigned it should be submitted to the Secretary of War. I suppose there is hardly one Senator in this body who has not real estate which he leases out, and I presume there is no Senator in this body who would think of leasing his property to another person without having a provision in the lease that before the lease should be assigned the question of such assignment should be submitted either to him or to his agent for approval. Yet this body has gone on record as voting down a simple amendment, offered by the Senator from Georgia, which provided that before this lease should be assigned such assignment of the lease should have the approval of the Secretary of War or the President. I can not remember the exact wording of the amendment, but that was the substance of it.

It seems to me that some person or some concern might lease this property and, not being satisfied with the outcome, might turn it over to some wholly irresponsible company, and the Government would be powerless. I think it would be a great mistake to lodge in the Secretary of War the power to make the lease without instructions from Congress.

Mr. UNDERWOOD. Mr. President, of course the question to which the Senator from Tennessee has just referred was determined by the Senate on yesterday.

Mr. McKELLAR. I know that, but it may be reconsidered and ought again to be submitted to the Senate before the bill shall be passed.

Mr. UNDERWOOD. If it is brought up for redetermination I shall be glad to have it discussed then, but I do not agree with the Senator about the proposition, and I should like to finish my statement with regard to the matter which was brought up by the Senator from Nebraska [Mr. NORRIS].

Mr. HARRIS rose.

Mr. UNDERWOOD. I yield to the Senator from Georgia if he desires to interrupt me.

Mr. HARRIS. If the Senator from Alabama will be kind enough to allow me, I desire to say that when the bill comes into the Senate I shall again offer the same amendment.

Mr. UNDERWOOD. Mr. President, it may be asked, Why should we be so anxious to compel the production of 40,000 tons of nitrogen? The answer is that it is our only means of national defense so far as nitrogen is concerned. I wish to put in the Record some data which I have gathered very carefully in reference to the production of nitrogen in this country outside of the plant at Muscle Shoals, and I will take this occasion to do it.

The only real production in this country of nitrogen in any quantities outside of what may be produced by this plant comes from the by-products of coke; the balance comes from Chilean nitrates. In regard to this by-product, when coke is made from coal in a by-product coke oven, nitrogen gas is found in the gas which escapes from the oven. This nitrogen exists in combination with hydrogen gas, forming ammonia gas, which is the form in which it escapes from the oven. This ammonia gas is separated from the remainder of the coke-oven gases and is passed into sulphuric acid (a liquid); the reaction between the liquid sulphuric acid and the ammonia gas results in the formation of solid crystals, which are separated out and dried. The crystals are called ammonium sulphate (or sulphate

of ammonia). They contain about 25 per cent ammonia or a little less than 21 per cent of pure nitrogen.

In 1923 the American Fertilizer Hand Book reported a domestic production of sulphate of ammonia of 619,000 tons, but this includes other ammonia products which would have been sufficient to have made this amount of sulphate if they had been converted into sulphate, but they were not so converted. The United States Geological Survey also made an estimate of the sulphate of ammonia production which came from by-product coke ovens and they found that the amount actually produced as sulphate of ammonia was about 458,000 tons.

This amount of sulphate would contain about 95,300 tons of pure nitrogen.

Since the capacity of nitrate plant No. 2 is 40,000 tons of pure nitrogen—fixed in commercial form so as it can be used—this 40,000 tons represent about 42 per cent of the 95,300 tons of pure nitrogen that was fixed by the by-product coke ovens in the form of sulphate of ammonia.

Looked at in another way this 40,000 tons of pure nitrogen, if it had been fixed in the form of sulphate of ammonia, would have produced about 192,000 tons of sulphate of ammonia, and 192,000 tons is about 42 per cent of the actual production of 458,000 tons of sulphate of ammonia produced by the by-product coke ovens in 1923.

Commercial sulphate of ammonia in addition to carrying about 20.8 per cent of pure nitrogen also contains sulphuric acid and hydrogen, sulphur, and oxygen in chemical combination, in addition to which there is always a certain percentage of water. These chemicals are not commercial plant foods but instead are detrimental to the soil when applied year after year, as they cause the soil to become acid.

Sulphate of ammonia can not be regarded as one of the desirable highly concentrated fertilizer materials that the farmers wish to secure.

Mr. HOWELL. Mr. President—

Mr. UNDERWOOD. I will yield to the Senator in a moment. As I have said, a larger portion of this by-product ammonia is used in refrigeration and to conserve the food supply of America. In time of war it can not be recalled from refrigeration purposes, nor can it be recalled from refrigeration purposes in order to supply the farmer with fertilizer. So practically the larger proportion of this production of nitrogen is conserved to the food supply of the Nation, and we come back then practically to the proposition of basing our national defense either on the nitrogen we haul here from Chile or on our successful operation of this plant. As I said the other day, I am willing to vote to operate it at a loss, as I vote to operate a battleship at a loss, rather than lack national defense in the hour of trouble.

I now yield to the Senator from Nebraska.

Mr. HOWELL. Mr. President, is it not a fact that last year 100,000 tons of the sulphate of ammonia that was produced by by-product coke ovens was exported?

Mr. UNDERWOOD. No. There was an export of sulphate of ammonia. As to whether that sulphate of ammonia came from by-product sources or whether it was the product of the chemical industry and produced from Chilean nitrate I am not informed. It does not make any difference, though. It happened for that year that there was an overproduction of sulphate of ammonia that the farmers would not consume, and somebody shipped it out, but there was no indication in any record I have ever found that it was by-product ammonia. Some people have claimed that that was the case. I have seen the matter used in arguments, but I have never seen it attributed to that source, because by far the larger proportion of by-product ammonia goes to refrigeration, and it certainly is cheaper than Chilean saltpeter, because it is just as cheap as it has to be. It is a by-product, and the maker of it is going to sell it on the market for whatever the market is.

Mr. HOWELL. But the fact is that by-product coke ovens are increasing in number.

Mr. UNDERWOOD. No; I do not think so.

Mr. HOWELL. As a matter of fact they will continue to increase in number, because the gas plants that are using water gas in this country will be compelled ultimately to come to the production of gas with coke as a by-product, and that will mean the production of sulphate of ammonia. The export of sulphate of ammonia has been increasing from year to year. For the first eight months of this year it was about 100,000 tons. In other words, last year we exported 32,000 tons of fixed ammonia, because there was no market for it in this country in the form of sulphate of ammonia.

Mr. UNDERWOOD. It went over the Canadian border probably at a more successful venture, but it did not go to

Europe or any real foreign market. The Senator overlooks the fact that when you come down to making gas, gas originally was made from coke. Water gas was a later invention. There is a small increase in the gas supply; but practically every city of five or ten thousand people to-day has a gas supply already, and it is only the gradual growth of the inhabitants that will build up the supply of coke from gas, even if they should go back to the old method.

So far as the production of by-product coke is concerned, it is limited by the production of pig metal. There is no necessity for by-product coke if you are not going to make pig iron. Our maximum production in the war was 41,000,000 tons. I know what I am talking about in this matter, because it is nearer my business than any other business I have except attempting to be a Senator of the United States. There is a fairly good normal industrial market for pig to-day. It amounts to about 2,000,000 tons a month, or 24,000,000 tons a year. These old furnaces that came in during the war will never convert themselves into by-product coke ovens. There will be some increase, but a very little. Senators may try to fool themselves, but there is no question that if the line of communication between this country and Chile is ever severed, and we are not prepared to make nitrogen out of the air, we will surrender our flag in disgrace to the enemy. There is no question about that, and that is why I am willing to compel the lessee to manufacture. Of course, the lessee is not going to make the contract unless he thinks he can manufacture at a profit.

The Senator from Nebraska sings day in and day out that you can not profitably work one of these cyanamide plants, and yet there is a cyanamide plant of a similar nature in Canada. Its product is brought to New Jersey; it is there manufactured largely into commercial fertilizer and other products and sold at a profit, and the company operating there is paying dividends on its stock. I did not get that information second hand. I got it within the last two weeks from the president of the company operating the plant, and the same company built plant No. 2 at Muscle Shoals. So to say that we can not operate the plant at a profit is simply barring what is being done. If, however, we can not operate it at a profit for the purposes of national defense, I am prepared to operate it anyhow, and it would not cost any more than the operation of a battleship; and I think it is absurd to go on building a great Navy and maintaining an Army and then hesitate to supply sufficient nitrogen to give us a powder supply to fire our guns in time of war.

Mr. President, the amendment that brought on this discussion has already been attended to. I have a suggestion from the Chief of Engineers in regard to this bill. I have had some other suggestions coming from that quarter; and I wish to offer two amendments in regard to section 8, page 15, to comply with his suggestion. It is in reference to the completion of this work. He suggests that after the figure "3," on line 19, page 15, there should be added the words "and the necessary approaches to the locks in Dam No. 2." I offer that amendment.

Mr. McNARY. Mr. President, the chairman of the committee, who is most familiar with the provisions of the Norris bill and who also has made a thorough study of the bill of the Senator from Alabama, is temporarily absent from the Chamber. For that reason I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Bayard	George	McLean	Robinson
Borah	Gerry	McNary	Sheppard
Brookhart	Hale	Mayfield	Shipstead
Broussard	Harrell	Means	Shortridge
Bruce	Harris	Metcalf	Simmons
Butler	Harrison	Moses	Smith
Capper	Heflin	Neely	Smoot
Caraway	Howell	Norris	Spencer
Copeland	Johnson, Minn.	Oddie	Stanfield
Curtis	Jones, N. Mex.	Overman	Stanley
Dial	Jones, Wash.	Owen	Sterling
Dill	Kendrick	Pepper	Trammell
Edwards	Keyes	Phelps	Underwood
Fernald	King	Pittman	Wadsworth
Ferris	Ladd	Ralston	Walsh, Mass.
Fess	McCormick	Ransdell	Wills
Fletcher	McKellar	Reed, Mo.	
Frazier	McKinley	Reed, Pa.	

The PRESIDING OFFICER (Mr. COPELAND in the chair). Seventy Senators have answered to the roll call. A quorum is present.

Mr. UNDERWOOD. Mr. President, as I stated before the roll was called, and as I will state again, because Senators have come into the Chamber since I made the statement, this morning I received a suggestion from the Chief of Engineers in reference to the language in section 8, page 15, line 19. He

suggests that the words "and the necessary approaches to Dam No. 2" be added after the numeral 3 in line 19.

Those familiar with the project know that Dam No. 2 does not reach down to the river. It takes a lift of a great number of feet, and the Secretary of War says that he can complete this work with a very much smaller expenditure if he is authorized to go ahead with it now, when he has the machinery and the men on the ground. Therefore, he desires this authorization, at the same time that we are making the authorization for Dam No. 3, as provided in the substitute. So I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. UNDERWOOD. The Chief of Engineers also makes a further suggestion, at the end of the same paragraph, line 25, page 15, to add the words:

Provided further, That the funds for the prosecution of this work may be allotted from appropriations heretofore or hereafter made by Congress for the improvement, preservation, and maintenance of rivers and harbors.

I move the adoption of that amendment to the amendment.

Mr. WADSWORTH. May it be reported again?

The PRESIDING OFFICER. The Secretary will report the amendment to the amendment.

The READING CLERK. On page 15, line 25, after the word "navigation" and before the period, insert a colon and the following proviso:

Provided further, That the funds for the prosecution of this work may be allotted from appropriations heretofore or hereafter made by Congress for the improvement, preservation, and maintenance of rivers and harbors.

Mr. WADSWORTH. May I ask the Senator from Alabama whether the fund referred to in the amendment contemplates the fund for work at Muscle Shoals other than on the river?

Mr. UNDERWOOD. No; it means the prosecution of the work on the dam, and I will tell the Senator what the purpose of the suggestion is, as I understand it: If a river and harbor bill goes through providing for a particular project, it will provide for this additional work. If it goes through with a blanket appropriation, then there could be no allotment to this proposed work without this language in the law.

Mr. WADSWORTH. Would it not be well for the Congress to know in advance how much money was to be spent on Muscle Shoals out of a river and harbor appropriation?

Mr. UNDERWOOD. Yes; I think it would.

Mr. WADSWORTH. We would have no means of knowing if it were left to the board of engineers.

Mr. UNDERWOOD. As I understand the secondary work at Dam No. 1, we may call it—it is the approach to Dam No. 3—would cost \$1,600,000 if the engineer is allowed to go ahead with it and do it now. If he dismisses his force, he says it would probably cost him \$600,000 more.

Mr. WADSWORTH. There will be passed at this session of Congress a War Department appropriation bill. Contained in that bill will be the old river and harbor bill, appropriating a lump sum for construction and maintenance of approved projects. Instead of putting this provision in this proposed statute and making it permanent law, would it not be wiser, from the standpoint of the Congress itself, to amend the War Department appropriation bill in its river and harbor item, and provide in effect something like this: That not more or not less than a certain sum of this river and harbor appropriation may be expended for this Muscle Shoals work?

Mr. UNDERWOOD. In a blanket appropriation, of course, as the Senator knows, that is never done. It is left to the discretion of the Chief of Engineers as to how he will expend it. Of course, if it is not a blanket appropriation, then each item is designated. The only purpose of the suggestion is, as I understand it, that this work has to be done—

Mr. WADSWORTH. Oh, yes.

Mr. UNDERWOOD. There is no question about that.

Mr. WADSWORTH. I am not contending against the work being done.

Mr. UNDERWOOD. It has to be finished. Dam No. 2, as far as the dam itself is concerned, will be finished on the 1st day of July, approximately.

Mr. WADSWORTH. I understand that.

Mr. UNDERWOOD. The Chief of Engineers has his workmen, his machinery, and his tools right there. This approach is within a mile of the foot of the dam; it may be less. If he can convert that machinery and those men without moving them or dismissing them, right over to the other place, he says he

can complete the work \$600,000 cheaper than if he dismisses them and has to reorganize his force.

Mr. WADSWORTH. I understand that; but my proposal would not interfere with that scheme at all. My proposal is that the appropriations to be made in the future for the completion of the works at Muscle Shoals shall be made in the way they have been made in the past, in the War Department appropriation bill, with an item setting forth the purpose and the amount, so that in each instance, year after year, the Congress will know exactly how much is to be spent on Muscle Shoals. This will only be the first year when appropriations will be asked; they will be asked for many years to come. If this provision is inserted in the permanent statute respecting the entire disposition and management of Muscle Shoals, as I read it, then no Congress of the future will ever have submitted before it in legislative form an appropriation item for Muscle Shoals. It will be included in a lump-sum item for rivers and harbors work, in which, to my judgment, it does not properly belong.

Mr. UNDERWOOD. I will say to the Senator that that would not apply to Muscle Shoals generally, if the Senator means the work of carrying on the operation of the plant. It merely applies to finishing the construction.

Mr. WADSWORTH. I understand, but I can not understand why any different method for the future is now requested. The plan we have followed has worked perfectly in the past. We have carried this item of \$10,000,000 a year for the last three years, if I am correct; and the Senator from Nebraska can correct me if I am wrong. We have known just what we were doing. We have never hesitated to do the right thing, and I see no reason for changing the policy of legislating in the matter of appropriations for the project.

Mr. UNDERWOOD. This proposition was not initiated by me. It comes from the Government. I approve the suggestion of the Government or I would not have offered it. The purpose of the suggestion is this: That if there should be a failure of a river and harbor bill this year, which I hope there will not be, then out of the funds on hand the Chief of Engineers can finish these approaches, and he says \$600,000 cheaper than he can if this language is not in the law. Of course, if a river and harbor bill shall be passed between now and the 4th of March, I have no doubt, as the Senator suggests, that the matter will be taken care of. I would come to the Senator and ask him to have it taken care of.

Mr. WADSWORTH. As far as I am concerned, I would vote for it right away; but I would like to maintain a situation in which the Congress each year would know just what it was being asked to appropriate for the continuance of this project.

Mr. UNDERWOOD. I hope the Senator will let this go through, because I think it will save money in the happening of a contingency. I am not going to press it if the Senators here think it ought not to be pressed, because I realize that it should be considered otherwise; but here is a vast number of men and the machinery for making concrete. They are all in place, practically adjacent to this work, and if the river and harbor bill goes through, very well. Of course, Congress is going to make this appropriation. It has to finish this job. I understand it will probably cost \$1,600,000 if finished now, and \$600,000 more if the force is dismantled.

Mr. JONES of Washington. Mr. President—

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Washington?

Mr. UNDERWOOD. I yield.

Mr. JONES of Washington. I take it that this is an approved project.

Mr. UNDERWOOD. Oh, yes.

Mr. JONES of Washington. There is no doubt but that an appropriation will be made to carry on approved projects. That will come in the military appropriation bill. I understand the Budget has sent down an estimate of about fifty-odd million dollars. There will no doubt be some definite sum appropriated in the military appropriation bill. There is another bill, which may be termed a river and harbor bill, providing for the approval of new projects, but there is no doubt in my mind that an appropriation of some sum will be made to carry on existing projects. So I agree with the Senator from New York. I think this should be left out of the pending measure.

Mr. UNDERWOOD. As I said, the suggestion is not mine.

Mr. JONES of Washington. I appreciate that.

Mr. UNDERWOOD. It came to me from the Government, and if there is objection I will not press it. I withdraw the amendment to the amendment for the present.

Mr. NORRIS. Mr. President, I hope the Senator will permit the amendment to the amendment to remain before the Senate. I am not pressing for a vote on it, but we will not get through with the amendments to-day, and let Senators who think it should not be agreed to think about it until tomorrow. In the meantime, I would like to say to them that I understand that what the Senator from Alabama has offered is a proposition which in effect provides for the building of Dam No. 1.

Mr. UNDERWOOD. Yes.

Mr. NORRIS. Many Senators perhaps do not understand about the difference between these various dams, so that it might be well to make that matter plain. We have all been referring in this debate to Dam No. 2, which is now about completed, and Dam No. 3, which is included in both the substitute and the committee bill, and nothing much has been said about Dam No. 1. Many Senators have privately said, What is Dam No. 1? Dam No. 1 is a few miles below Dam No. 2. It is entirely and solely a navigation proposition. It cost about a million five hundred thousand dollars, as I understand it, and it is just below Dam No. 2.

Dam No. 2, to be finished on the 1st of July, will make the Tennessee River navigable clear up to Dam No. 3, with the exception of the shoals still found a few miles below Dam No. 2, where they propose to build this Dam No. 1, so that we will not be able as a matter of commerce to utilize the stream as a navigable stream above Dam No. 2, or any other dam above that, until we have built Dam No. 1. It has nothing to do with power. It is a very little thing. It is a dam to be constructed across the river right where the railroad bridge and the wagon bridge south of Florence cross the Tennessee River. It has only one lock in it. There are some shoals there, and it is for the purpose of making the Tennessee River navigable, and it would be perfectly useless to think of having navigation farther up the river unless we complete that dam.

It ought to be authorized, if it has not been authorized. If it is not an approved project, it ought to go into any bill that passes the Senate, it seems to me, because the Secretary of War has this force there. True, he could take them up to Dam No. 3, the bill providing for the construction of Dam No. 3. He could move them up and do that first, but he would be 10 or 12 miles farther from Dam No. 1 than he is now with his force, and while he has his men and machinery and material there it would be a matter of economy to build Dam No. 1, because the Tennessee River can never be navigable and we will never get the benefit of these two big dams we have provided for, in a navigation sense, unless we construct Dam No. 1.

Mr. FESS. Mr. President, I notice the language of the amendment is "from funds allotted heretofore or hereafter."

Mr. NORRIS. I think we have similar language in the committee bill.

Mr. FESS. Has not all the appropriation heretofore allotted been accounted for?

Mr. NORRIS. I do not know. I can not say whether it all has been accounted for or not.

Mr. UNDERWOOD. I myself do not know, but it is undoubtedly the correct language, because it was sent here from the office of the Chief of Engineers.

Mr. NORRIS. The Committee on Agriculture and Forestry put somewhat similar language in the committee bill. I do not know whether it is exactly the same, because I have not compared them, but whatever bill passes ought to have that language in. It is all right to put it in the substitute, because if that is passed it ought to go in.

Mr. FESS. As I recall, we always have difficulty with our appropriations for rivers and harbors. A river and harbor bill is one of the hardest-fought pieces of legislation.

Mr. NORRIS. We used to have.

Mr. FESS. We do yet.

Mr. NORRIS. Do we?

Mr. FESS. Yes; we do. What I can not understand is why the appropriation already made has not been allotted, and how we are going to use any of it for this work without taking it from a fund that is already applied to something else.

Mr. NORRIS. We can not do that, as I understand it. If the fund is already applied to something else, we can not allot it to this use. The thing ought to be settled and ought to be in legislation in some form at some time. I sympathize with what the Senator from New York said.

Mr. PITTMAN. Mr. President—

Mr. NORRIS. I yield to the Senator from Nevada.

Mr. PITTMAN. I simply want to ask the Senator if the prime purpose of all this work is to improve navigation?

Mr. NORRIS. Yes.

Mr. PITTMAN. It is really the excuse for all this work?

Mr. NORRIS. For the other work?

Mr. PITTMAN. Yes.

Mr. NORRIS. It may be the legal peg on which it is hung, but I do not think it is the excuse or the purpose. Navigation is one of the things involved in it.

Mr. PITTMAN. I was only thinking of the constitutional right of Congress to appropriate money.

Mr. NORRIS. It may be it is the only constitutional peg upon which we could hang the appropriation, but at least Dam No. 1 is purely a navigation proposition.

Mr. PITTMAN. Therefore I think it is absolutely necessary to have in the bill a provision for Dam No. 1.

Mr. NORRIS. I think so. We ought not to delay providing for Dam No. 1, because, so far as navigation is concerned, we can not utilize the water above No. 2 and No. 3 unless No. 1 is built. The point made is that while the Secretary of War has his force and his machinery, his cars, and his engines, power facilities and everything else there, he ought to do it now as a matter of economy.

Mr. JONES of Washington. Mr. President, what the Senator from Nebraska has said makes me feel more strongly that the item should not go in the pending bill, but should be in the general river and harbor appropriations, for it is clearly a river and harbor improvement. We appropriate definitely for river and harbor improvements a certain amount of money carried in the appropriation for the War Department for projects that have been approved. There is no reason in the world why the engineers of the War Department can not use part of the money for this purpose if it is desirable. I have no doubt that the War Department appropriation bill will become a law before the Muscle Shoals bill becomes a law and the money there appropriated will be available if the engineers think it ought to be used for the purpose.

It is not uncommon for some of the bureaus and departments of the Government to use different measures for accomplishing certain purposes they may desire. We have known in the past of instances where some branch of the Government came down to Congress to secure an appropriation and not getting it in one bill where it ought to go went to some other committee where another bill was being considered and got the item in that bill. The river and harbor appropriations are carried in a certain way and in a certain bill, and this being clearly a river and harbor item, I think it should be dealt with just the same as any other river and harbor item.

I appreciate the economy that would probably be served by having money available so as not to have to take away the workmen and machinery, and yet that same argument might apply to a great many projects throughout the country, where they do not have enough money to complete them. But there is no reason why the proposition can not be taken care of if it is necessary, because there is no doubt that we will appropriate a lump sum of money for carrying on river and harbor projects that have been approved and that bill will become a law before the 4th of March. There will be no limitation upon the use of the money by the engineers of the department, except that it shall be used upon approved projects, and if this project is so desirable, as I have no doubt it is, there is no question that part of that money can be used for the purpose.

Mr. UNDERWOOD. Mr. President, I want to have it understood that the last amendment to the amendment which I offered is withdrawn.

The PRESIDENT pro tempore. The amendment offered by the Senator from Alabama to the amendment in the nature of a substitute submitted by him has been withdrawn.

Mr. McKELLAR. Mr. President, I desire to call the attention of the Senate at this time to the proposal—

Mr. HARRISON. If there is nothing pending, will the Senator from Tennessee allow me to offer some amendments and he can then talk to the amendments?

Mr. McKELLAR. Very well.

Mr. HARRISON. I offer the amendments to the pending amendment which I send to the desk.

Mr. McKELLAR. I want to call the attention of Senators at this time to a proposal made on January 15, 1924—

Mr. NORRIS. Will the Senator permit the amendments to be read?

Mr. McKELLAR. An amendment to the amendment has been submitted by the Senator from Mississippi.

Mr. NORRIS. I know it, and I would like to hear it read. I have not heard it. May we have the amendment reported that has been offered by the Senator from Mississippi?

The PRESIDENT pro tempore. The clerk will report the amendments offered by the Senator from Mississippi to the amendment.

The principal legislative clerk proceeded to read Mr. HARRISON'S amendments to the amendment, which were:

On page 2 strike out lines 3 to 5, inclusive, and insert in lieu thereof "also Dams Nos. 2 and 3, located in the Tennessee River at Muscle Shoals, power plants, auxiliary steam plants, all hydroelectric and operating appurtenances."

On page 4, after line 14, transpose section 8 of the substitute.

On page 4, line 20, strike out "being," and insert in lieu thereof "shall be."

On page 4 strike out line 25, and through the period in line 8 on page 5, and insert in lieu thereof "The lessee shall pay as the annual rental for use of such properties an amount not less than 4 per cent of the total amount expended by the United States in acquisition, construction, and completion of Dams Nos. 2 and 3, and the purchase and emplacement of all machinery, gates, or other metal parts or material used in the construction of locks, dams, and power houses."

On page 5, line 10, strike out "said Dam No. 2 and" and insert in lieu thereof "Dams Nos. 2 and 3 and for."

On page 5, line 14, strike out "Dam No. 2" and insert in lieu thereof "as soon as practicable Dams Nos. 2 and 3."

On page 5, line 17, after "into," strike out through "lease," in line 18, and insert "and such property is turned over to the lessee in accordance with the terms of the lease, the lessee shall maintain such property."

On page 9, line 7, strike out "Dam No. 2" and insert in lieu thereof "Dams Nos. 2 and 3."

On page 9, line 8, strike out "plant" and insert in lieu thereof "plants."

On page 12, line 10, strike out all after the period through the period in line 14.

Before the reading was concluded,

Mr. McKELLAR. I am afraid the Senator from Nebraska is not listening to the reading of the amendment.

The PRESIDENT pro tempore. Will the Senator from Tennessee suspend for a moment until the reading of the amendments is completed?

Mr. McKELLAR. I am calling attention to the fact that the Senator from Nebraska wanted to have them read and is not listening.

Mr. NORRIS. I wanted to have them read because I wanted to find out what they were. When the clerk started to read it did not mean much, but I found out what they were by consultation, so I do not care whether the balance of the amendments are read. I know what they are.

Mr. McKELLAR. I ask unanimous consent that the further reading be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. McKELLAR. Mr. President, I want to call the attention of Senators to an offer made for the property by the Alabama Power Co. and others on January 15, 1924, that is so far superior to the offer proposed in the bill or that is to be found in the bill that there is no real comparison. The amount of rental offered and the conditions proposed are all so much more favorable to the Government that I think Senators ought to bear in mind in considering the bill this offer of the Alabama Power Co. and others. I am going to read it for the information of Senators. I want them to hear it, because it is a much better proposal than is incorporated in the bill.

Mr. NORRIS. In which bill?

Mr. McKELLAR. In the bill of the Senator from Alabama. I want it understood that I am not urging the acceptance of this offer. My purpose in reading it is to show that the offer of the Alabama Power Co., made last January for this property, when there was a competitor making an offer that was being seriously considered, was infinitely better for the American people, both as to the manufacture of fertilizer and in every other respect, than the offer which is proposed in the bill to lease the property. I read:

The SECRETARY OF WAR:

The undersigned submit the following proposal in connection with the Muscle Shoals projects of the Government:

1. For the purpose of carrying out this proposal, the undersigned, together with other companies engaged in serving the public with lighting and power in the Southeastern States, will form a corporation herein called the "power company," which will make all contracts necessary to carry out this proposal, and will provide \$10,000,000 of capital therefor, or such portion of that amount as upon the acceptance of this proposal may be determined to be necessary.

2. Upon the completion of Dam No. 2 and its power house, the power company will lease the same for a term of 50 years, under the terms of the Federal water power act—

All of which have been excluded by voting down amendments to the bill—

and will lease the Government steam plant at Sheffield, Ala., for a term of 20 years, and will agree to pay an annual rental therefor to the United States of \$2,000,000. This is interest at 4 per cent on \$50,000,000, which includes the \$45,500,000 of estimated expenditures on the hydroelectric project to the time of its completion with eight generating units of 240,000 horsepower total capacity and \$4,500,000 representing the value of the Government's steam plant at Muscle Shoals. Said sum of \$50,000,000 also includes the \$17,000,000 expended on the project during and just after the war. After the expiration of the lease on the steam plant, or if the steam plant should be sold to the power company as hereinafter provided, such annual rental shall be reduced by 4 per cent on \$4,500,000.

The lease with respect to the project at Dam No. 2 will include the hydroelectric and operating equipment and spillway gates, together with such lands and buildings owned or to be acquired by the United States in connection with the power project as may be desired by the power company, but will exclude the locks and other navigation facilities.

If they are excluded in the pending bill, they are excluded by implication because the bill carries the locks and navigation facilities as well.

The lease will begin from the date when hydroelectric structures and equipment (including the necessary high-tension substations) of the capacity of 100,000 horsepower are installed and made ready for service, additional equipment of approximately 140,000 horsepower to be installed by the United States and made ready for service by January 1, 1926. Work on the high-tension substation shall be commenced by the power company at its own expense as soon as this offer is accepted.

Such annual rental will be payable at the end of each calendar year, except that for the first years of the lease period the rental shall be as follows: Three hundred thousand dollars at the end of the calendar year during which 100,000 hydroelectric horsepower is installed and made ready for service, or the proportionate part thereof if such 100,000 horsepower is not made ready for service the whole of the first calendar year; and thereafter \$300,000 annually at the end of each year for six years; for the next four years \$1,500,000 annually, increasing in the following year to the maximum rental.

The power company will, if desired by the United States, install at its own expense additional units beyond the eight units now provided for to meet the market demands for power.

There is nothing like that in the pending bill.

If not installed by the power company, such additional units will be installed by the United States to meet market demands for power, and the annual rental will then be increased by 4 per cent on the cost of such additional units.

I ask Senators to listen to this. I especially ask the junior Senator from Nebraska [Mr. HOWELL], who has already referred to the matter, to see what the Alabama Power Co. proposes under section 3 of its offer.

3. The power company will, at its own expense, throughout the lease period, operate and make all necessary renewals and repairs incident to efficient maintenance of the spillway gates, the power house, and substructures, superstructures, machinery, and appliances appurtenant to the power house, and will maintain the same in efficient operating condition, all in accordance with the Federal water power act; it being understood that all necessary repairs and maintenances of Dam No. 2 and the locks shall be under the direction, care, and responsibility of the United States and at its expense during the said 50-year lease period.

How different from the proposal of the pending bill!

4. At all times during the period of the lease the power company will furnish to the United States, free of charge, the necessary power to operate the locks and other navigation facilities at Dam No. 2.

How different that is from the pending proposition, which perhaps will convey under its terms the locks and their facilities; while this proposal of the Alabama Power Co., made less than a year ago, provides that the company will, at its own expense, furnish the power to operate the locks and other navigation facilities.

5. The lease of the steam plant shall provide for successive renewals—

That is just what we were talking about to-day—

at the same rent at the option of the power company, each for 10 years, but to expire in any event upon the expiration of the lease of

No. 2 project, and it shall require the power company to make all renewals and replacements necessary to maintain the plant in good operating condition and for the insurance of the plant—

There is not a word about that in the pending proposal—up to its full insurable value. The power company shall have the right to install additional units and other equipment therein which the United States may recapture in accordance with the provisions of the Federal water power act.

6. The power company will begin the construction of Dam No. 3, its locks and power house, whenever requested by the United States after the completion of Dam No. 2 and will construct same at the expense of the United States and without profit to the power company, in the shortest possible time consistent with good workmanship and economy, in accordance with plans and specifications prepared by the power company and approved as provided by the Federal water power act. The power company will, for this purpose, be permitted to make use of the construction plant at Dam No. 2. The power house will have a total installation of 250,000 horsepower with equipment which includes the high-tension substation.

7. In case the United States so proceeds with such construction, the power company will lease from the United States under the terms of the Federal water power act for a period of 50 years the power house at Dam No. 3 and all of its hydroelectric and operating appurtenances, spillway gates, and high-tension substation, together with such lands and buildings owned or to be acquired by the United States in connection with the project as may be desired by the power company, but excluding the locks and other navigation facilities.

And they are not excluded in the pending bill.

Such lease shall begin from the date when structures and equipment of a capacity of 80,000 horsepower are installed and made ready for delivery of power to the power company, and the power company will pay to the United States as annual rental therefor 4 per cent of the actual cost up to a rental of \$1,200,000 per annum, payable annually at the end of each lease year, except that for the first years of the lease period the rentals shall be as follows: Two hundred thousand dollars at the end of the calendar year during which 80,000 horsepower is installed and made ready for service or the proportion thereof, if such 80,000 horsepower is not made ready for service the whole of the first calendar year; and \$200,000 annually at the end of each year for three years, increasing with the following year to the maximum rental. The Alabama Power Co., being the owner of the site of Dam No. 3 and of certain flowage lands acquired in connection with the project, agrees to donate the same to the United States—

The company, as the owner of the site of Dam No. 3, agrees to donate it free of charge to the United States—

In the event the project is constructed under this proposal for and at the expense of the United States. The power company will, if desired by the United States, install at its own expense all generating units when required to meet market demands for power.

8. If the United States so proceeds with such construction, the power company will, at its own expense throughout the lease period, operate and make all necessary renewals and repairs incident to efficient maintenance of the spillway gates, high-tension substation, the power house and substructures, superstructures, machinery, and appliances appurtenant to the power house, and will maintain the same in efficient operating condition, all in accordance with the Federal water power act, it being understood that all necessary repairs, maintenance, and operation of Dam No. 3 and the locks shall be under the direction, care, and responsibility of the United States and at its expense during the said 50-year lease period. If Dam No. 3 is constructed and operated under license from the Federal Power Commission as hereinafter provided, the provision of said act relating to repairs and maintenance and operation shall apply.

9. If the United States does not proceed with such construction on the plan proposed, then the power company may at any time build and operate said dam under the terms of the Federal water power act and shall be granted a license therefor on application, one-third of the cost of the project to be borne by the United States as the value of the navigation improvements in the Muscle Shoals section of the river.

And I call especial attention to these paragraphs:

10. At all times during the period of the lease the power company will furnish to the United States, free of charge, the necessary power to operate the locks and other navigation facilities at Dam No. 3.

11. The power company also agrees to purchase from the United States, at the option of the United States, to be exercised upon the execution of the contract to carry out this offer, the 60,000-kilowatt steam plant owned by it at Muscle Shoals in connection with nitrate plant No. 2, together with the necessary rights of way, lands, and housing facilities, and to pay therefor \$4,500,000 on terms satisfactory to the Government.

12. The projects covered by the licenses, including generating units and other additions made by the power company, shall be subject to recapture by the Government at any time during the license period or at the end of the period of 50 years under the terms of the Federal water power act.

13. Whenever the power company is directly benefited by the construction of a licensee of the United States or by the United States itself of a storage reservoir or other headwater improvement, the power company shall, in accordance with the Federal water power act, reimburse the owner of such reservoir or other improvement for such part of the annual charges for interest, maintenance, and depreciation thereon as the Federal Power Commission shall determine to be equitable; and whenever such reservoir or other improvement is constructed by the United States, the power company shall pay to the United States similar charges similarly determined.

14. The license shall provide that whenever the safety of the United States demands the United States shall have the right, in accordance with the Federal water power act, to take over and operate the projects covered by the licenses for the purpose of manufacturing nitrates, explosives, or munitions of war, or for any other purpose involving the safety of the United States, for such length of time as should appear to the President necessary for such purposes; and the United States shall also have the right to take over and operate said Sheffield steam plant in the same manner whenever the safety of the United States demands.

15. Upon the completion of No. 2 project the power company will furnish and deliver for 50 years, at any point within 5 miles of Dam No. 2, at such voltage as may be desired, and at actual cost to the power company, up to 60,000 horsepower, to be used solely in the manufacture of fertilizers.

Upon the completion of No. 3 project the power company will furnish and deliver for 50 years, at any point within 5 miles of Dam No. 2, at such voltage as may be desired and at actual cost to power company, 40,000 additional horsepower for use solely in fertilizer manufacture.

To the extent that the fertilizer company does not use power for such purpose the power may be used by the power companies in public-utility service.

I am sorry the senior Senator from Nebraska [Mr. Norris] is not now present in order that he might see how much better protected the Government and the people of the United States would be if this offer were accepted. I do not propose that it shall be accepted; I am merely reading it to show the vast difference between the proposed bill of the Senator from Alabama and the proposal made by the Alabama Power Co. just a year ago.

16. The power company also agrees to create and cause to be paid to the directors described below a fund of \$1,000,000, which, with the accretions mentioned below, shall be used in electrochemical research in the interest of agriculture and the national defense. The expenditure and administration of such fund, both principal and interest, shall be under the control of five directors, one of whom may be from time to time designated and removed by the Secretary of Agriculture, one by the Secretary of War, one by the Secretary of Commerce, one by any corporation engaged in the manufacture of fertilizers at Muscle Shoals under contract with the Government, and all not so designated may be from time to time designated and removed by the power company. The directors may increase their number from time to time to any multiple of 5, the additional directors to be appointed and to be removable in like manner as the original directors. Action of the directors shall be by majority vote.

The following language relates to the compensation and duties of the directors, which I need not read, but which I ask permission to have published in the Record.

The PRESIDENT pro tempore. In the absence of objection it will be so ordered.

The matter referred to is as follows:

The compensation of the respective directors shall be fixed from time to time by the joint action of the Secretary of Agriculture, the Secretary of War, and the Secretary of Commerce. The directors may employ such technical and other services as they shall deem desirable, and the course of investigations made with the use of said fund (which may include investigations made elsewhere than in the laboratories of said fund), the persons, bodies, and institutions to make such investigations (which may include any bureau or agency of the Government or of any State or any college, corporation, or scientific body), the disposition of any results obtained, in whole or in part, from the use of such fund, and the terms of such disposal shall be subject to the direction of said board of directors, and any royalties or other proceeds shall be added to and become a part of such fund.

Said directors shall make and publish annually reports of their proceedings and of the research and investigation made with the use of

the fund, and shall account annually to the agencies which appointed the directors for the receipts, disbursements, and financial commitments from said funds. Said directors may at any time vest said fund in a corporation which shall hold the same subject to the provisions hereof and the Congress of the United States may at any time direct that such fund or any portion thereof then remaining shall thereafter be devoted to any use not herein provided for.

Mr. McKELLAR. The proposal continues:

The \$1,000,000 mentioned above shall be paid to such fund in 10 annual installments, except that any subscriber thereto may at any time anticipate his subscription in whole or in part.

17. In addition to any other remedies that may be possessed by the United States, the power company agrees that the Attorney General may on request of the Federal Power Commission or of the Secretary of War institute proceedings as provided in the Federal water power act for the purpose of remedying or correcting by injunction, mandamus, or other process any act of commission or omission in violation of any of the terms of the contract or of any provisions of the Federal water power act applicable hereto or of any lawful regulation or order promulgated thereunder, and in case of the failure of the power company to comply with any final decree entered in any such proceeding the Attorney General may, on request of the Federal Power Commission or of the Secretary of War, institute proceedings as provided in said Federal water power act for the purpose of revoking any license issued thereunder.

Respectfully,

THE TENNESSEE ELECTRIC POWER CO.,
By C. M. CLARK, *Chairman*.
MEMPHIS POWER & LIGHT CO.,
By E. W. HILL, *Vice President*.
ALABAMA POWER CO.,
By THOS. W. MARTIN, *President*.

Mr. President, a short time after that offer was made, to wit, on January 24, 1924, an amended offer was made. It will be seen that the provision for the manufacture of fertilizer was not strong enough, and the power companies came back on the 24th of January with a proposition for the manufacture of fertilizer which it seems to me is just as strong as the one that we have in this bill. It is not long and I will read it.

THE SECRETARY OF WAR:

To provide for the manufacture of nitrogen and fertilizers at or near Muscle Shoals, Ala.—

Senators will notice that it says "at or near." In the proposal of the Senator from Alabama it is provided that it is to be manufactured there or near there—

and the sale and distribution thereof, the undersigned submit the following proposal:

These are the same people, now, who submitted the other proposal.

1. We agree to organize a corporation for such purposes with an initial capital of \$5,000,000 and the right to use one or more processes which have been commercially developed for the fixation of atmospheric nitrogen and for the manufacture of phosphoric acid.

2. The lessee under the proposal to the Secretary of War dated January 15, 1924, made by the Tennessee Electric Power Co., Memphis Power & Light Co., and Alabama Power Co. shall guarantee to the United States that the provisions of this proposal will be duly complied with, and shall contract for 50 years to deliver to the company on the lands mentioned below at cost the 100,000 horsepower of electrical energy for the manufacture of fertilizer provided for by said proposal of January 15, 1924, and on reasonable notice up to an additional 40,000 horsepower for similar use at rates and on terms prescribed by the Federal Power Commission.

It is supposed that 100,000 horsepower will be ample to make the 40,000 tons of fixed nitrogen, and here it is proposed to give it to the Government.

I continue the reading:

Upon receipt of any such notice the power company will be required to notify its customers of the amount of power thus required for fertilizer purposes, and such power shall thereupon be withdrawn from any service in which it at the time may be used and shall be made available for the fertilizer company. Said lessee may enter upon the plants and properties mentioned below for the purpose of carrying out the terms of this proposal in pursuance of said guaranty, and its obligations hereunder, including the provision of the capital mentioned above, shall be deemed expenses of its operation.

3. The United States shall lease to the company for 50 years all the property constituting nitrate plant No. 1, as officially known and designated, at a rental to be fixed by authority of Congress and included in the cost of the manufacture of fertilizers under this offer,

such lease to include the rights, licenses, and privileges to use any and all patents, processes, methods, and designs which have been acquired by the United States and may be transferred with said plant. The lessee company shall agree to maintain nitrate plant No. 2 in its present state of readiness so long as the Government may desire for immediate operation in the manufacture of materials necessary in time of war for the production of explosives, the expense thereof to be either included in the cost of the manufacture of fertilizer under this offer or deducted from the rent payable under said proposal of January 15, 1924, as may be determined under authority of Congress; this obligation to cease when said plant No. 2 is operated for or under authority of the Government. The lessee shall be entitled to make alterations in said plant No. 1 for the purpose of carrying out this proposal.

And I call especial attention to this:

4. The company shall construct and install on some of said lands the necessary plant and equipment to produce, and it will produce, annually fertilizers which contain 50,000 tons of fixed nitrogen—

Ten thousand tons more than is proposed in this bill—

as rapidly as there may be a commercial demand therefor at the price herein provided for; such fertilizers to be in the form of ammonium phosphate, ammonium sulphate, or other concentrated nitrogenous fertilizers. As soon as this proposal is accepted by the United States, the company will commence the construction of the first unit of the plant sufficient to produce annually fertilizers which contain at least 5,000 tons of nitrogen, and will complete and place the same in operation as soon as possible after the power for the operation thereof is available from Dam No. 2.

5. The company will agree to offer the products of said plant for sale to farmers and other actual consumers of fertilizer, including associations of such farmers and consumers, and will so fix the price thereof that the maximum net profit which it shall make in such manufacture and sale of fertilizer products shall not exceed 8 per cent of the fair, actual annual cost of production and sale thereof.

Just see what powers of supervision are given the Government, practically none of which are given in the pending bill:

6. The Secretary of Agriculture may from time to time prescribe regulations for distributing the products of said plant in accordance with this offer.

An amendment like that was voted down a day or two ago.

He may from time to time appoint and remove boards consisting of one or more representatives of his department, one or more farmers or representatives of farmers' associations, and a nominee of the company to supervise the enforcement of such regulations and to advise with the company from time to time as to the price to be charged farmers and other actual consumers and users of said products. The company may also, under authority and regulations prescribed by the Secretary of Agriculture, use part of said power in the manufacture of calcium arsenate or other insecticides for use by farmers and others.

I call attention to the difference between this and the proposal of the bill:

7. The corporation shall agree to file annually with the Secretary of Agriculture statements showing the cost and profits of the corporation from the operations under this offer, to permit the audit and verification of such statements by said official, and if during the year covered by any such statement the corporation shall have made profits in excess of those permitted by this offer, such excess profits shall be deducted from the cost of the produce sold during the calendar year in which such statement is settled.

8. The United States shall have the right, upon five days' notice, to take over and operate the company's plant hereunder, whenever necessary in the national defense, but in such case the United States shall reasonably compensate the company for the use thereof and shall protect the company from losses occasioned by such use (other than profits which the company might have made during such use), and shall return the property in as good condition as when received.

9. In addition to any other remedies that may be possessed by the United States, the company agrees that the Attorney General may on request of the Secretary of Agriculture institute proceedings as provided in the Federal water power act for the purpose of remedying or correcting by injunction, mandamus, or other process any act of commission or omission in violation of any of the terms of the contract resulting from the acceptance of this proposal or of the lease hereinbefore provided for, and in case of the failure of the company to comply with any final decree entered in any such proceeding, the Attorney General may, on request of the Secretary of Agriculture, institute proceedings as provided in said Federal water power act for the purpose of revoking said lease or this contract.

10. The undersigned may in discharge of their obligation hereunder organize a corporation with the right and capital provided for above, and cause it to contract with the United States to carry out the terms of this offer.

Respectfully,

THE TENNESSEE ELECTRIC POWER CO.,
By W. M. FLOOK, *President*,
THEODORE SWANN,
MEMPHIS POWER & LIGHT CO.,
By E. W. HILL, *Vice President*,
LOUIS C. JONES,
ALABAMA POWER CO.,
By THOS. W. MARTIN, *President*,
RAYMOND F. BACON.

Mr. President, I ask that for the convenience of Senators there may be printed in to-morrow's RECORD these two proposals of the Alabama Power Co. and others, and, in a parallel column, the proposal of the Senator from Alabama in regard to leasing this property, as contained in the first five sections of his bill ordered printed on December 8, 1924, so that Senators can see just exactly the differences that exist.

This offer never has been withdrawn. Of course, the Alabama Power Co. and those who are associated with it would be delighted, they would tumble over themselves to get the opportunity to accept a bill such as has been proposed by the Senator from Alabama; and at the same time they have before the Secretary of War an infinitely better offer for the American people and the Government of the United States, both in war and in peace.

It seems to me, Mr. President, that if we are going to pass a bill which in substance and effect turns over this great property to the Alabama Power Co. and its associates, it would be infinitely better for the Government that we represent and for the people that we represent, especially the farmers of the country, to pass a resolution here directing the Secretary of War to accept outright, just as it is, the offer of the Alabama Power Co. that has been made here. Why give it a better proposal than it makes to us? Why not accept that which is best for the people and for the Government? Why all this debate and delay when we already have a better proposal from the very company that no doubt will get this property if it is done?

Mr. President, as everybody knows, I was very much in favor of transferring this property to Henry Ford. I do not believe that the Government ought to be put in business if it is possible to avoid it. I believe that the Ford offer was infinitely better than the Alabama Power Co.'s offer. I regretted that Mr. Ford withdrew his offer. I think it was a great injury to our State and to our country when he did withdraw his offer; but he has withdrawn it. The question that arises in my mind is, what am I as a conscientious legislator to do about this proposal that will unquestionably turn over this plant to the Alabama Power Co. and its associates? I have nothing against that company or any other company; but when this great plant is turned over to any individual or any corporation I want to see two things guaranteed—a production of nitrates sufficient for our country in time of war, and a production of nitrates for farmers in time of peace—and then we should get the very best proposal possible. We should make the terms as good as it is possible for business men to make them.

I do not want to be hard on these people, but surely it is not necessary for us just to give this property away. How are we going to defend ourselves if we do that? Whether rightly or wrongly, I do not know—no man knows—the farmers of this country are expecting that when Congress takes action with reference to the power generated at Muscle Shoals they are going to be benefited in the way of cheaper fertilizer. How can we defend ourselves if we do not bring that about, especially those of us who are near the Shoals?

It is a burning question down our way. Because of the great publicity that has attended Muscle Shoals, almost every man, woman, and child in Tennessee is interested in what is done with it. It is a burning question there, and I have no doubt that it is in all the neighboring States. It is in every State that I have gone into. If we turn over this property under the terms of this bill to the Alabama Power Co. and its associates, and the farmers do not get cheaper fertilizer, what is going to happen to those of us who vote for it? That is a very serious question with me. Instead of passing this bill, I should say absolutely that it would be infinitely better for us to accept, just as it is, the offer of the Alabama Power Co.

Mr. HEFLIN. Mr. President—

The PRESIDING OFFICER (Mr. STERLING in the chair). Does the Senator from Tennessee yield to the Senator from Alabama?

Mr. McKELLAR. I yield.

Mr. HEFLIN. I want to ask my friend from Tennessee a question. Since my colleague [Mr. UNDERWOOD] has accepted the amendment suggested by the Senator from Nebraska [Mr. NORRIS], does not the Senator think that whatever company gets this property we will have the fertilizer manufactured as we intended it should be under the Ford offer?

Mr. McKELLAR. I hope that will be so; but I want to say this to the Senator in all frankness, and I say it without any malevolent spirit toward any person or organization or corporation in the world:

If the Secretary of War, under our authority, turns over this property to the Alabama Power Co. and its associates, and the price of fertilizer does not come down, and the price of electrical energy does not come down—and I do not believe it will come down—I conscientiously believe we will make a great mistake. Judging from the past performances of the Alabama Power Co., I do not believe that it has any real intention of reducing the rate on electrical energy. Perhaps I am not warranted in saying so, but I do not believe it intends eventually to reduce the price of fertilizer to the farmer. That is just my judgment. Of course, I am not a prophet; but after reading this proposal again I have no more doubt that if this bill passes the Alabama Power Co. is going to become the lessee of this property for 50 years under the terms of the bill than that I am standing here talking this afternoon.

We all know it. If the Alabama Power Co. is willing to take this property under the proposal it made last January, why would it not just fall over itself to take it under the delightful, easy, economic terms offered in this substitute?

Mr. HARRISON. Will the Senator yield?

Mr. McKELLAR. I yield.

Mr. HARRISON. The Senator says that the power company could get these rights at a smaller price under this substitute than under the prior proposal. Is the Senator familiar with the fact that the interest they would pay on the building of Dam No. 2 under the Alabama Power Co.'s second proposal, which was their last proposal, would amount to but 3½ per cent, and that under this substitute they would have to pay 4 per cent?

Mr. McKELLAR. It is 4 per cent under this. I have just read it.

Mr. HARRISON. If the Senator will permit me—

Mr. McKELLAR. I want to correct the Senator's mistake, because I have just read the proposals to the Senate, and in each one of them it proposes to rent the property at 4 per cent.

Mr. HARRISON. That is where the Senator is mistaken.

Mr. McKELLAR. I have just read it.

Mr. HARRISON. The Senator has not analyzed the first Alabama Power Co. bid. If he will figure it out he will find they offered to pay so much the first 3 years on No. 3, and then so much for the next 4 years, and then so much after that; and if he will figure the amount for 50 years, he will find that it comes to about 3½ per cent, not 4 per cent. If he will figure the amount the Alabama Power Co. offered in their last bid, which he has just read, he will find that it would figure 3½ per cent on Dam No. 3; and under the Underwood proposal they would be compelled to pay at least 4 per cent.

Mr. McKELLAR. Oh, no.

Mr. HARRISON. It is not less than 4 per cent.

Mr. McKELLAR. I call the attention of the Senator to what the Underwood proposal says. Let us get it correct.

Mr. HARRISON. The Underwood proposal does not include Dam No. 3, but the amendment which I have just offered does include Dam No. 3, and requires not less than 4 per cent.

Mr. McKELLAR. It is Dam No. 3 which the company offers to build without profit to itself for the United States Government, and it agrees to pay 4 per cent. The Senator's amendment is just in line with the bid of the Alabama Power Co.

As I have said, there is no animus of any kind in my position on this matter. I just feel this way, that this is the greatest asset in time of war, and I believe the greatest asset in time of peace, that this Government has, and we are asked just to barter it away for practically nothing.

If this substitute goes through without a provision for replacement—and the Alabama Power Co. offer to replace it—I have no doubt that in the next 50 years the United States Government will be called upon to replace enough of it to take up every dollar of the rental that is proposed to be paid, which is less than \$2,000,000. Why should we take the very best asset the Government has and turn it over to a private corporation on terms less than that corporation is willing to

pay, and in the end neither the Government nor the American people receive any real consideration for it?

I think the substitute of the Senator from Alabama has been slightly improved by the provision to force the company to manufacture 40,000 tons of fixed nitrogen a year. I think that is probably true. But I do not think it is any stronger put than this offer already made to the United States to manufacture 50,000 tons of nitrogen, and right now the Alabama Power Co. would be willing to go a great deal further in order to get this great power plant, the greatest power possibility in the country, perhaps, with the exception of Niagara Falls: a power plant which means the upbuilding or the lack of prosperity, perhaps, of a very large section of our country; a plant in which everyone in my State is interested and in which the people of Alabama and Georgia and Mississippi and the surrounding States and the farmers throughout the United States are interested. All I want is to get the very best possible terms from the lessee if we lease it.

I am opposed to municipal operation or governmental operation. I would dislike to see that plant go into the hands of the Government for operation, because I do not know what would happen to it. If we can make a proper contract with a lessee, not that he should get it for a song, I think I would prefer that it should go that way. I can not bring myself, with my rearing and education along political lines, to believe that governmental operation of the plant can be as successful as private operation; but, Senators, I would prefer that to our passing this substitute, which is virtually just giving the plant away to a corporation, and I do not know and you do not know whether it is an American owned and controlled corporation or an alien owned and controlled corporation. It is true that an amendment has been accepted by the splendid Senator from Alabama which gives the Congress the right to inquire into that question, but Senators know how those matters can be arranged. No doubt they figure that they will organize a new American corporation to take the plant over, but the actual ownership will be still abroad. We should not permit this. As much as I dislike Government operation I am almost tempted, Senators, to cast my vote in favor of governmental operation rather than virtually give this property away, and perhaps give it away to foreign interests.

I feel that way about it. I have no other interest to subserve than the interest of the people whom I represent, and all the people of this country. I think it will be a step which all of us in the future will regret if we turn the property over to any private corporation under the terms of the Underwood substitute.

I ask unanimous consent to have the two proposals of the Alabama Power Co. printed at the conclusion of my remarks in parallel columns with the proposal contained in the first five sections of the substitute offered by the Senator from Alabama, which is the only part of the substitute which refers to the matter.

There being no objection, the matter referred to was ordered to be printed in the Record, as follows:

FIRST FIVE SECTIONS OF SUBSTITUTE OFFERED BY MR. UNDERWOOD, AS MODIFIED

That the United States nitrate fixation plants Nos. 1 and 2, located respectively at Sheffield, Ala., and Muscle Shoals, Ala., together with all real estate and buildings used in connection therewith; all tools, machinery, equipment, accessories, and materials thereunto belonging; all laboratories and plants used as auxiliaries thereto, the Waco limestone quarry in Alabama, and any others used as auxiliaries of said nitrogen plants Nos. 1 and 2; also Dam No. 2 located in the Tennessee River at Muscle Shoals, its power house, its auxiliary steam plants, and all of its hydroelectric and operating appurtenances, together with all machines, lands, and buildings now owned or hereafter acquired in connection therewith, are hereby dedicated and set apart to be used for national defense in time of war and for the production of fertilizers and other useful products in time of peace.

OFFER OF THE TENNESSEE ELECTRIC POWER CO. OF JANUARY 15, 1924

THE TENNESSEE ELECTRIC POWER CO.,
Chattanooga, Tenn.,
January 15, 1924.

THE SECRETARY OF WAR:

The undersigned submit the following proposal in connection with the Muscle Shoals projects of the Government:

1. For the purpose of carrying out this proposal, the undersigned, together with other companies engaged in serving the public with lighting and power in the Southeastern States, will form a corporation herein called the "power company," which will make all contracts necessary to carry out this proposal, and will provide \$10,000,000 of capital therefor, or such portion of that amount as upon the acceptance of this proposal may be determined to be necessary.

2. Upon the completion of Dam No. 2 and its power house, the power company will lease the same for a term of 50 years, under the terms of the Federal water power

act. Whenever, in the national defense, the United States shall require all or any part of the operating facilities and properties or renewals and additions thereto, described and enumerated in the foregoing paragraph of this act, for the production of materials necessary in the manufacture of explosives or other war materials, then the United States shall have the immediate right, upon five days' notice to any person or persons, corporation or agent, in possession of, controlling or operating said property under any claim of title whatsoever, to take over and operate the same in whole or in part, together with the use of all patented processes which the United States may need in the operation of said property for national defense.

The foregoing clauses shall not be construed as modified, amended, or repealed by any of the subsequent sections or paragraphs of this act, or by indirection of any other act.

SEC. 3. In order that the United States may have at all times an adequate supply of nitrogen for the manufacture of powder and other explosives, whether said property is operated and controlled directly by the Government or its agents, lessees, or assigns, under any and all circumstances at least 10,000 tons the third year, 20,000 tons the fourth year, 30,000 tons the fifth year, and thereafter 40,000 tons of fixed nitrogen must be produced annually on and with said property, and no lease, transfer, or assignment of said property shall be legal or binding on the United States unless such adequate annual production of fixed nitrogen is guaranteed in such lease, transfer, or assignment.

SEC. 4. Since the production and manufacture of commercial fertilizers is the largest consumer of fixed nitrogen in time of peace, and its manufacture, sale, and distribution to farmers and other users, at fair prices and without excessive profits, in large quantities throughout the country is only second in importance to the national defense in time of war, the production of fixed nitrogen as provided for in section 3 of this act shall be used, when not required for national defense, in the manufacture of commercial fertilizers. The United States, its agents or lessees or assigns, shall manufacture nitrogen and other commercial fertilizers, mixed or unmixed, and with or without filler, on the property hereinbefore enumerated, or at such other plant or plants near thereto as it may construct, using the most economic source of power available, with an annual production of these fertilizers that shall have a nitrogen content of at least 10,000 tons the third year, 20,000 tons the fourth year, 30,000 tons the fifth year, and thereafter 40,000 tons of fixed nitrogen. In order that the farmers and other users may be supplied with fertilizers at fair prices

act, and will lease the Government steam plant at Sheffield, Ala., for a term of 20 years, and will agree to pay an annual rental therefor to the United States of \$2,000,000. This is interest at 4 per cent on \$50,000,000, which includes the \$45,500,000 of estimated expenditures on the hydroelectric project to the time of its completion with eight generating units of 240,000 horsepower total capacity and \$4,500,000 representing the value of the Government's steam plant at Muscle Shoals. Said sum of \$50,000,000 also includes the \$17,000,000 expended on the project during and just after the war. After the expiration of the lease on the steam plant, or if the steam plant should be sold to the power company as hereinafter provided, such annual rental shall be reduced by 4 per cent on \$4,500,000.

The lease with respect to the project at Dam No. 2 will include the hydroelectric and operating equipment and spillway gates, together with such lands and buildings owned or to be acquired by the United States in connection with the power project as may be desired by the power company, but will exclude the locks and other navigation facilities. The lease will begin from the date when hydroelectric structures and equipment (including the necessary high-tension substations) of the capacity of 100,000 horsepower are installed and made ready for service, additional equipment of approximately 140,000 horsepower to be installed by the United States and made ready for service by January 1, 1926. Work on the high-tension substation shall be commenced by the power company at its own expense as soon as this offer is accepted.

Such annual rental will be payable at the end of each calendar year, except that for the first years of the lease period the rental shall be as follows: Three hundred thousand dollars at the end of the calendar year during which 100,000 hydroelectric horsepower is installed and made ready for service, or the proportionate part thereof if such 100,000 horsepower is not made ready for service the whole of the first calendar year; and thereafter \$300,000 annually at the end of each year for six years; for the next four years \$1,500,000 annually, increasing in the following year to the maximum rental.

The power company will, if desired by the United States, install at its own expense additional units beyond the eight units now provided for to meet the market demands for power. If not installed by the power company, such additional units will be installed by the United States to meet market demands for power, and the annual rental will then be increased by 4 per cent on the cost of such additional units.

3. The power company will, at its own expense, throughout the lease period, operate and make all

and without excess profits, the United States, its agents, lessees or assigns, shall be limited to a maximum net profit which may be made not to exceed 8 per cent of the fair annual cost of the production thereof.

SEC. 5. That the Secretary of War, with the approval of the President, is hereby authorized and empowered to lease the properties enumerated under section 1 of this act, with proper guaranties for the performance of the terms of the lease, for a period not to exceed 50 years: "Provided, That said lease shall be made only to an American citizen, or citizens, or to an American owned, officered, and controlled corporation; and, if leased, in the event at any time the ownership in fact or the control of such corporation should directly or indirectly come into the hands of an alien or aliens, or into the hands of an alien owned or controlled corporation or organization, then said lease shall at once terminate and the properties be restored to the United States. The Attorney General of the United States is given full power and authority and it is hereby made his duty to proceed at once in the courts for cancellation of said lease in the event said properties are found to be alien owned or controlled and are not voluntarily restored." The lessee being required and obligated to carry out in the production of nitrogen and the manufacture and sale of commercial fertilizer the purposes and terms enumerated in sections 1, 2, 3, and 4 of this act, and such other terms not inconsistent therewith as may be agreed to in the lease contract. The lessee shall pay an annual rental for the use of said property an amount that shall not be less than 4 per cent on the total sum of money expended in the building and construction of Dam No. 2 at Muscle Shoals and the purchase and emplacement of all works and machinery built or installed in connection therewith for the production of hydroelectric power. The lease shall also provide the terms and conditions under which the lessee may sell and dispose of the surplus electric power created at said plants. The lease shall also provide for the protection of navigation at said Dam No. 2 and the operation of the locks connected therewith. The lease contemplated in this section shall be made with the understanding that the United States shall complete and have ready for operation Dam No. 2 and the locks connected therewith, together with the plants and machinery for the production of electric power, and that after the lease is entered into the lessee shall maintain the property covered by the lease in good repair and working condition for the term of the contract.

necessary renewals and repairs incident to efficient maintenance of the spillway gates, the power house and substructures, superstructures, machinery, and appliances appurtenant to the power house, and will maintain the same in efficient operating condition, all in accordance with the Federal water power act, it being understood that all necessary repairs and maintenances of Dam No. 2 and the locks shall be under the direction, care, and responsibility of the United States and at its expense during the said 50-year lease period.

4. At all times during the period of the lease the power company will furnish to the United States, free of charge, the necessary power to operate the locks and other navigation facilities at Dam No. 2.

5. The lease of the steam plant shall provide for successive renewals at the same rent at the option of the power company, each for 10 years, but to expire in any event upon the expiration of the lease of No. 2 project, and it shall require the power company to make all renewals and replacements necessary to maintain the plant in good operating condition and for the insurance of the plant up to its full insurable value. The power company shall have the right to install additional units and other equipment therein which the United States may recapture in accordance with the provisions of the Federal water power act.

6. The power company will begin the construction of Dam No. 3, its locks and power house, whenever requested by the United States after the completion of Dam No. 2, and will construct same at the expense of the United States and without profit to the power company, in the shortest possible time consistent with good workmanship and economy, in accordance with plans and specifications prepared by the power company and approved as provided by the Federal water power act. The power company will for this purpose be permitted to make use of the construction plant at Dam No. 2. The power house will have a total installation of 250,000 horsepower with equipment, which includes the high-tension substation.

7. In case the United States so proceeds with such construction, the power company will lease from the United States under the terms of the Federal water power act for a period of 50 years the power house at Dam No. 3 and all of its hydroelectric and operating appurtenances, spillway gates, and high-tension substation, together with such lands and buildings owned or to be acquired by the United States in connection with the project as may be desired by the power company, but excluding the locks and other navigation facilities. Such lease shall begin from the date when structures and equipment of a capacity of 80,000

horsepower are installed and made ready for delivery of power to the power company, and the power company will pay to the United States as annual rental therefor 4 per cent of the actual cost up to a rental of \$1,200,000 per annum, payable annually at the end of each lease year, except that for the first years of the lease period the rentals shall be as follows: Two hundred thousand dollars at the end of the calendar year during which 80,000 horsepower is installed and made ready for service or the proportion thereof, if such 80,000 horsepower is not made ready for service the whole of the first calendar year; and \$200,000 annually at the end of each year for three years, increasing with the following year to the maximum rental. The Alabama Power Co., being the owner of the site of Dam No. 3 and of certain flowage lands acquired in connection with the project, agrees to donate the same to the United States in the event the project is constructed under this proposal for and at the expense of the United States. The power company will, if desired by the United States, install at its own expense all generating units when required to meet market demands for power.

8. If the United States so proceeds with such construction, the power company will, at its own expense, throughout the lease period, operate and make all necessary renewals and repairs incident to efficient maintenance of the spillway gates, high-tension substation, the power house and substructures, superstructures, machinery, and appliances appurtenant to the power house, and will maintain the same in efficient operating condition, all in accordance with the Federal water power act, it being understood that all necessary repairs, maintenance, and operation of Dam No. 3 and the locks shall be under the direction, care, and responsibility of the United States and at its expense during the said 50-year lease period. If Dam No. 3 is constructed and operated under license from the Federal Power Commission, as hereinafter provided, the provision of said act relating to repairs and maintenance and operation shall apply.

9. If the United States does not proceed with such construction on the plan proposed, then the power company may at any time build and operate said dam under the terms of the Federal water power act, and shall be granted a license therefor on application; one-third of the cost of the project to be borne by the United States as the value of the navigation improvements in the Muscle Shoals section of the river.

10. At all times during the period of the lease the power company will furnish to the United States, free of charge, the necessary power to operate the locks and other navigation facilities at Dam No. 3.

11. The power company also agrees to purchase from the United States, at the option of the United States to be exercised upon the execution of the contract to carry out this offer, the 60,000 kilowatt steam plant owned by it at Muscle Shoals in connection with nitrate plant No. 2, together with the necessary rights of way, lands, and housing facilities, and to pay therefor \$4,500,000 on terms satisfactory to the Government.

12. The projects covered by the licenses, including generating units and other additions made by the power company, shall be subject to recapture by the Government at any time during the license period or at the end of the period of 50 years under the terms of the Federal water power act.

13. Whenever the power company is directly benefited by the construction of a licensee of the United States or by the United States itself of a storage reservoir or other headwater improvement, the power company shall, in accordance with the Federal water power act, reimburse the owner of such reservoir or other improvement for such part of the annual charges for interest, maintenance, and depreciation thereon as the Federal Power Commission shall determine to be equitable; and whenever such reservoir or other improvement is constructed by the United States, the power company shall pay to the United States similar charges similarly determined.

14. The license shall provide that whenever the safety of the United States demands the United States shall have the right, in accordance with the Federal water power act, to take over and operate the projects covered by the licenses for the purpose of manufacturing nitrates, explosives, or munitions of war, or for any other purpose involving the safety of the United States, for such length of time as should appear to the President necessary for such purposes; and the United States shall also have the right to take over and operate said Sheffield steam plant, in the same manner, whenever the safety of the United States demands.

15. Upon the completion of No. 2 project, the power company will furnish and deliver for 50 years at any point within 5 miles of Dam No. 2 at such voltage as may be desired and at actual cost to the power company up to 60,000 horsepower to be used solely in the manufacture of fertilizers.

Upon the completion of No. 3 project, the power company will furnish and deliver for 50 years at any point within 5 miles of Dam No. 2 at such voltage as may be desired and at actual cost to power company 40,000 additional horsepower for use solely in fertilizer manufacture.

To the extent that the fertilizer company does not use power for such purpose, the power may

be used by the power companies in public utility service.

16. The power company also agrees to create and cause to be paid to the directors described below a fund of \$1,000,000 which, with the accretions mentioned below, shall be used in electrochemical research in the interest of agriculture and the national defense. The expenditure and administration of such fund, both principal and interest, shall be under the control of five directors, one of whom may be from time to time designated and removed by the Secretary of Agriculture, one by the Secretary of War, one by the Secretary of Commerce, one by any corporation engaged in the manufacture of fertilizers at Muscle Shoals under contract with the Government, and all not so designated may be from time to time designated and removed by the power company. The directors may increase their number from time to time to any multiple of 5, the additional directors to be appointed and to be removable in like manner as the original directors. Action of the directors shall be by majority vote.

The compensation of the respective directors shall be fixed from time to time by the joint action of the Secretary of Agriculture, the Secretary of War, and the Secretary of Commerce. The directors may employ such technical and other services as they shall deem desirable, and the course of investigations made with the use of said fund (which may include investigations made elsewhere than in the laboratories of said fund), the persons, bodies, and institutions to make such investigations (which may include any bureau or agency of the Government or of any State or any college, corporation, or scientific body), the disposition of any results obtained, in whole or in part, from the use of such fund, and the terms of such disposal shall be subject to the direction of said board of directors, and any royalties or other proceeds shall be added to and become a part of such fund.

Said directors shall make and publish annually reports of their proceedings and of the research and investigation made with the use of the fund, and shall account annually to the agencies which appointed the directors for the receipts, disbursements, and financial commitments from said funds. Said directors may at any time vest said fund in a corporation which shall hold the same subject to the provisions hereof and the Congress of the United States may at any time direct that such fund or any portion thereof then remaining shall thereafter be devoted to any use not herein provided for.

The \$1,000,000 mentioned above shall be paid to such fund in 10 annual installments, except that

any subscriber thereto may at any time anticipate his subscription in whole or in part.

17. In addition to any other remedies that may be possessed by the United States, the power company agrees that the Attorney General may on request of the Federal Power Commission or of the Secretary of War institute proceedings as provided in the Federal water power act for the purpose of remedying or correcting by injunction, mandamus, or other process any act of commission or omission in violation of any of the terms of the contract or of any provisions of the Federal water power act applicable hereto or of any lawful regulation or order promulgated thereunder, and in case of the failure of the power company to comply with any final decree entered in any such proceeding the Attorney General may, on request of the Federal Power Commission or of the Secretary of War, institute proceedings as provided in said Federal water power act for the purpose of revoking any license issued thereunder.

Respectfully,

ADDITIONAL OFFER BY THE TENNESSEE ELECTRIC POWER CO. OF JANUARY 24, 1924

THE TENNESSEE

ELECTRIC POWER CO.,

Chattanooga, Tenn.,

January 24, 1924.

THE SECRETARY OF WAR:

To provide for the manufacture of nitrogen and fertilizers at or near Muscle Shoals, Ala., and the sale and distribution thereof, the undersigned submit the following proposal:

1. We agree to organize a corporation for such purposes with an initial capital of \$5,000,000 and the right to use one or more processes which have been commercially developed for the fixation of atmospheric nitrogen and for the manufacture of phosphoric acid.

2. The lessee under the proposal to the Secretary of War dated January 15, 1924, made by the Tennessee Electric Power Co., Memphis Power & Light Co., and Alabama Power Co. shall guarantee to the United States that the provisions of this proposal will be duly complied with, and shall contract for 50 years to deliver to the company on the lands mentioned below at cost the 100,000 horsepower of electrical energy for the manufacture of fertilizer provided for by said proposal of January 15, 1924, and on reasonable notice up to an additional 40,000 horsepower for similar use at rates and on terms prescribed by the Federal Power Commission. Upon receipt of any such notice the power company will be required to

notify its customers of the amount of power thus required for fertilizer purposes, and such power shall thereupon be withdrawn from any service in which it at the time may be used and shall be made available for the fertilizer company. Said lessee may enter upon the plants and properties mentioned below for the purpose of carrying out the terms of this proposal in pursuance of said guaranty and its obligations hereunder, including the provision of the capital mentioned above, shall be deemed expenses of its operation.

3. The United States shall lease to the company for 50 years all the property constituting nitrate plant No. 1, as officially known and designated, at a rental to be fixed by authority of Congress and included in the cost of the manufacture of fertilizers under this offer, such lease to include the rights, licenses, and privileges to use any and all patents, processes, methods, and designs which have been acquired by the United States and may be transferred with said plant. The lessee company shall agree to maintain nitrate plant No. 2 in its present state of readiness so long as the Government may desire for immediate operation in the manufacture of materials necessary in time of war for the production of explosives, the expense thereof to be either included in the cost of the manufacture of fertilizer under this offer or deducted from the rent payable under said proposal of January 15, 1924, as may be determined under authority of Congress; this obligation to cease when said plant No. 2 is operated for or under authority of the Government. The lessee shall be entitled to make alterations in said plant No. 1 for the purpose of carrying out this proposal.

4. The company shall construct and install on some of said lands the necessary plant and equipment to produce, and it will produce annually fertilizers which contain 50,000 tons of fixed nitrogen as rapidly as there may be a commercial demand therefor at the price herein provided for; such fertilizers to be in the form of ammonium phosphate, ammonium sulphate, or other concentrated nitrogenous fertilizers. As soon as this proposal is accepted by the United States, the company will commence the construction of the first unit of the plant sufficient to produce annually fertilizers which contain at least 5,000 tons of nitrogen, and will complete and place the same in operation as soon as possible after the power for the operation thereof is available for Dam No. 2.

5. The company will agree to offer the products of said plant for sale to farmers and other actual consumers of fertilizer, including associations of such farmers and consumers, and will so fix the price thereof that the maximum net profit which it shall

make in such manufacture and sale of fertilizer products shall not exceed 8 per cent of the fair, actual annual cost of production and sale thereof.

6. The Secretary of Agriculture may from time to time prescribe regulations for distributing the products of said plant in accordance with this offer. He may from time to time appoint and remove boards consisting of one or more representatives of his department, one or more farmers or representatives of farmers' associations, and a nominee of the company to supervise the enforcement of such regulations and to advise with the company from time to time as to the price to be charged farmers and other actual consumers and users of said products. The company may also, under authority and regulations prescribed by the Secretary of Agriculture, use part of said power in the manufacture of calcium arsenate or other insecticides for use by farmers and others.

7. The corporation shall agree to file annually with the Secretary of Agriculture statements showing the cost and profits of the corporation from the operations under this offer, to permit the audit and verification of such statements by said official, and if during the year covered by any such statement the corporation shall have made profits in excess of those permitted by this offer, such excess profits shall be deducted from the cost of the produce sold during the calendar year in which such statement is settled.

8. The United States shall have the right, upon five days' notice, to take over and operate the company's plant hereunder whenever necessary in the national defense, but in such case the United States shall reasonably compensate the company for the use thereof and shall protect the company from losses occasioned by such use (other than profits which the company might have made during such use), and shall return the property in as good condition as when received.

9. In addition to any other remedies that may be possessed by the United States, the company agrees that the Attorney General may, on request of the Secretary of Agriculture, institute proceedings as provided in the Federal water power act for the purpose of remedying or correcting by injunctions, mandamus, or other process any act of commission or omission in violation of any of the terms of the contract resulting from the acceptance of this proposal or of the lease hereinbefore provided for, and in case of the failure of the company to comply with any final decree entered in any such proceeding the Attorney General may, on request of the Secretary of Agriculture, institute proceedings as provided in said Federal water power act for the purpose of revoking said lease or this contract.

10. The undersigned may, in discharge of their obligation hereunder, organize a corporation with the right and capital provided for above and cause it to contract with the United States to carry out the terms of this offer.

Respectfully,

THE TENNESSEE ELECTRIC
POWER CO.,
By W. M. FLOOK, *President*,
THEODORE SWANN,
MEMPHIS POWER & LIGHT
CO.,

By E. W. HILL,
Vice President,
LOUIS C. JONES,
ALABAMA POWER CO.,
By THOS. W. MARTIN,
President,
RAYMOND F. BACON.

Mr. UNDERWOOD. Mr. President, I have listened with much interest to the speech of the Senator from Tennessee, and he has built up a ghost and dreamed a dream. I did not interrupt the Senator from Tennessee, because I wanted him to get out of his system all he had in it on this matter.

I want to say that the bill which I have introduced was written and prepared without any consultation with or consideration of the Alabama Power Co. whatever.

Mr. McKELLAR. Mr. President, I hope the Senator will not think I made any such intimation, because I did not.

Mr. UNDERWOOD. The Senator implied that this legislation was being passed for their benefit. After the bill was prepared and written the gentlemen who are officers of that corporation talked to me about it, and I did explain to them in detail what the bill provided, and they stated that they did not expect to make a bid.

I challenge the Senator's statement. He has made a statement which does not affect me and about which I do not care anything. In fact, I have for the last few years been opposing the Alabama Power Co. in the bid the Senator read, because I was supporting Henry Ford's offer, which I thought was a better offer than theirs; and I had no connection with helping them, and would have been supporting Henry Ford's offer at this hour if he had not withdrawn it. But I want to say to the Senator from Tennessee that I am not critical of the Alabama Power Co. I did not desire that they should have this power, but I think they have developed power on the Coosa River and at other places in Alabama and made a great development for Alabama, and if I am correctly informed they are selling power in Alabama to the citizens of Alabama, under our public service commission, at less cost than the citizens of his State and the other adjoining States pay for their power.

I do not want the Senate to be misled, however, by this ghost the Senator from Tennessee has built. If he had not made his remarks, I would not say another word. The Senator has intimated that the passage of the legislation would turn this property over to the Alabama Power Co. I challenge that statement. He can theorize all he wants to; but let him bring the proof.

Mr. McKELLAR. They have already bid on it.

Mr. UNDERWOOD. Oh, no.

Mr. McKELLAR. Here is an offer made for it infinitely better than the proposal of the Senator, and I take it for granted that if they wanted it so badly last January as to make such a splendid bid on it, they probably would accept the very easy and gracious terms of the Senator's substitute.

Mr. UNDERWOOD. Now, we have all there is in the Senator's remarks. The Senator for three-quarters of an hour has condemned the pending legislation because we were going to turn these powers over to the Alabama Power Co., and the only basis of his argument has been a theory of his that because on yesterday, or the day before, the Alabama Power Co. made an offer which he conceives to be better than the proposals of this substitute, the substitute is drawn in their interest. I am glad he has explained the only substance he has had in a speech of three-quarters of an hour on this subject.

I want to say to the Senator that when Mr. Ford's offer failed by his withdrawing it, there was no offer pending, and there was no legislation proposed, except the plan of the Senator from Nebraska, which is a power plan primarily. I want a powder and fertilizer plant. Neither the Senator from Tennessee nor anybody else had proposed a plan along the line

of the Ford offer. It was power that was covered in the Ford offer, and there is no difference between the Senator from Nebraska and myself about the distinctions between our bills. His is a superpower plan, and this is for powder and fertilizer.

The Senator criticizes the bill I have introduced because it has not in it all the terms found in an offer made by the Alabama Power Co. I could say to the Senator that it has not in it all the terms that were made in the offer of the Union Carbide Co., or in the Hooker-Atterbury offer, or a number of other offers that are pending before the Congress. Why has it not those terms in it? Because I am not asking the Senate of the United States or the Congress of the United States to write the contract.

Mr. McKELLAR. Will the Senator yield there?

Mr. UNDERWOOD. I yield.

Mr. McKELLAR. One of the offers made by the Alabama and associated power companies was that it should be held under the terms and regulations of the water power act. The Senator recalls that on yesterday the Senator from Oregon [Mr. McNary] offered the same proposal, but the Senator from Alabama argued against it and it was defeated. Does the Senator think that the Secretary of War would be justified in putting into the lease a provision that this property should be regulated under the terms of the Federal water power act, when the Senate had already voted that it should not be so regulated?

Mr. UNDERWOOD. I do not think he would, and he should not. I think the Senator from Tennessee in the original vote against the McNary proposition voted as I did.

Mr. McKELLAR. I did.

Mr. UNDERWOOD. So he agrees with me.

Mr. McKELLAR. I would not want to mix up the two matters.

Mr. UNDERWOOD. He agreed with me at that time that it should not go into the contract. The reason why I did not agree that it should go into the contract was that I prefer for the power that is going to be sold in my State to be regulated and controlled by the Public Service Corporation of the State of Alabama. I not only think that is good Democratic doctrine, but I think it is sound business sense. I am inclined to think the people of Tennessee and Georgia and Mississippi, adjoining States where the surplus power will be sold, would prefer to have it regulated by their local commissions rather than by the Secretary of War or by a utility commission in Washington. That is the reason why I proposed it.

But the Senator interrupted me. I am not going to detain the Senate much longer. The Senator is criticizing the proposal because the terms of the contract are not in it. I have said a good many times, and it is difficult for me to make some of my brother Senators understand, that my proposal is not the writing of a contract. I have authorized the Secretary of War, with the approval of the President, to make the contract. If I had said nothing more about that point, nobody would question that the entire contract would be made down at the War Department on such terms as they wanted, but I provide that the Secretary of War and the President shall make the contract with the lessee with certain provisos. One of those provisos is that the lessee shall agree for 50 years to produce 40,000 tons of nitrogen a year after the first few years which we allow to enable the lessee to reach the maximum. I provide further that the nitrogen so made shall be converted into such amount of fertilizer as will consume the nitrogen; in other words, at 2-8-2 it would amount to about 2,000,000 tons of fertilizer. I provide further that the dam shall not be leased for less than 4 per cent of its cost.

With those provisos, which I think are the essential things that we want to attain, namely, nitrogen for defense and fertilizer for peace, I am willing for the Secretary of War and the President to put all the other terms into the contract. I think that the other minor terms can better be written into the contract by the Secretary of War and the President than we could write them in through legislation.

The Secretary of War and the President can put into the contract, if it comes down to that, all of the items that the Senator from Tennessee has read to the Senate. They can put in any other items that they think may protect the public interests. The reason why I left that broader discretion to the President and the Secretary of War rather than to attempt to write the terms into the bill is that I want to get the best contract I can with the best lessee available, and I know that if we make all of the terms of the contract hard and fast to begin with that we will probably limit our bidders to one concern. One lessee bidding for the lease may want it one way

in the matter of minor terms and another bidder another way, and if we try to fix permanently the terms of the contract as the Senator from Tennessee seems to approve of them, as offered by the Alabama Power Co., probably then we could not get any other bidder than the Alabama Power Co.

Mr. McKELLAR. Mr. President—

Mr. UNDERWOOD. I am leaving it open for the Secretary of War and the President to write the terms that will be satisfactory to the most available lessee, provided it produces the nitrogen and the fertilizer that we have been struggling for. I yield to the Senator from Tennessee.

Mr. McKELLAR. The Alabama Power Co. last January made this proposal to the Secretary of War, and the Secretary of War has transmitted the proposal to the Congress. It has not been acted upon. It has not been withdrawn. Does not the Senator from Alabama concede that it would be infinitely better for the Government and infinitely better for the manufacture of nitrogen, both for war and peace, to accept that proposal rather than to go into the vague arrangement that is proposed in his substitute?

Mr. UNDERWOOD. No. I am not sure the Senator is not for the Alabama Power Co. offer. I never have been and am not now, but the Senator evidently is.

Mr. McKELLAR. Oh no; I have never approved it. I stated that when I first spoke. The Senator can not say that. All I am saying is, if the Senator will permit me, that I considered the Alabama Power Co. offer at the time was not worthy of acceptance, but I say further that the offer of the Alabama Power Co., unworthy of acceptance as it is, is infinitely better for the Government and the people of America than is the proposal contained in the Senator's amendment.

Mr. UNDERWOOD. I understand that. The Senator has said that several times.

Mr. McKELLAR. I reiterate it.

Mr. UNDERWOOD. I have not been able to find out yet what the Senator from Tennessee is for. He is not for the proposal of the Senator from Nebraska for a superpower system. He is not for the proposal that the President of the United States and the Secretary of War shall have power to make a contract within the terms of my substitute, putting in anything else they want to. They can put in any terms as full and complete as the Alabama Power Co. has offered. The Senator now says he is not for the Alabama Power Co. offer, and I do not know what the Senator from Tennessee is for; but I am not criticising him on that score, because if he does not want to be for anything, that is his privilege.

Mr. McKELLAR. I think the chances are 3 to 1 that I shall vote against all the proposals that have been made—

Mr. UNDERWOOD. Yes; that is what I said.

Mr. McKELLAR. Because I do not think the Government is receiving a square deal in the proposals that have been made, so I am going to exercise my privilege as a Senator of the United States, not believing that the proposals are for the best interest of the people, and vote against them.

Mr. UNDERWOOD. That was my idea about the Senator's position exactly. I am sorry he will not give my proposal his support. I would like very much to have his support. As I understand it now, he is not for anything that is offered, and has not offered anything himself, and therefore under his position the whole thing would fail; the water would run over the Muscle Shoals Dam No. 2 and nobody would get the benefit of it.

Mr. McKELLAR. Oh, no; it would be promptly leased by the Secretary of War, just as part of it is being leased now to the Alabama Power Co. The Alabama Power Co. has a lease right now on the steam plant that is there, and, of course, if nothing is done, it will have a temporary lease on the whole matter. There is no doubt in the world about that. We all know it.

Mr. UNDERWOOD. Now the Senator comes back and is for the Alabama Power Co. He is right out for it.

Mr. McKELLAR. If the Senator from Alabama can not understand language any better than that, I am sorry for him.

Mr. UNDERWOOD. Not at all. The Senator is against everybody else's proposal, he has no proposal of his own, and he says that when they all fail then we will go back to the proposition where it is now; that the Secretary of War, and not the Congress, not myself, not the Senator from Tennessee, is leasing some of this power to the Alabama Power Co., and there is where he is going to put it again by not being for anybody else's proposition and not proposing anything himself.

Mr. McKELLAR. Oh, no.

Mr. UNDERWOOD. That is all I see in the Senator's position.

Mr. McKELLAR. That would not happen at all. Temporarily the Secretary of War would have the right to lease it. No one but the Congress of the United States can lease the property permanently, and it would not be leased. I think we ought to be very slow about leasing it. This great property ought not to be leased after a few hours' debate such as we have had here, and especially under the terms of the proposals that have been made. As I said before, it would be infinitely better to let the Government try its hand, much as I disbelieve in that, than to turn it over to a private corporation without consideration to the American people.

Mr. UNDERWOOD. I want to call the Senator's attention to the fact that many of my friends on the other side of the Chamber do not think we can get a lessee under the terms of the bill. My friend from Tennessee thinks some others are going to fall over themselves to gobble up the lease. I have not any understanding or agreement or anything else with the Alabama Power Co. The only thing I have heard from them was that they did not expect to put in a bid under this measure. I did hear that officially from one of their officers. If the Senator from Tennessee has any better information than that, I would be glad to have him produce it authentically and not theoretically.

Mr. CARAWAY. If the Alabama Power Co. wants to bid, they can do so through the Secretary of War?

Mr. UNDERWOOD. Certainly.

Mr. CARAWAY. The Secretary of War is a man of some business acumen, is he not?

Mr. UNDERWOOD. Certainly.

Mr. CARAWAY. And if it is such a good thing, he ought to be able to get a reasonable form of contract.

Mr. UNDERWOOD. If their offer is so good and they have made it once, and come back to bid again, he will ask that the bid be put in under the terms of the bill, of course.

Mr. CARAWAY. Under the provisions of the bill they could put in any offer that they have heretofore made.

Mr. UNDERWOOD. Certainly. There are two ways by which the property may be leased. One is for the Congress to write every detail of the contract into legislation and say that the bidder must come up and do those things. That would make it very difficult to get a bidder. The other way is to authorize officers of the Government to make a lease for us. I have selected as those officers of the Government the head of the War Department, the head of the national defense system of the Government, and the Chief Executive of the United States—the President. I really believe, after listening to the debate and considering the legislation that has dragged through the Congress for the last four years on this subject, that we are so far apart in our opinions as to what is the right thing to do and how to do it that a far more effective remedy to accomplish a purpose beneficial to the United States is to do just what I am proposing to do rather than what the Senator from Tennessee suggests.

My proposal is to allow the President of the United States, through his Secretary of War and with his approval, to agree on the terms of a contract if he can find a lessee, rather than for us to sit here and try to write the terms of the contract into law. I think that is the practical way to do it and the better way to do it. I am willing to do that so long as I capture the objective for which some of us in Congress have fought for 10 years, and that is to get national defense and a better supply of fertilizer for the American farmers.

Of course, it could be done the other way. We could write into law every detail that we want. If the Alabama Power Co. will carry out the terms of the contract, I have no objection to their submitting a bid and making the contract. I will say to the Senator from Tennessee that they told me they did not expect to bid. I can say that authoritatively, but if the Senator from Tennessee finds that they have changed their minds I shall be glad to know it. They told me that only two or three days ago.

Mr. McKELLAR. What they propose is simply in connection with their companies to organize a separate corporation which will bid. That is what they propose. It is perfectly plain what they expect to do. The method which they use is immaterial. They are going to get the property before this matter is over.

Mr. UNDERWOOD. Of course, the Senator says that without producing his proof. I have no information on the subject, but I will be perfectly candid and say that if the Alabama Power Co. makes the right kind of lease with the Government, I shall have no objection to their getting it. If they will make 40,000 tons of nitrogen and convert it into the requisite amount of fertilizer, which would be nearly 2,000,000 tons, will pay the interest under the contract, and comply with the other

terms which the President will require, it will be no concern of mine whether they do secure it or whether somebody else secures it. I merely want it to go to the bidder offering the most favorable terms. There is the distinction that my friend from Tennessee [Mr. McKELLAR] does not seem to realize, that I am passing the making of the contract to the Chief Executive, the President of the United States, instead of to the Congress.

Mr. CARAWAY. I desire to ask the Senator a question. If we really wanted to legislate in behalf of the Alabama Power Co. would it not be better, then, to accept their proposal?

Mr. UNDERWOOD. Certainly; that can be substituted for the Ford offer; there is no doubt about that; but I prefer to leave it open, as I have done, to every bidder, if the substitute is adopted, to come before the Secretary of War and the President of the United States and submit a bid. Then the President of the United States and the Secretary of War may accept the best of the bids and make the terms.

Mr. NORRIS. Mr. President, I wish to ask the Senator from Alabama a question before he sits down.

Mr. UNDERWOOD. Very well.

Mr. NORRIS. Assuming the Senator's substitute becomes the law and the property is leased under it, I wish to get the Senator's judgment as to whether or not the lessee would sell the surplus electric power or whether he would keep it all, as he could do under the Senator's substitute if it should be enacted.

Mr. UNDERWOOD. Of course I should have to be advised who the lessee would be. I have talked with a great many gentlemen who have been interested in this matter. Some of them, I think, are more interested in power and the sale of power than they are in manufacturing, and they would make nitrogen merely because they wanted to get the use of the power. There are others who are interested in manufacturing. For instance, under the Hooker-Atterbury offer, I think that Mr. Hooker's idea would be to use the surplus power for other manufactures.

Mr. CARAWAY. That was Ford's idea.

Mr. UNDERWOOD. I think that was also Ford's idea.

Mr. NORRIS. I do not suppose that anybody could state definitely as to that.

Mr. UNDERWOOD. I can not predict and do not care to predict as to the surplus power; I am perfectly candid with my friend from Nebraska. Under my amendment I am offering the surplus power at Dam No. 2, as the substitute now stands, as a bonus in order to get somebody to come in there and produce the nitrogen and the fertilizer. I am not trying to tie the hands of the lessee, and I hope the Senate will not try to tie his hands. I think we shall get a better bid if we let the lessee dispose of the surplus power as he best can in his own interest.

Mr. NORRIS. Again assuming that the Senator's substitute is enacted into law and that someone becomes the lessee who wants to sell the power and does not want to go into manufacturing, or assuming that no one submits a bid and then the governmental corporation undertakes the operation of the plant, as provided in the Senator's substitute, there is no power given to construct a single mile of transmission line.

Mr. UNDERWOOD. The Senator is mistaken about their not having the power to construct transmission lines.

Mr. NORRIS. I have not been able to find a provision to that effect.

Mr. UNDERWOOD. I do not directly provide for the construction of transmission lines, but I give them the power to do anything which is incident to carrying on their business. I authorize them to sell the power.

Mr. NORRIS. Yes; they are authorized to sell the power; I understand that; but I can not find anything in the Senator's amendment which seems to me to give them the power to construct a transmission line. I do not believe such power is contained in the amendment. If the Senator desires to bestow such power, it seems to me he ought to do it explicitly.

Mr. UNDERWOOD. I have no desire to put such a provision in the bill because—

Mr. NORRIS. Then, if it is not in—and my question is predicated on that theory, though I may be wrong—

Mr. UNDERWOOD. I have no desire to put it in because I know that under the powers granted the proposed corporation they will have all the power that any ordinary corporation would have to carry out the purposes for which they are established, and one of those powers is to sell power.

Mr. NORRIS. I wish the Senator would read the language which he thinks gives them the power to build transmission lines.

Mr. UNDERWOOD. I think it is a general incident to the organization of the corporation. There is no specific language conferring such power, but if a corporation were organized for the manufacture of flour, though nothing were said about its right to hire teams to haul the flour around to the grocery stores so that it could sell it, would the Senator from Nebraska think that it would require special language to authorize it, after it had manufactured the flour, to hire a team of horses or to buy one to haul the flour around?

Mr. NORRIS. No.

Mr. OVERMAN. Mr. President—

Mr. NORRIS. Will the Senator from North Carolina let me answer the question, as the Senator from Alabama has propounded one to me?

Mr. OVERMAN. Before the Senator from Nebraska does that, I should like to ask the question whether if the power is given to this corporation to build transmission lines it can also condemn property? Property can not be condemned without some authority to do so.

Mr. UNDERWOOD. The corporation would have the same authority that any other corporation would have.

Mr. NORRIS. Let me answer the question which the Senator from Alabama has propounded to me. The Senator has asked if a corporation is organized for the purpose of manufacturing flour, will they not have the power incident to such purpose of using means to haul the flour around to dealers? I say, yes, they would; but if we authorize a corporation to manufacture flour, it does not follow that they will have the right to build a railroad to carry their flour in interstate commerce, which would require the power of eminent domain. Neither would the proposed corporation have the power to transmit electricity on an overhead trolley; neither would they have the power to build a telephone line and go into the telephone business; neither would they have the power to build a transmission line; for, in order to build a transmission line to carry out such a power, they must have the right of eminent domain, the same as a railroad has. So I wish to say to the Senator from Alabama that, in my humble judgment, poor though it may be, his substitute does not give the power to the governmental corporation to build a single foot of transmission line. If he thinks they should have such a power, I want to suggest that he insert it in his substitute.

Mr. UNDERWOOD. I want to say to the Senator that I think the general powers of this corporation will be sufficient. If the Senator does not think so and thinks it is better to incorporate an explicit provision, I have no objection to an amendment, if he desires to offer one to give them that additional power if he thinks it is necessary, but I do not think it is necessary.

Mr. NORRIS. The questions I have asked were brought to my mind by some questions asked by the Senator from Tennessee [Mr. McKellar], who, I am sorry to say, is not now here, because I was asking them partially on his account. If no private individual or company should bid and secure this power, and the governmental corporation were set up under the Senator's substitute, they would not have any power to build a transmission line although the right is expressly given to sell surplus power. Under the circumstances there is only one bidder on earth that is prepared to take Muscle Shoals and that is the Alabama Power Co., because it is the only probable bidder that has a transmission line anywhere near. So it seems to me that they would have the advantage at least of any other company which would first have to build a transmission line.

Mr. CARAWAY. May I suggest that there are other power companies there. The Mississippi Power Co., within 80 miles of the plant, stands ready to build a transmission line.

Mr. UNDERWOOD. And the Tennessee corporation is only a short distance across the river and within a very few miles of it. It could operate a transmission line if it wanted to do so. As an actual fact to-day, the only wire that goes into Sheffield happens to be an Alabama wire, but if they wanted to sell the power under terms that were satisfactory there would be no difficulty about doing it.

As the bill stands, I have not regarded the sale of power as of very much moment. The Senator has repeatedly said in his speeches that if we operated nitrate plant No. 2 and used the power process for the manufacture of phosphorus, most of the power there would be consumed.

Mr. NORRIS. Most of the primary power of Dam No. 2 would be consumed; I think that is true; but, of course, the Senator must see, in fact he has frankly admitted, that he is giving to this bidder in a certain way a bonus so that the bidder will be able, under the provisions of his amendment, which are now made explicit since my amendments were agreed to, to

manufacture nitrates and be able to recoup what he loses on nitrates by the sale of power. Therefore the sale of power, even though it be mostly secondary—although before the full six years shall have elapsed probably Dam No. 3 will be completed and there will be some primary power to sell—the power, after all, even under the Senator's own proposition, is the thing that is going to make it go, if it shall go.

Mr. UNDERWOOD. I do not admit that that is the only thing, because, as I said after the Senator went to lunch to-day, the Cyanamid Co. is operating a similar plant in Canada and sending its product to the United States to be made into fertilizer and is doing a successful business.

Mr. NORRIS. But, if the Senator will permit me, the Cyanamid Co. in Canada is making a vast number of other things; they do not make fertilizer. They sell small quantities of cyanamide to manufacturers. It is a sort of by-product. They are not in the business as a fertilizer proposition. They could not now take—and they would say so to you if you would ask them—nitrate plant No. 2 and make a fertilizer plant of it and pay expenses. They would admit that frankly.

Mr. UNDERWOOD. No; the Senator is wrong about that, because I asked them that question. I have talked to Mr. Bell, the president of the company. I do not think Mr. Bell would be likely to take a contract to make 40,000 tons of nitrogen; but, if it were not for the amount, I think he would be very glad to consider the proposition. He talked to me in a very friendly way, but he talked in just the opposite way from what the Senator has stated, and indicated that from a cyanamide plant fertilizer may profitably be manufactured.

Mr. NORRIS. I will say to the Senator that, to my mind, the testimony shows without contradiction that nobody could take nitrate plant No. 2 to-day and, even if supplied with power absolutely free, use it to make fertilizer and compete with commercial fertilizer at the present market price. That statement has been made frankly and emphatically by an expert whom the committee had before it, Major Burns, who has been in the business ever since we started to build any of the nitrate plants down there and who is familiar with every detail.

Mr. UNDERWOOD. I read most of the testimony before the Senate committee, and I know there is testimony along that line, but it was not given by men who were in the business. What I was calling to the Senator's attention was the fact that the Cyanamid Co. of Canada is selling some of its cyanamide directly as fertilizer and is converting another portion of it in New Jersey into sulphate of ammonia, and is doing a successful business. But that is neither here nor there.

Mr. NORRIS. The Cyanamid Co. is doing a successful business; I do not dispute that; but, Mr. President, if the Senator will permit me, its business is not primarily the manufacture of fertilizer. It is not in the fertilizer business. It is selling some cyanamide, and there is a small quantity of it used in some fertilizers, and the company is selling it to some people who manufacture fertilizers and put in the cyanamide.

Mr. UNDERWOOD. If the Senator will allow me, I am perfectly willing for him to have his own opinion, but from the statements to me I say that the company is selling a large portion of it for the raw material in fertilizer; but, Mr. President, it does not make any difference. Until it is tried out, the Senator and I never will agree whether this plant can run profitably or not. I say, as I have said from the beginning, that as a matter of national defense it should run whether it runs profitably or not. Of course, no lessee is going to bid on it unless he thinks he can run it profitably. We will agree that far. If we get a lessee, he will go in there because he thinks he can make a profit, and we will hold him to his contract, and we ought to hold him to his contract.

Mr. NORRIS. Surely.

Mr. UNDERWOOD. So, on that part of it, we can dismiss the lessee. If we come to the Government, that is a different matter; but I say that the Government should operate the plant as it would operate a battleship. If it loses money on it, it ought to operate it anyhow for national defense; and if it makes the nitrate product for national defense it is cheaper to make it into fertilizer and sell it below cost than it would be to throw the product into the river, because it would get some return on its product.

Mr. NORRIS. Assuming that it is going to make it, the Senator compels it to make it when there is no use for it, and says: "Now, since you have made it, you make it into fertilizer and sell it below cost."

Mr. UNDERWOOD. The Senator can not say to me that there is no use for it. He said to-day that there was a consumption of 8,000,000 tons of fertilizer in this country annually.

Mr. NORRIS. Oh, yes; but if you made a fertilizer and tried to sell it for a thousand dollars a ton you would have it

on your hands unless you changed the price and sold it at a loss.

Mr. UNDERWOOD. Of course; nobody disputes the fact that you have to sell it cheaply enough for the people to buy it; and that means that you have to sell it just as cheaply as anybody else is selling it, if not cheaper, but certainly as cheaply. There is no dispute about that. I say it would be cheaper for the Government corporation to convert its nitrogen into fertilizer and sell it below cost than to throw the nitrogen into the river.

Mr. NORRIS. Nobody wants it to throw the nitrogen into the river.

Mr. UNDERWOOD. Then there is no dispute.

Mr. NORRIS. The difference is that some of us say: "Unless you can make it and make fertilizer of it at a cost that the farmer can afford to buy it for, and thus cheapen the product, then do not make it."

Mr. STANLEY. Mr. President—

Mr. UNDERWOOD. I contend that we should make it for national defense.

Mr. NORRIS. I understand that.

Mr. UNDERWOOD. That is the difference. If the Congress says that we ought not to make it until we are absolutely convinced that it can be done at a profit—and we can not be convinced of that except by an operation of this plant and a trial—if the Congress has made up its mind that it will not make it until it has been convinced of that, then that merely means that we abandon this project except as a power proposition.

Mr. NORRIS. No; not by any means. We say that as a matter of national defense, for explosive purposes, the cost of the product is an absolutely secondary consideration; but the Senator says, "Make it as a matter of national defense when we do not need it as a matter of national defense." If we need it as a matter of national defense, then why make it into fertilizer?

Here is your nitrate, and you say: "We are making this for national defense." All right, let us have it for national defense, as much of it as we think we ought to have. When we get that much, if any more is made, then you propose to put it into fertilizer. Why not stop?

Mr. UNDERWOOD. Of course, the whole proposition—

Mr. NORRIS. Why not do the same as you do with the battleship?

Mr. UNDERWOOD. If the Senator will allow me, I very rarely interrupt other Senators, and I should like to finish the sentence. I am always glad to yield.

Mr. NORRIS. I beg the Senator's pardon.

Mr. UNDERWOOD. If you build a battleship, as I said before, you do not anchor it in a harbor without any men on it or anybody to take care of it, or without its being equipped for action. You put it in exactly the same condition in which you would operate it in time of war, and you sail it out to sea and keep it moving, so that if war breaks out it is prepared to go, from the captain down to the crew. Now, why should you say that you are going to let a powder plant, a nitrogen plant, lie obsolescent, and you do not know whether you will run it or not?

I was astonished to see a report come in here the other day saying that they did not know whether or not they could make 5,000 tons of nitrogen a year at this plant, which six years ago was guaranteed to make 40,000 tons. I think there was a mistake about it. The president of the Cyanamid Co., which built the plant—not the man who actually built it, but the president of the company that built it—told me within two weeks that that plant could make 40,000 tons unless something has happened to it.

Mr. NORRIS. I think that is true if you are making explosives, but some additional machinery will have to be put in before you can make fertilizer there.

Mr. UNDERWOOD. If the Senator will allow me to conclude, I want to sit down in a moment. Of course, in order to make fertilizer you have to build a fertilizer plant, and that is why we carry some bonds in this bill to do it; but I am talking about the nitrogen. Unless that plant is going to become obsolescent it will have to be operated, and what I am fighting for is to have it operated and give the farmers of this country the benefit of the fertilizer.

That is my theory, and that is the theory of some Senators who are voting with me. I realize that there are other people who say that this can not be done and ought not to be done; that if you want to experiment on this subject of making nitrogen fertilizer you can experiment, but that this great plant should be used for power purposes.

I am not on that side of the question. That is the side of the Senator from Nebraska. If the majority of Congress agrees with him, then we will abandon national defense and fertilizers, in the main, and develop this great property for a power proposition, and it can be done successfully and profitably. I do not question the Senator's position on that point. It has been demonstrated that it can be made a successful and profitable business by carrying out the plan of the Senator from Nebraska for a superpower proposition, and when we strip ourselves of our clothes and come down and show our naked souls to the public we are really divided on two plans. One is the plan for a great water-power development, which the Senator from Nebraska advocates, and the other is a plan for national defense, powder, and fertilizer, which I am trying to write into this bill.

Mr. NORRIS. Mr. President, I want to say just one word for fear that my silence may be considered as an admission.

I do not admit that the committee abandoned national defense. I do not admit that it abandoned fertilizer. I claim and I believe, and I think I shall be able to demonstrate, that its proposition is the only practical proposition before the Senate which in a businesslike way solves or attempts to solve the question of national defense or the question of fertilizer.

Mr. STANLEY. Mr. President, I have understood the Senator from Nebraska [Mr. Norris] to state that some authority stated before the Agricultural Committee that this plant could not make commercial fertilizer below the market price of such fertilizer. I may be in error, but when this question was up before I made quite a study of the proposition—in advocacy, by the way, of the Government's operation of the plant at that time—and my impression is that there was a great difference of opinion among the experts as to the actual cost of producing commercial fertilizer and that quite a number of men learned in the business—experts, persons who had practical knowledge of the operation of these plants, especially plants of the character of the plant at Muscle Shoals—maintained that commercial fertilizer could be produced at a profit at the then market price.

Mr. HARRISON. Mr. President, I would not at this hour detain the Senate before it goes into executive session if it were not for the fact that the distinguished Senator from Tennessee [Mr. McKellar] made an argument to-day which no doubt will go on the winds and be published and be given great import; and I desire to answer, just briefly, one or two suggestions that he made. He is a Senator of great influence, and his utterances have great weight in my particular section of the country. The people there will read and some of them will relish what he has said about the bill to which I have given my allegiance and for which I shall cast my vote.

The Senator says he is against this bill, and he compares the Underwood bill to the proposal of the Alabama Power Co., and says that the proposal of the Alabama Power Co. is better for the people; that the country would get bigger results and the farmers would get more benefits from it, as I understand him, than under the provisions of the Underwood bill.

I deny both of those propositions. I sat in the committee considering this question. I never was for the Alabama Power Co.'s proposal. I do not know of a single member of the Agricultural Committee of the Senate who voted for it. I do not know of anybody in the Senate who is for it now. The Alabama Power Co.'s proposal in some respects was fair, but in others it seemed to me that it was not fair.

The Senator says that so far as the consideration is concerned, the Alabama Power Co.'s proposal would bring bigger results and returns to the Government than this bill. The Senator has not read or has not studied or has not estimated the proposal of the Alabama Power Co. If he will look at it he will see that in its bid the Alabama Power Co. proposed to pay \$300,000 a year for six years on Dam No. 2 and \$1,500,000 per year for the next four years, and thereafter \$2,000,000 per year. That was on Dam No. 2. Figuring it up, it is 3½ per cent interest on the cost of Dam No. 2.

Now, let us take Dam No. 3, which is proposed to be constructed under my amendment. The Alabama Power Co.'s proposal is \$200,000 per year for the first three years, and thereafter 4 per cent on the actual cost, a rental not exceeding \$1,200,000 per year. Then they have a proviso there that in no case can it be over 4 per cent on the cost of \$30,000,000.

The estimate is that it will cost about \$32,000,000. If you figure the amount of the Alabama Power Co.'s proposal for the construction of Dam No. 3, it figures 3½ per cent on the cost of that dam. The Underwood proposal insures to the Government not less than 4 per cent on the cost of Dam No. 2.

and Dam No. 3 if my amendment should be adopted; and so the Government, in dollars and cents, will at least get one-half of 1 per cent more under this bill than it is possible for it to get under the Alabama Power Co.'s proposal.

Now let us see as to the other proposition. The Senator says that the Alabama Power Co.'s proposal is better than that of the Senator from Alabama. The Alabama Power Co., under its proposal, could make sulphate of ammonia and nothing else. The wording of the proposal says that it will make fertilizer to the extent of the commercial demand therefor at the price therein provided for. The price provided in the Alabama Power Co.'s proposal is based on the cost of production and sale. The Underwood proposal is to sell the product for the cost of production and not over 8 per cent on the cost of production. If you would put it at 8 per cent on the cost of production and sale, it might be 16 per cent on the cost of production alone; and certainly the Alabama Power Co.'s proposal is not as fair in that respect as is the provision in the Underwood proposal.

Let us go further. They are to make fertilizer according to commercial demand. The Underwood proposal says they have to make 40,000 tons of fixed nitrogen a year, after a certain number of years. There is no discretion lodged there. There is discretion lodged in the Alabama Power Co.'s proposal.

What else? The Underwood substitute provides that they have to make 40,000 tons of fixed nitrogen or fertilizers of every kind, mixed and unmixed, and he added "according to demand." I am sorry that was stricken from the measure. I think the striking out of that phrase weakened the substitute.

I do not think the argument of the Senator from Nebraska had any weight. I think the provision meant that 40,000 tons of fixed nitrogen must be made every year, and it was to be made according to the wishes and demands of the farmers of the country.

If a farmer had wanted a certain kind of fertilizer, they would have had to produce it within the 40,000 tons of fixed nitrogen. If a farmer had wanted another kind, they would have had to make that kind. But that has been stricken from the bill under the eloquence of my friend from Nebraska. The Alabama Power Co., however, wrote and said, "We will make, according to commercial demand, ammonium phosphate, ammonium sulphate, or other nitrogenous phosphates." They have it within their power under their proposal to make ammonium sulphate, and ammonium sulphate alone, of which we have a great excess now, and which would be no good to the farmers of the country.

Therefore I submit that when you analyze the Underwood proposal and analyze the Alabama Power Co. proposal, there is no comparison between the two propositions. If the Senator should vote for the Alabama Power Co. proposal, he would do the farmers of this country little good, and he would take from the taxpayers of America a half of 1 per cent at least on the cost of this proposition.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until to-morrow at 12 o'clock noon.

The motion was agreed to; and the Senate (at 4 o'clock and 52 minutes p. m.) took a recess until to-morrow, Thursday, December 11, 1924, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate December 10, 1924

POSTMASTERS

CALIFORNIA

John F. Conner to be postmaster at Del Mar, Calif. Office became presidential October 1, 1924.

Marilyn M. Thomas to be postmaster at Stanford University, Calif., in place of G. E. Meekins, resigned.

Gladys B. Evans to be postmaster at Grafton, Calif., in place of F. R. Evans, resigned.

Mamie L. Royce to be postmaster at Pittsburg, Calif., in place of M. L. Royce. Incumbent's commission expired February 11, 1924.

COLORADO

Ira R. Wood to be postmaster at Ramah, Colo. Office became presidential October 1, 1924.

Beulah J. Wright to be postmaster at Estes Park, Colo., in place of H. S. Carruthers. Incumbent's commission expired April 23, 1924.

CONNECTICUT

Mary A. Tracy to be postmaster at Central Village, Conn., in place of Frank La Favre, appointee declined.

George E. Dickinson to be postmaster at Rockville, Conn., in place of George Forster. Incumbent's commission expired June 5, 1924.

John J. O'Neill to be postmaster at Killingly, Conn., in place of Patrick Riley. Incumbent's commission expired February 4, 1924.

GEORGIA

Julien V. Frederick to be postmaster at Marshallville, Ga., in place of J. V. Frederick. Incumbent's commission expired July 28, 1923.

ILLINOIS

William D. Garriss to be postmaster at Dowell, Ill. Office became presidential July 1, 1924.

INDIANA

Harley Secor to be postmaster at Akron, Ind., in place of A. L. Adamson, deceased.

Louis W. Otto to be postmaster at Crawfordsville, Ind., in place of W. H. Johnston. Incumbent's commission expired June 5, 1924.

Lewis Debolt to be postmaster at Claypool, Ind., in place of O. A. Minear. Incumbent's commission expired June 5, 1924.

Lawrence E. Hoffman to be postmaster at Argos, Ind., in place of J. M. Wickizer. Incumbent's commission expired June 5, 1924.

IOWA

Edward M. Bratton to be postmaster at Shellsburg, Iowa, in place of E. M. Bratton. Incumbent's commission expired June 5, 1924.

Gilbert Jones to be postmaster at Hawkeye, Iowa, in place of A. B. Peters. Incumbent's commission expired June 5, 1924.

William C. Moon to be postmaster at Greene, Iowa, in place of Amos Ingalls. Incumbent's commission expired June 5, 1924.

Elizabeth Summers to be postmaster at Fort Atkinson, Iowa, in place of A. J. Schrelber. Incumbent's commission expired June 5, 1924.

Charles A. Norris to be postmaster at Eldora, Iowa, in place of E. S. Thompson. Incumbent's commission expired June 5, 1924.

KANSAS

M. Blanche Perry to be postmaster at Culver, Kans. Office became presidential October 1, 1924.

Robert W. Cyr to be postmaster at Aurora, Kans. Office became presidential October 1, 1924.

LOUISIANA

Rena F. Eckart to be postmaster at Natalbany, La. Office became presidential October 1, 1924.

Cyrus E. Roberts to be postmaster at Merryville, La., in place of C. E. Roberts. Incumbent's commission expired February 24, 1924.

Milton E. Kidd to be postmaster at Choudrant, La., in place of M. E. Kidd. Incumbent's commission expired February 11, 1924.

Emile Aubert to be postmaster at Abita Springs, La., in place of Emile Aubert. Incumbent's commission expired June 4, 1924.

MAINE

Louis S. Isbell to be postmaster at North Anson, Me., in place of I. H. Ellis. Incumbent's commission expired June 5, 1924.

MASSACHUSETTS

Patrick H. McIntyre to be postmaster at Clinton, Mass., in place of J. F. Murrman. Incumbent's commission expired June 4, 1924.

MICHIGAN

Edmund R. Vincent to be postmaster at Corunna, Mich., in place of J. A. Richardson, resigned.

Jesse G. Wilbur to be postmaster at Belding, Mich., in place of E. E. Fales, deceased.

Moses O. Champney to be postmaster at Traverse City, Mich., in place of Emanuel Wilhelm. Incumbent's commission expired June 4, 1924.

Mary M. Smith to be postmaster at Thompsonville, Mich., in place of C. L. Bennett. Incumbent's commission expired June 4, 1924.

Curtis Van Prentice to be postmaster at South Haven, Mich., in place of E. S. Dyckman. Incumbent's commission expired June 4, 1924.

Merrill F. Fitch to be postmaster at Mattawan, Mich., in place of A. H. Campbell. Incumbent's commission expired June 4, 1924.

G. Leslie Runner to be postmaster at Shelby, Mich., in place of H. M. Royal. Incumbent's commission expired June 4, 1924.

Ralph C. Hubbard to be postmaster at Hartford, Mich., in place of W. H. Blasfield. Incumbent's commission expired June 4, 1924.

Beryl Mitchell to be postmaster at Edmore, Mich., in place of A. F. Skarritt. Incumbent's commission expired June 4, 1924.

Jacob M. Paul to be postmaster at Eau Claire, Mich., in place of W. L. Ferry. Incumbent's commission expired June 4, 1924.

Charles Plowman to be postmaster at Copemish, Mich., in place of T. T. Fralick. Incumbent's commission expired June 4, 1924.

Gordon E. Stowell to be postmaster at Byron, Mich., in place of M. B. Gallagher. Incumbent's commission expired June 4, 1924.

Thomas Watson to be postmaster at Birch Run, Mich., in place of M. J. Hadsall. Incumbent's commission expired June 4, 1924.

Leon D. Corwin to be postmaster at Ashley, Mich., in place of E. S. Reist. Incumbent's commission expired June 4, 1924.

MINNESOTA

A. Wilbert Anderson to be postmaster at Proctor, Minn., in place of Patrick McCabe. Incumbent's commission expired July 28, 1923.

Arthur M. Enger to be postmaster at Lanesboro, Minn., in place of James Lynch. Incumbent's commission expired June 5, 1924.

John V. Barstow to be postmaster at Brownsdale, Minn., in place of L. M. Clark, appointee declined.

Anna Slindee to be postmaster at Adams, Minn., in place of E. L. Slindee, deceased.

John L. Christianson to be postmaster at Harmony, Minn., in place of F. A. Achatz. Incumbent's commission expired June 5, 1924.

MISSOURI

Kenneth C. Dixon to be postmaster at Creighton, Mo. Office became presidential October 1, 1924.

Joseph A. Davis to be postmaster at Waynesville, Mo., in place of A. L. Wilson. Incumbent's commission expired June 4, 1924.

George R. Hendricks to be postmaster at Rutledge, Mo., in place of D. J. Buford. Incumbent's commission expired June 5, 1924.

Charles E. Traylor to be postmaster at Richmond, Mo., in place of J. K. Joiner. Incumbent's commission expired June 5, 1924.

Luther C. Brower to be postmaster at Queen City, Mo., in place of A. C. Jones. Incumbent's commission expired June 4, 1924.

Clyde S. Jones to be postmaster at Polo, Mo., in place of W. M. Brown. Incumbent's commission expired June 5, 1924.

J. Frank Wilson to be postmaster at Palmyra, Mo., in place of C. J. Johnson. Incumbent's commission expired June 5, 1924.

Amos E. Jennings to be postmaster at Miami, Mo., in place of Z. T. Casebolt. Incumbent's commission expired June 5, 1924.

Stephen C. Accola to be postmaster at La Grange, Mo., in place of T. E. Heatherly. Incumbent's commission expired June 5, 1924.

Mattie A. Campbell to be postmaster at King City, Mo., in place of Essie Ward. Incumbent's commission expired June 4, 1924.

John A. Mills to be postmaster at Jonesburg, Mo., in place of Fleety Palmer. Incumbent's commission expired June 5, 1924.

Delphia Johnson to be postmaster at Jerico Springs, Mo., in place of V. V. Sliton. Incumbent's commission expired June 5, 1924.

Irene Shibley to be postmaster at Gorfn, Mo., in place of A. C. Walters. Incumbent's commission expired January 23, 1924.

Delph C. Simons to be postmaster at Grant City, Mo., in place of W. P. Spillman. Incumbent's commission expired June 5, 1924.

Bertha D. Marling to be postmaster at Elsberry, Mo., in place of W. B. Ellis. Incumbent's commission expired June 5, 1924.

Hobart Lewis to be postmaster at Downing, Mo., in place of C. E. McCandless. Incumbent's commission expired June 5, 1924.

Ira E. Knight to be postmaster at Conway, Mo., in place of J. E. Harris. Incumbent's commission expired June 5, 1924.

Ida A. Sack to be postmaster at Bosworth, Mo., in place of S. T. Breckenridge. Incumbent's commission expired August 12, 1923.

Thomas M. Fowler to be postmaster at Nelson, Mo., in place of Joe Ritchey, removed.

MONTANA

Joseph C. Fallor to be postmaster at Dillon, Mont., in place of W. V. Grimes. Incumbent's commission expired February 20, 1924.

Nora M. Henley to be postmaster at Geyser, Mont., in place of F. D. Worcester, resigned.

NEVADA

Julia G. Pangburn to be postmaster at Jarbridge, Nev. Office became presidential October 1, 1924.

NEW HAMPSHIRE

Silas C. Newell to be postmaster at Newport, N. H., in place of E. J. Mailey. Incumbent's commission expired February 20, 1924.

Lillian B. Sargent to be postmaster at Canaan, N. H., in place of E. M. Allen, deceased.

NEW JERSEY

Berta Brown to be postmaster at Leonardo, N. J. Office became presidential October 1, 1924.

Harry W. Mutchler to be postmaster at Rockaway, N. J., in place of William Gerard. Incumbent's commission expired June 5, 1924.

Le Roy Duckworth to be postmaster at Clinton, N. J., in place of J. Y. Bellis. Incumbent's commission expired June 5, 1924.

Louis Meretta to be postmaster at Zarephath, N. J., in place of F. W. Borough, resigned.

Edwin Condit to be postmaster at Essex Fells, N. J., in place of D. H. Miller, resigned.

David Tumen to be postmaster at Atlantic Highlands, N. J., in place of C. R. Grover, resigned.

NEW YORK

George C. Myer to be postmaster at Highland Falls, N. Y., in place of J. L. Hicks. Incumbent's commission expired November 21, 1922.

Leslie E. Daniels to be postmaster at Chaumont, N. Y., in place of George Diefendorf. Incumbent's commission expired May 6, 1924.

Harmon A. Ranous to be postmaster at Minetto, N. Y., in place of A. G. Tucker, resigned.

Edward J. Murphy to be postmaster at Forestport, N. Y., in place of A. M. Tracy, resigned.

NORTH CAROLINA

Alfred A. McDonald to be postmaster at Parkton, N. C. Office became presidential October 1, 1924.

Joseph K. Taylor to be postmaster at Morven, N. C. Office became presidential April 1, 1920.

NORTH DAKOTA

John E. Nelson to be postmaster at Litchville, N. Dak., in place of J. E. Nelson. Incumbent's commission expired April 23, 1924.

OHIO

Clarence S. Frazer to be postmaster at Xenia, Ohio, in place of H. E. Rice. Incumbent's commission expired June 4, 1924.

Frances Dunham to be postmaster at Fayetteville, Ohio, in place of F. F. Dunham, deceased.

OKLAHOMA

John R. O'Connell to be postmaster at Willow, Okla. Office became presidential October 1, 1924.

Helen Whitlock to be postmaster at Maramee, Okla. Office became presidential October 1, 1924.

OREGON

William R. Anderson to be postmaster at Milton, Oreg., in place of Elmer Hopkins, resigned.

PENNSYLVANIA

H. Oscar Young to be postmaster at Plymouth Meeting, Pa. Office became presidential October 1, 1924.

Charles M. Wilkins to be postmaster at Wayne, Pa., in place of M. J. Porter. Incumbent's commission expired August 5, 1923.

Samuel S. Ulerich to be postmaster at New Florence, Pa., in place of H. F. Bush. Incumbent's commission expired September 25, 1923.

Grace S. Albright to be postmaster at Hyndman, Pa., in place of J. C. Luman. Incumbent's commission expired June 5, 1924.

Edwin H. Cliff to be postmaster at Glen Olden, Pa., in place of C. E. W. Curry. Incumbent's commission expired June 5, 1924.

Albert R. Morgan to be postmaster at Nemacolin, Pa., in place of H. O. Marquis, resigned.

Laura E. Rich to be postmaster at Enola, Pa., in place of R. M. Rahn, removed.

SOUTH CAROLINA

Gilbert G. Hiers to be postmaster at Ehrhardt, S. C., in place of E. D. Grant, resigned.

SOUTH DAKOTA

Bernard P. Corrigan to be postmaster at Cavour, S. Dak. Office became presidential October 1, 1924.

Raymond B. Breed to be postmaster at Brookings, S. Dak., in place of R. B. Breed. Incumbent's commission expired June 4, 1924.

TEXAS

Elizabeth Ingenhuet to be postmaster at Comfort, Tex., in place of Rudolph Flach, jr. Incumbent's commission expired June 4, 1924.

Alvin O. Fricke to be postmaster at Kingsbury, Tex., in place of Nora Wagner, deceased.

UTAH

David T. Lewis to be postmaster at Spanish Fork, Utah, in place of W. A. Jones. Incumbent's commission expired June 4, 1924.

Paul G. Johnson to be postmaster at Grantsville, Utah, in place of Robert D. Halladay. Incumbent's commission expired June 4, 1924.

WASHINGTON

Albert Maurer to be postmaster at Kelso, Wash., in place of J. L. Harris, resigned.

WEST VIRGINIA

Roy C. Glick to be postmaster at Pemberton, W. Va. Office became presidential October 1, 1924.

John B. Taft to be postmaster at Nutter Fort, W. Va. Office became presidential April 1, 1924.

Earle Reger to be postmaster at Weston, W. Va., in place of Earle Reger. Incumbent's commission expired June 5, 1924.

Benjamin E. McGinnis to be postmaster at Pennsboro, W. Va., in place of J. A. Wooddell. Incumbent's commission expired June 5, 1924.

Mary B. Carman to be postmaster at Bethany, W. Va., in place of S. I. Wells. Incumbent's commission expired March 23, 1924.

WYOMING

Louis E. Eaton to be postmaster at Torrington, Wyo., in place of J. L. Masters. Incumbent's commission expired June 5, 1924.

John H. Mantle to be postmaster at Kemmerer, Wyo., in place of J. T. Platt, resigned.

Frank A. Beard to be postmaster at Chugwater, Wyo., in place of Florence Hullett, deceased.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 10, 1924

MEMBERS OF INTERSTATE COMMERCE COMMISSION

Balthasar H. Meyer to be member of the Interstate Commerce Commission for term of seven years from January 1, 1925. (Reappointment.)

J. B. Campbell to be member of the Interstate Commerce Commission for term of seven years from January 1, 1925. (Reappointment.)

PROMOTIONS IN THE ARMY

Mallin Craig to be Chief of Cavalry, with the rank of major general.

Joseph Kepner Partello to be colonel, Infantry.

George Percy Hawes, jr., to be lieutenant colonel, Quartermaster Corps.

Stafford LeRoy Irwin to be major, Field Artillery.

Reynold Ferdinand Melin to be captain, Ordnance Department.

Robert Grier St. James to be captain, Infantry.

Francis Irwin Maslin to be captain, Quartermaster Corps.
Horace Speed, jr., to be first lieutenant, Coast Artillery Corps.
Fred William Makinney, jr., to be first lieutenant, Cavalry.
William Benjamin Kean, jr., to be first lieutenant, Infantry.
Franklin Langley Whitley to be major, Adjutant General's Department.

Kenneth Seymour Stice to be first lieutenant, Signal Corps.

Orva Earl Beezley to be captain, Field Artillery.

Charles Joseph Barrett, jr., to be second lieutenant, Field Artillery.

Ivan Benson Snell to be captain, Air Service.

Leon LaGrange Roach to be colonel, Infantry.

Horace Potts Hobbs to be colonel, Infantry.

Louis Joseph Van Schaick to be colonel, Infantry.

Edgar Albert Myer to be colonel, Infantry.

Arthur Morson Shipp to be colonel, Infantry.

Joseph William Beacham, jr., to be colonel, Infantry.

Guy Stevens Norvell to be colonel, Cavalry.

Robert Hayes Wescott to be colonel, Infantry.

Allen Parker to be colonel, Infantry.

Allen Smith, jr., to be colonel, Infantry.

Frank Burson Hawkins to be colonel, Infantry.

Paul Trapier Hayne to be colonel, Adjutant General's Department.

Fred Erskine Buchan to be colonel, Cavalry.

Edward Albert Sturges to be colonel, Finance Department.

William Luke Luhn to be colonel, Cavalry.

Hu Blakemore Myers to be colonel, Cavalry.

Henry Russell Richmond to be colonel, Cavalry.

Charles Evans Kilbourne to be colonel, Coast Artillery Corps.

Osmun Latrobe to be colonel, Cavalry.

Orval Pool Townshend to be colonel, Infantry.

Richard Irving McKenney to be lieutenant colonel, Coast Artillery Corps.

Charles Albert Clark to be lieutenant colonel, Quartermaster Corps.

Robert Louis Moseley to be lieutenant colonel, Infantry.

Aristides Moreno to be lieutenant colonel, Infantry.

William Lay Patterson to be lieutenant colonel, Infantry.

Charles Edward Wheatley to be lieutenant colonel, Coast Artillery Corps.

Earl Biscoe to be lieutenant colonel, Coast Artillery Corps.

William Scott Wood to be lieutenant colonel, Field Artillery.

James Howard Stansfield to be lieutenant colonel, Judge Advocate General's Department.

Francis Bradford Wheaton to be lieutenant colonel, Quartermaster Corps.

James Merrill Hutchinson to be lieutenant colonel, Quartermaster Corps.

George Morgan Newell to be lieutenant colonel, Finance Department.

Sidney Smith Underwood to be lieutenant colonel, Ordnance Department.

Thomas Egbert Jansen to be lieutenant colonel, Finance Department.

Felix Edward Blackburn to be lieutenant colonel, Judge Advocate General's Department.

Charles Almon Hunt to be lieutenant colonel, Infantry.

Warren Thomas Hannum to be lieutenant colonel, Corps of Engineers.

Robert Ross Ralston to be lieutenant colonel, Corps of Engineers.

Mark Brooke to be lieutenant colonel, Corps of Engineers.

Laurence Verner Frazier to be lieutenant colonel, Corps of Engineers.

James Franklin Bell to be lieutenant colonel, Corps of Engineers.

Gilbert Henry Stewart to be lieutenant colonel, Ordnance Department.

Joseph Taggart McNarney to be major, Air Service.

Pearson Menoher to be major, Cavalry.

Albert Henry Warren to be major, Coast Artillery Corps.

Omar Nelson Bradley to be major, Infantry.

Paul John Mueller to be major, Infantry.

Leland Stanford Hobbs to be major, Infantry.

John Frederick Kahle to be major, Coast Artillery Corps.

Edwin Bowman Lyon to be major, Air Service.

Reinold Melberg to be major, Coast Artillery Corps.

Clarence Brewster Lindner to be major, Coast Artillery Corps.

John Henry Cochran to be major, Coast Artillery Corps.

Carl Conrad Bank to be major, Field Artillery.

Charles Calvert Benedict to be major, Air Service.

Vernon Evans to be major, Infantry.

Roscoe Barnett Woodruff to be major, Infantry.

Joseph Jesse Teter to be major, Coast Artillery Corps.
 Lewis Clarke Davidson to be major, Infantry.
 Dwight David Eisenhower to be major, Infantry.
 Harold William James to be major, Infantry.
 George Hume Peabody to be major, Air Service.
 Martin John O'Brien to be major, Coast Artillery Corps.
 Joseph Cumming Haw to be major, Coast Artillery Corps.
 James Basevi Ord to be major, Infantry.
 Earl Larue Naiden to be major, Air Service.
 Henry McElderry Pendleton to be major, Cavalry.
 Iverson Brooks Summers, jr., to be major, Adjutant General's Department.
 Edmund deTreville Ellis to be major, Quartermaster Corps.
 Robert William Strong to be major, Cavalry.
 Clifford Randall Jones to be major, Coast Artillery Corps.
 John Bengnot Wogan to be major, Field Artillery.
 Clesen Henry Tenney to be major, Coast Artillery Corps.
 Clifford Barrington King to be major, Field Artillery.
 Frank Edwin Emery, jr., to be major, Coast Artillery Corps.
 Edward Caswell Wallington to be major, Chemical Warfare Service.
 Carl Ernest Hocker to be major, Coast Artillery Corps.
 John William Leonard to be major, Infantry.

 William Joseph Moroney to be first lieutenant, Infantry.
 Russell Lowell Williamson to be first lieutenant, Air Service.
 Howard Dohla Johnston to be first lieutenant, Infantry.
 Franklin Leroy Rash to be first lieutenant, Infantry.
 Edgar Harvey Snodgrass to be first lieutenant, Infantry.
 Claude Birkett Ferenbaugh, to be first lieutenant, Infantry.
 Adna Chaffee Hamilton to be first lieutenant, Infantry.
 Harold Stuart Ruth to be first lieutenant, Infantry.
 Sterling Eugene Whitesides to be first lieutenant, Infantry.
 Lewis Stone Sorley, jr., to be first lieutenant, Infantry.
 Albert Coady Wedemeyer to be first lieutenant, Infantry.
 David Best Latimer to be first lieutenant, Coast Artillery Corps.
 Roswell Boyle Hart to be first lieutenant, Infantry.
 Halvor Hegland Myrah to be first lieutenant, Coast Artillery Corps.
 Herbert Joseph Riess to be first lieutenant, Infantry.
 Henry Ignatius Szymanski to be first lieutenant, Infantry.
 Frederick Brenton Porter to be first lieutenant, Field Artillery.
 Bryan Sewall Halter to be first lieutenant, Infantry.
 Charles Raymond Gross to be first lieutenant, Infantry.
 Charles Hardy Hart, jr., to be first lieutenant, Infantry.
 Adolphus Rankin McConnell to be first lieutenant, Air Service.
 George De Vere Barnes to be first lieutenant, Quartermaster Corps.
 Paul Robert Menzies Miller to be first lieutenant, Field Artillery.
 Albert Smith Rice to be first lieutenant, Infantry.
 Charles Linton Williams to be first lieutenant, Air Service.
 Charles Ream Jackson to be first lieutenant, Coast Artillery Corps.
 Charles Leslie Keerans, jr., to be first lieutenant, Infantry.
 Fred Cleveland Fishback to be first lieutenant, Air Service.
 George Oliver Roberson to be first lieutenant, Air Service.
 Kenneth Newton Walker to be first lieutenant, Air Service.
 John Lawrence Hanley to be first lieutenant, Coast Artillery Corps.
 Stanley Hunsicker Hunsicker to be first lieutenant, Quartermaster Corps.
 Neal Henry McKay to be first lieutenant, Quartermaster Corps.
 Stanleigh Megargee to be first lieutenant, Quartermaster Corps.
 Oscar Leslie Rogers to be first lieutenant, Air Service.
 Roger Frederic O'Leary to be first lieutenant, Quartermaster Corps.
 Samuel Perham Mills to be first lieutenant, Air Service.
 Edgar Theodore Selzer to be first lieutenant, Air Service.
 Albert Joseph Lubbe to be first lieutenant, Signal Corps.
 George Raymond Ensminger to be first lieutenant, Ordnance Department.
 John Bicknell Luscombe to be first lieutenant, Quartermaster Corps.
 Charles Harold Howard to be first lieutenant, Air Service.
 Edward Alton Hillery to be first lieutenant, Air Service.
 Hugh Sydney Harpole to be first lieutenant, Quartermaster Corps.
 Homer William Jones to be first lieutenant, Quartermaster Corps.
 Everett Sanford Davis to be first lieutenant, Air Service.
 Frank Egerton Powell to be first lieutenant, Quartermaster Corps.
 Bradford Nelson Headley to be first lieutenant, Quartermaster Corps.
 Frederick Irving Patrick to be first lieutenant, Air Service.
 Donald Reuben Goodrich to be first lieutenant, Air Service.
 Carl Henry Barrett to be first lieutenant, Air Service.
 Francis Hill Kuhn to be first lieutenant, Quartermaster Corps.
 John Daniel O'Connell to be first lieutenant, Quartermaster Corps.
 Harold Brand to be first lieutenant, Air Service.

Edward Watson Kelley to be first lieutenant, Infantry.
 Claud Thomas Gunn to be first lieutenant, Coast Artillery Corps.
 Herbert Benjamin Wilcox to be first lieutenant, Infantry.
 Robert Milton Elchelsdoerfer to be first lieutenant, Cavalry.
 Otto Max Jank to be first lieutenant, Coast Artillery Corps.
 Paul Evert to be first lieutenant, Air Service.
 Paul Americus Harris to be first lieutenant, Coast Artillery Corps.
 Jefferson Cleveland Campbell to be first lieutenant, Field Artillery.
 Hugh Franklin Conrey to be first lieutenant, Field Artillery.
 Edwin Clark Maling to be first lieutenant, Infantry.
 Richard Head Trippe to be first lieutenant, Infantry.
 O. D. Wells to be first lieutenant, Infantry.
 Frank Celestine Meade to be first lieutenant, Coast Artillery Corps.
 Paul Wallace Cole to be first lieutenant, Coast Artillery Corps.
 Everett Samuel Prouty to be first lieutenant, Infantry.
 Charles Speir Lawrence to be first lieutenant, Infantry.
 John Corwin Shaw to be first lieutenant, Infantry.
 William Cadwalader Price to be first lieutenant, Field Artillery.
 Clarence Matthew Tomlinson to be first lieutenant, Infantry.
 Eugene Reedy Guild to be first lieutenant, Coast Artillery Corps.
 Julian Buckner Haddon to be first lieutenant, Air Service.
 Claude Delorum Collins to be first lieutenant, Infantry.
 William Hugh Burns to be first lieutenant, Coast Artillery Corps.
 William Eldridge Moore to be first lieutenant, Quartermaster Corps.
 Clem Oliver Gunn to be first lieutenant, Coast Artillery Corps.
 Wilber Russell Ellis to be first lieutenant, Coast Artillery Corps.
 Donald Weldon Brann to be first lieutenant, Infantry.
 George Bernhard Anderson to be first lieutenant, Coast Artillery.
 Walter John Wolfe to be first lieutenant, Coast Artillery.
 Roswell Emory Round to be first lieutenant, Infantry.
 Clyde Harrison Lamb to be first lieutenant, Infantry.
 Fred Ross Cowan to be first lieutenant, Quartermaster Corps.
 Lester Frank Watson to be first lieutenant, Quartermaster Corps.
 William Edwin Vecqueray to be first lieutenant, Quartermaster Corps.
 Robert Lawrence Eichelberger to be major, Adjutant General's Department.
 Joseph Nicholas Dalton to be captain, Adjutant General's Department.
 Kenneth Burman Bush to be captain, Adjutant General's Department.
 Adam Richmond to be captain, Judge Advocate General's Department.
 William Jones Kendrick to be lieutenant colonel, Finance Department.
 Cherubusco Newton, jr., to be major, Finance Department.
 Edward Dworak to be major, Finance Department.
 Theodore Morrison Clarence Osborne to be second lieutenant, Corps of Engineers.
 Ralph Arnold Tudor to be second lieutenant, Corps of Engineers.
 Herbert Davidson to be second lieutenant, Corps of Engineers.
 Edward Aloysius Murphy to be captain, Ordnance Department.
 Leo Joseph Dillon to be captain, Ordnance Department.
 Grosvenor Liebenau Workins to be first lieutenant, Ordnance Department.
 Galen Magnus Taylor to be first lieutenant, Ordnance Department.
 Myron Leedy to be second lieutenant, Ordnance Department.
 Joseph James Grace to be major, Signal Corps.
 Laurence Watts to be major, Signal Corps.
 Lester Joslyn Harris to be captain, Signal Corps.
 Benjamin Stern to be second lieutenant, Signal Corps.
 Maurice Benjamin Willett to be major, Chemical Warfare Service.
 Maurice Eugene Barker to be captain, Chemical Warfare Service.
 Norman Drysdale Gillet to be first lieutenant, Chemical Warfare Service.
 Joseph Sutherland Herron to be colonel, Field Artillery.
 Arthur Dryhurst Budd to be major, Field Artillery.

Claude Alfred White to be captain, Field Artillery.
 David Loring, jr., to be captain, Field Artillery.
 Garth Bly Haddock to be captain, Field Artillery.
 Mark Milton Potter to be first lieutenant, Field Artillery.
 Auston Monroe Wilson, jr., to be first lieutenant, Field Artillery.
 Charles Aloysius Hennessey to be second lieutenant, Field Artillery.
 George Phillips Privett to be second lieutenant, Field Artillery.
 Stephen Stanley Koszewski to be second lieutenant, Field Artillery.
 Peter Sather, jr., to be second lieutenant, Field Artillery.
 Frank Faron Carpenter, jr., to be second lieutenant, Field Artillery.
 Adolphe St. Armand Fairbanks to be captain, Coast Artillery Corps.
 John Sanderson to be first lieutenant, Coast Artillery Corps.
 Charles Wesley Gettys to be second lieutenant, Coast Artillery Corps.
 Morris Kelly Voedisch to be second lieutenant, Coast Artillery Corps.
 Guy Haines Stubbs to be second lieutenant, Coast Artillery Corps.
 Ben Early Cordell to be second lieutenant, Coast Artillery Corps.
 Russell Creamer Langdon to be colonel, Infantry.
 Norman Daniel Cota to be captain, Infantry.
 Richard Garner Thomas, jr., to be second lieutenant, Infantry.
 Willis Henry Hale to be captain, Air Service.
 Howard Houghton Bailly to be lieutenant colonel, Medical Corps.
 Paul Lamar Freeman to be lieutenant colonel, Medical Corps.
 Kenneth Earl Buffin to be captain, Veterinary Corps.
 Robert Payne McComb to be captain, Veterinary Corps.
 William Roy Wolfe to be captain, Veterinary Corps.
 Chauncey Edmund Cook to be captain, Veterinary Corps.
 Robert Patrick Kunnecke to be captain, Veterinary Corps.
 Clifford Eugene Pickering to be captain, Veterinary Corps.
 Stanley Clifford Smock to be captain, Veterinary Corps.
 Howard Newell Beeman to be captain, Veterinary Corps.
 Howard Mayo Savage to be captain, Veterinary Corps.
 Burlin Chase Bridges to be captain, Veterinary Corps.
 Mott Ramsey to be captain, Veterinary Corps.
 Josiah Wistar Worthington to be captain, Veterinary Corps.
 Fred Chester Waters to be captain, Veterinary Corps.
 Homer Johnson to be captain, Veterinary Corps.
 Joseph Fenton Crosby to be captain, Veterinary Corps.
 Raymond Irvin Lovell to be captain, Veterinary Corps.
 Ralph Brown Stewart to be captain, Veterinary Corps.
 George Jacob Rife to be captain, Veterinary Corps.
 Maximilian Siereweld, jr., to be captain, Veterinary Corps.
 Charles Mausur Cowherd to be captain, Veterinary Corps.
 John Knox McConeghy to be captain, Veterinary Corps.
 Sawyer Adelbert Grover to be captain, Veterinary Corps.
 Charles Sears Williams to be captain, Veterinary Corps.
 Oness Harry Dixon, jr., to be captain, Veterinary Corps.
 John Wesley Miner to be captain, Veterinary Corps.
 Seth C. Dildine to be captain, Veterinary Corps.
 Fred W. Shinn to be captain, Veterinary Corps.
 Philip Henry Riedel to be captain, Veterinary Corps.
 Irby Rheuel Pollard to be captain, Veterinary Corps.
 Frank Benjamin Steinkolk to be captain, Veterinary Corps.
 Francois Hue Karl Reynolds to be captain, Veterinary Corps.
 Raymond Randall to be captain, Veterinary Corps.
 Frank Caldwell Hershberger to be captain, Veterinary Corps.
 Gerald Woodward Fitzgerald to be captain, Veterinary Corps.
 Charles Brenton Dunphy to be captain, Veterinary Corps.
 Harry Edward Van Tuyl to be captain, Veterinary Corps.
 Louis Lathrop Shook to be captain, Veterinary Corps.
 Daniel Henry Mallan to be captain, Veterinary Corps.
 Louis Goldman Weisman to be captain, Veterinary Corps.
 Everett Cooper Conant to be captain, Veterinary Corps.
 James Alexander McCallam to be captain, Veterinary Corps.
 Harry John Juzek to be captain, Veterinary Corps.
 William Henry Dean to be captain, Veterinary Corps.
 Solon B. Renshaw to be captain, Veterinary Corps.
 Frank H. Woodruff to be captain, Veterinary Corps.
 Will Charles Griffin to be captain, Veterinary Corps.
 Lloyd Clifford Ewen to be captain, Veterinary Corps.
 Charles Oliver Grace to be captain, Veterinary Corps.
 Edward Michael Curley to be captain, Veterinary Corps.
 James Russell Sperry to be captain, Veterinary Corps.
 Floyd Chauncey Sager to be captain, Veterinary Corps.

Henry Emil Hess to be captain, Veterinary Corps.
 Vincent Brown Wright to be captain, Veterinary Corps.
 Paul Roberts King to be captain, Veterinary Corps.
 Forest Lee Holycross to be captain, Veterinary Corps.
 Daniel Sommer Robertson to be captain, Veterinary Corps.
 Earl Floyd Long to be captain, Veterinary Corps.
 Joseph Hiram Dornblaser to be captain, Veterinary Corps.
 George Leslie Caldwell to be captain, Veterinary Corps.
 Jacob Landes Hartman to be captain, Veterinary Corps.
 John Harold Kintner to be captain, Veterinary Corps.
 Arthur Dunlap Martin to be captain, Veterinary Corps.
 Samuel George Kleismeier to be captain, Veterinary Corps.
 Peter Thomas Carpenter to be captain, Veterinary Corps.
 Stanley Alling Clark to be first lieutenant, Medical Administrative Corps.
 Francis Moore to be first lieutenant, Medical Administrative Corps.
 Max Verne Talbot to be first lieutenant, Medical Administrative Corps.
 Alexander Joseph Doray to be first lieutenant, Medical Administrative Corps.
 Harvey Israel Rice to be first lieutenant, Medical Administrative Corps.
 Joseph Gail Garrison to be chaplain with the rank of captain.
 Faye Arnold Moon to be chaplain with the rank of captain.
 Ivan Loveridge Bennett to be chaplain with the rank of captain.
 Monroe Starkey Caver to be chaplain with the rank of captain.
 John Knox Bodel to be chaplain with the rank of captain.
 William Roy Bradley to be chaplain with the rank of captain.
 James Lloyd McBride to be chaplain with the rank of captain.
 Thomas Lawrence McKenna to be chaplain with the rank of captain.
 Mylon Dickinson Merchant to be chaplain with the rank of captain.
 Maurice William Reynolds to be chaplain with the rank of captain.
 Henry Russell Westcott, Jr., to be chaplain with the rank of captain.
 Albert Floyd Vaughan to be chaplain with the rank of captain.
 Edgar Nathaniel Thorn to be chaplain with the rank of captain.
 Jodie Gibson Stewart to be chaplain with the rank of captain.
 Gynther Storaasli to be chaplain with the rank of captain.
 Commodore Robert Watkins to be chaplain with the rank of captain.
 Ivan Gochnauer Martin to be chaplain with the rank of captain.
 Leon Lloyd Gardner to be first lieutenant, Medical Officers' Reserve Corps.
 Henry Fremont Lueking to be first lieutenant, Medical Officers' Reserve Corps.
 Prentice Lauri Moore to be first lieutenant, Medical Officers' Reserve Corps.
 John Marshall Gaines to be first lieutenant, Medical Officers' Reserve Corps.
 William Charles Furr to be first lieutenant, Medical Officers' Reserve Corps.
 Ray Hamilton Skaggs to be first lieutenant, Medical Officers' Reserve Corps.
 Herbert Morris Cox to be second lieutenant, Veterinary Officers' Reserve Corps.
 Laurence Robert Bower to be second lieutenant, Veterinary Officers' Reserve Corps.
 John Harold McCann to be chaplain with the rank of first lieutenant.
 Edward Freeman to be first lieutenant, Philippine Scouts.
 James William Smith to be first lieutenant, Philippine Scouts.
 Charles White Berry to be major general, Officers' Reserve Corps.
 Milton Joseph Foreman to be major general, Officers' Reserve Corps.
 Quincy Adams Gillmore to be major general, Officers' Reserve Corps.
 Benson Walker Hough to be major general, Officers' Reserve Corps.

John Augustus Hulen to be major general, Officers' Reserve Corps.
 Baird Hockett Markham to be major general, Officers' Reserve Corps.
 Mathew Adrian Tinley to be major general, Officers' Reserve Corps.
 Robert Henry Tyndall to be major general, Officers' Reserve Corps.
 Clarence Brettun Blethen to be brigadier general, Officers' Reserve Corps.
 Ellerbe Winn Carter to be brigadier general, Officers' Reserve Corps.
 Abel Davis to be brigadier general, Officers' Reserve Corps.
 William Graham Everson to be brigadier general, Officers' Reserve Corps.
 Alfred Franklin Foote to be brigadier general, Officers' Reserve Corps.
 Frank David Henderson to be brigadier general, Officers' Reserve Corps.
 Henry Hutchings to be brigadier general, Officers' Reserve Corps.
 Robert Bruce McCoy to be brigadier general, Officers' Reserve Corps.
 Charles E. McPherrren to be brigadier general, Officers' Reserve Corps.
 John Rea McQuigg to be brigadier general, Officers' Reserve Corps.
 Edward Martin to be brigadier general, Officers' Reserve Corps.
 Churchill Brown Mehard to be brigadier general, Officers' Reserve Corps.
 Paul Lincoln Mitchell to be brigadier general, Officers' Reserve Corps.
 Alva Joseph Niles to be brigadier general, Officers' Reserve Corps.
 Morris Benham Payne to be brigadier general, Officers' Reserve Corps.
 Winfield Scott Price to be brigadier general, Officers' Reserve Corps.
 George Perry Rains to be brigadier general, Officers' Reserve Corps.
 William August Raupp to be brigadier general, Officers' Reserve Corps.
 Willie McDaniel Rowan to be brigadier general, Officers' Reserve Corps.
 Louis Arthur Toombs to be brigadier general, Officers' Reserve Corps.
 Robert Jesse Travis to be brigadier general, Officers' Reserve Corps.
 John Penman Wood to be brigadier general, Officers' Reserve Corps.
 George Herbert Harries to be major general, Auxiliary Section.
 John Miller Turpin Finney to be brigadier general, Medical Section.
 John Taliaferro Thompson to be brigadier general, Ordnance Section.

POSTMASTERS

CONNECTICUT

George W. Fairgrieve, Bantam.
 Frank S. Merrill, Bristol.
 William J. Beehler, Brookfield.
 Robert DeF. Bristol, Gullford.
 George L. Rockwell, Ridgefield.

DELAWARE

Victor E. Simpler, Selbyville.

GEORGIA

George E. Youmans, Adrian.
 Mazie Brett, Alamo.
 John B. Crawford, Cairo.
 Henry M. Miller, Colquitt.
 John H. Boone, Hazelhurst.
 Anna C. Williams, Lumpkin.
 Ben H. McLarty, Soperton.
 Earnest E. Slack, Tifton.
 Maude D. Thompson, Ty Ty.

IDAHO

William R. Ogle, Glens Ferry.
 Flossie G. Hill, Gooding.
 Leonard B. Wehr, Star.

Albert T. Moulton, Victor.
 Marie E. Roos, Weippe.
 Arthur N. MacQuivey, Wendell.

ILLINOIS

Herman H. Schultz, Bartlett.
 Rufus D. Benton, Carthage.
 Mary H. Hrdlicka, Cary Station.
 Charles D. Ragsdale, De Soto.
 Laurence E. Brookfelt, Dolton.
 Frederick Rugen, Glenview.
 John S. Redshaw, Granville.

HOUSE OF REPRESENTATIVES

WEDNESDAY, December 10, 1924

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Thou eternal God, blessed is everyone who feareth Thee and walketh in Thy ways. May we offer Thee the most acceptable gift, which is a humble and a thankful heart. Thou alone art the source and inspiration of our highest hopes, our purest longings, and our best aspirations. Enrich our minds with knowledge and clear understanding and bless our hearts with grace divine. Thus we shall be prepared to pursue with the worthiest diligence the duties that are calling us. Thou hast bestowed upon us a marvelous dignity by creating us in Thy image. The Lord help us and direct us that we may never bring any reproach upon our birth-gift. By faithful service, by wholesome example, by purity of heart and clearness of mind may we hallow Thy name to-day. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, one of its clerks, announced that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 1343) entitled "An act to authorize the widening of Fourth Street south of Cedar Street NW., in the District of Columbia, and for other purposes."

The message also announced that the President pro tempore of the Senate, pursuant to the provisions of Senate Joint Resolution No. 85, had appointed the following Senators as members on the part of the Senate of the commission to arrange for the celebration of the two hundredth anniversary of the birth of George Washington: Mr. FESS, Mr. GLASS, Mr. SPENCER, and Mr. BAYARD.

The message also announced that the Senate had concurred in the following concurrent resolution:

House Concurrent Resolution 32

Resolved by the House of Representatives (the Senate concurring), That when the two Houses adjourn on Saturday, December 20, 1924, they stand adjourned until 12 o'clock meridian Monday, December 29, 1924.

DECLARATORY JUDGMENTS

Mr. MOORES of Indiana. Mr. Speaker, I hold in my hand a letter from Everett P. Wheeler, one of the most eminent lawyers in the country, a distinguished statesman at one time appointed to the Supreme Court, submitting an argument in favor of H. R. 5199, the Graham bill for declaratory judgments, one of the most important measures before the House, and I ask unanimous consent to extend my remarks in the Record by including therein this argument from the letter of Mr. Wheeler.

The SPEAKER. The gentleman from Indiana asks unanimous consent to extend his remarks in the Record in the manner indicated. Is there objection?

There was no objection.

Mr. MOORES of Indiana. Mr. Speaker, under leave granted to extend my remarks I insert an argument on legislation on declaratory judgments, as follows:

(H. R. 5194)

STATE LEGISLATION ON DECLARATORY JUDGMENTS

(By Prof. Edwin M. Borchard, Yale University School of Law)

Since the adoption in 1922 by the commissioners on uniform State laws of the uniform declaratory judgments act, this particular reform in the administration of justice has made rapid progress. The declaratory judgment, it will be recalled, enables parties who are uncertain of their legal rights and are peculiarly or otherwise prejudiced by actual or potential adverse claims by others to invoke the aid of the courts for the determination of their rights before an injury has been done. The adverse claimant is cited and the issue is determined if the court believes that such adjudication performs a useful, practical function in the settlement of an actual or potential controversy. As an instrument of preventive justice the declaratory judgment thus differs in theory from the curative remedial judgment of the courts of common law which were deemed incapable of acting until an injury had occurred; and while courts of equity have had power by injunction to prevent an immediately threatened injury and other measures of equitable relief in specific types of cases have been possible, there has been no method heretofore of having a contract or other instrument, for example, construed before breach and before damage has accrued by one party or the other acting on his own interpretation. The social advantage of

deciding differences of legal opinion and removing uncertainty and insecurity from legal relations before they have ripened into a full-grown hostile litigation will be readily appreciated. (Sunderland, A modern evolution in remedial rights, 16 Mich. L. Rev. 60 (1917); Borchard, The declaratory judgment—a needed procedural reform, 28 Yale L. Jour. 1, 105 (1918); Kerr, Declaration of rights without consequential relief, 53 Amer. L. Rev. 161 (1919); Vinje, Declaratory relief, 4 Marquette L. Rev. 106 (1920); Schoonmaker, Declaratory judgments, 5 Minn. L. Rev. 32 (1920); Dodd, Progress of preventive justice, 6 Amer. Bar Assn. Jour. 151 (1920); Gates, Declaratory relief, 1920 proceedings of Tennessee Bar Association, 41; Cooper, Locking the stable door before the horse is stolen, 16 Ill. L. Rev. 436 (1922); Gordon, The law of declaratory judgments and its progress, 9 Va. L. Rev. 169 (1923); Torrey, The declaratory judgment, 8 Iowa Law Bulletin, 81 (1923).) The important social service thus obtainable from the courts has recently induced the legislatures of several of the States to confer upon the courts power to render declaratory judgments.

Although the practice has been known in England since 1852, and on the European Continent and in Scotland for hundreds of years prior thereto, it was not until 1915 that our States began to take any serious interest in this procedural reform. (A few traces of conscious adoption of this form of relief may be found in the California practice act, section 527, of 1850, enabling adverse claims to money or property to be determined. (See King v. Hall, 1885, 5 Cal. 83, and in Rhode Island Acts of 1876, ch. 563, sec. 17, enabling declarations of right to be made by the courts.) But when this was construed to require the existence of a possibility of obtaining coercive relief (Hanley v. Wetmore, 1886, 15 R. I. 386; 6 Atl. 777), it practically nullified the declaratory relief. Courts of equity in some States have also had statutory power to construe wills; and in various cases, such as the removal of clouds from title, courts of equity had unwittingly, in a restricted class of cases, been rendering declaratory judgments. The class of cases under the new statutes is made practically unlimited.) In 1915 New Jersey, in its practice act (ch. 116, sec. 7) adopted a provision enabling the courts, upon the request of an interested party, to construe "a deed, will, or other written instrument" and declare the rights of the parties thereunder. (The principal cases that have arisen under this act are In re Ungaro's Will (1917), 88 N. J. Eq. 25, 102 Atl. 244; Renwick v. Hay (1919), 90 N. J. Eq. 148, 106 Atl. 547; Town of Kearny v. Mayor of Bayonne (1919), 90 N. J. Eq. 499, 108 Atl. 121, 29 Yale L. Jour. 545.) This gave only a limited scope to the power to render declaratory judgments in accordance with the English Rules of Court, Order LIV a. of 1893. In this restricted form the declaratory relief was adopted by Florida in 1919. (Florida, Laws 1919, ch. 7857 (No. 75). See 20 Columbia L. Rev. 106.)

In Connecticut there has been since 1915 a statute enabling parties claiming adverse interests in real or personal property to have the title tried and settled. (Conn., Public Acts 1915, ch. 174, sec. 1, 2 Gen. Stat. 1918, sec. 5113. Ackerman v. Union & New Haven Trust Co. (1915), 90 Conn. 63, 96 Atl. 149 (1917); 91 Conn. 500, 506, 100 Atl. 22.) There was therefore some justification for believing that a widening of the power to render declaratory judgments would be favorably entertained.

In 1919, after several writers in periodical articles and committees of State bar associations had advocated the reform, the movement acquired vigor and momentum. In that year, in addition to Florida, Michigan (Michigan, Pub. Acts 1919, No. 150, p. 278), and Wisconsin (Wisconsin, Laws 1919, ch. 242, sec. 2087 m. p. 253. See Mr. Justice Vinje in 4 Marquette L. Nov. 106), empowered their courts to render declaratory judgments without limitation as to types of cases. But in Michigan and Wisconsin the statutes have met an unhappy and undesired fate. The Michigan Supreme Court, in a decision which, it is believed, has been uniformly condemned by every reviewer of the case, held the Michigan act unconstitutional on the alleged ground that it conferred on the courts nonjudicial power. (Anway v. Grand Rapids Ry. Co. (1920), 211 Mich. 592; 179 NW. 350; 12 A. L. R. 20, 62. See comments in 19 Mich. L. Rev. 86; 30 Yale L. Jour. 161; 21 Columbia L. Rev. 168; 4 Illinois L. Quar. 126; 6 Amer. Bar Assn. J. 145; 7 Ibid. 141; 7 Cornell L. Q. 255; and the following articles: Rice in 28 West Va., West Va. L. Quar. 1, and Schoonmaker in 5 Minn. L. Rev. 172.) As so often happens, the facts of the first case are almost vital to the issue of constitutionality of a statute, and the facts in the Anway case were most unfortunate. A statute in Michigan provided that no public-service company should require any employee to work for it more than six days a week. The plaintiff, an employee, brought an action for a declaration against the street railway company to the effect that under the statute he had the privilege to work more than six days a week, if he chose. Both parties had the same interest, and there was no controversy, a sufficient reason for declining, in the admitted discretion of the court, to render a declaratory judgment, but no reason for holding such power itself unconstitutional. A labor union intervened. The majority of the court, on its own initiative, confusing the declaratory judgment with an advisory opinion and a moot case, from which it

differs fundamentally, and invoking other irrelevant prejudices, held the act unconstitutional, against a dissenting opinion which clearly pointed out the majority's error. The decision, however erroneous, seems for the present to have effectually blocked the movement in Michigan.

But perhaps equally surprising is the recent action of Wisconsin (Wis., acts 1923, ch. 440; (1924) 2 Wis. L. Rev. 376. In one interesting case in Wisconsin the constitutionality of the act seems to have been assumed, the court holding that members of a fraternal society who under an existing policy would obtain a certain pension at the age of 70 had no such vested interest as could not be modified by a change in the by-laws. *United Order of Foresters v. Miller* (1922) 178 Wis. 299, 190 N. W. 198. The Wisconsin Supreme Court expressed no doubt on the question of constitutionality. Judge Rodenbeck in *New York, Board of Education v. Van Zandt* (1921), 119 Misc. 124, said that the constitutionality of "such a procedure is not open to question." The same conclusion has been reached by the Connecticut Supreme Court, *Braman v. Babcock* (1923), 98 Conn. 549, 120 Atl. 150, and by the California Supreme Court, *Blakeslee v. Wilson* (1923), 213 Pac. 495 in repealing its statute of 1919, on the asserted initiative of the Attorney General, on the alleged ground that he feared the act, in view of the Michigan decision of 1920, to be unconstitutional, and on the further supposed ground that the act gave too much power to the courts. It is hard to give serious consideration to such a misconceived objection.

In 1920 New York adopted the provision for declaratory judgments as section 473 of its new civil practice act. It is a short form, giving the highest court of original jurisdiction the broadest power, without limitation as to subject matter. It was felt that experience, as in England, would work out such limitations as might be necessary. The section, which is an adaptation of the broad English Order XXV of 1888, reads:

"The Supreme Court shall have power in any action or proceeding to declare rights and other legal relations on request for such declaration, whether or not further relief is or could be claimed, and such declaration shall have the force of a final judgment. Such provisions shall be made by rules as may be necessary and proper to carry into effect the provisions of this section."

Rules 210 to 214 were then drafted, by virtue of which the practice is assimilated to that prevailing in other actions, the form of prayer for relief is indicated, the court's duty to issue the declaration as well as the assessment of costs is made discretionary, and submission of disputed facts to a jury is provided for. Under the New York act several important cases have been brought. (Declaration sought that a "news reel" was not subject to the censorship of the ordinary exhibition; held, that it was. *Pathé Exchange v. Cobb* (1922), 202 App. Div. 450, 236 N. Y. 37. Action for a declaration by the board of education against the board of estimate of Rochester that the tax limit of 2 per cent on assessed valuation for "city purposes" was exclusive and not inclusive of school funds; held, for defendant. *Board of Education v. Van Zandt* (1922), 119 Misc. 124, 204 App. Div. 856, aff. 234 N. Y. 644, 23 Columbia L. Rev. 69. Action for a declaration by a street-railway company against the city of New York that the plaintiff's construction of a franchise contract was correct; so held. The action was brought just before expiration of the renewal period, whereby breach and irreparable damage was avoided. *Manhattan Bridge Three Cent Line v. City of New York* (1922), 204 App. Div. 89, 236 N. Y. 57. Action for a declaration that under a contract of sale of a newspaper having political advertising patronage, reserving bills payable to the plaintiff seller and assigning political patronage to the buyer, an accrued bill for past advertising in hands of State comptroller was "bills payable" and not "political patronage"; so held. *Durant v. Whedon* (1922), 201 App. Div. 196. Action by Comptroller Craig against sinking-fund commissioners of New York City asking for a declaration that a city ordinance and the city charter disabled the commissioners from passing any binding resolution (in this case for the sale of city buildings to provide land for schools) without the comptroller's presence; so held. (Appellate Division, 1st Dept., January, 1924; *New York Law Journal*, February 23, 1924.) The court in this case said: "It would be difficult to find a more appropriate case for the application of the law permitting declaratory judgments.")

In the sessions of the 1921 legislatures three States and Hawaii adopted the wide form of declaratory judgment procedure, namely, Connecticut, Kansas, and California. (Connecticut, Acts 1921, ch. 258, Rules of Practice, 62-66; Kansas, Acts 1921, ch. 168; California, Stat. 1921, ch. 463, Code of Civil Procedure, sec. 1062; Hawaii, Laws 1921, ch. 102.) In the meantime the Commissioners on Uniform State Laws had begun to study a draft of a uniform act, which they finally approved in 1922.

The Connecticut act closely follows the New York short form and gives to the courts supplementary rule-making power. The Connecticut Supreme Court, already accustomed to a limited type of declaratory action, has unanimously and with strong approval sus-

tained the more extensive power conferred by the 1921 act in several interesting actions for declarations. (*Braman v. Babcock* (1923) 98 Conn. 549, 120 Atl. 150, in which plaintiff asked for a declaration that he was the person mentioned as legatee in a certain will; while sustaining their general power to issue declarations, the court declined in this case because the land affected was located in Rhode Island. *Joy Co. v. New Amsterdam Casualty Co.* (1923), 98 Conn. 794, 120 Atl. 684, in which plaintiff, a contractor, whose rights against a surety company had to be invoked within a limited time and depended upon the liability of his subcontractor to certain lenders, sought a declaration as to the amount due the lenders; the declaration was issued. *Lehmaler v. Bedford* (1923), 99 Conn. 468, 121 Atl. 816, in which a certain life director of a hospital association brought an action against the elected directors for a construction of the articles of association and a declaration that the life directors were privileged to vote in all matters; so held.)

The Kansas act of 1921 closely follows the Michigan act of 1919, as does the act of Hawaii. Its major difference lies in the introduction of the words "in cases of actual controversy," the absence of which seemed to be relied upon by the Michigan court in the *Anway* case to justify their holding the Michigan act unconstitutional. As already observed, such a conclusion was entirely unnecessary, for nobody thought of conferring upon the courts power to decide imaginary, academic, or moot cases, and it was gratuitous to assume that the Michigan act required the court to do so. Under their discretion, as have courts of equity from time immemorial, they would and should have refused to decide such cases without drawing the altogether unfounded inference that the Michigan act imposed any such alleged duty upon them. Nevertheless, to make assurance doubly sure, the Kansas act sought to avoid any such pitfall, though invented for the occasion and fathered by the prejudice of the Michigan court, and inserted the words "in cases of actual controversy." Relying in part upon these words, though actually discrediting the Michigan decision, the Kansas Supreme Court has held the Kansas act constitutional. (*State ex rel. Hopkins v. Grove* (1921), 100 Kans. 619, 201 Pac. 83, 10 A. L. B. 1124, in which the plaintiff, the State, sought a declaration that the defendant, employed by the Missouri Pacific Railroad, was not eligible to the office of city commissioner, under a State statute, because his employer held a franchise from the city; so held. *State v. Wooster* (1922), 111 Kans. 830, 208 Pac. 656 (declaring the powers of a State board of education); *State v. Kansas City* (1922), 110 Kans. 603, 204 Pac. 690, 20 Mich. L. Rev. 775, declaring the power of a city to issue bonds of a certain type. See the tribute to the declaratory judgment rendered in this case by Burch J.) It is believed that the words "in cases of actual controversy" are surplusage and unnecessary, yet by the fact that an issue has been raised upon them, it may induce certain courts, possibly hostile to the new procedure to give too narrow an interpretation to the word "actual," and thereby deny relief in many cases of removal of clouds from rights and other legal relations, where it should be granted. The issue thus raised persuaded the American Bar Association Committee on Jurisprudence to insert the words in question in the proposed Federal act, now pending before the House and Senate Committees on the Judiciary, for which action they claim to derive additional support from the case of *Muskat v. United States* (1911), 219 U. S. 346. The precaution is not believed to be necessary except to discount possible prejudices.

The California act does not follow closely either the short act of New York or the Kansas act, but constitutes an intermediate form, not essentially different in substance from the Kansas act. (California legislation of 1921, providing for declaratory relief, by Maurice W. Harrison (1921), 9 California L. Rev. 359.) Though first held unconstitutional in an inferior court in Los Angeles; which relied upon the Michigan decision and seemed unaware of the then decided *Grove* case in Kansas (*Newberry v. Newberry*, Los Angeles Superior Court, commented upon adversely in 10 California L. Rev. 158), the Supreme Court of California in a convincing decision has recently held the act unconstitutional. (*Blakeslee v. Wilson* (1923), 190 Calif. 479, 213 Pac. 495, 4 Iowa Law Bull. 272, declaring the plaintiff's rights under a contract of employment as attorney of defendant.)

In 1922 the uniform declaratory judgments act was finally adopted by the commissioners on uniform State laws. That action gave considerable impetus to the new movement. The act contains 16 sections, of which 6 are procedural in character. This is due to the fact that many of our States do not yet confer upon their courts any rule-making authority; hence the necessity of incorporating procedural rules in the body of the legislation. The first section confers on the courts the broad powers of the English Order XXV, 1888, and the New York act, and the second section the power to construe written instruments, including statutes, etc., following the English Order LIV a, 1803, and the New Jersey and Florida restricted statutes. Sections 3 and 4 prescribe further details of types of cases in which declarations may issue, but section 5 points out that the enumeration is not exclusive. By section 6 and following, the court's power is expressly made discretionary, the power of review is

preserved, supplemental relief is provided for, a jury trial of issues of fact is reserved, and costs and parties to the action, and certain questions of statutory construction are dealt with. The uniform act omits the phrase "in cases of actual controversy." Where procedure differs so greatly from State to State it was not easy to draft a procedural statute which could accommodate itself to the divergent practice of the different States.

In 1922 Kentucky and Virginia and South Carolina were added to the States which have made provision for declaratory judgments. (Kentucky, Acts 1922, ch. 83; Virginia, Acts 1922, ch. 517; South Carolina, Statutes at Large 1922, ch. 542. In *Proctor v. Avondale Heights Co.* (1923 Ky.; 255 S. W. 81) the Kentucky court construed the act in an action by a land company, asserting their power and privilege to convey to a water company certain lots reserved among others for parks.) Kentucky, using the uniform act and the Kansas act as models, redrafted a statute of its own, and Virginia, with the addition of two sections relating to local venue, adopted practically the Kansas act.

In 1923 the effect of the proposal of a uniform act became apparent. Five States in their 1923 sessions adopted the uniform act—Pennsylvania, Tennessee, Colorado, Wyoming, and North Dakota. (Pennsylvania, Laws 1923, ch. 321; Tennessee, Acts 1923, ch. 29; Colorado, Acts 1923, ch. 98; Wyoming, Acts 1923, ch. 50; North Dakota, Acts 1923, ch. 237.) The act has recently been held constitutional in a unanimous and convincing opinion of the Tennessee Supreme Court. (*Miller v. Miller* (1923 Tenn.; 261 S. W. 965). See (1924) 34 Yale Law Journal, 109.) Bills providing for the declaratory judgments have passed one house of the legislature in several States and have been introduced in many more. It is hoped that the Federal bill, which was first introduced in Congress in 1919, and which with minor changes has since received the active support of the American Bar Association, will soon be enacted by Congress. It is believed that with the issue of constitutionality probably finally removed from doubt and with the continued use of this relief in the States which have already made provision therefor that statutes will soon be enacted in most of the other jurisdictions of the country and that the public may look forward hopefully to a more simple and efficient method of adjusting many conflicting interests and to an enlarged social service from its courts.

CALENDAR WEDNESDAY

The SPEAKER. This is Calendar Wednesday, and the Clerk will call the committees.

THE NAVAL SERVICE

Mr. BUTLER (when the Committee on Naval Affairs was called). Mr. Speaker, by direction of the Committee on Naval Affairs, I call up the bill H. R. 2688, providing for sundry matters affecting the Naval Service, and for other purposes.

The SPEAKER. The gentleman from Pennsylvania calls up the bill H. R. 2688. This bill is on the Union Calendar. The House will automatically resolve itself into the Committee of the Whole House on the state of the Union, and the gentleman from Ohio [Mr. BEGG] will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 2688, with Mr. BEGG in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill, which the Clerk will report.

The Clerk reported the title of the bill.

Mr. BUTLER. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

Mr. BLANTON. I shall not object, with the understanding that there shall be given liberality of debate on certain items to which there is serious objection.

Mr. BUTLER. Yes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BUTLER. We will have no trouble about agreeing with my friend on that. The rule provides that there may be one hour of debate upon either side. There is no request upon our side for any discussion, and I ask my colleague from Georgia whether there is any on his?

Mr. VINSON of Georgia. Mr. Chairman, there is no request over here for any time that I know of. In any event, I am in favor of the bill, and I would not be entitled to control the time.

Mr. WINGO. If there is an hour going to waste anywhere, I shall be glad to take it.

Mr. BLANTON. Mr. Chairman, there are two items in this bill to which I have serious objection, and I want a little time on them. Of course, if the gentleman from Arkansas desires to control the time he outranks me and would be entitled to it.

Mr. WINGO. Oh, I may be pretty rank, but I am not as rank as the gentleman from Texas.

Mr. BLANTON. I would ask for recognition if there is no member of the committee who is opposed to the bill, in case the gentleman from Arkansas does not want recognition.

Mr. VINSON of Georgia. I submit the gentleman is not entitled to recognition unless he is against the bill in its entirety.

Mr. BLANTON. I am against the bill, and if it remains in the same shape it is in now I shall vote against it.

The CHAIRMAN. Under the rules of the House the gentleman from Pennsylvania [Mr. BUTLER] is recognized for one hour and then if there is no gentleman on the committee opposed to the bill, and there is some other gentleman who is opposed to the bill, that gentleman will be recognized for one hour.

Mr. BUTLER. Mr. Chairman, inasmuch as this House practically without division has passed this bill just as it is, and in order that we can submit it quickly I reserve the remainder of my time.

Mr. VINSON of Georgia. Mr. Chairman, I ask for recognition after the gentleman from Pennsylvania has consumed his hour.

Mr. WINGO. He has reserved his time.

Mr. VINSON of Georgia. I reserve the hour.

Mr. BLANTON. I yield my claim for recognition to the gentleman from Georgia [Mr. VINSON].

The CHAIRMAN. Is there any gentleman opposed to the bill demanding recognition; if not, the Chair will recognize the gentleman from Georgia to control the time in opposition to the bill.

Mr. VINSON of Georgia. Mr. Chairman, I reserve my time and yield to the gentleman from Texas [Mr. BLANTON] 20 minutes.

Mr. BLANTON. Mr. Chairman and gentlemen, I realize that this bill in its present form substantially has been heretofore passed by the House, but that does not keep me from continuing the fight I have made against it heretofore in some particulars. There are several provisions in this bill that are unobjectionable, I guess, practically to all the Members, and should be passed into law, but because of that fact is no reason why there should be objectionable features incorporated in this blanket bill, and passed along with the good provisions.

There is a provision in this bill which takes away from the Congress the right to pass upon claims against the Government that could involve huge sums of money, running up into the hundreds of thousands of dollars, and even into the millions. I am not yet ready to assign to others the duty which the law has placed upon me as one of the 435 Members of this House to pass upon claims that draw so heavily upon the people's Treasury when the money is to come out of the pockets of the taxpayers.

Mr. BRITTEN. Will the gentleman yield? Does the gentleman object to yielding at this time?

Mr. BLANTON. Certainly not; however, the gentleman had a whole hour at his disposal and did not make use of any of it to explain the bill.

Mr. BRITTEN. I would like to call my friend's attention—

Mr. BLANTON. Whenever the gentleman wants me to do something, knowing a great deal about the gentleman, I never oppose him either in the gymnasium or elsewhere. I yield.

Mr. BRITTEN. We have always been very good friends. My friend was referring to the contractors' relief bill which in its present form has been twice passed by the House which merely authorizes the Secretary of the Navy to make investigation and report to Congress through the Bureau of the Budget, the estimate of loss or damage, nothing else.

Mr. BLANTON. I know, but to that extent it is assuming the function of Congress. The gentleman from Illinois is a well-posted and prominent Member of this House and he knows that whenever a department of Government makes a recommendation to Congress and the Bureau of the Budget backs them up and makes an estimate and makes a recommendation for appropriation, Congress allows the claim and passes the appropriation, without any serious objection, and we are not often given the right even to discuss it on the floor.

Mr. BRITTEN. Just at that point, if the gentleman pleases, the gentleman can get more time—

Mr. BLANTON. I had hoped not to consume the time I have.

Mr. BRITTEN. If the Government owes a contractor \$100,000—

Mr. BLANTON. Or \$100,000,000.

Mr. BRITTEN. Or \$100,000,000, and the claim is thoroughly and honestly investigated and goes to the Bureau of the Budget and then recommended to the Committee on Appropriations, and again is investigated by that committee and found just and equitable, does not the gentleman think that in all fairness the Government should pay that debt?

Mr. BLANTON. I will answer the gentleman. If it is a just claim, yes.

Mr. BRITTEN. That is all the bill contemplates.

Mr. BLANTON. But either a court or Congress should determine its justness. If the contractor should not be able to get his claim of a million dollars or more, and which in many cases is a fictitious claim, allowed under all the laws we have already passed for the benefit of war contractors, and we should now pass for him a blanket provision first for the Secretary of the Navy to pass on his claim—

Mr. BRITTEN. To investigate his claim and make report.

Mr. BLANTON. I said pass on his claim. And that means investigate his claim, and the Secretary of the Navy, when he goes to pass on it discovers that the claimant is a very particular friend of the Secretary of the Navy, or that he is a very particular friend of the President, or a very particular friend of some other Cabinet officer, or has been very close to the administration, it might happen that the investigation would not be as intense as it otherwise might be, for that is a condition that arises sometimes in governmental affairs. It has not been so very long since another body, not a partisan body, because there were Republican votes there, passed a resolution asking the President to remove a Secretary of the Navy. Remove him for what? For something that he should not have done, something that was violative of the interests of the people of the United States. Well, that has been such a recent event in history that I am a little careful about giving my vote to a resolution or a bill that will place in some other Secretary the authority and the power to put before Congress an adjudicated claim which as a matter of fact has not been adjudicated, but merely passed upon superficially by the department with a recommendation that Congress allow the money. It ought not to be done.

Mr. BRITTEN. Just at that point, will my friend yield to me for a moment?

Mr. BLANTON. Certainly.

Mr. BRITTEN. The Committee on Naval Affairs is in accord with the gentleman in his desire. You will notice that at the bottom of page 11 we have this language:

But such findings so communicated shall not be construed as imposing any obligation upon the Government or releasing any claim or rights of the Government.

Mr. BLANTON. I know that language is there, but it is without value, because whenever the Secretary makes us a recommendation the Appropriation Committee allows it and pays the claim.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. McKEOWN. What effect does that have on the right of the claimant to go to the Court of Claims? Why not have him go to the Court of Claims?

Mr. BLANTON. That is as far as we ought to go in any case. I have objected to many private bills on the calendar—my colleagues know that—not to give offense to any of them; but I know that I have made them feel angry toward me many times when I objected to private bills. I did it from a sense of duty. But I have never objected yet to a bill which merely gave a man a right to go to the courts. Whenever you introduce a bill here to give your friend a right to go to court and have his case adjudicated by the legal officials of the Government I am for it. I am willing to do that. That is as far as a contractor who has a claim mounting up to millions of dollars against this Government ought to ask of Congress.

Mr. VINSON of Georgia. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. VINSON of Georgia. A great many contractors have followed that line of reasoning and have gone to the Court of Claims, and the Government has filed a demurrer and claimed that the Court of Claims has not jurisdiction. That is the reason why they come to Congress and ask for a day in court.

Mr. BLANTON. Then let us confer jurisdiction on the Court of Claims. The Secretary of the Navy is not a judicial officer. He can not make a judicial determination of matters that may involve hundreds of millions of dollars.

Let me say this to my friend from Illinois [Mr. BRITTEN]: If he is sued to-morrow, not for a million dollars but for \$5,000 in a courthouse, he would not have a nonjudicial officer

to pass upon his rights as against the rights of somebody else. He would have a court. He would want a court. He would want a judicial officer. He would fight that case just as strongly as he would if it embraced a claim of \$500,000. But when it comes to a claim against the Government, we are in the habit of frittering away the right of the Government to have a judicial ascertainment. The Secretary of the Navy is not in a position to have a judicial ascertainment of these matters. He is not a judicial officer.

Mr. LEHLBACH. Is the Comptroller General a judicial officer?

Mr. BLANTON. We have created him and made him a quasi judicial officer. If the gentleman would investigate the number of highly paid high-class lawyers connected with the office of the Comptroller General who help him, he would think he was a judicial officer, because he has access to much judicial knowledge paid for by the people.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. McKEOWN. What objection would these contractors have to going into a forum where they could submit their claims and have them passed upon?

Mr. BLANTON. I will say this to the distinguished former jurist from Oklahoma: They do not want the law, and they do not want equity; they do not want judicial or equitable principles applied to their claims. They do not want some of their claims scrutinized properly. They ask equity when they do not want to do equity. One of the cardinal principles in a court of equity is that he who seeks equity must come into a court of equity with clean hands. These claimants do not want to do that part of it. They are after something for nothing, some of them. That is why they are seeking to have a nonjudicial officer at this time pass upon their claims involving sometimes several millions of dollars.

The war is over. Let us forget about it. Let us forget about these fictitious war claims, as many of them are, where claimants are clamoring, not before the courts but before the departments of the Government, for favoritism. I am against favoritism, and I am in favor of giving every man a square deal under the law. Let him go to the courts, where every case can be adjudicated on its merits.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. BRITTEN. It is shown that the contractors have no status in any court. They must come to Congress for relief.

Mr. BLANTON. Let us pass upon the claims, then. Let us not pass the buck to somebody else. When we vote to take tax money out of the people's Treasury I want to be responsible to the people for a mistake, if there is one. I do not want to pass it on to somebody else and let them make a mistake and then be responsible to the people for it.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. McKEOWN. What is the matter with the claims where the courts hold that the claimants have no claims against the Government? Are they so flimsy?

Mr. BLANTON. Yes; in many cases. They are not legal claims and are subject to a demurrer. Their equitable standing is not such as would bring them within the jurisdiction of the Court of Claims, but we could confer jurisdiction by an amendment.

Mr. LEHLBACH. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. LEHLBACH. The gentleman says if this is within the jurisdiction of Congress and not in the jurisdiction of the Court of Claims, Congress should pass upon them. That is merely what this bill does. This bill merely says that when a claim is presented to the Secretary of the Navy he shall thoroughly examine it and report to Congress his findings for information, so that we will not be flimflammed when we examine the evidence before us.

Mr. BLANTON. These claims are old. How many years has it been since the war closed?

Mr. BUTLER. I will say to the gentleman that we have been at this since 1919.

Mr. BLANTON. I know, for I have been fighting against this bill almost that long.

Mr. BUTLER. And the bills have been passed back and forth.

Mr. BLANTON. But has never yet been enacted into law. I will tell you what is the matter with the situation. Everybody in this House loves the chairman of this committee, and he loves everybody else. He has a heart in his breast as big as a barrel; he is just sympathy from the top of his head to the

soles of his feet, and these contractors come here and take advantage of that situation. [Laughter.]

Mr. BUTLER. I will say to the gentleman that I will pay the claims myself if he does not take back that language. [Laughter.]

Mr. BLANTON. Here is what will happen if we pass this bill and it becomes law: The Secretary will not pass on these claims himself; he will have some underling in his department pass upon them. These claimants will find out all about this underling who is to pass on their claims—just exactly who his friends are, what his inclinations are, what his habits are, and what will bring influence to bear upon him, not improper influence but proper influence to bear upon him in order to make him look favorably upon their claims. Then, if they convert him, he will make a recommendation that a certain claim is good and will ask Congress to pay it. The recommendation will be signed by the Secretary of the Navy. The Budget Committee will approve it. When they come in with that information do we take up these claims serialim and pass on them? No. They are all put into an appropriation bill and promptly passed, or put into special bills, and then about two days before the adjournment of Congress the Members who are especially interested in them and who have these contractors in their districts will get up here with these bills, and just one bill after another will be read and passed with no debate and with no time for consideration; they will be passed just like clockwork, lots of times without any reading at all. You know that happened just before we adjourned here not long ago, and that is what will happen as to these bills. There will not be proper consideration by Members of Congress, as you and I know.

I would like to vote for any bill which the gentleman from Pennsylvania [Mr. BUTLER] brings in, but this provision ought to come out of this bill.

Mr. BUTLER. Will the gentleman yield?

Mr. BLANTON. Certainly.

Mr. BUTLER. I want to say to my friend that there will be nothing done in a rush here.

Mr. CROSSER. Will the gentleman from Texas yield?

Mr. BLANTON. Yes.

Mr. CROSSER. Do I understand the gentleman to say that these men have no right to go into the Court of Claims with their claims?

Mr. BLANTON. Not without jurisdiction being conferred. Some of them are so foreign to law and equity that I will say they have no right.

Mr. CROSSER. They have the right to go in and file their claims and have them litigated, have they not? [Cries of "No!" "No!"]

Mr. BLANTON. In most instances now the Court of Claims has no jurisdiction.

Mr. CROSSER. If that is so, does not the gentleman think we ought to give them an opportunity to go to the Court of Claims and litigate their claims?

Mr. BLANTON. That is what I have been suggesting to the gentleman from Illinois [Mr. BRITEN], and I shall offer an amendment authorizing it. Where they have meritorious claims let them go either to the Court of Claims or to our Claims Committee. We have splendid work being done in our Claims Committee now. I want to say that.

I can mention two of our colleagues especially, the gentleman from North Carolina [Mr. BULWINKLE] and the gentleman from Texas [Mr. BOX]. They are looking into those claims carefully, and there are other Members I could mention. Let the group of contractors affected by this bill, whose claims are found by the Secretary to be meritorious, submit their claims to the Court of Claims, with jurisdiction conferred, and then let all others bring their meritorious cases before the Claims Committee, and if they have any merit in them at all that committee will bring in a bill conferring jurisdiction on the Court of Claims. That will permit them all to try their claims before that court, and there would not be a vote on the floor of the House against such action, because I have never heard Members vote against giving a man his day in court. But we should not have this kind of a non-judicial investigation in connection with the determination of claims involving millions of dollars of the people's money. I hope the gentlemen will not urge this provision in the bill.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. BLANTON. Certainly.

Mr. GARRETT of Tennessee. Except as it may affect the jurisdiction of a committee in the House, I confess I am unable to see, from a hasty reading of the section which the gentleman is discussing, where it changes the present practice. If a bill were introduced for the relief of a contractor now

and that bill were sent to the Committee on Claims, under the prevailing practice it would be referred to the Navy Department, would it not? That is the prevailing practice of the Committee on Claims; at least it was when I was a member of that committee.

Mr. BLANTON. I recognize what is in the mind of the minority leader. I want to say this: That when the Claims Committee passes on these matters they make them separate legislative items when they find them to be meritorious, but where we submit such matters to a department for investigation and that department finds that a certain claim is meritorious and should be paid, the Budget committee then comes in and makes an estimate.

The Committee on Appropriations follows that up by bringing in a blanket appropriation bill providing money to pay off every one of these so-called adjudicated claims, and this membership has not any right then to come in here and demand recognition and take the time of the House to fight them. They come in under a blanket bill and not as individual matters.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BLANTON. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

Mr. VINSON of Georgia. Mr. Chairman, I yield 10 minutes to the gentleman from Arkansas [Mr. WINGO].

Mr. WINGO. Mr. Chairman, we all appreciate the energy and watchful care of the gentleman from Texas [Mr. BLANTON], but I am sure there is one thought that has occurred to some of the Members as it has to me. We should be genuinely glad if, along with our appreciation of his diligence, we could also have an appreciation of the fact that he could and would make a distinction between a legitimate, cautious vigilance in protecting the Public Treasury and a continuing presumption of suspicion of integrity of public officials. That is one of the things from which the House suffers—the very charge that he brings against the officers of the Navy.

There is too much of encouraging the applied presumption in the public mind that Members of Congress are either inefficient or, to be charitable, negligent of the public interest, and the gentleman brings that charge against the Navy Department.

Gentlemen, no one is exasperated more often than I am by the natural defects in the temperament of members of the Army and the Navy; defects that are natural and grow out of their special training; but let us be fair to these officers. They do not deserve the imputation that the gentleman from Texas throws at them, that because, forsooth, some contractor may be their friend they will be any more negligent of their official duty or will disregard their oath any more than would some man on the bench. The claims of personal friendship appeal to the judge on the bench just like they do a Member of Congress, no more and no less; and while we do have graft and fraud exposed in the departments at times, I think we are safe in assuming, until there is proof to the contrary, that the average official who comes to a position of responsibility in either the Navy or any other department, nine times out of ten, is not only intelligent but has just about as much regard for his public duty as has a Member of Congress. Let us be fair with them. [Applause.]

Now, my friend meets himself coming back on this proposition. Just what do we propose to do? Do we propose to do for these Navy contractors what we did for the War Department contractors? No. Do we propose to do for them what we did for the war minerals contractors? No. What do we propose to do? They have been knocking at the door of the only court that has jurisdiction—the legislative branch of the Government—ever since the war has closed.

The gentleman from Texas asked how long it has been since the war closed. If you were one of these contractors and you felt you had an honest claim against your Government, would you not be asking how long it has been since you suffered this loss, if Congress through jealousy or through a desire of one branch to lug something onto a bill of the other branch which it refused to accept, had denied you a day in court, but when would justice be done?

The gentleman should know that the Court of Claims has not jurisdiction over these claims. The Navy Department has not any jurisdiction now to settle them. They can not issue a warrant on the Treasury of the United States even though they find that the claim is absolutely just and should be paid.

Even with the diligence of the Claims Committee of this House, they have not had an opportunity to have their claims adjudicated and paid. Why? The gentleman answered himself and gave a good argument why we should approve this feature of the bill, because he said little attention would be given to them in the House in the rush of a closing session and we would put over a lot of things that are not right. I do not think we will do that unless we change the habit of the last 12 years, because we generally consider those things on the Unanimous Consent Calendar and scrutinize each claim closely.

The assumption is that when a man says, "I dealt with my Government and my Government has defrauded me," that that Government to maintain its self-respect ought at least to set up some kind of machinery by which that claim can be heard, and what is the machinery proposed here? We say to the Secretary of the Navy, "You go and have a hearing of these facts and you present a comprehensive statement of these facts to the Congress, but do not you pay them." We do not allow them to pay them even though they may not be over \$50 or \$500. Why, some departments can settle claims up to \$1,000 without authority of Congress now, but under the proposed law the Secretary of the Navy may find one of these claims to be only \$50 or \$100 and he has not the authority to pay them anything. But we say, "Mr. Secretary, after you have heard them, give Congress a comprehensive statement of the facts." Then these claimants must go before this able Committee on Claims to which the gentleman pays a deserved tribute, and they must satisfy that committee, and it will be an aid to the Committee on Claims and to this House that one department of the Government has gathered a comprehensive statement of the facts with reference to the claims. Then when these bills do come up the gentleman from Texas and all the rest of us can refer to a statement of facts that has back of it the authority of a department of the Government. It will be something more than the ordinary recommendation that we insist shall come from one of these departments. The gentleman from Texas and myself can then pass upon whether or not we believe these claimants have gathered such facts and presented them as to not only be able to satisfy the department, not only to be able to satisfy the Committee on Claims, but whether they are sufficient to satisfy our conscience in voting the money to pay their claim.

Is not that the fact as to the machinery set up by this bill? Is there anything wrong about that? If there is anyone who has a right to complain, it is these contractors.

If I represented them I would come to Congress and say, "You gave the War Department claimants the right to have an adjudication down in the War Department. You gave the war-mineral claimants the right to have an adjudication with the Secretary of the Interior, but you have kept me out of court. You have played fast and loose with me between the two Houses for years and will not even give me a chance to present my claim and have a comprehensive statement made so that you can pass upon it. Now, I demand justice without further delay." That is what I would demand.

Gentlemen, from the standpoint of economy let me make this observation. The Civil War has been over for 60 years, the Spanish-American War is over, and yet the files of Congress are cluttered with claims growing out of those wars. I venture the assertion that any man who has looked into it knows that the further away from a particular event you place the adjudication of these claims the more will be obtained from the Treasury of the United States. It is economy to settle a Government claim while it is fresh, and when the Government agents can protect the Government's interest, than to wait 10 or 20 years until some influential Member of Congress gets behind the claim and presents it to the Claims Committee where the other side can not be presented, and the Claims Committee has to do the best it can, and pay more than you can settle for now. I want these war claims settled now while the facts are fresh and the Government can be protected. I would rather be liberal now than to have the Treasury robbed by an omnibus claims bill that will pile up after 10 or 20 years. You will pay less now while the facts are fresh than if you wait for a few years. This proposal puts a duty on the Navy Department to present the facts so that the committee can intelligently pass on the claim. I will not vote a dollar on the statement of the Secretary of the Navy, unless I am convinced from the facts presented that the claim is a just one.

The point I want to make is, let us assume that the Navy Department is going to be honest in handling this matter, and let us assume that it will be some aid to us; and then, for economy's sake let us get hold of these claims as soon as we can and protect the Federal Treasury by adjudicating them while the facts are fresh and the Government can get them so that they can present them and nothing fraudulent will be put over.

I want to protect the Treasury, and the way to protect it is to have an early adjudication and get these claims out of the way. [Applause.]

Mr. VINSON of Georgia. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. JONES].

Mr. JONES. Mr. Chairman and gentlemen, many millionaires were made by the World War. Many others were made rich. The morning after the war was declared the munition makers and those engaged in making the essentials of war were much better off financially than they were the night before. The values of their stock and properties had been greatly enhanced by that declaration. On every side men made money out of contracts with the Government. This was inevitable. The Government could not stop to haggle over prices. The securing of the supplies in that momentous time was far more important than the price. Sad to say, many men took advantage of this situation.

But, when the Government wanted men for the military and naval service it simply listed the young manhood of the Nation and called it into service on its own terms. They had no voice in the matter. That was the right and proper thing to do. It was the efficient, businesslike thing to do. The young men served heroically. That was one of the obligations of citizenship.

Now why should not the same method have been used with reference to the property and plants of those engaged in the manufacture of all of the supplies essential to the waging of that war? [Applause.] If the Government had simply contracted with the men who served in a military way during the war, allowing the matter of pay to be determined by contract, there is no estimating what the cost might have been. Are property rights any more sacred than human rights?

More than six years ago on the floor of this House I advocated the mobilization of every resource of the Nation—of men, or supplies, of everything that constitutes the Nation's resources. A law should be enacted now, to be made automatically operative upon the declaration of war, whereby, when young men are drafted, the essential industries, munition plants and all factories engaged in manufacturing the supplies of war, shall also be subject to draft on the Nation's own terms, just like the manhood of the country. [Applause.]

Much has been said in recent years about various plans to promote world peace. Numerous plans have been suggested, nearly all of them having something of merit and all of them evidencing a desire to lessen the chance of war. But do you know what I think would do more than any or all of these plans? Simply take the profits out of war.

In the centuries that are gone nearly all of the wars have been commercial wars. A few have been wars of liberty, but even in the wars of liberty one side has been fighting for commerce, because they did not want to give up the business advantage incident to controlling the people who were seeking their freedom.

In all countries there are men who are not particularly averse to war for it means fortunes for them. This occasions much of the propaganda put out in favor of such a declaration. But if notice were now given that in the next war, should we be so unfortunate as to become involved, no man would have opportunity to make these enormous profits, there would only be a war when it was necessary; and if all the nations of the earth could be induced to adopt the same policies along this line, the chance for any such catastrophe would be greatly reduced.

What legitimate objection can any man offer to such a law? True, every citizen owes the obligation to serve in the military forces in time of war should those services be needed. But is it any more necessary, from a patriotic standpoint, that the mothers of America should bid their sons goodbye as they march away to the grand, wild music of war, and that those boys should undergo the tremendous sacrifices thus made necessary, than that those who have accumulated wealth in this free and fruitful land should also make a similar offer of their wealth? [Applause.]

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. JONES. Yes.

Mr. BLANTON. The gentleman very patriotically left his seat in this House and donned the uniform. If the Government had the power and authority to send the gentleman to the front line trenches, to give his life, why should not it have the same authority to order me into a shipyard to nail rivets into a ship?

Mr. JONES. Mr. Chairman, I think most certainly it should have authority to order that work done, or any other kind of service that the Government finds necessary in the successful prosecution of the war. However, I do not think the Government should order you to work for some one else and then

permit that other party for whom you work to make an enormous profit out of it.

Since the beginning of organized government, this old earth has witnessed the grapple of contending armies, and mankind has engaged in almost continuous warfare somewhere on the globe. Nearly all the great issues on which nations have hitherto differed have been settled in the flaming battle line amid the smoke of conflict. War has cost seas of blood, broken hearts, and billions of treasure. But this strife will not last forever. There is no royal road to peace along which great armies may march in regal splendor to the tunes of martial music. It can not be based on force. The contests of the future should be creative and constructive instead of destructive. They should be settled in the fine competition of peaceful rivalry. The old ocean and the great continents should be the battle ground of this warfare of peace. The white-winged messengers of commerce should weave their magic way to the ports of the world, and the great black draft horses of civilization should carry the products of the genius and labor of free peoples everywhere in friendly exchange. Take the profit out of war. Then in the democracy of equality and opportunity, and in the splendid development of a just and fair course of dealing, will be found the final glory of nations and the ultimate peace of the world. [Applause.]

Mr. VINSON of Georgia. Mr. Chairman, I yield five minutes to the gentleman from Mississippi [Mr. LOWREY].

Mr. LOWREY. I believe one of the troubles in the personal dealings between men is the disposition that we all have to think more about our rights than about our duties, more about getting what the other fellow owes us than about giving the other fellow what we owe him; and I am not sure but there is a similar danger in our administration of public affairs. I appreciate the spirit of our friend, the gentleman from Texas [Mr. BLANTON] in his ardor to protect the Treasury; but along with that we want to be just as careful to protect the citizen. About the safest protection that any government has is the loyalty of its citizenship and the confidence of the citizens in the government. We call our Army and Navy our department of defense, but the best defense that any nation can have is a loyal and satisfied and confident citizenship. The word I want to suggest is this: I am not sure but that I have seen more danger to the Government since the war in a lack of confidence on the part of a good many citizens in the justice of their Government than I have seen in the disposition of the citizen to get things that are not due him from the Government. I have heard much here and there of the delays that have come and the inconveniences, and, in cases, the actual disaster that men have suffered because of the long delay, and, as it is called so often, the red tape in the affairs of government. Men just find it impossible year after year to get the things that their Government actually owes them, to get actual justice from the Congress and the Federal departments. Therefore I disagree with my friend from Texas in this discussion over this item in the bill, because I believe that it is as important for us to give justice and to speed the rights of individual citizens as it is to protect the Government. I think it would be better for the Government to give to a citizen something that is not due him than to do that citizen the injustice of withholding from him what is due, and therefore leave the citizen just cause to feel that his Government does not give him a square deal, and if it does not actually defraud him at least brings him years of trouble and disaster by its failure to hear speedily and adjust promptly his reasonable claims. [Applause.]

As the lawmakers of our great country and the Representatives of our people we have a high responsibility in the matter of reestablishing confidence in the powers at Washington. I say "reestablishing" because we must all recognize the fact that in this postwar period this confidence has suffered.

Of course, we must protect the Treasury against raids from the unscrupulous. But our failings should "lean to virtue's side," and the Government would better give a citizen more than is due him than to leave him cause to feel that he can not depend on just treatment at his country's hands.

Mr. BUTLER. I yield one minute to the gentleman from Illinois [Mr. BRITTEN].

Mr. BRITTEN. Mr. Chairman, I rise merely to say to the House that the claims affected by this bill are only those claims for loss or damage where the Government itself was entirely responsible for the loss. Where a contractor has lost money on a job in a general way this bill does not cover his claim; but where the Government itself is responsible for that loss, then that claim and no other is affected by this bill.

Mr. MOORE of Virginia. Of course the gentleman means this, that the order of the Government which affected the contract was not in force at the time the contract was made?

Mr. BRITTEN. That is true.

Mr. McKEOWN. Why do not these men come in and ask to go to the Court of Claims and submit the matter to that court?

Mr. BRITTEN. They have done that, and the Court of Claims has said substantially that it has no jurisdiction.

Mr. McKEOWN. Why not bring a bill to give them jurisdiction?

Mr. BRITTEN. This bill does not give the Court of Claims jurisdiction.

Mr. McKEOWN. Why not do that?

Mr. BRITTEN. Because the committee has thought it best to do otherwise.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Navy is hereby authorized to transfer to the Treasury Department, for the use of the Coast Guard, such vessel or vessels of the Navy, not exceeding three in number, with their outfits and armaments, as can be spared by the Navy and as are adapted to the use of the Coast Guard.

Mr. BUTLER. Mr. Chairman, I ask unanimous consent to strike out the first section of the bill, which has just been read, because it has already been provided for in another bill, Congress having already authorized the transfer of a number of these boats. Therefore we ask to have this stricken from the bill.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to strike out section 1 of the bill. Is there objection?

There was no objection.

The Clerk read as follows:

CHARGE OF DESERTION

SEC. 3. That in all cases where it shall be made to appear to the satisfaction of the President that a commissioned or warrant officer or an enlisted man with the charge of desertion now standing against him on the rolls and records of the Army, Navy, or Marine Corps has since such charge was entered served honorably in the war with the German Government, either in the military or naval forces of the Allies or in the Army, Navy, or Marine Corps or in other branches of the military service of the United States prior to November 11, 1918, the President is hereby authorized, in his discretion, to cause an entry to be made on said rolls and records of the Army, Navy, or Marine Corps, relieving said officer or enlisted man of all the disabilities which he had heretofore or would hereafter suffer by virtue of said charge of desertion thus appearing against him; and upon such action being taken by the President such officer or enlisted man shall be regarded as having been honorably discharged on the date the charge of desertion was entered against him: *Provided*, That nothing contained in this section shall operate to entitle any officer or enlisted man to back pay or allowances of any kind.

Mr. CONNALLY of Texas. Mr. Chairman, I move to strike out the last word in order to ask the gentleman a question.

Mr. BUTLER. Permit me to say we divided these sections up in our committee so we might all have something to do, so I am going to ask the gentleman to interrogate the gentleman who had this section in charge.

Mr. CONNALLY of Texas. Whoever the expert is on this section I would like to ask him. It is a very simple question which any man on the Committee on Naval Affairs ought to be able to answer.

Mr. BUTLER. I do not see our colleague [Mr. WOODRUFF] here, so I will endeavor to answer the gentleman's question.

Mr. CONNALLY of Texas. I see in line 23 the bill refers to the war, and you say, "War with the German Government." That is language that is never used ordinarily in any of the bills. We usually refer to it as the "War with the Imperial German Government," or "the World War," and I think it ought to be the same in all legislative acts. As a matter of fact, the World War was also a war with Austria. It seems to me that the language ought to be harmonious.

Mr. BUTLER. Now, the gentleman has me in trouble. I do not know why that language was used. I appreciate what the gentleman says, we ought to have absolute accord. We had a war with Austria, but we generally spoke of it as the war with Germany. I never considered the war with Austria very much or amounted to a whole lot.

Mr. CONNALLY of Texas. We do not refer to it in this language in legislation. I think we passed a law here last session in reference to the war of 1917 and officially named it the World War.

Mr. BUTLER. I do not see the slightest objection to changing the language, if the gentleman desires.

Mr. BRITTEN. "Who served honorably in the World War."

Mr. BUTLER. If agreeable to the committee, we will strike out the words "war with the German Government" and insert "World War." Mr. Chairman, I move to strike out, in line 22, page 4, after the word "the," the words "war with the German Government" and insert in lieu thereof the words "World War."

The CHAIRMAN. The Clerk will report the amendment. The Clerk read as follows:

Amendment by Mr. BUTLER: Page 4, line 23, after the word "the," strike out the words "War with the German Government" and insert in lieu thereof the words "World War."

The question was taken, and the amendment was agreed to.

Mr. HUDDLESTON. Mr. Chairman, I desire to offer an amendment. Page 4, line 21, after the word "has," insert "or before."

Mr. BUTLER. No; we can not do that.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. HUDDLESTON: Page 4, line 21, after the word "has," insert the words "or before."

Mr. HUDDLESTON. Mr. Chairman, the purpose of my amendment is to make eligible to compensation under the compensation acts those who served honorably during the World War and who were honorably discharged and subsequently reenlisted and deserted. My feeling is that the soldiers of that class who served in time of peace after the World War was over and after having received an honorable discharge from World War service are just as meritorious as soldiers who enlisted before the World War and deserted and subsequently reenlisted for service in the World War. I want to put all such former veterans upon a plane of equality. In my judgment a man who served through the World War and received an honorable discharge by that fact fixed his status and his right to recognition by his country for such service and that no subsequent act ought to deprive him of the right which was given him by his honorable service.

As the law now stands, a soldier who served through the World War and was honorably discharged and who was injured in the line of duty, or suffered any other permanent disability in defense of his country and who subsequently reenlisted and did not serve out the subsequent enlistment loses the right for compensation for the injury suffered in the defense of his country in the period of service for which he received honorable discharge.

Mr. MCKENZIE. I would like to ask the gentleman from Alabama if he thinks it would be possible for a man to reenlist who had been permanently disabled.

Mr. HUDDLESTON. I will say to the gentleman from Illinois that I have had brought to my attention quite a considerable number of such instances in which men were actually wounded in battle; other cases in which they suffered from disability. Take, for illustration, the disability of tuberculosis. A soldier who served in the World War subsequently reenlisted in the service and deserted. He developed tuberculosis shortly afterwards, but because of the fact of his subsequent enlistment and failure to get an honorable discharge he had no status either to get treatment for his disability or compensation on account of it. Yet, if that soldier had not subsequently reenlisted he would have had a status which would enable him to get treatment and compensation.

Because they did something subsequently, we are penalizing men whose status and right to compensation were fixed by their honorable discharge after the World War. We are penalizing them for one class of offense only, to wit, desertion from the Army or Navy. A man after he was honorably discharged may have committed any kind of crime whatsoever, even murder or highway robbery, and may be actually in prison as a convicted felon, and still he is entitled to compensation if he has a service disability. Yet, if he has committed this one offense of desertion in time of peace, at a time when he was not needed, perhaps; if he has committed that particular offense, he has touched the Ark of the Covenant and has fallen dead.

I ask is there anything more sacred about the Army and Navy than the remainder of our institutions? Is an offense against the Army more serious than any other offense against the Government or against the State? Is a man who deserted in time of peace a worse man than a man who has murdered somebody in time of peace or has committed a crime of some

other kind? Then why fix upon him this drastic penalty for one class of offense alone? There is no reason for it. It merely grows out of the disposition to regard the Army and Navy as something sacrosanct and an offense against them as a cardinal sin.

Mr. MCKENZIE. I hope the gentleman does not misunderstand my position. The gentleman from Alabama has been a soldier, and a good one, too, in the Spanish-American War.

Mr. HUDDLESTON. I was a soldier, but I will not say a good one.

Mr. MCKENZIE. The gentleman knows that a man to be a soldier in the Army or a sailor in the Navy must have passed a physical examination and must have been found to be physically fit. If that is true, then you are building up a case that will not stand.

Mr. HUDDLESTON. That is not correct. As I just tried to explain to the gentleman, there are many cases—and many of them have been brought to my personal attention, and I have personally investigated them—where soldiers were really disabled as the result of their war service, and yet they were permitted to reenlist. That is a fact. I hope the gentleman will recognize that fact and do justice to these men.

Mr. O'CONNELL of New York. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. O'CONNELL of New York. Mr. Chairman, I ask unanimous consent that the gentleman may have one minute more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. O'CONNELL of New York. Is the gentleman from Alabama defending desertion?

Mr. HUDDLESTON. I am defending men who served their country in time of war. I am not trying to make desertion in time of peace a more serious offense than any other which a man can commit. I am defending men in their rights gained in the service of their country. I would not take away from them those rights because of any weakness or fault of which they were guilty at some later time.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. BUTLER] is recognized in opposition to the amendment pending.

Mr. SWING. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. Yes.

Mr. SWING. Would not this be the effect of the gentleman's amendment, that as to a man who served honorably in the World War and continued in the Army in peace times, the fact of service in the World War would wipe out any act committed by him when the war was over?

Mr. BUTLER. The gentleman is entirely correct.

Mr. Chairman and gentlemen, when this Great War broke out upon us it found many men in the service who formerly had deserted from the service. They had immediately reenlisted. I can not recall how many of them did it, but a great many of them did reenlist. They did perform very valuable and heroic service.

Now, it was recommended by the last administration and by this administration that a man who performed that good service in the World War should be forgiven of the charge of desertion committed prior to the war, but it has never been asked that we excuse men of desertion when the desertion happened during the war. I could not agree with my friend from Alabama that for all time to come we should excuse these military men of the charge of desertion because they happened to have military service. We thought this Congress would be generous with these men by taking this blemish from their records. But I have never heard it suggested that for all time in the future men who commit desertion may be forgiven automatically without the intervention of the authority of Congress, simply because of the fact that they had service in the World War.

Mr. HUDDLESTON. Does the gentleman consider that in time of peace desertion is a more serious offense than murder or robbery?

Mr. BUTLER. No. But if I entered the military service for four years I would stay in it regardless of its cost. I do not know whether my friend ever went down to the department to coax the Government authorities there to let the boys go, when they run away and thoughtlessly enlist; but I have done it. I am willing to go that far; but for desertion, never, in behalf of national defense.

Mr. Chairman, I will ask the committee not to adopt the amendment of my friend. It is new to me. But if I thought about it for a week I do not think I could agree to adopt an

amendment that for all time to come would excuse the offense of desertion. [Applause.]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Alabama [Mr. HUDDLESTON].

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. HUDDLESTON. A division, Mr. Chairman.

The CHAIRMAN. The gentleman from Alabama asks for a division.

The committee divided; and there were—ayes 5, noes 58.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

TO CREDIT CERTAIN OFFICERS WITH ACTIVE DUTY PERFORMED SINCE
RETIREMENT

SEC. 4. That all retired commissioned and warrant officers of the United States Navy and Marine Corps who served on active duty in the Navy and Marine Corps of the United States during the war with Germany shall be credited with all active duty performed since retirement during the period from April 6, 1917, to March 3, 1921, in the computation of their longevity pay.

Mr. MCCLINTIC. Mr. Chairman, I rise to offer an amendment to make this section conform to section 3, striking out the words "war with Germany," and inserting "the World War."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Oklahoma.

The Clerk read as follows:

Amendment offered by Mr. MCCLINTIC: Page 5, line 18, strike out the words "war with Germany," and insert in lieu thereof the words "World War."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

MARINE CORPS PERSONNEL

SEC. 8. That no officer of the Marine Corps below the grade or rank of colonel shall be promoted or advanced in grade or rank on the active list unless the examining board provided for in the act approved July 28, 1892, entitled "An act to provide for the examination of certain officers of the Marine Corps, and to regulate promotions therein" (27 Stats. p. 321), shall, in addition to making such certificate of qualification for promotion or advancement as may be prescribed by the Secretary of the Navy, certify that there is sufficient evidence before the board to satisfy the board that the officer is fully qualified professionally for the higher grade or rank.

That when the said examining board shall consist of seven or more officers of the Marine Corps, any officer whose case is before it may be found not professionally qualified without the right to be present or to challenge members of said board.

That any officer of the Marine Corps who fails to qualify professionally upon examination for promotion or advancement shall be reexamined as soon as may be expedient after the expiration of one year if he in the meantime again becomes due for promotion, and if he does not in the meantime again become due for promotion he shall be reexamined at such time anterior to again becoming due for promotion as may be for the best interests of the service: *Provided*, That if any such officer of less than 10 years' total active service, exclusive of service as midshipman or cadet at the United States Naval Academy or the United States Military Academy, fails to qualify professionally upon reexamination he shall be honorably discharged from the Marine Corps with one year's pay: *Provided further*, That if any such officer of more than 10 years' total active service, exclusive of service as midshipman or cadet at the United States Naval Academy or the United States Military Academy, fails to qualify professionally upon reexamination, he shall not be discharged from the Marine Corps on account of such failure but shall thereafter be ineligible for promotion or advancement; and any such officer shall be retired with a percentage of the pay received by him at the date of retirement equal to 2½ per cent for each year of total active service, to be computed in accordance with the provisions of section 1 of the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," approved June 10, 1922, not to exceed 75 per cent, upon attaining, or if they have previously attained, the ages in the various grades and ranks, as follows: Lieutenant colonel, 50 years; major and other company officers, 45 years.

That brigadier generals of the line shall, subject to physical examination, be appointed from colonels of the line whose names are borne on the eligible list prepared annually by a board of not less than five general officers of the Marine Corps and approved by the President.

That hereafter, as vacancies occur, the heads of staff departments shall be appointed for terms of four years from officers holding permanent appointments in the departments in which the vacancies occur whose names appear on eligible lists prepared annually by a board of not less than five officers of the Marine Corps above the grade or rank of colonel, including the major general commandant and the heads of the staff departments, and approved by the President, but no head of a staff department appointed for a term of four years shall sit as a member of the board during consideration of names for the eligible list for his department: *Provided*, That in case there be no officer holding a permanent appointment in a staff department whose name is borne on the eligible list for appointment as head of that department the appointment shall be made from officers of field rank of the Marine Corps whose names are borne on the aforesaid eligible list for that department.

That any officer of the grade or rank of colonel whose name is not borne on one of the current eligible lists for appointment as brigadier general or head of a staff department shall, if more than 50 years of age, be retired with a percentage of the pay received by him at the date of retirement equal to 2½ per cent, to be computed in accordance with the provisions of section 1 of the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," approved June 10, 1922, not to exceed 75 per cent.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word. The last paragraph in the section just read requires the retirement automatically of certain colonels who reach the age of 56 years. Fifty-six years is almost the prime of life.

Mr. BUTLER. These are men who did not grow.

Mr. BLANTON. They were not certified as eligible to become brigadier generals. Just because they are not to be appointed brigadier generals they are to get something else. They are to be retired on pay at 50 years of age, after which, although drawing pay, they are to render no service to the Government.

Mr. BUTLER. Let me give my friend the explanation. The Marine Corps is a very old institution and in it we have had the unfortunate condition of promotion by seniority alone. The Navy abandoned it when I first came here 28 years ago, adopting the plucking board, and the Army has abandoned it. Now the Marine Corps is trying to get rid of it.

Mr. BLANTON. Will my good friend from Pennsylvania permit me to ask him a question?

Mr. BUTLER. Yes.

Mr. BLANTON. I would like to ask the gentleman from Pennsylvania whether he is in favor of continually retiring men in the prime of life and letting them engage in private business at big salaries, working for private corporations.

Mr. BUTLER. I will say to the gentleman from Texas that this has become absolutely necessary for the discipline of this corps and for its good. We are now beginning in this corps to retire men compulsorily, and this is what is known as the retirement provision of the law relating to the Marine Corps. These men have come up by promotion.

Mr. BLANTON. Let my good friend take time to answer that in his own time.

Mr. BUTLER. I will see that the gentleman gets more time.

Mr. BLANTON. Then I yield.

Mr. BUTLER. I want to tell my friend what my impression was and see whether he will not agree with me that it was about right. These men have come up for examination by three officers, and the gentleman knows the old way of doing it. This corps has never gone from it and these men have come right up. Some of them have now reached the grade of colonel, some have reached the grade of major, and some have reached the grade of lieutenant colonel. The time has come when they should no longer command troops, and the only way of doing it is by taking them out, but not promoting them.

Mr. BLANTON. I want to bring this before the committee. Do you know what we are doing in this bill? We are providing that majors shall automatically be retired when they reach the age of 45 years, certain majors; we are also providing that certain lieutenants colonel who are not certified for promotion shall be retired automatically when they reach the age of 50 years, and we are providing that those colonels who are not certified as eligible for promotion to be brigadiers general shall automatically retire at 56 years of age. Now, I want to say just what I said yesterday in answer to the gentleman

from New York [Mr. MAGEE], who was insisting on increasing the retirement pay. He quit his discussion of the Agricultural appropriation bill to take up the subject of giving increased pay to retired officers. I had a retired captain come to my office the other day insisting that I support his bill for increased pay of retired officers. He looked like a young man. I said, "Captain, how long have you been retired?" He said, "I have been retired 10 years." I said, "How old are you now?" He said, "I am 60." I said, "Then you have been retired ever since you were 50 years of age?" He said, "Yes." I said, "How much do you get now?" He said, "Three hundred and twelve dollars a month, and I have received it ever since I was retired 10 years ago."

Three hundred and twelve dollars a month for doing nothing, and he is engaged right now in a lucrative insurance business here in the city of Washington; he is devoting all of his time, attention, and ability to his private insurance business, and for 10 years as a retired captain he has been drawing \$312 a month from the people's Treasury.

Mr. BUTLER. How much a month?

Mr. BLANTON. Three hundred and twelve dollars a month, he told me.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BLANTON. I ask for five minutes more.

Mr. BUTLER. As I interrupted the gentleman several times, I ask unanimous consent that the gentleman have five minutes more.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent that the gentleman from Texas may proceed for five additional minutes. Is there objection?

There was no objection.

Mr. BUTLER. How much a month did the gentleman say?

Mr. BLANTON. He told me he was getting \$312 a month.

Mr. BUTLER. As a captain?

Mr. BLANTON. Yes.

Mr. BUTLER. He must have told you something that was awfully rosy, because according to the pay act they can not get over \$2,800 or \$3,000 for full pay.

Mr. BLANTON. The gentleman probably has in mind the pay of a captain in the Army, while this is probably a retired captain in the Navy, and the gentleman must know the one I am referring to, I believe, because he has been going from office to office, and I do not suppose he told me his pay was greater than it was when he was seeking an increase, and he told me the pay and allowances granted him by this Government amount to \$312 a month; that he has been receiving that amount for the last 10 years, and he is now just 60 years of age.

There are too many generals, still competent men, big-brained men, if you please, and able to transact the business of the Government, retired on big general's pay and working for big corporations like the Radio Corporation of America on tremendously big salaries. The Government has educated them; the Government has given them good salaries for years; their abilities are largely due to the training paid for by the Government, and we ought to quit retiring them when they reach the very prime of life; we ought to keep them on in the service.

Look at the great ability of our former colleague from Illinois, Uncle Joe Cannon, who served the people here in this House until, I believe, he was 89 years of age. He served 46 years in this House very ably. Look at General Sherwood, of Ohio, ably serving his people in the House, reading his speeches on the floor without glasses and able to stand up and meet anyone in open and running debate, and then tell me we ought to continue retiring men at 45 years of age, at 50 years of age, and 56 years of age, and then let them draw big salaries from the Treasury and at the same time conduct private businesses. I do not know where it is going to end. I want to tell you one thing, though. You talk about bolshevism in the country. The system we have of letting men get something for nothing is conducive to bolshevism more than anything else combined. We ought to stop it. There ought to be a reorganization of this retirement law, and all of us ought to look into it. I dare say there are not 20 men in this House who understand fully the provisions of the various retirement acts. We ought to know just exactly how much these men are being paid at this time and the emoluments they are receiving. There ought to be an entire reorganization of the retirement laws, and the age ought to be sliding upward instead of downward.

Mr. McKENZIE rose.

Mr. BLANTON. I will yield to my friend from Illinois.

Mr. McKENZIE. I want to take the floor.

Mr. BLANTON. Let me ask the gentleman whether he is in favor of retiring a man at the age of 45 years?

Mr. McKENZIE. Only for physical disability.

Mr. BLANTON. If he is able to conduct a big private business, and is able to keep coming to Congress year after year in order to get his retirement pay increased, he ought to be able to serve the Government properly.

Mr. BRITTEN. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. BRITTEN. May I suggest that the Committee on Naval Affairs is now about to give consideration to a bill that will retire men at 30 years of age?

Mr. BLANTON. They ought not to have been taken in at all then. I will never vote for such a bill.

Mr. BRITTEN. No; you can not tell a man's adaptability for a certain service until he has been tried out, and after he has been tried out he should not be kept on the pay roll unless he has some adaptability for such service.

Mr. BLANTON. Not at all. But you should discharge and not retire him. I honestly believe, just as my colleague from Texas [Mr. BLACK] said some time ago, if we keep on passing these bills, the first thing we know we will find that half of the people of this Nation are on the pay roll of the Government and the other half of the people are working to pay their salaries. We must stop it. There ought to be a change in such a system. I know this committee will push this bill through. I know you are going to retire on pay these majors at 45 years, and I can not stop it. You are going to retire on pay these lieutenant colonels at 50 years, and I can not stop it. You are going to retire on pay these colonels who failed to get brigadier generalships at 56 years, and I can not stop it. You are going to pay these war contractors, and I can not stop it. But the time is coming, if it keeps on, when the people are going to stop it. The people are not willing for this to go on. They do not like it back home, and I know it.

Mr. BUTLER. Mr. Chairman, if the gentleman will allow me to have one word with him, this provision of law affects largely wounded men in the Marine Corps. They were promoted from warrant officers and from enlisted men, and some of them during the war were very conspicuous. Some of these men were at Belleau Wood and survived. They were given their war rank and Congress was glad to give that to them. They have now reached places in their grade where they do not themselves feel able to be promoted on account of their physical and mental condition, and this bill within the next four or five years will take care of many of those men. There are between 550 and 600 of these men. Most of them have been wounded, and are the most distinguished men in the Marine Corps. This bill will provide for them. I will say to my friend from Texas I am not in favor of a big retired list. I am in favor of taking men from the retired list, who come from the academies, after they have served three or four or five or six years, if they do not show any capability for the Military Service.

This bill is particularly for the class of men to whom I have called your attention, and as a Member of this House I am expressly devoted to them. They have earned this. They can not work any more at big wages. As I have said to you, these men form a good part of the 2,200 men out of 8,600 that escaped at Belleau Wood, and I would ask my friend from Texas to interpose no objection to allowing this feature of the bill to go through.

Mr. BYRNES of South Carolina. Will the gentleman yield?

Mr. BUTLER. With pleasure.

Mr. BYRNES of South Carolina. If these heroes of the World War remain in the service, they will be eligible to promotion to a higher rank?

Mr. BUTLER. They will be by seniority, and they do not want to go.

Mr. BYRNES of South Carolina. Mr. Chairman, I move to strike out the last three words.

Mr. Chairman and gentlemen of the committee, the very thought suggested by my friend from Pennsylvania [Mr. BUTLER] has impressed me in the consideration of this section.

The men who served at Belleau Wood came in many instances from the ranks—the noncommissioned officers. When the fate of the Nation was at stake their services were in demand, and they were commissioned as officers. They now hold commissions. By seniority under the existing law they would be promoted to a higher rank, but some people may think that their lack of attainments is such that they would not serve with efficiency in a higher rank. Therefore some

plan must be devised by which they can be properly taken care of other than by giving them the increased rank to which their seniority would entitle them.

As I read this section of the bill, by its provisions the Marine Corps departs from the system which it has heretofore followed, and under which system the Marine Corps has deservedly won the confidence of this country and has become, in my opinion, the most popular of our military services, and a board will be established, which board will, without giving an opportunity to a hero of Belleau Wood to appear and make any defense of his cause, determine whether or not he shall be placed on the eligible list for promotion to a higher rank. If that board determines not to promote him but to promote some man who was graduated from Annapolis and who is not in line for promotion by reason of seniority, but whose educational attainments are such that, in the opinion of the board, he would make a better colonel or officer of higher rank, that man will be promoted over the head and in preference to the hero of Belleau Wood, whose cause appeals to me, as I know it appeals to this House. In doing this the gentleman from Annapolis or West Point or some other military college whom it is desired to promote will be promoted and our hero of Belleau Wood will be put on the retired list.

So far as I am concerned, I am opposed to it, because I doubt whether my good friend from Pennsylvania is correctly informed that all of these men want to get out of the service. I believe they would welcome the opportunity that now comes to them to be promoted by reason of seniority, and I believe that if a man who, when the fate of the country was at stake, was called upon to render service and rendered it as efficiently as did the marine officers is competent in time of peace to be promoted to a higher rank in the service. I believe the Marine Corps should not depart from the existing system and follow a system of selection for promotion which inevitably is going to result in favoritism and in heartburnings, which will tend to destroy the morale of this corps, for every time a man is passed over and some officer who has served four or five or six years less is promoted in preference to the man who served at Belleau Wood and had long previous service, down in his heart the man who is passed over is going to have less love for the service for which he risked his life. I do not believe in it. I think it is a mistake. I understood my good friend to say that this is a policy now followed in the Army.

Mr. BUTLER. No.

Mr. BYRNES of South Carolina. I do not think it is followed in the Army and I hope it will not be adopted in the Marine Corps.

Mr. BUTLER. We got this information from the highest authority, from an official whose word will never be doubted because he always kept his word and never misled us. That man is General Lejeune. Now, these men have asked for this, and they ask for it because it will give them the right to retire at their own grade, whereas if you adopt the rule of seniority they may be crossed out by the board under existing law.

Mr. BYRNES of South Carolina. Most of these men, by reason of their long service, will retire before many years have passed and will retire at three-quarters pay which they receive at the time of retirement.

Mr. BUTLER. Yes; but how are we going to amend this? We have to turn it over to the board of seven, at least.

Mr. BYRNES of South Carolina. Heretofore I understand that my friend from Pennsylvania has not been in favor of promotion by selection.

Mr. BUTLER. Yes; the gentleman from South Carolina and I do not disagree on some of these things.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. BUTLER. I ask that the gentleman from South Carolina have two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BUTLER. My friend from South Carolina remembers who these men are and that the House gave them a grade, and now comes the time for promotion and they feel much safer in the hands of the board, of the men who reported in their favor to this Congress. If they can show the qualifications to the board they will be promoted, but if they should ask that they should be continued in their own grade until they reached the age of 45 or 53 they will be happy over it.

Mr. BYRNES of South Carolina. The gentleman from Pennsylvania and I differ only in the fact that he says they are asking for this, and my information is that some want to stay in the service and stand on their right as officers of the Marine

Corps, receive promotion by reason of their long service which they will not receive under this policy of selection, if the board is authorized to go down the line and pick out a man who served half as long, but because the board thinks he is better qualified, select him in preference to the man who served in the World War and proved himself a good officer.

Mr. CONNALLY of Texas. Mr. Chairman, I rise to oppose the amendment. I thoroughly agree with the gentleman from South Carolina [Mr. BYRNES]. I am sorry that the gentleman is voluntarily leaving the House. The gentleman has shown a grasp of naval affairs equal to his grasp on financial matters in connection with appropriation bills.

I want to call attention to a certain provision in this section of the bill:

That any officer of the grade or rank of colonel whose name is not borne on one of the current eligible lists for appointment as brigadier general or head of a staff department shall, if more than 50 years of age, be retired—

And so forth.

Now, gentlemen, I am opposed to that kind of an amendment. The Marine Corps has been advertised—I do not think it advertised itself—by somebody at least as being the service that selects its men. When they come into the Marine Corps they are supposed to be picked men; no doubt there are some colonels, for they fill the colonels' positions up as fast as they occur. They are supposed to be good colonels. Now, when a colonel gets to be 56 years of age, if he has not been certified by the board of brigadier generals that he is qualified to become a brigadier general, out of the service he goes with a very large retirement allowance. He is all right as a colonel, a good colonel; he knows enough to be a colonel, but he is not eligible for promotion to be a brigadier general in the service of the Government.

Now, where is the economy in that? I do not mean in dollars and cents; but where is the economy in efficiency. Here is a man who has been in the Marine Corps all his life, is a good officer, a good colonel, because they would not have made him a colonel if he had not been qualified, but, forsooth, because he can not become a brigadier general they kick him out and give him a large retirement allowance. Why? Because somebody else down the line just below him, as suggested by the gentleman from South Carolina, wants to be a brigadier general, and if they do not promote this colonel to be a brigadier general the fellow down below can not get to be a brigadier general. So the thing to do is to get rid of this old "guy." He is a good colonel; he is worth the money as a colonel; he knows how to perform his duty; but because some board of brigadier generals does not want to associate with him as a brigadier general they have to get rid of him so as to promote the other fellow down the line.

Mr. BYRNES of South Carolina. Will the gentleman allow a suggestion?

Mr. CONNALLY of Texas. Yes.

Mr. BYRNES of South Carolina. The major generals are selected from the brigadier generals, and so the brigadier generals will select the officer who will become a competitor with them for major general. Of course, they are going to pick out the strongest competitor. What effect does the gentleman think such a policy would have in the House of Representatives in the selection of chairmen of committees?

If instead of taking the gentleman from Pennsylvania [Mr. BUTLER], who by reason of his seniority is the chairman, we should have a selection board authorized to go down the line—

Mr. BUTLER. Oh, I am perfectly willing.

Mr. BYRNES of South Carolina. I know the gentleman would be willing, but it would not be in the interest of the Government.

Mr. BUTLER. Oh, yes; it would be, because I am not much stuck on myself. I am not owing Congress anything. My constituency with its 50,000 majority is what I am thinking of.

Mr. CONNALLY of Texas. I say to the gentleman that if that system existed here in the House, there would not be any real big chairmen, because they would all be Oslerized at 56 years of age.

Mr. BRITTEN. There is very little difference between existing law and this section of which the gentleman complains.

Mr. CONNALLY of Texas. There is just enough difference so that the gentleman wants to change it.

Mr. BRITTEN. The Marine Corps desires this change.

Mr. CONNALLY of Texas. Of course they do.

Mr. BRITTEN. And it is in the interest of its own efficiency.

Mr. CONNALLY of Texas. In the interest of its own efficiency for its own promotion?

Mr. BRITTEN. Its own efficiency. Men came out of the ranks during the war—

Mr. CONNALLY of Texas. Oh, I can not yield to have the gentleman make a speech. Ask a question if he wants me to yield.

Mr. BRITTEN. I will get the gentleman five minutes more. The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. CONNALLY of Texas. Mr. Chairman, I have been guaranteed five minutes more by the gentleman from Illinois.

Mr. BRITTEN. Mr. Chairman, I ask unanimous consent that the time of the gentleman be extended for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. CONNALLY of Texas. Yes.

Mr. BRITTEN. The difference between existing law and this provision is that this provision substitutes selection up for seniority. We have selection up in the Navy, and the human element, of course, enters into the selection there just as it did in selecting out; we can not do away with it. It has improved the efficiency of the Navy. General Lefebvre and the best experts in the Marine Corps say that this will improve its efficiency. They desire it; and one of the reasons is that because men have come out of the ranks at an advanced age, having been promoted rapidly during the war, they must either be retired or selected up. They are not necessarily qualified to lead men in battle or to train men in time of peace. They should be put on the retired list so as to make room for the more efficient fellow down below.

Mr. BYRNES of South Carolina. And I will ask the gentleman if, being a very able member of the Committee on Naval Affairs, he has not been indulging in some criticism of the action of the selection boards of the Navy?

Mr. BRITTEN. Yes; that is true. Helpful criticism, I hope.

Mr. CONNALLY of Texas. The gentleman says that the only difference between the present law and this is that they have now the rule of seniority, and they want to have this as selection, and that the highest ranking officers of the Marine Corps say that the process of selection would make for their efficiency. Of course they are going to say that. Any bunch of fellows who are to have the power to make selection of course are going to say that their method of selection is going to be more efficient than any other kind of selection on earth. The Naval Committee thinks that its method of handling this legislation is the best that any committee in this House can furnish, and I do not gainsay that in this particular instance, and if you will turn over to a bunch of brigadier generals the process of selection of other brigadier generals, you are going to get an admission from that body that their method is the most efficient and will do the most for the service.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. CONNALLY of Texas. But I am not yet through answering the gentleman's other questions.

Mr. BRITTEN. Oh, yes, the gentleman is. Does the gentleman seriously contend that a brigadier general would select an inferior man rather than an efficient one?

Mr. CONNALLY of Texas. No; but I do say this, that there are some colonels there and the Marine Corps selected these colonels. They are colonels and you say, that they are qualified to be colonels. They can perform the duties of colonels, but because a board of brigadiers do not believe that they would make good brigadiers, you are going to fire them—not as brigadiers but you are going to fire the colonels because they do not make good brigadiers. The gentleman from Illinois [Mr. BRITTEN] is a splendid member of the Committee on Naval Affairs, but simply because he would not make a good member of the Committee on Alcoholic Liquor Traffic is no reason why he should be turned out of Congress. [Applause and laughter.] The fact that he is doing his duty where he is, and is a valuable man where he is, is no reason for canning him, and when you have a good colonel, there is no reason for canning him simply because he is not going to make a good brigadier general. [Applause.]

Mr. BYRNES of South Carolina. Mr. Chairman, I move to strike out section 8 of the bill.

The CHAIRMAN. The gentleman from South Carolina offers an amendment which the clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BYRNES of South Carolina: Strike out all of section 8.

Mr. VINSON of Georgia. Mr. Chairman, I rise in opposition to the amendment. I feel satisfied that if the gentleman from

South Carolina [Mr. BYRNES] understood this section, instead of moving to strike it out he would be in hearty accord with it. Under the law to-day the very men that he seeks to protect will be thrown out of the service if this section does not become a law. The method of selection and promotion in the Marine Corps is based on the act of 1892, which still adheres to the system of examination. That is the method by which they are selected to-day. You have but two alternatives under the present law—to promote or to dismiss from the service. This section which is being criticized by the gentleman from South Carolina provides that there shall be an alternative given in addition to the right to dismiss or promote, and that is to retire. If an officer was promoted during the war from the rank, we will say, of sergeant to that of second lieutenant, and has served 10 years with the Marine Corps, when he comes up for examination, if he is unable to pass the professional examination on two different occasions, instead of throwing out this officer this section will permit him to stand exactly where he is. He is merely passed by in promotions, but holds the rank he has until he reaches the age of 45, at which time he is retired.

I will ask my friend from South Carolina, do I understand him to be in favor of putting out these officers who to-day can not pass the professional examination after they rendered such heroic service during the war?

Mr. BYRNES of South Carolina. I will answer the gentleman by saying I first want my friend to show the law by which he will be dismissed.

Mr. VINSON of Georgia. He will be dismissed because the act of 1892 provides that every officer must come up for examination during a certain time, and if that officer can not qualify the Marine Corps has but one of two things to do—either promote or dismiss. I say it would be a hardship to do this to these officers who won their spurs upon the field of battle.

Mr. BYRNES of South Carolina. My friend knows under existing law that he is examined. If he has demonstrated his capacity on the battle field he will be able to stand a fair examination, and if he makes the required percentage—even if he is not promoted because some officer with longer service gets the promotion—he stays in the same grade until he serves his time. But the gentleman assumes these men will fail in their examinations. I do not. But I know that, even though they pass the examination, under this selection system they will not be promoted.

Mr. VINSON of Georgia. But the gentleman proposes by letting the law stand as it is to-day to put him out of the service.

Mr. BYRNES of South Carolina. No; he stays in the service.

Mr. VINSON of Georgia. No; under existing law he has to go out.

Mr. BYRNES of South Carolina. If he stands the examination he stays in the service.

Mr. MCKENZIE. Will the gentleman yield?

Mr. VINSON of Georgia. Yes, sir.

Mr. MCKENZIE. If I understand this situation, I would like to have the gentleman from Georgia answer one question, and that is why you do not apply the same rule to the officers in the Marine Corps whom you retire because they are not competent to pass the examination of the next higher grade in the same way they retire class B officers in the Army by giving them 2 per cent of their pay, I think it is.

Mr. VINSON of Georgia. They give them the same pay, based entirely upon the retirement, in the Army and in the Navy. I trust if there is a friend to the boy who was promoted and who served faithfully and who wants that boy to continue to hold the rank that he won upon the battle field that he will vote against the motion of the gentleman from South Carolina, so he may have an opportunity to stay in the Marine Corps instead of being dismissed.

Mr. BUTLER. Mr. Chairman, I want to say before you vote that the opportunity has come for the House to do what it has heretofore done. It has twice voted this measure through without criticism. This is asked by a department of the Government which has made itself good and has rendered valuable service to the country. If you strike out this provision we leave these people without any reason or method by which they might make promotions under the old line of seniority which is not abolished. And my friend, our colleague upon this committee, stated it properly, that if you strike out this section under the present law these men can be put out of the service and not be permitted to be promoted. Under this law they can be promoted, and I earnestly hope that you will sustain the committee.

Mr. BYRNES of South Carolina. If the gentleman will yield, the gentleman does not say that a colonel, who comes up for examination, has a chance to appear and be examined and stands the examination, can be kicked out of the service?

Mr. BUTLER. He can at the age of 55.

Mr. BYRNES of South Carolina. I mean under the existing law.

Mr. BUTLER. My friend, he has to come up because of his age. The gentleman says because of promotion for efficiency or because of my age—

Mr. BYRNES of South Carolina. It proves the efficiency of the system.

Mr. BUTLER. I do not ask anybody for anything. Of course he can come up. I am in favor of merit in the service, whether it be civil or military, and this does encourage merit in the Navy and Marine Corps. I ask the committee not to strike this item out.

Mr. CROSSER. Mr. Chairman and gentlemen of the House, section 8 of H. R. 2688 proposes to change the law relating to the promotion of Marine Corps officers to fill vacancies occurring in ranks below and including the rank of colonel. It also changes the law relating to the appointment of brigadier generals in the Marine Corps.

The present law provides that those who are due for examination for promotion may appear before the board, challenge for cause any of its members, be informed of all the evidence to be considered in their cases, have the right to present evidence in refutation of any adverse evidence which may have been introduced against them, and also supply any evidence in their own behalf which, for any reason, may have been withheld or omitted. The present law authorizes the President, when vacancies occur, to appoint general officers of the line from the whole list of officers of the line not below the grade of colonel and likewise in the case of the three staff departments of the Marine Corps.

The present law also provides that any officer who finally fails to qualify when due for promotion shall be discharged with one year's pay.

Section 8 of the pending bill provides that any officer of the Marine Corps below the rank of colonel who may be considered for promotion by the examining board may be found not qualified without the right to be present or to challenge the members of said board.

The bill also requires the President to appoint brigadier generals of the line from colonels of the line whose names are included in a list prepared by a board of not less than five general officers of the Marine Corps.

The bill also provides that any officer of more than 10 years' service who fails upon reexamination to qualify for promotion shall be retired with a maximum pay equal to 75 per cent of the pay received by him at the date of his retirement, or less according to the length of his service.

The difference between the present law and the proposed law is fundamental. All officers below the rank of colonel who may have occasion to appear before a board would, by this bill, be deprived of the right to object to and prevent from serving on such board a man who could be shown to be prejudiced or hostile to the officer appearing before the board. It would also deprive him of the right, which he now enjoys, of producing proper evidence to disprove any charges of misconduct, incompetency, disability, or inefficiency which might be brought against him. The bill, if it should become law, would also circumscribe the President so that he would be compelled to appoint as brigadier generals the men specified by the board, thus changing the existing policy which enables the President to use his discretion in making such appointments.

The bill also enables those in control of the Marine Corps to avoid serious competition from energetic and ambitious men by retiring such men as they approach the higher ranks with, in most cases, pay equal to 75 per cent of the pay received in active service.

A moment's consideration of the proposed changes to which I have just referred must convince any fair-minded man that their purpose is to establish a self-perpetuating bureaucracy.

Now, Mr. Chairman, the mere statement of the facts should be enough to convince serious-minded men of the disastrous effect this measure would have upon the efficiency and democracy of the Marine Corps.

It was just such legally established ring control which in years past has eaten the vitals out of the military establishments of many of the European governments.

Instead of developing in the rising officer initiative, ambition, and the spirit of enterprise, as does the assurance that his progress will be determined according to merit and the principles of justice, the effect of the scheme embodied in this bill would be to put a premium upon timidity and fawning.

Behold the rising officer imbued with the feeling that he should do everything possible to develop his military skill and eager to do his work well! See his predicament if this bill becomes law. His every brilliant effort is then, to those in control of his professional destiny, a sign of a dangerous rival. His work too thoroughly done puts them ill at ease. Instead of it being advantageous for the subordinate officer to be alert and to discover and apply new ideas, a premium is put upon the handshaking, palavering, sycophantish game.

This means, of course, the loss of mutual respect and confidence for each other by subordinate and superior, a confidence and respect which is absolutely essential to harmony, efficiency, and the spirit of cooperation.

It is the feeling by men, whether soldiers or not, that real merit will be rewarded, that makes them exert themselves to the utmost. How eager and active they are if they are sure that merit will have its reward and without unfair delay. How dull and indifferent are men if they feel that it has been made to the selfish interest of those who have the power to bestow or withhold the reward to deny their worth in order to prevent the too close approach of the subordinate and the inevitable comparison unfavorable to those in the position of power.

Unless there is mutual trust and the spirit of cooperation on the part of all concerned there will be lack of efficiency whether it be in the case of the Marine Corps or a private enterprise.

The passing of years over men's heads does not always assure wisdom or ability, nor does the lack of gray hairs indicate the want of ability. The greatest executives and foremost military commanders have been those who could appoint subordinates upon the basis of merit regardless of age or the years they may have spent in service.

If it had been impossible for him to utilize this principle, President McKinley could not have appointed Funston and Capt. J. Franklin Bell as brigadier generals. If President Roosevelt could not have exercised like discretion, he could not have appointed Captain Pershing and Maj. Tasker H. Bliss as brigadier generals.

It would seem entirely unnecessary to discuss the fallacy of the plan proposed by this bill for the selection and promotion of officers. The inevitably disastrous results must be self-evident. We might ask, however, by way of illustration, what would be the decision of any Member of Congress here if he were given the authority to choose his opponent at an election for Congress. Conceivably we might find a Congressman, at some time, manifesting such Godlike attributes as would cause him to select as his opponent the most capable and conscientious man in the country, but that is not likely. Acting like the ordinary human being, he would surely select as an opponent the man he could most easily defeat, and that man would be far from the most able and conscientious man available.

So it will be with the members of the board provided for in this bill. They will not promote to the rank from which major generals are to be appointed men who because of ability and capacity would be their strongest rivals for appointment to higher rank, and we must remember that some of the men promoted will ultimately be in the eligible list with those making the promotions, and the President would be required to appoint officers from this eligible list to higher ranks. Ask yourselves whether or not the members of the board, these selectors, are likely to select those who would be their most formidable competitors when occasion required the President to appoint to higher rank an officer from this eligible list consisting of those selecting and those selected.

I wish also to call attention to the fact that the contention that this plan would destroy the spirit of cooperation and create distrust and dissatisfaction does not need to rest only on the basis of reason or argument.

That condition already exists because of the mere prospect of this section of the bill becoming law.

The report of the Naval Committee on this bill states that the sentiment of the officers of the corps has been found to be very preponderantly against similar plans in the Army and Navy. A little investigation will satisfy anyone that the same feeling exists on the part of the Marine Corps officers as to the plan provided in this bill.

In regard to the method of operation of this kind of system let me quote a man who is regarded by the House as an authority on this very subject. I refer to the gentleman from Illinois [Mr. BRITTON], a member of the Committee on Naval Affairs. On June 19 of the present year, in a letter to the President in regard to a similar system now in force in the Navy, Mr. BRITTON said:

Some nine years ago, . . . it—

Referring to Congress—

* * * substituted for existing law a provision for "selection up" in the Navy.

It was the thought of Congress that promotion by seniority was wrong in principle, and that selection would provide an incentive for advancement, which, in turn, would promote ambition, thrift, constancy, and efficiency in the Navy.

In other words, an opportunity for promotion ahead of his class was to be given the ambitious, progressive, superior-minded young officer.

I think that the Navy generally has already indicated its disappointment in some of the selections for promotions, and that it feels that "real" selection up does not prevail.

Selection boards are too often composed of the same members who sat in preceding boards, and this fact may work against the best interests of a selective system.

For the past five years it has been quite evident to me that a select ring of Washington line officers have thoroughly dominated the Navy and have assigned to themselves—and to their friends—all of the military and social plums.

BUTTERFLY SET RULES

The Naval Academy, London and Paris embassies, command of the fleets, special European assignments, Mediterranean cruises, and top-side Washington appointments have been jealously parceled out to those in the butterfly set, and to none others, and I might say that this condition is not too happily received by the officer aboard ship who is on the outside looking in.

If merit and capacity are not to be rewarded by promotion, then Congress should repeal the "selection up" provisions of the law, so that young officers may not longer be deceived by the delusion that their personal advancement rests largely with themselves.

Mr. Chairman, I believe in selection; but not in the kind of selection which would be natural for the members of these boards who are to select the men who are to be their own competitors for promotion to higher positions.

I do not believe in selection by men who are likely to feel that their own professional advancement is jeopardized by the success of those whom they may promote. That is the kind of thing that has created cliques and then caused inefficiency in the military forces of many European nations. I am opposed to selection by boards, the responsibility of the members of which is covered up by their joint action, the composite action of the board members, and are thus able to crucify those who are regarded as formidable rivals.

I believe in selection by the President of the United States just as did the framers of our Constitution when they inserted in section 2, Article II, of the Constitution, the following language:

* * * he shall nominate and, by and with the consent of the Senate, shall appoint ambassadors and all other officers of the United States whose appointments are not herein otherwise provided for and which shall be established by law.

He has no professional military career at stake, no higher military rank for himself to be considered when appointing men who may be aspirants and competitors with the selectors for the same prize.

The chief concern the President would have in making appointments would be to have the quality of such appointments reflect credit upon himself.

If the President desires to have advice in making his appointments in the Marine Corps, let him be free to consult the civilian head of the Navy Department who, under the President, commands the Marine Corps. Not only so but as the constitutional selector let him by all means consult the responsible chief of the Marine Corps, who should be individually responsible for his recommendations, but let us not by any means transfer the responsibility for recommendations to boards who can conceal their individual responsibility behind the action of a board in secret session.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from South Carolina [Mr. BYRNES].

The question was taken, and the Chairman announced that the yeas seemed to have it.

Mr. BYRNES of South Carolina. A division, Mr. Chairman.

The CHAIRMAN. The gentleman from South Carolina demands a division.

The committee divided; and there were—ayes 18, yeas 75. So the amendment was rejected.

The Clerk read as follows:

RELIEF OF CONTRACTORS

SEC. 9. That the Secretary of the Navy be, and he is hereby, authorized and directed to make thorough investigation of the merits of the

claims (including claims for release from Government claims for liquidated damages, but excluding claims in cases where a full, final, qualified, or unqualified release has been given the United States), which may be submitted to him in writing within six months after the passage of this act, and verified under oath, for any loss alleged to have been caused to any of such claimants in the performance of any fixed price (including fixed unit price) contract with the United States through the Secretary of the Navy, or the Navy Department, from April 6, 1917, to November 11, 1918, inclusive, or in the performance of that portion of any such contract previously entered into which remained uncompleted on April 6, 1917, which loss was occasioned by the action of any Government agency by reason of priority orders for material, transportation, commandeering of property, or other order of Government authority not authorized by the contract on or between the dates above mentioned.

The Secretary of the Navy shall submit estimates of appropriations required to satisfy such of the claims as he may investigate under this authority as may be found to possess merit, accompanied by a comprehensive presentation of the facts in each case, but such findings so communicated shall not be construed as imposing any obligation upon the Government or releasing any claim or rights of the Government.

No claim shall be considered under this authorization for alleged losses on account of increases in wages until a claimant shall have established proof to the satisfaction of the Secretary of the Navy that he actually paid his employees the award ordered by the Navy Board or other Government boards and that his entire volume of business with the Government during the period covered by the claim did not yield a net profit.

In the performance of the duties imposed by this section the Secretary of the Navy is authorized to summon witnesses and examine them under oath, to require claimants to exhibit their books and papers, and to have access to and the right to examine pertinent income-tax returns and other financial reports of such claimants as may be in the custody of the Secretary of the Treasury.

Mr. BLANTON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLANTON: On page 11, line 17, after the word "submit," strike out the words "estimates of appropriations required to satisfy," and insert in lieu thereof the following: "to the Court of Claims," and in line 24, after the word "Government," strike out the period, insert a semicolon and the following: "Provided, That jurisdiction be, and the same is hereby, conferred upon the Court of Claims to hear and determine all of such cases so submitted to it by the Secretary of the Navy," so that as amended the paragraph will then read "The Secretary of the Navy shall submit to the Court of Claims such of the claims as he may investigate under this authority as may be found to possess merit, accompanied by a comprehensive presentation of the facts in each case, but such findings so communicated shall not be construed as imposing any obligation upon the Government or releasing any claim or rights of the Government: *Provided, That jurisdiction be, and the same is hereby, conferred upon the Court of Claims to hear and determine all of such cases so submitted to it by the Secretary of the Navy.*"

Mr. BRITTEN. Mr. Chairman, I reserve a point of order against the amendment.

Mr. BLANTON. Mr. Chairman, the committee says that all it wants to do is to pay just obligations which are equitably due by the Government. I will go with them on that proposition. I want to do the same thing. They say this bill is necessary because the Court of Claims has not jurisdiction to hear and determine these matters. I am proposing to give the Court of Claims jurisdiction by this amendment. If this amendment is passed the Secretary of the Navy will go ahead and determine the merits of these controversies, so far as he is able to do so, in a nonjudicial way, and those which he thinks have merit in them he will submit to the Court of Claims, and this amendment of mine confers jurisdiction on the Court of Claims to hear and determine those very cases.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. GARRETT of Tennessee. Does the gentleman mean by his amendment to give the Court of Claims authority to render a judgment?

Mr. BLANTON. Yes. I am willing to stand by a judgment of the Court of Claims. I happen to be acquainted with the personnel of the Court of Claims and am familiar with the character of the judges who sit in that court. There are no finer men in any group, so far as honor, ability, and integrity are concerned.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. CHINDBLOM. Under what rules does the gentleman contemplate the Court of Claims would act—under the general rules pertaining to their hearing of cases or would they get carte blanche jurisdiction to hear these cases upon general principles of equity?

Mr. BLANTON. Upon principles of equity, within the limitations prescribed by this bill. That is exactly what we are conferring on them by my proposed amendment. The Court of Claims could not hear them if we did not grant this jurisdiction.

Mr. CHINDBLOM. Does the gentleman think the language of his amendment will confer that authority?

Mr. BLANTON. Certainly it does.

Mr. CHINDBLOM. I do not think so.

Mr. BLANTON. It grants them jurisdiction to hear and determine, and we map out the limitations and restrictions in the other sections of the bill.

Mr. CHINDBLOM. Will the gentleman yield further?

Mr. BLANTON. Certainly.

Mr. CHINDBLOM. I think the gentleman's language grants jurisdiction only of the subject matter but does not prescribe the rules which will govern in the determination of the cases.

Mr. BLANTON. The preceding paragraph of the bill outlines that.

Mr. VINSON of Georgia. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. VINSON of Georgia. Does not the gentleman think his amendment is a great deal broader in the scope of the consideration of these claims than the proposed bill?

Mr. BLANTON. No; because I am not afraid of a judgment rendered on the facts by a court.

Mr. VINSON of Georgia. We read in the proposed measure that if there is any profit made by a contractor then he can not file his claim, and if he has not complied with the rules and regulations he can not file his claim—

Mr. BLANTON. Will not the gentleman answer me in his own time if he wants to make a speech, because I have just two or three minutes left?

Mr. GARRETT of Tennessee. I wish the gentleman would yield further, because this is a very important matter. I do not know anything about these contracts and I do not know any of the contractors, but it is a very important matter as regards procedure. Now, under the gentleman's amendment what record would be before the court? Anything, except the findings of the Secretary of the Navy, or could a claimant present testimony?

Mr. BLANTON. The filing of the record by the Secretary of the Navy would be merely placing that case in the category of a group of cases which the Court of Claims would have jurisdiction to hear and determine. Then the attorneys for the parties would present their cases, the attorneys for the claimants would present their pleadings and their evidence and their application of the law, and the attorneys for the Government their side of it, on the equitable features of their claim, and then the court would hear and determine it and would be authorized, under this transfer of jurisdiction from Congress, to grant a final judgment which, when granted, would be an authorization for the Appropriations Committee to bring in an appropriation to cover it.

Mr. GARRETT of Tennessee. There could not be any claims submitted under the gentleman's amendment, however, except those that the Secretary of the Navy himself thought possessed merit.

Mr. BLANTON. No; only such claims and none other, but they are the only ones that are now under consideration—the ones that the Secretary will approve of as having merit in them.

Mr. GARRETT of Tennessee. Whatever a claimant might think, if the Secretary of the Navy did not think the claim possessed merit he could not go to the Court of Claims.

Mr. BLANTON. No; but under the bill if the Secretary of the Navy thinks there is no merit in it he would not make any recommendation to Congress concerning it and there would not be any such claim before Congress. Only such cases will come before the Congress, under the bill itself, which the Secretary of the Navy determines have merit in them.

Mr. GARRETT of Tennessee. That is, under the terms of this bill?

Mr. BLANTON. Yes; and those same cases, by my amendment, would be presented to the Court of Claims instead of Congress.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BLANTON. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for two additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. VINSON of Georgia. Will the gentleman yield now for a question?

Mr. BLANTON. For a question; yes.

Mr. VINSON of Georgia. The gentleman's amendment is a great deal broader than the language of the bill, is it not?

Mr. BLANTON. No; but if it is, then why object to it?

Mr. VINSON of Georgia. For the simple reason that if these contractors have made large profits they are not entitled to continue to mulct the Government.

Mr. BLANTON. I am not afraid of the Court of Claims mulcting the Government in any instance, and that is the reason I want these cases to go to them. What is the proper tribunal to pass on these matters, in the last analysis? Are the Members of Congress the proper tribunal, when we are not judicial officers and do not consider them from the standpoint of equity or law but just pass them pell-mell, or is the proper tribunal a court which can hear the evidence and apply the principles of equity?

Mr. MONTAGUE. Will the gentleman permit me to ask him a question?

Mr. BLANTON. Yes; certainly.

Mr. MONTAGUE. Can this court that sits to apply equity undertake to exercise that jurisdiction unless the Secretary of the Navy requests it to do so? Should a court entertain jurisdiction at the instance of one party to a controversy and deny jurisdiction to the other party? Rather poor administration of justice, it would seem to me.

Mr. BLANTON. That would be true if the case could get before them without this special act of Congress; but within the proposals of this bill only those cases which the Secretary finds merit in will he send back to us for settlement, and under my amendment just as many cases as he finds merit in he will transfer to the Court of Claims.

I take it that whenever anyone is afraid to submit a claim to the Court of Claims upon an equitable standpoint under such an amendment as this then such person is in the attitude of being afraid to submit his case for equity to be applied to it. I do not see how any Member could object to the amendment if he is really seeking equity for these contractors. It gives the Court of Claims absolute authority to take a case which the Secretary of the Navy sends to it and adjudicate it from an equitable standpoint and to grant equity from the Government if any equity is due. What more could be asked?

Mr. McKEOWN. Mr. Chairman, I offer an amendment as a substitute for the amendment just offered.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment as a substitute for the pending amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. McKEOWN as a substitute for the amendment offered by Mr. BLANTON: On page 10, line 22, strike out section 9 and insert in lieu thereof the following:

"That jurisdiction be, and is hereby, conferred upon the Court of Claims notwithstanding lapse of time or statutes of limitation to hear, examine, and adjudicate and render judgment in any and all legal and equitable claims arising out of any contract with the United States through the Secretary of the Navy or the Navy Department from April 6, 1917, to November 11, 1918, inclusive, or in the performance of any portion of such contracts entered into which remained uncompleted on April 6, 1917, which claims have not heretofore been determined and adjudicated on their merits by the Court of Claims or by any department authorized to settle said claims. That from the decision of the Court of Claims in any suit prosecuted under the authority of this act, an appeal may be taken by either party as in other cases to the Supreme Court of the United States. Any and all claims against the United States within the purview of this section shall be forever barred unless suit be instituted or petition filed in the Court of claims within three years from the 5th day of March, 1925."

The CHAIRMAN. The Chair wishes to ascertain from the gentleman from Illinois [Mr. BRITTEN] whether or not he intends to press his point of order?

Mr. BRITTEN. Mr. Chairman, I will continue to reserve my point of order on the amendment.

The CHAIRMAN. The gentleman from Oklahoma can only speak by unanimous consent and his amendment can only be read for information as long as the point of order is undisposed of.

Mr. VINSON of Georgia. Mr. Chairman, I ask unanimous consent that the gentleman from Oklahoma may proceed for five minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that the gentleman from Oklahoma may proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. McKEOWN. Gentlemen, the President of the United States in his message to Congress said a very forceful thing when he said that the United States ought to settle its debts. I have been one who for many years has contended that these citizens of the United States who have just claims against the Government ought to have an opportunity to present their claims, and if the United States Government owes them anything we ought to pay them in their lifetime. It is not fair to the citizens of this country to have the Government use money that ought to be paid to them, and perhaps it affects them greatly in a financial way.

The proposed amendment protects the Government and protects the contractor. Gentlemen, why entail the labor upon the Navy Department to go to work and investigate these claims? Why not send them to the tribunal where they properly belong, the Court of Claims, where the Government and where the claimants can have a fair and impartial trial?

Mr. TINCHER. Will the gentleman yield?

Mr. McKEOWN. I yield to the gentleman from Kansas.

Mr. TINCHER. I notice you remove the bar of any statute of limitation with reference to any of these claims. Do you think that is best, or ought you to fix a certain time?

Mr. McKEOWN. I remove the bar of the statute of limitations so that any contractor whom the Government owes, or who has an equitable claim, can go in there and not be confronted with some technical objection because he did not file his claim in time. I bar him if he does not file his claim within three years, but I do not want any man who has an honest claim against the Government to be confronted at the threshold of the Court of Claims with a mere technicality and the plea that he has not filed his claim in time. If his contract was made between the dates mentioned in the bill, then he ought to have an opportunity to be heard in the courts, and we ought to get rid of these claims, because there is no use having them continuously coming up here.

The Congress of the United States owes it to itself and to the country to send these matters to the Court of Claims where they can be judicially determined. The Congress ought not to be required to take the responsibility of settling claims when you have a court provided by law for that very purpose. Why should the Congress take up its time with these matters and run the chance of paying claims that are not just? We ought to send them over to the Court of Claims.

My amendment is fair to the contractor and is fair to the Government.

Mr. WILLIAMSON. Will the gentleman yield?

Mr. McKEOWN. I yield to the gentleman.

Mr. WILLIAMSON. Would not the gentleman's amendment open up the court to all claimants whose claims have been rejected and give them an opportunity to go to the Court of Claims a second time?

Mr. McKEOWN. My amendment simply says that every claim that has not been settled either in the courts or by some department authorized to settle the claim may have a chance to come before the Court of Claims if the claim has any legal or equitable standing, and the claimant may there present his facts as to the claim.

Mr. HOCH and Mr. CHINDBLOM rose.

Mr. McKEOWN. I yield first to the gentleman from Kansas [Mr. Hoch].

Mr. HOCH. Would the gentleman's amendment permit any claim to go before the Court of Claims which would not go before the Secretary of the Navy under this bill?

Mr. McKEOWN. It would not; the language of my amendment confines the claims to that class of claims mentioned by section 9.

Mr. CHINDBLOM. Would a disallowance of a claim be considered as a settlement?

Mr. McKEOWN. It would not be a settlement where the claimant had no claim. If a man can put up a case so that he could go into the Court of Claims, he would have a chance to go.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. McKEOWN. I ask for three minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. McKEOWN. In other words, if he has had a hearing on his case and it has been settled, then, of course, it is a final settlement. If the Government has said that it would not pay him anything, that is a final settlement—he has had his hearing and it has been disposed of.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. McKEOWN. Certainly.

Mr. LAGUARDIA. Would not the gentleman's amendment cover claims 40 or 50 years back?

Mr. McKEOWN. No; these are claims entirely arising out of the World War, between April 6, 1917, and the 11th of November, 1918.

Mr. CHINDBLOM. And only in the Department of the Navy?

Mr. McKEOWN. And only in the Navy Department. It will take from the department the necessity of making these investigations and relieve Congress from being continually bothered with these claims.

Mr. JACOBSTEIN. Will the gentleman yield?

Mr. McKEOWN. I will.

Mr. JACOBSTEIN. In the proposed bill you will find a restrictive clause in relation to these claims. Your amendment makes it wider and broader than the bill.

Mr. McKEOWN. If the claimant has not a legal and equitable claim—and that is a question for the attorney of the Government to go into to show as a matter of defense.

Mr. JACOBSTEIN. But where the man has made a net profit that case can not be adjudicated by the Secretary of the Navy.

Mr. BRITTEN. Mr. Chairman, I ask unanimous consent that I may proceed for five minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for five minutes. Is there objection? There was no objection.

Mr. BRITTEN. Mr. Chairman, I desire to call the attention of the House, before making my point of order to the Blanton amendment, to the fact that the substitute just offered throws the gate wide open for any contractor who may have made millions during the war and who may have a claim against the Government for some governmental action which promoted loss or damage, and yet, notwithstanding the fact that he has made a million dollars or more, under the substitute amendment he can go to the Court of Claims and get a judgment for the additional amount. The amendment is much broader and wider than the language of the bill. I have no doubt the contractors of the country would like that amendment. On two previous occasions the House objected to that very thing when they passed the section that is now before the House. They did not want the matter thrown wide open. They wanted Congress to determine how much the claimant should get when he was damaged by governmental action.

Mr. HOCH. Will the gentleman yield?

Mr. BRITTEN. Certainly.

Mr. HOCH. What objection would the gentleman have to sending the claims to the Court of Claims for decision under the language of section 9? I mean limited in the jurisdiction of the Court of Claims to precisely these claims mentioned in section 9.

Mr. BRITTEN. Well, I suppose the entire section would have to be rewritten. I am saying that I think the House desires to hold the purse strings in cases of that kind. There has been too much money given contractors in the past for claims made against the Government on war contracts. Every group of contractors who did work for the United States has been settled with with the exception of this small group.

I have said that I would wash my hands of this section and would not fight any more. When you mention relief for a contractor it is just like a red flag to a bull in this House. Certain gentlemen want to get a whack at them. The truth of the matter is they fight all such claims even where the Government has occasioned the loss to the contractor.

Mr. BUTLER. Will the gentleman state the facts of the Idaho?

Mr. BRITTEN. They were building the Idaho in the New York Ship Building Co. yard. The Secretary of the Navy, Josephus Daniels, notified the company by letter and telegram to work three shifts on the vessel to get the ship completed ready for war. The company did complete the vessel, and they sent in their bill. Nobody will question the honesty of Josephus Daniels. It never has been questioned. The voucher was issued by the Navy Department. There was no dispute between the Navy Department and the contractor; they agreed substantially on the amount.

Mr. BUTLER. And there was not a dollar of profit in it?

Mr. BRITTEN. Not a dollar of profit. The voucher was issued, but the comptroller decided that the Secretary of the Navy had no authority; that he had gone beyond the limit of his authority and he would not pay the company. For six or eight years they have been without their pay, which amounts to some \$1,400,000. It is a sin and a shame, and if the company had not had good credit and good banking facilities it

would have wiped them out of existence, because they had no redress in the Court of Claims. They are coming for settlement to the House, and as far as I am concerned I would rather have these claims settled by the Committee on Appropriations than in the Court of Claims.

Mr. BLANTON. Does not my amendment embrace every safeguard that the bill does?

Mr. BRITTEN. No; the gentleman's amendment practically makes the Secretary of the Navy the attorney for the claimant.

Mr. BLANTON. But it embraces every safeguard for the Government that the bill does.

Mr. BRITTEN. It can not and do the other thing.

Mr. BLANTON. It does not strike out any of the safeguards.

Mr. BRITTEN. Mr. Chairman, I want to make my point of order upon the Blanton amendment.

Mr. BUTLER. Mr. Chairman, before the gentleman from Illinois addresses himself to the point of order I wish he would permit me to interrupt him for a moment.

Mr. BRITTEN. Certainly.

Mr. BUTLER. Like my friend from Illinois [Mr. BRITTEN], I am ready to abandon this. For years the Naval Affairs Committee of the House has endeavored to see justice done these people. We are not interested in any of them—they are not our constituents. This House discussed this measure and amended it and this is what resulted in the House. We have brought it back to the House just as the House prepared it, and in my judgment it ought to pass on. Like the gentleman from Illinois, I am through if the House does not want to help the Government keep its obligations and do it in a way so that we keep control of it.

Mr. BLANTON. Mr. Chairman, what is the gentleman's point of order?

Mr. BRITTEN. I am willing to proceed on to a vote, as certain Members are calling for a vote.

The CHAIRMAN. Does the gentleman withdraw the point of order?

Mr. BRITTEN. Yes.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 1, noes 85.

So the amendment was rejected.

Mr. McKEOWN. Mr. Chairman, I offer now my amendment, which is at the Clerk's desk, and ask for a vote upon it.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. McKEOWN: Page 10, line 22, strike out section 9 and insert in lieu thereof the following:

"That jurisdiction be, and is hereby, conferred upon the Court of Claims, notwithstanding lapse of time or statutes of limitation, to hear, examine, and adjudicate and render judgment in any and all legal and equitable claims arising under any contract with the United States through the Secretary of the Navy or the Navy Department from April 6, 1917, to November 11, 1918, inclusive, or in the performance of any portion of such contracts entered into which remained uncompleted on April 6, 1917, which claims have not heretofore been determined and adjudicated on their merits by the Court of Claims, or by any department authorized to settle said claims.

"That from the decision of the Court of Claims in any suit prosecuted under the authority of this act, an appeal may be taken by either party as in other cases to the Supreme Court of the United States.

"Any and all claims against the United States within the purview of this section shall be forever barred, unless suit be instituted or petition filed in the Court of Claims within three years from the 5th day of March, 1925."

Mr. LEHLBACH. Mr. Chairman, I make the point of order against the amendment. Section 9 provides that with respect to a certain class of claims the Secretary of the Navy is authorized and directed to ascertain facts and report the same to Congress. We must take cognizance of the law of the land, and hence we know that the Congress is the only body at the present time having jurisdiction over the disposition of these claims. All the section does is to provide for the ascertainment of facts for the use of Congress. The amendment proposed strips Congress of its sole and exclusive jurisdiction over these claims and vests it in the Court of Claims and prescribes to a certain extent the procedure to be followed in bringing these cases before the Court of Claims and the adjudication of them there, which obviously has nothing whatever to do with the proposition to ascertain facts and report them back to Congress.

Mr. GARRETT of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. LEHLBACH. Yes.

Mr. GARRETT of Tennessee. I am inclined to agree with the gentleman as a matter of parliamentary law that this is subject to a point of order. I do not think the amendment offered by the gentleman from Texas [Mr. BLANTON] was; but let me ask the gentleman as a matter of policy whether he does not think it would be well for him to withdraw the point of order and let the House in Committee of the Whole express itself upon the question. If this be settled upon a point of order, it will be said that it is a technicality, and we are liable to be confronted with claim after claim in the future about these matters with the insistence that there has been no settlement by any vote of the House.

Mr. LEHLBACH. Mr. Chairman, I withdraw the point of order at the suggestion of the gentleman from Tennessee.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma.

The question was taken; and on a division (demanded by Mr. WILLIAMSON) there were—ayes 1, noes 85.

So the amendment was rejected.

The Clerk read as follows:

REPEAL OF SO MUCH OF SECTION 3 OF THE ACT OF JUNE 4, 1920, AS AUTHORIZES TRANSFERS AND APPOINTMENTS IN THE REGULAR NAVY

Sec. 10. That hereafter no officer of the United States Naval Reserve Force shall be transferred to or appointed in the Regular Navy under the provisions of section 3 of the act of June 4, 1920, and so much of said section 3 of the act of June 4, 1920, as authorizes such transfers and appointments is hereby repealed.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last word, for the purpose of asking the chairman to explain this section.

Mr. BUTLER. Mr. Chairman, this is a repealing act. There was authority through act of Congress for the transfer of men from one service to the other. Those transfers affected about 1,200 men that came out of the Navy, and they had to be transferred one way or the other to settle the matter right after the war was over. The purpose of the act has been accomplished, and, therefore, they have asked to have that section taken from the statute books.

Mr. BRITTEN. This merely makes law of existing practice.

Mr. LAGUARDIA. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

DISCHARGES FOR THE GOOD OF THE SERVICE

Sec. 11. That hereafter persons discharged from the naval service by dishonorable discharge, bad-conduct discharge, or any other discharge for the good of the service, may, upon discharge, be paid a sum not to exceed \$25: *Provided*, That the said sum shall be fixed by, and in the discretion of, the Secretary of the Navy, and shall be paid only in cases where the person so discharged would otherwise be without funds to meet his immediate needs: *Provided further*, That hereafter the appropriation, "Maintenance, Quartermaster's Department, Marine Corps," shall be available for the purchase of civilian outer clothing, not to exceed \$15 per man, to be issued when necessary to marines discharged for bad conduct, undesirability, unfitness, or inaptitude.

Mr. McKEOWN. Mr. Chairman, I move to strike out the last word. The House has overwhelmingly voted upon this question of claims. I call the attention of the House to the attitude in which you place the Congress on this matter. Whenever any claim comes up from any Indian tribe or nation against the United States Government the Congress compels them to go into a Court of Claims, there to adjudicate the matter, but contractors with the Navy Department can come directly to Congress and receive their pay and their losses without being compelled to present claims in the Court of Claims. When the war was on and at its height the Food Administrator of the Nation sent out to the farmers of the country and urged them to raise wheat, hogs, cattle, food for the soldiers at the front, and on the announcement of the armistice he immediately withdrew the standardized price from hogs and cattle and let those who had a right to rely upon the Government take their losses.

You never gave them any hearing; you never gave them any opportunity to recover the millions they lost throughout the country. Yet you come here and are not willing to send the contractors even to the Court of Claims to present their claims, but propose to permit them to come in here to be paid out of the Treasury of the United States on some small investigation to be made by the department which made the contracts, whether they were wrong or not. I will say to you that this Congress is inconsistent in its action in this matter and turn-

ing over to the Navy Department the right to fix the claims. Every farmer in this country who relied upon the stabilizing of the price fixed by the Food Administrator during the war had the right to assume that he would have the right to dispose of his high-priced food, high-priced cattle, of his high-priced hogs that he had raised at the request of the Government, and his claim for damages by reason of the armistice is just as meritorious as some of the claims you propose to pay without referring them to the Court of Claims.

I have no right to scold because you exercise your judgment, you have had your say about it, but I want to call your attention to the fact that now you go out and say to this department, "You can pass on the merits and we will pay them." If you are going to leave it to a department, you can well leave it to the Navy. When the war broke out here you could not find men in the Army or Navy to make contracts. The business men just had to go up and down Washington streets and out to camps and back to find somebody to make a contract. When the war was over you could not haul all the contracts that were made in a wheelbarrow. You passed legislation to pay them when the war was over, and here you come again and say this department shall go down here and pass upon these claims that they themselves made; that the department is to say whether it is a just claim—

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. McKEOWN. Yes; I will yield to the gentleman from Tennessee.

Mr. GARRETT of Tennessee. The gentleman, my good friend from Oklahoma, evidently overlooks certain language that is in this provision. The Secretary of the Navy will make investigations of claims; there will be a certification by him to the Budget. The Budget will then certify it to the Congress, and that certification will go to the Appropriations Committee. The Appropriations Committee will investigate, presumably, and then the House itself in the Committee of the Whole House on the state of the Union will have all of its opportunity to pass upon the provisions contained in an appropriation. Now if this had been a matter of turning over to the Secretary of the Navy the determining of it I doubt if it could have mustered a vote in this House. But I call the attention of the gentleman to this express declaration:

But such findings by the Secretary of the Navy so communicated shall not be construed as imposing any obligation upon the Government or releasing any claim or rights of the Government.

So the gentleman would not want to say that it rests wholly in the discretion of the Secretary of the Navy.

The CHAIRMAN. The time of the gentleman has expired.

Mr. McKEOWN. I ask for five additional minutes.

Mr. BRITTEN. May I suggest to my good friend from Oklahoma that the Committee on Naval Affairs has two other important bills, one the Reserve Corps bill in which the gentleman himself is seriously interested, and we would like to bring up that bill to-night, but if the gentleman continues to talk I will say to him I am afraid that this bill, which will save \$400,000 annually to the Treasury for the same number of men in the Reserve Corps, will not be reached to-day, and consequently will not be reached during the present session of Congress.

The CHAIRMAN. Is there objection?

Mr. MacLAFFERTY. Mr. Chairman, I object.

Mr. GARRETT of Tennessee. I hope the gentleman will not object. I called the attention of the gentleman to a matter and I think he ought to have a minute or two.

Mr. MacLAFFERTY. I withdraw the objection.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. McKEOWN. The gentleman from Tennessee calls my attention to this provision. The gentleman from Tennessee is correct, but, my friends, when they go to the Court of Claims the same power to control the appropriation still rests in the Congress.

Mr. CARTER. Will the gentleman yield?

Mr. McKEOWN. I will.

Mr. CARTER. Can the gentleman recall during his service of a judgment of the Court of Claims having been refused to be appropriated for by the Congress?

Mr. McKEOWN. I will say this to the gentleman: That I have not heard of any claim being rejected by the Congress approved by the Navy Department either. They have to go through the same process as if they go to the Court of Claims. A claim goes to the Court of Claims and that court passes upon it, and it comes back here and goes to the Budget Committee and goes through the same process. There is no difference between the process except this, that instead of being

recommended by the Navy Department and passed by the Budget it will be made upon a judgment of the Court of Claims sent to the Budget Committee; if it is approved by the Budget Committee the appropriation will be made. That is all the difference. It is just a different process.

Mr. CARTER. I call the gentleman's attention to the fact that several things have been recommended before we had the Budget; several claims that I have knowledge of were presented by the department; claims which were turned down by the Congress.

Mr. McKEOWN. The proposition is this: You have turned over to the departments the right to investigate and report on certain claims. Now you propose to take those claims without a judicial determination and have the department which incurred the claim pass upon its own contract and the equity existing under its own contract. I say it is not fair to the Government of the United States and it is not fair to the taxpayers.

It may be asked, why not let every other claim go to the departments? There are claims here time after time from the West, approved by the Secretary of the Interior, determined by him and recommended by him for payment, and they have lain here on the table for 20 long years, and you can not get consent out of the Congress to settle honest, just claims.

Now I am complaining, and I have a right to complain, at the treatment you give to one class of citizens in favor of another class. There have been claims in this Congress that have been reported out favorably and they have been heard and commissions have been appointed to determine them, and you will not let them go to the Court of Claims. I say you are not consistent. This very action here now will come back to haunt you in the future when you consider the matter of claims. You will have to meet the same problem some time in the future, because if every claimant who had a claim during the war can go to the department that he made the contract with where is the protection given to the people who pay the taxes of this country?

Gentlemen, it is not my business here to criticize you. I simply call your attention to your action in this regard and your treatment of other claims against the United States Government. There are hundreds of claimants who have claims just as honest and meritorious and equitable as those that arose out of the war, and they can not be heard.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

MARINE BAND

SEC. 12. That the band of the United States Marine Corps shall consist of 1 leader, whose pay and allowances shall be those of a captain in the Marine Corps; 1 second leader, whose pay shall be \$200 per month, and who shall have the allowances of a sergeant major; 10 principal musicians, whose pay shall be \$150 per month; 25 first-class musicians, whose pay shall be \$125 per month; 20 second-class musicians, whose pay shall be \$100 per month; and 10 third-class musicians, whose pay shall be \$85 per month; such musicians of the band to have the allowances of a sergeant: *Provided*, That the second leader and musicians of the band shall receive the same increases for length of service and the same enlistment allowance or gratuity for reenlisting as is now or may hereafter be provided for other enlisted men of the Marine Corps: *Provided further*, That the pay authorized herein for the second leader and the musicians of the band shall be effective from July 1, 1922, and shall apply in computing the pay of former members of the band now on the retired list and who have been retired since June 30, 1922: *Provided further*, That in the event of promotion of the second leader, or a musician of the band to leader of the band, all service as such second leader, or as such musician of the band, or both, shall be counted in computing longevity increase in pay: *And provided further*, That hereafter during concert tours approved by the President, members of the Marine Band shall suffer no loss of allowances.

Mr. LaGUARDIA. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from New York moves to strike out the last word.

Mr. LaGUARDIA. Mr. Chairman, I ask unanimous consent to extend my remarks on the Marine Band.

The CHAIRMAN. The gentleman from New York asks unanimous consent to extend his remarks on the Marine Band. Is there objection?

There was no objection.

Mr. LaGUARDIA. Mr. Chairman, I want to congratulate the committee in giving the House an opportunity to do something for the Marine Band. While the provisions made in the bill may seem to some to be substantial, I personally do not believe that we are doing enough for the splendid men, yes, art-

ists, who make up this great musical organization. Every one of these men could go out in civil life and make as much in one week as we are here granting them for a month. My purpose to-day is that the House should express its appreciation for the high artistic standard which the Marine Band has achieved, and to express our congratulations to the musicians and the leader of this splendid organization.

Capt. William H. Santelmann, known throughout the United States as Professor Santelmann, is, indeed, to be congratulated in what he has been able to accomplish. The Marine Band, with its nation-wide fame, has become an American institution. It is the last word in perfection as a military band, and of late has developed an orchestra of which the Nation may well be proud—an orchestra which compares favorably with the best symphony orchestras of the country.

I want to call the attention of my colleagues that every Wednesday night the Marine Band Orchestra gives a concert of classical music at the Marine Barracks in this city. To attend these concerts is not only an enjoyment, but instructive. To my colleagues who are lovers of music, or have in their families those who appreciate good music or who are studying the art, I commend these Wednesday night concerts. For—

Music hath charms to soothe a savage breast,
To soften rocks, or bend a knotted oak.
I've read that things inanimate have moved,
And, as with living souls, have been inform'd
By magic numbers and persuasive sound.

And—

Music's force can tame the furious beast:
Can make the wolf or foaming boar restrain
His rage; the lion drop his crested mane
Attentive to the song.

Professor Santelmann has labored for years to bring this band to its high state of perfection. As a military band I dare say that it is about the best in the whole world. The labor which Professor Santelmann and his musicians have given to perfect the orchestra is above and beyond the ordinary call of duty and may be considered by us their contribution to the United States Government.

The band first came to its prominence under the leadership of the famous March King, John Philip Sousa. He was succeeded by Professor Fanciulli, who in turn was succeeded by the present leader, Capt. William H. Santelmann. To Professor Santelmann is due the credit of having first organized the Marine Band Orchestra about 25 years ago.

I want to take this opportunity to read a brief history of the United States Marine Band which was written by Maj. Edwin North McClellan, historian of the corps:

Shortly after November 10, 1775, when the Continental Congress said, "Let there be marines!" Benjamin Franklin, in Philadelphia, saw on the drums of the marines recruiting the regiment authorized a rattlesnake, and under it the motto, "Don't tread on me!" That motto survives to-day on the drums of our Marine Corps, and those drummers and their fifers were the forerunners of the famous Marine Band.

Pipes and drums were the only musical instruments used by our military in the Revolution. A group of 10 or more of them was called a "band," and those gallant marines possessed as fine a "band" as any other military organization of the period. With the end of the Revolution came the end of everything military in our country, and it is not until 1797 that we again find marines and "musics"—those that served on the frigates of the new Navy which Congress authorized in 1794.

In 1798 Congress decided that the country could no longer get along without an organization of marines, and on July 11 of that year John Adams approved a bill that brought the new Marine Corps into being. This act of Congress authorized a drum major, a fife major, and 32 "drums and fifes."

Some of these "musics" were sent out on recruiting duty, some fell in battle on board our warships from 1798 to 1801 in the French naval war, while a sufficient number were retained in Philadelphia, and under Drum Major William Farr a fife and drum corps was formed.

When the Capital moved to Washington in 1800 the marines, including Drum Major Farr's fife and drum corps, went along, and in July camped on a "beautiful hill overlooking the Potomac," the same hill on which to-day stands the Naval Hospital.

The Federal City is described as a "barren desert" in 1800, and William Ward Burrows, the first commandant, decided to organize a real military band to dispel the monotony. Encouraged by President John Adams, by Vice President Thomas Jefferson, and by Benjamin Stoddert, the first Secretary of the Navy, Colonel Burrows soon developed the embryo band started in Philadelphia into a military band

of wind instruments. After the arrival of Thomas Jefferson in Washington late in November, he and Colonel Burrows frequently were seen riding along the wooded bridle paths tracing the romantic Rock Creek, discussing, among other things, the new Marine Band.

The first recorded open-air concert by the Marine Band in the Capitol City was an informal one on August 21, 1800, when Washingtonians thronged the marine camp "on the hill" to hear the band led by William Farr, its first leader. There is no record of what instruments were played by the band on this date, but by December they consisted of two oboes, two clarinets, two French horns, a bassoon, and a drum. Efforts to secure a bass drum were not successful for several months.

The Marine Band is the most ancient of American military bands, and it was the only band of a public nature in Washington up to some time later than 1830.

After holding informal concerts at their camp and playing dance music for balls of the Washington assembly—the first of which was held at Stelle's Hotel late in 1800—the band was prepared to make its official debut when President Adams received at the White House on New Year's Day, 1801. This was the first of a long line of New Year's Days, from the time of John Adams to that of Calvin Coolidge, on which the band has played at the White House receptions. Since Jefferson's day it has played at every inauguration when that ceremony called for the presence of a band. During its history every President has called upon it to play for functions at the White House, and all have praised its efforts; but of its many friends the "Lady of the White House" has always been its warmest admirer and most helpful patron.

Scarlet coats faced with blue, white-cloth pantaloons with black garters up to the calf of the leg, high-crowned hats without brims, "brass eagle," blue hatband with red-plush plume, and a blue, yellow, and red cord with tassel formed the uniform of the band at its formal debut.

From 1800 to 1924 there have been 15 leaders of the Marine Band—William Farr, Charles S. Ashworth, John Powley, Venerando Pulizzi, John B. Cuvillier, Joseph Cuvillier, Francis Schenig, Raphael R. Triay, Antonio Pons, Joseph Luchesi, Francis Scala, Henry Fries, Louis Schneider, John Philip Sousa, Francisco Fanciulli, and the present leader, William H. Santelmann.

There exists a false tradition which claims that the origin of the Marine Band lay in a group of kidnaped Italians. This tale has, in a small degree, withheld from the Marine Band a fair share of its glory as an American musical organization. "The music of a nation expresses its soul"; it "interprets its history, its religion, its patriotism, and its social customs as do few single mediums." In America the Marine Band has most aptly illustrated this. And there is no American musical organization that has achieved more in this direction than our Marine Band. There is probably no organization that has exercised a more potent Americanizing influence than this band. Let it be said right here that the foundation of the Marine Band is American and not transplanted Italian, as the false tradition has it. It is an American growth in root as well as in branch.

Thomas Jefferson, "the godfather" of the Marine Band, called for its presence frequently during his two administrations. It played for James Madison when he became President on March 4, 1809, and on the evening of that date, at Long's Hotel, its stirring strains ushered in the first inaugural ball ever held. The ball opened at 7 o'clock when Thomas Jefferson entered, the Marine Band playing Jefferson's March. As President Madison, with "sweet Dolly" on his arm, entered the band struck up Madison's March. The band has been a familiar sight at practically every inaugural ball held since.

During the second war with Great Britain the Marine bandmen not only helped to maintain national morale in the Capital with their national airs and martial strains, but some fought at the Battle of Bladensburg, while others assisted in saving the early records of the corps when the British burned the city.

The band was unusually prominent during the administrations of James Monroe and John Quincy Adams. It played at the White House several times for Lafayette in 1824 and the following year, and accompanied the "Nation's guest" to Mount Vernon and Yorktown. On September 6, 1825 (the birthday of Lafayette), President Adams rose and proposed the first toast ever drunk at a dinner in the President's house—"The 22d of February and the 6th of September." The toast was drunk standing to The Marseillaise, by the Marine Band, which also played an appropriate air to Lafayette's response—"The 4th of July, the birthday of liberty in both hemispheres."

When General Henderson, the commandant of the corps, received Lafayette at his residence, the present home of General Lejeune, the Marine Band rendered appropriate honors.

Often did the band play for President Jackson his favorite air—Auld Lang Syne—and it also played in the presence of Jackson's 1,400-pound "mammoth cheese" in 1829, as in 1802 it had for the 750-pound "great cheese" of President Jefferson.

It played for President Polk and the Nation throughout the Mexican War and buoyed national spirit, while it also assisted in recruiting.

The band had a very beneficial effect on public morale during the war of the Confederacy. President Lincoln insisted that it continue its outdoor concerts and frequently called upon it to play at the White House. It also was present when Abraham Lincoln made his historic Gettysburg speech.

Abraham Lincoln and Andrew Johnson were sworn into office on March 4, 1865. Immediately after the conclusion of the address the Marine Band played the national air, God Save Our President, the music of which had been specially arranged for the band. What a remarkable coincidence that such a prayer should be carried to high heaven one month and 10 days before he was stricken down by an assassin!

Shortly after he assumed office President Johnson reviewed General Hancock's Veteran Corps, prior to its disbandment. Being short on music, General Hancock borrowed the Marine Band for the occasion. It marched about two miles at the head of the column, formed in front of the President, and played while the entire corps passed. General Hancock was so pleased that he shook hands with the leader of the band and invited the bandmen to have luncheon with the President of the United States at two long tables prepared under canvas.

The band played at the first egg rolling on the White House grounds and for the first White House children's party when Andrew Johnson was President.

It has played at all the important weddings in the White House, including those of Nellie Grant and Alice Roosevelt.

It has visited, in its annual concert tours, practically every State in the Union. The band never has toured abroad, but the world has come to America to hear it play. Thousands of prominent diplomats and other noted foreigners have heard it. When President Buchanan entertained the Prince of Wales (Edward VII) for a week at the White House, the band virtually lived at the President's.

Not only on gala days has the band performed for the President "and his lady," but also on days of national bereavement. The band led the 2-mile-long funeral procession that mourned for William Henry Harrison, and General Henderson with nine marines guarded his body to North Bend. The band played the funeral dirge for Zachary Taylor, for Abraham Lincoln, and accompanied the body of James A. Garfield to Cleveland. At the funeral of William McKinley the band played the hymns that were always dear to his heart—Lead Kindly Light and Nearer My God to Thee. In life the band played for Warren G. Harding his favorite air, Perfect Day, and in his death it played the hymn he liked above all others, Lead, Kindly Light.

Every President of the United States, except George Washington, has heard the music of the Marine Band, and all of them have encouraged its improvement. George Washington, no doubt, listened to the old fife and drum corps in Philadelphia; John Adams was the first President who heard the band play at the White House; President Jefferson was its sponsor and greatest friend; President Van Buren instituted the formal outdoor concerts at the Capitol Grounds, and President Tyler those at the White House grounds; President Pierce in 1856 approved legislation according the band extra emolument for playing on the grounds of the President and the Capitol (after it had so played gratuitously for over 18 years); President Abraham Lincoln on July 25, 1861, signed an act of Congress which gave the band the full official status that it deserved; on March 3, 1899—25 years ago—President McKinley signed an act that doubled the strength of the band, authorized that the leader should have the pay and allowances of a first lieutenant, and provided a second leader. The legislation was brought about by the earnest recommendation of Brig. Gen. Commandant Charles Heywood.

William H. Santelmann, the present leader, was the first to occupy this office with the pay and allowances of first lieutenant in the Marine Corps.

The band was further increased in 1916 during the administration of Maj. Gen. George Barnett. On the 29th of August of that year President Wilson by his signature made a law which established the strength of the band at 65 musicians and provided that the leader should have the pay and allowances of a captain in the Marine Corps.

In November, 1918, the Marine Band, which theretofore had been attached to the Washington Marine Barracks, was ordered to be attached to headquarters and Lieut. Col. John W. Wadleigh, commanding officer of the barracks, received orders as its commanding officer. Colonel Wadleigh was succeeded in turn by Maj. Clayton B. Vogel and Col. James C. Breckinridge, the present commanding officer of the barracks and of the band.

Prior to March 3, 1899, the Marine Band was a magnificent organization with a history interwoven with that of the Presidents and the White House. Its leaders were splendid musicians and many of them composers. In 1813 Leader Ashworth wrote a book on military music which was adopted by the Army, Navy, and the Militia. Meritorious works were prepared by other leaders. Led by John Philip Sousa, the famous March King, the band rose to heights never before reached by an American military band.

Presidents Hayes, Garfield, Arthur, Cleveland, and Harrison not only very frequently expressed their high admiration of the performances of the Marine Band at the White House, but were warm personal friends of John Philip Sousa. The incidents occurring at the White House described by Sousa in his charmingly written books and articles form an intimate part of the White House history.

While as early as 1801 it was accepted as the National band and as the band of the President, and while it gradually added to its fame throughout the long years of our Nation's history, nevertheless it was not until 1890 that Congress afforded it an opportunity to reach its full development as a military band and as a symphonic organization. When, in that year, the band was increased from 30 to 60 members, Mr. Santelmann thought it an appropriate time to organize a symphony orchestra within the band. With this end in view he required that every member of the band double on a string instrument unless he be a soloist. Being himself a violinist of note and thoroughly experienced in symphony work he was very successful in this new venture. Mr. Santelmann after about four years of intelligent preparation declared in 1902 that the orchestra was ready for use at the White House and since that year the Marine Band has played there at all its indoor functions as a symphony orchestra.

It has taken 25 years to gradually evolve the Marine Band from a remarkable military band of wind instruments to its present status. It has taken unusual patience, endurance, and ability on the part of the leader to bring this result about.

During his quarter of a century as leader of the Marine Band Mr. Santelmann has led it in many important engagements of national and international importance. He is a composer of notable talent and ability. The band, under Mr. Santelmann, has played for Presidents McKinley, Roosevelt, Taft, Wilson, Harding, and Coolidge. Under his direction the band has furnished music on many occasions, when visiting royalties and other high dignitaries were present, and at ceremonies of great historic importance. In recognition of his valuable services to the public he has received a number of diplomas and decorations, among which are diplomas from the Trans-Mississippi Exposition in Omaha, the Buffalo Exposition, and the Louisiana Purchase Exposition in St. Louis. He has also received a degree of doctor of music from the George Washington University.

Besides the various official engagements Mr. Santelmann has taken the band on many successful concert tours throughout the country, covering practically every State of the Union.

With such a proud history it is no wonder that our Marine Band has always occupied such a warm position in the affections of not only the many Presidents, their families, and official Washington, but in the hearts of all Americans.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

REIMBURSEMENT TO CERTAIN FIRMS, ASSOCIATIONS, AND CORPORATIONS FOR MONEY ADVANCED

SEC. 14. That the Paymaster General of the Navy is hereby authorized, in his discretion, to make reimbursement to any individual, firm, association, company, or corporation for money advanced on behalf of the Government during the late war to any officer or enlisted man of the naval service on account of pay if upon presentation of evidence satisfactory to himself it is established that such individual, firm, association, company, or corporation has not heretofore received reimbursement in any way for the money so advanced: *Provided*, That the total amount for the purpose of reimbursement shall not exceed the sum of \$35,000: *Provided further*, That any amounts thus allowed shall be payable from the appropriation for pay of the Navy current at the time of settlement.

Mr. McCLINTIC. Mr. Chairman, I move to strike out the last word for the purpose of directing a question to the chairman.

The CHAIRMAN. The gentleman from Oklahoma moves to strike out the last word.

Mr. McCLINTIC. On line 10 of page 15, referring to the Paymaster General of the Navy, after the word "Navy," would it not be better to have that read, "with the approval of the Secretary of the Navy"?

Mr. BUTLER. Is that the matter that the gentleman spoke of the other day in the committee?

Mr. McCLINTIC. Yes. After the word "Navy," in line 10, I offer an amendment, to insert "with the approval of the Secretary of the Navy."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. McCLINTIC: Page 15, line 10, after the word "Navy," insert the words "with the approval of the Secretary of the Navy."

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Oklahoma.

The amendment was agreed to.

Mr. O'CONNELL of New York. Mr. Chairman, I move to strike out the last word. I offer an amendment on line 14, after the word "the": Strike out "late war" and insert "World War."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from New York.

The Clerk read as follows:

Amendment offered by Mr. O'CONNELL of New York: Page 15, line 14, strike out the words "late war" and insert in lieu thereof the words "World War."

Mr. BUTLER. Mr. Chairman, I accept that.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

TRAINING DUTY, NAVAL RESERVE FORCE

SEC. 15. That officers and men of the Naval Reserve who may, upon their own application, under such regulations as the Secretary of the Navy may prescribe, perform training duty for periods of less than 15 days each may be furnished subsistence in kind or commutation therefor at the rate fixed by law.

That enrolled men of the Naval Reserve may hereafter, in the discretion of the Secretary of the Navy, be confirmed in the lowest enlisted ratings of the naval service without first performing the minimum amount of active service required in the act approved August 29, 1916, entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes."

That on and after July 1, 1922, the retainer pay of all men who were on that day transferred members of the Fleet Naval Reserve or the Fleet Marine Corps Reserve shall be computed on the rates of pay authorized for enlisted men of the naval service by the act approved June 10, 1922: *Provided*, That the retainer pay of said reservists shall be not less than that to which they were entitled on June 30, 1922, under decisions of the Comptroller of the Treasury in force on that date.

Mr. BUTLER. Mr. Chairman, paragraph 3 under that section we will ask to be stricken out. It is already provided for in the law now existing. It begins on line 15 of page 16 and continues on down to line 23.

Mr. CHINDBLOM. Is the law that has been enacted of exactly the same force and effect as this paragraph?

Mr. BUTLER. Yes. That has already been provided for by Congress.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Pennsylvania.

The Clerk read as follows:

Amendment offered by Mr. BUTLER: Page 16, beginning with line 15, strike out all down to and including line 23 on the same page.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

MARINE CORPS SUPPLY DEPOT, SAN FRANCISCO, CALIF.

SEC. 17. That the Secretary of the Navy is authorized to take the necessary steps to construct a building for use as a supply depot for the Marine Corps, San Francisco, Calif., the cost, including the grading of the site, not to exceed \$335,000, and to submit an estimate for the necessary funds to the Director of the Bureau of the Budget for inclusion in the Budget for the service for the fiscal year ending June 30, 1925: *Provided*, That the Secretary of the Treasury is hereby authorized to transfer to the Navy Department a tract of land situated in the city of San Francisco, Calif., consisting of four 50-vara lots fronting 275 feet on the north side of Harrison Street and extending back, bounded by Spear and Main Streets, 275 feet, for use as a site for the building herein authorized.

Mr. BUTLER. Mr. Chairman, I move to strike out the whole section. It has already been provided for. Since we first introduced this bill and asked the House to consider it that has been taken care of by other legislation on an appropriation bill.

Mr. MACLAFFERTY. Was that during the last session that it was provided for?

Mr. BUTLER. Yes. It came in on an appropriation bill from the Senate.

Mr. VINSON of Georgia. It was taken care of on the 28th of May.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. BUTLER offers the following amendment: Page 17, beginning on line 10, strike out all of section 17 down to and including line 2 on page 18.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Pennsylvania.

The amendment was agreed to.

The Clerk read as follows:

COMMANDER CHARLES O. MAAS

SEC. 18. That the Secretary of the Navy is authorized to supplement the military record of the late Lieut. Commander Charles O. Maas, Naval Reserve Force, to show the voluntary service performed by said Lieutenant Commander Maas, and accepted by the Navy Department subsequent to the date upon which he was placed on inactive duty, and that such acceptance may be treated as a recall to active service: *Provided*, That no back pay or allowances of any kind shall accrue as a result of the passage of this section.

Mr. GARRETT of Tennessee. Mr. Chairman—

The CHAIRMAN. For what purpose does the gentleman from Tennessee rise?

Mr. GARRETT of Tennessee. I desire to ask a question of the chairman of the committee. This bill, I believe, has passed the House heretofore?

Mr. BUTLER. Yes.

Mr. GARRETT of Tennessee. Is that the case in which the officer was out of the service for a little while?

Mr. BUTLER. Yes. I will say to my friend that this is purely an effort on the part of the Naval Affairs Committee to satisfy the sentimental feeling which the widow of this officer had for her husband, who died in service but while he was temporarily out of it. He had been detailed for some civil service, and she desires it to appear that when he did die, he died in the service. Mind you, he was not out of the service, but he was detailed for some civil duty.

Mr. GARRETT of Tennessee. It is merely a correction of the record?

Mr. BUTLER. That is all. And, furthermore, it costs not one penny.

The Clerk read as follows:

UNITED STATES NAVY BAND

SEC. 19. That hereafter the band now stationed at the navy yard, Washington, D. C., and known as the Navy Yard Band, shall be designated as the United States Navy Band, and the leader of this band shall receive the pay and allowances of a Lieutenant in the Navy: *Provided*, That all service as an enlisted man in the naval service shall be counted in computing longevity increases for pay of this leader: *Provided further*, That no back pay or allowances shall be allowed to this leader by reason of the passage of this act: *And provided further*, That hereafter during concert tours approved by the President members of the United States Navy Band shall suffer no loss of allowances.

Mr. LINTHICUM. Mr. Chairman, I desire to offer an amendment.

Mr. BUTLER. Will the gentleman from Maryland, before he offers his amendment, permit me to make an explanation?

Mr. LINTHICUM. Yes.

Mr. BUTLER. I am going to suggest that this is all provided for in existing law except for the leader himself. This has all been provided for in other paragraphs of other bills, except the provision that fixes the leader's salary. Of course, he is a great musician.

Mr. LINTHICUM. My amendment has nothing to do with that.

Mr. BUTLER. Very good.

Mr. BRITTEN. And I want to suggest that this changes the name of the band from the Navy Yard Band to the United States Navy Band.

The CHAIRMAN. The gentleman from Maryland offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LINTHICUM: Page 19, after section 19, insert a new section to read as follows:

"That the pay and allowances of the members of the Naval Academy band shall be based upon the provisions of section 10 of the rates of pay provided in the act of June 10, 1922: *Provided*, That nothing in this act shall operate to reduce the pay any member of the Naval Academy band was in receipt of on June 30, 1922."

Mr. BLANTON. Mr. Chairman, I make a point of order against the amendment on the ground that it is not germane to the bill.

The CHAIRMAN. Does the gentleman from Maryland wish to be heard on the point of order?

Mr. LINTHICUM. Mr. Chairman, I can not see why it is not germane to the bill. We are providing for the Marine Band in this bill and also for the United States Navy Band. We are not only providing for that band, but we are changing the name of it, and we are taking up various other matters. If anything is germane to this bill, I do not see why this is not.

The CHAIRMAN. Will the gentleman from Maryland indulge the Chair one question?

Mr. LINTHICUM. Yes.

The CHAIRMAN. Is there anything in this bill anywhere which relates to the Naval Academy?

Mr. LINTHICUM. No; there is nothing that relates to the Naval Academy.

Mr. GARRETT of Tennessee. Mr. Chairman, in so far as the title might in any way be controlling as affecting the point of order, if the gentleman from Maryland will yield—

Mr. LINTHICUM. Certainly.

Mr. GARRETT of Tennessee. The title of the bill is a very peculiar title, "Providing for sundry matters affecting the naval service, and for other purposes." Certainly the Naval Academy has something to do with the naval service.

Mr. BLANTON. Mr. Chairman, since the chairman of the committee does not see fit to make a point of order against this amendment, I will withdraw it, although the point of order is good, in my judgment. [Laughter.]

Mr. LINTHICUM. Mr. Chairman, I want to say that the Naval Academy is mentioned on page 8 of the bill.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Maryland.

The amendment was agreed to.

The Clerk read as follows:

ENLISTMENTS IN THE NAVY

SEC. 20. That hereafter enlistments in the Navy may be for terms of two, three, four, or six years, and all laws now applicable to four-year enlistments shall apply, under such regulations as may be prescribed by the Secretary of the Navy, to enlistments for a shorter or longer period with proportionate benefits upon discharge and reenlistment.

Mr. JONES. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment which the Clerk will report.

The Clerk read as follows:

Mr. JONES offers the following amendment: Page 19, line 9, after the word "reenlistment," insert the following: "Provided, That hereafter, upon the presentation of satisfactory evidence as to his age, and upon application for discharge by his parent or guardian, presented to the Secretary within one year after the date of his enlistment, any man enlisted after July 1, 1924, in the naval service or Marine Corps under 21 years of age, who was enlisted without the written consent of his parent or guardian, if any, shall be discharged for his own convenience."

Mr. JONES. Mr. Chairman, I think the chairman should accept that amendment. It is worded exactly as the amendment was worded when it was placed upon the naval appropriation bill of last year except for one change. The amendment of last year was originally offered by my colleague from Texas [Mr. CONNALLY], was inserted in the appropriation bill of last year, and later made permanent law. The only change in the amendment which I have suggested is to give the parent or guardian one year in which to file application for discharge with the Secretary of the Navy instead of 60 days, and to write the change into the permanent law. I will state that since this amendment has been in effect on July 1, 1924, I have had two instances of boys under 21 years who were enlisted and whose parents got around to the proper method of making applications for discharge after 60 days from the time of enlistment and they were thus barred. They ought not to be barred within 60 days. They frequently write to the commanding officer, and before the proper channel is found the 60 days has elapsed.

Mr. BUTLER. What was the action of the House on the question of enlistment?

Mr. JONES. My amendment is in the exact words of the one adopted last year except that it makes the limit one year instead of 60 days for the filing of the application.

Mr. VINSON of Georgia. Under the law to-day such an application must be filed within 60 days, while under the gentleman's amendment it could be filed within one year.

Mr. BLANTON. It gives them one year instead of 60 days.

Mr. JONES. I have heard a number of Members complain that the present 60-day limit bars many applications, and as the House has taken action on this question there ought not to be any opposition to my amendment.

Mr. BUTLER. As it is late in the afternoon let us make a bit of a compromise and make it six months, because they tell us in the Navy they would not like to have the period extended to one year.

Mr. JONES. I think that would be quite enough. I ask unanimous consent that I may amend my amendment in that way and make it six months instead of one year.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to modify his amendment by changing "one year" to "six months." Is there objection?

There was no objection.

The amendment was agreed to.

The Clerk read as follows:

SEC. 21. That any officer of the Marine Corps now in the service shall be credited for all purposes with the actual time served prior to the passage of this act as chief clerk of the Commandant of the Marine Corps previous to being commissioned: *Provided*, That no back pay or allowances of any kind shall be allowed as a result of the passage of this section.

Mr. CONNALLY of Texas. Mr. Chairman—

The CHAIRMAN. For what purpose does the gentleman from Texas rise?

Mr. CONNALLY of Texas. I move to strike out the last word. I want to ask the gentleman from Pennsylvania the name of the gentleman in the Marine Corps that this section is intended to benefit.

Mr. BUTLER. Mr. Chairman, evidently my friend was present when this was discussed a year ago—

Mr. CONNALLY of Texas. No; I never heard of it in my life before.

Mr. BUTLER. I will be delighted to tell the gentleman about it.

Mr. CONNALLY of Texas. But I know from the way this language is drawn that it is intended to do a favor for some individual, and I want to know who it is.

Mr. BUTLER. I am not going to mislead this House on anything.

Mr. CONNALLY of Texas. I know the gentleman will not, and that is why I am asking him about it.

Mr. BUTLER. I thank the gentleman for the compliment. It refers to General McCawley.

Mr. CONNALLY of Texas. I did not know who he was, but I knew it referred to some individual.

Mr. BUTLER. It refers to General McCawley, who is one of the most efficient quartermasters the Marine Corps ever had, and we are all willing to testify to this man's great economy and great service which he has rendered this corps. He is permanently appointed under an old law. He can not retire, because he has not had 30 years of service. He can not be removed, because under an old law he is entitled to remain where he is. He is within two years or two years and a half of the retiring period. He had rendered most excellent service as a military man, as a soldier in the Spanish-American War, and has been decorated for his bravery. There are precedents where civilians—

Mr. CONNALLY of Texas. Why do you want to retire him? That is what I am getting at. What has he done?

Mr. BUTLER. I will be delighted to answer that. I suppose perhaps the Record ought not to contain my answer, but the gentleman from Texas wishes it, and this is it. While I am living I would like to see the man who, in my judgment, is the best administrative officer in the entire service, either the Army or the Navy, promoted—Colonel Radford, of Philadelphia, the only man in this country who hands back money to the Government every year. General McCawley is perfectly willing to retire if Congress will give him the benefit of two and a half years of service. I want to see Colonel Radford, of Kentucky, who runs this great depot in Philadelphia not only to the advantage of his corps but to the advantage of the whole Government, promoted. He is the only officer that hands back money to the Government every year out of his appropriation; and I would ask that this might be done. There is a precedent for it. It would not be fair to General McCawley to say that it was for the good of the service, but in my judgment a most excellent administrative officer would be promoted. He is an officer who rendered fine service during the war and accomplished great economies, and I hoped the House would be willing, as the House has done on two other occasions, to allow this measure to go through.

Mr. CONNALLY of Texas. I will say to the gentleman that the House will do this all right, and will do it because the gentleman wants it done. It will do it because the gentleman's committee wants it done, but it is wrong. It is wrong

to bring in legislation of this kind. It is wrong for the Naval Affairs Committee, a great committee, to single out some individual, and in order to benefit that individual come into this House and ask the Congress of the United States to take a man by law out of his rank and lift him up over all the great mass of officers in the Marine Corps and, in order to confer a special benefit and a special favor upon one individual, change the whole law of the Marine Corps in order that some man whom the gentleman from Pennsylvania likes—

Mr. BUTLER. I admire him very greatly.

Mr. CONNALLY of Texas. Or some man whom the gentleman from Illinois likes—

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. CONNALLY of Texas. Mr. Chairman, I ask that I may have two additional minutes.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for two additional minutes. Is there objection?

There was no objection.

Mr. CONNALLY of Texas. It is wrong, gentlemen. When a man goes into the Army or into the Marine Corps or into the Navy he ought to stand upon the same basis as every other man, and that is the basis of merit and the basis provided by law. And, forsooth, because somebody in the Navy or in the Marine Corps will not be able to be promoted unless they get General McCawley out of the way, and he will not become anything more than a colonel in his day and time they reach down and give General McCawley a promotion in the manner proposed here. I do not know General McCawley. I have nothing against him, but when I read this language, although I had never heard of the matter before, I knew there was some individual to be benefited and that this language was drawn so that it would fit that man and would not fit anybody else.

Mr. BUTLER. I do not suppose, Mr. Chairman—

Mr. CONNALLY of Texas. Will the gentleman please not interrupt me just now? I shall yield all the time the gentleman wants later. But let me conclude this sentence. What does this mean, "any officer of the Marine Corps now in the service who was chief clerk of the Commandant of the Marine Corps prior to becoming a commissioned officer"? In other words, there is no other officer in the Marine Corps that that description will fit except General McCawley. Why do you not name him? Why do you not have the courage to come out and say that General McCawley shall have artificially added to his service two and a half years—two and one-half imaginary years? You have not the courage to do that.

Mr. BUTLER. Oh, yes.

Mr. CONNALLY of Texas. But you come in here through this legislative legerdemain, this legislative deception, and you bring in a general description, "any officer," when you do not mean "any" officer—you mean "one" officer. You did not mean "any" officer when you said that any officer of the Marine Corps—

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. CONNALLY of Texas. Mr. Chairman, I ask for three minutes more.

Mr. BUTLER. I ask that the gentleman may have additional time. I want to ask him one question.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for three additional minutes. Is there objection?

There was no objection.

Mr. CONNALLY of Texas. I love the gentleman from Pennsylvania, but I am talking about the principle that should govern the departments. We stand before the world saying we are all on a plane of equality; that this is the land with no special privileges. We believe in every citizen having the same rights, and yet, if you get into the Marine Corps or the Army or the Navy and you have influential friends on Capitol Hill or on one of these committees—the Naval Committee or the Military Committee—what do you do? This provision is general in its terms. "Any officer"—you would think there was a whole flock who had been chief clerks for the commandants, a whole regiment of them. "Any officer"—but when you come to investigate you find that you have described only one man. He is 6 feet 3 inches tall, he weighs 223 pounds, he is so many years old, so that there is only one man whom it describes, and no mistake about it. You make it as certain as the story of the one-eyed man in the poker game who had been cheating and stealing. One of the players went on to say, "I am not mentioning any names; I am laying down a general rule of conduct, but if that fellow who has been stealing

don't quit cheating I am going to shoot his other eye out." [Laughter.]

It is wrong; we are making the Marine Corps and the Navy and the Army a privileged class. You are making it a privileged class not only from civilians but you are making it a privileged class among the Navy and the Marine Corps. You are establishing a class, a cabal, a little military order within the services themselves. You are picking out a man by name and giving him the privilege of retirement, when other men of equal merit are denied that privilege.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. CONNALLY of Texas. I ask for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LEHLBACH. Will the gentleman yield?

Mr. CONNALLY of Texas. Now, I want to yield to the gentleman from New Jersey in a moment. Now, this is not right. Why did you give General McCawley two years, or whatever it may be, credit that he may retire? You say he is more efficient than any other man in the Marine Corps and, therefore, you want to retire him, get rid of him, kick him out, give him additional time.

Mr. BUTLER. Has not the gentleman lashed me sufficiently?

Mr. CONNALLY of Texas. Oh, no; that is not the reason. The reason is that until they get rid of General McCawley they could not get some other fellow on the roll up another notch and put a star on his shoulders.

Mr. LEHLBACH. Will the gentleman yield?

Mr. CONNALLY of Texas. I will.

Mr. LEHLBACH. I want to say to the gentleman that this bill like all other bills is accompanied by a printed report available to all Members of the House.

Mr. CONNALLY of Texas. I thank the gentleman for the information.

Mr. LEHLBACH. I want to ask the gentleman from Texas whether he thinks he is treating the committee fairly when he says that they have been deceiving the House by this language in the bill, because on page 35 of the report it is distinctly stated that this is in favor of General McCawley.

Mr. CONNALLY of Texas. Oh, I did not mean that. No one would undertake to deceive the gentleman from New Jersey. What I meant was that so far as this language in the bill is concerned, it does not show upon its face in whose favor it was. I was not talking about the report. This language did not deceive anybody.

Mr. LEHLBACH. Then, why did the gentleman from Texas ask the gentleman from Pennsylvania to whom it referred, when he could have read it in the report?

Mr. CONNALLY of Texas. Well, it was easier for the gentleman from Pennsylvania to state it, and I knew he would tell the truth about it. If I had seen the gentleman from New Jersey sitting over there with the report in his hand I should have asked him.

Mr. BUTLER. Now, I will state to the gentleman from Texas that this is rather an exceptional provision. I am willing to admit to my friend that it is a bit of selfishness, but it is the only one in the bill. Now, will not my friend, after he has lambasted me as he has, vote for the provision?

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BUTLER. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. CARTER. Mr. Chairman, I want to call the attention of the gentleman from Pennsylvania to the fact that the numbers of the sections ought to be changed.

Mr. BUTLER. I think that may be done in the House.

The CHAIRMAN. Without objection, the Clerk will make the necessary changes in the numbering of the paragraphs.

There was no objection.

The CHAIRMAN. The question is on the motion of the gentleman from Pennsylvania.

Mr. CONNALLY of Texas. Mr. Chairman, I was on my feet offering an amendment to the bill. I move to strike out section 21.

The CHAIRMAN. The Chair thinks that the gentleman was too late, but the Chair will recognize the gentleman for that purpose.

Mr. CONNALLY of Texas. I offer the following amendment.

The Clerk read as follows:

Page 19, strike out all of lines 10 to 19, inclusive.

The CHAIRMAN. The question is on the motion of the gentleman from Texas.

The question was taken; and on a division (demanded by Mr. CONNALLY of Texas) there were 38 ayes and 82 noes.

So the amendment was rejected.

The motion of Mr. BUTLER was then agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. BEGG, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 2688) providing for sundry matters affecting the naval service, and for other purposes, and had directed him to report the same back with sundry amendments with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. BUTLER. Mr. Speaker, I move the previous question on the bill and all amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross.

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. BLANTON. Mr. Speaker, I offer the following motion to recommit.

Mr. CONNALLY of Texas. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is either gentleman a member of the Committee on Naval Affairs?

Mr. CONNALLY of Texas. I am not.

Mr. BLANTON. I am not.

Mr. CONNALLY of Texas. But I am against the bill, Mr. Speaker.

The SPEAKER. Is the gentleman from Texas [Mr. BLANTON] against the bill?

Mr. BLANTON. I am.

The SPEAKER. The Chair will recognize the gentleman from Texas [Mr. CONNALLY] to offer his motion to recommit.

Mr. CONNALLY of Texas. Mr. Speaker, I offer the following motion to recommit to strike out section 21.

The SPEAKER. The gentleman from Texas offers the motion to recommit, which the Clerk will report.

The Clerk read as follows:

Mr. CONNALLY of Texas moves to recommit the bill to the Committee on Naval Affairs with instructions to report the bill back forthwith with the following amendment: "Strike out all of section 21, page 19 of the bill."

Mr. BLANTON. Mr. Speaker, I offer the following substitute for the motion to recommit, which I send to the desk and ask to have read.

The Clerk read as follows:

Substitute motion to recommit by Mr. BLANTON.

Mr. BLANTON. Mr. Speaker, I move to recommit this bill to the Committee on Naval Affairs with instructions to report the same back to the House forthwith with the following amendments, to wit: On page 9, line 9, strike out "fifty" and insert in lieu thereof "sixty," and in the same line strike out "forty-five" and insert in lieu thereof "sixty"; and on page 10, in line 12, strike out "fifty-six" and insert in lieu thereof "sixty"; and on page 11, in line 17, strike out all of lines 17 to 21, inclusive, and insert in lieu thereof the following:

The Secretary of the Navy shall submit to the Court of Claims such of the claims as he may investigate under this authority as may be found to possess merit, accompanied by a comprehensive presentation of the facts in each case, but such findings so communicated shall not be construed as imposing any obligation upon the Government or releasing any claim or rights of the Government: *Provided*, That jurisdiction be, and the same is hereby, conferred upon the Court of Claims to hear and determine all of such cases so submitted to it by the Secretary of the Navy.

Mr. BEGG. Mr. Speaker, I make the point of order against the motion to recommit.

The SPEAKER. The gentleman will state his point of order.

Mr. BEGG. It is not germane to the bill.

The SPEAKER. Does the gentleman mean to the amendment or to the bill?

Mr. CHINDBLOM. It is certainly not germane to the amendment.

Mr. BEGG. It is not germane to the bill as a substitute amendment, and it is not germane to the Connally amendment. If it is not germane to the bill, of course the point of order would lie to the fact that it is not germane to the Connally amendment.

Mr. BLANTON. Mr. Speaker, it provides along the very line of the bill for an adjudication of claims. The only difference is that instead of referring the report of the Secretary of the Navy back to Congress the Secretary of the Navy sends it to the Court of Claims. It is clearly germane.

The SPEAKER. What does the gentleman say about its being germane to the motion of the gentleman from Texas [Mr. CONNALLY]?

Mr. BLANTON. Oh, that was the suggestion made by the gentleman from Illinois [Mr. CHINDBLOM].

The SPEAKER. The gentleman from Ohio also made the point of order, though perhaps at the suggestion of the gentleman from Illinois.

Mr. BLANTON. A substitute does not have to be germane to the amendment which it seeks to amend.

The SPEAKER. The Chair sustains the point of order.

Mr. GARRETT of Tennessee. Mr. Speaker, I move the previous question on the motion of the gentleman from Texas.

The previous question was ordered.

The SPEAKER. The question is on the motion of the gentleman from Texas to recommit the bill.

The question was taken; and on a division (demanded by Mr. CONNALLY of Texas) there were—ayes 45, noes 83.

So the motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill. The question was taken; and on a division (demanded by Mr. HUDDLESTON) there were—ayes 111, noes 15.

Mr. HUDDLESTON. Mr. Speaker, I make the point of order that there is no quorum present, and I object to the vote upon that ground.

The SPEAKER. The gentleman from Alabama makes the point of order that there is no quorum present. It is clear that there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will bring in absent Members, and the Clerk will call the roll. The question is on the passage of the bill.

The question was taken; and there were—ayes 283, noes 34, and not voting 115, as follows:

So the bill was passed.

The Clerk announced the following pairs:

General pairs:

Mr. Johnson of South Dakota with Mr. Jeffers.
Mr. Rogers of Massachusetts with Mr. Rogers of New Hampshire.
Mr. Fenn with Mr. Garrett of Texas.
Mr. McLeod with Mr. Corning.
Mr. Watson with Mr. Clark of Florida.
Mr. Anthony with Mr. Sherwood.
Mr. Fredericks with Mr. Kunz.
Mr. Denison with Mr. Mansfield.
Mr. Mills with Mr. Bankhead.
Mr. Snyder with Mr. Morehead.
Mr. Porter with Mr. Johnson of Kentucky.
Mr. Madden with Mr. Gallivan.
Mr. Winslow with Mr. Doyle.
Mr. Fairchild with Mr. Parks of Arkansas.
Mr. Tinch with Mr. Barkley.
Mr. Swoope with Mr. Ward of North Carolina.
Mr. Parker with Mr. Gambrell.
Mr. Clarke of New York with Mr. McNulty.
Mr. Manlove with Mr. Weller.
Mr. Morton D. Hull with Mr. Drewry.
Mr. McKenzie with Mr. Gilbert.
Mr. Vestal with Mr. Wilson of Indiana.
Mr. Morin with Mr. Black of Texas.
Mr. White of Maine with Mr. Almon.
Mr. Michaelson with Mr. Lilly.
Mr. Hull of Iowa with Mr. O'Brien.
Mr. Thompson with Mr. Geran.
Mr. Sanders of Indiana with Mr. Davey.
Mr. Moore of Illinois with Mr. Kent.
Mr. Stalker with Mr. Buckley.
Mr. Keller with Mr. Johnson of West Virginia.
Mr. William E. Hull with Mr. Cook.
Mr. Reed of West Virginia with Mr. McSwain.
Mr. Wyant with Mr. Dominick.
Mr. Williams of Michigan with Mr. Lee of Georgia.
Mr. Anderson with Mr. Eagan.
Mr. Merritt with Mr. Rankin.
Mr. Beedy with Mr. Logan.
Mr. Crowther with Mr. Greenwood.
Mr. Edmonds with Mr. Howard of Nebraska.
Mr. Miller of Illinois with Mr. Upshaw.
Mr. Cable with Mr. Hull of Tennessee.
Mr. Fish with Mr. Martin.
Mr. Phillips with Mr. Howard of Oklahoma.
Mr. Roach with Mr. Pou.
Mr. Fitzgerald with Mr. Hammer.
Mr. Garber with Mr. Thomas of Kentucky.
Mr. Schall with Mr. Sabath.
Mr. Kahn with Mr. Wright.
Mr. Larson of Minnesota with Mr. Humphreys.
Mr. Tinkham with Mr. Smithwick.
Mr. Haugen with Mr. Griffin.

Mr. Rosenbloom with Mr. Sullivan.
Mr. Cole of Ohio with Mr. Taylor of Colorado.
Mr. Schneider with Mr. Reed of Arkansas.
Mr. Nelson of Wisconsin with Mr. Berger.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will open the doors.

On motion of Mr. BUTLER, a motion to reconsider the vote by which the bill was passed was laid on the table.

PRIVILEGES OF THE HOUSE

Mr. CONNALLY of Texas. Mr. Speaker, I rise to a question affecting the privileges of the House.

The SPEAKER. The gentleman from Texas will state it.

Mr. CONNALLY of Texas. I have just been informed that this afternoon in the course of the deliberation on this bill the Naval Committee has had an admiral of the Navy here on the floor of the House advising, helping, and directing this legislation, and I want to inquire if that is true if the rules do not—

The SPEAKER. The Chair is responsible for it. The Naval Committee asked the Chair if they could bring—the Chair did not know it was an officer of the Navy, but a civilian—somebody familiar with the bill on the floor. The Chair said they could. The Chair thinks it is the custom of a committee to bring somebody who is familiar—

Mr. CONNALLY of Texas. I was not talking about a civilian, but an admiral of the Navy, and my understanding is the Judge Advocate of the Navy has been here this afternoon.

The SPEAKER. The Chair does not know—

Mr. CONNALLY of Texas. I am asking—

Mr. BRITTEN. By direction of the committee on yesterday I asked the Speaker of the House if that committee might have the services of a civilian employee of the Navy Department to help us in the consideration and passage of the reserve bill, which is a very complicated bill, and the Speaker said that if we did not have a clerk on the floor we were entitled to bring in a Government employee.

Mr. CONNALLY of Texas. I ask the gentleman if he knows whether or not Admiral Latimer has not been here on the floor during the progress of this naval bill this afternoon?

Mr. BRITTEN. He has not.

Mr. CONNALLY of Texas. He was in the cloakroom?

Mr. BRITTEN. Yes; he was called up twice on my account.

Mr. CONNALLY of Texas. That is part of the floor of the House.

Mr. BRITTEN. A gentleman on that side asked if an amendment he had prepared would be acceptable to me. I said I thought the language of the bill was best but that I would ask the Judge Advocate General of the Navy, Admiral Latimer.

Mr. CONNALLY of Texas. He is not a civilian?

Mr. BRITTEN. No.

Mr. CONNALLY of Texas. That is not the man to whom the Speaker referred. I am not objecting to a civilian, but I am talking about admirals being on the floor of the House. My information is that one of the employees of this House said he saw on the floor and in the cloakroom—

Mr. BRITTEN. He was in the cloakroom, but not on the floor or the aisles of the floor.

Mr. CONNALLY of Texas. The cloakroom is generally recognized as part of the Chamber.

Mr. GARRETT of Tennessee. Mr. Speaker, of course it was a violation of the rules of the House for anyone to be in the cloakroom as much as to be upon the floor, because the rule applies to the cloakroom just as it applies to the floor of the House.

Mr. BRITTEN. If that is so, I am very sorry and am entirely responsible for the infringement, but I thought I was doing something to help along the consideration of the bill.

Mr. GARRETT of Tennessee. Section 2, Rule XXIII, says:

There shall be excluded at all times from the Hall of the House of Representatives and the cloakrooms all persons not entitled to the privilege of the floor during the session, except that until 15 minutes of the hour of the meeting of the House persons employed in its service, accredited members of the press entitled to admission to the press gallery, and other persons on request of Members, by card or in writing, may be admitted.

That is, 15 minutes before the hour of meeting.

Mr. BRITTEN. If the gentleman from Tennessee will yield, my good friend from Tennessee knows that rule is being violated practically every day by Members on both sides. They have children around here, grown children.

Mr. GARRETT of Tennessee. Well, I did not know of that. I have seen young children come upon the floor of the House occasionally, and, of course, I have seen on public days, upon some extraordinary occasion, people push their way in who are not entitled to the privileges of the floor; but certainly when a legislative proposition is brought up, I say this with all possible respect, it is particularly—well, I think the rule ought to be enforced. I will not be stronger than that. Now, Mr. Speaker, I do not wish to embarrass the committee or the Speaker touching the gentleman who is on the floor now, a civilian employee of the Navy, but I think that only the clerk of the committee having legislation is entitled to the privileges of the floor—I think that is what the rule says—and without any desire to embarrass the committee or to embarrass the Speaker, I think—

Mr. KING. Mr. Speaker, will the gentleman yield?

Mr. GARRETT of Tennessee. I yield to the gentleman.

Mr. KING. I want to ask the gentleman if that practice was not established in the days of former Postmaster General Burleson, who occupied the Democratic cloakroom most of the time?

Mr. GARRETT of Tennessee. The Postmaster General as an ex-Member was entitled to the privileges of the floor, and as a member of the Cabinet he was entitled to the privileges of the floor.

Mr. KING. He was here as a lobbyist, as the whip for the Democratic administration.

Mr. JOHNSON of Washington. Does not the gentleman from Tennessee think that his suggestion respecting the rule as to admissions to the floor, that it be limited to clerks, should be broadened so as to admit those who serve on the Legislative Drafting Committee and who help the clerks and committees in the preparation of certain legislation?

Mr. GARRETT of Tennessee. That is a question that might be taken into consideration in connection with the next revision of the rules. Perhaps it ought to be broadened; I do not know. There is no rule that is made more ironclad than the rule as to the admissions to the floor. It even goes so far as to say, and that provision was made in order to protect the Chair from embarrassment; it was adopted, I think, first in the days of Speaker Reed—it goes so far as to say that it is not in order to ask unanimous consent that any person be admitted to the floor who is not entitled to the privilege.

The SPEAKER. The Chair was asked yesterday by one of the members of the committee if they could have on the floor a civilian employee of the Navy who had aided them in drafting the bill. The Chair, not remembering that that was contrary to the rules and knowing that it had often been done, said it could be done here. But hereafter, if it is the desire of the House, the Chair will undertake to enforce that rule strictly.

Mr. CONNALLY of Texas. My question and objection do not concern so much the social qualities of the admiral, but we are at this time considering legislation in which the admiral was probably interested; at least he was here as a part of the naval force, and I think if he wants to advise the committee or if they want to advise with him they can advise with him out in the hall. It is not necessary for him to sit in the cloakroom. They ought at least to get along for a few minutes without consulting their naval authorities.

Mr. BRITTEN. Mr. Speaker, may I say to the gentleman that the distinguished gentleman from Virginia [Mr. MOORE] had submitted to me an amendment which he proposed to offer to the bill. I was looking for Admiral Latimer, and I told one of the boys in the cloakroom to find him. My purpose was to consult the admiral.

Mr. CONNALLY of Texas. That accentuates my suggestion. The gentleman did not know whether he was for or against the amendment. He felt he must consult the admiral. [Laughter.]

Mr. BRITTEN. That is a funny way to put it. The proposed amendment merely clarified the section.

MATTERS AFFECTING THE NAVAL SERVICE

Mr. PATTERSON. Mr. Speaker, I ask unanimous consent to extend my remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. PATTERSON. Mr. Speaker and gentlemen of the committee, millions of dollars, probably billions, were wasted by the United States Government in the prosecution of the World War. A great amount of this money was lost because we were not prepared as a Nation for war and in the hurry and confusion of getting ready unscrupulous contractors took advantage

of the situation and made huge profits at the expense of the taxpayers. They got theirs while the getting was good. But it is not my purpose to attempt to rake up any of the scandals connected with the saturnalia of extravagance that was so prevalent during the duration of the great conflict. That is past and gone and it is probably best to let the dead past bury its dead and not attempt to revive unpleasant memories.

It is rather my purpose to call the attention of Congress to the fact that in the hurry and excitement of the war period in some instances injustice was done to some contractors by the Government, and a conspicuous instance of this is the case of the New York Shipbuilding Co., of Camden, N. J., in connection with the construction of battleship No. 42, now in the service of the country under the name of the *Idaho*. This vessel is one of the newest and best ships of our fleet, and at present represents a loss to the contractors of approximately \$2,000,000. For five years now the New York Shipbuilding Co. has been endeavoring to secure an adjustment of a portion of this loss, which was caused directly by the orders of Government officials to speed up work on the vessel during the war, but so far their efforts have not met with any success. Under the terms of section 9 of the pending omnibus naval bill it may be possible to adjust the claim of this contractor, but in my opinion this is very doubtful and in consequence I have introduced at this session H. R. 9969 for the relief of the New York Shipbuilding Co. in connection with the losses sustained by that contractor in the construction of the battleship *Idaho*. The claim, in my judgment, is a perfectly proper one and has been indorsed by Secretary of the Navy Josephus Daniels and his successor Secretary of the Navy Edwin Denby and other high officials of the Navy Department.

The battleship *Idaho* has met every test and requirement of the Government and is the same type of vessel as the battleship *Washington*, so recently destroyed in accordance with the terms of the disarmament conference. You are all familiar with the difficulty that was encountered in sinking the unprotected *Washington*. She was so staunchly constructed that it seemed almost impossible to destroy her, and if the test should ever come the enemy would find that the *Idaho* was equally as well built as the *Washington*, and when manned by an American crew would never succumb to the shell fire of a hostile fleet. I am merely comparing the staunchness of the *Idaho* and the *Washington* as concrete evidence of the sort of work turned out by the New York Shipbuilding Co. This corporation has been established for a quarter of a century in my home city and has built many of the best vessels in the American Navy. It is not a fly-by-night contractor but a responsible corporation headed by patriotic men of ability and integrity, and when they make a claim for reimbursement against the Government the public may rest convinced that the claim is an honest one and possesses merit that can be backed up with the facts. The builders of the *Idaho* are not asking for any profit on their work. They are merely asking the Government to reimburse them for the losses that they sustained by reason of being made to pay increased wages and overtime when ordered to hasten the completion of the *Idaho* so that she might be made available for service in the World War.

The contract for the *Idaho* was not a cost-plus contract but a flat, fixed-price contract made November 9, 1914—over 10 years ago—with the New York Shipbuilding Corporation. Delivery of this ship was made on time on March 24, 1919, the three-year delivery date originally fixed by the contract having been extended by the Navy Department because of contingencies beyond the control of the builders. The contract price was \$7,250,000 flat and was based on estimates made in accordance with labor and material conditions then prevailing. Between the contract date, November 9, 1914, and the delivery date, March 24, 1919, many things happened to upset and dislocate the contractor's estimates under which the \$7,250,000 bid had been made.

At the outset it is important to note that this bill does not afford relief to the contractor for the many increased costs during this period, the risk of which is always inherent in any business transaction and which amounted of themselves to over \$700,000. This bill seeks to give the contractor relief only for such increased costs as were due to the two factors of cost which the Government itself set in operation and to which the contractor had no choice except to submit, namely:

First. Increased wages paid to workmen on this fixed-price contract. These increases do not grow out of any contract between the men and the contractor but were imposed upon the contractor by the so-called Macy Board, an emergency agency of the war, created by a contract between governmental department officials and labor unions to control and stabilize the wages of men engaged in Government work in shipyards

so as to insure continuous work on Government contracts. (See Official Bulletin of August 25, 1917.) The Macy Board not only increased the wages of these men but even directed that the increases should be retroactive for months prior to the dates of the awards. These increases did not prejudice contractors on the great majority of strictly war contracts placed on a cost-plus basis or for a fixed price that called for adjustments in accordance with changing labor rates but did work havoc with nonwar-time flat, fixed-price contracts in yards which were concurrently engaged in governmental war work.

Second. Overtime wages paid to workmen by direction of the Government in order to expedite this contract. The Government adopted at the outset of the war a policy of expediting the construction of destroyers, battleships, and merchandise vessels, leaving cruisers, scout ships, and so forth, for later deliveries. To secure this expedition "overtime" was directed on this class of work. Back in 1914 "overtime" was not permitted under the provisions of the *Idaho* contract, in line with all previous peace-time contracts. The contractor was then expressly forbidden by the Government contracts to permit any laborer to work more than eight hours per day. With the severe pressure of war coming on in 1917, however, eight-hour construction work was done away with by proclamation of the President, and contractors were directed to employ overtime on all work which the Government desired expedited. This caused no grievance to a contractor on a cost-plus basis; but to a contractor who, prior to the war, had made a flat fixed-price contract with no thought of overtime—rather being forbidden to employ overtime—the use of overtime work meant that he was paying time and a half for his labor without any increase in the contract price of the ship unless the Government, as any other shipowner would direct his builder, directed him to use overtime work with the promise of later adjustment. This was the fact in connection with the New York Shipbuilding Corporation contract—that is, there was an implied contract arising under the facts to repay the contractor the amount of any such increased cost.

The difficulty now is that such directions for "overtime," given in the excitement and pressure of war, while in no way indefinite, did not have all the formality of statutory authorized transactions.

Therefore, when the contract was completed, owing to statutes affecting Government work, administrative difficulties arose in the settlement of the accounts, which the officials have held did not permit them to pay the New York Shipbuilding Corporation anything in excess of the fixed price of the ship and such additions as are so-called "changes" expressly provided for in the contract, although the officials acknowledge the inherent justice of the claim. This bill is to correct such injustice created by administrative limitations forced by the deficiencies of present statutes.

WAGE INCREASES

In August, 1917, the "Shipbuilding Labor Adjustment Board," popularly called the Macy Board, was organized under an agreement concluded between representatives of the Navy Department, the Emergency Fleet Corporation, and the American Federation of Labor, for the purpose of adjusting disputes arising during the war in the shipyards of the country where Government work was being performed.

This board made an award on February 14, 1918, as to wages and hours of work in the shipyards of the Delaware River district, which included the yard of the New York Shipbuilding Corporation. This award not only made a substantial increase in the rate of wages, but also made this increase retroactive to November 2, 1917.

Upon receiving notice of this award, the New York Shipbuilding Corporation telegraphed to the Secretary of the Navy, as follows:

Do you authorize us to pay our men on Navy work according to findings of Shipbuilding Wage Adjustment Board. We have been ordered by Emergency Corporation to make increases awarded and can not discriminate.

The Secretary of the Navy replied:

Referring to your message of February 19, the department expects to reimburse contractors for unavoidable increases of cost due to adoption of wage adjustment board scale, these matters to be treated as changes on the fixed-price contracts. Submit increases to department for approval.

Acting on this assurance of the Navy Department that it would be reimbursed for the increase in cost caused thereby, the New York Shipbuilding Corporation adopted the new scale of wages and also paid the retroactive increases fixed by the board from November 2, 1917, to February 25, 1918, the retro-

active increases due to this one award alone amounting to about \$125,000.

Wages were again increased by the Macy Board on November 16, 1918, and these increases, which were made retroactive to October 7, 1918, were also paid by the New York Shipbuilding Corporation.

The increase in cost due to these awards was submitted by the New York Shipbuilding Corporation to the Navy Department from time to time, and at the end of the contract an audit was made by the Navy Department fixing the amount of increased cost due to wage increases allowed by the Macy Board at \$992,322.50. In a case which the Navy Department considered similar the Comptroller of the Treasury had ruled that he could not authorize additional compensation due to increase in labor cost which was not provided for under the terms of the contract. In consequence, the Comptroller ruled that the New York Shipbuilding Corporation could be paid only \$120,513.55 of the amount claimed, and the latter amount was allowed as "changes" and payable as such as an authorized cost under the contract. For the balance of \$871,808.95 (of the total \$993,333.50), audited increase, the New York Shipbuilding Corporation has not yet been reimbursed in accordance with the agreement of the Navy Department because of the ruling of the Comptroller of the Treasury, and it can not be reimbursed by the Navy until there is a statute enacted authorizing such payment.

The increases in wages which are the subject of this controversy do not include any increases that were granted by reason of agreements between employer and employee, of which increases there were a substantial amount, but only those which were due solely to the express war-time emergency directions of the Government, under the control which the Government assumed in August, 1917, over shipyard labor.

In the last two sessions of Congress this matter has been before the House Committee on Naval Affairs in connection with a bill for the relief of contractors generally (H. R. 2688), and in its report on this bill the committee referred to the claim of the New York Shipbuilding Corporation as a notable example of the cases meriting relief on account of the injustice occasioned by the ruling which the Comptroller of the Treasury felt obliged to make in limiting payments to amounts covered by the original contracts.

OVERTIME

The claim also provides for reimbursement to the New York Shipbuilding Corporation for payments made by it to employees in excess of regular-time rates for overtime work on the battleship *Idaho*, employed at the direction or with the authorization and approval of the officers of the Government.

Immediately prior to and after the entry of this country into the war every effort was made by the Navy Department to expedite work on this battleship, and the contractor was urged by telegrams from the Navy Department and by verbal instructions from the officers in the yard to expedite the work in every possible way, and in a telegram of March 21, 1917, the department suggested that the "question of change of cost be settled as a change under the contract." Therefore the contractor began to employ and continued to employ "overtime" on this contract whenever possible to meet the demands of the Navy Department, with its full knowledge, acquiescence, and approval. The contractor submitted bills for the increased cost of this work from time to time to the department in the belief that the increased cost occasioned thereby would be paid. The "overtime" employed on this contract by the contractor, at the insistence of the department, for speed in the construction of the battleship, and with the approval of the department, was not with a view of enabling the contractor to deliver the ship "on time"—March 24, 1919. This date, as a matter of fact, was determined upon long after the ship was actually delivered and independently of and in no way connected with the claim of New York Shipbuilding Corporation for increased cost due to the overtime work directed by the department, nor was the extension of the original delivery date to the actual delivery date in any way conditioned upon a waiver by the contractor of such claim. The contractor was not employing this "overtime" to meet a then known date of delivery. It was using overtime work because the Government desired it in the interest of the Navy. The contractor still had in reserve many grounds for extending the delivery date, even beyond March 24, 1919, had it been necessary to fall back upon them.

The increased cost of governmental sanction of overtime work has been calculated by the New York Shipbuilding Corporation at upward of \$315,000. As already indicated, the original contract figures were based on the denial of any

overtime whatsoever, at anybody's request, or in anybody's interest. The New York Shipbuilding Corporation has requested the Navy Department to audit such amount, and it is reasonable to expect an early fixing by audit of the amount of this claim.

The increased cost of this battleship, by reason of wage increases and "overtime" alone, caused a loss to the contractor on this contract of over \$1,300,000. From other causes, "business risks," the contractor lost about \$700,000. This \$1,300,000 loss the Government has either expressly or impliedly agreed to repay to the contractor, and it constitutes both a moral and a legal obligation of the Government. Only the peculiar technical requirements surrounding Government contracts prevent a present payment, which in ordinary business would be honored at once.

Under the stress of war conditions, orders and instructions of the Government were at once carried out in good faith and without question by the New York Shipbuilding Corporation, without insisting on a formal written agreement, and without awaiting further formal legislative sanction, which the Comptroller now finds necessary. Through the expedited construction of this naval work the Nation had both a material and moral advantage and benefit, and such construction gave confidence to the Nation and was a threat to the enemy. The contractor, however, has not yet been reimbursed for the loss it sustained at the direction of the Government in making this result possible. The loss caused to the contractor by its reliance on such governmental direction should be paid by the Government, and it is for that purpose that this bill is urged for passage.

NAVAL RESERVE AND MARINE CORPS RESERVE

Mr. BRITTEN. Mr. Speaker, by direction of the Committee on Naval Affairs I desire to call up the bill H. R. 9634, No. 385 on the Union Calendar.

The SPEAKER. The gentleman from Illinois calls up the bill H. R. 9634, on the Union Calendar, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 9634) to provide for the creation, organization, administration, and maintenance of a Naval Reserve and a Marine Corps Reserve.

The SPEAKER. This bill is on the Union Calendar. The gentleman from New Jersey [Mr. LEHLBACH] will please take the chair.

Thereupon the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 9634) to provide for the creation, organization, administration, and maintenance of a Naval Reserve and a Marine Corps Reserve, with Mr. LEHLBACH in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 9634, which the Clerk will report.

The Clerk again read the title of the bill.

Mr. BRITTEN. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. BRITTEN. Mr. Chairman, I would like to ask unanimous consent that we dispense with the usual time of debate for and against the bill, and for this reason: Unless the bill is passed this afternoon, it will not become a law for two years to come. This is our last day on the floor. We had one day during the first session of Congress. If this reserve corps bill is not finished to-day, it will not be passed and enacted into law during this session of Congress, because we will not have another opportunity to present it to the House. Because of that fact, Mr. Chairman, I move that the usual debate on the bill be dispensed with.

Mr. BLANTON. That is not in order.

The CHAIRMAN. The motion can not be made. Does the gentleman desire to reserve his time?

Mr. BRITTEN. Yes.

The CHAIRMAN. Is there anyone desiring to speak in opposition to the bill? If not, the Clerk will read the bill for amendment.

Mr. BRITTEN. Mr. Chairman, for the benefit of the record, I want to say just a few words as to the necessity for a trained body of citizen-sailors who may be called upon in time of emergency to augment the personnel of the regular naval establishment.

Once upon a time, in the history of civilization, there was a period when wars between contending powers were carried on almost entirely by professional military men, both ashore and afloat, and the results of conflict were largely decided by the numbers and efficiency of these specialists on the one side or the other. It thus came about that the sizes of the various military establishments, maintained permanently and ostensibly for the national defense, increased until in the course of time a limit was reached in the burden they imposed upon the people; greater permanent establishments could not thereafter be maintained and the people continue to thrive. Then, at that point, greater strength in conflict was gained by the citizens themselves becoming warriors temporarily; until now the actual waging of wars is in no sense confined to the professional warriors, but is engaged in by the entire populations of contending nations, in one form or another.

To-day, no great nation can afford to maintain an army or a navy of sufficient size to meet its war-time needs, nor indeed to meet its probable needs during even the first shock of war. Leaving out of consideration the dangerous militaristic tendencies in the policies of the nation such a great permanent armed force might entail, such a force is impossible for any nation through the sheer force of economic necessity. All the great nations therefore find themselves obliged to maintain reserves of officers and men especially trained and immediately available in case of sudden emergency, but who derive their means of sustenance from other lines of endeavor, who are producers rather than consumers so far as the wealth of the nation is concerned. So that to-day we find England and Japan and all the great powers maintaining reserves for their armies and navies, immediately available in case of necessity and especially trained during short intensive periods of annual training, but who are engaged in useful pursuits during the balance of the year.

This bill relates entirely to the reserve forces required for the United States Navy. The reserve forces for the United States Army were provided for in the national defense act of 1916 under the provisions of which our National Guard and the Organized Reserves of the Army are maintained. The national defense act, as later modified from time to time, was used as a model in drafting this bill to a very large extent and so far as the provisions of that act are applicable to training for service in the Navy.

All great wars during the past 50 years have come about with terrible suddenness; the tendency of aggressor nations is to strike before the intended victim has time to mobilize her defenses. If we should unhappily become engaged in war with any of the great powers of the world, from which I devoutly pray the providence of God may ever deliver us, the first blow must be struck on the ocean, the first great effort must be for the mastery of the seas, for without that the transportation of men and munitions overseas will be practically impossible. Immediately war becomes imminent, there are certain things we must do at once in order to bring our forces afloat up to the greatest possible strength.

(a) We must increase the number of officers and men on our battleships, cruisers, destroyers, and so forth up to their war-time complements.

(b) We must place the fighting vessels—cruisers, destroyers, and so forth—now out of commission and laid up at the various navy yards into commission, officer and man them, and join them up with the fleet to meet the enemy.

(c) We must man and commission the auxiliary vessels now out of commission.

(d) We must open up training camps and shore stations where additional men obtained by draft or otherwise may be trained for duties afloat as the war progresses, and we must provide the instructors and officers for these institutions.

(e) We must furnish officers and men for such miscellaneous activities as inspectors of ordnance and engineering and other material on shore, personnel administration on shore, radio activities, intelligence service, and many other technical duties.

As stated, the officers and men for these positions can not be maintained in the regular Naval Establishment; they must come from the civilian population, and in order to be effective, they must be at least partially trained in the duties they will be expected to perform. Under our present ideals of personal liberty this training and preparation must be voluntary on the part of those taking it; it must therefore not only be effective but also to a certain degree attractive.

In the act of August 29, 1916, Congress provided for a Naval Reserve Force, and this act as modified by the act of July 1, 1918, and certain subsequent acts is still in effect. The Naval Reserve Force created by the act of August 29,

1916, did not have time to function as a peace-time organization before our entry into the war, and during the course of the war it grew to tremendous size; at the conclusion of the war there were 21,985 officers and 273,694 men on the rolls of the Naval Reserve Force. As these men were released from active service an attempt was made to form them into various drilling organizations, but due to lack of facilities such as armories, and so forth, and lack of funds for securing these facilities, and also due to the fact that attendance at drills was not made a prerequisite for the payment of retainer pay until the act of 1920, and also due to the fact that following their demobilization most of these reservists were in a measure satiated with martial affairs, satisfactory results were not obtained.

Then in efforts to remedy this situation certain additional enactments were made from year to year, but while these enactments did help very materially they also lead to varying interpretations as to their real meaning when taken in conjunction with laws already in existence, with consequent adverse comptroller's decisions and general dissatisfaction.

In September of 1921 the Navy Department, finding it impossible to carry on the Naval Reserve Force then in existence in the manner prescribed by law and with the amount appropriated for that purpose for the fiscal year 1922, disenrolled the entire Naval Reserve Force, excepting that small class comprising ex officers and men of the regular Navy, known as class 1, and those of the other classes who voluntarily transferred to the inactive class, known as the volunteer class, where they were not required to drill or train and obligate funds. A board of experienced naval officers, comprising 3 rear admirals, 2 captains, and 1 lieutenant commander, was called to make a thorough study of the entire Naval Reserve situation and to make recommendations as to remedial measures; this board met over a period of several weeks, and its deliberations were participated in by Naval Reserve officers of experience in Naval Reserve and Naval Militia affairs. The bill which we are now considering is based on the very complete findings and recommendations of that board; it was prepared by the department and then carefully considered, in the years following the report of the board, by both representatives of the Navy Department and representatives of the Naval Reserve Force until it finally reached its present form, which, so far as I am able to ascertain, is satisfactory to the department and to the Naval Reserve Force; and, I may add, is also entirely satisfactory to the Committee on Naval Affairs, which urges its enactment.

After the submission of report by this board just referred to, and pending the enactment of remedial legislation, it was desired to carry on the reserve as a going organization so far as possible, utilizing those members who remained in the reserve by transfer to the inactive class and with such recruits as could be obtained. Sufficient money was appropriated for the fiscal year 1923 to resume activities on a small scale, and the amounts appropriated for the succeeding years permitted continuing Naval Reserve activities and training in a modest way; and these have been going forward with increasing intensity and satisfaction until we now have 107 drilling organizations scattered through the country, but mostly on the seaboard, carrying 1,963 officers and 13,642 men on their rolls, and with a total reserve force of 4,014 officers and 16,990 men, exclusive of those transferred men of the Fleet Naval Reserve of 16 and 20 years' service.

These various organizations are provided with armories and with arms and equipment; armory drills are held at least once each week. The drill period of one and a half hours is devoted to Infantry, Artillery, great guns, and so forth, and to instruction by classes in seamanship, ordnance, navigation, engineering, electricity, radio, signaling, and so forth. Officers of the regular Navy, such as recruiting officers and hydrographic officers, who are performing shore duty in the vicinity of drilling organizations, are given additional duty as instructors-inspectors of those organizations.

A total of 56 vessels, mostly Eagle boats and gunboats, have been assigned to the exclusive use of these organizations. These are utilized for instructional purposes while alongside dock, and also for short week-end cruises, and the annual period of 15 days' active training duty afloat is generally performed on board these vessels. These 15-day cruises are carried on up and down the coasts and on the Great Lakes all summer long. Aviation training is given to qualified aviators at the regular aviation stations and on shipboard. Three Naval Reserve aviation training stations have been established for the purpose of training new blood, officer material, to become aviation officers in the reserve. These stations are located at Boston, Brooklyn, N. Y., and Chicago. The training

given at these stations involves a course of ground instruction, 10 hours' dual flight with instructor, and 30 hours' solo flight, including formation flying, stunting, and so forth, after which the student aviator is given an additional course of instruction lasting about 45 days at a regular aviation station, when he is ready for commissioning as ensign aviator in the Naval Reserve Force.

Naval militia organizations were being maintained in some 22 States and Territories and the District of Columbia in August, 1916, when the present Naval Reserve Force was born. These organizations were simply naval battalions attached to the volunteer militias of the various States. The act of February 16, 1914, prescribed certain standards that these organizations should conform to in order to obtain Federal assistance in the way of loans of equipment, and so forth. The act of August 29, 1916, federalized these naval militia organizations by bringing them into the Naval Reserve Force as a distinct class, called the National Naval Volunteers. The act of July 1, 1918, abolished the National Naval Volunteers and transferred all the members thereof to class 2 of the Naval Reserve Force. In the years immediately following the war, when it was so hard to carry on Naval Reserve activities, several of the States returned to their pre-war naval militia organizations; these organizations again received Federal recognition in the appropriation bill for the year 1921-22, wherein it was provided that these organizations should form a part of the Naval Reserve Force, and the Secretary of the Navy was authorized to provide for their wants in the way of loans of equipment, and so forth, provided the members of these organizations were also members of the Naval Reserve Force. This provision, enacted on a year-to-year basis, has been contained in each of the regular appropriation bills since that time.

In section 28 of this bill we are proposing to continue this arrangement indefinitely. Members of these organizations are also naval reservists; they receive nothing from the Federal Government that they would not be entitled to receive solely as naval reservists. They receive certain appropriations from their States for administrative and armory expenses, and the Federal Government is relieved to that extent; they receive nothing from the States for personal remuneration for drill attendance or active duty. These charges are met by the Federal Government under their status as naval reservists. The individual States benefit by having these naval militia organizations available for State militia duty, and the Federal Government benefits by having them available in case of war and is relieved of part of their expense of maintenance.

These Naval Reserve activities are going forward in the face of discouraging conditions, due principally to defects in existing law. The fundamental law under which this force now operates was enacted immediately preceding our entrance into the World War. During the war certain faults in the original law developed and attempt was made to remedy them by the act of July 1, 1918. Since the war certain other faults have developed and attempts have been made to correct them by additional legislation, generally carried in appropriation measures, and there are certain other faults which are now being complained of by the Navy Department and by the naval reservists themselves—until we now have a hodgepodge of laws, subject to various interpretations which lead to loss of interest, morale, and efficiency on the part of the Naval Reserve Force. The principal objectionable features in the present law it is necessary to remedy are as follows:

(A) Existing law requires performance of three months' active duty before a reservist can be paid for drill attendance. Money is appropriated on the basis of giving each reservist 15 days active duty for training per year, and 15 days per year is generally the limit of vacation given reservists by their employers in civil life, during which they can take active duty for training. On this basis it would take a recruit coming into the Naval Reserve Force six years to get what is now given a National Guardsman the moment he starts drilling; and it is, therefore, impossible to attract and utilize the very ones it is imperative to have if the organization is to remain in existence; that is, young men, new blood. In order to correct this it is necessary to give drill pay, as is done in the National Guard, for drill attendance, without regard to previous service.

(B) Existing laws require active training afloat before pay can be given for drill attendance. It is desired to require active duty afloat, but not to make the penalty for failure to take such training afloat forfeiture of drill pay, which tends to discourage any further training whatever, but to make it discretionary with the Secretary of the Navy, allowing him to use his judgment as to whether the delinquent may have failed to train for good and sufficient reasons beyond his own con-

trol, or whether the delinquent might better be transferred to the inactive class of the Naval Reserve or disenrolled altogether.

(C) The pay of naval reservists for drill attendance is unduly high for those in the higher grades and of long service as compared with the National Guard. It is desired to place their drill pay on a parity with the National Guard.

(D) Existing laws do not allow subsistence to reservists while performing volunteer duty afloat without pay, thereby discouraging such duty; it is desired to remedy this by giving them what the National Guard receive for similar duty, such as duty on target range.

(E) Existing laws do not allow "military leave" to naval reservists who are Government employees; it is desired to place them on a parity in this respect with the National Guard.

(F) Existing laws are subject to various interpretations due to their multiplicity and varying provisions. It is desired to repeal all and make a fresh start, so that it may be known exactly where we stand.

In short, in properly and economically building up a Naval Reserve Force new legislation is required, and of such an extensive nature that it seems well to reorganize the whole Naval Reserve Force rather than to attempt to correct existing legislation.

The following are the high points of this bill:

It takes away no privileges now enjoyed by any classes of the Naval Reserve Force, except it provides that instead of retainer pay there shall be pay for service; this will result in somewhat less pay for officers in the higher grades.

It establishes a Marine Corps Reserve absolutely on a parity with the Naval Reserve.

It repeals all old laws which have been so difficult of interpretation.

It establishes in the Naval Reserve the same grades, ranks, and ratings as exist in the regular Navy.

Officers are commissioned at the pleasure of the President, as are officers of the regular Navy, and enlistments of men are established for the same period as enlistments in the regular Navy.

It provides that no officer or man shall be discharged except for full and sufficient cause.

Officers and men are placed under the same laws in time of war or national emergency as are officers and men of the regular Navy.

It permits commissioned grades up to commodore.

It authorizes the appointment of a certain number of midshipmen to the Naval Academy from the Naval Reserve.

It provides for promotion in time of war up to the grade of lieutenant commander with running mates of the line, and by selection for ranks above that of lieutenant commander.

It places naval reservists injured in line of duty while performing active duty under orders, on a parity with civil service employees suffering similar injuries.

It provides for pay for drills, training, and active duty, based on the pay allowed the National Guard.

It does away with confirmation in grade and provides that drill training or active duty pay shall begin upon appointment or enlistment.

It provides for a liberal uniform allowance.

It provides for an honorary retired list without pay upon reaching the age of 64.

It provides that men enlisting in the Naval Reserve within four months after their discharge from the regular Navy lose none of the benefits of continuous service.

It safeguards the interests of enlisted men of the regular Navy who have been transferred to the Fleet Naval Reserve after 16 and 20 years' service, and provides the same privileges for men at present in the Navy.

It provides subsistence for volunteer duty afloat without pay.

It provides a means for absorbing into the Naval Reserve men discharged from the Navy after one 4-year enlistment.

In addition to the Fleet Reserve, it establishes a Merchant Marine Naval Reserve and a Volunteer Naval Reserve.

It gives reservists who are employees of the United States the same leave of absence for training duty that is now granted the National Guard.

It provides for the continuance of the Naval Militia of the various States as a part of the Naval Reserve.

These various provisions are embodied in the 39 sections of this bill. With this general statement as to the aims of the bill and the remembrance that the first three sections wipe out of existence the present Naval Reserve Force and transfer it bodily over into the new reserve herein created, and also wipe out all existing laws relating to the Naval Reserve Force,

the necessity and reasons for the many provisions contained in the various sections will not require much further elucidation.

The Clerk read the bill.

Mr. WILLIAMSON (when the Clerk had concluded reading the bill). Mr. Chairman, I move to strike out the last paragraph. Yesterday, under leave to extend, the gentleman from Oklahoma [Mr. HOWARD] inserted in the Record a letter written him by one Hugh Murphy, grossly maligning the Hon. Charles H. Burke, Commissioner of Indian Affairs. There follows a long statement purporting to have been made by this man Murphy.

The Committee on Indian Affairs has been authorized to investigate the administration of Indian affairs in Oklahoma among the Five Civilized Tribes. My judgment is that when this investigation is completed you will find that the crooks in connection with the matter referred to in the statement will be found outside of the Indian Office and not within it.

Mr. Chairman, I would like to ask the Clerk to read a very short letter.

The Clerk read as follows:

DECEMBER 10, 1924.

Hon. HOMER P. SNYDER,

Chairman Committee on Indian Affairs,

House of Representatives, Washington, D. C.

MY DEAR MR. SNYDER: I notice in the CONGRESSIONAL RECORD of yesterday that this office is charged, through a Member of the House of Representatives, with maladministration of Indian affairs in Oklahoma. Having been warned that we would be attacked if we continued to insist upon the enactment of legislation, now pending, with a view of stopping graft by dishonest attorneys and others who have defrauded Indians, and in many instances Indian children, I assume that these charges are carrying out the threat.

There should be an immediate investigation, and as your committee is clothed with full authority to investigate, I most respectfully and earnestly request not only an investigation of these charges but of every phase of the conduct and administration of this office during my incumbency as commissioner. Fortunately, sufficient authority is given your committee, under the resolution adopted by the House of Representatives on June 4, 1924, to make the investigation that I urge you to make. I ask that the one purporting to be the author of the charges filed, and the witnesses he names, be immediately called before the committee.

Very respectfully,

CHAS. H. BURKE, *Commissioner.*

Mr. WILLIAMSON. I withdraw my amendment, Mr. Chairman.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

Mr. BRITTEN. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the recommendation that it do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. LEHLBACH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 9634) to provide for the creation, organization, administration, and maintenance of a Naval Reserve and a Marine Corps Reserve, had directed him to report the same back to the House with the recommendation that the bill do pass.

Mr. BRITTEN. Mr. Speaker, I move the previous question on the bill to final passage.

The previous question was ordered.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. BRITTEN, a motion to reconsider the vote whereby the bill was passed was laid on the table.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. SPEAKING for 25 days from December 13, 1924, on account of important business elsewhere.

ADJOURNMENT

Mr. LONGWORTH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 48 minutes p. m.) the House adjourned until to-morrow, Thursday, December 11, 1924, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

721. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Essington Channel, Pa.; to the Committee on Rivers and Harbors.

722. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Manasquan Inlet, N. J.; to the Committee on Rivers and Harbors.

723. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Suwanee River, Fla.; to the Committee on Rivers and Harbors.

724. A letter from the Secretary of War, transmitting a recommendation that the House of Representatives pass S. 2848, Sixty-eighth Congress, first session, "An act to validate an agreement between the Secretary of War, acting on behalf of the United States, and the Washington Gas Light Co."; to the Committee on Public Buildings and Grounds.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. WYANT: Committee on Interstate and Foreign Commerce. H. R. 10352. A bill to extend the time for completing the construction of a bridge across the Delaware River; without amendment (Rept. No. 1036). Referred to the House Calendar.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 10509) granting an increase of pension to Virginia Griffith; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10510) granting an increase of pension to Bridget O'Brien; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10511) granting an increase of pension to Mary L. Minesinger; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10512) granting an increase of pension to Mary M. Oney; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. KAHN: A bill (H. R. 10587) to amend the seventieth article of war; to the Committee on Military Affairs.

Also, a bill (H. R. 10588) to authorize the sale of a certain portion of Lookout Mountain battle field, Chickamauga and Chattanooga National Military Park; to the Committee on Military Affairs.

By Mr. MacGREGOR: A bill (H. R. 10589) to amend an act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920; to the Committee on the Civil Service.

By Mr. THOMAS of Oklahoma: A bill (H. R. 10590) authorizing the Secretary of the Interior to sell certain land to provide funds to be used in the purchase of a suitable tract of land to be used for cemetery purposes for the use and benefit of members of the Kiowa, Comanche, and Apache Tribes of Indians; to the Committee on the Public Lands.

By Mr. HAWES: A bill (H. R. 10591) to amend an act entitled "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, as amended; to the Committee on Interstate and Foreign Commerce.

By Mr. WILLIAMSON: A bill (H. R. 10592) to amend an act entitled, "An act authorizing extensions of time for the payment of purchase money due under certain homestead entries and Government land purchases within the former Cheyenne River and Standing Rock Indian Reservations, N. Dak. and S. Dak.," to the Committee on the Public Lands.

By Mr. WILLIAMS of Michigan: A bill (H. R. 10593) creating a Federal marketing board to encourage and aid in the formation of cooperative marketing associations, cooperative clearing-house associations, and terminal market associations, handling agricultural products; to correlate the activities of

such associations; to develop efficient and economical methods of distributing and marketing such products, and for other purposes; to the Committee on Agriculture.

By Mr. LaGUARDIA: A bill (H. R. 10594) to place Reserve and National Guard flyers on an identical status to that of flyers of the Regular Establishment in case of accident in line of duty, and amend sections 37a, 47b, and 112 of the national defense act as amended; to the Committee on Military Affairs.

By Mr. DICKSTEIN: A bill (H. R. 10595) to amend the immigration act of 1924; to the Committee on Immigration and Naturalization.

By Mr. BURTNESS: A bill (H. R. 10596) to extend the time for commencing and completing the construction of a dam across the Red River of the North; to the Committee on Interstate and Foreign Commerce.

By Mr. MURPHY: A bill (H. R. 10597) providing for the purchase of a site and the erection thereon of a public building at Carrollton, in the State of Ohio; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 10598) providing for the purchase of a site and the erection thereon of a public building at Toronto, in the State of Ohio; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 10599) providing for the purchase of a site and the erection thereon of a public building at Cadiz, in the State of Ohio; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 10600) providing for the purchase of a site and the erection thereon of a public building at Wells-ville, in the State of Ohio; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 10601) providing for the purchase of a site and the erection thereon of a public building at East Palestine, in the State of Ohio; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 10602) providing for the purchase of a site and the erection thereon of a public building at Barnesville, in the State of Ohio; to the Committee on Public Buildings and Grounds.

By Mr. ACKERMAN: A bill (H. R. 10603) to remit the duty on a carillon of bells imported for St. Peter's Church, Morristown, N. J.; to the Committee on Ways and Means.

By Mr. CRAMTON: A bill (H. R. 10604) to amend section 8 of an act entitled "An act to incorporate the Howard University in the District of Columbia," approved March 2, 1887; to the Committee on Education.

By Mr. LYON: A bill (H. R. 10605) to authorize the establishment of a Coast Guard station on the coast of North Carolina at or in the vicinity of Wrightsville Beach; to the Committee on Interstate and Foreign Commerce.

By Mr. HAYDEN: A bill (H. R. 10606) to provide for the punishment of deported aliens who return to the United States; to the Committee on Immigration and Naturalization.

By Mr. BURTON: A bill (H. R. 10607) to authorize the settlement of the indebtedness of the Republic of Lithuania to the United States of America; to the Committee on Ways and Means.

By Mr. ZILMAN: Joint resolution (H. J. Res. 306) for survey of public-school needs in the District of Columbia; to the Committee on the District of Columbia.

By Mr. DALLINGER: Resolution (H. Res. 376) authorizing the sum of \$250 to be paid to Edward F. Jenifer; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANDREW: A bill (H. R. 10608) granting an increase of pension to William P. Knowlton; to the Committee on Pensions.

By Mr. AYRES: A bill (H. R. 10609) for the relief of George W. Ogan; to the Committee on Military Affairs.

Also, a bill (H. R. 10610) granting an increase of pension to Abbie Osborn; to the Committee on Pensions.

By Mr. COOK: A bill (H. R. 10611) to correct the military record of Estle David; to the Committee on Military Affairs.

By Mr. CROLL: A bill (H. R. 10612) granting a pension to Annie M. Heckaman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10613) granting a pension to Florence M. Lineaweaver; to the Committee on Invalid Pensions.

By Mr. DYER: A bill (H. R. 10614) granting an increase of pension to William C. Pelster; to the Committee on Pensions.

Also, a bill (H. R. 10615) granting an increase of pension to James H. Wilson; to the Committee on Pensions.

Also, a bill (H. R. 10616) granting an increase of pension to Christina Mullen; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10617) granting an increase of pension to Mary J. Smith; to the Committee on Invalid Pensions.

By Mr. EVANS of Iowa: A bill (H. R. 10618) granting a pension to Harrison R. Crecelius; to the Committee on Pensions.

Also, a bill (H. R. 10619) granting a pension to Agnes Rayburn; to the Committee on Pensions.

Also, a bill (H. R. 10620) granting a pension to Maggie Brown; to the Committee on Pensions.

By Mr. FISH: A bill (H. R. 10621) for the relief of the New Jersey Shipbuilding & Dredging Co., of Bayonne, N. J.; to the Committee on Claims.

By Mr. GIBSON: A bill (H. R. 10622) granting an increase of pension to Martha A. Howe; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10623) granting an increase of pension to Elmira H. Streeter; to the Committee on Invalid Pensions.

By Mr. GRAHAM: A bill (H. R. 10624) to enlarge the powers of the Washington Hospital for Foundlings, and to enable it to accept the devise and bequest contained in the will of Randolph T. Warwick; to the Committee on the District of Columbia.

By Mr. HAYDEN: A bill (H. R. 10625) for the relief of Leon E. Adle; to the Committee on Claims.

By Mr. MacLAFFERTY: A bill (H. R. 10626) granting an increase of pension to John E. Markley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10627) granting a pension to Elizabeth Lancaster; to the Committee on Invalid Pensions.

By Mr. MOORE of Illinois: A bill (H. R. 10628) granting an increase of pension to James Holley; to the Committee on Invalid Pensions.

By Mr. MOORE of Ohio: A bill (H. R. 10629) granting an increase of pension to Margaret Y. Teters; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10630) for the relief of Washington County, S. C. Kile estate, and Martha Frye estate; to the Committee on Claims.

By Mr. PATTERSON: A bill (H. R. 10631) for the relief of Harold G. Billings; to the Committee on Naval Affairs.

By Mr. ROGERS of Massachusetts: A bill (H. R. 10632) granting a pension to Mary J. Hodgkins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10633) granting a pension to Adaline R. Springer; to the Committee on Invalid Pensions.

By Mr. ROUSE: A bill (H. R. 10634) granting a pension to Gertie Riley; to the Committee on Invalid Pensions.

By Mr. RUBEN: A bill (H. R. 10635) granting a pension to Mary J. Alton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10636) granting a pension to Lucy J. Wright Johnson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10637) granting an increase of pension to Lucinda E. Spillman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10638) granting a pension to Stella May Wagner; to the Committee on Invalid Pensions.

By Mr. SINNOTT: A bill (H. R. 10639) granting an increase of pension to Thomas W. Botkin; to the Committee on Pensions.

By Mr. SNELL: A bill (H. R. 10640) granting an increase of pension to Mary E. Wakefield; to the Committee on Invalid Pensions.

By Mr. TUCKER: A bill (H. R. 10641) for the relief of Johanna B. Weinberg; to the Committee on Claims.

By Mr. VAILE: A bill (H. R. 10642) granting an increase of pension to Harriett L. Steele; to the Committee on Invalid Pensions.

By Mr. VESTAL: A bill (H. R. 10643) granting an increase of pension to Edmund P. Miller; to the Committee on Pensions.

By Mr. ZIEHLMAN: Resolution (H. Res. 377) to pay E. V. Wilmer and Claude Warren one month's salary; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3135. By the SPEAKER (by request): Petition of Army and Navy Union, U. S. A., Boston, Mass., favoring proposed legislation increasing pensions of Civil and Spanish War veterans and their widows and children; to the Committee on Pensions.

3136. By Mr. CONNERY: Petition of L'Union St. Jean-Baptiste D'Amerique, protesting against the passage of any legislation tending to establish a Federal bureau of education; to the Committee on Education.

3137. Also, petition of Kearsarge Association of Naval Veterans, urging the construction of a cruiser for the United States Navy to be named the *Kearsarge*; to the Committee on Naval Affairs.

3138. By Mr. CULLEN: Petition of Democratic County Committee of New York County, heartily approving of the postal salary bill (S. 1898) and urging its passage by Congress at the present session; to the Committee on the Post Office and Post Roads.

3139. By Mr. DICKINSON of Missouri: Petition of Opal G. Cochran, Mrs. Ida Remer, W. P. Ellis, Miss Florence Bishop, L. J. Cassidy, Mrs. Nancy J. Cochran, et al., 67 names in all, of Eldorado Springs, Mo., for keeping separate church and State, but against the passage of the compulsory Sunday observance bill (S. 3218) or any other religious legislation now pending; to the Committee on the District of Columbia.

3140. By Mr. GUYER: Petition of various citizens of Miami County, Kans., urging the enactment of legislation increasing widows' pensions to \$50 per month, and for pioneer and homeless widows of the veterans of the Civil War to \$72 per month; to the Committee on Invalid Pensions.

3141. Also, petition of various citizens of Iola, Kans., protesting the passage of the compulsory Sunday observance bill (S. 3218), or any other religious legislation; to the Committee on the Judiciary.

3142. By Mr. LYON: Petition of certain citizens of Wilmington, N. C., opposing the passage of the compulsory Sunday observance bill (S. 3218); to the Committee on the District of Columbia.

3143. By Mr. MacGREGOR: Petition of Democratic County Committee, county of New York, urging the enactment into law of Senate bill 1898; to the Committee on the Post Office and Post Roads.

3144. By Mr. MOONEY: Petition of Cleveland City Council, Cleveland, Ohio, urging Congress to enact into law Senate bill 1898; to the Committee on the Post Office and Post Roads.

3145. By Mr. O'CONNELL of New York: Petition of the Lions Club of Jamaica, Long Island, N. Y., favoring the postal salary increase bill; to the Committee on the Post Office and Post Roads.

3146. By Mr. SINNOTT: Petition of residents of Gresham, Oreg., and residents of Multnomah County, Oreg., protesting against the passage of Senate bill 3218; also residents of Pleasant Home, Oreg., protesting against the passage of Senate bill 3218; to the Committee on the District of Columbia.

3147. By Mr. SITES: Affidavits accompanying House bill 10576, granting an increase of pension to certain persons; to the Committee on Invalid Pensions.

3148. By Mr. STRONG of Pennsylvania: Petition of citizens of Indiana County, Pa., opposed to the compulsory Sunday observance bill and any other national religious legislation; to the Committee on the District of Columbia.

3149. By Mr. TAGUE: Petition of officers and members of the Kearsarge Association of Naval Veterans, Boston, Mass., urging Congress to construct a cruiser for the United States Navy to be named the *Kearsarge*; to the Committee on Naval Affairs.

3150. Also, petition of Army and Navy Union, Boston, Mass., favoring proposed legislation to increase the pensions of Civil and Spanish War veterans and their widows and children; to the Committee on Pensions.

SENATE

THURSDAY, December 11, 1924

(Legislative day of Wednesday, December 10, 1924)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

SENATOR FROM IOWA

The PRESIDENT pro tempore. The Chair lays before the Senate the certificate of election of Mr. SMITH W. BROOKHART for the term of six years beginning the 4th day of March, 1925.

It is necessary to make an observation in respect to this matter. Some days ago I laid before the Senate a certificate of election of Mr. BROOKHART supposing it to be addressed to the President of the Senate. I find that the certificate formerly laid before the Senate is a certificate addressed to Mr. BROOKHART individually. So this certificate will be printed in the Record and filed with the Secretary of the Senate, and the junior Senator from Iowa [Mr. BROOKHART] is at liberty, if he chooses to do so, to withdraw from the files of the Senate the former certificate.

The credentials were ordered to be filed and to be printed in the RECORD, as follows:

STATE OF IOWA,
EXECUTIVE DEPARTMENT.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 4th day of November, 1924, Hon. SMITH W. BROOKHART was duly chosen by the qualified electors of the State of Iowa a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1925.

In testimony whereof, I have hereunto set my hand and affixed the great seal of the State of Iowa.

Done at Des Moines this 5th day of December, 1924.

[SEAL.]

N. E. KENDALL,
Governor of Iowa.

By the Governor:

W. C. RAMSAY,
Secretary of State.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Farrell, one of its clerks, announced that the House had passed bills of the following titles, in which it requested the concurrence of the Senate:

H. R. 2688. An act providing for sundry matters affecting the naval service, and for other purposes; and

H. R. 9634. An act to provide for the creation, organization, administration, and maintenance of a Naval Reserve and a Marine Corps Reserve.

PETITIONS AND MEMORIALS

Mr. SIMMONS presented memorials of sundry citizens of Wilmington, N. C., remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. McLEAN presented the petition of Local Union No. 175, Journeymen Barbers' International Union of America, of Danbury, Conn., praying for the passage of legislation providing for the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a resolution of Enfield Grange, No. 151, of Hazardville, Conn., favoring the passage of the so-called Norris bill, providing for development of the Muscle Shoals project and for the production of fertilizers from air nitrates, which was referred to the Committee on Agriculture and Forestry.

He also presented the petition of the Woman's Christian Temperance Union of Pawcatuck, Conn., praying for the passage of the bill (H. R. 6645) to amend the national prohibition act, to provide for a bureau of prohibition in the Treasury Department, and to define its powers and duties, which was referred to the Committee on the Judiciary.

He also presented letters and telegrams in the nature of petitions from employees of the United States post office of New London; post-office clerks of Stamford; National Federation of Post Office Clerks, of Ansonia; post-office clerks of Willimantic; Connecticut National Federation of Post Office Clerks, of Middletown; Elm City Stationary Engineers' Association, No. 10, of Connecticut; National Association of Stationary Engineers; and Edgewood Lodge, No. 11, Knights of Pythias, of New Haven, all in the State of Connecticut, praying for the passage of legislation granting increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

He also presented memorials of sundry citizens of Willimantic, Norwich, South Coventry, Eagleville, North Windham, South Windham, Jewett City, Lebanon, and Warrenville, all in the State of Connecticut, remonstrating against the passage of legislation providing for the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

REPORTS OF THE COMMERCE COMMITTEE

Mr. JONES of Washington, from the Committee on Commerce, to which were referred the following bill and joint resolution, reported them each without amendment and submitted reports thereon:

S. 3613. An act to provide for retirement for disability in the Lighthouse Service (Rept. No. 800); and

S. J. Res. 118. Joint resolution to authorize the United States Shipping Board to adjust the claim of the Near East Relief (Rept. No. 801).

REPORT OF TREATIES FROM COMMITTEE ON FOREIGN RELATIONS

Mr. BORAH, as in executive session, reported from the Committee on Foreign Relations treaties between the United States and Canada, the United States and Panama, the United States and France, and the United States and the Netherlands, to aid in the suppression of the smuggling of intoxicating liquors, which were ordered to be placed on the Executive Calendar.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McKINLEY:

A bill (S. 3634) granting an increase of pension to Myra L. Moore; to the Committee on Pensions.

A bill (S. 3635) for the relief of Walter D. Mattice;

A bill (S. 3636) for the relief of Edward Burg; and

A bill (S. 3637) for the relief of Charles E. Dern; to the Committee on Military Affairs.

By Mr. McLEAN:

A bill (S. 3638) granting a pension to Helena E. Clark (with accompanying papers); to the Committee on Pensions.

By Mr. PEPPER:

A bill (S. 3639) granting the consent of Congress to the Harrisburg Bridge Co. and its successors to reconstruct its bridge across the Susquehanna River at a point opposite Market Street, Harrisburg, Pa.; to the Committee on Commerce.

By Mr. JONES of Washington:

A bill (S. 3640) granting the consent of Congress to the State of Washington to construct, maintain, and operate a bridge across the Columbia River south of Chelan Falls, Wash.;

A bill (S. 3641) granting the consent of Congress to the State of Washington to construct, maintain, and operate a bridge across the Columbia River at Vantage Ferry, Wash.; and

A bill (S. 3642) granting the consent of Congress to the State of Washington to construct, maintain, and operate a bridge across the Columbia River at Kettle Falls, Wash.; to the Committee on Commerce.

By Mr. REED of Pennsylvania:

A bill (S. 3643) authorizing the construction of a bridge across the Ohio River between the municipalities of Ambridge and Woodlawn, Beaver County, Pa.; to the Committee on Commerce.

AMENDMENTS TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. McNARY submitted the following amendments, intended to be proposed by him to House bill 10020, the Interior Department appropriation bill, which were referred to the Committee on Appropriations and ordered to be printed:

That all unexpended balances of all sums provided for this purpose by H. R. 9559, Sixty-eighth Congress, first session, be, and the same are, hereby reappropriated and made available for the fiscal year 1926, Owyhee project, Oregon: For investigation, commencement of construction, and incidental operations, the unexpended balance of this appropriation contained in H. R. 9559 and the amendments thereto for the above purposes for the year of 1925 is hereby reappropriated and made available for 1926.

To be inserted at the proper places in the bill.

HOUSE BILLS REFERRED

The following bills were each read twice by title and referred to the Committee on Naval Affairs:

H. R. 2688. An act providing for sundry matters affecting the naval service, and for other purposes; and

H. R. 9634. An act to provide for the creation, organization, administration, and maintenance of a Naval Reserve and a Marine Corps Reserve.

NAVAL CONSTRUCTION

Mr. HALE. Mr. President, I have a unanimous-consent request which I would like to present to the Senate, and which I hope very much Senators will allow.

Mr. UNDERWOOD. Will the Senator explain what it is?

Mr. HALE. I will explain very briefly what it is. At the close of the last session the bill (H. R. 8687) to authorize alterations to certain naval vessels and to provide for the construction of additional vessels was introduced in the House. The bill provided an authorization for the conversion of certain battleships from coal to oil burners and for putting deck and under-water protection on those battleships. It also provided an authorization for the construction of six gunboats for use upon the Yangtze River in China and for the construction of eight light cruisers with a draft of 10,000 tons. It was simply an authorization. It was not an appropriation bill.

The bill passed the House of Representatives and came to the Senate. It passed the Senate and was finally held up on a motion by the junior Senator from Utah [Mr. KING] to reconsider the vote by which it was passed. I tried to get action on the motion to reconsider during the last days of the session, but owing to the pressure of work before the Senate I was unable to do so. The condition of the bill, therefore, is now that it is on the table with the motion by the junior Senator from Utah to reconsider pending. Until the bill passes, it is impossible to take up with the Appropriations Committee the matter of the appropriations that will carry out the purposes of the bill. The Budget Bureau can not make its estimates until the authorization is allowed by the Congress. I hope very much that the Senate will agree to let me take up the matter now. I do not think it will take very much of the time of the Senate.

Mr. UNDERWOOD. As I understand the proposition of the Senator, he desires to dispose of the motion to reconsider.

Mr. HALE. That is all.

Mr. UNDERWOOD. When that is disposed of the bill will go through?

Mr. HALE. Yes; when that motion is disposed of the bill will go through.

Mr. UNDERWOOD. If it is laid before the Senate, is the Senator willing to immediately move to lay on the table the motion to reconsider?

Mr. HALE. I would be willing to do so; but I do not believe that would be fair to the Senator from Utah in case he has anything to say on the bill.

Mr. UNDERWOOD. I do not want to stand in the way of the Senator disposing of a meritorious bill, but I certainly do not want to have the bill in regard to Muscle Shoals delayed in its passage. I suppose the Senator having the whip handle can move to lay on the table the motion to reconsider, and by virtue of that fact can come to terms with the Senator from Utah about how long he will speak. I would like to have that done before I consent to take up the motion.

Mr. HALE. While a motion to lay on the table is not debatable, the motion to take up the motion to reconsider is debatable. I hope very much that the Senator from Utah will make his fight, if he has a fight to make on the matter, when it comes before the Appropriations Committee. This is purely an authorization, and until the authorization is made the Budget's hands are tied, and we can not take it up in connection with the Navy Department appropriation bill, which is shortly coming before the Senate.

I hope very much that the Senate will grant my unanimous-consent request. If I find that the matter leads to protracted debate, I shall withdraw it.

The PRESIDENT pro tempore. The Senator from Maine asks unanimous consent that the Senate proceed to the consideration of House bill 8687. Is there objection?

Mr. UNDERWOOD. Of course, that is with the understanding that it does not displace the unfinished business.

The PRESIDENT pro tempore. It will not displace the unfinished business except for the time that the Senate may take in consideration of the bill called up by the Senator from Maine.

Mr. UNDERWOOD. I would like to have the Senator from Utah [Mr. KING] state how much time he expects to take if the matter comes up, because if it does come up and we can not get an understanding as to the time to be taken, I shall move to lay the motion on the table, though I am willing to yield any reasonable amount of time.

Mr. KING. Mr. President, I appreciate the fact that, in the language of the Senator from Alabama, he and the Senator from Maine have the whip handle, and a motion to lay the motion to reconsider on the table would be in order and would cut off debate. I shall consume, however, I can assure the Senator from Maine and the Senator from Alabama, only a very short time in presenting a few remarks in regard to the matter.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Maine?

Mr. UNDERWOOD. I understand from the Senator from Utah that the debate will not be extended, and, of course, I take his word for it.

Mr. DILL. That does not preclude other Senators from speaking on the matter if they care to do so, of course.

Mr. UNDERWOOD. Not at all. If there is any extended debate, however, I shall object and move to lay the motion to reconsider on the table.

Mr. DILL. Is the Senator going to object to another Senator speaking on the matter?

Mr. UNDERWOOD. Not at all. What I mean is that if it is the understanding of the Senator that there is not going to be extended debate I am willing to let it have such time as is necessary, but if it does require extended debate, of course it has not a place here this morning. Does the Senator from Washington desire to speak at any length?

Mr. DILL. I do not want to be precluded by the statement that if other Senators are going to take any amount of time the Senator is going to object. I think that is hardly a fair proposition. If the matter comes before the Senate, it will be here until it is disposed of one way or the other.

Mr. HALE. It can be disposed of in a very short time. The bill went through the Senate without an objection. I do not think the Senator from Utah desires to occupy very much time.

Mr. UNDERWOOD. I do not intend to preclude the Senator from Washington at all, but if he intends to make an extended address I do not want the bill to come up.

Mr. DILL. I do not intend to do so, but if the Senator from Utah makes his address I think other Senators should not be precluded from speaking.

The PRESIDENT pro tempore. The Chair hears no objection, and lays before the Senate the bill to which reference has been made. The question is upon the motion of the Senator from Utah [Mr. KING] to reconsider the vote by which the bill passed the Senate. The Senator from Utah is recognized.

Mr. KING. Mr. President, I appreciate that the parliamentary status of the bill under consideration precludes an extended discussion, and it is not my intention to discuss the various questions directly or indirectly related to the measure upon which action is demanded.

This bill was presented to the Senate in the closing hours of the last Congress; and, as I now recall, the Navy Department brought it to the attention of the House a few days before it passed that body. It would seem that the department did not consider the bill sufficiently important to ask for its passage, when Congress convened, nor to seek to have it made a part of the general naval bill. The Senate Committee on Naval Affairs gave but slight attention to the bill, the hearings being perfunctory and lasting but a short time. I was not advised of the fact that the bill was presented to the committee or would be considered by the committee until a few minutes before the committee met. Without having an opportunity to read the bill or to learn the facts attending its presentation, I was compelled to vote in the committee on it. I voted in the negative, because I felt that no proper consideration had been given the measure and because I believed that the situation of the Navy called for an investigation of various problems, and the drafting of a comprehensive bill that would deal with the wants and needs of the Navy in a proper and complete manner.

The bill was rushed through the Senate without opportunity being afforded the opponents of the bill to present their objections. As soon as I learned that the bill had passed the Senate, I interposed a motion to reconsider. The Senate adjourned, with the motion pending, and the Senator from Maine now seeks to have the motion disposed of.

Mr. President, my fundamental opposition to the bill essentially rested upon the ground that it was piecemeal legislation. I believed that it was unwise to enter upon the construction of new war vessels until Congress was fully advised as to the needs of the Navy. Congress was not in possession of that full and complete information essential to intelligent action respecting naval development. In my opinion, Congress often makes the mistake of legislating upon vital and important matters in a desultory and incomplete way. It projects measures without full knowledge of the facts or an exhaustive inquiry as to the problems and difficulties to be encountered. As a result there is much patchwork legislation; subjects are dealt with in a wholly inadequate and imperfect manner. Appropriations are squandered or at least in part dissipated in the execution of imperfect and unsatisfactory policies. Wisdom dictates that before appropriations are made, the subject calling for the same, should be thoroughly examined and all problems related thereto fully investigated.

It has been known since the lessons of the war were brought to our attention that the situation in the Navy called for drastic reforms. Needed reforms were opposed by reactionary forces powerful in naval circles. There was a fanatical and determined effort made by some persons in the Navy Department and outside its limits to push through a program which had been prepared before the war and which therefore did not take into account material and important modifications which the experiences of the war showed to be neces-

sary. There was an incomprehensible attitude toward needed reforms and toward the construction of instrumentalities essential in a modern navy. Efforts to limit the number of capital ships and to devote a part of the costs that would be incurred in their construction to the building of submarines, aircraft, and aircraft carriers were resisted.

For a number of years I have insisted that greater attention be given to the construction of naval craft which the recent war demonstrated were imperatively required. We have been spending hundreds of millions of dollars annually since the war without getting adequate results. In my opinion millions have been wasted in overhead and in unnecessary activities. Money which should have been devoted to the construction of needed submarines, aircraft, swift cruisers, and other naval vessels was expended in avenues which have contributed but little to the efficiency or development of the Navy. I have insisted that a proper naval program be adopted—one that would bring our Navy to a high degree of efficiency and make it in every respect a modern and up-to-date fighting machine.

I have felt that the policies of the Navy have brought discouragements to its personnel and have resulted in a loss of morale among both the officers and the enlisted men. This has been demonstrated in the large number of resignations upon the part of officers and a great number of desertions among the enlisted personnel.

I believe the situation of the Navy is such as to call for a comprehensive investigation—an investigation not to tear down but to build up, and to obtain facts which should be the bases of legislation that will bring the Navy to that high standard of perfection and efficiency desired by the fine officers and men found in the Navy, as well as by the great majority of the American people.

I have upon a number of occasions challenged attention to what I believed to be needed reforms in the Navy, and have criticized certain policies which I believed were obstacles to the creation of a suitable Navy. I have had no friends to reward or enemies to punish, and have been guided only by a sense of public duty and a desire to improve our Navy and to utilize the large appropriations made to the best advantage.

I have felt during the past few years that the Navy Department has not measured up to the responsibilities resting upon it or to the reasonable demands of informed and patriotic citizens.

In May of this year I offered a resolution which was referred to the Committee on Naval Affairs. I hoped that the resolution would be promptly adopted so that the investigation called for might be speedily entered upon and concluded at the earliest possible moment, in order that Congress might have sufficient facts to enable it to intelligently deal with the problems and questions connected with our naval policies and the Navy Department. The resolution in part is as follows:

Resolved, That joint committee to consist of four Representatives, members of the Naval Affairs Committee of the House, to be appointed by the Speaker, and four Senators, members of the Naval Affairs Committee of the Senate, to be appointed by the President of the Senate, is authorized and directed to investigate the present condition of the Naval Establishment, and particularly to inquire into and report to Congress whether or not the so-called capital ships ratio of 5-5-3, as agreed on by the Washington Disarmament Conference, is being maintained on the part of the United States, or is being exceeded by the other powers to the agreement; the actual number of cruisers, destroyers, submarines, dirigibles, airplanes, and other auxiliary naval craft in the naval establishments of the other powers signatory to such agreement but not subject to such ratio; the number, class, and description of such auxiliary craft as may be regarded as adequate and necessary to the defense of the country; whether adequate attention has been given by the Navy Department to the construction of submarines, airplanes, and other auxiliary craft; the reasons for delay in completing the V boats now under construction; why no fleet submarines have been constructed; whether the submarines constructed have been efficient; why more airplanes have not been constructed, and whether those constructed are effective and of types comparable to those employed by naval powers; whether the General Board of the Navy is committed to archaic naval plans and archaic types of vessels and is preventing the proper development and perfection of such submarine, airplanes, and auxiliary craft as may be required for the defense of the country; whether a change should be made in the manner of appointing the General Board of the Navy; whether the administration of the Navy Department has tended to the bureaucratic domination of the expert technical officers of the Navy or has prevented the development of officers of such expert qualifications as are required for the technical work of the Navy; whether the recent accidents to naval vessels off the coast of California,

and recent casualties to submarines, have been due to deficient official and other personnel, or to lack of adequate sea training in the navigation of submarines and auxiliary craft; the number of navy yards, naval bases, and shore stations which should be maintained; the organization of the Navy Department, including the functions of the separate bureaus in the department, their interrelations, and their relations to the office of the Secretary of the Navy; whether the Navy Department is effectively and prudently expending the moneys appropriated for the Naval Establishment to the advantage of the Government and the potential defense of the country; and whether or not the acts of Congress respecting the organization of the Navy Department should be amended or supplemented by new legislation to secure a more effective expenditure of naval appropriations and to promote the orderly coordination and functioning of the department—and to make recommendations to Congress concerning the questions in the premises set forth.

The concluding paragraphs of the resolution contain the usual provisions for hearings, subpoenaing witnesses, and so forth. Briefly, I wish to call attention to that part of the resolution which directs the committee to investigate the present condition of our Navy and particularly to ascertain whether the capital ships' ratio of 5-5-3, agreed upon in the so-called disarmament conference, has been maintained on the part of the United States or has been departed from by the other parties to the treaty.

Many American citizens have felt that the so-called limitation of armaments conference did not deal fairly with our country. I opposed the treaty and voted against it because I believed that it would not be productive of good and did not deal with the questions involved in a proper or satisfactory manner. The United States was the only power participating in the conference that was superior in capital ships. In cruisers, submarines, airplanes, and other naval craft and instrumentalities the United States was surpassed by other powers. In the first place the conference did not invite all nations to participate, or many nations which were deeply interested in the question of limiting naval armaments. I felt that it was a mistake to restrict the conference to the participating powers, and it was my opinion that the United States surrendered the advantage which it had in the field of capital ships without getting any adequate results by such surrender.

The participating nations were left, after the treaty was signed, to devote their energies to the construction of submarines, aircraft, floating mines, and the development of other instrumentalities and forces to be employed in naval contests. The financial resources of either Great Britain, France, Italy, or Japan would not permit as large sums of money for naval construction as that which the United States, because of its superior wealth, might appropriate.

Modern capital ships called for tens of millions of dollars. We aided the other parties to the treaty by relieving them of the heavy burdens of constructing capital ships, but we left them free to build submarines, airplanes, mine layers, and other deadly naval craft. We relinquished by the treaty the field in which we were superior and left the other nations predominant in other fields of naval craft; and this was done though the lessons of the war revealed the weakness of battleships and the vital importance of submarines, airplane carriers, mine layers, and other forms of naval craft. Moreover, by the treaty we compelled the United States, when it reached the limit of capital-ship tonnage permitted by the treaty, to retain a number of capital ships such as the *Delaware*, *North Dakota*, and *Florida*, which were, if not obsolete, obsolescent, or at least so old and imperfect as to require millions of dollars to put them into shape for service.

The bill before us supports this last statement because it calls for alterations to the battleships *New York*, *Texas*, *Arkansas*, *Wyoming*, *Florida*, and *Utah*, costing approximately \$18,000,000. These vessels require protection against submarine attacks and the installation of protective appliances against air attacks, provisions for their conversion into oil-burning ships, and in some instances the installation of new fire-control devices. It is also a fact that the boilers of some of these capital ships, which were retained under the limitation of arms treaty, are so old and defective as to put the ships out of commission. It would seem as if the treaty required us to retain as a part of our capital-ship fleet a number of vessels that were fit only for the scrap heap. At any rate, under the treaty we are required to scrap capital ships and at the same time appropriate millions to put old and obsolescent ships into such condition that they can with safety be taken to sea.

The deplorable condition of our Navy has occasioned much criticism and has led naval officers, as well as naval experts, to affirm that even in the line of capital ships the United States

does not preserve the ratio of 5-5-3 but has dropped to a ratio of 5-3-3. Indeed, there are some who contend that our Navy, measured by the effectiveness of all of its units, sustains the relation or ratio of 5-1-3. This situation I have felt calls for an investigation, and when it is realized that we have appropriated hundreds of millions of dollars annually since the war and do not have a single fleet submarine except the V-1, which has just been constructed, and no suitable airships or airplane carriers or mine layers, and but a limited number of cruisers, then the necessity of a thorough and exhaustive investigation of our naval plans and policies and program and present condition of the Navy seems to me to be imperatively demanded. In the resolution calling for an investigation, a portion of which I have just read, numerous matters are mentioned, and I submit that to deal with them in a proper way information is required and a full knowledge of the facts must be had by Congress.

Senators are aware of the fact that there has been much criticism of the manner of selection of officers, and it has been charged that the method employed has resulted in controversy and resentment among the officers. It is a matter of common knowledge that numerous "accidents," so called, have occurred in naval operations in the past year. It will be recalled that recently an explosion occurred on the battleship *Mississippi* and that 44 officers and enlisted men were killed. My information is that this accident was due to negligence and official inefficiency. Certainly there was not sufficient care taken to provide suitable air pressure and proper agencies to be employed to clean the guns after firing huge projectiles. And a few days ago 8 or 10 men were killed on the *Trenton*, one of the new cruisers. Information has come to me as to the cause of this disaster. If my information is correct, there was negligence and inefficiency upon the part of the personnel in certain branches of the naval service. But a few months ago 8 or 10 of our warcraft were lost upon the coast of California; and this morning we read of the death of a number of officers and enlisted men and the destruction of the airplane in which they were flying. And quite recently we were advised of a submarine that submerged and failed to rise.

If I had time, I could refer to other disasters which would seem to indicate fault somewhere in the Navy. There should be an investigation of these disasters.

It is known that we have appropriated \$150,000,000 for submarines and yet have but one that can accompany the fleet. In a resolution that was offered for me by the Senator from New Mexico [Mr. Jones] on the 4th of this month attention is directed to this fact and to the fact that 124 submarines of various types have been constructed, many of which are unsatisfactory. This resolution directs attention to other matters and asks that an investigation be conducted by the Senate Naval Affairs Committee.

Mr. President, I repeat that the naval problem is one of such great importance as to require further information before Congress is in a position to determine what policy it should adopt or what appropriations should be made.

Senators will recall that Admiral Coontz and Secretary Wilbur some time ago gave rather glowing reports as to the efficiency of the Navy and the high standard which it had obtained in all departments. The report submitted by Admiral Coontz with respect to the maneuvers of the ships under his control in 1924 conclusively demonstrates that our Navy is not in a satisfactory condition; indeed, that its condition is such as to require most drastic treatment. And more recent statements of Secretary Wilbur materially modify his earlier glowing reports.

The bill before us does not purport to reach the situation or to deal with the defects and imperfections that must be dealt with, and dealt with soon, if we are to have a suitable Navy. I have characterized the bill before us as piecemeal legislation. It is scarcely that. It is a system of patchwork legislation. I insist that if we are to have a Navy it should be an up-to-date and modern Navy, one that is efficient mechanically—if I am permitted to use that expression—as well as in the spirit, efficiency, and fine service of the officers and enlisted men. We must have a Navy which is not only an honor to our Nation but one which in all hours of danger will prove an invincible arm of defense. It must be a Navy in which the officers and enlisted men will have profound pride and to the development of which they will earnestly and joyously dedicate their lives.

Mr. President, I am only asking for the facts, for all the information that can be obtained, not only from the General Board but from officers and enlisted men, as well as from every other available source. I want to know what our policy is to be, what we are to do with the Philippines, what course we are to pursue with respect to Guam and Hawaii, what

plans are to be adopted with respect to naval bases—whether we are to construct submarines and aircraft, whether there is to be a limitation upon these forms of naval craft, as well as upon a multitude of other questions which are inseparably connected with our naval policy and with our naval operations. Only by a comprehensive investigation where we can obtain the views of experts as well as practical persons and get all the facts bearing upon these questions will we be in a position to legislate intelligently and properly.

The bill before us only authorizes the construction of gunboats to be used to terrify the Chinese and eight light cruisers and the repair of some of our old capital ships. It does not appropriate a single dollar.

I believe that the American people will not be satisfied until we know the facts. Some of the leading papers in the United States, as I am advised, take the position that the naval question is so important as to call for a thorough investigation. In this morning's Washington Post, one of the leading papers of the United States, appears an editorial which is worthy of consideration. I ask that it may be incorporated in my remarks without reading.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Utah? The Chair hears none, and it is so ordered.

The editorial is as follows:

[From the Washington Post, Thursday, December 11, 1924]

A NAVAL INQUIRY NEEDED

There is much confusion in the public mind as to the exact state of the United States Navy, but there is no doubt whatever that cruisers are needed and that several battleships are practically worthless on account of defective boilers. It is also evident that several gunboats are needed for the protection of the Americans in the interior of China. Therefore it is well that Congress should pass without delay the bill approved by the House at the last session providing for several cruisers, the reconditioning of battleships, and for four gunboats.

But this legislation does not meet the situation. The question of aviation is left unsettled, and no provision is made for bringing the aircraft carriers *Lexington* and *Saratoga* up to date. No additional submarines are provided for, and yet submarines are a necessity. Secretary Wilbur points out that the relative strength of the world's fleets depends upon their position. The American fleet is strong in American waters, but would be weak in Asiatic waters. Battleships dare not cross the seas nowadays, with submarines lurking in their path, destroyers to intercept them with torpedoes, and airplanes to bomb them. Unless a fleet is equipped with submarines, destroyers, and aircraft, it must stay at home or risk destruction. Yet the vital interests of the United States may require the fleet to take the high seas.

There is only one fleet submarine under the American flag, and that one is not yet fitted for diving. It is a good boat and will be tested for diving in good time. The United States should have submarines capable of traveling with the Battle Fleet.

An inquiry should be made by Congress covering the present state of the Navy and its needs for the immediate future. The expenditure of large sums should not be made until Congress knows where the money should go, whether for submarines, airplanes, naval bases, or cruisers, or all of these.

Capable naval officers are at the disposition of Congress, ready to give full and accurate information upon which Congress can safely act. Let them be summoned. They can not speak until they are required to speak. The information they possess is useless unless it is passed along to Congress. Congress is sure to make a mistake if it appropriates money without possessing proper information. The modernization of the Navy to make it an effective arm of national defense is a step that should not be delayed. The lessons taught by the late war should be applied. The General Board and the Secretary of the Navy can not apply them. Only Congress can do that, and it can not do it without first learning the present condition of the Navy and what is needed to bring it up to date.

Mr. KING. Mr. President, I hoped that the chairman of the Committee on Naval Affairs would feel the necessity of favorable action upon my resolutions. He has exhibited interest in the Navy; but I think his interest would have been emphasized if he had joined in demanding the investigation called for.

At a later date, Mr. President, I shall address the Senate upon our naval policy and call attention to many matters which I think the Senate should know. If the resolutions which I offered are adopted and hearings are had upon them, the facts will then be elicited, and, when legislation based upon the information obtained is presented, the entire subject can be properly canvassed and the Senate and the country advised as to the condition of our Navy and its imperative needs.

Mr. HALE. Mr. President, I can promise the Senator from Utah that his resolution of the last session and the resolution which he has recently introduced, which I understand has not

yet been referred to the Naval Affairs Committee, will both receive every consideration when they come before the committee for action. If the committee determines that a general investigation of the Navy is proper and is necessary I can promise the Senator from Utah that he will have it. On the other hand, as to certain allegations which are made in his resolution, if he can show that there is ground to believe that they are actual facts, I can promise him that he will have an investigation of those allegations and that he will have fair treatment in every way.

Now, Mr. President, I move to lay on the table the motion of the Senator from Utah to reconsider the vote by which House bill 8687 was passed.

The PRESIDENT pro tempore. The Senator from Maine moves to lay on the table the motion to reconsider the vote whereby the bill which he has named was passed.

Mr. REED of Missouri. Mr. President—

The PRESIDENT pro tempore. Those in favor of the motion will vote "aye"; those opposed will vote "no." The ayes have it, and the motion is laid on the table.

Mr. REED of Missouri. Mr. President, I rose and addressed the Chair before the question was put, but the President pro tempore did not hear me.

This may be the way to shut off debate in the Senate. It may be that this is the course we are entering on, for some Senator to get on the floor and say all that he has to say and then deprive other Senators of an opportunity to say anything in reply by making a motion to lay on the table a motion which has been made to reconsider. That, however, has not been the general practice of the Senate.

A motion to reconsider is an important one and debate on it should not be shut off in this manner. I have had no opportunity to study the question myself, but I was listening here with a great deal of interest to the statement of the Senator from Utah, who has given the subject consideration, and then I listened to the reply, and I heard the Senator from Maine say in reply that if his committee saw fit to report favorably on the resolution they would so report, and if they saw fit to report otherwise they would so report. That was a very convincing and enlightening statement to all of us, I am sure, because we now know exactly what the committee is going to do.

Mr. HALE. Does the Senator think that I could answer for the committee?

Mr. REED of Missouri. Very well. The Senator undertook to answer in some way and to give some assurance, and his assurance was that if the committee saw fit to report favorably they would do so and if they saw fit to report unfavorably they would do so, whereupon he moved to lay the motion on the table. That is a legislative syllogism which is somewhat unique.

Mr. HALE. I think, Mr. President, if the Senator listened to what I said he would recall that I said we would give the Senator from Utah every chance to put his case before the committee and would hear him.

Mr. REED of Missouri. Mr. President, I am coming to that. Then the Senator said that there were certain questions of fact which the resolution asks to have investigated, and here he took very high ground. It was that if the Senator from Utah would appear in advance and prove the allegations, then the committee would proceed to investigate whether they were true or not; in other words, the Senator from Utah is required to possess the information in advance and the evidence in advance which it is his very purpose under the resolution to ask the committee to ascertain. Of course, if the Senator from Utah had the evidence in advance he would not need any investigation; he would not need any committee to ascertain whether the evidence existed or not because he would already have it, and if he had the evidence it would be quite as effective as though it had been ascertained by a committee.

Mr. President, the motion to lay on the table was adopted without any proper consideration, and I suppose that is a finality to this bill. I undertook to address the Chair, but was unsuccessful in attracting the attention of the President of the Senate. I protest against this sort of proceeding in the Senate—a Senator rising to make a speech and saying all he has to say, and then moving immediately to cut off everybody else from the opportunity of saying a word.

Mr. HALE. Mr. President, the Senator from Missouri knows that the Senator from Alabama told me he would not object to my request for unanimous consent, provided I could get action within a reasonably short time.

Mr. REED of Missouri. But that does not mean that the Senator should foreclose the matter if the debate was taking more than a reasonable time.

Mr. HALE. This is not an ordinary bill, Mr. President. This is a bill that has already been acted upon by the Senate.

Mr. REED of Missouri. And a motion was made in the closing days of the last session to reconsider, and that motion came over to this session. If the Senator felt that he was bound not to interfere with the Senator from Alabama in the progress of the measure in which that Senator is so much interested if the debate took longer than would be fair to the Senator from Alabama, all that was necessary to do was to lay this question over until to-morrow, and not to make a motion which would foreclose all debate and future consideration. The excuse of the Senator is just as lame as the logic he employed in defending his action.

Mr. HALE. I have already explained to the Senator that we are trying to get action on the matter as soon as possible in order that the Budget may make the supplemental estimate and present it to the Appropriations Committee, so that we may take the matter up in the naval appropriation bill which will shortly be considered.

Mr. REED of Missouri. Well, we have the entire session before us. We will not gain any time by this sort of method—not a bit of it.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

Mr. REED of Missouri. Mr. President, may I inquire what is the parliamentary situation?

The PRESIDING OFFICER (Mr. STERLING in the chair). House bill 518 is before the Senate, and the pending question is on the amendment of the Senator from Mississippi [Mr. HARRISON] to the substitute proposed by the Senator from Alabama [Mr. UNDERWOOD].

DEBTS OF THE ALLIED NATIONS

Mr. REED of Missouri. Mr. President, because it may have escaped the notice of Senators, I desire to call the attention of the Senate to what I regard as a very serious question. I hope it will receive thoughtful attention, particularly from the members of the Committee on Foreign Relations. It ought also to receive the thoughtful attention of every commission and every person endeavoring to collect our foreign debts.

I read in the Washington Post of this morning these headlines:

Britain to demand creditors pay her in reimbursing United States—Proportionate payments to be asked, Churchill tells Commons—Surprise in Capital over announcement—Difficulties are foreseen in trying to effect refunding of remaining debts.

The article which follows is, in part, as I shall read:

Winston Churchill, Chancellor of the Exchequer, alluding in the House of Commons to-day to the Franco-American war debt conversations, said the Government would consider it essential that any payments made by Great Britain's debtors in Europe to their creditors in the United States should be accompanied simultaneously by proportionate payments to Great Britain.

In examining what is printed—and I have no doubt correctly—as the text of Mr. Churchill's address, it appears that he discussed the sacrifices that England had made, the burdens the English taxpayer had undergone, and referred to the fact that England had settled with the United States. I do not want to misconstrue his words, but I think it fair to say he at least expressed doubt as to Great Britain's wisdom in making that settlement. He included in his statement these remarks:

Having met all our liabilities as prescribed, having rigorously discharged every contract into which we have entered, we are entitled to rest ourselves with confidence upon the position of freedom and independence which we have regained. We have regained it not without great sacrifice, but it is ours and it is ours forever. [Cheers.] We can look everyone in the face.

This debt settlement was unquestionably the indispensable forerunner of the consolidation and increasing establishment of our credit

throughout the world, on which our world-wide trade depends, and it is the essential foundation in all improvement in exchange between this country and the United States and the maintenance of exchange, which is a vital factor in the whole of our national and international finance.

What is the second great factor in the problem, so far as we in this country are concerned? It is the Balfour note. That note was drawn up three years ago. Associated as it is with the name of a statesman revered throughout Europe, it must in British eyes play a most important part in our future discussions on this subject.

The Balfour note was published before the settlement of the American debt was effected, but we had already been invited by the United States to enter into negotiations for funding of the debt.

What was the principle of Balfour's note? It was that we would obliterate and delete all debts owing to us if we were similarly treated by others in respect of debts owing to them, but it also said that if that was impossible we should ask as much, and no more, from Europe than the United States might find it necessary to require from us. That was the principle expressed in the Balfour note at that date.

Now, a word of comment:

The principle of Balfour's note * * * was that we would obliterate and delete all debts owing to us if we were similarly treated by others.

That is to say, England would forgive France her debts if France would forgive her debtors and if we would forgive England her debt to us. In other words, it was a method of payment every dollar of which came out of the Treasury of the United States. If England owed us four or five billion dollars and we forgave England, of course England could forgive four or five billion dollars of other debts and not be out a cent. In turn every other nation along the line could forgive its debtors and not be out a cent. But how about the United States? We would be the great paymaster then, as we have been in the past. We would cancel the ultimate debt. We would pay all of the debt ourselves.

That was the Balfour note. That is the spirit of it, as repeated here by Mr. Churchill. It is still sticking in the craw of English statesmen and of other European statesmen.

We thought we had eliminated that notion when we made a contract with England which was not the contract England made with us during the war. Her contract with us then plainly stated that upon the receipt of the moneys of this Government she would issue to this Government bonds in terms of interest and in terms of payment exactly similar to the bonds we were obliged to issue when we borrowed these moneys from our people. Subsequently, without authority of law, the Secretary of the Treasury turned over this money to European countries without demanding and receiving their bonds, because it was alleged that the exigencies of the case were so great that time could not be taken to carry out formally the terms of the statute, which directed the Secretary of the Treasury to pay out the money only upon receipt of the bonds. Accordingly, when the money was turned over in lieu of the bonds, he took a solemn written obligation by which each of the European powers obtaining money—including, of course, Great Britain—was, upon demand, to issue to us the kind and character of bonds required by our statute; and at that time an agreement was made for the payment of 5 per cent interest. The Senator from Utah [Mr. SMOOT] will set me right if I am in error about that.

Mr. SMOOT: Five per cent was the rate.

Mr. REED of Missouri. But whether that 5 per cent was meant to be a temporary interest until the bonds were issued, or whether it was to run for the entire term of the bonds and was a modification of that clause of our statute which provided that the bonds to be given to us should bear the same rate of interest as our bonds, this much is true, that the language of the contract expressly bound Great Britain to give us bonds at least of the same kind and character as the bonds we had issued to our people. The whole thought when we passed the statute and when the contract was made was that the English obligation to us should take care of our obligation to the American people who had bought these bonds, so that we never would be obliged to levy a dollar of tax to pay either the interest or the principal of those bonds. We would receive that money from Great Britain and the other powers in time to meet these obligations.

We borrowed this money at an expense of probably 4½ per cent initially. It may well be said that our loans cost us 4½ per cent. Nevertheless, when we came to settle with Great Britain, she did not settle with us on the terms written in the contract she had given us. She held off. She made it difficult, and finally, in order to get a settlement, a committee rep-

resenting this Government agreed with her to fix the time of the payment of her loan, not according to the time our bonds matured but extended the time for ultimate payment to 62 years. Moreover, we gave her the money for a period of years at 3 per cent. I will ask the Senator from Utah for how many years that was.

Mr. SMOOT: For 10 years.

Mr. REED of Missouri. For 10 years, at 3 per cent. During those 10 years we are paying 4 and 4½ per cent for the same money we loaned to Great Britain. That is substantially a correct statement; there may be a variation of a quarter of a per cent. After the 10 years the interest she pays is equivalent to what rate? I will again inquire of the Senator from Utah.

Mr. SMOOT: Three and a half per cent for 52 years.

Mr. REED of Missouri. Three and a half per cent for 52 years; and yet our obligations, as long as they run, compel us to pay 4 and 4½ per cent. The difference between the rate of interest which we are now paying and the rate of interest which Great Britain pays us, compounded for the 62 years, is about \$22,000,000. It runs to that astounding figure when the interest is compounded, and it is proper to compound the interest, for we are laying out the interest money, and if we collected it we could loan it out at interest.

That is the way Great Britain met her obligations. At the time the settlement was proposed I opposed it upon this floor because I thought it unfair to the United States. Yet I am free to say that in view of the attitude of Great Britain, as manifested by Mr. Churchill in this debate of yesterday, it occurs to me that perhaps the committee were fortunate in getting a settlement at all. I desire, however, to say nothing harsh on this question. I simply wish to call attention to the cold facts.

During the war, Mr. President, upon the floor of the Senate a committee representing the British Government was received, and I heard one of her great men say to the Senate, "If you are coming, come quickly." That was a tremendous thing for a Briton to say. A Briton does not call for help until he needs it, for I pay the British nation the compliment of saying that it is the gamest nation there is in the world, always, we hope, excepting ourselves. An Englishman never calls for help until he needs it, and needs it very badly. This was the cry, the Macedonian cry, "Come over and help us, and come quickly with your men and your money."

So Great Britain, and so these other nations, not only called for men, but they called for money, and, while I do not wish to criticize him at all, the Secretary of our Treasury technically violated the mandate of the statute when he gave them that money before he received the bonds. If he had received the bonds, they would have been in the Treasury of the United States to-day, or in circulation, and this controversy would not be before us. Yet I do not speak of that to criticize the Secretary of the Treasury, because we were in a war, and we were doing many things in an irregular way.

So we called upon our people to buy those bonds, to buy until it hurt, to bleed themselves white; and they did buy until it hurt, and we gave that money to France and to England and to other countries in the hour of their dire distress, and we gave it upon their faith and credit as honorable nations. They had been in the war before we were. The war was not of our seeking or our making. It was because of the depredations which occurred in that war that we were compelled finally to enter in order to protect our commerce. There was not, in my judgment, a minute from the time the United States entered that war until its close that Germany would not have made peace with us separately and agreed to any reasonable conditions we would have named. I do not claim that correspondence or contemporary records manifest this, but it was the logic of the situation. We entered that war and stepped into the ranks alongside these European countries. We entered it for a less cause than they had, who were fighting for their lives, while we were merely vindicating our honor. We said to them, "We will stay with you until a peace is made that is satisfactory to you. We will not make a separate peace." And we did stay with them. Without detracting one iota from the gallantry of their soldiers, from the valor of their people, from the magnificent fight they put up, it is a matter history will record that if the United States had not entered that war in all human probability the peace would have been signed in Paris. It would have been a German peace, and not a French and English and Belgian peace.

We gave this money; we gave these men. We gave our own men for our own efforts. We equipped our own men. That war cost America not less than \$50,000,000,000 all told. But

of the money we raised, we raised something like \$11,000,000,000 not for ourselves but for them. When we come to ask for the payment we are meeting with continued opposition.

France and England and Belgium had been copartners in that war. Every dollar we loaned to Belgium aided England. Every dollar we loaned to France aided Belgium. Every dollar we loaned to England aided all of her allies. So we loaned to each of them in proportion to their wants. But it was this influx of money and the material it bought that stiffened their lines. It was the shortening of their lines by filling in the spaces thus left with American soldiers which made it possible to win the war. Otherwise, no matter how the war might have ultimately ended, certain it is that the damage that would have been done to England and to France if it had continued without our intervention would have been so horrible that the amount of money we loaned them would be a mere bagatelle compared with the financial loss.

Now, we have asked England for her settlement and obtained it. We went then to our separate creditor, France, and have asked for a settlement there. We have gone to these various countries. We have said to them, "We do not propose to be hard on you. We do not propose to play the game of the Shylock who demands the pound of flesh and whatever blood comes with it. We simply want you to agree to pay us sometime, and if you need extensions we will carry the loan. We will manage some way or other to tax our own people enough to keep up the interest upon the bonds and to finally meet them if you are unable at that time to pay your interest, and as the bonds mature to pay the principal. If you need more time, we will give it to you, and we will tax our people in order to do it. But as honest nations, as honorable nations, at least give us your promise to pay sometime."

When we go to France to ask for that money, a great English statesman, Mr. Churchill, after making the remark to which I have just adverted, after intimating, at least, that the Balfour scheme of cancellation of debts is still in mind and that America ought to be the final paymaster—for that is the logic of the situation—adds:

There is one new aspect which has been brought into prominence lately. I mean the negotiations which we read in the newspapers have taken place between France and the United States for adjustment of Franco-American debts.

As far as His Majesty's Government understand, there are no formal negotiations in progress, but there have been tentative inquiries and conversations. The matter has not advanced farther than that at the present time, so far as we know. There is, therefore, no necessity for any formal declaration on our part in regard to this matter at this moment.

Speaking generally, I would venture to say that we do not wish to hinder any arrangement for mutual benefit which may be entered into between two friendly nations allied and associated with us in the Great War.

We consider it essential, however, that any payments made by our debtors in Europe to their creditors in the United States should be accompanied simultaneously and *pari passu* by proportionate payments to Britain. [Cheers.]

That indicates the general scope and outline of the policy which His Majesty's Government will endeavor to pursue in regard to interallied debts in the months and, I trust, in the years which lie immediately before us; and I also say that in pursuing that policy we shall be animated by a spirit of warmest comradeship toward our friends and allies in the war, and we shall sedulously avoid the use of any language or indulgence of any mood which would possibly be the cause of offense or lead to disturbance of the harmony which has existed.

Soft words at the end, soft words at the beginning of this paragraph, but the meat of it is that when we go to France and ask France to pay us, Great Britain proposes to interpose her powerful influence and say, "You must not pay America unless you pay us at the same time. We will insist upon that." And thus they interfere with us in making an independent bargain for the collection of our debt from that debtor who stood beside England in the war, by that debtor who was aided by these funds—for every dollar thus yielded to that debtor benefited Great Britain and helped her maintain the struggle.

Now, Mr. President, in my humble judgment it is the high duty of this Government to maintain friendly and cordial relations with all the nations of the world. It is our duty to go to the extreme limit in order that we may produce good feeling for America in every court and every country of the world. But I assert that any interference on the part of Great Britain, directly or indirectly, with the business of this country and France in the settlement of our particular claims against that particular country is a thing that can not be tolerated for a moment. When I undertake to collect my just debts from my

debtor and another man insists that that debtor shall not pay me unless at the same time he pays to him a given sum of money, that is an interference with my right of collection; it is an interference in my business.

This great Nation can not afford to tolerate any such interference by Great Britain or by any other country on earth. It is our business to proceed as we see fit. If England has a claim against France, as she undoubtedly has, let her proceed in her own way to make her own bargain. We will not interfere with France in paying Great Britain. We have never sought to do that; and so we can not tolerate any interference by Great Britain with France if France shall desire to pay us. Such interference, such attempted overlordship of the world, is as intolerable as was the act of the Kaiser when he told the American Nation that it could sail its vessels in certain lanes provided we repainted them in certain colors.

I have felt that this matter ought to be called to the attention of the Senate. I repeat that it would be well for Great Britain, if she desires to retain the good will of this country, that her statesmen should understand that if they have business with France they should proceed to transact that business with France and we will not interfere, but that in so far as we have business with France we will proceed to its transactions and we will tolerate no interference by any power of earth.

Mr. SMOOT. Mr. President, I think it, perhaps, a proper occasion to notify the Senate and the people of the country that the Foreign War Debt Funding Commission have no intention, and never has had any intention or even inclination, to agree to cancel any debt owing to the United States by any country in all the world.

Mr. OVERMAN. Would the commission have any power to cancel any debt?

Mr. SMOOT. Of course, they would not without the action of Congress, and they have no intention of ever asking Congress to do it.

Another thing, Mr. President. I notice by clippings from the English press that the statement has been made that there was an agreement, not in writing but a verbal agreement between the representatives of the British Empire and the members of the United States Debt Funding Commission, that if there were any more liberal terms granted to any other country in the settlement of the obligations owing by that country to the United States, the same terms of settlement would be granted later to England. I want to say, Mr. President, that there was never such an agreement or understanding. On the contrary, that proposition was discussed by the representatives of England with the Debt Commission and the request was made of the commission to incorporate it in the terms that would be recommended to Congress for ratification, but it never was agreed to.

Not a member of the commission ever even intimated that such an agreement would be acceptable to the commission or to Congress or to the American people. In the settlement made with England there are no strings attached. Every understanding is included in the agreement itself, and the terms of the settlement are published just as they are, and there is no understanding other than is in the written word.

Mr. REED of Missouri. Mr. President, will the Senator pardon me at that point?

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Missouri?

Mr. SMOOT. Certainly.

Mr. REED of Missouri. In order that it may appear in the RECORD, if the commission had undertaken to do anything of that kind it would have been absolutely void unless it was written in the instrument, because in the last analysis the Congress acts only on the written proposal brought to it and has no knowledge of anything outside of that proposal.

Mr. SMOOT. The Senator has made the statement correctly. Not only that, but I want to say there was no understanding that any such proposal in the future should be made other than contained in the terms of the settlement as set forth in the written contract.

Mr. SWANSON. Mr. President, the Senator from Missouri asked the question which I rose to ask, but he made it stronger. As I understand the situation it is that the commission had no authority to make the settlement which was subsequently made with Great Britain by an act of Congress.

Mr. SMOOT. All the authority they had was to recommend an agreement reached to the Congress of the United States for ratification, and that was done.

Mr. SWANSON. And all that is contained in any settlement or understanding made with Great Britain or the British

Government was submitted to the Congress and ratified by a vote of the Congress.

Mr. SMOOT. Every item. There is no contract or agreement between the two countries other than is contained in the settlement that was ratified by Congress and signed by the President of the United States.

Mr. REED of Missouri. I am glad the Senator made the statement, not because it is necessary from anything that I said, but I am glad to have it put in the Record at this time, so that at least the American people and such of the British people as pay us the compliment of following our proceedings may be advised of the declaration and of the facts.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

Mr. COPELAND. Mr. President, as tending to show the attitude of the country toward the pending measure, there is a powerful and informative editorial in the New York World of this morning which I wish to read into the Record. The title of the editorial is "Protect Muscle Shoals," and it reads as follows:

PROTECT MUSCLE SHOALS

If the Underwood Muscle Shoals bill comes to a vote in its present form, the World hopes that the Senate will vote it down.

If the bill passes and goes to the House, the World hopes that the House will amend it. This bill is wrong.

It is wrong because its authors insist upon treating the Shoals as a nitrate plant rather than a power source and thereafter fail to protect the public interest in that power. Muscle Shoals will never give the farmers of this country cheap fertilizer. It will never give the farmers cheap fertilizer—

First, because even the Underwood bill plans to produce only one-thirtieth of the nitrogen we annually import from Chile.

Second, because nitrogen itself is not a fertilizer—at best it is only 10 per cent of a fertilizer—it must be mixed with other chemicals.

Third, nothing that the Shoals can do with nitrogen—even if it produces 40,000,000 tons a year instead of 40,000—can affect in any way the prices of those other chemicals. The idea that the Shoals, producing one-thirtieth of one product which in itself is one-tenth of a fertilizer, can do anything miraculous for the farmers is mere nonsense.

The Shoals is not primarily a nitrate plant. The Shoals is a power station. Those three dams which have cost the country millions can be made to furnish 850,000 horsepower annually, the greatest single power resource in the United States capable of immediate development. This power the Underwood bill ignores, making no provision for its future use whatever. Not only that: On Tuesday Mr. UNDERWOOD persuaded the Senate to vote down an amendment of Senator McNARY's proposing that power development at the Shoals strictly conform with the regulation of the Federal water power act.

This is dangerous business. Muscle Shoals may easily become the central reservoir of electric power of all States east of the Mississippi and many west of it. It is inviting another Teapot Dome to leave that reservoir without every protection which intelligent law can throw around it, every protection carried in the water power act for control of rates, expropriation of excessive profits, minimum guarantee of power to be furnished, and penalties for licensees who do not market their developed energy on fair terms to the consumer.

The World does not believe that Senator UNDERWOOD and his colleagues wished to write a bill as dangerous as this one. It is a more likely explanation that as delegates of Southern States which consume more than half of the commercial fertilizer used in the country they have been swept along a little heedlessly by their interest in nitrates and their reverence for the farm propaganda put out in the magic name of Mr. Ford.

This is a better bill than Mr. Ford's. But it is a bill which puts the cart before the horse and then forgets the horse. Too much is at stake for that bill ever to be made a law.

Mr. HARRISON. Mr. President, this is quite an illuminating editorial that has been read by the Senator from New

York [Mr. COPELAND]. Of course, on a great newspaper like the New York World they have all kinds and sorts of editorial writers. Really I am sorry that the person who wrote the very illuminating editorial did not attach his name to it, because without it reflection is cast upon those splendid editorial writers on the New York World who have made that newspaper one of the greatest in the country. Then he should have had his name attached to the editorial for the reason that it might show to the people just how ignorant some persons are who attempt to educate the public on a question which they know little or nothing about.

Of course, we are glad that the great New York World through this unknown editorial writer admits that the Underwood substitute is better than the Ford proposal. It places some of us in a very good position, because many of us favored the Ford offer; and if the pending proposition is better than the Ford proposal it is gratifying to us. So the substitute is really better than we thought it was when the proposition was first made by the Senator from Alabama.

Now, let us see what this great editorial writer, who is unknown except to the persons in the editorial rooms of that wonderful newspaper, says about this measure. When one attempts to educate the people and to give facts they ought to be real facts. Let us see.

Of course, the distinguished Senator from New York [Mr. COPELAND] did not indorse this editorial and does not vouch for the alleged statement of facts. He has read the editorial, and rightfully so, because it appears in the editorial columns of a great newspaper of this country, a newspaper which has few equals in its influence upon American readers and the American public. So the Senator from New York has read the editorial merely for the information of the Senate. However, it reflects upon a great newspaper, discredits a real newspaper, and my good friend Herbert Swope ought to summon into his private office the editorial writer who wrote this piece of misinformation and "call him down" for writing on a subject about which he knows nothing, for if the New York World has done one thing above everything else it has been to try to speak the truth and to give the real facts about any controversy with which it was dealing in its editorial columns. So I look for Mr. Swope to summon before him the particular editorial novice who wrote this article and to give him a "panning" for writing on a subject about which he knows nothing.

I do not know where this writer got his information. He may have read the speeches of my friend the Senator from Nebraska [Mr. NORRIS], or he may have been reading from the speeches of my friend from Tennessee [Mr. McKELLAR], but certainly he has not been studying the record as it appears in the hearings before the Senate Committee on Agriculture and Forestry or the House Committee on Agriculture. If he had read the illuminating articles which have been written and published in the Saturday Evening Post and the reports which have been filed in this Chamber by my friend the Senator from North Dakota [Mr. LADD], who knows as much about this subject as does any man who graces the Senate Chamber, he would never have written such an editorial as this. He would at least have been straight on his facts. Now, let us see. This writer states that the Underwood bill should not pass, and he further states—

It is wrong because its authors insist upon treating the shoals as a nitrate plant rather than a power source, and thereafter fail to protect the public interest in that power.

If this unknown editorial writer had gone back to the original act which was passed in May, 1916, which sought to locate the dams and to erect the power plants, he would have found that the intention of the American Congress was and that the idea of the Democratic administration at that time was to construct those dams and erect those plants first, to develop power to make nitrogen for war purposes, and second, in times of peace to make nitrogen for fertilizer purposes. In my feeble way I tried some days ago, following a discussion of the subject by my friend the Senator from Alabama [Mr. UNDERWOOD], to read from that statute, enacted in 1916, which expressly provides that this development shall be undertaken in order to make fertilizer for the agricultural interests of the country. If this unknown editorial novice had read the message of the distinguished President of the United States, he would have seen that the intention of this administration is not to change the policy adopted by the prior administration or the intent of Congress at that time to do something for the great agricultural interests of the country.

There is no authorization, so far as the present law is concerned, to develop Muscle Shoals for the sale of power and

power alone, but it must be incident to the manufacture of nitrates for war purposes and nitrates for fertilizer purposes. So, in the very beginning of this remarkable editorial, we find that the editorial writer is flying in the face of the law when he states that the Underwood substitute is all wrong because it seeks to develop this plant for fertilizer purposes while it should be developed for the sale of power.

Let us go further into this remarkable editorial. The writer says:

It will never give the farmer cheap fertilizer.

Why? The writer says:

First, because even the Underwood bill plans to produce only one-thirtieth of the nitrogen we annually import from Chile.

That is a remarkable statement for one who graces the editorial sanctum sanctorum of a great newspaper, that the plant developed at Muscle Shoals can not produce over one-thirtieth of the nitrogen imported annually from Chile. If he had studied the record and knew anything about the facts he would know that the development at Muscle Shoals will produce annually anywhere from one-fifth to one-sixth of the amount of nitrogen that is imported from Chile every year, and not one-thirtieth. I do not know where he got his facts. He was not reading the speeches of my friend from Tennessee [Mr. McKellar] or the speeches of my friend from Nebraska [Mr. Norris], because in the wildest flights of their imagination they never went so far as to say that there could only be manufactured at Muscle Shoals one-thirtieth of the amount of nitrates that we import annually from Chile.

According to my figures—and if I am incorrect I will ask my friend from Alabama to correct me—we import annually from Chile about 900,000 tons of Chilean nitrates. The 40,000 tons of fixed nitrogen that will be produced at Muscle Shoals will be equivalent to 250,000 tons of the Chilean nitrates which come in. Figuring that out, it shows that we will produce at Muscle Shoals when we reach the maximum 40,000 tons of fixed nitrogen, or about one-fifth or one-sixth of the amount that is imported from Chile every year. Yet this great newspaper, through its editorial columns, in an editorial written by a novice who is supposed to be there to educate and lead the people along right lines, is wrong to a very great extent in that first proposition which he lays down.

Mr. UNDERWOOD. Mr. President, may I interrupt the Senator?

The PRESIDING OFFICER (Mr. Moses in the chair). Does the Senator from Mississippi yield to the Senator from Alabama?

Mr. HARRISON. I yield gladly.

Mr. UNDERWOOD. So that the Senator may accurately educate the gentleman about whom he is talking I should be very glad to put the actual facts into the Record at this point.

Mr. HARRISON. I will be glad to have the Senator do so.

Mr. UNDERWOOD. Of Chilean nitrates in the year 1923 there were imported into this country 894,529 tons. That amount of importations was equal to 144,000 tons of pure fixed nitrogen. The production of coke-oven ammonia amounted to 458,000 tons, or 95,300 tons of pure nitrogen. The two added together make a total of 239,300 tons of pure nitrogen.

The plant at Muscle Shoals is to produce 40,000 tons of nitrogen, which is one-sixth instead of being one-thirtieth, of the importations. In fact, if the importations of Chilean nitrates were thirty times more than the capacity of the plant at Muscle Shoals, they would amount to one-half of all the nitrates we have imported from Chile since we began such importations in 1831. Down to the year 1923 the total importations from Chile were only 16,370,258 tons, whereas if the ideas of this gentleman were carried out and the importations were thirty times greater than the quantity of nitrogen to be produced at Muscle Shoals we would be importing over 7,500,000 tons a year from Chile. Of course, as my friend the Senator from Mississippi says, the figures are simply absurd in their enormity.

Mr. HARRISON. Then, too, on every ton of the nitrates imported from Chile, amounting to nearly 900,000 tons annually, the farmers of America have to pay \$12.53 a ton export duty to the Chilean Government. That is what that Government exacts on nitrates that are exported to the United States. That is an enormous figure, indeed, and yet this editorial writer says that the enactment of the pending proposal can not affect the prices of fertilizer to the American farmer.

Let us see further what the editorial says:

Second, because nitrogen itself is not a fertilizer—at best it is only 10 per cent of a fertilizer—it must be mixed with other chemicals.

I suppose if we wanted to find an expert on fertilizers or on nitrogen we would not particularly go to the great metropolis of New York; but certainly I presume if that city were searched with a fine-tooth comb there could not be found in it one so ignorant as to say that nitrogen is not a particular kind of fertilizer. Certain kinds of soil demand nitrogen just the same as other kinds of soil may demand potash or phosphoric acid. So, if this unknown editorial writer has done nothing more he has certainly shown his ignorance with respect to the fertilizers that are required and are produced in this country.

Let us see further. He says, in this editorial:

Third, nothing that the Shoals can do with nitrogen—even if it produces 40,000,000 tons a year instead of 40,000—can affect in any way the prices of those other chemicals.

A remarkable statement! The less the nitrogen costs, the more the farmer can pay for the other ingredients that go into the fertilizer; and yet this unknown editorial writer says it could not affect the prices of the other ingredients that go into the different kinds of fertilizer!

Let us go further:

The Shoals is not primarily a nitrate plant. The Shoals is a power station.

Evidently this unknown editorial writer wants to create a great power station, so that power and power alone, and not fertilizer, can be sold to that section of the country. He says:

Those three dams which have cost the country millions can be made to furnish 850,000 horsepower annually.

Why, there is now completed but one dam—Dam No. 1. That develops no power at all. It was not constructed for power purposes. Dam No. 2 will not be completed until July of next year. As shown by the map there, after the completion of Dam No. 3—which has not yet been authorized by the law, and which no one thinks can be completed for at least five years, although this remarkable editorial writer, whose name is unknown, writes as though it had been completed—I say, this chart shows that even from Dam No. 2 and Dam No. 3 they can only develop, of primary horsepower, 241,000 annually. That is based on the acquisition of 120,000 steam power. Yet this editorial writer says that they are developing, from these three dams that cost millions, 850,000 horsepower; and then he says:

Of course that will gobble up all the power in that section, and none will be left.

Why, Mr. President, judging from the surveys that have been made and the evidence that appeared before the Agricultural Committee, in the section of country south of the Ohio and east of the Mississippi there is susceptible of being developed 8,000,000 installed horsepower. At Muscle Shoals the total of primary and secondary horsepower is only about 850,000—only about one-eighth or one-tenth that that great section is susceptible of developing. So I hope that the particular writer of this great newspaper—and I apologize to its management for even having to take issue with an editorial—will be called in and called down for trying to mislead the American people by certain statements that are not substantiated by the facts, and that they will print another editorial based on facts. The New York World has never tried to mislead. It is a great newspaper, and I am sorry to see that editorial appearing in its columns.

Mr. UNDERWOOD. Mr. President, my friend from Mississippi [Mr. Harrison] has so clearly and forcefully answered the statement, or alleged statement, or attempted statement in the editorial of the New York World that it is not necessary for me to say anything, except that I regret, when an effort is being made here to secure a nitrate supply for the defense of the country, that a great paper in the great metropolis of the Nation—the point where attack from an enemy might and probably would come first—entirely ignores the fact that we are without a powder supply unless this plant is developed.

My friend from New York introduced this editorial merely, as he said, to show the sentiment of the country. I have here a letter that also shows the sentiment of the country westward from New York, and I ask to have it read at the desk.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The reading clerk read as follows:

AMERICAN FARM BUREAU FEDERATION,
Washington, D. C., December 9, 1924.

HON. OSCAR W. UNDERWOOD,
United States Senate, Washington, D. C.

MY DEAR SENATOR: For five years the American Farm Bureau Federation has sought a solution to the question presented in the operation of the nitrate plant and water-power development at Muscle Shoals, Ala. If the air-nitrogen industry is to be established in the United States, this question must be settled.

Our position is that this property can best serve the public if maintained in operating condition for the production of explosives in time of war and used in the service of agriculture for the production of nitrogen and other fertilizer materials, these to be combined into high-grade compounds. To secure this result we have advocated private operation and earnestly supported the acceptance of the proposal made by Mr. Henry Ford to take over this property. This offer has now been withdrawn, due to the failure of the United States Senate to accept it.

In order that a decision may be reached as promptly as possible, we have considered the various solutions presented by the bills before the Senate, and believe that the principles outlined in the Underwood bill would form a basis upon which a settlement can be reached. It is our purpose to support private operation if a proposal embodying the main principles of the Ford offer can be secured. If not, we will support the alternative presented in the Underwood bill—that is, Government operation.

With this statement of the position of the American Farm Bureau Federation, we ask that you give your support to the Underwood bill to secure its early passage.

Very truly yours,

AMERICAN FARM BUREAU FEDERATION,
E. B. REID,
Acting Washington Representative.

Mr. HEFLIN and Mr. COPELAND addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. HEFLIN. Mr. President, in line with what has been said by my friend the able Senator from Mississippi [Mr. HARRISON], I desire to submit a few remarks to the Senate.

This mysterious expert from New York who has written the editorial to which reference has been made, knows about as much about fertilizer as did the farm demonstration agent from New York who was sent down by the Agricultural Department into the Southern States to report on conditions in the cotton crop. Those who are familiar with the cotton plant know that when the blossom first appears it is snow white, and that in two or three days it is rosy red, and then finally fades and falls, having done its work in producing the little boll which appears when the blossom falls. This expert, who knew as much about cotton as this writer in the New York World knew about the making of fertilizer at Muscle Shoals, was sent down into the State of Oklahoma to report on cotton prospects in that section. He came back and, when asked what he thought of the situation, said that he believed the red-blossom variety of cotton was better adapted to Oklahoma than the white-blossom variety, and I think he was promoted for his knowledge upon the subject. [Laughter.] So this gentleman who wrote this editorial that has been read to us knows nearly as much about fertilizer as this field agent knew about cotton blossoms in the land of Dixie.

Mr. President, it may be that this writer represents the same interests that rejoiced when Ford withdrew his offer. I want to read to the Senate a statement from the Wall Street Journal:

[From the Wall Street Journal, October 22, 1924]

CHILEAN NITRATE OUTLOOK—FORD'S WITHDRAWAL OF MUSCLE SHOALS OFFER RESULTS IN BOOM TO CHILEAN INDUSTRY

SANTIAGO, CHILE.—Henry Ford's withdrawal of his offer to take over the Muscle Shoals project has resulted in a considerable boom in the Chilean nitrate industry. Chile is the greatest nitrate producer in the world, and the United States is her principal customer. With Ford in control of Muscle Shoals on an announced program of making vast quantities of nitrate from the air, Chilean producers saw ruin ahead of them. Nitrate shares in London rose from two to three points as soon as news of withdrawal of the Ford offer was received.

Mr. President, the Chilean people of course rejoiced when Henry Ford withdrew his offer. They knew that he would reduce the price of fertilizer about half. They knew that the supply of Chilean nitrates coming into the United States would be cut in two. They feared the acceptance of the Ford offer; and the interests that were working with Chile right here in the United States rejoiced with Chile when Mr. Ford withdrew his offer. This statement tells the tale.

Why, the stocks in the Chilean nitrate industry went up immediately when Ford withdrew his offer. The pendency of the Ford offer had a depressing effect upon the Chilean industry. Those who owned and operated it were disturbed. Why? Because in the United States the Government was about to establish a nitrate plant that would be in strong competition with Chile; and yet we have heard in this Chamber from day to day, from men some of whom are nearly as well informed as the editorial writer in the World, that it is a matter of doubt as to whether nitrates can be produced at a profit at Muscle Shoals.

Mr. President, that position is utterly ridiculous. Why, the testimony throughout the hearings we had before the Agricultural Committee sustained the contention I have made from the outset in this body, that we can make it for about half the price for which it now sells. I want to read a statement from Mr. Callan, one of the expert witnesses before our committee. He said:

At Muscle Shoals, if our process were installed, with horsepower at what is supposed to be cost, you could produce ammonia in the neighborhood of 5 cents per pound, or perhaps less, by this process and by making the hydrogen by the use of power or in an electrolytic cell plant.

I asked him:

A little while ago you stated that this fertilizer ingredient that you sold for 12 cents and as high as 30 cents could be made for less than 10 cents. Is that right?

Mr. CALLAN. Anhydrous ammonia can be made for less than 10 cents per pound, synthetically, when you have no cost for hydrogen.

Then I asked:

What do you figure this could be made at Muscle Shoals for?

Mr. CALLAN. Fertilizer ammonia can be made at Muscle Shoals by this process for something in the neighborhood of 5 cents per pound for the ammonia.

At what price is it selling now? The testimony before the committee was that the selling price was about 30 cents. Yet some Senators seem to doubt that fertilizers can be made at a profit at Muscle Shoals. I do not know how they get their impression, in the face of this testimony.

Then I said:

Mr. Mayo, who represents Mr. Ford, in the hearings here several years ago—two years, probably, since we have been having these hearings on the Muscle Shoals matter—said they thought they could produce fertilizer down there at about half the cost of the price it was selling for. Do you agree to that?

Mr. CALLAN. I agree that you can produce ammonia at Muscle Shoals at perhaps half the cost of its selling price at present, as ammonia is selling, for example, in sulphate of ammonia.

Mr. Callan agreed that you can produce ammonia at Muscle Shoals at perhaps half the price at which it is selling now.

Mr. President, we know that there are quite a number of fertilizer companies in the United States. We also know, according to the report of the Federal Trade Commission, that seven of the big fertilizer companies fix the price. They constitute a trust. We have a Fertilizer Trust in the United States, and this plant established at Muscle Shoals will do more to educate the people upon the cost of the manufacture of fertilizer than anything that we can do. If you can teach the people by the operation of this plant at Muscle Shoals that fertilizer can be produced there at a very much lower figure than the price at which it is being sold for to-day by the companies in the various States, they are going to ask for a reduction in price, and the amount of 40,000 tons of fixed nitrogen, mixed into commercial fertilizer, will have a tremendous effect in bringing down the price. There is no doubt about that.

The other day I read to the Senate what I want to refer to again in this connection. Mr. Waldo, testifying before our committee, said:

We do not claim that he [Mr. Ford] guarantees to cut the price of fertilizer in half. We say it is a reasonable expectation.

Then the chairman of the committee, the Senator from Nebraska [Mr. NORRIS], said:

It is a reasonable expectation, no matter who gets it. I think it is fair to assume that we are going to cut the price of fertilizer in two in some way.

Mr. President, the chairman of that committee was evidently convinced at that time that this was what was going to happen down at Muscle Shoals.

Mr. SMITH. Mr. President—

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from South Carolina?

Mr. HEFLIN. Certainly.

Mr. SMITH. If the Senator from Alabama will allow me, as he is discussing at this time the probable cost, just the other day there was in my office Doctor Whitney, the Chief of the Bureau of Soils, who has to do with the practical application of chemistry to the soil, and has perhaps taken as great an interest in this matter as any man in the employ of the Government, and if the Senator will allow me, I will just read a letter right at this point which he has written me.

Mr. HEFLIN. I shall be glad to have the Senator do that.

Mr. SMITH. The letter is as follows:

MY DEAR SENATOR SMITH: In compliance with your request for information regarding the cost of nitrogen in the present commercial forms and the estimated cost under the proposed nitrogen-fixation methods I beg to state that you will find this discussed in the Muscle Shoals hearings before the Committee on Agriculture and Forestry, United States Senate, Sixty-eighth Congress, first session, part 3, on pages 1357 and 1359, and also regarding potash on page 1354. You will see that, based on the prices quoted, the ammonia costs about 12 cents a pound in the present commercial products, and it is estimated to be produced at around 6 cents a pound at Muscle Shoals. My testimony before this committee I think you will find covers very much the subject as we discussed it to-day.

Mr. HEFLIN. That bears out what I have been saying about reducing the price of fertilizers at Muscle Shoals. Mr. President, that goes to show why all these companies which are fighting the operation of a plant established at Muscle Shoals for the purpose of making fertilizer are afraid of this proposition. Why are they afraid of it? They do not want the truth known as to how cheaply fertilizer can be produced in the United States. The farmers of America are being literally held up by the Fertilizer Trust. They ought to be delivered from its clutches. This Muscle Shoals proposition will do it. Yet we are met on every hand with misinformation to the effect that it is very doubtful whether fertilizer can be made at Muscle Shoals. The fact that there is opposition by the Fertilizer Trust to this movement is proof positive that it can be done. They know it can be done, and they do not want it done. This New York editorial writer seems to have let the cat out of the bag when he said that the Muscle Shoals project ought to be used for power purposes. Of course that is what the Fertilizer Trust would like to have it used for. But we want to use it to make fertilizer, to make nitrates for military purposes in time of war and for fertilizers in time of peace.

I want to bring this thought to the attention of the Senate. As the Senator from Mississippi [Mr. HARRISON] said, we are paying millions every year for nitrates to Chile. It amounts to about \$12,000,000 per year, and every 11 years we pay to Chile the whole cost of the Muscle Shoals project—power plant, locks, dams, and all. Just multiply that amount by 11 and you have what we pay to Chile every 11 years, which is more than the entire cost of all that we have done at Muscle Shoals. That is what you are giving away to a foreign Government, and you are leaving this Government helpless in the hands of a foreign country in time of war. If a foreign enemy should seek to invade our country and we should cry out to Chile to let us have the nitrates needed in a hurry, Chile might say, "Why, we are going to be neutral in this matter."

"We are not going to let you have nitrates. It would be considered an unfriendly or hostile act by our friend, your enemy, and therefore we can not supply you." Shall we be caught napping in the face of such a contingency? Here we would be up in the air, then, with no operating nitrate plant of our own, and then Senators who have opposed this project would wake up and say, "We were wrong in our position in that matter."

Mr. President, Mr. Hooker, of New York, one of those who put in a bid for the Muscle Shoals project, testified that fertilizer could be made at about half the price for which it is selling at present, and my recollection is that every expert witness before the committee, or practically every one, representing these companies on the outside testified that they could do what Mr. Ford said he could do. That was not true in the outset, I will say to the Senate. In the outset we were showing that Ford was going to do this remarkable thing, that he was going to make fertilizer at half price at Muscle Shoals, and they all said then that it could not be done. But later on, when they saw that it looked as if Ford were going to get Muscle Shoals and they knew he would make good and produce fertilizer at half price, they came in and said, "We will just make a clean breast of it all. Of course it can be made at half price, using the water power at Muscle Shoals."

So now we have brought them to that point, and nobody except some Senator here denies that fertilizer can be made and sold at a profit at Muscle Shoals, and I am glad my colleague accepted the amendment of the Senator from Nebraska which compels the making of fertilizer, not leaving in the phrases "if practicable" and "upon demand." Of course there will be demand. In his speech the other day the Senator from Nebraska said, "We have not half enough fertilizer in the United States now," and I agree with him. He said, "If we had twice as much, and the price were reduced, there would be a great deal more used," and I agree with him again.

Why not do something here now which will bring down the price of fertilizer to the farmers of the United States? We can do it. Here is a step in that direction at least, and why not take that step?

I was wholeheartedly, as all Senators here know, for the Ford offer. I did everything in my power to have it accepted. I exceedingly regretted his action when he withdrew his offer. With the Senator from Tennessee [Mr. McKELLAR], my good and able friend, I wired Mr. Ford and begged him to reenter the field, asked him to renew his offer, but he did not do so. He is out of our consideration. We are not responsible for the parliamentary status in which we find ourselves. Mr. Ford left us in this situation. When Congress adjourned his bid was pending. So was the bill introduced by the Senator from Nebraska. Those bills had been reported to the Senate and both of them were on the calendar. When Congress reconvened Mr. Ford's offer had been withdrawn. There was nothing for us to do but to offer a substitute for the Ford offer, and my colleague has done that.

Mr. DILL. Mr. President—

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Washington?

Mr. HEFLIN. I yield.

Mr. DILL. I would like to ask the Senator this question: If no legislation is enacted by Congress before the 4th of March, when we will adjourn, what will be the development at Muscle Shoals?

Mr. HEFLIN. I do not know. I am trying to do something to prevent what I fear would be the situation.

Mr. DILL. Will the Secretary of War have the power to dispose of it?

Mr. HEFLIN. The Secretary of War would in all probability do something with it. I understand that he thinks he has that right. I hardly think he has, but I understand he feels that he has.

Mr. DILL. Does the Senator think that the Secretary of War will assume the power to dispose of it if Congress does not do something?
